The same effect is perhaps still more strikingly manifested in regard to the magnificent mosaic paintings on the interior of the great dome, which, seen from below, are so much diminished that the pen in the hand of the prophet in one of the lower compartments, seen from below, seems to be less than 12 inches in length, though in reality 6 ft. To those who know St. Paul at London, an idea of the vastness of St. Peter's may be given by mentioning that the floor of the former has an area of only 2 acres, and that if the latter of 5 acres. The extent of area is still more disproportioned. That of St. Paul's was not more than 2730,000 that of St. Peter's, including its monuments and embellishments, is estimated at from 17 to 18 millions. Here, however, other considerations enter and place St. Peter's in a less favourable light. The immense mass lavished upon it were in too many instances the hard-won earnings of the industrious poor, sent away from them by the extravagance of indulgences, a chicanery so reckless and palpable as at last to have roused the general indignation of the better part of the Christian world and thus made the completion of this wonderful temple not merely a precursor but a main cause of the glorious Reformation. Among the other remarkable churches of Rome though they all suffer by the overshadowing of St. Peter's, are St. John Lateran an isolated spot near the wall of the city. Owing to the numerous restorations and repairs, changes to which the original structure has been subjected, it is a very handsome but not a very ancient church. It is a fine example of the style of the late empire, but its facade, composed of four large columns and six pilasters, sustaining a massive entablature and balustrade on which are colossal statues of our Saviour and ten saints, is considered a fine specimen of the architecture of the last century while its Cosmo chapel, with which elaborate ornaments and gilded columns of precious marbles, bass-reliefs, and even gems have been lavished with the greatest profusion is without a parallel. This church, which furnishes one of what are considered the great sights of Rome in the benediction of the people by the pope on Ascension-day from one of its balconies is remarkable as the spot where five councils, which bear its name have been held. Santa Maria Maggiore, which ranks third among the basilicas is supposed to occupy the site of a temple of Juno Lavinia, and to have derived from it the three pillars of white marble which support its central nave as well as the four columns which support its central nave as well as the four columns which support its central nave with tasteful and costly decorations is one of the finest of its class in existence. But its exterior though provided with two octastyle porticoes of little value in front of it is a most beautiful monument of greater value may be seen in the most beautiful Corinthian columns of white marble 34 ft. high, capitals of the same and capital. It formed part of the splendid basilica of Constantine but is believed to belong to a much earlier and better period of art. A bronze statue of the Virgin on its top has given it the name of the Columnella VerGINE. Santa Croce in Gerusalemme, the fourth of the Roman basilicas, takes its name from its supposed possession of a portion of the true cross and a quantity of earth which was brought from Jerusalem and mixed with its foundation. It is richer in relics than in architectural merit but possesses some fine mosaics of Egyptian origin, and is not without historical interest as the church in which the popes used actually to consecrate the celebrated Golden Rose and by the presentation of which to the great emperor of Saxony it was once vainly hoped to entice him away from the cause of the Reformation. Among the parish churches a very few may be specified. Santa Agnese, and is situated on the spot where St. Agnes was publicly exposed, after being put to the torture, and presenting one of the purest and most elegant specimens of the Greek cross. St. Agostino, with an elegant but simple front of travertine taken from the Colosseum the earliest chapel that was constructed in Rome, and a celebrated fresco by Raphael, representing the youth and two angels. St. Andrea della Valle, rendered conspicuous by its fantastic cupola and temple, and remarkable for its curious use on Good Friday when among other profane mummeries an attempt is made by what is called the *Pre Ose* to imitate the hours of our Saviour's agony on the cross. St. Andrea della Valle, remarkable for its columned facade, with statues by Domenico Guidi, Ercole Ferrata, and Bernini, its beautiful cupola, and its fine paintings, including frescoes of the four Evangelists and of the Flagellation, and the Resurrection of St. Andrew by Domenichino. St. Antonio Abate, supposed to occupy the site of a temple of Diana, and

famous for the singular spectacle which it exhibits on the Feast of St. Anthony when droves of animals of all kinds, including the mules of the penitents, and the horses of the pope and cardinals, assemble at the church door to receive a benediction and be sprinkled with holy water, is a picturesque scene against the sky during the smoldering year. Anselmo's church of great antiquity, and supposed to occupy the site of a temple of Jupiter but claiming notice on the somewhat singular ground of being internally and externally the ugliest of all the Roman churches. St. Bartolomeo, built on the island of that name in the Tiber on the site of the celebrated temple of Æsculapius, and containing 24 granite columns supposed to have belonged to it. St. Bernardo, a remarkable ancient building originally one of the halls or temples which fronted the outer wall of Diocletian's baths, surrounded by a dome of striking appearance and richly ornamented within with statues. San Bonifacio in the Trastevere, and to be the burial-place of Eusebius. San Biagio, with a magnificent sarcophagus of alabaster 17 ft. in circumference. Capriccio or Sta. Maria della Consolazione celebrated for its pictures of the Archangel Michael by Guido and the Conversion of St. Paul one of the best works of Pietro da Cortona and the Ecstasy of St. Francis, by Giovanni Stanetti. San Carlo al Corso, with one of the finest cupolas in the city four frescoes of the Cardinal Virtues, by Giovanni Stanetti, a fresco by Guido, and a mosaic of St. Paul, considered the masterpiece of Pietro da Cortona. San Clemente, on the Esquiline, said to have been founded on the ruins of Clement, St. Paul's fellow labourer by Constantine and containing a number of interesting frescoes by Masaccio. Sta. Costanza a circular building outside the Porta Pia built by Constantine with a baptistery and adorned with a peristyle of 14 coupled granite columns supporting a dome. Sta. Francesca Romana with some curious mosaics, and several fine tombs, among others that of St. Francesco, covered with rich marbles and bronzes. San Francesco a Piazza with a Dead Christ, by Annibale Carracci. San Gregorio in Velabro, remarkable as the only church in Rome dedicated to England's tutelary saint. Gesù the church of the Jesuits with a facade and cupola, by Giacomo della Porta, and an interior enriched with the rarest marbles, and several fine paintings decorated in the most gorgeous style, and containing the monument of Cardinal Bellarmine the celebrated R. Catholic controversialist. San Ignazio, the church of the Jesuit college richer even than Gesù in elaborate decorations, though often not in the best taste. San Ignazio on the Coelian, so called after Gregory the Great, on the site of whose family mansion it is built, and containing 16 columns of Egyptian granite from some ancient building and some celebrated frescoes by Guido and Domenichino. San Marcello in the Corso, a very ancient church dating from the fourth century and celebrated for the fine paintings of Permo del Vago. San Marco, with a nave and two aisles, separated by 20 columns of jasper. Sta. Maria degli Angeli originally the Pantheon, or great hall of Diocletian's baths converted into a church by Michael Angelo, and one of the most imposing which Rome possesses, containing 8 antique columns of Oriental granite, with attached bases of white marble, a fine fresco by Domenichino, and the tomb of Salvator Rosa. Sta. Maria-a-Cosmedin, and to have been built originally in the third century, on the site of the temple of Lato and Proserpine consisting of a nave, divided from two side aisles by 12 ancient marble columns, and remarkable for its fine Alexandrine pavement. Sta. Maria-di-Loreto, crowned by a double dome, and enriched with a statue by Farnagione considered one of the greatest productions of modern art, and an altar-piece, by Perugino. Sta. Maria-sopra-Minerva, so called from occupying the site of a temple of that goddess, remarkable as the only Gothic church in Rome, and celebrated for its tall length statue of our Saviour by Michael Angelo. Sta. Maria-di-Monte-Santo, and Sta. Maria-di-Miracoli, the two churches already referred to as separating the Corso from the Via Babuino and Via Ripetta, and better known from their position fronting the main entrance of the city from the N., than any architectural merit which they possess; Sta. Maria-di-Navicella, with a small marble ship in front of it, originally one of the oldest Roman churches but entirely renewed from the designs of Raphael, entered by a portico of Michael Angelo, and remarkable within for 15 columns of granite, and two of porphyry, and the Plaza of the nave painted in chiaroscuro by Giulio Romano, and Permo-del-Vago; Sta.

Maria-della-Pace, consisting of a nave, crowned by a fine octagonal dome, and celebrated for its paintings, particularly the four Sibyls, considered among the most perfect works of Raphael but unfortunately injured by recent restoration. Sta Maria-del-Popolo an ancient church remodelled on the plans of Bramante interesting from the number of its fine sculptures and paintings, and remarkable for its stained glass the only specimen which it possesses. Sta Maria-ni-Restore, said to be the first church in Rome, publicly set apart for worship, consisting of a nave and two aisles separated by 21 granite columns, evidently from ancient edifices, and adorned by some of the finest fresco of the city an Assumption by Donatello. Sta Maria-in-Via-Velata, sometimes called Chiesa-nova, one of the largest and most imposing of the Roman churches and enriched by marble and other ornaments chiefly by Ludovico-Carloni and some of the earliest productions of Rubens. Sta Maria-della-Vittoria with fine paintings by Donatello, Garavito, and Giulio and a so-called miraculous picture of the Virgin, whose intercession is said to have obtained many victories over the Turks taken from which at the siege of Vienna are ascribed to her. San Martino al Monti, with a very elegant and imposing interior consisting of a nave separated from two aisles by 24 ancient Corinthian pillars, of different varieties of marble some fine paintings by Gaspar and Nicolas Poussin and a crypt which formed part of the baths of Trajan. SS. Niccolò and Iohanne remarkable chiefly for its two ambones or marble pulpits its ancient mosaic and the episcopal chair of Gregory the Great. San Onofre enriched with some fine paintings by Donatello and a fresco by Michelangelo, and interesting on the burial-place of Isaac. San Paolo-esterno contains on a spot outside the walls alleged to be that where St Paul was beheaded, though the accuracy of the tradition is rendered more than doubtful by the absurd fictions associated with it respecting three fountains which miraculously sprung up while the head in falling, is said to have thrice bound. San Pietro-in-Minerva, finely situated on a platform, from which perhaps the best view of modern Rome is obtained and near the spot where St. Peter is said to have been beheaded and celebrated for the fine paintings of Sebastiano-del Piombo, Michelangelo, and others. San Pietro-esterno immediately adjacent is a celebrated site by Bramante consisting of a circular building, sustained by 16 granite Doric columns and universally admired as a model in its kind, and one of the most elegant of its modern structures. San Pietro-in-Vincoli a majestic edifice, supplied within by 20 ancient Ionic columns of Greek marble 7 ft. in circumference, and celebrated for its statue of Moses, one of the greatest creations of Michael Angelo and fine paintings by Donatello and Uccello. San Trinita entered by an ancient vestibule, resting on two granite columns, supported within by 16 Corinthian granite columns, possessed of a remarkable pulpit, sustained by a double flight of steps, composed of the largest blocks of rosso antico in existence and numbering among its relics a column of Oriental Jasper brought from Jerusalem and gravely alleged to be the very column at which our Saviour was scourged and a portrait of Him once in the possession of St. Peter. Sta Trinita-in-Aventina occupying the supposed site of the temple of Jmo Regina, supported within by 24 Corinthian fluted columns of white Greek marble, and enriched by its some small but valuable paintings by Basso Pinturo. San Stefano Rotondo a large and ancient structure, in the form of a circle, as its name implies, supported within by 56 pillars of granite and marble, arranged in an inner and outer circle, and having its walls covered over with beautiful frescoes of martyrdoms equally displeasing to the eye and defective as works of art. San Trinita-degli-Inglese in the Trastevere said to have been founded in 775 by the king of the East Saxons now dedicated to Thomas à Becket, one of whose arms is exhibited as a relic, and containing various portraits of Roman Catholics who were put to death during the reign of Henry VIII. San Trinita-degli-Inglese, Trinita-degli-Inglese with some remarkable paintings, especially a celebrated attempt to represent the Trinity by Guido—and the Trinita-de-Monti already referred to as occupying a conspicuous site above the Piazza-di-Spagna, approached by a magnificent staircase, and celebrated for its descent from the Orna, in which Daniele-da-Vinci, with the assistance of Michael Angelo has outdone all his other works.

Vol. II

Palazzo Massimo, &c.—The Vatican situated on the hill of same name, in the N. W. part of the city, immediately N. of and at one point connected with St. Peter's, is an immense irregular pile constructed at different periods, without any previously formed plan and hence devoid of harmony. It was probably commenced as early as the time of Constantine, and had become a palace of some consequence in the 5th century when it was occupied by Charlemagne at his coronation but the pope began to reside in it for the first time after their return from Avignon, in 1277. One monument was the vicinity of the Castle of St. Angelo, with which it is communicated by a covered gallery. From this time the pope resided with each other in continuing and embellishing the Vatican, through the task of roughing it up, the old palace nearly in its present form, was reserved for the use of the infamous Alexander VI.

The historic chapel of Sixtus the museum the library and the new palace, which now constitutes the most conspicuous portion of the whole pile, and the ordinary papal residence, are all of later origin. The whole covers an immense space and is rather a collection of separate buildings than a single structure. Owing to this its exact dimensions are not easily measured, but the length is estimated at 1131 ft., and the breadth at 767 ft. To give some idea of its vastness we are told that it has 8 grand staircases 200 smaller staircases 30 courts, and 44½ apartments. The most celebrated portions are the Sala Regia, leading to the Sala Regia, or hall of audience to a splendid apartment, covered with frescoes, illustrating various events in papal history and appropriately enough giving a conspicuous place to the Massacre of St. Bartholomew, the Cappella-Sixta or Sixtine chapel a lofty oblong apartment, about 160 ft. long and 50 ft. broad, covered with frescoes by Michael Angelo a choir which the Last Judgment 10 ft. by 80 ft. is most conspicuous, and is celebrated as the spot where the cardinal most in consequence to elect a pope, and many of the most gorgeous ceremonies of the Roman church are performed. The Sala Regia remarkably chiefly for Michael Angelo's two frescoes of the Conversion of St. Paul and Martyrdom of St. Peter the Sala a splendid portion of three stories completed from the design of Bramante by Raphael whose magnificent frescoes constitute its chief ornaments. The Sala Regia is divided into four chambers all owned by the Legation and equally adorned by the same master hand. The Sala Regia of Raphael worked from his cartoons and kept in a gallery adjoining the Sala Regia, the picture-gallery contains a collection of works, though small in extent not more than 60 pictures is unsurpassed in real value the museum, consisting of a series of galleries, in which the rich treasures of art which the world possesses have been amassed including not only others the Louvre and Apollo Galvane the library supported by many collections in the number of its volumes, but by none in the richness of value of some, and the precious value of more of its MSS. for as yet so comparatively few of its treasures have been properly examined the manuscript of the Vatican, a large valuable manuscript, and the palace and once occupied by the Inquisition and its garden in which was a interesting place of resort, whereas has already been more. Another place of resort across of palace across the summit of the Capitol and it bears the name of the Piazza del Campidoglio. It is a square of from the Corso by a flight of steps at the foot of which two Egyptian obelisks and at the summit two colossal statues of Lucius and Brutus standing beside their horses are conspicuous. In the centre of the piazza is a bronze equestrian statue of Marcus Aurelius, the horse of which is so full of life that Michael Angelo, on seeing it is said to have bid it *commo*. In the square are the senatorial palace, in which the Senate holds its court ornamented by Michael Angelo with a Corinthian colonnade, and adorned by a lofty tower beneath which the whole city seems to be exposed in detail, the palace of the Conservators containing the famous collection of books the museum of the Capitol with many interesting objects but few masterpieces of sculpture except those in the hall of the Dying Gladiator and a picture-gallery more extensive than that of the Vatican, though the paintings individually are of far less intrinsic merit. The private palaces, both by their number and magnificence constitute one of the peculiar features of the city and contain some of its finest collections, but cannot here be detailed.

98

most celebrated temples are those of *Faustulus*, on the island of the Tiber of which only a few remains are visible, among the buildings of the convent of San Mariolucco of *Antonius* and *Paulina* situated in the Forum and now incorporated with the church of San Lorenzo in Miranda of *Antoninus Pius*, now represented chiefly by eleven marble columns of its portico forming part of the present *Vigna di Torre*, or custom house of *Loreo* and *Proserpina*, already mentioned as the site and part of the structure of the church of *S. Maria in Cosmedin* of *Concord* only recently brought to light, on the side of the *Capitoline*, and still in regard particularly to a portion of its flank tolerably preserved of *Fortuna Virilis*, near the *Fonte Boia* now occupied as the *American church* and presenting one of the purest specimens of the 1st style in Rome of *Jupiter Capitolinus*, once the most magnificent of all the pride and wonder of ancient Rome, as it looked proudly down from the summit of the *Capitol* but now only dubiously traced in part of its foundations of *Mimara Medica*, still forming a *piazza* ruins on the *basilica* near the *Porta Maggiore* of *Alia* *Mimara* still a beautiful ruin, consisting chiefly of two *Corinthian columns*, supporting a magnificent entablature and continued frieze with an *attico* above, containing a full length figure of the goddess of *Saturn* on the side of the *Capitoline* above the Forum and forming one of its picturesque ruins

and above all of the *Lantheon* situated in a small dry piazza, between the *Forum* and the *Piazza Navona*, but at once one of the most striking and best preserved monuments of ancient Roman architecture. Its excellent preservation is undoubtedly owing to its early conversion into a Christian church under the name of *S. Maria Rotonda* it is entered by a noble portico 110 ft. long, by 40 ft. deep, composed of 16 *Corinthian columns* of *Thracian granite*, with capitals and bases of *Creek marble* and consists in its interior of a rotunda, 145 ft. in diameter crowned by a dome, the height of which is also 145 ft. The dome is embellished the work of *elaborate* is of *bronze*, hung on *bronze pillars* and the pavement is of *porphyry pavements* and *giallo antico* arranged in round and square slabs. The body of the building is of *brick and lime* in its interior surface seven large niches, six of which have fluted *giallo antico columns* the external surface was once coated with *marble*, but *vandalism* in which *Leo III* had a principal part, has deprived the building of this and many other ornaments. The most interesting object within is *Raphael's tomb*. To other antiquities most deserving of notice are *archaic pillars*, *basil aqueducts* and *amphitheatre*. One specimen of each will suffice. The first is the arch of *Constantine* built on what is called the *Via Triumphalis*, and one of the most elaborate and imposing monuments of the city though in several parts indicative of the decline of art. The noble pillar is the column of *Trajan* 125 ft. high composed of 34 pieces of white marble, covered over with *matchless sculptures*, giving the history of *Trajan's achievements* and containing, among others no fewer than 2700 human figures. For the colossal statue of *Trajan* holding a *gilded globe* which originally crowned the pillar, one of *Peter* has been substituted. If not the most extensive at least the most perfect of the baths are those of *Caracalla*, situated under the E. slope of the *Aventine*, and occupying an area of at least 1/2 m. in circuit. Their ornaments have all disappeared, but nature has done something to supply them, and few sights are more impressive than their *monumental ruins*, and *ruined arches* encircled by *flowery glades* and thickets of *wonderful blossoming trees*. The *aqueducts* are justly regarded as the most stupendous of the *Roman works*, but most of them though originally brought within the walls have their most magnificent remains considerably beyond them. That of the *Aqua Julia*, which pursued a course of 48 m., has a line of *arches* 5 m. long which stretches across the *Campagna* and is still used for bringing

in water into the city. The *amphitheatre* situated, in the *Colosseum* the grandest of all the *Roman ruins*. It is situated in the interval between the *Viminal*, *Quirinal* and *Esquiline hills*, and covers with its ellipse an area of above 5 a., it is built principally of *travertine*, intermixed with large masses of *brick and tuff*. The external elevation consisted of four stories, three of them composed of tiers of *arches*, and the

THE COLOSSEUM AT ROME.—From Cooke's Views in Italy

seats extending backwards and upwards in regular rows from the arena, were capable of accommodating, at least 87,000 spectators. The arena was 287 ft. long by 180 ft. wide, and furnished the attraction which drew together this immense assemblage composed of all classes of society noble and plebeian male and female. It gives a dreadful idea of the times to think that the main part of the sport consisted in the mutual butchery of trained gladiators, and in the exposure of heathen criminals and Christian martyrs to be torn to pieces by wild beasts.

History. The history of Rome is properly speaking, identified with that of the *Roman empire*, which it did not even be excluded in a dry register of events within moderate limits. In a more restricted sense however the city itself may be regarded as an individual history consisting chiefly of an account of its first foundation and of the various augmentations and embellishments which it received during the successive stages by which it rose to be not only the mistress of the world considered as the capital of a kind of universal empire but to be also for centuries the grandest, the richest, and the most populous of *European cities*. To this latter portion of Rome's individual history the present brief sketch is confined. Though much that historians have greatly related and their readers implicitly believed in regard to the origin of the city is more or less, it cannot be questioned that it was founded by *Romulus*, 753 years B.C. Its site was the *Palatine hill* and its houses consisting of humble huts, were enclosed by a rude wall probably like the *hill itself*, of a quadrangular form and pierced by three or four gates. Like all ancient Italian cities Rome appears to have had a clear unoccupied space both within and without the walls, and known by the name of *forum*. *Tacitus*, guided apparently by some ancient record, has in the fifth book of his *Annals*, minutely traced its contour. Writers are at variance as to the gradual extension of the city but the prevailing opinion is, that on the union of the *Quirinal*, a great addition was made including the *Capitoline* and part of the *Quirinal hills* with the intervening space afterwards chiefly occupied by the Forum, that on the destruction of *Alba Longa* its inhabitants came and fixed their residence on the *Capitol* that the *Aventine* was taken in by *Anna Martina*, and the *Viminal* *Esquiline*, and remainder of the *Quirinal* by *Thermythia* a place and *Servius Tullius*. New walls enclosing the whole city as it then existed, were begun by the former sovereign, and completed by the latter about 570 B.C. These walls embraced a circuit of about 5 m. and continued for 800 years to form

[illegible]

The pay at all of these at different periods is an interesting question but from want of data cannot be satisfactorily answered. Some have been extravagant enough to give it three millions over the census. Our estimate is a more probable and certainly not an unusual estimate for 1882, \$1,000,000.

In the town. The astronomical establishments including chairs of Latin mathematics, and philosophy are all located in the excavated of Barefooted Trinitarians. There is an hospital for the sick a house of refuge for wandering paupers, and an asylum for poor old men. In the town are abundance of churches, and convents, and a large number of the houses of these is much resorted to for its curative mineral properties and because it has been here erected. There is an old and a modern bridge. The latter erected in 1761 and connecting the old town with the new is about 600 ft above the water and spans the gulf where it is nearly 300 ft wide. It is enjoyed by the people and is particularly noted for its great advantage on the "0th of May" when there is made a great fair for leather saddlery embroidered garments and horses (the horses are small but active). The manufacture of bare cordovan and sole leather fine linen waxes fine chocolate, soap was quite starch, sugar syrup, coarse and fine sugar, and other articles are made. There is a mercerie flour and oil mills. Besides some products of industry a considerable quantity of fruit of excellent quality is exported indeed the apples and pears of Rouba are proverbial here ever for want of proper communication with the coast the commerce is of great importance. Rouba was taken by surprise by the English in 1485. In 1810 and 1812 it was captured by the French, who on retiring blew up the castle.

INAPARU or **PAK AMARU** a vil and com on a beautiful plain, in the Tuvave, not far from Laguna. It consists chiefly of about 200 houses grouped round a hill (the chapel) and has some manufactures of linen and a trade in corn, maize, fruits and vegetables. Pop 1800

ROSARIO (de-Cucur) a town in New Granada prov and 90 in NNE Pamploja, beautifully situated in a valley of same name, near the source of the Fuila. It consists of several clean paved and well built streets, has a parish church and a considerable train in oxen, mules and cattle. The first Colombian congress was held here in 1821.

ROSAZZO a to Naples, prov Calabria-Ultra I 53 m
NE Reggio on a height, surrounded by marshes, near
I. Isola Meseima. Pop 1760

ROSA, a seaport, Spain Catalonia, prov and 27 m. N E
Gerona, on gulf of its name, lat. 42 17 N lon 3 7 E It
consists of one large street along the shore and seven others
which cross it and a torrent divides the town into two parts.

At the E. end of the fortress in a ruinous state, in which it has remained ever since it was besieged by the French in 1808. It has an elementary school for both sexes, a parish church, another castle for the defence of the bay on a peak S.E. of the town, and a battery with five guns at its foot but there is no pier. It has some flour-mills and fishing, and a trade in wine oil, brandy, cork, and sugar almonds, steel, hemp, raw hides, staves, iron, timber, machinery, &c. Rome is placed near the steep of the ancient Rhoda, which is supposed to have been near the headland at San Pedro de Roda. Pop. 1048.

ROSARCO a vil and com Italy Piedmont, div Novara, prov. Lomellina, in a plain with a church. Pop. 1605.

ROSATE, a vil. AUSTRIA Italy prov. and 15 m. N.W. Pavia. It has a court of justice, three churches, and a trade in corn. Pop. 1976.

ROSBECOM a vil and par Ireland co. Kilkenny, Area of par 367½ ac. Pop. 1770.—The VILLAGE, on the Harrow opposite New Ross, of which it is a suburb, is an ancient place containing the picturesque remains of an abbey founded in 1267. There is a church and school, a police barrack, a distillery and a tannery. Pop. 578.

ROSCITZ, or ROSVITZ, a market in Lower Austria on the Schindia at the E. base of the Manhartsberg 20 m. N.W. Kornsburg with a church a townhouse, several tile-works, and a trade in corn and wine. Pop. 1567.

ROSA ITTA a vil MORISIA, circle Irschid lordship and near Strick with a church a chapel, and a mill. Pop. 128.

ROSACIANO a tn. Naples, prov. Abruzzo Ultra I. S.E. Civita di Terracina, on a hill 1 bank Pescara. Pop. 1369.

ROSA N a tn. Naples, prov. Principato-Citra, S.E. Capua, on a hill with a handsome church. Pop. 1025.

ROSCOFF a tn. and seaport France, dep. Finistère in a bay which forms a fine natural harbour opposite the Isle of Batz, 23 m. N.E. of it. It has a handsome church, partly in the Gothic and partly in the Italian style. The harbour is well sheltered by a jetty and the whole place is filled with sailors and smugglers. In the garden of the old Capuchin convent there is a prodigious fig-tree under whose branches, supported by scaffolding, 200 persons could find shelter. The defender on his escape to Scotland, after the battle of Culloden, landed here. Pop. 1303.

ROSK (MCM) an island co. Ireland prov. Connaught, bounded N. by Glenties and Leitrim P. 8 Leitrim Longford Westmeath King's co. and Galway W. Galway and Mayo. Greatest length 40 m. breadth 40 m. Area, 545,407 ac. of which 440,522 are arable. The surface is undulating or flat, except towards the N. where the Curlew Mountains lie, near Glenties and the Headline near Leitrim. The highest summits in the county attain an elevation of 1000 ft. to 1200 ft. The Curlew Mountains consist of the old red sandstone formation the Rosettes or Brangishove of shales and sandstones, with three beds of coal resting on beds of the millstone grit series, from which good firestone is obtained. The level parts of the country are for the most part occupied by the forest, no belonging to the great carboniferous limestone district of central Ireland. Limestone abounds and is quarried for building; coal and iron have been wrought, but never to advantage. Limestone, clay and pipe clay are found in various places. Ponds are numerous, but the soil in the level limestone districts is very fertile, and the extent of pastureland considerable. The principal crops are oats, wheat, and potatoes, which in 1851 occupied respectively 22,771 or 64½ ac. and 30,923 ac. The pastures are luxuriant, and the breeds of cattle and sheep good, the former long horned and the latter long woolled. There are few dairies. The linen manufacture was at one time pretty extensively diffused over the county but is now nearly extinct. Roscommon is drained by the Shannon, and contains several lakes. It is divided into nine baronies and 56 parishes and returns two members to Parliament, both for the county. Principal towns.—Roscommon Boyle and Elphin. Pop. (1851) 174,432.

ROSCOMMON a market and corporate tn. formerly a part of Ireland, pop. above 50,000 in W. by N. Dublin. It lies on a hill slope, is generally ill built, straggling, and ill arranged, but contains some respectable dwellings, chiefly of recent erection. It has a spacious courthouse and jail, an infirmary and fever hospital, a small military barrack, a neat church a large R. Catholic chapel, and a N. Wesleyan meeting-

house; and a considerable trade in grain. Here are the remains of an abbey founded in 1267 and of a magnificent castle of nearly the same period. The town gives the title of earl to the Dillon family. Area of par., 9819 ac. Pop. 7235 of tn. 3087.

ROSCOMMON par. Ireland co. 5966 ac. P. 814.

ROSCONNELLI, par. Ireland co. Kilkenny and Queen's co.; 2189 ac. Pop. 620.

ROSCORCA a market tn. and par. Ireland, co. Tipperary. The town on a tributary of the Proske, 50 m. W. by W. Dublin, is irregularly laid out, indifferently built, and in many places grossly dilapidated. It has a parish church a R. Catholic chapel places of worship for Wesleyans, Primitive Methodists, and the Society of Friends a market house, barracks courthouse bridewell fever hospital urban workhouse; and a considerable retail trade. It is a place of great antiquity and the remains of castles, and ecclesiastical buildings, with a remarkable round tower, and other relics of the past, give it an interesting appearance. Pop. 3359. Area of par. 4390 ac. Pop. 6588.

ROSBY ISLAND Pacific Ocean lat. 14 32 S. lon. 164 9' W. It is a small low annular coral island fringed at high water with exception of two small banks one of which is entirely covered by a clump of trees. Great numbers of sea fowl frequent the island. Small turtles of inferior quality are also met with.

ROSE (1) a tn. Naples, prov. Calabria-Citra 7 m. N. Cosenza, on a hill near r. bank Crati with a church and a convent. Pop. 1650.

ROSE-AM par. Eng. Devon, 5092 ac. Pop. 587.

ROSE SAULT a small seaport W. India on the N.E. coast of Guadeloupe, cap. dest. and on a bay of same name. Its site is very unhealthy but it is well built and has a considerable trade. Pop. 3251.

ROSEAL a tn. W. India cap. of Dominica, on a point of land S.W. coast, between the bays of Woodbridge and Charlotteville. It is regularly built and consists of houses formed of wood and generally painted on the outside. The harbour is good and the market is well provided. Pop. about 5000.

ROSEHARTY small seaport Scotland on Aberdeen on a point of land projecting into the Moray Firth 4 m. W. Fraserburgh, inhabitants chiefly employed in fishing codling haddock and skate. The herring fishery is also carried on to a considerable extent. Pop. 844.

ROSELL a tn. Spain, Valencia, prov. and 43 m. N.N.E. Castellon-de-la-Plana, in a mountainous district with a church courthouse prison and primary school manufactures of fine paper several flour-mills and a trade in charcoal and timber. Pop. 1425.

ROSELLA a tn. Naples prov. Abruzzo-Citra, 24 m. S. Lanciano at the foot of a precipice. Pop. about 1000.

ROSEMARKET see ROSEMARKET.

ROSEMARKET a tn. and par. Scotland, co. Aberdeen, beautifully situated on the Moray Firth 11 m. N.N.E. Inverness. It is a very ancient place with a spacious and handsome parish church, the ruins of the cathedral of Ross and valuable salmon fisheries. Extent of par. 6 m. by 3 m. Pop. 1778.

ROSENALLIS, a vil. and par. Ireland, Queen's co. 49 m. W. S.W. Dublin with a church, the foundations of a round tower and in the Blavennish mountains, which lie a little S. a quarry of excellent fire-stone, which is in great demand for hearths and chimney places. Area of par., 14,119 ac. Pop. 5604.

ROSENAU ROSKAWA, or ROSENTOVA, a tn. Hungary, cap. co. Gödöllő 60 m. N.E. Pesth pleasantly situated in a plain surrounded by hills, 1 bank Rába. It is nearly in the form of a square, and consists of 10 streets and a rather large market-place, in the centre of which stands the cathedral with a lofty tower and opposite to it the bishop's palace, which was formerly a Jesuit college. There are other two churches, a Protestant and a R. Catholic; a townhouse, Franciscan monastery gymnasium, and hospital. The manufactures consist chiefly of woollen and linen cloth, paper and ironware, and the trade, which is important, is in iron and machinery (both extensively worked in the neighbourhood), honey, wax, wine, sugar, wine, wood, iron, linen, and drapery. The weekly market is so well attended, that 800 waggons

may often be seen in the market-places, loaded with corn, fruit, and other provisions. Rosenau suffered dreadfully from the Turks in 1668. Pop. 6998.

ROSENBAU ROSEN or ROSENOW, a market tn. Austria, Transylvania, 16 m. S.W. Kronstadt. It was once fortified, but only some vestiges of the walls now remain. It contains a Protestant and a Catholic church, and a turret castle of great antiquity, situated on a height immediately above the market-place. On the Burzen in the neighbourhood, are the ruins of the old fastness of Eilenburg. Pop. 3211.

ROSENBERG, or OLANO, a tn. Prussia, Silesia, gov. and 24 m. N.E. Oppeln, in a well-wooded but marshy district with three R. Catholic churches several schools and an hospital; manufactures of linen and hair, a silk-factory, and tile-works. Pop. 2660.

ROSENBERG a tn. Prussia, gov. and 17 m. E.S.E. Marienwerder, and on a lake of same name with several law-courts and offices a Protestant church, and has four annual fairs. Pop. 2369.

ROSENBERG or ROSENBERG, a market tn. Hungary, Hither Danube, on Lipan, 1 bank Wieg. 24 m. N.N.E. Neusohl. It contains a Marxist gymnasium, and a high school and has manufactures of earthenware and paper. There is an anastilact spring in the neighbourhood. Pop. 2532.

ROSENBERG or ROSEN, a tn. Bohemia, circle and 23 m. S. Budweis, a bank Moldau, with a church, and school townhouse, hospital and castle. The last is surrounded on three sides by the Moldau, and has a remarkable tower about 80 ft. high, and nearly as much below ground, and walls 12 ft. thick. The inhabitants live chiefly by agriculture and weaving. Pop. 1228.

ROSENBERG (ROSEN and KLEIN) two nearly-coincident vils Prussia, prov. Saxony gov. and 16 m. S.E. Magdeburg, on the Saale, with a church tile-works and several mills. Pop. 1866.

ROSENBERG, a vil. Bohemia, circle Leitmeritz about 90 m. from Agram at the foot of the Rosenberg, above the Libe. It contains a church and a school and has some manufactures of linen and hosiery and two tile-works. Pop. 1368.

ROSENETH par. Scot. Dumbarton, 8 m. by 2 m. Pop. 1044. The village of Roseneath lies near the mouth of Loch Gar, 22 m. W.W. Glasgow, and is much frequented for summer-quarters.

ROSENFELD, a tn. Württemberg, circle Schwarzwald, hall, and 6 m. S.E. Seil. It was once surrounded by walls, contains a Latin school and has several mills. Pop. 1807.

ROSENHEIM a tn. Upper Bavaria, near the confluence of the Giesenu with the Inn each of which rivers is crossed by a bridge 31 m. S.E. Munich. It has several public offices, four churches, a townhouse, and hospital; manufactures of articles in brass, marble-works, and a trade in corn, wine, wood, and malt particularly the last, of which nearly 10,000 tons are annually produced from the salt springs in the neighbourhood. Pop. 2740.

ROSENTHAL, a tn. Hesse-Cassel, on the Bünkraft, 11 m. N.N.E. Marburg. It has manufactures of ribbons, an iron and numerous spinning mills, a distillery and a trade in cattle. Pop. 1597.

ROSETO a tn. Naples prov. Capitanata, dist. and 16 m. S.W. Lucera, on a hill with an hospital. Pop. 3820.

ROSETTA, a marit. tn. Lower Egypt, on W. arm, Nile, 264 m. N.E. Alexandria. It is finely situated, well built and has a European appearance. Silks, leather, and iron goods are manufactured to some extent and the trade is still considerable, although it has fallen off greatly since the opening of the Suez canal. Here, in 1799, was discovered the famous Rosetta stone, which formed the key to the deciphering of the Egyptian hieroglyphs. It is now in the British Museum. Pop. about 16,000.

ROSGIATTO, or ROSGAT, a vil. Austria, Dalmatia, circle and little more than 1 m. from Ragusa on Mount Bardo, above the Ombla; with a parish church. Pop. 1166.

ROSEHIM, a tn. France, dep. Bas-Rhin, at the foot of the Vosges, in a beautiful valley, on the Mosel, 18 m. S.W. Strasbourg. It is surrounded by a wall flanked with towers, and entered by three gates. It is divided into three quarters—the high, middle and low town; contains two churches, both of them remarkably handsome, a townhouse and hos-

pital; and has manufactures of linen, and hosiery. There are mineral springs in the neighbourhood. Pop. 3666.

ROSIENNA, a tn. Russia, gov. and 100 m. W.W. Wlad, near r. bank Dnieper. It was once a place of considerable importance, though now in a very dilapidated state; and contained several R. Catholic churches, and a Marxist college. Under the Polish government, it was the capital of Samogitia. In the struggle for independence in 1831 the Lithuanian insurgents took possession of this town, after defeating the Russian army. Pop. about 1600.

ROSIER, two places, France—1. a tn., dep. Basaine, 30 m. S.E. Amiens with manufactures of hosiery P. 2496.

—2. (near-Schnee) (anc. Rosierum, Leucorum) A tn., dep. Moselle, at the foot of a vine slope on the Meurthe, 10 m. S.E. Nancy. It was formerly a place of strength, surrounded by walls, flanked with towers, of which part still remain. It has a cotton-mill and a fine breeding-stead. The salt springs, to which it owes its name have long ceased to be worked. Pop. 2061.

ROSIERS (Lac) a tn. France, dep. Maine-et-Loire, 16 m. S.E. Angers agreeably situated r. bank Loire. Pop. 1080.

ROSGNANO a tn. Italy Piedmont, div. Alessandria, prov. and 4 m. S.W. Casale. It is the seat of a court of justice and has three churches, one of them a large and handsome structure, a superior school two confraternities, and two sumptuous endowed chapels. Pop. 2319.

ROSGNANO, a vil. and some 1/2 m. away, on the top of a hill of same name, within view of the sea, about 17 m. from Leghorn. It is the seat of a court of justice, and has a parish church and a school. Pop. 4401.

ROSHANAR, a vil. Transylvania. See RASHAN.

ROSHINGYN, an isl. Indian Archipelago. See RANUA.

ROSKEN par. Ire. Cork 1875 ac. Pop. 870.

ROSLAW a tn. Russia, gov. and 68 m. S.E. Smolensk on the Oster at the confluence of the Stambowka and Glusomka. It has a considerable trade in agricultural produce. Pop. 5996.

ROSLIN, a well known vil. Scotland, co. and 7 m. S. Edinburgh, on a plain, 1 bank N. Esk. It occupies, for the most part, of one principal street, crossed at right angles by a smaller. The houses in the former are pretty well built of stone, and tiled. There are a chapel belonging to the Establishment a Free church and two juvenile schools; an extensive gunpowder manufactory, and a bleachfield. Close by the village are the celebrated ruins of Roslin Castle, and adjoining it the still more celebrated chapel. The former stands on a rocky escarpment, nearly surrounded by the lake but little more than fragments of its walls now remain. It was long the seat of the 8th. Duke earls of Caithness and Orkney but the date of its erection is unknown. The chapel stands on rising ground on 1 bank of the Esk, amidst the most beautiful scenery. It was founded in 1446, and is one of the most entire and exquisite specimens of ecclesiastical architecture in Scotland.

ROSLITUM, par. Eng. Derby 1191 ac. Pop. 879.

ROSMANIN, a tn. and par. Portugal, prov. Beira-Alta, com. and 26 m. S.E. Coutinho Branco. The metal molybdenum is found in the neighbourhood. Pop. 1180.

ROSS, a market tn. and par. England, co. Hereford. The town, 11 m. S.E. Hereford, on an eminence, at the foot of which flows the Wye, is divided into two parts, called the Borough and the Foregate. It is well paved, lighted with gas, and has many handsome shops and comfortable dwellings. The principal public buildings and institutions are a handsome parish church, in which the pillars support John Kyrle, Pope's 'Man of Ross' is interred; a place of worship for Independents, Baptists Wesleyans, and Friends a blue-coat school, and numerous other charities. The iron trade, which formerly flourished here, has long since declined and cider malt and wool, are now the principal articles of trade. Pop. 2674. Area of par. 3118 ac. Pop. 4617.

ROSS, numerous places, Ireland, including—1. An isl. in the lower Lake of Killarney, containing the remains of an ancient castle.—2. A par., co. Galway, comprising parts of Lough Corrib and Mask, and the Devil's Mountain, which rises 1114 ft. high. Area, 53,856 ac. Pop. 2698.

ROSS, or ROSSANARY, a small market tn. and par. Ireland, co. Cork. The town, 32 m. S.W. Cork, at the head of a narrow creek called Ross Harbour, consists of four small

streets and a square, and contains a small Gothic cathedral used as the parish church, a St. Catholic chapel, a national school, and a dispensary. Ross was formerly the see of a bishop, which was united to that of Cork in 1566. P 1041. Area of par 13,550 ac. Pop. 499.

ROSS AND CROMARTY two N counties of Scotland, but generally treated of as one, the latter comprising merely of detached portions of the former. See **CROMARTY**. There form an extensive maritime district, extending from the N Sea to the Atlantic, bounded E. by Inverness, and the Deeside, and Moray Firth. E. by the N Sea, N by the Firth of Dornoch and Sutherlandshire and W by the Atlantic Ocean. The county of Ross comprises also the large island of Lewis (which see). Area of the whole, including the islands, 1,904,000 ac. The W coast, which terminates N with Loch Broom, and S. with Loch Aish, is bold and rugged and deeply indented with bays and inlets. The principal bays those just named are Loch Carron, Torran, Fion, Lamsay, Little Loch Broom, and Gairloch. The principal inlets on the E. coast, are Bann Loch and Firth and Cromarty Firth and Dornoch Firth. The peninsula lying between it formed by the first two, is called the Black Isle. A great portion of Ross and Cromarty consists of lofty rugged mountains irregularly grouped, with deep intervening glens and ravines. Some of the former reach an elevation of from 2500 ft. to 4000 ft. In the W part of the county pasture of excellent quality abounds, but the agricultural portions are those which extend along the Firth of Moray, Cromarty and Dornoch, where the advantage exists of a fine soil and climate. As in most of the other counties in Scotland, agriculture has been much improved here of late years, the crops of wheat and turnips being at present equal to those in the more S counties. Potatoes, oats, and barley are raised by the smaller tenantry. A marked improvement has taken place also in the breeds of cattle and sheep, both of which are extensively reared. There are no rivers of any considerable size in either of the counties, but there are several fine lakes, the principal of which is Loch Maree, about 12 m long by 2 m broad. The united counties return a member to Parliament. Principal towns, Tain, Forres, and Dingwall. Pop. 62,70.

ROSS (New) a port for market in, and river-port Ireland, co. Wexford, advantageously situated on the Harrow about 2 m. below the confluence of the Dore 21 m by N Wexford. It is united by a bridge over the river with the suburb of Rushmore (which see). It is lighted with gas and contains two Established churches, two St. Catholic chapels, places of worship for Presbyterians, Independents, Methodists, and the Society of Friends, a friary, a summary market-house, cow market, fish market, fever hospital, dispensary, brewer's and barack on endow, grammar-school, a news-room and circulating library. Tanning and brewing are carried on to some extent, and the trade of the port is considerable, vessels of 200 tons being able to discharge at the quay at low water and of 800 tons at spring-tide. The dock returns a member to the House of Commons. Pop. but including Rushmore 9999.

ROSS (New) a vil and com. Italy Piedmont, div. Cuni, prov. and 7 m S.W. Saluzzo, a bank estate. It has several handsome mansions, a small square, in which the ancient parish church stands, and the remains of an old castle. P 2079. **ROSSANO** a vil. in Naples, prov. Calabria-Ultra, on a rocky height, 8 m. S. Gulf of Taranto and 29 m. N. Cosenza. It is an agreeable looking, well built place, surrounded by walls, and defended by a castle and contains a cathedral faced with marble 14 other churches seven monasteries, two parishes, a diocesan seminary and an hospital. It is a very ancient place, and is said to have been founded by the Centuri, and after it had fallen into decay to have been restored and colonized by the Romans. It was taken by assault, and pillaged by Totila, King of the Goths. Pop. 1560.

ROSS (New) a vil. in France, prov. Saxony gov. and 8 m. N. W. Harzburg on the Gersa or Gersbach. It is memorable for the victory gained near it in 1737 by Frederick the Great, over the Imperialists and French. Lagaria is worked in the vicinity. Pop. 301.

ROSSBAR or **ROSSBAR** a vil. Bohemia, circle Elbow, prov. and about 5 m. from Ayzawa, with a church, a school, and manufactures of cotton and woolen. Pop. 2954.

ROSSHEIM a mountain, Switzerland. See **GRUBAU**.

ROSSDROIT, par. Irel. Wexford 8166 ac. Pop. 1818. **ROSSDUFF** par. Irel. Waterford 197 ac. Pop. 96. **ROSSEL**, a vil. Prussia, gov. and 29 m. S. S. Elbingberg. It is walled and has a castle a church and progeny several courts and offices, and a trade in linen and wool. Pop. 2860.

ROSSEL, a vil., S. Pacific Ocean, Louisiana Archipelago, lat. 11° 22' S., lon. 154° 30' W. (N) 22 m. long, E. by W. and 104 m. greatest breadth. It is high and mountainous, thickly wooded, with occasional large clear grassy patches, and has a beautiful appearance from the sea. Towards the W and the hills become lower and more detached but present the same features. The mountain ridges one of which is 2523 ft. high, form sharp, narrow crests, and occasional peaks but the outline is smooth and the rock nowhere exposed, even the steepest ridges being covered with vegetation. Some of the trees are of great dimensions, others are tall and straight, branching near the top only and many are conspicuous from the whiteness of their trunks. The shores are either bordered with mangroves, with an occasional sandy beach, or clothed with the usual jungle of the island. Rosel appears to be well inhabited. huts are seen close to the beach, usually three or four together, forming small villages, often picturesquely situated. (Fogel of the *Rattlesnake*.)

ROSSEL a vil. in Prussia, par. Scotland, Perth Pop. 745. **ROSSEL** (New), a vil. and com. Italy Piedmont, div. and 14 m. N. W. G. near the Rima Rosignone. It consists of an upper and lower division, forming two groups of very poor houses, having irregular and ill-kept streets. Upper Rosignone has a church and two oratories. Under Rosignone a church and an oratory. Between the two is a convent of Minor Observants. Pop. 2587.

ROSIGNOL, a lake Nova Scotia, 77 by 8 W. Halifax, about 10 m. long. It discharges its surplus waters into the Atlantic by the Mersey at the mouth of which is Rosignol, or Liverpool village.

ROSINAN par. Irel. Kilkenny 4384 ac. Pop. 856. **ROSLINGTON** par. Eng. York (W. Riding) 8009 ac. Pop. 402.

ROSLINFER, par. Irel. Limerick and Sligo 52,215 ac. Pop. 11,859.

ROSLITZ, par. Saxony 30 m. by 12 m. P. 2699. **ROSLITZ** a vil. par. Irel. Wexford 2532 ac. Pop. 695.

ROSLAU a vil. Austria, on the Elbe, at the confluence of the Roslau, on the Berlin and Anhalt railway, 28 m. S. E. Magdeburg. It contains a church and a castle and has the works, a paper and other mills. P. 1526.

ROSLER a vil. Prussia, gov. and 35 m. W. Merseburg on the Unstrut, with a church a distillery and various mills. Pop. 1251.

ROSLER, par. Irel. Mayo 3701 ac. Pop. 604.

ROSLINGE par. Irel. Wexford 4549 ac. P. 976.

ROSLINGE, par. Irel. Waterford 8161 ac. P. 2190.

ROSSO a vil. and com. Italy Piedmont, div. Genoa in a mountainous district, bank Bisagno. It consists chiefly of huts, stretching along the side of a hill, and has several churches. Pop. 2249.

ROSSBORO par. Irel. Fermanagh 7504 ac. P. 2719.

ROSSBORO, a small seaport and watering-place, Ireland, co. Down, pleasantly situated on Carlingford Lough, 8 m. N. E. Newry, with a church, and St. Catholic chapel. It is a favorite resort for sea-bathers. Pop. 744.

ROSSUM a vil. Holland, prov. Gelderland, on the Waal 10 m. S. W. Tiel with a church and school. Pop. (agricultural) 845.

ROSSWEIN a vil. in Saxony circle and 41 m. S. E. R. Leipzig, on bank Mulde with a church and on hospital manufactures of cloth and other woollen stuffs, and several breweries. Pop. 4972.

ROSTAL a vil. Arabia, See Oman.

ROSTAL, par. Irel. Cork 2158 ac. Pop. 838.

ROSTBERG par. Eng. Chester, 19,996 ac. P. 4190.

ROSTOCK, a vil. Mecklenburg-Schwerin, in a flat district, 1 bank Warnow, which is here navigable, and forms an inland lake communicating with the Baltic, 60 m. E. N. E. Lübeck. It is surrounded by walls and ramparts, and consists of the Old, the Middle, and the New town. Of these, the Old town is the most irregular and the Middle town the most handsome. The New town also is regularly built, and

contains a considerable number of good streets and houses. The only squares deserving of notice are the market-places in the form of a regular quadrangle, and the Blücher Platz, so called in honour of Blücher whose statue, executed by Schadow adorns its centre. The edifices most deserving of notice are the palace of the grand duke, the townhouse, a building of singular appearance with seven towers, the church of St. Mary, a light and lofty structure of the 14th century with a curious brass font the churches of St. James, St. Nicholas and St. Peter, the head guard-house the convent of the cross, the university with a library of 85 000 vols the public school, the theatre, the house in which Blücher was born, and the house in which Grotius died. The manufactures consist chiefly of tobacco, starch soap glass, leather candles, woolen and cotton goods, saddlebush seats, glass, ironmongery, playing-cards, and chemical products. There are also iron works, iron-works, iron-works, oil, gypsum and other mills. The towns belonging to the port of Rostock, which admits vessels drawing 8 ft. is considerable, and its trade is of great extent. The principal exports are corn, wool, flax, butter and salt provisions. The fisheries are also important. The following table gives the number of vessels entered and cleared at the port of Rostock in 1843-50 and 1864-5 —

Years.	Entered.	Cleared.	Years.	Entered.	Cleared.
1843	614	6-4	1848	507	457
1844	663	5-9	1849	880	436
1845	749	18-8	1850	487	693
1846	79	7-2	1854	520	323
184	747	1-3	1864	614	506

Rostock is the seat of a high appeal court, and several other courts and offices and possesses a university which though at one time distinguished having had Kepler for one of its professors, has now only from 60 to 120 students a house of commerce and several societies, literary and benevolent. It is an ancient town and once formed an important member of the Hanseatic league, which it, however abandoned in 1479. From that period its trade began to decline. Pop. 20 368.

ROSTOK, several places, Bohemia, particularly:—1 A vil. circle Bidehow on a small stream in a mountainous district 4 m from Starckenbach with a church. Pop. 1017. —2 A vil. circle Rakonitz, 1 bank Moldau, 8 m. from Prague with a church a school, a castle, and several mills. Pop. 648.

ROSTOW or ROSTOFF two places, Russia.—1 A town, gov and 40 m. S.W. Jaroslavl on the Lake of Yero. It is one of the oldest towns in Russia, and occupies a large space, surrounded by a wall and fosse, and defended by an old citadel. It is the see of a bishop, contains numerous churches, one of these a cathedral an episcopal palace, diocesan seminary a superior and other schools, and five monasteries and has manufactures of linen, vinegar whole lead vermilion soap, candles, and leather, an important trade in the above articles of manufacture, and in corn, hemp, honey and wax and one of the most important annual fairs in Russia, which attracts Russians, Germans, Armenians, and Tatars, to the number 12 to 200 000. Pop. (1847) 78-8—2 (or St. Demetrius), A town, gov and 228 m. E.S. P. Ekaterinodar on the Don at the junction of the Tameruk, about 20 m. from the Sea of Azof. It was once a place of considerable strength, and is still surrounded by a walled rampart and a ditch, and defended by some outworks, though in a very dilapidated state. It contains three churches, and a military school, and has building-yards extensive government depots, some shipping an important trade and fishery and much-frequented annual fairs. Pop. (1851) 10 888.

ROTA, a seaport, Spain, Andalusia, prov and 8 m. N.W. Cadix, at a point of land almost surrounded by the sea, at the N.W. extremity of the Bay of Cadix; lat 36° 38' 26" N. lon. 6° 16' 15" W. (n.) It has a good pier 145 yards long and there is good and safe anchoring ground for small craft. There are a townhouse, several schools, public and private, a promenade, a church with a magnificent Gothic nave, four hermitages, and a cemetery. Agriculture forms the chief occupation the commerce consisting merely of the exportation of a few vines of wine, and some other provisions of the district, and in the importation of oil, coal, &c. Rota was sacked by the English in 1703. Pop. 7997.

ROTA an isl Pacific Ocean lat 14° 9' N. lon. 145° 18' E. (n.), 19 m. long and 5½ m. broad. It is billy in its E. and N. portions, particularly so in the centre, but becomes lower to the S.W. In the S.E. it is tolerably high and perpendicular on the sea-shore, presenting thus a straight wall and at its angles vertical fissures like the embankments of a fort. In other parts the land descends gradually to the sea, surrounding in long and low points. A few coco-palm trees are met with on the N. side the unshaded portion is so encumbered with bushes that it is difficult to penetrate water is to be had, but it is extremely bad, some cattle and particularly pigs coco-nuts bread fruit, bananas and a few other vegetables, constitute the entire wealth of the island.

ROTHA, an extensive fort, Punjab about 6 m. W. of r bank Jallum, and 100 m. N.W. Lahore. It occupies a narrow oblong ridge about ½ m. long and isolated on three sides by precipitous ravines, and has works of immense strength, consisting of massive stone walls, 20 ft. thick strengthened with bastions, and provided with a double row of loopholes. An immense well, lined with masonry furnishes an ample supply of water.

ROTELLO a tn Naples prov Saluto, dist. and 7 m. S.E. Lariano, on a height. Pop. 1800.

ROTHENBURG a tn Hesse-Cassel Niederhessen, on the Fulda, 30 m. S.E. Cassel. It is walled, has three gates, and is divided by the river into the old and new town, which communicate by a bridge. It is the seat of several courts and public offices, contains a castle, and two churches, and has a beetroot sugar-factory and several tanneries, and mills. Rothenburg was in early times the residence of a collateral branch of the reigning family. Pop. 3647.

ROTHENBURG a tn Hanover gov Stade 62 m. N.W. Hanover, at the confluence of the Wümme Roden and Wi dau. It has several public offices and a church. Pop. 1656.

ROTHGEN a vil Prussia gov and 7 m. S.E. Aachen, on the Vesdre with a R. Catholic church and manufactures of woollens and casuimers and drapery. Pop. 1688.

ROTH a tn Bavaria, circle Middle Franconia, near the confluence of a small river of same name with the Rodnitz here crossed by a bridge, 14 m. S. Nittenburg. It is walled has a Protestant and a R. Catholic church a castle, and a Latin school; manufactures of velvets and woollen cloth, chaises and waggon, tobacco and various articles in steel wire, glass-mirrors and needles and a trade in cattle and hops. Gessner the physiologist was born here. Pop. 3428.

ROTH a river Würtemberg rises near Wurmsh flows N.W. past Bodi, and joins r bank Danube, 7 m. S.W. Linz; total course about 83 m.

ROTH DONAUWITZ a tn Bohemia. See DONAUWITZ. ROTH METZGER or REZECZE a tn Bohemia, circle and 19 m. N.W. Tabor in a level valley watered by the Trava. It contains a deanery church castle, school and town hall and has a tile-works and several mills. Pop. 1860.

ROTHA, a. a. Saxony circle and 10 m. S.E.E. Leipzig, on the Pleisse with a church a castle manufactory of woollen cloth a distillery, a saw-mill, a paper and two flour mills. Pop. 1192.

ROTHAU (ONNA and URSNA) a vil Bohemia, circle and 10 m. N.W. Elbogen in a valley on the Elbmetz. It has two schools some manufactures of lace, two limestone quarries and several iron and rolling mills. Pop. 1788.

ROTHBLEY a tn and par England co Northumberland 18 m. N.W. Morpeth, in the beautiful valley watered by the Coquet. It has an ancient church and a free school Area of par 84 988 ac. v. 1846. Pop. 2546.

ROTHENBURG a vil Bavaria, Lower Franconia, in the centre of the Hochopmarkt, at the source of the Mainleber 27 m. W.W. Würzburg. It contains a castle, and an old hunting-lodge of the Elector of Mainz, and has a saw and two iron mills. Pop. 1068.

ROTHFEBURG a vil and par Switzerland, cant and 4 m. N.W. Luzern. It is an ancient place was once walled and had a castle, of which some ruins still remain. It has bridges both over the Gerbush, and the Rothbach. That over the latter is 750 ft. long and 26 ft. broad, it is considered a master-piece in its kind. Pop. 1324.

ROTHFEBURG a tn Prussia, prov Rhoda, gov and 54 m. W. Liegnitz, 1 bank Neisse. It is the seat of a court

of justice, and several public offices and has a Protestant church, a chapel, a courthouse, a cattle, a savings-bank, and an hospital. Pop. 1068.

ROTHENBURG-AN-DE-TAUBER, a town, Bavaria, Middle Franconia, on a plateau above the bank Tauber, here crossed by two bridges, 29 m. S.E. Würzburg. It is finely situated, and is surrounded with lofty walls, flanked with towers, and is entered by six gates. It is an ancient place and is very irregularly built but many of the houses are handsome. It contains two churches, one of them a handsome structure of pure pointed Gothic, with finely-painted glass, and several interesting monuments a townhouse, hospital library a Latin, industrial and several other schools and has many features of woollen cloth, paper and gunpowder (a dye-works, brewery, ironworks, mill) and a trade in corn and cattle. Rothenburg has mineral springs, with an elegant bathing establishment. Pop. 5231.

ROTHENFELD, a market in Bavaria, Lower Franconia, on the Main with a court of justice, a church a castle with a chapel an hospital; and a trade in wine, timber and stone. Pop. 295.

ROTHENFELS, a vil Baden, circle Middle Rhine near the bank Murz 6 m. N.E. Baden. It is digging for coal here in 1839 thermal springs were discovered, and a bathing establishment has been erected. The water is saline, and has a temperature of 68° Fah. Pop. 1357.

ROTHENHAGEN, several places, Germany. See ROSENKIRCHEN.

ROTHENMANN or **ROTHMANN**, a town, Austria, Tyrol, circle and 26 m. N.W. Judenburg, in a valley on the Raab, which here forms a small lake. It contains a parish church and is famous for its manufactures of iron and steel particularly nails, sickles, and scythes, of which 110 000 are annually made. Pop. 800.

ROTHENTHUM, a vil Switzerland can. and 6 m. N.W. Schwyz. It derives its name from an old red tower built in 1260 as part of the defences of a long wall erected to guard the frontier and has been made by the constitution of 1833 the place where the general meeting of the canton is held every two years to make their elections, at which every citizen of the age of 18 has a vote. In 1838 9000 voters met, quarrelled, and fought. The Swiss here, in 1798 drove back a host of French at the point of the bayonet. 1 780.

ROTHIE a river England, co. Sussex, flowing W.W., and falling into the English Channel at Rye of which it forms the harbour.

ROTHERBY par Eng. Leicester 760 ac. Pop. 130.

ROTHERFIELD, a vil and par England, co. Sussex near the source of the Rother 8 m. N.E. Uckfield. It has an ancient church with a square embattled tower terminating in a spire and an elaborately-carved font a chapel of ease places of worship for the Baptists and Wesleyans a weekly corn market, and several cattle-fairs. About 500 acres of the parish are under lands. Area of par 14 783 ac. P. 2531.

ROTHERFIELD two pars Eng. Oxford—1, (Oxford), 2910 ac. Pop. 1818—2, (Figgard), 2156 ac. Pop. 406.

ROTHERHAM, a market town and par England, co. York (W. Riding). The town 6 m. N.E. Sheffield, on the Midland railway, a bank Don over which is a bridge connecting it with the suburbs of Mablethorpe, is well paved and lighted with gas but the streets are mostly narrow and irregular and many of the houses have a mean appearance. It has a courthouse a workhouse, a magnificent church, erected in the reign of Edward IV.; places of worship for Baptists, Wesleyans, Independents, and Unitarians; a college for the training of independent clergymen a free grammar-school, a charity and other schools; a literary institute, opened October 1858; a library and news-rooms, and a Dispensary; extensive iron-works, large chemical-works, and manufactures of oil, starch, glass, ropes, and cloth. P. 6325. Area of par 12,440 ac. Pop. 16,730.

ROTHERHAM, a par England, co. Surrey 1 m. N.W. London, of which it is now a suburb, on a flat, a bank Thames, and on the Greenwich railway. The town and nearby nature of its site is its greatest disadvantage, but it has a number of good streets, inhabited chiefly by seafaring people, a handsome parish church, with a square tower and lofty spire three neat dissenting churches, Baptist, Independent, and Wesleyan chapels; the Commercial and several other docks,

building-yards, and wharfs extensive iron-works, and flour-mills. One end of the Thames tunnel is in Rotherham. Area of par, 886 ac. Pop. 17,806.

ROTHERSTHORPE, par Eng. Northampton (1800 ac. Pop. 244).

ROTHERWICK, par Long Hamlet, 1924 ac. Pop. 454.

ROTHER, par Scot. Elgin; 54 m. by 8 m. P. 3023.

ROTHERSAY, a royal bur. respect to Scotland, cap. co. Berks, beautifully situated at the head of a fine bay of same name, N.E. side, island of Berks lat. 55° 50' N; lon. 5° 1' W. The town occupies the centre of the height of the bay, from which it stretches along its E. and W. shores for about a mile on either side, in the form of a series of tasteful villas, sending in some parts so closely together as to present the appearance of an elegant one-sided street. In the central part the houses are dispersed over a wider area. Here occur several transverse streets of various dimensions, and several rather narrow lanes all, however, tolerably straight, though wanting in uniformity of direction. The streets, of which there are about 16 in all, are kept clean, and are well lighted with gas. The houses are nearly all of green-stone, which abounds in the island and are generally substantially built. The only modern edifice, exclusive of the churches, calling for particular notice, is the townhall and county buildings. The handsome structure is surmounted by a massive tower, and comprises a spacious court-room and other apartments. The place of worship are an Established church, and a chapel of ease in connection with it three Free churches a United Presbyterian a Reformed Presbyterian a Baptist, and an Episcopalian. Two of the Free churches have handsome spires, forming the principal architectural ornaments of the town. There are a number of schools and seminaries of a superior description, a school of industry several libraries, and a subscription news-room. It has several extensive cotton-spinning and weaving factories, a patent ship, three building-ships at a considerable cost, and it is the head quarters of a fishing district, employing 243 boats, and 882 men and boys. The main pier of the harbour is a substantial erection of wharves.

Rotherby is much resorted to in the summer season as sea-bathing quarters. It is also a select place of residence for invalids, on account of the singular mildness and salubrity of its climate. One of the principal attractions for strangers here is the ancient royal castle, a fine ruin standing nearly in the centre of the town. It is of great antiquity but of various dates, the original being unknown and was at one time a favourite residence of the kings of Scotland. Rotherby gives the title of duke to the Prince of Wales. Pop. 7354.

ROTHIAAL-GZUMON, a mountain range in the E. of the Prussian Rhine province, forming a continuation of the Westerwald. It stretches nearly 45 m. between S.W. and N.E., and gives rise on its N.W. slope to the Lahn and Ruhr and on its N.E. to the Lahn and Elber. **ROTHIE**, a vil and par England, co. Leicester above 1 m. S.E. Mount Sorrel. It has an ancient and spacious castle, Walsley and Walsley and was at one time a mansion of the Templars, on the site of which a modern mansion has been erected. Area of par, 5480 ac. Pop. 2047.

ROTHMUND a vil partly in Bohemia, circle Chrudim, and partly in Moravia, circle Brün near Policka, on a small stream of same name with a parish church, and several saw and other mills. Pop. 1675.

ROTHWASSEL (ALT AND NEU) two nearly-contiguous vils. Austria Bilets circle Troppen, bail and near Johannesburg, with a parish church, a saw and other mills. P. 2076.

ROTHWASSEL, a vil France, prov. Alsace, gov. Lorraine, circle Guebwiller with a church, life-works, and a mill. Pop. 1867.

ROTHWASSEL, or **CHERTSEA WODA**—1, a vil Moravia, circle and 26 m. N.W. Olmitz, on the frontier of Bohemia with church, and manufactures of thread. P. 2483.

—2, a vil Bohemia, circle and 26 m. E. Chrudim with a Protestant and a Catholic church, and two schools; and several mills. Pop. 2394.

ROTHWELL, two places, England—1, A vil and par co. York (W. Riding), pleasantly situated in a fertile vale, 4 m. S.E. Leeds. It is an ancient and irregularly-built place;

with a neat parish church, surmounted by a square embattled tower. Wesleyan and Primitive Methodist chapels, a large labourers' union, manufactures of rope and twine, a woolen-mill and several quarries of building-stone. Area of par. 8715 ac. Pop. 7641.—2. A vil. and par., on Northampton, S side of a rocky hill, 4 m. W N W Kettering. It was formerly a place of much more importance than at present, surrounded by strong walls, and a favourite residence of William the Conqueror. It has an old parish church, with a fine porch and an embattled tower. Independent and Wesleyan chapels, an hospital, manufactures of shoes, silk velvet and plush goods, and a large cattle-fair which lasts several days. Area of par. 4480 ac. Pop. 2321.

ROTHWELL, par. Eng. Lincoln; 2890 ac. Pop. 365.

ROTHAM, a tn. Naples, prov. Basilicata, N.E. Lago-rogro, at the foot of a mountain with an hospital and an annual fair of three days. Pop. 2800.

ROTONDELLA, a tn. Naples, prov. Basilicata, 18 m. E. Lago-rogro on a lofty height above L. bank Rosaro. It contains a monastery. Pop. 2340.

ROTHENSALM, a fort, Russia, N side, Gulf of Finland, 12 m. S.S.W. Fredericksburgh. It is erected on one of the small islands which stud the mouth of the Kyma, and forms a strong defence of the harbour which is spacious and deep, and an important station of the Russian navy. Within the walls on the island are extensive barracks and an arsenal, and in the town are a church, school, hospital, and building-docks. Pop. 800.

ROTHESLAER, a vil. and com. Belgium, prov. Brabant, on the Dyle, 17 m. N.E. Brussels. It has a brewery two flour-mills and a trade in agricultural produce. Pop. 1916.

ROTT, a river, Bavaria, which rises near the village of Hainsberg dist. Mühldorf flows E.N.E. past Neumarkt, and after a course of about 60 m. joins L. bank Inn, nearly opposite to Schuchting.

ROTTA, a vil. and par. Tuscany com. Pisa, on the Leghorn road, between Castel del Bosco and Pontedera, in the lower Val di Arno. It contains a parish church, and has a trade in wood and charcoal. Pop. 1351.

ROTTALOWITZ, a vil. Austria, Moravia circle Pörsch 18 m. from Wuchau, with a Protestant and a R. Catholic church. Pop. 1060.

ROTT, ROTT, or ROTTO an old Indian Archipelago, off the S.W. end, Timor from which it is separated by Rotta or Benoa Strait, about 5 m. wide lat. (Buka Bay S.E. side) 10° 55' S. lon. 123° 5' E. (W.) between 86 m. and 40 m. long, N.E. and S.W. It has a bold, rocky coast, and is of moderate height, with undulating hills, on the S.E. side of the island there is a good and safe harbour called Buka Bay, where buffaloes, pigs, goats, deer, poultry, bees wax, and honey may be obtained. The island is under the jurisdiction of Coepang, is well cultivated, and fertile. It produces millet, maize, cotton, sweet potatoes, fruits, and excellent timber of various sorts, buffaloes, large herds, goats, sheep, and pigs are plentiful; much wild honey is collected (and on the coasts crocodiles are numerous. Hurricanes and earthquakes are not uncommon.

ROTTERBURG a tn. Württemberg, circle Schwarzwald on the Neckar, 7 m. S.W. Tübingen. It consists of the town proper, on the L. bank, surrounded by a wall with eight gates, and of the suburb of Bisingen, on the R. bank, communicating with the town by a bridge. It has well-built houses, spacious streets, and a market-place adorned with a fine fountain, contains two churches and several chapels, a townhouse, summary hospital, old castle and old monastery, and has manufactures

of wind instruments, glass, leather, and paper, an iron and numerous other mills. Rotterdam occupies the site of a Roman station. Pop. 6268.

ROTTERMANN, a tn. Skyría. See ROTHEMANN.

ROTTERNEST, a tn. Holland, lat. 52° 2' S., lon. 115° 25' E., moderately elevated nearly 9 m. long, E. and W., 4 m. broad N. to S., and about 12 m. W.N.W. from the entrance of Emsa River.

ROTTERDAM, one of the Friendly Islands. See AN KAMOOKA.

ROTTERDAM (Latin, Rotterodamus) the second city in Holland, both in point of commerce and population. It lies in prov. S. Holland, 36 m. S.W. Amsterdam, with which it is connected by railway and a bank Merwede at Nieuw Mass, 34 m. from the sea. lat. 51° 55' 15" N. lon. 4° 24' 30" E. (W.) It is built in the form of an isosceles triangle, the base and longest side of which is next the river, the land sides being surrounded by the old fortifications, beyond which lie the populous suburbs. The city has as many canals as streets, communication across them being maintained by innumerable drawbridges and it is traversed by the Rotta, a small stream, at the junction of which with the Maas there is a large dyke or dam, whence the name Rotterdam. Many of the canals are planted with trees, imparting to them a pleasing aspect and several of them are so deep as to form excellent harbours and admit the largest ships to be alongside the warehouses in the middle of the town. The water in them is kept fresh and clean by the flow and ebb of the tide, which rises 10 ft. to 12 ft. Along the river which opposite the town is 80 ft. to 40 ft. deep, is a fine quay 1½ m. long called tin Suomen (Little trees) from a hue of elms, planted in 1615, now grown to a large size. Many of the houses are quaint-looking gabled edifices, overhanging their foundations a considerable way, and the principal buildings being along the chief canals or levees the other streets, though all are well lighted with gas, have a less seemly appearance.

There are several market-places, but none of them is very large, among these are the Groote-markt [Great market], in the centre of which is a metal statue in honour of Erasmus, who was a native of the city, the flax, the sea-fish and the river-fish, the pig, poultry, vegetable, butter, cheese, &c., markets. Rotterdam possesses a number of important buildings including the townhall, courthouses, house of correction, the ex change, the old E. India house, the government dockyards

CHURCH OF ST. NATHAN, ROTTERDAM.—After Sir A. W. Collins, B.A.

arsenal rope-walks a meat-docket, &c. There are four Calvinist churches—the Grootekerk, or church of St. Lawrence, founded in 1614, and finished in 1672, so that, with interruptions, 24 years were occupied in erecting it. It contains some

ments to De Witt, Kerkstra, and De Bruijs, and has since it was improved in 1844 one of the finest organs in the country having 60 stops and 6500 pipes, and estimated by some superior even to that of Harlem. The other Calvinistic churches are Prinsenhof (Prince's church), Zandkerk (Sand church) and Ooster or Nieuwkerk (East or New church). Besides these, there are French, English Presbyterian, Scotch Reformed, English Episcopalian, Christian Dissenter, Remonstrant, Baptist and several R. Catholic churches. The benevolent, literary and scientific institutions include an hospital for old women and another for old men, two orphan hospitals, a general hospital, a poorhouse, and many friendly and benevolent societies. A Latin school called the Erasmus gymnasium schools of agriculture and navigation five town and numerous other schools, societies of the fine arts, and of science, of literature, and of music.

The inhabitants of Rotterdam are chiefly engaged in commerce which may be divided into three sections, the foreign trade the Rhine trade, and the inland trade. The foreign trade which for many years was very extensive, was totally destroyed by the war with Britain, which broke out in 1803; the vessels that had shipped the British warships or were laying rotting in the harbor, and in ten years the population of the city decreased nearly as many thousands. The defeat of Napoleon at Leipzig, and the consequent change in the condition of Holland acted like a charm upon Rotterdam. The river was once more covered with vessels, and the greatest activity prevailed in every department of commerce. But this pleasant state of matters received a check by the subsequent union of Holland and Belgium, which diverted a great proportion of the foreign trade to Antwerp. Since the revolution of 1830 however, and the separation of the two countries the trade of Rotterdam has resumed its former importance and extent. It sends to the Dutch Eastern possessions, and to the West Indies provisions of all kinds, spices, wines, mineral waters, and manufactured goods. In return for coffee, sugar, spices, cotton, dye woods &c. To England and Scotland, with which it carries on an extensive and lucrative trade, it sends cheese, butter, wax, muslin, madder, garden-seeds, glass, clover-seed, fruits of various kinds, docks, and large numbers of sheep and cattle. With America and with France, Spain, Portugal, and the E. States of Europe, a good trade in like way is carried on. The following table shows the number of vessels and the total tonnage engaged in the foreign trade, in the years 1841-1851, and 1853—

Year.	Exported		L. E.		Yrs.
	Vessels	Tons	Vessels	Tons	
1841	1894	364,057	1974	471,322	
1848	1610	327,322	185	364,367	
1849	1363	254,883	200	412,008	
1850	1840	358,343	204	409,634	
1851	21	446,104	205	456,862	
1852	21	45,827	206	464,548	

Along the Rhine it sends to Germany and Switzerland sugar, coffee, cotton dye-woods, indigo, spices, Dutch tobacco, rapeseed, madder, butter, cheese, &c. &c., in return for wheat, rye, Maize, and Rhine wine, pipe-clay, pottery ware, Berlin blue, chemical salts, &c.

Besides its extensive commerce Rotterdam has 42 distilleries several breweries, and vinegar-works, five tan-works, ten candle-works, seven dye-works, five sugar refineries, numerous bleachfields and corn, oil, tannery, and saw mills, a steam-hattery and eight ship-building yards. It has likewise steam communication with London, Lath Hall, Yarmouth, Dunkirk, Havre, Antwerp, &c., and eleven steam-drawing companies.

Rotterdam is the birth place of Desiderius Erasmus, of the naval heroes Egbert Kotman, Jan van Brakel and Cornelius Tromp, and of Jan Hendrik van der Palm, learned in Eastern languages, an eminent orator and one of the best prose writers Holland has produced. Pop. (1850) 86,812. — Van der Aa, *Andrykschuyt Woordenboek der Nederlanden*. *Rotterdam* *doorheen* *was* *het* *koninkrijk* *der* *Nederlanden*.

ROTTERDAM, a vil. and port England, co. Sussex, pleasantly situated near the coast, 4 m E Brighton. The village is celebrated for its walls, which not only possess an

important quality, but have the peculiar property of emptying as the tide flows, and rising as it ebbs, and is much frequented for bathing, being both provided with wash-houses and good baths. Area of par, 8685 ac. Pop. 1084.

ROTTORFENO a vil. and com Parma, Italy, 6 m W Piacenza, r bank Loggia. It has a primary school, a charitable endowment, and a trade in corn, wine, silk, and cattle. The united French and Spaniards were here defeated by the Austrians in 1746. Pop. 2163.

ROTTUM—1 A vil Holland prov Friesland near Heerenswa. Pop. 209.—2 A vil Holland prov Groningen, 14 m N W Appingedam. Pop. 250.—3 (or Rottumerlog) A vil Holland prov Groningen 6 m off N coast; it is about 5 m in circumference, and is protected by dunes. In the beginning of the 17th century it was well inhabited, but now its population is reduced to 12 who are occupied in rearing swine, fishing and gathering eggs, of which in June 8000 to 10 000 are collected.—4 A river, W Urttemberg, rises in the S E. of the kingdom, a little E of Wurzburg flows first N N E, then N N W past Aushausen, and after a course of 83 m joins the bank Danube, about 7 m above Ulm.

ROTTWEIL, a w. Württemberg, about 8 hours' ride on a height, above 1 bank Neckar 49 m, S E W Rottmair. It consists of the town proper surrounded with walls with five gates, and of a suburb contains a Protestant and two R. Catholic churches, three chapels a townhouse merchants hall and gymnasium, and has manufactures of silk and of mixed silk and cotton goods, chert, quills, and gun powder several tile-works, numerous mills, and a trade in corn. Rottweil appears to have been at first a Roman colony. At a very early period it rose to the rank of an imperial free town. It has repeatedly been almost destroyed by fire. Pop. 3740.

ROTUMAH, ROTUM or GENTILELLI ISLAND in the S. Pacific Ocean lat. 17° 32' S lon 177° 13' E. It is about 4 m. to 5 m long from N to S. and consists of two distinct portions, connected by a low, narrow isthmus apparently of recent formation. It has two residences, with very imperfect shelter and is covered with villages along the shore. The inhabitants, who are numerous, are under a king and have been converted to Christianity by missionaries who have two religious houses here.

ROTT, a town, two places Germany.—1 A in Lower Austria, at the foot of the Mauerberg, in the frontiers of Moravia, 4 m N N W Ybbs; with a church a castle, a Dominican convent and a trade in wine. Pop. 2400.—2 A in Bavaria, Upper Palatinate, r bank Schwarzenbach 80 m N E Ratisbon with two churches, a castle an hospital, manufactures of saltpetre and tobacco tile-works tanneries, and several mills. Pop. 1253.

ROTTBACH or UXTENROTZBACH, a vil. Lower Austria on the Mauerberg near the frontiers of Moravia, near Rott. It has a parish church. Pop. 1568.

ROUBAIX, a tu France dep Nord 6 m N E Lille, on the railway to the Courty and the canal of La Marq. It is a clean, regular well built town, but has no public edifice deserving of particular notice. It has recently come to considerable importance by its manufactures of table-cloth, cotton, and other tissues its worsted and cotton mills, dye-works tanneries, &c. As a central manufacturing locality it attracts purchasers from all parts of France, and has, moreover, a considerable trade in corn wine, and colonial produce. It possesses a chamber of manufactures, and a *caissé des grands hommes*. Pop. 22,161.

ROUBION, a river France, which rises near Rottweil flows Di, dep Drôme flows W & W past Montélimar, and after a very winding course of about 40 m, joins 1 bank Rhone opposite to Tain.

ROUCOURT a vil. and com. Belgium, prov Hainaut on the Vesre, and the canal of Antwerp, 18 m W Mons. It has a brewery, a brick-works, three flour-mills, and a trade in corn and cattle. Pop. 1880.

ROUDHAM, par Reg. Norfolk, 2065 ac. Pop. 140.

ROUPP (anc. Roumpen) a tu. France, dep dep. Redon-Indre-et-Vienne, situated on the Neige, 70 m N N W Paris, with which it is connected by Le Mans and Le Mans is connected by railway. It stands in a valley on a gentle declivity facing the S and is in the shape of an irregular oval, the center of which is marked out by the site of the old ramparts, which

have been levelled down and converted into finely planted boulevards. In addition to the town proper which stands on the right bank of the river there are several suburbs. Of these that of St. Sever on the left bank, is the most extensive. When viewed from the adjoining heights, particularly from

is due to the cathedral, a vast and imposing structure, gradually completed during a succession of centuries, and hence varying much both in the style and merits of its architecture, but still one of the most splendid buildings of which France can boast. Its W front, forming one side of the fruit and

the hill of St. Catherine on the N.E. whence it is seen to the greatest advantage, no provincial town in France presents a more magnificent and venerable aspect. A closer inspection does not tend to heighten the impression which a distant view

of St. Ouen with a church regarded as one of the most perfect Gothic edifices in the world with a tower 260 ft. in height, wholly composed of open arches and tracery and terminating in an octagonal crown of fleur-de-lis the church of St. Maclou a fine specimen of French Gothic the Tour de la Grosse Horloge, a square Gothic tower with arched windows containing the principal clock of the town the hotel de ville originally part of the abbey of St. Ouen, with a modern front and a Christian colonnade, containing in addition to the municipal buildings, a public library of 83,000 vols and a picture-gallery, the palais-de-justice, a Gothic edifice, remarkable alike for the delicacy and boldness of its construction, the museum, particularly rich in works of art and other antiquities of the middle ages, and the Halles, a vast edifice forming three sides of a parallel square and containing a series of halls, in which the principal manufactures of the town are weekly exposed for sale. In the Place de la Halle is a monument erected to the blind of Orleans, on the spot where the heroines were so infamously committed to the flames.

The staple manufactures are cottons, in a great variety of forms, produced to such an extent as to make Rouen the Manchester of France. The other principal articles are broad-cloth, damask, bone and ivory combs, confectionery, fine liqueurs, glass, soap, chemical products, earthenware, stained paper, &c. There are also numerous cotton and worsted mills moved by water or steam famous dye-works, bleachfields, tanneries, sugar-refineries, copper and iron foundries. The situation of the town on the railway from Paris to Havre and on an important navigable river accessible by large vessels, is very favorable for trade. The principal articles are corn, flour, wine, brandy, salt, provisions, wax, oil, colonial produce, and the various articles of its manufacture, particularly a species of striped and checked cotton goods called *rouenneries*.

PLACE DE LA PUCELLE, ROUEN.—From France, Manufactures of France.

products. The streets, though long and tolerably straight, are narrow, dark, and dirty, and the houses, for the most part of wood and often faced with slate, are poorly built, and so dirty and crowded as to exclude a free circulation of air. Many of these houses, however, are interesting from their antiquity; and to the W. side of the town, which is of more modern construction, there are several handsome streets, with elegant mansions of stone. To these must be added the rows of houses along the magnificent quays by which the banks of the river are lined. Among the public edifices the first place

Rosen is the site of an archbishop, the seat of courts of primary jurisdiction and commerce, and of a court of appeal for dogs, ferre infirmos and Hara, and possesses a character of commerce and archbishop, around the great houses, minor agricultural society, college, university academy, diocesan university third class school of hydrography academy of science and art, and school of painting, sculpture, and architecture. It is a place of great antiquity and existed before the conquest of Gaul by the Romans, under whom it took, and for several centuries remained, the name of *Rosengauis*. In the 9th century it was taken and pillaged by the Normans, who made it their capital. After the Norman conquest it long continued in the possession of the English, who finally lost it in 1449 18 years after they had dispossessed themselves by the judicial murder of John of Ar. Many eminent men have been born here, among others, Cornille, the father of French tragedy and Fontenelle. Pop. (1862) 91,512.

ROUGGUE, an ancient dist. France, in E. of prov Guyenne. It was divided into Haute-Marque in the S.E., Haute-Marque in the N.W., and Comté in the centre. Rhodan was its capital. It is now included in dep. Aveyron.

ROUFFACH [anc. *Augusta Rauracorum*] a tn. France, dep. Haut-Rhin, on the *Leucht* 7 m. E. Colmar. It contains a Gothic church, with a chapel, to which numerous pilgrimages are made, and an ancient castle, on a height in the centre of the town, in which several kings of the Merovingian race occasionally resided. The manufacture consists of cotton tissues, and shag or felt for hats. Pop. 8782.

RN GEMONT or I RECHTUN, a vil. and par. Switzerland, can. 14nd, 23 m. E. Lucerne. It contains a castle, formerly a Cistercian monastery founded in 1080, and had a printing-press in 1481 the second earliest established in Switzerland. Pop. 1096.

ROUGHAM tw. East Angles—1 Norfolk 8237 ac. Pop. 374—2 Suffolk 2840 ac. Pop. 1078.

ROUGHTON two pars. England—1, Lincoln 1020 ac. Pop. 165—2 Norfolk 1740 ac. Pop. 412.

ROULERS [Flemish *Roulers*] a tn. Belgium, prov. Flander, on both sides the Maude or Maudebake, 17 m. S. Bruges. The houses are well built and the streets are wide and regular the public square occupies a large space, and the townhouse is handsome. The parish church, surmounted by an 14 tower is not otherwise remarkable, but the college is a fine edifice. Besides it, Roulers possesses several primary schools a convent, musical society and some benevolent institutions. It has numerous extensive breweries, distilleries, tanneries, soap and salt works also manufactures of linen, cotton hats, blue, chievery and tobacco. The trade in linen, corn and butter is important, and there are two well frequented weekly markets. Roulers was known under the name of *Rodler* in the 9th century. In 1438 it suffered dreadfully from the plague, which almost decimated the inhabitants. Pop. 10,270.

ROULSTON or Rovers, par. Eng. Lincoln; 1530 ac. Pop. 228.

ROI M A peak. Asiatic Turkey. See RIVAS.

ROUMELIA European Turkey. See RUMELIA.

ROUMYAH or ROUMAHEN a tn. Asiatic Turkey. pop. and about 120 m. S. Bagdad, on an affluent of the Euphrates. It contains of about 400 houses inclosed by lofty and dilapidated walls, and has a mosque, bath, and a rich district for devotee of corn and especially of dates.

ROUANTON [Warr. par. Eng. York (N. Riding), 1500 ac. Pop. 216.

ROUPHA, or ALKHA, a river Greece, Morea, formed by the junction of the Cephissos and Ladon. It flows W. and falls into the N. part of the Gulf of Argolis, after a course, exclusive of the above streams which form it, of about 35 m. It flows through a very picturesque country and abounds with fish. The Olympic games were celebrated on its banks.

ROIRP a vil. and com. Italy Piedmont, div. Turin prov. and 18 m. N.W. Pinerolo, near I. bank Clusone. It consists of several distinct villages, and has a parish church. Pop. 2342.

ROUBOUTOU, st. M. Pacific. See ORENOCA.

ROUAYX com. of the Orkney Islands, off N. coast, Scotland. It is about 24 m. long, N. to S. and about 4 m. broad. The centre consists of high hills, covered with heath, leaving but a narrow margin round the shore for cultivation. It

abounds with game, and contains many springs of excellent water. The soil is good.

ROUBAYX and Roubaix par. Sect. Orkney. Pop. 1916.

ROUBER-Lancaster par. Eng. Worcester 1850 ac. P. 277.

ROUBER POINT a vil. U. States, New York, 164 m. N. by E. Albany, W. shore, Lake Champlain, and on the Champlain and St. Lawrence railway close to the frontier of Canada. It has increased rapidly and acquired importance since the construction of the railway which here crosses the lake by a permanent bridge 5000 ft. long, and a swing-bridge 800 ft. by 20 ft. A strong fort to guard the entrance of the lake was commenced here, soon after the war of 1812 by the U. States, and abandoned after an expenditure of about \$20,000, because found to be within the Canadian line. The site has since been ceded to the U. States.

ROUSHAM, par. Eng. Oxford 930 ac. Pop. 184.

ROUSSES (Lash) a tn. France, dep. Jura, in an elevated, bleak, and arid district near the confines of Switzerland, 80 m. S.E. Lons le Saunier. It is a poor miserable-looking place, but has a church, remarkable both as being the highest in the Jura, and for standing so exactly on the watershed between the basins of the North Sea and the Mediterranean, that it sends the rain which falls on one side of its roof to the former and that which falls on the other side to the latter.

ROUSSEAU par. Eng. York (E. Riding) 1880 ac. P. 172.

ROUX a vil. and com. Belgium, prov. Hainaut, 2 m. N.N.W. Charleroi with a church primary school, four distilleries, three breweries, a nail manufactory and three flour-mills. Coal is worked in the environs. Pop. 3610.

ROVATO [anc. *Teſina*] a town and com. Italy Lombardy gov. Milan prov. and 12 m. W.N.W. Brescia at the E. base of Mount Orsino. It has a handsome parish and several auxiliary churches a foundling and an ordinary hospital, an educational institute under the superintendence of the Sisters of Charity an old castle an important weekly market chiefly for cattle, numerous silk-mills, several linen bleachfields and a considerable trade in cheese, corn, wine, and silk. Pop. 6800.

ROVEGNO a tn. Italy Lombardy div. Genoa, prov. and 15 m. S.W. Bobbio, on the Trebbia, in a mountainous district. It has two parishes and two auxiliary churches and an annual fair. Pop. 2336.

ROVELLABA a vil. and com. Italy Lombardy prov. and about 9 m. S. Como, in a plain near the Lura, with a church and a trade in corn, wine, and silk. Pop. 1600.

ROVERELLA a tn. and com. Italy Venetia, prov. and 6 m. N. Mantua, with five churches, and a weekly market. It is repeatedly mentioned in the military transactions of Italy during the end of the last and the commencement of the present century. In particular it was here that an armistice was signed in 1796, between Bonaparte and the Prince of Belmonte as viceroy of the king of Naples. Pop. 3358.

ROVEREDO a vil. Switzerland, in the S. of m. Gr. area, 47 m. S.W. Coire, on both sides of the Moesa, which has here frequently caused great devastation by its floods.

Here the prior of Roveredo, and 11 old women, were burnt for witchcraft, by Carlo Borromeo, in 1628. About 30 years before, persecution drove away a number of Protestant families, who were mainly instrumental in establishing the silk manufactory at Zürich. Pop. 739.

ROVEREDO or ROVERAZ (Latin *Roboretum*), a tn. Austria, Tyrol, 24 m. N. Verona, beautifully situated in the Lamerthal, on both sides of the Leno, and I bank Etsch or Adige, here crossed by a handsome stone bridge. It consists of the town proper and two suburbs, and is well built, many of the houses being constructed of marble, and otherwise handsome. It contains a remarkable old castle called Junk situated on a height, in the public square, surrounded with walls, and originally the residence of the Venetian governor; seven churches, a parishhouse, academy, gymnasium English

female institute, Capuchin monastery, theatre, hospital in Sicily, and poorhouse. It is one of the principal seats for the manufacture of silk, of which about 300,000 lbs. are annually exported. The number of silk-throwers in the town

ROVEZZANO.—From Harbourside looking at Rovezzano and Abasco.

and neighbourhood exceeds 50. In the largest one, 500 hands are employed. The other manufactures are leather and earthenware, and there are seven dye-works. Rovezzano is also famous for its fruits, apples, citrons, pomegranates &c. Pop. 8040

ROVESCALA a vil and com Italy Piedmont div Alessandria, prov Voghera. It consists of two streets and two squares, and has a parish church, an oratory, and a large palace with gardens. Pop. 1858.

ROVEZZANO (Latin, *Rovetianum*) a com Tuscany comp and about 8 m. E. Florence, in a plain between the last slopes of Mount Fiesolano and a bank Arno. It consists chiefly of two nearly-contiguous villages of same name and contains two handsome parish churches, one of them with frescoes by Michael Angelo. Pop. 4596.

ROVIGNO or **TRIVIGNO** (Latin *Ravennium*) a tn, and sea port, Austria, Illyria, gov and 40 m. S. Trieste, on a rocky eminence, on a tongue of land which projects into the Adriatic, and by its sides forms two excellent harbours. It is the seat of a superior civil, mercantile, and criminal court, a sanitary board and maritime consulate, contains 10 churches, including the cathedral, which is built on the model of St. Mark's at Venice, a normal high school and two hospitals, and has manufactures of sailcloth, and commodious docks and yards, in which numerous vessels of considerable burden are built. The port possesses about 188 trading vessels, besides a great number of smaller craft, chiefly employed in the sardine and tunny fishing in which a large proportion of the inhabitants find lucrative employment. Of the two harbours, the larger is chiefly used as a roadstead, in which the largest vessels find good and tolerably secure anchorage the lesser serves as properly the harbour and is much frequented. The trade is principally in wood, olive-oil and wine. Pop. (1848) 10,688.

ROVIGO (Latin *Rodipium*) a tn, kingd. of Italy gov and 86 m. S. W. Venice, cap. prov. of its name, on both sides of the Adige at the mouth of the Albuga. It consists of an upper town San Giustino and a lower, San Stefano which are separated by the river, and communicated by four bridges; and is both surrounded by walls flanked with towers, and defended on its W side by a castle. The fortifications however, are very much dilapidated, and the prosperity of the place is much impeded by the unhealthiness of its site. It is tolerably well built, is the seat of several distinct courts and offices, and though not properly a sea, is the usual residence of the bishop of Adria. The public edifices include no fewer than 27 churches, none of them deserving notice, except the cathedral, three monasteries, two nunneries, a governor's palace, sanctuary, academy of arts and sciences, and three hospitals. The principal manufactures are leather and saltpetre. The trade is unimportant; but there is a famous annual fair, which lasts eight days. The wine of Rovigo, celebrated in ancient

Vol. II

times is now of moderate quality. Pop. 9800.—The *crovina*, area, 233 sq. m. bounded W by Mantua N Verona and Padua, E Veneto, and S the river Po, is in general fertile, raising good crops of wheat and maize, producing much wine, excellent fruit, and vast quantities of valpatis, and raising great numbers of cattle. Pop. 158,788.

ROVNE *Romania*, a vil. Hungary, Hither Danube, so Trzebnica about 9 m. from Bieleh. It contains a parish church and has numerous pastures. Pop. 3078.

ROW par Scotland, Dumfriesshire, 16 m. by 6 m. Pop. 4372. Consists of the handsome parish church, near the entrance to Loch Gair 11 m. N W Dumfries, are numerous elegant villas, chiefly the summer-residences of Glasgow merchants.

ROWANDIZ, or **RAVANDIZ**, a tn. Achaia Turkey pass, and 230 m. N Bagdad, 1 bank of the Great Zab, lat 36 47 N lon 44 30 E. It occupies a narrow valley, and is protected by a very strong fort, which is built on a little bay, on the acclivity of the mountain, it is estimated to contain 2000 houses. The Zab is here very narrow, but rapid and impetuous, and hemmed in between high rocky banks.

ROWHERROW a par England co. of Somerset area 364 ac. Pop. 318.

ROWHID, par Eng Wilt 268 ac. Pop. 1118. **ROWHIN** (Ora and Lerrai), a vil Bohemia, circle Chlum, 4 m from Wroctaw with a parish church parsonage and school. Pop. 1567.

ROWENKO a tn Bohemia, circle Ramlau, and 47 m. N E Prague, on the Westelitzsch, here crossed by a covered bridge. It contains a church, townhouse, and school, and has a saw and two other mills. 1 op 1364.

ROWLEH, or **THE ROWERS**, par Ireld. Kilkenny, 10,758 ac. Pop. 2907.

ROWINGTON, par Eng Warwick 8424 ac. P 334. **ROWLEY**, par Eng York E. Riding', 6440 ac. Pop. 498.

ROWLEY a vil and township, U States, Massachusetts, 80 m. N by E Boston. The village contains two churches and in the township are several tineries and other manufacturing establishments. Pop. 1203.

ROWLEY KUSA a par England co. Stafford, on the Birmingham and Dudley canals 7 m. W Birmingham. It consists of several hamlets and clusters of houses, occupied chiefly by persons employed in the numerous collieries and public works in the vicinity and is one of the great central localities of the iron trade. It has a modern church, with a very ancient tower, two distinct churches numerous dissenting chapels, an endowed and several other schools extensive manufactures of nails in which the greater part of the women and girls of the parish are employed blast-furnaces, steel and iron works, &c. Area of par, 8670 ac. Pop. 14,242.

ROWLETON, par Eng Hereford 1878 ac. P 125.

ROWLER, par Eng Hants 1191 ac. Pop. 138.

ROWNO a tn Russia gov Volynia, on an affluent of the Horyn, 116 m. W N W Jitomir. It contains several churches and has important annual fairs. Pop. 8270.

ROXBURGH, an island co. New S. Wales, 80 m N W Sydney; 50 m. long, N to S and 80 m to 40 m. broad. It abounds with hills and broken islands, but many fertile spots are to be found where the pasturage is very rich. It is watered by the Laron, Mullamara, and Wimbardale, all affluents of the Macquarie, and an all of which good deposits have been found. Area, 672 160 ac.

ROXBURGH, par Scot Roxburgh, 8 m by 5 m. P 1141.

ROXBURGH, *Roxburghensis*, or *Tervodensis*, an island co. Scotland bounded, S W by co. Dumfries, S.E. and E Cumberland and Northumberland, W Berwick, W Middle than and Belrich. Area, 467,990 ac., of which about two-thirds are occasionally under the plough. There is great variety of surface, but its general character is unobscuring. A range of lofty hills, called the Cheviot Hills, extends from the E. extremity of the county, 8 W along the border of Northumberland. The highest land occurs on the summit of Catterhill,

66

and other points in the ridge of the Cheviots, on the E.; and the Maiden Paps, Wimbush Hill, &c., between the coasts of the Tyne and the Uddle, on the S. The hills are mostly smooth, dry and green, affording excellent pasture. The E. side of the country is chiefly occupied by the formations of the red sand or new red sandstone group. The W side by the greywacke rocks; the Cheviot or barren hills, are chiefly of N. E. Harward, at the intersection of the Tweed and the Uddle; and the Uddle is composed by the red sandstone, where also, as in some other parts of the county limestone is abundant. A considerable portion of the soil is fertile, and where it is so suitable, husbandry is well understood and practiced. Large quantities of wheat are grown, but by far the greater part of the country is occupied as sheep-walks. Farms are generally large, and some farmers hold three or more at once. Various branches of woollen manufacture are prosecuted with great vigour and success in some of the principal towns in the county, particularly Hawick. The parish of Kirk Yetholm, in Roxburghshire, is celebrated as being the residence of the largest colony of gipsies in Scotland. Principal rivers—Tweed, Tyne, Gala, Leader, &c. The county contains 31 parishes, and returns one member to Parliament. Jedburgh one of the principal towns, joins with other burghs in choosing a representative. The other principal towns are Hawick and Kelso. Pop 51,642

ROXBURY a tn. U. States, Massachusetts, picturesquely situated about 3 m. S. Boston, with which it is connected across Boston Neck by three broad and beautiful avenues. Its proximity intimately connected with that of Boston, has advanced rapidly within a few years, and much ground recently under culture is now covered with spacious streets and handsome dwellings. Among the public edifices are five churches, some of them distinguished by their architecture or the beauty of their sites but perhaps the most striking feature within the precincts of the township is the beautiful cemetery of Forest Hills, occupying an area of about 70 acres, entered by an Egyptian gateway and admirably laid out and adorned with trees, shrubs and plants of almost every variety indigenous to New England. Most of the inhabitants are connected more or less intimately with the business and trade of Boston, but among its own manufactures are carpets, woven silk and silk girds, and tanneries, leather cutlery, shoes and fire engines, carriages, paints, white-lead and chemical products shoes, hats cabinet-work &c. John Elliot, whose missionary labours have justly entitled him to the name of apostle of the Indians, was pastor of the first church of Roxbury for nearly 60 years. Pop. (1850) 18,371

ROYDON a vil and par. England, co. Essex, on the Eastern Counties railway 5 m. S.E. Wex. It has a handsome church, with a square embattled tower; an endowed school, and an ancient manor-house, which has been converted into three buildings, but still retains much of its original grandeur. Area of par., 2996 ac. Pop. 903

ROYE [anc. *Rehem*] a tn. France, dep. Somme, 39 m. S.E.E. Amiens. It was once a place of strength, and stood 15 sieges, by the last of which, in 1832, it was almost destroyed. It contains a parish church, with beautifully painted glass and has a considerable trade in corn. Pop. 3764

ROYSTON, a market tn and par. England, co. Cambridge and Bedford. The town, in a high country, 17 m. N. E. of Bedford, at the intersection of the Thame Valley and the Emsay Street is irregularly built, lighted with gas and has a venerable church, and places of worship for Independents and the Society of Friends. Malt is extensively carried on, and there is a considerable trade in corn. Area of par., 320 ac. Pop. 3031

ROYSTONE, par Eng. York (W. Riding) 12 708 ac. Pop. 4045

ROYTON a vil. and chapelry, England, co. Leicestershire. The village, about 3 m. N. Oldham, in a deep valley, has of late years assumed the appearance of a town. It has regular streets, lighted with gas, and contains a handsome chapel, places of worship for Independents Wesleyans, and the Society of Friends, and a national school cotton, furniture, and sundry manufactures are extensively carried on, and many of the inhabitants are employed in the neighbouring collieries and stone-quarries. Pop. 6974

ROZA or **ROWAN** (a tomb) a tn. Hindooistan, Nizam's dominions par Aurangabad, and on the road from that city to the caves of Elkon, 64 m. W N W. Dowlatabad, with which town it is connected by a good road, lies on the banks of the river. It stands on the narrow summit of a hill peak, and is encircled by a good stone wall, flanked with towers. It is in the works of Jaquesmont, a cemetery of saints, being full of mosques and Muslim sepulchres, and tenanted chiefly by fakirs or mendicant priests, who are severally attached to the various shrines, and live on the charity of pilgrims, and the revenues of a jaghira or district containing 10 or 12 villages, granted to them by the Hyderabad government. Amongst the tombs is that of Aurangzeb but, agreeably to his desire, it is a very plain structure, and attracts much less homage than that of Boorhan-ud-din, a many members of the Nizam's family are interred at Roza, the reputed sanctity of which causes it to be chosen by numerous wealthy Mahomedans as a last resting-place. The mosque here are said to possess the remarkable peculiarity of a cross surmounting the cupola—an emblem unknown in India further northward.—[Jaquesmont, *Voyage dans l'Inde*, &c.]

ROZAVLIA, or **ROZAWLIA**, a vil Hungary, co. Marosmaros on the Dan. 10 m. from Békéshely. It has a Greek church, a synagogue, and a fertile soil. Pop. 1283

ROZDALOWITZ, a tn. Bohemia, circle Brunn, and 26 m. E.N.E. Prague with a castle, church, denary and school a handry-distillery a tile-work, and a saw mill Pop. 1177

ROZENBURG an isl. Holland, prov. S. Holland, in the estuary of the Maas, 6 m. W S.W. Rotterdam. It is 6 m. long, S.E. to N.W. by about 2 m. broad. Pop. (agricultural) 996

ROZMITAL, or **ROZMITAL**, a tn. Bohemia, circle Prácheň, on the Lomitz, 43 m. S.W. Prague, with a castle, townhouse, chapel and school a smelting furnace, and a rolling-mill Pop. 1706

ROZNAU a market in Austria, Moravia, circle Posen near 1 bank Betschowa, 19 m. E.S.E. Wladislawitz, with a church, and a castle, a paper and a walk-mill near it is an old silver-mine. Pop. 3944

ROZBA PALLAS or **PALLAS** a vil. Hungary Thidher Thidher, co. Szathmar 12 m. from Aranyos-Megyes. It has a handsome Greek united church. Pop. 1034

ROZZO, a vil. Austria, Istria, about 34 m. from Plaine, with a parish church. Pop. 1100

RTINA, a vil. Bohemia. See HERTIN

RUAB (anc. *Rebas* or *La*) a vil and par. Spain, Galicia, prov. and 85 m. from Orense, with a church, a townhouse, two primary schools, a trade in wine, and monthly cattle-fair. Pop. 1900

RUABON, a vil. and par. Wales, co. Denbigh, pleasantly situated on the Alyn 5 m. S.W. Wrexham. It has a very pleasing and beautiful appearance, an ancient and venerable parish church, with some fine monuments &c.

diarist church, independent, Baptist, Primitive and Wesleyan Methodist chapels, and several coal and iron mines. Near it is Wynnstay, the beautiful seat of Sir Watkin Williams Wynne. Area of par., 14,994 ac. Pop. 11,507.

RUDAN, an isl. Mediterranean, about 2 m. off coast of Syria. lat. 34° 49' N., lon. 35° 58' E.; about 4 m. long, and rather more than 2 m. broad. It is little more than a barren rock, but its situation renders it of importance, there being good anchorage for the main, besides its suitability as a depot for coals. It is the ancient Aradon, or Arad of Scripture, whence Tyre is said to have drawn her mariners. It was also an important station of the Crusaders. The inhabitants are all Moslems, pilots, ship-builders, and sailors; a great number of the native coasting vessels are built here. It is surrounded by the remains of ancient walls, and contains some fine ruins of a Christian church, built by the Crusaders. It also contains a castle or citadel, still nearly perfect, without guns. Pop. (exclusive of women and children) 950.

RUDAN, par. Trel. Chert., 10,744 ac. Pop. 1897.
RUDAN, three par. Eng. Cornwall — 1, (*Looe*), 2,550 ac. Pop. 410 — 2, (*Major*) 2,470 ac. Pop. 179 — 3, (*Minor*) 653 ac. Pop. 288.

RUARDEAN par. Eng. Gloucester 1500 ac. P. 1033.

RUTAN, an isl. Bay of Honduras. See ROATAN.

RUEBLAND, a vil. Brunswick, circle and 7 m. S W Blankenburg on the Bode. In its vicinity are blast-furnaces and other important iron-works, marble-quarries and marble saw mills, and two remarkable caverns, one called the Buehl-hole, with beautiful white stalactites, and another called the Heunmahlhöhle, in which the bones of the extinct great cave bear have been found. Pop. 878.

RUEBENACH a vil. Rhénish Prussia gov. and W V W Coblenz with a R Catholic church, two mills, and a trade in cattle. Pop. 1088.

RUBI a vil. Spain, Catalonia, prov. and about 10 m. from Barcelona, partly on a hill and partly on a plain on an affluent of the Llobregat with a church, and two primary schools, a distillery, and silk, wool and cotton-mills. P. 1816.

RUBIAVA A vil. and com. Italy Piedmont, div. Turin prov. and 18 m. S. from Turin. It is a straggling place, and has two parish churches. Pop. 3179.

RUBICON, a river, Italy of some celebrity in Roman history, Caesar having by crossing it finally committed himself to the civil war. It is very doubtful under what modern name it now exists, the honour being claimed by no fewer than three streams—the Piadello, Flumicino and Lento, all in the Papal States.

RUBIELLOS, several places, Spain particularly — 1, (*de Morón*), A. to. Aragon, prov. and 80 m. S E. Peralta, r. bank. Negrovales, in a plain at the foot of a hill. It is surrounded by an earthen wall, and is regularly built on a hill, contains a collegiate church, a nursery and a primary school and has manufactures of woollens, earthenware, and carding-machines. Pop. 2785 — 2, (*de Segor*), A. to. New Castle, prov. and 82 m. from Cuenca, on a height above l. bank. Júcar with a church, courthouses, prison, primary school, and oil and flour mills. Pop. 1867.

RUBIEZGOW, a tn. Russian Poland See HADZIMISZOW.

RUBINGA, a tn. Russia. See YRANSK.

RUBIO (Isl.), or Peralta, par. Enns, a vil. Spain, Andalusia, prov. and about 55 m. from Seville. It is poorly built; contains a church, and an endowed school and has manufactures of gypsum and an oil, and a flour-mill. Pop. 1500.

RUBITE, a vil. Spain, Andalusia, prov. and about 25 m. from Granada, on a height with view of the Mediterranean. It is composed of steep and irregular streets, contains a parish church, courthouses, and primary school and has a distillery, and a trade in wine and brandy. Pop. 983.

RUCKERSDORF, a vil. Bohemia, circle Baudau, on the Rensselsch, in the Silesisch. It has a saw and three other mills. Pop. 1098.

RUDLN a small, nl. Russia, in the Baltic, gov. and 58 m. E. S. Streltsund. It was at one time separated from Rügen by a small stream, but, in 1309, a violent storm broke through and formed a channel of considerable width between them. It is about 2 m. long, N to S, and much less in breadth. It is almost entirely surrounded by rocks and sandbanks. Its only inhabitants are a few fishermen and pilots.

RUDENHAUSEN a market in Bavaria, Lower Franconia, 17 m. E Würzburg. It is the seat of a court of justice, and has a Protestant and a R. Catholic parish church, a castle, two breweries, tile-works, lime-kilns, a powder and several other mills, a trade in corn, horse wine, and fruit, and five annual fairs. P. 954.

RUDERSBERG, a vil. W. Hertenberg circle Jast. bei Wehlshelm, on a hill above r. bank. Wieslauf with a parish church and important six markets. Pop. 1298.

RUDERSWILL, a vil. and par. Switzerland, can. and 18 m. E V. E. Bern, l. bank. Enns. The church and paragonage are beautifully situated on a height. In 1434 the plague carried off the whole of the inhabitants except two. Pop. 2356.

RUDERSHEIM a tn. Nassau r. bank Rhine, opposite to Bingen, 13 m. W & W Mainz. It contains an old castle, and a R. Catholic church, and has a considerable trade in the excellent wine grown in the district, chiefly on the terraces which overhang the Rhine. At the upper extremity of the town is a picturesque round tower at its lower extremity stands the old massive quadrangular castle of Bingerburg and at some distance higher up the castle of Bingerbrunn. P. 3509.

RUDFORD par. Eng. Gloucester 1204 ac. Pop. 322.

RUDGWICK, par. Eng. Sussex 5280 ac. Pop. 1091.

RUDHAM two par. Eng. Norfolk — 1, (*East*), 4981 ac. Pop. 999 — 2, (*West*) 2835 ac. Pop. 487.

RUDIANO, a vil. and com. Italy Lombardy gov. Milan prov. Brescia, dist. and 5 m. S W Lodi. It is a clean and stirring place, with a parish and three auxiliary churches, manufactures of linen, and several oil mills. Pop. 1470.

RUDIG or W. Prussia a tn. Bohemia, circle and 8 S W Sebnitz, on a small affluent of the Goldbach. It has a church, a school, a townhouse and several mills. Pop. 1090.

RUDKÖBING upon LARVINGSDORF a tn. Denmark, W coast, Isle Langeland. It is an old place, and in early times was fortified. It has only a winter-haven, admitting vessels which draw about 8 ft. water, but its quay is commodious. The inhabitants are chiefly seafaring, or agricultural. Pop. 2210.

RUDNA, a vil. Hungary, Thither Thales, co. Torontol, 10 m. from Tuzsorev. It contains a Greek non-arched school,

The inhabitants are Walschians, and raise much wheat and maize. Pop. 1915.

EUDNOK, or **RODA**, a vil. Hungary, Thither Theiss, co. Abaujvar in a mountainous district, 7 m. from Jassó. It has chalybeate springs, with a bathing establishment. Pop. 1162.

RUDOLPHSTADT, a vil. Bohemia, circle and 4 m. from Budweis in a mountainous district. It has a parish church, a school, an old castle, now used as an arsenal, manufactures of lace and silver-ware. Pop. 870.

RUDOLPHSTADT a tn. Germany, prov. principally Schwarzwald-Rodolstadt, pleasantly situated between hills. I bank Saale, here crossed by a bridge, 16 m. S. Weimar. It is surrounded with walls, with four gates, and is well built; contains a palace, in which the prince resides, three churches, a townhouse arsenal, gymnasium, normal school, hospital and library of 40,000 vols., is the seat of several courts and public offices, and has manufactures of woollen cloth; a bell foundry a spinning-mill, tile-works, and a trade in wool, fruit, and garden produce. Pop. 6743.

RUIGOV, par Eng York (S. Midling), 5080 ac. P. 591. RUL [anc. Durcorran] a tn. France, dep. Doubs, 13 m. N.W. Abbayeville, with a remarkable ancient chapel now enclosed among the historic monuments of France. Pop. 1194.

RULAS, a river, Spain, formed by the junction of several torrents from Mount Vitorica to Sierra de Guadalupe, on the frontiers of New Castile. Runs S.W. and joins I bank Guadiana, after a winding course of about 45 m. It becomes dry in summer and is generally fordable even in winter.

RULDA a tn. Spain Leon prov. and 20 m. from Valladolid, on the Zapardiel. It contains a parish church a suppressed monastery a courthouse, and primary school and has a trade in good wine grown in the district and in iron and colonial produce. Pop. 2470.

RULHUI (U) a vil and town Italy Piedmont, co. Turin prov. and 2 m. W. Ivrea in a plain S. of Mount Biella, near r bank Lancia. It has a parish church. Pop. 1904.

RULHUI or **RULHUI** (anc. Rulhuin) a tn. France dep. Seine-et-Marne 4 m. N.E. Versailles. It contains a handsome parish church of three naves, with a fine portico and bellry. Near it is the chateau of Malmaison the favourite residence of the Empress Josephine whose remains lie in the church. Besides that of her daughter Hortense, ex-queen of Holland. Pop. 3337.

RULENGAU a vil and par Switzerland, can. and h. Bern, in a narrow valley r bank Emme. It contains a parish church and a pebbly house and had once a fine old castle, embosomed in a beech forest. In the revolution of 1798 this castle was so completely demolished, that not a vestige of it remains. The inhabitants live by weaving linen, and rearing cattle. Pop. 2028.

RULFANO a tn. Naples, prov. Otranto, 16 m. S.E. L. Gallipoli, on a hill; with a Capuchin convent and a school for belle-lettres. Pop. 1890.

RUFFEL (anc. Ruffano) a tn. France, dep. Charente, on the Lige, a little above its confluence with the Charente. It is a N. Angoulême. It is a cheerful-looking place, and both well and regularly built. It has a court of first resort, and a communal college; a considerable trade in corn, wheat, clover, which bears its name, cattle, and goose-pies, and near it is the fine old chateau of Breuille. Pop. 2784.

RUFFELSHAIM a market tn. House Darmstadt; Starkenburg, circle Odenwald with a church. Pop. 1622.

RUFFINO-DE-LEVI (Ruffi) a vil and com Italy Piedmont, dir. Genoa, prov. and on the heights above the town of Calatrà, near r bank Etruria. It has a parish church, and a massive tower, the only remains of its ancient castle. Pop. 1628.

RUFFORD, par Eng Lancashire; 3102 ac. Pop. 861.

RUFFORT, par Eng. city of York, 2490 ac. P. 899.

RUPINQUE, a marriage tn., W. Africa, a little E. Capo Verd. It carries on a considerable trade. Pop. about 1500.

RUR, a tn. Naples, prov. Principato Citra, W. N. La Hala, on a lofty hill. It contains a richly-decorated chapel. Pop. 2220.

RURBY a market tn. and par England, co. and 15 m. N. W. Warwick pleasantly situated on rising ground, I bank Aven and at the junction of the Looan and N.-Weston,

the N. Midland, the Leamington and Warwick, the Trent Valley, and the Rugby and Stamford railways. It consists of some ancient and irregular, and of several modern and well-formed streets, generally paved and lighted with gas, and lined with houses for the most part substantially built of brick, but occasionally interspersed with others of wood, covered with shingles. The only objects of interest are an ancient parish church, with a tower square embattled tower; a handsome modern district church, Wesleyan, Baptist, and R. Catholic chapels; a grammar-school occupying a splendid range of buildings in the Elizabethan style, possessed of an endowment estimated at £2000 per annum, and new ranking, mainly through the exertions of the late Dr. Arnold, as one of the most celebrated schools of England; a national and a charity school and several almshouses. The railway stations, particularly that of the N. W. coast, are extensive and handsome structures. Rugby derives all its importance from its school, which has induced many opulent families to settle in it, and from the number of railways which centre in it, and necessarily create a very extensive transit trade. It has no manufacturing establishment of any consequence, except an iron foundry but it has two chiefly markets, one of them for corn, and 18 annual fairs, weekly for cattle. One of these lasts eight days. Area of par, 2190 ac. Pop. in, 6317 par, 6966.

RUGLIFY a market tn. and par England, co. Stafford. The town 7 m. N.W. Lichfield and a station, Trent Valley railway is pleasantly situated on the Trent, has several good streets, lighted with gas, and kept remarkably clean; a handsome Gothic church and chapel for Independents, Wesleyans, and R. Catholics; several endowed schools, and other charities. Iron founding is carried on here, and there are also mills for rolling sheet iron. Pop. 1034. Area of par, 3411 ac. Pop. 4188.

RUGOV, an isl. France, in the Belne, off N.W. coast, prov. Poitou, from which it is separated by a channel, varying in width from 4 m. to 2 m. (6 points 64° 31' N. lon 13° 48' E.). Area 2449 ac. (6 m. It is very irregular in shape, and indented by a series of bays and creeks, but the water shallows so rapidly and the coast is so much menaced with sandbanks, that it possesses no good harbour. The surface, unlike that of the mainland of Poitou, which is flat and uninteresting in the extreme, exhibits a beautiful variety of hill and dale, and has many well-wooded slopes and wild romantic ravines. The loftiest height, called the Stubbentz, is situated at the E. extremity of the island and has a height of about 550 ft., forming a bold and precipitous chalky cliff from the top of which a flight of steps, hewn in the rock, leads down to the sea-shore. Like the cliff all the rocks of the island belong to the cretaceous system, and have contributed, by their decomposition and intermixture with vegetable and alluvial humus to form a soil of remarkable fertility equally adapted to agriculture and to grass-husbandry and enabling the inhabitants to export both grain and cattle to a considerable amount. The fisheries, also, are very valuable and give employment to a large number of the islanders. In early times Rugov was held sacred to the goddess Hecate, and a small lake surrounded by trees, is still pointed out as having been her principal abode. During the Thirty Years war, the Swedish general possession of the island, and retained it till 1815, when it was ceded to France. Administratively it is attached to gov. Strasbourg, and forms, with several small adjacent islands the circle of Bercy, which has a capital of some name. Pop. 37,000.

RUGOVWALDE, a tn. Prussia, gov. and 20 m. N.W. K. Kdlin r bank Wipper near its mouth in the Meile. It is walled, tolerably well built; contains a castle, and four churches has several courts and public offices, manufactures of ordinary and coarse linen, woollen and coarse goods, sillocks, building yards, and some shipyard; a fishery and a trade in fish, chiefly eels and dried salmon. Pop. 4695.

RUGIBERG, a vil and par Switzerland, can. and 9 m. S. Bern. Here are a number of remarkable caverns, and an old Benedictine monastery, now converted into a workshop, in which Gregory VII. is said to have lived some time before he was raised to the papacy. Pop. 3578.

RUGI (anc. Rugi) a tn. France, dep. Eure, 25 m. S.E.W. Evreux. It apparently occupies the site of a Roman station, and was long possessed of a strong castle, which

makes a considerable figure in history, but has almost disappeared. The parish church has a handsome tower and portal of the 15th century but both unfinished. Rugles is the centre of important manufactures of flax and sails the former employing, in the town and neighbourhood, 2500, and the latter 8000 hands. Pop. 1601

RUELLA, a tn. partly in Saxe Weimar, and partly in Saxe-Coburg, circle and 6 m. S.E. Eisenach, on both sides of the Elbe. It has two churches, and a hunting-lodge, manufactures of meerschaum-pipes, iron and steel ware, and numerous mills. Pop. 8500.

RUEHLAND, a tn. Prussia, prov. Silesia, gov. and 104 m. W. Liegnitz, on the Black Elster. It has several public offices, a Protestant church and a chapel and a paper and other mills. Pop. 1810.

RUEHE a river, Germany rises in the Harz Mountains, about 15 m. W. N. Nordhausen, in Prussian Saxony flows N. W. and joins r. bank Leine, a little N. W. of Nordheim, total course, about 30 m.

RUEH—1, The German name for the river Rour—(noted see)—2 A river Prussia, an affluent of the Rhine, which it joins on r. bank 16 m. N. Düsseldorf. It rises in Westphalia, goes Arnberg in the Rothaar-Gebirge, flows W. is joined r. bank by the Mohne, by the Lenn, total course, which is very tortuous, about 110 m.

RUEHBOCK, a tn. Rhinisch Prussia, gov. and 19 m. N. Düsseldorf, on the course of the Rur with r. bank Rhine. It contains a castle, and has manufactures of cotton goods, and extensive building-yards, in which a great number of the sailing vessels and steamers used in Germany are built a trade in corn, wood, wool and coal, particularly the last obtained from a valuable coal-field in the neighbourhood. Pop. 2225

RUEHFN or **RUEHN** a vil. Holland prov. Drenthe, 17 m. S.W. Assen with a church a school and a well frequented cattle and fax market. Pop. 1079

RUEHFWOLD vil. Holland, prov. Drenthe, 21 m. S.W. Assen, on the Wild Aa, with a church and school 10 p. (agricultural) 1245

RUNN See CRYCH

RUNNINGTON, par Eng. Somerset, 323 sq. P. 93

RUNNYMEDE, a beautiful plain England, co. Surrey par Egham, r. bank Thames, 20 m. W. R. W. London and memorable as the place where the barons in 1215, compelled King John, after a few days' debate to grant the privileges contained in Magna Charta

RUKOVICH [see. Imoche] a vil Austria, Dalmatia, cercle Spalato, 80 m. from Metkovic. 1 op. 1292

RUNWICK Bay, an inlet of the N. E. coast, England, 5 m. N. W. by N. Whithy capable of containing about 10 sail of shipping in five and six fathoms water

RUNTON par Eng Norfolk 1448 sq. Pop. 485

RUNWELL, par Eng Essex 2059 sq. 1 op. 534

RUOTI a tn. Naples, prov. Basilicata 10 m. N. W. Potenza, on a barren height. Pop. 2700

RUPEL MONDE, a tn. and port, Belgium, prov. E. Flanders, 25 m. E. by h. Ghent, l. bank Rheldt, near the confluence of the Rupel, a navigable stream only 5 m. long. It has manufactures of cottons, leather tobacco, and bricols, dyeworks, blancheries, and fisheries. The port is small but commodious. The ancient castle of Rupelmonde, erected by the counts of Flanders, and principally used as a state prison was rebuilt and modernized by Baron Feitz, in 1817. Gerard Mercator the well known navigator was born here in 1512 Pop. 2755.

RURIER RIVER, British N. America, issues from the W. extremity of Lake Mistassine lat. 50° 45' N. lon. 72° 50' W., and after a W. course of about 800 m. falls into James's Bay the S. E. extremity of Hudson's Sea.

RUPUNYUN or RUPUNYUN a river British Guiana, the principal affluent of the Essequibo which it joins, 200 m. from the coast, in lat. 5° 57' 35" N. where a tortuous N. course of 253 m. It forms several falls, has very turbid waters, and the vegetation on its banks is less vigorous than that on the Essequibo.—(Four Voy. Geo. Soc.)

RUPERSBORF or RUPERSBURG two places, Bo-hemia.—1 A vil. cercle Königgrätz, l. bank Sava, 6 m. from Brunn. It has a church, handsome quarries, lime-kilns, and several mills. Pop. 1039.—2 A vil. cercle Budweis 24 m. from Blatitz. with a church, a school and two mills. Pop. 1708.

RUPERSDORF (HONKE) a market in Lower Austria, near Gamsdorf with a church and a school. Pop. 1489

RUPPIN, two places, Prussia.—1 (Alt-) a tn., gov. and 36 m. N. Potsdam at the N. extremity of the lake of same name, where the Havel falls into it. It contains a parish church and has a distillery and a fishery. Pop. 1753.—2 (New-) A tn., about 5 m. S. W. Alt-Ruppin, cap. circle, and W. shore lake of same name. It is walled, well and regularly built and has four public squares, several courts and public edifices; a church, gymnasium, Jesuitic asylum two hospitals, manufactures of woollen and linen cloth, flannel, sherry, cabinet-work and tobacco, several breweries and distilleries, and a fishery. The architect, Schinkel, was born here. Pop. 9676.—The circle, area, 514 geo. sq. m., is flat, well watered, and fertile. Pop. 68,325.

RUPPKE, a vil. Baden, cercle Middle Rhine, near Carlsruhe; with a church. Pop. 1250.

RUREE, a m. Beland 75 m. S. Hyderabad and on the edge of the desert lat. 24° 52' N. lon. 68° 30' E. It has a magnificent mosque, and was formerly a place of greater importance than at present. Pop. about 1000

RURICK, an isl., S. Pacific Ocean, Low Archipelago; lat. 15° 10' S.; lon. 145° 47' W. It extends about 20 m. N. N. E. to S. S. W., and contains a lagoon, into which, however, no entrance could be found. It is inhabited

RUSA, a tn. Spain, Andalusia, prov. and 24 m. N. E. Jaen; with a church, courthouses, primary school, and very ancient seminary, manufactures of white soap, and linen and hempen cloth, a distillery, a gypsum-kill, and a trade in corn, wine, oil, and charcoal. Pop. 1917

RUSA, a tn. Russia, gov. and 55 m. W. Moscow and on a river, at the foot of a lofty hill, crowned by a castle. It consists of four quarters; contains a stone and four wooden churches, and a public school, and has several tanneries, and a trade in corn, fax, and hides. Pop. (1850) 1585

RUSCOMBE, par Eng. Berks 1948 sq. Pop. 239.

RUSH a small seaport and market in Ireland, co. and 14 m. N. E. Dublin, on a headland projecting into the Irish Sea, and principally inhabited by labourers and fishermen. It has a small pier and some little trade in the export of potatoes in a coast-guard station and a station on the Dublin and Drogheda railway Pop. 1603.

RUSHALL, two par. Eng. —1 Norfolk, 267 sq.

Pop. 1176.—2. Wilts 2164 sq. Pop. 263

RUSHALL, a vil and par England, co. Bedford on the Wytrye and Emsington canals m. N. E. Walsell. It has a parish church, with some old monuments, a national school, the ruins of an old castle, and limestone-quarries and lime-kilns. Area of par 1934 sq. Pop. 1948

RUSHBROUKE par Eng. Suffolk 1080 sq. P. 188.

RUSHBURY par Eng. Salop 4132 sq. 1 op. 465.

RUSHDEN par Eng. Herts 1486 sq. Pop. 531

RUSHDEN, a vil and par England co. Northampton, on the Nene, near Higham-Ferrers. It has a large and handsome parish church, Wesleyan, and General and Particular Baptist chapels, manufactures of shawls, and a considerable trade in coal, tannery and corn. Whaley, the celebrated Arminian divine and commentator was born here. Area of par 2770 sq. Pop. 1480

RUSHEN par Isle of Man 571 sq. Pop. 3156.

RUSHFORD par Eng. Norfolk and Suffolk 4360 sq.

P. 187

RUSHMERE, two par. Eng. Suffolk —1 759 sq.

Pop. 116.—2 2142 sq. Pop. 874.

RUSHOK par Eng. Worcester 1218 sq. Pop. 214

RUSHOLME, a township, England co. Lancaster par and m. S. E. Manchester with three handloom churches The Manchester Victoria Park is partly in this township Pop. 2679

RUSHTON par Eng. Northampton 5900 sq. P. 429

RUSHVILLE —1 A vil, U. States, Indiana, 33 m. E. by S. Indianapolis, with a courthouse, jail three churches, and several mills. Pop. 2108.—2 A vil. Illinois, 53 m. W. N. W. Springfield, with a courthouse, jail, and four churches. Pop. 1000.

RUSKINGTON par Eng. Lincoln, 4760 sq. P. 1027

RUSKON a tn. European Turkey, See KOSTAN

RUSKUP, par Eng. Sussex 5126 sq. Pop. 533

RUSSE, a tn. Prussia, gov. Gumbinnen, on a small river of the same name, near its confluence with the Niemen and not far from the mouth of the latter in the Curische-Haff, 25 m. N. W. Tilsit. It has a considerable trade in wood, and an important salmon-fishery. Pop. 3150

RUSSEBACH par Ger. Westmouth 3569 sq. Pop. 428.

RUSSEBACH, a vil. Saxo-Altenburg near Altenburg, with a church and a mill. Pop. 1881

RUSSEIGVIERE, a vil. and com. Belgium, prov. E. Flanders, on the Ronge, near the frontiers of Holland, 21 m. S. S. W. Ghent. It has manufactures of linen at Nieuweld, a brewery, a flour-mill, and a trade in corn. Pop. 1024.

RUSSELSHEIM a market tn. Hesse-Darmstadt, prov. Starkenburg, l. bank Main, 15 m. W. N. W. Darmstadt, with a church. Pop. 1452.

RUSSIA [Frank, Russia, German, Russland], the most extensive empire in the world, extending from lat. 55° to 78° 20' N.; and from lon. 18° E. eastward to 135° W. It is bounded, N. by the Arctic Ocean; W. Sweden, the Baltic Sea, Prussia, Austria, and Moldavia; S. Turkey in Europe, the Black Sea, Turkey in Asia, Persia, Independent Tartary, the Chinese Empire, and the Pacific; and E. British America. It has an

nearest not far from the W. shores of Europe, and stretches continuously first across the whole of that continent, next over the whole continent of Asia, and lastly crossing Behring's Strait, finds no limit till it comes in contact with British America, after having passed over 50° more than half the circuit of the globe, or about 210° in all. Owing, however, to the high latitudes on which this course must be traced, the whole length E. to W. is less than the number of degrees might lead us to suppose, and is estimated at not more than 7000 m. The average breadth, N. to S. falls far short of this, and probably does not exceed 1500 m. So immense, however, is the whole area, that it at least doubles the area of Europe, and is fixed by the nearest approximations which can be made at about 6,006,010 sq. m. Of these the proportions belonging to Europe, Asia, and America, and their respective population are exhibited in the following table —

AREA AND POPULATION OF THE RUSSIAN EMPIRE

	Area in sq. m. sq. m.	Pop. (1881)
European Russia, Asiatic Russia —	1,808,071	62,038,000
Alaska	5,978,238	2,937,000
English possessions	200,000	—
Transcaucasian provinces	30,194	5,648,000
Russian America	433,972	61,000
Total	6,006,010	67,584,000

The continuity of this empire, at least of the Asiatic and European portions of it, might seem to suggest the propriety of viewing it as one great whole, and of proceeding accordingly to give a detailed description of it in a single article but on the other hand its immense magnitude, and the distinct names commonly used to designate these portions make it more convenient to consider them separately under the four heads of European Russia, Siberia, Transcaucasian Russia, and American Russia. The names, area, and population of the principal administrative divisions are exhibited in the following table —

GOVERNMENTS OF EUROPEAN RUSSIA—Their AREA AND POPULATION IN 1880

Governments	Area in sq. m.	Pop. (1881)	Governments	Area in sq. m.	Pop. (1881)	Governments	Area in sq. m.	Pop. (1881)
GRAND RUSSIA			Grand Duchy of Finland, continued

10								

The surface, in the most general view that can be taken of it, is two immense plains, the boundary between which is marked though not very definitely by a broad central ridge which stretches across it in an irregular wavy line, mainly in a N. E. direction, commencing on the frontiers of Poland, and terminating on the W. side of the Ural Mountains, near lat. 67° N. This ridge forms the E. continuation of the great water-shed which divides the whole continent of Europe into a N. and a S. basin, but unlike the W. part which is composed of lofty mountain chains, or elevated plateaus, is only of very moderate height, never exceeding 1000 ft. above sea level. Even that height is attained only in the Valdai Mountains, which have very little title to the name. The far greater part of them, and of the remainder of the ridge, has an average height of not more than 500 ft. The only region where the surface assumes a decidedly mountainous appearance, is in the E., where the Ural chain, though nowhere exceeding 7000 ft., looks much more elevated at least in its upper part, from its high latitude and consequent covering of perpetual snow, and in the S. where the mountains of Tataria, lying on the S. shores of the Crimea have a height of about 4000 ft. With these exceptions, the only other parts of European Russia, which, according to the limits above assigned to it, do not belong to its two immense plains, are those districts of Perm and Orenburg which are situated on the E. side of the Urals, and slope towards the almost boundless steppes of Asia.

Rivers and Lakes.—The broad central ridge above referred to forming the great water-shed of the country, sends the waters on the N. side of it either to the Arctic Ocean or to the Baltic, and those on the S. side of it to the Black Sea or to the Caspian. These, therefore, form the four great basins to which all the rivers of European Russia belong. These rivers are remarkable both for their number and their size, and in order to avoid confusion in describing them, it will be necessary to examine each basin separately. Beginning with that of the Arctic Ocean and proceeding E. to W., we find first the Petchora, which after receiving its waters chiefly from the W. slopes of the Ural Mountains by a number of important affluents accumulates them into one great flood which then flows almost due N. and empties itself into a wide estuary remarkable for the number of islands which the alluvial deposits of the river have formed within it. The Petchora is the only large river of European Russia which thus sends its waters directly to the Arctic Ocean, all the others are received by it indirectly through the medium of the White Sea. Their names are the Mezen, N. Dvina, and Onega. By far the most important of the three is the Dvina, which receiving its supplies in nearly equal quantities from the E. by the Votjega, and from the W. by the Natchona, proceeds S. W. in a very circuitous course, continually augmented by large affluents, and falls into the Gulf of Archangel a little below the well-known port of that name. The surface drained by the rivers of this basin is almost entirely confined to the two extensive govts. of Archangel and Vologda. The basin next in order is that of the Baltic. Its principal rivers are the Kama, and Torna, the latter common to both Russia and Sweden, which fall into the Gulf of Bothnia, the Kymmenne, Neva, and Narva or Narova, which fall into the Gulf of Finland, the An and S. Dvina, which fall into the Gulf of Riga, the Niemen or Memel, which enters Prussia before terminating its course, and the W. Bug, an affluent of the Vistula. To the basin of the Black Sea belong the Dniester S. Bug and Dnieper, which have all their mouths at a short distance from each other in the neighbourhood of the rising support of Crimea, the Don, which falls into the N.E. extremity of the Sea of Azov, and the Kuban, which, deriving its chief supplies from Circassia, and forming great part of its boundary, must continue to be a Russian river more in name than reality so long as the Circassians are able to maintain their noble struggle for independence. The last basin, that of the Caspian, is in some respects the most remarkable of all, since though Europe sends it at most only two large rivers, the Ural and the Volga, both supplied in part from Asiatic sources, the latter not only surpasses all other Russian rivers, but is one of the greatest of which Europe can boast. The lakes of Russia are on a scale of magnificence fully commensurate with those of the rivers. To say nothing of the Caspian itself—which, being wholly surrounded by land, and even un-

capable, from the lowness of its level, of discharging itself into any other sea, is truly a lake—Russia contains three others of vast extent, which, from lying wholly within its limits, are peculiarly its own. It is somewhat curious that all the larger lakes belong to the northern basin, and with scarcely a single exception to the basin of the Baltic. To it at least belong Ladoga, the largest lake in Europe, Onega, Peipus, and Ilmen. Finland, too, which toward its S. extremity is a mere network of lakes, sends all its waters to the Baltic. Almost all the other lakes of any consequence belong to the basin of the Volga. Their dimensions are much inferior to those already mentioned, but in any other country less amply provided, such lakes as the Bielo-Ozero in gov. Novgorod, and the Koutchukits, in gov. Volodga would not pass unnoted. In the S. are several large salt-lakes, among which may be mentioned the Elton in gov. Saratov and the Balkutskan in gov. Astrakhan. In concluding this part of the subject, it is necessary to mention that the S. parts of gov. Perm and Orenburg which we have included in European Russia, belong to the basin of the Obi which receives several large affluents from their slopes on the E. side of the Ural chain.

Climate.—A country extending over at least 35° of lat., from the summer regions of the temperate zone to the regions of the frozen seas, must exhibit several very marked divisions of climate. It is usual accordingly to consider it in four distinct divisions—a polar region, including all the country N. of lat. 67° a cold region, extending from lat. 67° to 57° N. a temperate region, from lat. 57° to 50° N. and a warm region, from lat. 50° to 37° N. Another division, founded on the vegetation of the different regions, has been proposed—1, the region of ice, where vegetation is all but extinct, 2, the region of *hercules*, or moorland steppes, 3, the region of forests and pastures, 4, the region of common agriculture, where barley ripens, 5, the region of rye and flax, 6, the region of wheat and orchards, 7, the region of maize and vines, and 8, the region of the olive and the sugar-cane. In regard to the climate in general it may be observed that its characteristic features are a greater coldness and variability than is common under the same latitudes in the more westerly parts of Europe. The mean annual temperature of the upper part of the Norwegian coast to its extremity at the N. Cape, is above the freezing point, whereas a considerable portion of Russia within the same, and even at a lower latitude, is below it. This is true of the whole of Europe. London is at lat. 51° 30', and to the T. of the White Sea the thermal line indicating a mean annual temperature of freezing descends so rapidly that on reaching the Ural Mountains it is found to be as low as 60°. The region to which this name of cold has been given has a mean annual temperature varying between 32° and 40°, but very unequally divided throughout the year the cold in winter often sinking the thermometer to 30° below zero, or 52° below freezing, while the summer-heat often raises it above 80°. At St. Petersburg, considerably below the centre of this region, the mean annual temperature is rather above 40° so the other hand, that of Krasno, situated at the very S. extremity of the region, but much farther inland, is rather below 38°. The temperate region, situated between lat. 57° and 50° N., has a mean annual temperature varying from 40° to 50°, and melior within it the farthest part of the Russian territory, though even there the thermometer has a very wide range, the summer-heat which suffices to grow melons and similar fruits in the open field, being often succeeded by very rigorous winters. The warm region extending from 50° southwards, well merits the name from its extreme summer-heat, the thermometer in June and July standing commonly about 100°, and often considerably higher. It is not, however, free from the remarkable contrasts which a Russian summer and a Russian winter exhibit for the Sea of Azov, situated almost in the heart of this region usually freezes about the beginning of November and is seldom open again before the beginning of April. In all the countries bordering on the shores of the Baltic Sea and the Arctic Ocean, and bounded on the W. and N. by the basin of the Volga, the air is charged with a superabundance of moisture, which descends in mists, and frequent falls of rain or snow. Towards the centre, and still farther E., the superabundance of moisture decreases, though snow still continues to keep vegetation in full vigor, even at the hottest season. Still farther E. the want of rain is often felt, and

long-continued droughts do frequent mischief. In general however, the climates of all the regions are not unfavourable to health, and except in particular districts, where the insularity can easily be traced to local causes disease is by no means prevalent, and human life often attains its longest allotted term.

Geology.—Till recently the geological formations of Russia had been very imperfectly explored, and the most erroneous ideas were entertained in regard to them. The more accurate information now possessed is mainly due to Sir Rodenbeck Murshelton and his coadjutors. Their united work on Russia, and the map and illustrative sections which accompany it, furnish all the geological information that can be required, at least for general purposes. Taking the map chiefly for our guide, we find in the N.W. a vast tract of gneiss and other crystalline schists, penetrated by granite extending W. from the Gulf of Bothnia, and N. from the Gulf of Finland over the whole principality of the latter name, the W. part of gov. Olonets and the extensive part of gov. Archangel which is isolated from its main body by the White Sea. The only other region where a similar development occurs is in the S. where a large granitic steppe stretches in a S.E. direction. It commences near Ovrutsk, in the N.E. of gov. Volhynia, covers the far greater part of gov. Kiev, as much of gov. Podolsk as lies N. of the Bug, the N. half of gov. Kherson, the W. and S. of Ekaterinoslav, and a part of Taurida, and terminates just before reaching the shores of the Sea of Azov from which it is excluded by a narrow belt of tertiary marls and limestone. In the E. however and along the whole crest of the Ural Mountains, from their commencement on the shores of the Arctic Ocean, and almost continuously southward to their last ramifications, granite of more recent origin than that already mentioned occurs, in connection with other eruptive rocks of gneiss, porphyry, scists, serpentine &c. These rocks are common on both sides of the chain by metamorphic schists, forming long and narrow belts nearly parallel with its principal axis. Immediately to the W. appears a similar belt of Silurian strata, which where lowest in the series, are in the state of chlorite and talcose schists. The only other locality where the Silurian system receives a marked development is on the S. shores of the Gulf of Finland where it stretches from its W. extremity, E. along gavs. Esthonia and St. Petersburg, and is then continued across the isthmus between the E. extremity of the gulf and Lake Ladoga, and along the S. and S.E. shores of that lake. In immediate contact with this Silurian formation on the S. but on a much more magnificent scale of development, appears the Devonian system or old red sandstone, as it is sometimes called. The main body of this formation commences near the S.E. shore of the Baltic, and gradually widens out with its N.W. and S.E. sides so as to assume the shape of a wedge. It then forms a wide fork, sending one of its legs N.E. across Lake Onega, and along Archangel Bay to the N.W. extremity of Mezen Bay, and the other leg S.E. to the N.W. frontier of Vornoy. It then covers continuously the whole of gavs. Courland, Livonia, Vitebsk, and Pskov, and parts of Walsia, Minsk, Mohilev and Smolensk on the one side, and of Petersburg and Novgorod on the other while its N.E. branch traverses Olonets, and penetrates into Archangel and its S.E. branch stretches over considerable parts of Kaluga Orel and Tula. The only other localities in which the same formation occurs is in a belt stretching S.E. from the E. shore of the Gulf of Cheskan in the Arctic Ocean and in a longer but narrower belt on the W. side of the Ural chain, where it immediately overlie the Silurian formation already mentioned. The formation next in order is the carboniferous. The main body of it lies within the above belt of the old red sandstone and in immediate contact with it, and then keeping parallel with the N.E. branch of the fork, is continued in the same direction to its termination in Mezen Bay. It occupies the whole of gov. Tver, the cap of which is situated near its centre, and large parts of Rostovsk, Kaluga, Tula, and Kiazan on the one side, and of Novgorod and Olonets on the other. The gov. of Moscow is situated in the very heart of it, and that of Vladimir on its E. side. It is evidently continued beneath these governments, and covers part of their surface the other and far greater part being covered by oolite or Jura limestone. The carboniferous system occurs in other two distant and

isolated localities the one in the S. a little N. of the Sea of Azov where it occupies the E. part of gov. Ekaterinoslav and the W. extremity of that of Don Cosmacha and where, too the coal forming the characteristic mineral of the system is peculiarly worked by pits the other locality is on the W. side of the Ural chain, where in the ascending series it succeeds the Silurian and Devonian systems, and has a larger development than either of them. This development of the carboniferous system on the side of the Ural chain, and the still larger development above described, as existing in gavs. Smolensk, Kaluga, &c., form the opposite boundaries of a system which in European Russia is magnificently developed, and to which, from the large space which it covers to Perm and the contiguous gavs. Sir R. Murshelton has proposed to give the name of the Permian system. Its rocks belong to the upper part of the coal measures and consist chiefly of magnesian limestone, and new red sandstone. The latter name is still often applied to the whole system. In Russia the main body of it though somewhat irregular in shape may be considered as an immense triangle, the three angles of which have their respective vertices at Ustuhia, gov. Novgorod, Mezen near the bay of same name, gov. Archangel and Orel, on the Ural in gov. Orenburg. Vast as this space appears it must still be increased by supposing that the line which joins Mezen and Orel, and forms the longest side of the triangle, is not made perfectly straight, but curves eastward so as to include the districts around the towns of Tcher. Sm. Solikamsk Perm and Ufa. A glance at the map will show that the Permian system as traced by these limits, must extend over the whole of gavs. Kostroma, Viatka, and Kean and large parts of Archangel, Vologda Jaroslavl Nijnei Novgorod Smolensk, Orenburg, and Perm its continuity over the whole of this space is undoubted, but in the N. of gavs. Kostroma and Viatka, and more especially in the part of Vologda between the towns of Ustuhia and Ustuhia it disappears for a time because strata belonging to the Jurassic or oolite system. This system is developed partially in several other localities, and very largely in the N.E. of gov. Archangel immediately above it in the geological series is the cretaceous system, of which the principal localities are Osmorgov Orel, Kozmik Kharlov, and Vornoy near the centre Volhynia and a small part of Poland in the W. and a long tract along the N. base of the Caucasus. The rocks next in succession belong to the tertiary formation, which in both the recent and new red sandstone periods is very largely developed. Strata of the same period, commencing in the E. in gov. Smolensk stretch W. over the greater part of gavs. Perm and Tumbor then after a considerable interruption reappear on the frontiers of Kozmik and Kharlov, cover the far greater part of gavs. Osmorgov and Poltava, and are thence continued with an interruption into gavs. Mohilev Minsk Grodno, and finally into Poland. The mesozoic period has its chief developments in Volhynia, Podolsk, and Bessarabia. Beds of still more recent formation may be traced in the limestone, marl and clay on the N.W. shores of the Black Sea, on the far greater part of the peninsula of the Crimea, on the E. and N. shores of the Sea of Azov on the low flats along the W. and N. shores of the Caspian and the low sandy steppes of Astrakhan. More alluvial deposits, of comparatively recent date are to be found in a greater or less degree at the mouths of all the rivers and are particularly discernible in the great estuary of the Petchora. As a curious and interesting fact connected with geology may be mentioned the vast numbers of erratic blocks and shingle drift spread over the greater part of N. Russia, and evidently transported into it from Finland, Lapland and Sweden.

Vegetation Agriculture, &c.—Russia possesses a vast number of phanerogamous plants, but as the examination which botanists have made is acknowledged to be very imperfect, it is probable that many yet remain to be discovered. A considerable proportion of the surface still continues almost in a state of nature, and, where it is well wooded there is room to question whether any other mode of occupation could be made to prove equally productive. Forests, however are found chiefly in the more northern governments, particularly Archangel, Vologda, and Perm. In many of the central and southern governments a deficiency of timber is seriously felt, and many extraordinary expedients are resorted to in order to obtain adequate supplies of fuel. The governments most imperfectly

provided with wood are Pskov, Ruzhitsa, Kharov, Kharovsk, and Astrakhan. The prevailing trees of the northern forests are fir, larch, alder and birch. The oak is seldom found beyond lat. 61°, few fruit-trees are found beyond lat. 55° and their regular culture cannot be profitably carried on beyond lat. 53 N. Thereapples, pears and plums become tolerably abundant and still further south, peaches, apricots, quinces, almonds, and pomegranates become common fruits. The vine and mulberry trees, are extensively cultivated, and considerable quantities both of wine and silk are obtained. In the Crimea, extensive vineyards have been formed with plants selected with the utmost care, and several of the wines have already acquired a high name. Other governments have imitated the example, and the export of wine promises to become an object of great national importance. Among the principal districts in which the culture of the vine is regarded as an object of primary importance, may be mentioned Penza, Kharov, Kiev, Astrakhan, and the Don Cossacks. The latter make large quantities of a wine resembling champagne, which finds a ready sale in St. Petersburg, Moscow and many of the larger towns. But it is to agriculture properly so called, that Russia must long continue to look for the richest source of national prosperity. After deducting all the regions where the reapers of the olive, without making the growth and ripening of grain absolutely impossible are incompatible with its culture as a regular branch of industry vast tracts of land remain, where the soil is almost inexhaustible fertility and all the cereals are produced in such abundance as not only to meet the home consumption, but leave a large surplus for export. The most important crops raised for food are rye, wheat, barley, oats, buck-wheat, maize, and potatoes and for other purposes hemp, flax, hops, tobacco, and beet-root for sugar. The principal wheat districts are parts of Poland, particularly parts Warsaw, Lublin and Lublin the fertile alluvial tracts along the banks of northern rivers and parts Volhynia, Podolia, Kiev and Lithuania. Rye, from its natural adaptation to the soil, and its almost universal use as an article of food is cultivated in every quarter up to lat. 65. Barley grows in lat. 67° but is in far less general respect than rye. It is also extensively grown in several parts, and more especially in the rich alluvial tracts of Archangel, where the peasants, after satisfying their own wants, grind the surplus into meal and export it in considerable quantities to the coast of Norway. Maize forms one of the most important crops of Ruzhitsa, where a return of sixty fold is said not to be uncommon. Potatoes are largely grown in Ruzhitsa and in the districts which border the Baltic in the last partly for food, but much more for the supply of numerous distilleries, which are employed in converting them into brandy. Both hemp and flax are staple products. The former is grown to an immense extent in all the parts, which border on the Ural chain and on both sides of the upper course of the Volga, particularly in parts of Ruzhitsa and Astrakhan. Flax is also cultivated to a great extent in the wheat districts, but more especially in parts of Olonetz, Volhynia, Livonia, and the S. parts of Poland. Both their fibres and their seed form most important articles of export from the ports of Riga, St. Petersburg, and Archangel. Kitchen gardens, in many parts, attract considerable attention, and cabbage, turnips, carrots, and onions, are occasionally cultivated on an extensive scale in some of the districts bordering on the southern steppes, the water-melon harvest some only attaining immaturity and with little culture, and, while in season, forms a principal food of the lower classes. In Astrakhan, on the banks of the Volga, sugarbeets grows with a luxuriance unknown elsewhere, and furnishes juice sufficient to form an important article of export. Before leaving this part of the subject, it is proper to observe, that, though Russia is decidedly an agricultural country, its progress as the science of agriculture has hitherto been slow and the amount of produce obtained is much more owing to the natural fertility of the soil than to any ability displayed in cultivating it. There is perhaps no country in Europe in which so much corn is obtained at so small an expense of skill and labour. In Livonia, however and the Baltic provinces generally, and in some of the more celebrated wheat-districts of the Ukraine, an improved husbandry has been introduced, and governments, by the appointment of agricultural chanciers in the universities,

and the formation of model farms, is laudably endeavouring to bring it up to other quarters.

Ecology.—Animals, both domestic and wild, are extremely numerous in Russia. Among the former are horses of various breeds, of which those in the N. are generally small but hardy—those of the central and S. provinces large and well adapted for draught; and those of the Cossacks remarkable for their spirit and endurance of fatigue, and their admirable adaptation for light cavalry. In several of the steppe horses still run wild. Cattle are much used particularly in the S., for agricultural operations, and exist in such numbers that tallow and hides form very important articles of export. The best breeds are those of the Livonia, Archangel, Ruzhitsa, and Grodno. In Livonia a great number of excellent cows are kept for the dairy and much good cheese is made. The sheep are chiefly of three breeds—the original Russian, which is found in vast numbers in every part of the country and though generally inferior and producing a very indifferent wool, has been of late greatly improved by crossing with the merino and Saxons the English breed, remarkable for large size, a dark-colored coat, long but coarse wool, and more especially for their ponderous tails, from which from 80 lbs. to 40 lbs of the wool are obtained, and existing in vast numbers on the steppes of the Volga and the Crimean breed not confined to the Crimean provinces, but widely diffused in the Crimea, and among the Cossacks of the Black Sea and of the Don. The improved breeds of sheep are found especially in the Baltic govts of Livonia, Esthonia, and Courland but are rapidly spreading into other quarters. Goats are numerous in the S. where they are valued chiefly for their skins which are used in making morocco leather. In Podolia and Ekaterinograd some Angora goats are kept for their fleeces, which are remarkably fine, and manufactured into shawls. In the N. regions, bordering on the Arctic Ocean, large herds of reindeer are kept and in the S. at the opposite extremity, among the Tartars of the Crimea and the inhabitants of the Caucasus, the camel is often seen. Among wild animals may be mentioned the bear, the wolf, wild dog and various animals which are hunted for their furs. Wild fowl abound, particularly near the mouths of rivers. Among other may be mentioned the pelican, which frequents the shores of the Black Sea. Both on the coasts and in the rivers a great number of productive fisheries are carried on. In the Arctic Ocean whales are occasionally seen and vast numbers of seals are taken. The rivers of the Caspian, particularly the Ural and Volga, and the Sea of Azov are celebrated for their sturgeon. In the same quarters are also important salmon fisheries.

Minerals.—These are both numerous and very valuable. Gold is obtained in large quantities, both by mining and washing, on the slopes of the Ural Mountains, and the streams which descend from them. All of these, however with a very few exceptions, are found on the E. side of the chain; and therefore, belong more properly to Asia than to European Russia. Copper is found both in the Ural and the Ural Mountains. To the W. of the latter in all the low country of Livonia, are vast quantities of deposits from which large quantities of metal are annually obtained, under the most favourable circumstances, the workings themselves being not only comparatively easy but all the materials necessary for smelting, and more especially unlimited supplies of fuel existing in their immediate vicinity. Govts. Olonetz, Viatka, Kama, Volhynia and Orenburg have also their copper-mines. Iron, the most widely diffused of all the Russian metals, and the most extensively and profitably worked, is found not only among the mountains, but in the lowest marshy grounds, where extensive beds of bog iron ore have been formed. The principal seat of the iron manufactures is in gov. Perm, but important workings are carried on, and great numbers of blast-furnaces have been erected, in many other quarters. Lead is more sparingly diffused, and is worked chiefly in the Ural chain and some parts of Poland, particularly the vicinity of Orenburg and Semipalatinsk. It sometimes contains such a percentage of silver as to make it worth extracting. Flashes having been worked in the Ural chain, in the most productive mines of that metal which are known to exist in the world. Salt is found in such abundance, both in brine-pits and mines, that it may be considered altogether inexhaustible. In almost every part of the vast extent of surface already described as belonging geologically to the Permian system, it may easily

be found, and in numerous localities as extensively and profitably worked. Selagoite is found chiefly in gov. Astrakhan. From the vast extent of country which has been shown to be occupied by the carboniferous system it may be reasonably concluded that many extensive coal-fields must exist. It would seem, however, that Russia, in this respect, bears a considerable resemblance to Ireland, where the large developments of the carboniferous system are chiefly confined to its lower strata, and is much more remarkable for the immense masses of mountain-limestone than its productive seams of coal. The upper portion of the system which alone contains the coal-measures for which W. Europe and more especially Great Britain is distinguished, has no decided representative in Russia. The chief fields of coal yet ascertained to exist are among the Valdai Hills where the coal is generally so thin and poor as hardly to merit the name. In gov. Moscow where seams from 8 ft. to 6 ft. thick are seen cropping out in many ravines, and might, it is supposed, be profitably extracted though the quality of the coal is acknowledged to be very inferior, and in an extensive tract between the Dniester and the Dnieper, and chiefly in that part of it watered by the Dniester. This last coal-district is said by Marchant to be by far the richest in the Russian empire, and extends over an area of not less than 11,000 sq. m. It has been very imperfectly explored, but does not seem entitled to raise very high expectations. It is worked in several localities, and more especially at Ales androvsk in a seam about 7 ft. thick, composed of a soft bituminous coal containing a great deal of sulphur, both in lumps of pyrites and in the much more injurious form of frequent thin filaments wrought, as it were, into its very texture. In some other localities, the quality of the coal seemed to improve, but except in those goes, where wood is scarce, and a very inferior fuel might create an excessive demand, it is evident that the known coal fields of Russia cannot be turned to much account. It is probable, however, that besides the known coal fields, others of greater value though from their greater depth requiring more expensive fittings, exist in other quarters, and more especially in those goes, where the Permian system is most largely developed. The magnesian limestone, which contains the chief component of the system, is sunk through in reach some of the most valuable seams in England and analogy strongly favours the conclusion that an exception in this respect is made in Russia. In Perm itself where this coal if it exists, is likely to be found in greatest abundance, it is at present little wanted. For the smelting of metals the boundless forests furnish a more valuable material and ages must elapse before these can be so much thinned as to make either the search for coal or the working of it objects of much importance. The only other mineral products deserving of notice are quarries of granite and marble, both of which, of excellent quality are found near the shores and to the N. E. of Lake Ladoga.

Manufactures and Trade.—In a country where so much land remains to be taken into cultivation and population is very much scattered manufactures cannot be expected to be carried on upon an extensive scale, except in a few leading towns. Considering the unfavourable circumstances, the progress of Russia in manufactures is much greater than could have been anticipated, and certainly much greater than it could have been, had not a succession of monarchs commencing with Peter the Great, done the utmost to promote it, both by the establishment of large model manufactures and various other modes of encouragement. The branches in which most progress has been made are leather both ordinary and morocco, the latter particularly at Astrakhan, Topyok in gov. Tver, Kazan, and Tzaritsa, in all of which the article produced is unsurpassed in any other country in Europe. cotton (twist and cotton goods at St. Petersburg, Moscow, and in gov. Vladimir, Kostroma, and Astrakhan) woollen and linen goods in many parts of Poland, gov. Kiev, Ekaterinoslav, Moscow, Kaluga, and most of the provincial towns. silks, particularly at St. Petersburg and Moscow, sericiculture, at these two capitals, and also in gov. Archangel, Khasan, and Novgorod. fine Cashmere shawls, in gov. Pensa and Ekaterinoslav. fine sergeants, at Kazan, Smolensk, and Krasnaya, cordage at Archangel, and in gov. Orel mostly, more especially iron and copper, in gov. Perm, and many other localities. furs, skins, and second and other entries in gov. Tula, plate-glass and crystal, at St. Petersburg, Tula, and Tver, tapestry at

Isma and St. Petersburg, paper at Moscow, St. Petersburg, Jaroslavl, Kaluga, and in Laponia. carriages, jewellery, and porcelain, also at St. Petersburg and Moscow. hosiery, at Smolensk, and various other places, and oil, wax, candles, soap, glue, tobacco window-glass, glass bottles, &c. in almost every important town. The rapid increase of the cotton manufacturing is shown by the quantity of raw cotton consumed, which, in 1881 amounted to 9,731,804 lbs. in 1842 to 18,477,144 lbs. and in 1848, had risen to 44,531,660 lbs. In 1849, Russia imported 21,760,380 lbs. cotton (twist from Britain) but, in 1850 the quantity had fallen off to 4,370,078 lbs. Trade also is very extensive. It is true, that considering the vast extent of country, the exports are very few, being almost confined to Archangel, in the Arctic Ocean. St. Petersburg and Eliza, in the Baltic, Odessa, and a few others of less importance, in the Black Sea. Taganrog in the Sea of Azov and Astrakhan, Baku and Kiallar, in the Caspian. The great distances at which the seas containing these ports are situated from each other and from the interior of the country must have confined the foreign trade within very narrow limits, had not a remarkable number of internal rivers been provided partly by nature and partly by art—by nature, in the magnificent streams which wind across the country in all directions and owing to the general flatness of the surface, are eminently adapted for navigation—and by art, in the great system of canals by which the different basins to which these rivers belong have been made to communicate with each other so as to give a continuous navigation from the Arctic Ocean to the Black Sea, and from the Baltic to the Caspian together with a net-work of branch canals by which all the great towns of the interior have ready access to their respective ports and to each other. The valuable communications thus provided are about to receive a vast accession from the railway system for which the configuration of the country affords unobstructed facilities. One important trunk line, connecting St. Petersburg with Moscow has already been completed and the German lines connect onward with Warsaw. Here it may suffice to mention, respecting the trade of Russia, that the principal exports are tallow, corn and flour, flax, hemp, linseed, hemp seed, timber, potash, bristles, hogs lard, pitch-tar, indigo, furs, leather, salicorns, cortices, raw copper, &c. the principal imports, colonial produce, cotton, cotton twist, and cotton and woollen goods, raw and spun silk, dyestuffs, lead, tin and quicksilver, oil, wines, &c. that the outer foreign trade is carried on chiefly with Great Britain and partially but to a far less extent, with Sweden, Holland, Italy, Austria, Turkey, Greece, Denmark and Prussia. that the inland foreign trade is carried on chiefly with Persia and China from the latter of which she imports, through the frontier mart of Kisehts, 4,700,000 lbs. tea annually also silk, nankeens, porcelain, &c. and exports in return furs, leather, woollen and linen fabrics, cattle and run deer-horns to the value of 2700,000 and that an inland trade strictly so called and carried on to a much greater extent than any other has its most important entrepot at St. Petersburg. Moscow, Morskansk, Kaluga, Tula, Koznisk, Nynod, Novgorod, Kasan, Perm, Orenburg, and Astrakhan.

The following tables furnish a means of estimating the extent of the foreign trade of Russia, and of the movement of shipping in her commercial ports. The great excess both in exports and shipping in 1947 is accounted for by the quantity of grain supplied to W. Europe in consequence of the potato-rot.

TOTAL VALUE OF THE IMPORTS AND EXPORTS OF THE RUSSIAN EMPIRE, FROM AND TO FOREIGN COUNTRIES, POLAND AND FINLAND, FROM 1846 TO 1861, AND THE TOTAL AMOUNT OF GOLD AND SILVER BOUGHT AND SOLD IMPORTED AND EXPORTED FROM THE RUSSIAN EMPIRE, IN THE YEARS 1846 AND 1860 TO 1861.

Year	Imports	Exports	Imported	Exported
	£	£	£	£
1846	12,395,965	13,816,549		
1847	11,793,464	14,483,067		
1848	13,436,360	14,655,010		
1849	16,167,811	14,864,688	1,660,568	740,798
1850	13,774,388	16,868,176		
1851	16,181,047	22,854,716	1,778,083	8,068,143
1852	14,573,392	18,969,618	8,898,373	3,062,646
1853	14,895,975	18,060,420	969,120	5,053,710
1854	26,470,766	17,831,080		
1855	15,884,562	14,666,366		

TOTAL FOREIGN AND DOMESTIC TRADE BETWEEN AND WITHIN OF THE NORTHERN AND SOUTHERN PORTS OF THE RUSSIAN EMPIRE IN 1898-1900

Years.	Domestic.		Foreign.	
	Value.	Tons.	Value.	Tons.
1893	6,827	885,008	6,753	866,146
1895	9,485	1,045,000	9,318	1,018,000
1897	9,915	1,107,781	9,741	1,080,000
1898	10,828	1,154,000	10,800	1,148,000
1899	11,700	1,200,073	11,618	1,148,000
1900	11,368	1,189,000	11,474	1,189,000
1901	10,801	1,182,000	10,797	1,177,000

The exports of Russia exceeded her imports up till about the year 1893, since which time the imports have been considerably in excess, as will be seen from the following table showing the progress of Russian commerce since the middle of last century —

Years.	Imports.	Exports.
1801	2,000,710	2,146,100
1806	1,708,518	1,191,000
1811	967,000	1,007,800
1816	1,900,000	1,100,000
1821	2,000,000	2,200,000
1826	4,979,612	6,805,000

Great Britain exports to Russia woolen and cotton fabrics, cotton twist, woollen yarn, salt, colonial produce, hardware &c. to the annual value stated in the following table —

DECLARED VALUE OF THE PRINCIPAL ARTICLES OF BRITISH AND IRISH EXPORTS TO RUSSIA IN EACH YEAR FROM 1841 TO 1898

Years.	Value.	Years.	Value.
1841	£1,101,658	1861	£1,807,170
1842	1,067,950	1862	1,803,900
1843	1,111,000	1863	1,893,519
1844	1,300,000	1864	2,120,000
1845	1,400,000	1865	2,185,000
1846	1,400,000	1866	2,185,000
1847	1,400,000	1867	2,185,000
1848	1,400,000	1868	2,185,000
1849	1,400,000	1869	2,185,000
1850	1,400,000	1870	2,185,000
1851	1,400,000	1871	2,185,000
1852	1,400,000	1872	2,185,000
1853	1,400,000	1873	2,185,000
1854	1,400,000	1874	2,185,000
1855	1,400,000	1875	2,185,000
1856	1,400,000	1876	2,185,000
1857	1,400,000	1877	2,185,000
1858	1,400,000	1878	2,185,000
1859	1,400,000	1879	2,185,000
1860	1,400,000	1880	2,185,000
1861	1,400,000	1881	2,185,000
1862	1,400,000	1882	2,185,000
1863	1,400,000	1883	2,185,000
1864	1,400,000	1884	2,185,000
1865	1,400,000	1885	2,185,000
1866	1,400,000	1886	2,185,000
1867	1,400,000	1887	2,185,000
1868	1,400,000	1888	2,185,000
1869	1,400,000	1889	2,185,000
1870	1,400,000	1890	2,185,000
1871	1,400,000	1891	2,185,000
1872	1,400,000	1892	2,185,000
1873	1,400,000	1893	2,185,000
1874	1,400,000	1894	2,185,000
1875	1,400,000	1895	2,185,000
1876	1,400,000	1896	2,185,000
1877	1,400,000	1897	2,185,000
1878	1,400,000	1898	2,185,000
1879	1,400,000	1899	2,185,000
1880	1,400,000	1900	2,185,000
1881	1,400,000	1901	2,185,000
1882	1,400,000	1902	2,185,000
1883	1,400,000	1903	2,185,000
1884	1,400,000	1904	2,185,000
1885	1,400,000	1905	2,185,000
1886	1,400,000	1906	2,185,000
1887	1,400,000	1907	2,185,000
1888	1,400,000	1908	2,185,000
1889	1,400,000	1909	2,185,000
1890	1,400,000	1910	2,185,000

Great Britain imports from Russia grain, tallow, hemp, flax, linseed, bristles, wool, linen, furs, &c. In 1840-1847 and 1848, the value was as follows —

IMPORTS TO GREAT BRITAIN FROM RUSSIA.

1840	£2,851,509
1841	2,851,509
1842	2,851,509
1843	2,851,509
1844	2,851,509
1845	2,851,509
1846	2,851,509
1847	2,851,509
1848	2,851,509

In the above imports to Great Britain in 1848, the grain figures for £1,169,551, the tallow for £1,743,518, the hemp for £207,854, and the flax for £205,812.

Roubles and Measures.—Accounts are kept in roubles and kopeks or copecks, each of the former containing 100 of the latter. The rouble is of two kinds — the paper rouble, used in accounts and equal to a French franc, or 10d sterling; and the silver rouble = 2s. 2½d. The principal coins are, in gold the imperial = 10 roubles, and the demi imperial in platinum a piece of 6, and number of 3 rouble value struck in 1827 and 1830 but now seldom seen in silver the rouble, half rouble or poltina, and the quarter rouble or poltina and in copper the ukas = 10 kopeks, the paitak = 5 kopeks, and the kopek itself. The standard measure of length is the foot of 12 inches, exactly equivalent to the British imperial foot. The stakhin, or ell, contains 28 inches. The sazhen or fathom, is = 7 ft imperial. For measuring distances the verst is used and is = 2500 ft imperial or very nearly ½ of a mile imperial. The principal land measure is the desiatina = 1600 sq arshins, or nearly 2½ acres imperial. It is subdivided into 2400 sq arshins, each = 8 sq arshins. The pound is = 0.802 lb avoirdupois the pood is = 40 lb. Russian = 36 lb. avoirdupois. The tchetvert or chetvert, the principal measure for corn is = 5.77 bushels imperial. Wine is measured by the choket = 5½ wine-gallons and the sotok = 58 gallons.

Government, Laws, Finance.—At the head of the nation is the emperor or czar who exercises the rights of Romanovs or Autocrat, indicating that he is absolutely supreme, indebted to

none for his power and accountable to none in the exercise of it. All such forms of despotism however are controlled, in some extent, by custom and public opinion; though, in every individual reign, the personal character of the sovereign must, in a great measure, determine that of the administration. Hence, under such a monarch as Paul I. the most extravagant decrees, the dictates of a mind bordering on insanity, had all the force of law, and exposed every subject, who ventured to disregard them, to the penalties of rebellion, while on the contrary under the late Alexander the whole administration assumed almost a constitutional form, and the emperor himself publicly disclaimed despotism by declaring that he was bound to rule according to law and that, in the event of his issuing any decree not in accordance with it, the Senate was entitled to remonstrate. In administering the government, the principal authority is the Imperial Council, for the most part presided over by the emperor in person, or a delegate of his sole appointment. It has no limit as to its numbers, but is divided into four departments—legislative, military civil and ecclesiastical, and financial. All matters coming under deliberation are decided by a majority of votes, either by the departments separately or by the whole being as one body. To each department a secretary of state is attached. The body next in importance to the Council is the Senate, which is also presided over by the emperor in person. It is the supreme judicial tribunal and issues decrees which have the force of law unless the emperor interposes to prevent their execution. It is divided into eight departments, each of which is an appeal court of last resort for certain provinces and governments. The decision of each department must be supported by a majority of two-thirds of the members present and, when the majority cannot be obtained, a general meeting of all the departments is called to decide. The procedure is not public and the whole proceedings are in writing, each case being decided on a statement drawn up by the secretary and certified by the party as correct. The third great body in the administration of government is the *synod*, or supreme ecclesiastical court. The executive power is intrusted to what is called the College or Committee of Ministers, who are 11 in number and distributed as usual in other governments, into different offices for home and foreign affairs, war, finance, &c. The civil affairs of each government are presided over by a civil governor, the military affairs of two or more governments grouped together by a military governor. To guide and give uniformity to decisions in legal cases, a voluminous code, called the *Svod Zakonov* or *Corpus Juris* has been drawn up, and declared to contain the law of Russia, in so far as not modified by the laws and privileges of particular provinces. It contains an abstract of all the laws and ordinances issued by the different emperors from 1649 downwards, and forms 15 large vols. The laws and ordinances in full, but reaching only to 1832, are contained in 50 vols. of the *Imperial Collection*, 8 vols. being to the first seven years of the reign of the Emperor Nicholas. The revenue—derived chiefly from a capitation tax on all male boys, whether belonging to the crown or individuals, customs, excise, alien property including woods, mines, &c. monopolies, and a tax on the declared capital of merchants—is estimated to amount to the sum of £16,000,000 sterling. The public debt, in 1853, amounted to £63,537,459.

Army and Navy.—The army consists of 776 battalions of infantry 563 squadrons of cavalry and 390 batteries of artillery of above 3000 guns, amounting in all a nominal effective force of about 800,000 men though there is reason to believe that as this estimate is made on the assumption that the complement is in every case complete, the actual force falls considerably short of this, and does not exceed 600,000. It is raised almost entirely by conscription from the classes of peasants and artisans, every male of proper age being held liable to service. The levies during peace seldom exceed the proportion of 1 in 500 males; but during war this proportion has been doubled, and even tripled. The exemptions from service are very numerous, including nobles, clergy, magistrates, students, and merchants belonging to different guilds but the privileges attached to service are so numerous that, notwithstanding the notorious severity of discipline, many voluntarily seek it as honorable, and at least prospectively, profitable employment. In the case of war, in particular, as it confers freedom, it can only be looked upon

as a valuable boon. The army is divided into regular and irregular troops. A good idea of the appearance of the finest regiments of the former is afforded by the accompanying group in which I represents a grenadier of the regiment of

RUSSIAN REGULAR TROOPS.—ARTHUR W. TOWN.

the guard of the Emperor Paul. 2 a Cossack of the guard, 3, a Cossack of the Crimea, 4, a Cossack of the line of Caucasus, 5, a Cossack of Orenburg. In the more select regiments, men and horses are classified in the most minute manner as to resemblance. In one cavalry regiment the horses are all black, in another all bay &c. The men are arranged according to the colour of their hair and beard, or of their eyes and the general shape of their features, so that in one regiment all have aquiline noses, and black eyes and beards, and in another all have cock-noses, blue eyes, and red beards. The general appearance of the irregular troops is shown by the accompanying group; in which I represents a Lezgian, 2

RUSSIAN IRREGULAR TROOPS.—ARTHUR W. TOWN.

3, a Don Cossack; 4, a Cossack in full dress; 5, a Tatar Cossack of the Crimea; 6, a Cossack of the line of Caucasus; and 7, a Cossack of Orenburg. The Cossacks in the Russian service belong to subdued tribes, inhabiting the plains at the foot of the Caucasus Mountains. The navy is much more formidable than might be expected, when the disadvantages under which Russian labourers, in regard to maritime affairs, are

considered. The Arctic Ocean is the only open sea to which she has uncontrolled access. In the Baltic, her vessels must lie half the year frozen up in dock, and cannot reach the ocean without passing the sound which Sweden and Denmark must could shut up, or a hostile fleet outside effectually blockade. In the manner the Straits of Constantinople and the Persian Gulf, in possession of an enemy, completely bar the exit into the Mediterranean. The Caspian, the only other sea is merely an inland lake, lying below the level of the general ocean, and hence necessarily excluded from all direct communication with it. In 1858 the navy in the Baltic and Black Seas was said to consist of 60 ships of the line, of 70 to 120 guns each; 87 frigates, of 40 to 60 guns; 70 corvettes, brigs, and brigantines; and 40 steam-vessels armed with 9000 guns, manned by 42 000 seamen, and carrying 200 000 marines, including artillerymen. Besides these there is a large number of gun boats, galleys &c. in the Caspian Sea and in the Sea of Okhotsk. Nothing can exceed the hardness and the cool, almost stoical, courage of the sailors; but the length of time during which they are compelled to remain idle in their frozen ports, the comparatively narrow limits and smoothness of the waters within which all their training must be conducted, and various other untoward circumstances, necessarily make them deficient in that dexterity of management which contributes so much to success in naval warfare and can only be acquired by long experience on the wide ocean.

People.—Politically considered the people are divided into the four classes of clergy, nobility, merchants and burghers, and peasants. The clergy are regular or secular. The regular clergy belong to some monastic order and are bound to some particular rule of life. They take the lead in the church and monopolize all its higher preferments. The secular are the proper parish clergy and not only may marry but must be married before they can hold a parochial cure. This nobility are so either by birth or by personal services in a civil or military capacity. To find accurate means of determining what persons are entitled to rank in the latter division all the offices of army, navy and state have been divided into 14 grades. Every one of the grades, even the lowest, which is that of ensign in the army or a college registrar in the civil service is a noble; but, so long as he rises no higher than the seventh grade, he is a noble only for life and cannot transmit his nobility to descendants but the moment he attains the eighth grade, that of major in the army, or navy captain or college assessor, his nobility becomes hereditary. In this way the class of nobility is continually receiving large accessions, and absorbing a rather moderate share of all the talent in the country. The third class consists of merchants and burghers. The merchants are arranged in three guilds according to the annual tax, which the individuals belonging to each pay to the state, as a trading license. Merchants of the first guild pay £100 and are under no limitation, either as to the kind of manufacturing and commercial enterprises in which they engage, or to the amount of capital which they may employ in them. Of the second guild pay £40 but are subject to a number of limitations, and cannot others, cannot enter into any contract for more than £2000, nor keep either a banking or an insurance office; of the third guild pay only £10, and may carry on any retail trade, or any manufacture, provided that, in the latter case they do not employ above 52 workmen. The burghers pay from £1 to £3, according to the class of town they inhabit, and the number of workmen not exceeding 18 whom they may employ. Burghers paying no license may within specified limitations engage in ordinary manufactures or retail trades. All burghers pay capitation-tax, are liable to military conscription and may suffer corporal punishment. The fourth class, consisting of peasants or serfs, is the lowest of all, and by far the most numerous. They belong in nearly equal proportions, to the crown and to individual proprietors and though their different conditions admit of considerable diversity, the great body of them are, to all intents and purposes, little better than slaves. It ought to be observed however that the humanity and enlightened liberality of the late emperor, Alexander, formed a new division, to consist of free cultivators. His successor, Nicholas, has followed steadily in his steps, and operations are now in progress, by means of which, though at some very distant date, there is reason to hope that the complete emancipation of the serfs

will be effected. Another classification of the people may be called the ethnographical, or that which arranges them according to their original stocks or races. These taken in their most general acceptation are only two—the Caucasians and the Mongolians—but under each a considerable number of varieties are traced. The Caucasian stock includes Solaromians, Germans, Finns, Tartars, Greeks, and Jews. The Mongolian stock is represented almost exclusively by the Calmucks, who occupy some of the E.E. steppes but have lost many of their distinctive features by intermarrying with Caucasian varieties. Of the Caucasian stock the Solaromians under the names of Russians, Poles, Lithuanians and Lettians, Welshians and Servians, form about nine-tenths. Of these, again, the Russians proper form the great body of the population, and are estimated at about 40,000,000. They occupy, without intermixture, the central provinces between the *Usser* and *Volga* form a vast majority in the N. between the *Ural* Mountains and the White Sea, and in the S., between the *Dnie* and the *Dniester* and are found more or less intermingled with other varieties, in all other parts of the country. The Poles are naturally found in the greatest number in their own unfortunate country. In that part of it which, in the dismemberment, fell to the share of Russia, they amount to about 7,000,000. The Lithuanians are found chiefly in Poland and in *Governments* of *Wilna* and *Minsk*. They are estimated at about 1,500,000. Still farther S. are the Lettians, or as they are often called, *Koors*, from living chiefly in *Courland*. They are also the chief occupants of *Livonia* are wholly devoted to agricultural pursuits, and may amount to 5,000,000. The *Walachians*, and among them a few *Romanians*, are found only in *Bessarabia* between the *Dniester* and *Pruth*. Their language is a curious mixture of Latin, Greek, Italian, and Turkish. They too, do not exceed 5,000,000. The *Tatars*, or *Finns*, forming a second family of the Caucasian stock, form the greater part of their features bear a considerable resemblance to the Mongolians, but have been recognized as Caucasians chiefly from their light hair and blue eyes. They are settled on both sides of the Gulf of Finland but on the N. of the Gulf form the two marked divisions of *Finns* proper and *Laplanders*, the former living S. and the latter N. of the *Gulf*. To the S. of the *Gulf*, the *Finns* occupy the far greater part of *Ethiopia*, and a small part of *Livonia* widely separated from the W. *Finns*, though the mode of separation is not known, a great number of *Finns*, or *Finland* tribes are now occupying the W. slopes of the *Ural* Mountains and the banks of the *Middle Volga*, under the names of *Syrtsians*, *Permians*, *Vogles*, *Volks*, *Tchuvashes*, *Tcheremissians*, *Mordvians* and *Teplars*. The most numerous are the *Tchuvashes* and *Tcheremissians*, who live together on both sides of the *Volga*, in the neighbourhood of *Kazan* and are estimated at about 500,000. All the others do not exceed the same number. The third great branch of Caucasians inhabiting Russia are the *Tartars* who here form four distinct tribes—the *Tartars* of *Kazan* in some respects the most civilized nation in Russia, though the great majority of them still cling to *Mohammedanism*, and numbering about 230,000. The *Baschkirs* occupying both sides of the *Ural* Mountains from lat. 50° to 54° N., still given to wandering life, and amounting to about 130,000, the *Nogais*, occupying a large part of the *Crimea* and the steppes to the N. of it dispersed over the country E. of the Sea of *Asov* and the N. base of the *Caucasus*, and amounting in all to about 600,000. The *Mitsheraks*, forming a few small tribes not exceeding 20,000 persons, live among the *Baschkirs*. The *German* or *Teutonic* race inhabiting Russia, consist chiefly of *Germans* and *Schwedes*, intermingled with a few *Letts*. The *Germans* are dispersed over the Baltic provinces S. of the Gulf of Finland, among the *Lettians* and *Estonians*, where they constitute the greater part of the nobility. They are also numerous both in *Petersburg* and *Moscow* and a considerable number of *German* colonists are settled in *gov. Saratov* and other parts of the *Middle Volga*. The *Schwedes* are numerous both along the E. shores of the Gulf of *Bothnia* and the N. shores of the Gulf of *Finland*. Their number in these localities and more partially in *Ethiopia*, are supposed to exceed 100,000. The *Greeks* dispersed over all the S. provinces as *vassalians*, and in the *Crimea*, where they are the sole occupants of several villages, are estimated at about 200,000. The *Jews* are widely found in the central and N. provinces,

but are very numerous in ancient Poland, particularly *govs. Wilna, Grodno, Volhynia* and *Podolia*, where they form the far greater part of the urban population. Their number is supposed to exceed 1,000,000.

Languages.—From the number of tribes and races just mentioned it is evident that many different languages, and a vast variety of dialects must be spoken. The Russian however both as the proper language of the country and the vernacular of at least four-fifths of the inhabitants, is the only one which is necessary here to specify. It is based on the ancient *Slavonic* but has been much modified by the introduction of Greek, *Tartar* and *Mongolian* terms. It has an alphabet of thirty-seven letters, a written and printed character of a peculiar form and a pronunciation which it is hardly possible for any but natives to master. Its flexions are both numerous and irregular making the attainment of it by a foreigner extremely difficult, but it is soft, rich and sonorous, and though long greatly neglected, and hitherto much richer in translations than in original works, has shown itself fit to be the vehicle of any kind of literature, and from the attention now paid to it, will probably be long free itself from one very marked stigma by becoming the court language instead of *French* by which the honour has been long usurped. *Polish*.—A considerable proportion of the late *Polish* tribes containing more or less, subjected to their Russian superiors, the *Jews* in all parts of the country except the centre, from which they are specially excluded have their synagogues and freely perform their religious rites. *Lutheranism* is professed by the great body of *Germans* and *Schwedes* and the *R. Catholics* form a preponderating majority in *Poland*. There, however, are the only important additions to be made from the almost universal ascendancy of the Greek church which possesses numerous important privileges as the religion of the state, and in strong is the effect of the great body of the people, who give a very ill-will if not unlighted assent to all its dogmas and not only willingly perform, but appear to take wonderful delight in performing its various minute and too often superstitious and even ridiculous ceremonies. In its general toleration of all other sects it contrasts favourably with popery though it lays itself out to the charge of intolerance towards its own members by refusing to allow them under any circumstances, to quit its communion. The Greek church strongly resembles the *Roman* in doctrine but differs essentially from it in government and discipline by rejecting the claims of the *Pope*, acknowledging the emperor as its temporal head, and submitting to be governed by a supreme synod, composed partly of lay members in permitting or rather requiring, the marriage of the secular clergy, forbidding the use of images or corporeal representations of any kind, except pictures which it uses lavishly and, more important than all in permitting the free circulation of the *Scriptures* in the vulgar tongue. In form it is an episcopacy composed of forty dioceses of which four are governed by metropolitans, are seen by archbishops, and twenty by bishops. The *Archbishops* are extremely numerous, principally the best educated and most conspicuous officials in all towns and villages, and remarkable either for the number or the enormous magnitude of their halls, the most recent rising of which appears to be the most characteristic part of the ceremonial.

Education.—Though Russia still ranks among the more imperfectly educated countries of Europe, the government has long taken a distinguished lead in the cause of education, and promulgated a complete national system, which, though not yet carried into full effect, has made, and continues to make, great and rapid progress. The basis of this system was laid by *Peter the Great* and promoted by *Catherine II.*, but is indebted for its full development to *Alexander* and *Nicholas*. It divides the whole country into university districts, in each of which a university fully equipped either has been, or is intended to be erected. Each district extends over several governments, all the public schools in which, consisting of a regular gradation of gymnasia, district and parish schools, are under the superintendence of the university. Other important schools not subject to the same superintendence, are placed under the heads of military command, and intended to give military and vigorous to the whole system, a general policy of public instruction has been appointed, and new forms one of the great departments of the state.

Manners etc.—The nobles, as a body are neither highly polished nor highly educated, though not a few of them evince a strong desire to obtain at least a reputation for both these qualities by their liberal patronage of art, literature, and sciences, in the persons of those who have acquired distinction in them. It is not uncommon to find, even among the nobles who have never been beyond the waters, individuals who speak French, English, and German with the most perfect fluency and intonation, and almost with the accuracy of natives. Their superiority in this respect, is mainly owing to the remarkable imitative power which they possess in common with the rest of their countrymen. In respect to political ideas they are somewhat in advance, and would not object to assist in curbing the absolutism of the czar. The prevalence of this feeling is strongly indicated by the interference of the government to prevent their free access to foreign countries where these ideas are supposed to be acquired. In their mode of living the nobles generally are ostentatious and luxurious, and general report speaks unfavourably of their domestic morals. The want of a proper middle class to fill up the gap between them and their serfs is strongly felt and Russian society too often exhibits only the two extremes of imperious haughtiness and harshness on the one hand and cunning, cringing servility on the other. Where the peasant has obtained his freedom a better spirit usually appears, but the state of the great body of the serfs is the lowest to be found in any country in Europe. Their time and labour are absolutely at the disposal of their master, and even their person may be sold to belong to him, since the law permits him to inflict corporal punishment, without any effectual restraint, provided it is not inflicted with such savage severity as to cause death within 24 hours. Still many of the serfs, in so far as more bodily wants are concerned, appear to be in comfortable circumstances. They are seldom titillated in two broad their staple article of food and source of clothing, with an occasional relish of animal food, are clothed with coarse linen trousers, stockings of woollen cloth, and boots or shoes made of leather though more frequently of matted horse-hair bark and over all a long coarse druggel coat, in summer or a sheepskin with the woolly side inwards, in winter and live in log-cottages which, though rudely constructed and often dirty in the extreme, are generally well heated and not unsuited to the climate. With all this however, a sense of wretchedness is often felt, and too many drown it in intoxicating drinks. A less noxious stimulant, composed by boiling a mixture of herbs, honey and other ingredients is extensively used and a far better indeed the host of all tea, is rising greatly into favour.

History—The earliest annals of Russia only furnish occasional glimpses of S-ythien and other barbarous hordes roaming over its surface, and do not begin to bear marks of authenticity till the middle of the 9th century. About that time a Helio freebooter named Kurik, probably a Dane, having been eluded in his raid the people of Novgorod pursued the course then common with his class, and made himself master of a great part of the country. He was slain in 988 by a Viking, who treacherously seized Kiev, made it his seat of government. About 994 he fixed out a fleet of 2000 cossacks, embarked 80,000 men, and sailed from the mouth of the Dniester to attack Constantinople, but was prevented by a tempest. A second expedition in 941 under Igor the son of Kurik was defeated. In 980 a new era commenced by the accession of Vladimir, known in history by the name of St Vladimir the Great. He married Anna sister of the Greek emperor Basil II and in 988 embraced Christianity. His example was quickly followed by almost all his subjects. He is the first Russian sovereign who assumed the title of Veliki Knes or Grand Duke. At his death in 1015, he left successors sons who quarrelled in dividing his dominions, and commenced a series of internal feuds, which continued with little interruption to distract the country for above two centuries. The first appearance of anarchy was produced by a great common danger. The Tartars, who under Genghis-Khan had overrun many countries and overthrown many dynasties of Asia, appeared under his son Touthan on the 8 E. frontiers of Russia, to the number of 500,000, and shortly after on the river Kalin near the Sea of Azof gained a signal victory over the combined Russian princes. The sudden death of Touthan prevented the Tartars from completing their conquest till

1238 when they returned headed by Beton, Touthan's son, wasted the country with fire and sword, and brought it entirely under their yoke. For two centuries and a half the Tartars of Kapchak, whose khans now fixed their Golden Horde or Imperial residence on the banks of the Volga, held Russia in bondage, and though allowing the native princes to rule as their vassals, subjected them to the most humiliating treatment. On the annual visit of the khans, representatives to receive tribute, the Russian rulers were required to lead their horses by the bridle, and feed with corn out of their own of state. During this disastrous period the only part of the country which remained free was Novgorod, which having at an earlier period become an independent republic, had acquired great commercial importance, joined the Hanse league, and increased in population to nearly 500,000. In 1351, when the direct line of Beton became extinct, and the Tartar throne was claimed by rival competitors, the Russians were encouraged to resist and in 1380 Demid Nais, one of the competitors, was encountered and signally defeated by Demetrius IV. The Tartar power, however still remained unshaken, and Demetrius, notwithstanding his victory was obliged to sue for peace. At length the Tartars of Kapchak met a foe who was more than a match for them, in the person of the celebrated Timur who, a two invasions of the Russian territory once in 1389 and another in 1395 gave them blows from which they never recovered. The Russians were now able to war with them on more equal terms. By the victories of Ivan or John III. he began to rule in 1462 the vassalage of the Tartars was thrown off and in 1480 the Golden Horde itself ceased to exist.

The reign of Ivan commences a new epoch in Russian history. He not only made the Tartars tributary but defeated the Tatars and Lithuanians reunited the minor principalities and captured Novgorod. His name and deeds became well known in the west and ambassadors from European powers were sent for the first time to his capital of Moscow. In domestic administration he proved himself a religious despot, but the vastness and splendour of his achievements entitled him to be regarded as the founder of the Russian empire. He died in 1533 when his son and successor Ivan IV was only four years old. During his minority great disorders took place under the regency of Boris Godunov. At length in 1547 Ivan assumed the reins, and substituted the title of Czar for that of Veliki Knes. He proved such an unnatural and remorseless tyrant, that he is known in history by the surname of Fierelle, and yet by his energetic measures both at home and abroad he raised the country to an unequalled height of prosperity. In his time Siberia was added to the empire. He died in 1584 the same year in which his eldest son had perished by a blow from his own hand, and left two other sons under the guardianship of his brother-in-law Boris Godunov, who he came virtually sovereign for the elder son Feodor, though nominally czar, was hopelessly unskilful and the other named Demetrius, was cut off shortly after his father's death, by a foul murder, in which Boris was implicated. On the death of Feodor in 1598 the male line of the freebooter Kurik, whose dynasty had furnished 56 sovereigns, and endured above seven centuries, became extinct. Boris now gained the throne, and at first courted popularity by military measures but soon degenerated into a tyrant, and by a just retribution lost his life in defending his throne against an adventurer calling himself the Demetrius whom Boris was believed to have murdered. This Demetrius scarcely reigned a year before he perished in a revolt but a second spurious Demetrius immediately appeared, and for seven years the country became the prey of anarchy. The Poles and Swedes took advantage of it, and had made themselves masters of several provinces, when the national spirit took fire, and Michael Romanoff, a descendant in the female line from the house of Kurik, was, after a severe struggle, placed on the throne. From him the ruling dynasty is directly descended. He began his reign in 1613 in very unfavourable circumstances, and was obliged to purchase peace from the Swedes and Poles by ceding all the provinces which gave him access to the Baltic, but he reigned so long and with so much prudence, that, at his death in 1645 the prosperity of the empire had decidedly revived. He was succeeded by his son, Alexis, whose minority proved troublesome but who, on assuming the reins, acted with such energy and discretion that he regained a great

part of the territories which his father had been obliged to cede and completed and greatly extended the internal improvements which he had begun. He was twice married and left sons by both wives—Fedor and Ivan by the first, and Peter by the second. Fedor reigned from 1826 to 1855, and dying without issue, was succeeded by Ivan and Peter, as joint sovereigns, under the guardianship of Sophia, Ivan's full, and of course Peter's half sister. Ivan was weak both in mind and body and Sophia endeavored by excluding Peter from all rule, to monopolize the whole powers of government. The attempt proved a failure. Sophia was killed in a conspiracy. Ivan abdicated and Peter in 1855, became sole czar. Neither his private nor his public life as free from blemishes but when the state in which he found Russia, he contrasted with that in which he left it, it must be admitted that no sovereign ever acquired by a juster title the surname of Great and Father of his country. Peter, by his last command conferred the succession on his widow originally a Lutheran peasant who succeeded the throne in 1762 under the name of Catherine I and after reigning scarcely two years, was succeeded by Peter II grandson of Peter the Great, who after three years was deposed by Anna, Peter's great half sister. Ann died in 1740 after having bequeathed the succession to her grand-son Ivan, a mere infant but in consequence of a revolt the bequest was disregarded, and Elizabeth Peter the Great's daughter was called to the throne. During her reign Russia for the first time took a direct share in European politics and sent an army westward beyond her own frontiers. She died in 1762 and was succeeded by her nephew Peter III whose reign and life were terminated six months after by a conspiracy to which his wife is believed to have been party. She by the acquiescence of the army and people mounted the throne, under the title of Catherine II, and pursued a course of policy remarkable alike for its unscrupulousness and its success. The most remarkable events of her reign are the wars with the Turks in which the Russian arms were most triumphant and the dismemberment of Poland. Catherine was succeeded in 1796 by her son, Paul whose feeble policy and extravagant freaks had ruined strongholds as to his sanity when a lead of conspirators deprived him of life in 1801. He was succeeded by his son Alexander. His personal virtues, the wisdom of his internal administration, and the glorious defeat of a most formidable and unprincipled aggression on the national independence make his reign one of the most illustrious in the annals of the empire and keep his memory in grateful remembrance. He died in 1825 without issue, and in consequence of an arrangement by which his second brother Constantine renounced the succession was succeeded by his third brother Nicholas, the reigning (1854) monarch under whom Russia has acquired a more commanding influence in European politics than she ever possessed before and under whom likewise, the territorial policy of aggrandizement of territory has been suddenly continued. The following table of the area of the empire at various epochs, will show the success of Russia in this department of her policy —

Year.	Area in sq. m.	Year.	Area in sq. m.
1682	395,906	1762	5,112,000
1769	584,102	1792	3,300,500
1800	7,097,642	1825	5,978,900
1816	4,685,776	1847	5,939,136
1840	6,232,400	1854	6,000,010
1776	4,531,040

RUSSIAN AMERICA. In 1867 this territory was sold to the U. States. According to the treaties with Great Britain and the U. States in 1824 and 1825 it comprehends all the American coast of the Pacific, and the adjacent islands N. of the parallel of 54° 40' N. and the portion of the mainland W. of the meridian of 141° W. which passes through Mount St. Elias. Area, 435,957 sq. m. The part of the mainland N. of Mount St. Elias consists of a narrow belt, which is continued along a mountain ridge parallel to the coast, and has nowhere a greater width than 10 marine leagues, or about 83 m. The interior of Russian America is very little known but it appears, from several expeditions, that throughout its W. part it is elevated and uneven, while the part lying along the Alaska Ocean is invariably flat, with the exception of a stretch lying between 141° and 150° W. The coast, which is mountainous and the islands have almost all been carefully explored. The N. coast was first discovered in the course of this century. Capt. Cook, in 1773, during his last voyage, reached Icy Cape, lat. 70° 30' N. and 161° 40' W., and it was supposed, from the large masses of ice there met with even in summer that further progress was impossible. In 1826, however Capt. Beechey proceeded E. as far as North Cape or Point Barrow lat. 71° 28' 31' N. lon. 156° 21' 35' W. while at the same time the lamented Sir John, then Capt. Franklin traced the coast W. from the mouth of the Mackenzie to Ikroavik Bay lat. 70° 22' N. lon. 148° 22' W. The intervening space between Point Barrow and Barrow Reef was first explored in 1837, by Jones and Simpson, officers of the Hudson's Bay Company. The whole of the Russian American N. coast, from Demarest Point, W. to Point Barrow, its most N. extremity stretches with tolerable regularity in a W N W direction and N. with the exception of a small part in the E. a dead flat, often nearly on a level with the sea, and never more than 10 ft. to 20 ft. above it. From Point Barrow the coast takes a uniform direction, from N. E. to S. W. rising gradually towards Cape Lachov, which is 850 ft. high. It now turns S. E. forming between the two large inlets of Kotzebue Sound and Norton Sound, the remarkable peninsula of Prince of Wales which projects into Behring's Strait, and terminates in an elevated promontory, remarkable as the most W. point of N. America. From Norton Sound it turns first N. W. then S. E. becomes indented by several large bays, including those of Bristol Bay and Cook's Inlet on the opposite sides of the long and narrow peninsula of Alaska and is lined almost throughout by several groups of large islands, of which the most important belong to the Aleutian Kodiac and King Group, the most important. The greater part of the coast last described is very bold presenting a succession of lofty volcanic peaks two of which, on the W. coast of Cook's Inlet, have the respective heights of 11,270 ft. and 12,060 ft. The climate of Russian America is not so cold as either the E. parts of the same continent, or the E. parts of the continent of Asia under the same latitudes. It is, however far too rigorous to admit of agricultural operations and the whole value of the territory is derived from the products of its fisheries, or of the chase. The latter have been placed under rigid monopoly by the Russian government, which has conferred the sole privilege of trafficking in them on the Russian American Company. This has led to remonstrances on the part both of the U. States and Great Britain. Those of the former have not led to any particular result but those of the latter have been so far successful that a lease has been granted to the Hudson's Bay Company giving them the exclusive possession of the main land of Russian America, from 50° 40' N. to Cape Spencer lat. 56° 35' N. and the exclusive privilege of supplying the Russians with agricultural produce and provisions. The population of Russian America is estimated at 61,000, of whom perhaps 6000 are Russians, Croates, Kodiacs, and Aleuts. The remainder about 50,000 in number, enjoy a greater or less degree of independence, and possess almost entirely of Equilibrium.

The part of the mainland N. of Mount St. Elias consists of a narrow belt, which is continued along a mountain ridge parallel to the coast, and has nowhere a greater width than 10 marine leagues, or about 83 m. The interior of Russian America is very little known but it appears, from several expeditions, that throughout its W. part it is elevated and uneven, while the part lying along the Alaska Ocean is invariably flat, with the exception of a stretch lying between 141° and 150° W. The coast, which is mountainous and the islands have almost all been carefully explored. The N. coast was first discovered in the course of this century. Capt. Cook, in 1773, during his last voyage, reached Icy Cape, lat. 70° 30' N. and 161° 40' W., and it was supposed, from the large masses of ice there met with even in summer that further progress was impossible. In 1826, however Capt. Beechey proceeded E. as far as North Cape or Point Barrow lat. 71° 28' 31' N. lon. 156° 21' 35' W. while at the same time the lamented Sir John, then Capt. Franklin traced the coast W. from the mouth of the Mackenzie to Ikroavik Bay lat. 70° 22' N. lon. 148° 22' W. The intervening space between Point Barrow and Barrow Reef was first explored in 1837, by Jones and Simpson, officers of the Hudson's Bay Company. The whole of the Russian American N. coast, from Demarest Point, W. to Point Barrow, its most N. extremity stretches with tolerable regularity in a W N W direction and N. with the exception of a small part in the E. a dead flat, often nearly on a level with the sea, and never more than 10 ft. to 20 ft. above it. From Point Barrow the coast takes a uniform direction, from N. E. to S. W. rising gradually towards Cape Lachov, which is 850 ft. high. It now turns S. E. forming between the two large inlets of Kotzebue Sound and Norton Sound, the remarkable peninsula of Prince of Wales which projects into Behring's Strait, and terminates in an elevated promontory, remarkable as the most W. point of N. America. From Norton Sound it turns first N. W. then S. E. becomes indented by several large bays, including those of Bristol Bay and Cook's Inlet on the opposite sides of the long and narrow peninsula of Alaska and is lined almost throughout by several groups of large islands, of which the most important belong to the Aleutian Kodiac and King Group, the most important. The greater part of the coast last described is very bold presenting a succession of lofty volcanic peaks two of which, on the W. coast of Cook's Inlet, have the respective heights of 11,270 ft. and 12,060 ft. The climate of Russian America is not so cold as either the E. parts of the same continent, or the E. parts of the continent of Asia under the same latitudes. It is, however far too rigorous to admit of agricultural operations and the whole value of the territory is derived from the products of its fisheries, or of the chase. The latter have been placed under rigid monopoly by the Russian government, which has conferred the sole privilege of trafficking in them on the Russian American Company. This has led to remonstrances on the part both of the U. States and Great Britain. Those of the former have not led to any particular result but those of the latter have been so far successful that a lease has been granted to the Hudson's Bay Company giving them the exclusive possession of the main land of Russian America, from 50° 40' N. to Cape Spencer lat. 56° 35' N. and the exclusive privilege of supplying the Russians with agricultural produce and provisions. The population of Russian America is estimated at 61,000, of whom perhaps 6000 are Russians, Croates, Kodiacs, and Aleuts. The remainder about 50,000 in number, enjoy a greater or less degree of independence, and possess almost entirely of Equilibrium.

RUSSIA (AMATEUR) the Russian territories situated in Asia, including Siberia, Kirghiz Steppe and the Transcaucasian provinces. See RUSSIA KINGDOM, TRANSCAUCASIA.

RUSSIA (TRANS-CAUCASIA). See TRANS-CAUCASIA.

RUSSIAN AMERICA. In 1867 this territory was sold to the U. States. According to the treaties with Great Britain and the U. States in 1824 and 1825 it comprehends all the American coast of the Pacific, and the adjacent islands N. of the parallel of 54° 40' N. and the portion of the mainland W. of the meridian of 141° W. which passes through Mount St. Elias. Area, 435,957 sq. m. The part of the mainland N. of Mount St. Elias consists of a narrow belt, which is continued along a mountain ridge parallel to the coast, and has nowhere a greater width than 10 marine leagues, or about 83 m. The interior of Russian America is very little known but it appears, from several expeditions, that throughout its W. part it is elevated and uneven, while the part lying along the Alaska Ocean is invariably flat, with the exception of a stretch lying between 141° and 150° W. The coast, which is mountainous and the islands have almost all been carefully explored. The N. coast was first discovered in the course of this century. Capt. Cook, in 1773, during his last voyage, reached Icy Cape, lat. 70° 30' N. and 161° 40' W., and it was supposed, from the large masses of ice there met with even in summer that further progress was impossible. In 1826, however Capt. Beechey proceeded E. as far as North Cape or Point Barrow lat. 71° 28' 31' N. lon. 156° 21' 35' W. while at the same time the lamented Sir John, then Capt. Franklin traced the coast W. from the mouth of the Mackenzie to Ikroavik Bay lat. 70° 22' N. lon. 148° 22' W. The intervening space between Point Barrow and Barrow Reef was first explored in 1837, by Jones and Simpson, officers of the Hudson's Bay Company. The whole of the Russian American N. coast, from Demarest Point, W. to Point Barrow, its most N. extremity stretches with tolerable regularity in a W N W direction and N. with the exception of a small part in the E. a dead flat, often nearly on a level with the sea, and never more than 10 ft. to 20 ft. above it. From Point Barrow the coast takes a uniform direction, from N. E. to S. W. rising gradually towards Cape Lachov, which is 850 ft. high. It now turns S. E. forming between the two large inlets of Kotzebue Sound and Norton Sound, the remarkable peninsula of Prince of Wales which projects into Behring's Strait, and terminates in an elevated promontory, remarkable as the most W. point of N. America. From Norton Sound it turns first N. W. then S. E. becomes indented by several large bays, including those of Bristol Bay and Cook's Inlet on the opposite sides of the long and narrow peninsula of Alaska and is lined almost throughout by several groups of large islands, of which the most important belong to the Aleutian Kodiac and King Group, the most important. The greater part of the coast last described is very bold presenting a succession of lofty volcanic peaks two of which, on the W. coast of Cook's Inlet, have the respective heights of 11,270 ft. and 12,060 ft. The climate of Russian America is not so cold as either the E. parts of the same continent, or the E. parts of the continent of Asia under the same latitudes. It is, however far too rigorous to admit of agricultural operations and the whole value of the territory is derived from the products of its fisheries, or of the chase. The latter have been placed under rigid monopoly by the Russian government, which has conferred the sole privilege of trafficking in them on the Russian American Company. This has led to remonstrances on the part both of the U. States and Great Britain. Those of the former have not led to any particular result but those of the latter have been so far successful that a lease has been granted to the Hudson's Bay Company giving them the exclusive possession of the main land of Russian America, from 50° 40' N. to Cape Spencer lat. 56° 35' N. and the exclusive privilege of supplying the Russians with agricultural produce and provisions. The population of Russian America is estimated at 61,000, of whom perhaps 6000 are Russians, Croates, Kodiacs, and Aleuts. The remainder about 50,000 in number, enjoy a greater or less degree of independence, and possess almost entirely of Equilibrium.

RUST, or **RUSTA**, a tn. Hungary, Thither Danube, co. and 8 m. N. E. Oedenburg, W. bank of Lake Neusiedl. It has three churches, a townhouse, and an hospital. A famous wine is produced in the vicinity. Pop. 1199.

RUSTCHUK, a fortified tn. Turkey in Europe, Bulgaria, r bank Danube at the junction of the Low opposite Gurgovo, and 945 m. N. W. Constantinople. It has woollen, silk, and cotton manufactures, some linen weaving, and a considerable trade, and is commanded by a castle. Pop. 80,000.

RUSTINGTON par Eng. Sussex 1287 ac. Pop. 843.

RUSTON, three par. Eng. —1, (East), Norfolk 2494 ac. Pop. 845—2, (Parish) York (E. Riding) 910 ac. Pop. 185—3 (See or South) Norfolk 471 ac. Pop. 118.

RUSZKA, a vil. Hungary, co. Abauyvar, 17 m. S. E. Kassa. It has a flour-mill, and a trade in wine, which is largely grown in the district. Pop. 1369.

RUSZKINOCZ, or **Ruszkocz** [Latin, *Russumus*] a privileged market tn. Hungary co. and one of the 16 towns of Zips, in a mountainous district, on an affluent of the Poprad, 7 m. N. N. W. Leutschau, with two churches.

RUTE, a tn. Spain Andalusia, prov. and 37 m. S. E. Cordova. It has paved streets, a townhouse, a prison, a richly endowed hospital for the sick a poorhouse several schools one of them normal, a granary a church, numerous hamlets, tagens, and a picturesque promenade. Near Rute are traces of an ancient town supposed to have been of the Gothic period and on the summit of the hill which commands the town is a fortress, with the inscription 'Clodius II. king of the Goths, caused this fort to be built, and spent on it 30 000 pieces of gold. Agriculture, manufactures of linen coarse cloth, and sackcloths are carried on and there are a fuller's-mill 15 flour-mills, 27 oil mills, and 18 stills for brimley. Near it are marble and Jasper quarries. Pop. 7840.

RUTHFN a tn. Prussia Westphalia gov. and 17 m. E. N. E. Arnsberg on a steep height above the Mohne. It contains three R. Catholic churches and has important tanneries, several mills, and a trade in cattle. Pop. 1392.

RUTHERGLEN, commonly called **RUSKIN** an ancient town, and a par. and municipal burgh, and par. Scotland co. Lanark, 8 m. S. E. Glasgow on the railway to Hamilton 1 bank Clyde. It consists chiefly of one spacious street extending E and W with a considerable breadth of houses on either side, and numerous lanes and alleys branching out in all directions and has a townhall parish Free, and U Presbyterian churches. The inhabitants are chiefly employed in weaving muslins for Glasgow manufacturers, and in the print, chemical and dye-works, and the coal mines in the vicinity. Rutherglen was in ancient times an important place, with a large traffic on the river but both its consequence and its trade have been absorbed by Glasgow which was included in the 12th century within its municipal boundaries. It unites with Renfrew &c. in sending a member to Parliament. Pop. burgh, 6947 par. 7854.

RUTHIN, **Rauvour**, or **Mawryst**, a par. bor., market tn. and par. W. Wales, co. Denbigh. The town beautifully situated on the Clwyd, 5½ m. S. E. Denbigh is well built, has a pleasing appearance with an ancient church, chapel for Baptists, Independents, Wesleyans Primitive Methodists, and English Independents, a fine county-hall, a townhall and prison, a free grammar-school an hospital for aged persons and a number of other valuable charities. It unites with Denbigh, &c. in returning a member to Parliament. The inhabitants are chiefly employed in agriculture. In the vicinity are the remains of a magnificent old castle, called *Rhydder*, or *Red Fort* from the red stone used in its construction now incorporated with a recently erected Gothic castellated edifice. Pop. bor. 13978. Area of par. including Llanrwst, 1989 ac. Pop. 1333.

RUTHVEN par. Scotland, Forfar; 2 m. m. Pop. 508.

RUTHEL, par. Scotland Dumfriesshire; ½ m. by 2½ m. Pop. 1110.

RÜTI, several small places, Switzerland, particularly —1 (or *Rütli*). A vil. and par. on and 13 m. S. E. St. Gall. in a mountain gorge traversed by the Rütli-bach. Pop. 1458.—2, A vil. and par. on and 17 m. S. E. Zürich, in a high but fertile district. It contains the wing of an old Franciscan abbey, southerly at the Reformation, and has a flour-mill and a dye-works. The Jews, in the neighbourhood, sent a crusade 60 ft. to 70 ft. high. Pop. 1112.

Vol. II.

RUTIGLIANO, a vil. and com. Naples, prov. and 18 m. S. E. Bari. It is walled, and contains a collegiate church four monasteries, a nunnery and an orphan hospital. Pop. 5800.

RUTLAM a tn. Hindostan Gwalior dom., cap. rajah ship, feudally subordinate to Seindia 44 m. W. by N. Oajala 1550 ft. above the sea, lat. 23° 19' N. lon. 75° 5' E. It is large, well built, and was lately the station of a British political agent.

RUTLAND a vil. and township, U. States, Vermont, on a height above Otter Creek at the junction of West River and East Creek, and on the railways between Boston and Burlington and to Whitehall and Troy, about 50 m. S. W. Montpelier. It is well situated in a fertile district and has an Episcopal and a Congregational church, a courthouse and jail several schools, a tannery and quarries of a beautiful white and clouded marble. Pop. 3715.

RUTLAND two isls. —1 An inhabited isl. Ireland, co. Donegal, immediately E. North Arran, comprising about 180 ac. of arable land —2 One of the Andaman Islands, Bay of Bengal, near and S. the Great Andaman.

RUTLAND, or **RUTLANDSHIRE**, the smallest of the English counties, surrounded by the co. Lincoln Leicester, and Northampton. Area 91 020 ac. of which 90 000 are arable, meadow and pasture. The surface is beautifully diversified by gently rising hills, with fine valleys between. It is included in the district occupied by the lower formations of the middle series the prevailing rock is a cleve-grained limestone but there are quarries of good building stone and limestone both soft and hard is found in many parts. The soil is almost everywhere loamy and rich. The W. part of the county is under grass, and the E. chiefly in tillage. Great attention has been paid here to rearing choice animals, both oxen and sheep. For the last it is celebrated, as also for its wheat and clover, much of the latter being sold as Stilton. There are nearly 3000 ac. of native woods and plantations in the county, but the extensive woodlands for which it was formerly distinguished are now greatly reduced. It returns two members to Parliament, both for the county. Pop. 22,963.

RUTUNTOOR two tns. Hindostan —1 In N. E. part of Berar dom, 85 m. S. E. Munnah lat. 22° 21' N. lon. 82° 25' E. a struggling place at the junction of numerous roads, and the cap. of a rajahship or dist. termed Choteshgar or the 'Thirty-six Fortresses' —2, A tn. dom and 40 m. S. Baroda, near the Nerbadda, lat. 21° 24' N. lon. 73° 36' E.

RUVU, two places, Naples —1 A vil. and com., prov. Basilicata 10 m. N. S. W. Melfi with a monastery. P. 9330 —2 A tn., prov. Bari, 17 m. S. E. Barietta surrounded by walls. It is the see of a bishop has a cathedral of little architectural merit, another church, three monasteries, a diocesan seminary and orphan hospital. Pop. 6418.

RUYN a vil. and com. Belgium, prov. E. Flanders, 20 m. S. S. W. Ghent, r bank Scheldt. Weaving brewing, grinding corn and oil, the manufacture of sherry, and husbandry are carried on. Pop. 2616.

RÜYSBROECK, a vil. and com. Belgium prov. and 11 m. S. W. Antwerp, L. bank Rupa with two breweries manufactures of woollen and linen fabrics and an active trade in cattle, grain horses, and manufactured goods. Pop. 1701.

RÜYSLEDE a vil. and com. Belgium, prov. W. Flanders, in a plain, 1½ m. S. E. Brugge. It has manufactures of linen, which employ more than 400 looms, and several oil and flour mills. Pop. 7089.

RUYTON (or **THE ELVEN TOWN**) par. Eng. Salop 4698 ac. Pop. 1165.

RUYAFÁ, a vil. and com. Spain, prov. and so near Valencia, that it may be considered its suburb, on a plain near the Turia. It has a church a courthouse, prison two primary schools and a trade in coarse raw silk, and fruit. Pop. about 1700.

RYACOTTA a tn. and hill-fortress, British India presid. Madras, dist. and 60 m. N. by W. Salem on the r bank Purnair near the Mysore frontier. The town, girt on all sides by jungle, and with a ruinous fort, stands at the foot of a height, up which a broad road winding round it, and flanked by a path leads to the citadel. The first defensive works are within 350 ft. of the summit, the flagstaff on which is in lat. 12° 28' N. lon. 78° 6' E. Between the first and second line

of fortifications are a platform, magazine, barracks, &c., and a nave-temple is excavated in a precipitous face of the rock.

RYAN (Lacq) a bay of the Atlantic, in the S.W. of Scotland which penetrates deeply into Wigtownshire, and communicates with Luce Bay to form the remarkable peninsula known by the name of the Rhyn of Galloway. It is about 7 m long N. to S. with an average breadth of 3 m and forms a beautiful expanse of water with good anchorage, and depth sufficient to float the largest ships.

RYALSF par Eng. West 1551 ac. Pop. 449.

RYBINSK or **RYBINSK**, a tn. Russia, gov. and 59 m W N W Jaroslavl on the Volga, at the confluence of the Rybinska. It contains three churches, a courthouse, and other public buildings and has manufactures of linen spinning mills several launettes, tallow melting establishments, and an important trade in grain. Pop. (1847), 5740.

RYBNIA, a tn. Prussia, Sillesia gov. and 44 m S. E. T. Oppeln, cap. circle, on the Rhine, amidst woods and lakes. It contains a R. Catholic church and chapel, a synagogue, hospital and houses of invalids and has manufactures of woollen cloth a trade in cattle, and two mills. Pop. 2061. — The **LYNCH** area, 250 sq. m., consists of an extensive well wooded plain watered by the Oka but dry, cold and sandy. Pop. 57 274.

RYBURGH two par. Eng. Norfolk — 1 (Great 1170 ac. Pop. 540. — Little 740 ac. Pop. 190).

RYCKYVICH a vil. and com. Belgium, prov. Antwerp, 9 m W Tournai. It has a brewery a distillery and three mills. One of the poor columns for the suppression of tobacco here has its top try here. Pop. 197.

RYDAL, a township, England co. Westmoreland 13 m N. W Ambleside celebrated for the remarkable beauty of its scenery and for having long been the residence of William Wordsworth the late po. Laureate.

RYDE, a beautiful and thriving village New S. Wales 8 m from Sydney.

RYDF a market in and watering-place England Hampshire, in the Isle of Wight on an elevated and commanding bay an extensive view of the sea. The houses are generally built on the E. slope obtained from quarries in the vicinity they form several regular well paved streets, lighted with gas and numerous detached villas with gardens before them, and remote from the town in the present a very picturesque appearance. There are altogether eight churches and chapels including one Methodist, one Independent one Primitive Methodist, one chapel of ease one proprietary chapel, a church belonging to the English Establishment and a R. Catholic chapel. Some of these places of worship are very handsome structures. The other principal edifices are the market house, parish house hall theatre yacht club house and arcade. The club-house is considered the finest building in the island. The educational mans comprise a free British and infant schools and several academies and seminaries. There are a prosperous literary and scientific institution a philosophical society several libraries and an infirmary called the Royal Isle of Wight Infirmary open to the whole island. Ryde exports grain, four sheep lambs and calves, and has bust and yacht building yards. The pier erected at an expense of £11 000, is nearly half a mile (2265 ft.) long and forms a favourite promenade. Numerous cross to Portsmouth several times a day, and there is regular steam communication with Cowes Southampton &c. Pop. 7147.

RYDJAKOV, a tn. British India. See RAJPOOT.

RYE, a municipal and port bur. market tn. and par. England co. Sussex, a member of the Cinque Ports. The town 63 m S. E. London, on the South-Eastern railway is beautifully situated on the Rother which entering with the Tillingham enters the sea 2 m. from the town and there forms Old Rye Harbour. It has several regular streets in well paved and lighted with gas; has a union workhouse, and jail, a spacious church, places of worship for Baptists,

Independents, and Wesleyans, a free grammar-school, and a custom-house. Brewing and ship building are carried on to some extent and the trade of the place is very considerable in coal, corn, timber, horse, oak-bark, fish, &c. The borough sends a member to Parliament. Rye is a place of great antiquity, and was formerly surrounded with walls, some of the gatehouses of which still remain. It furnished some vessels to assist Edward III. in his invasion of France. Pop. (1841) 4541. Area of par. 2318 ac. Pop. 4592.

RYEGATE, a tn. England. See REMATE.

RYEGHUR, two tns. Hindostan. — 1. Presid. and 74 m S. E. Bombay dist. S. Concan lat. 18° 12' N. lon. 75° 38' E. on the summit of one of the W. Ghats. It contains the burial place of the famous Marhatta chief Beraoja, who had a residence here. It was taken from the Peshwa by the British in 1818. — 2. A tn., presid. Bengal, 50 m N. W. Bhubalpoor. In the fertile territory around it, gold, and occasionally diamonds, have been discovered.

RYEKNIG, a tn. Hindostan, prov. Benar 84 m S. E. Ruttunpoor lat. 21° 15' N. lon. 85° 18' E. It is placed in a tract more fertile than most parts of the prov. Gundwana, and according to the last available accounts, it possessed a stone-fur, and several thousand dwellings but this part of India is so unimproved and remote from great roads that all information respecting it is very scanty.

RYHAIJ, par. Eng. Rutland 2070 ac. Pop. 1075.

RYHSA, or **RYHSA**, a tn. Russia gov. and 65 m W Koursk on the Sen. at the confluence of the Ryla. It contains four stone and 14 wooden churches, and a monastery and has a considerable trade particularly in vegetables and fruit. Pop. (1849) 7029.

RYME-ISTHISKA, par. Eng. Dorset, 1003 ac. P. 216.

RYMELAM a vil. and com. Belgium, prov. and 15 m S. Antwerp, on the Dyke, navigable to this point. It has two breweries a vinegar-manufactory and two flour-mills. Inhabitants chiefly occupied in weaving fishing, and husbandry. Pop. 2012.

RYPIN, a tn. Russian Poland 39 m N. N. W. Plock, r. bank Odlek, an affluent of the Drewena. It was once strongly fortified and has manufactures of woollen cloth linin and combs. Pop. about 8000.

RYSEEN, a tn. Holland. See RYSEEN.

RYSTON par. Eng. Norfolk 1190 ac. Pop. 40.

RYRWICK, a tn. Holland. See RYRWICK.

RYTCHIA one of the E. branches which the Volga throws off in the lower part of its course before reaching the Caspian. It commences about 24 m N. Astrakhan, and has a length of about 40 m.

RYTHOFF par. England, York (W. Riding) 8390 ac. Pop. 354.

RYTON three par. England. — 1. Durham 5.81 ac. Pop. 2767. — 2. Salop. 1443 ac. Pop. 404. — 3, (upon-Down) Warwick 1650 ac. Pop. 623.

RZEDITE (ONIA and LERIN) a vil. Bohemia, circle Chlumitz, 4 m W Holitz with a church. Pop. 1430.

RZEPIN or **RZEPIN** a vil. Bohemia circle Budlau, 16 m. from Brandeis, with a church and a castle. Pop. 1060.

RZESZOW or **RZESZOW** a tn. Austrian Galicia, in a deep valley watered by the R. Polok, 94 m W by N Lemberg. It is well built has a criminal court, which holds its sittings in the castle a gymnasium, high-school, and primary-Christians and Jews nearly divide the population. The former are chiefly employed in linen weaving and general trade the latter are almost all workers in a kind of apertuous material called Rzeszow gold, which they make up into various kinds of trinkets, and employ in setting false jewels. There are not much in request in the home market, but find a large sale in Russia, Wallachia, Moldavia, Servia, and Rumania. Pop. 4954.

RZICZAU, a tn. Bohemia circle Kauritz, near Blochowitz with a castle. Pop. 1070.

S

[For places not found under S, look under C and Z.]

SAADEN, a to Arabia, Yemen, about 150 m. N N W Sea. It is surrounded by walls and defended by a castle, and has iron-mines in the vicinity.

SAAGH, or **SAGH**, a vil. Hungary, Daru, co. and 10 m. S. S. W. Temesvár at the foot of a mountain of its name, near 1 bank Maros with a Greek church. Pop. 8683.

SAAL, a mar. l. to Bavaria, Lower Franconia, 14 m. N W N Kitzinghofen on the Main here crossed by a bridge. It has a church, a mineral spring, and several mills. P. 1068.

SAALBURG, a to, Germany, duchy Hesse, lordship and 29 m. S. W. Gera, on a height above 1 bank Saale, here crossed by a bridge. It has a church, castle, hospital, and old iron-mine, and two mills. Pop. 1207.

SAALE, three rivers Germany — 1. (Saaleburg Saale or Saale), rises in Saaleburg, on the frontiers of the Tyrol, flows N N E, past Saalfeld, Weischach, and Lohr enters Bavaria, passes Hofenhausen forms part of the boundary between Bavaria and Austria and after a course of about 70 m. joins 1 bank Main, 4 m. below Saalburg — 2. (Franconian Saale).

Rises on N W frontiers Bavaria, near Kumbhofen flows S. W. to Herten past Neustadt and Hammelburg and at Guntlingen joins 1 bank Main after a course, about 70 m. 1 principal affluent, the Mils and Saun. — 3. (Saxon, or Thuringian Saale), rises N side the Pfleider Gebirge, on the N. E. of Bavaria, flows N N W past Hof into the principality of Hesse; then almost due N past Saalburg, W past Ziegenrück belonging to Prussia, and across Schwarzburg-Rudolstadt, N N W past Saalfeld in Saxo-Coburg N N E into Saxo-Gotha, passes Kahle, Jena and Kainburg enters Prussian Saxony and proceeding very circuitously but in the main nearly due N passing Marienburg Halle, where it becomes navigable for barges, about 75 tons, and Bernburg, the last in the duchy of Anhalt, and joins 1 bank Elbe, 6 m. below Calbe, after a course of above 300 m. Its principal affluents are, on the right, the Wipper, Kube, White Elster, and Elbe; and on the left, the Lopenitz, Schwarzach, Ilm, Unstrut, Wippa, and Bode. It is of great commercial importance (its channel being generally wide and deep).

SAALFELD, a to Saxo-Meiningen in the midst of the Thuringian Forest, 1 bank Saale, here crossed by a bridge 21 m. S. W. Meiningen. It is an ancient town, surrounded by walls, with four gates, contains two castles, one of them a ruin, three churches, a rich progeny-museum, and infirmary and has manufactures of chimney, tobacco, glass and chemical products. On the opposite side of the river is Alt Saalfeld Pop. 4869.

SAALFELDEN, or **LICHTENBERG**, a to Austria, duchy and 27 m. S. S. W. Salzburg, in a romantic valley on the Urstein 2000 ft above sea-level. It contains an asylum for persons labouring under incurable disease, and a school. Pop. 1222.

SAANE, or **SARNE**, a river Switzerland, rises in S. W. corner, cant. Bern, in Mount Saaneuch N slope of the Berne Alps, flows first N through the valley of Grosse, then W through the E part of cant. Vaud, enters the R. of cant. Fribourg, traverses it centrally, in a N direction passing the town of Fribourg, again enters cant. Bern, passes Lau- ren, and about 5 m. below joins 1 bank Aar after a rapid course of nearly 70 m. Of its numerous affluents the chief are the Jura, Aargau, and Emme, on the right and the Glâne on the left.

SAANEN, or **GRIMMAY**, a to, and par. Switzerland cant. 23 m. S. S. W. Bern, in a valley of the same name. It contains a hamlet of the largest rural churches in the canton, built in 1444, an hospital, and an extensive trade in cheese, produced within the district, but generally known by the names of Gruyère. Pop. 9169.

SAAR, two places, Austria — 1. (or Zöber) A to Moravia, circle and 20 m. N. E. Jgla, in a mountain plateau near 1 bank Rava, here crossed by a handsome bridge. It contains the ruins of an old Cistercian abbey, and a church. Pop. 2382 — 2. (or Sar), a vil. Hungary, Hither Thess, co. Havas,

4 m. from Gyulagyrie with a church, excellent table-wine is produced in the vicinity. Pop. 1564.

SAAR-UNTER or **BOUQUEWON**, a to France, dep. Bas-Rhin, on both sides of the Saar 28 m. N W Spangberg. It consists properly of the two small towns of Bouquewon and Neu Saarwerden, connected by a bridge across the Saar. It is a beautiful-looking place, and has manufactures of woollen hosiery, and bonnets, dye-works, cloth and tile works. Pop. 3726.

SAARBRÜCK, a to Rhénish Prussia, gov. and 41 m. S. S. E. Trèves, 1 bank Saar which here becomes navigable, and is crossed by a stone bridge communicating with the suburb of St. Johann. It is tolerably well built, has several courts and public offices, a castle, long the residence of the princes of Nassau, a Protestant and a R. Catholic church, a synagogue and gymnasium, manufactures of iron, cloth, silks and tobacco and a trade in wool, iron and coal, the two last being extensively worked in the neighbourhood. It was founded in the 10th century was given to the church of Metz by the Emperor Henry III and subsequently governed by its own counts till 1830 when it came by marriage into the family of Nassau. It was a fortified town, and suffered much by war. In 1876 it was almost entirely burnt down, and its fortifications dismantled. Pop. 9031.

SAARBUCK, a to Rhénish Prussia, gov. and 12 m. S. S. W. Trèves, 1 bank Saar at the junction of the Louk. It contains a castle, a R. Catholic church and chapel, and has manufactures of silamens, silks, and leather and some shipping. Pop. 2029.

SAAPDAM, a to Holland. See ZAANDAM.

SARAI OUBI, or **SARATOVSK**, a to Rhénish Russia, gov. and 43 m. S. Trèves, 1 bank Sarai, a circular lake is excavated from an elevated plateau. It is a place of some strength surrounded by walls, & fortified by several forts and capable of being invested, contains a Protestant and two R. Catholic churches, a synagogue, hospital, arsenal, and barracks occupied by a garrison 2782 strong, and has manufactures of wire and articles in steel, a building yard and trade in iron and lead obtained from mines in the vicinity, baron Louis belonged to France and was fortified by Vauban under Louis XIV. It fell to Russia in 1816 and has since been fortified anew. Marshal Ney was born in the neighbourhood. 1. 7076.

SARAI, a vil. Rhénish Russia, gov. and 15 m. N. V. Düsseldorf, 1 bank Ruhr. It has a R. Catholic church, and an important manufactory of fire-arms. P. 1877.

SAARWELLINGEN, a vil. Rhénish Prussia, gov. and 50 m. S. S. E. Trèves, on a small affluent of the Sarre with a church, a synagogue and three mills. Pop. 1467.

SARAZ, ZARZAR, LUTZAR, or **MONTECINO**, a to Bol-e-na, cap. circle, on a lofty hill above 1 bank Eger, here crossed by a chain bridge, 40 m. W N W J. Ragne. It consists of the town proper and two suburbs. The former is surrounded by walls with three gates, each of which is surmounted by a tower. It is built with some regularity, but is in the whole a miserable place. It has seven churches of which the principal one is a large but clumsy edifice, with four towers, a townhouse which is rather handsome, a court-house and gymnasium, and manufactures of nails and rosoglio. St. John of Nepomuk the famous Bohemian saint, pursued his studies here. Pop. 4900. — The circular area, 660 paces sq. m., separated from Saxony on the N. by the Ezer-Gebirge, which, with its ramifications, covers a considerable part of the circle in that direction. Elsewhere the surface is flat, and well watered by the Eger and Goldbach. The higher lands are much wooded, and abound with game, the lower generally fertile, producing rich crops of corn here reported to be the best in the kingdom and flax. The minerals are chiefly alum, lignite, and iron. Pop. 142,344.

SARAI, one of the Dutch W. India islands, 15 m. W N W from 1 bank of St. Eustatius lat. 17 39' N; lon. 63 19' W. It rises abruptly from the sea, and is inaccessible except upon the S. side, where are a little creek and a land-

ing place the latter so intricate and narrow as to admit one person only at a time. The island is inhabited by a few Dutch families, who cultivate the cotton-plant, and manufacture stockings and shoes, &c. Pop. (1851) 1839.

SABADELL, a tn. Spain, Catalonia, prov. sail 10 m. N. Barcelona, near the Ripoll. It has a church, a suppressed convent primary and superior schools, manufactures of woollen and cotton goods, and a trade in these articles, and in agricultural produce. Pop. 3000.

SABANJAH, a small tn. and lake, Asiatic Turkey, prov. Anatolia. The town, about 12 m. S.E. inland, is a mere travelling station, full of coffee-houses and stables, with about 500 houses and two mosques. The lake (see. Sapan) lies a little N.E. the town, it is of an oval form, and upwards of 8 m. long. It has little pretensions to beauty but to the S. the woods are of noble growth, and rise to the summit of the mountains, at least 1000 ft. above the lake.

SABARA, a city, Brazil, prov. Minas-Geraes, r. bank Guacobi, or Velho, below the confluence of the Sabaratia, over which river there are here three stone bridges, 50 m. N.W. Ouro Preto. It stands in a kind of basin, completely surrounded by hills, 2300 ft. above the sea, and has a very hot though not an unhealthy climate. It is tolerably well built, the streets being paved, and the houses, though of earth, regular in form, and covered with tiles. It has a civil and criminal court, five churches, a townhouse, courthouse, hospital and a Latin and a primary school. The chief trade is in gold, worked in bars and in small provisions and spirits. Pop. about 4,000. The district is rich in gold and has also mines of silver-ore. The soil is admirably adapted for coffee and sugar which have long been its leading crops. Pop. 101,000.

SABDIO, a vil. and com. Ital. Lombardy gov. Milan prov. and 15 m. N.E. Brescia. In the Val Sabina. It consists of two parts on the opposite sides of the lake: the one on the l. bank, called *Sabbio di sopra* and the other on the r. bank, called *Sabbio di sotto*. It contains a handsome parish church, two auxiliary churches and has important iron mines, factories and several oil mills and tile-works. Pop. 1,129.

SABIDIN, a vil. and com. Ital. Lombardy gov. Milan, prov. and 15 m. S.W. Mantua. It was anciently an important place but is now greatly decayed. It is the seat of a court of justice and other public offices and has several churches, an old palace now used as a courthouse, a poorhouse, an ordinary and an orphan hospital and manufactures of rosoglio. Pop. 7016.

SABIDON, a vil. Reg. Lancaster, in a billy district, on a tributary of the Calder 4 m. N.W. Barnley. Pop. 1160.

SABIMUTTY, a river India. See KANAKUTTY.

SABINA, an anc. prov. Papal States, which was bounded N. by Umbria, W. the patrimony of St. Peter & the Campagna di Roma, and E. Naples. It now forms part of the depts. Spoleto and Rieti and the comarca of Rome.

SABINE, a river, U. States, rises in Texas lat. 32° 30' N. forms, for about 190 m. the boundary between Texas and Louisiana, and after a tortuous course, chiefly E., of about 300 m. falls into the Gulf of Mexico lat. 29° 30' N. lon. 94° W. Before entering the Gulf of Mexico, it enters and passes through a lake, to which it gives its name. At certain periods it has only 4 ft. water on the bar at its mouth, but is navigable for steam-boats for about 180 m.

SABIONCELLO, a peninsula, Dalmatia, forming the N. extremity of the circle of Ragusa. It projects into the Adriatic, and is connected with the mainland by an isthmus scarcely 1 m. wide while its whole length is about 45 m. and its maximum breadth 5 m. It is very rocky and even mountainous. The chief place upon it is Ragusa.

SABOTE, a tn. Spain, prov. and 28 m. E. Jaen, near l. bank Guadalquivir and inclosed within a strong wall, with a well-fortified fort, belonging to the Marquis of Camarone. It has a townhouse, prison, an endowed elementary school for such sex, has a private one for girls, a parish church, a substantial edifice with three naves, some frescoes, a museum and a chapel, a flour and seven oil mills, and an annual cattle-fair. Pop. 5061.

SARLATH, or SARLATRY, a market tn. Belgium, circle Prussia r. bank Plante, about 26 m. W. Brussels, with a church, school, townhouse, hospital, a tile-works, and two mills. Near it are excellent glass-works. Pop. 700.

SABLE (see. *Sablon*) a tn. France, dep. Sarthe, pleasantly situated on the Sarthe, 14 m. N.W. La Flèche. The river divides it into two unequal parts, which communicate by a bridge of black marble, and on a height immediately above the town, is a magnificent chateau, on the site of a strong castle, of which only a few ruins now remain. It has a church, manufactures of gloves, hats, and serge; several woollen mills, and a trade in corn, fruit, salt, wool, cheese, and marble; the last two being extensively quarried in the neighbourhood in which there is also a mine of anthracite. Pop. 4031.

SABLE ISLAND, a bare treeless isl. N. Atlantic Ocean, off E. coast, Nova Scotia, lat. (E. end) 43° 59' N. lon. 59° 47' W. (N. end) 44° 15' N. lon. 59° 15' W. It is about 25 m. long and 1 m. to 1.5 m. broad. It is formed of two nearly parallel ridges of sand, shaped like a bow and meeting in a point at either end. It is wholly or partially covered with grass for considerable spaces, in others scooped out by the wind into bare crater-shaped hollows or bora up into sandhills, attaining the elevation of 75 ft. above sea-level. Between these ridges a long pond, in some parts 12 ft. deep, extends from the W. end for a distance of 11 m. The island is almost entirely composed of white sand, easily moved by the winds, which cause it to drift like snow forming and removing large hills in a very few years. Although presenting hardly anything deserving the name of soil the amount and variety of its vegetation is extraordinary. Besides two kinds of grass, there are wild pines and other plants, affording subsistence to 400 or 500 wild horses and innumerable rabbits besides domestic cattle. There are sheep, swine, pigeons, hares, juncos, partridges, and crows; the latter so abundant as to have been proposed as an article of export. The coasts abound in fish of various kinds. So numerous and fatal have been the shipwrecks that have taken place from time to time on the island, and on the formidable sandbars with which it is surrounded, from the frequency and density of the fogs that prevail, and the violence and irregularity of the currents around it that an establishment for the relief and removal of shipwrecked persons, and for preventing the plunder of the wrecks has been erected here and is maintained at the joint expense of the localities of Nova Scotia and the home government. Sable Island was discovered early in the 16th century. Its name, Sable, is French, and means sand.

SABLEN or **SABLES D'OLIVE** (Lat. *Jan. Arme. Aulonca*) a seaport in France, dep. Vendée, 30 m. S.W. Bourdeaux-Vendée. It stands on a peninsula, connected with the mainland by the R. only and consists of three or four long, clean, and well-paved streets, almost parallel to each other and to the coast. The R. part of the town runs on a gentle eminence in the form of an amphitheatre, while the N. part is on a flat, scarcely raised above the level of the sea. The harbour is good, and is an important haven of refuge on a very dangerous coast for the numerous vessels trading between Nantes, Rochelle and Bordeaux. Its entrance is defended by batteries. The trade is considerable in corn, salt, wine, tar, cattle, and fresh and salt fish. The fishing on the coast, including that of shell-fish and sealines, is very active. Sables possesses a court of first resort, a communal college, and a fourth-class school of hydrography. Pop. 5596.

SABOR, a river, Spain, Leon, formed in N.W. of prov. Zamora, by the junction of several torrents from the sierras of Gamoneda and Tejera, enters the Portuguese prov. Trás-os-Montes, flows S.W., passing near the town of Zamora, and joins r. bank Douro, after a course of about 75 m.

SABRAO an isl. Indian Archipelago. See ADENARA.

SABRINA, a volcano isl. Azores, which suddenly arose about 1½ m. off N.W. coast of St. Michael, opposite Ponta da Ferraria, and was so named after St. M. S. Sabrina, which happened to be cruising in the neighbourhood. On 18th June 1811, the volcano erupted commenced by the ejection of enormous columns of water, smoke, and steam, accompanied with subterranean explosions. On the 15th the water appeared, and two days after, attained the height of 180 ft. On the 4th July when the eruption ceased, an island had been formed, 300 ft. high and ½ league in extent, with a little crater inclosing a basin of boiling water. About the middle of October of the same year the whole disappeared in an unfathomable depth.

SABUGAL, a tn Portugal, prov Beira-Roux, on the Coa, 35 m. S.E. Braga, defended by a castle with a very lofty tower. It has a Latin school, hospital, and almshouse. P 830

SABY, a tn Denmark, Zealand, bell Hylting at the mouth of a small river of same name in the Kattegat. It was once a place of some importance, but suffered much from inundation, and, in 1792 its harbor was completely sanded up by a storm. Since then it has been in a state of gradual decay. There is a regular ferry from Skiby to Læba. P 800

SABZAWAR, or **SUMZAWAR**, a tn. Puzia, prov Khorezm, in an extensive plain of some name 65 m. W. Kishapour. It is a very ancient place, and became the seat of an independent dynasty, but was afterwards ruined, and continued almost totally deserted till a comparatively recent period when its walls and fortifications were rebuilt. It is still, however, an insignificant place, with a miserable bazaar. Pop. about 3000

SACATECOLUCA a tn Central America, state and 28 m. N.E. San Salvador in the low country which borders on the Pacific, near a volcano of the same name. A considerable quantity of indigo is grown in the vicinity. Pop. 8000

SACATEPEC, **SACATEPECQUE**, or **SACATEPECQUE**, a corregimiento or prov Guatemala, Central America, bounded N. by that of Yucatan, N.W. Solola, W. and S. Guatemala, area, above 3000 m. It is generally mountainous and the climate, though sometimes inclining to cold, is, for the most part mild and agreeable. One of the most remarkable summits is the Volcan-de-Aguas, which rises up in the form of an almost perfect cone, to the height of 13 678 ft. and though not beyond the snow limit, becomes occasionally whitened with hoar-frost or snow. Immediately to the W. of it, another vast mountain the Volcan-de-Fuego, is continually emitting smoke and ash. It is probably higher than the former though it has never been accurately measured the loose and hot ashes on its sides make its ascent impossible. The soil of the province is rather barren in the N. but, in the S. is remarkably productive of maize and other grass various kinds of fruit, vegetables, sugar, cotton, and tobacco. In many situations coffee might be successfully grown. The *Cactus opuntia* has been introduced in recent times and the yield of cochineal from the plantations is already as great as that of Amaranth. The capital is Old Guatemala or Antigua. Pop. about 58 000

SACAYEM a tn and prov Portugal, prov Fátima; W. side, 6th of the Tagus, at the mouth of the Frelas, 7 m. N. Lisbon. It is an important entrepot for wine. Pop. 2400

SACATOU or **SACATU**, a city Soudan. See **SACATOU**

SACCO a tn. Naples, prov Principato-Citra 15 m. N.E. li Velle, with a church. The environs are fertile, and rich in medicinal plants. Pop. 3000

SACCONDEE, a small maritime prov Upper Guinea, Gold Coast, W. Abania with a Dutch fort, and a small village belonging to Great Britain. Besides its capital—Sacondee—it contains several villages. Bananas, yams, and maize are raised, and some trade is done in gold and palm oil. Pop. estimated at 8000 fighting-men

SACCONEX (**Gruet** and **Lette**) two vills. forming two parts Switzerland, com. and 2 m. N.W. Geneva. They contain a great number of country-seats, among others, one called Delices, in which Voltaire resided for five years. Pop. 204

SACDON a vil. Spain, New Castile, prov Guadalajara, 64 m. E. Madrid, in a picturesque valley at the foot of a mountain called Pico-de-Inda. It has a townhouse and a prison, an endowed primary school, a church, oil and flour mills, brandy-stills, cane weaving and a pottery. The baths of Sacedon, supposed by some to be the *Thermæ* of Ptolemy are much frequented by the sickly Madrileños, and in the season from June to September Ferdinand VII. created a small bathing-town near the spring, which is now called El Real Nido de Lechal. Pop. 1275

SACHSA a tn. Prussia Saxony, gov and 45 m. N.W. Erfurt at the foot of the Hartz, with a church, and manufactures of Hens and hair, gypsum-kilns, a marble-quarry and a trade in cattle. Pop. 1248

SACHSEN Germany See **SAXONY**

SACHSENBERG, a tn. Germany, princip. Waldeck, dist. Eisenberg, 11 m. S.W. Corbach, with a church, and a regular well-frequented fair. Pop. 1000

SACHSENBURG, a market in Austria, Illyria, circle Villach, dist. and near Spital, in a beautiful valley, r. bank

Drave with a church the ruins of an old castle, iron-works, and a manuf. of anatomy. From the number of columns, statues, coins, and other antiquities found in it, it is supposed to be the Roman *Thierum* or *Lidum*.

SACHSENHAUSEN, several places, Germany. The largest is situated 1 bank Main, opposite to Frankfurt, and is considered one of its suburbs. The only other deserving of notice is a vil. princip. Waldeck, 5 m. E.S.E. Corbach, with a church. Pop. 946

SACILI E a tn and par. kingd. of Italy gov and 37 m. N. N. E. Venice, on the Livenza here crossed by a bridge. It is walled, has a parish and three auxiliary churches, an hospital several handsome buildings among which the palace formerly occupied by the podestà is conspicuous and many features of woodlans, linen and paper. An excellent wine is produced, and there are mineral springs in the neighborhood. Pop. 4800

SACKAFOO a city Central Africa, lat. 13° 4' 52" N. lon. 6° 15' E. occupying a long ridge which slopes gently towards the N., and is laid out in regular well-built streets. It is surrounded by a wall 20 ft. and 30 ft. high and has 12 gates which are regularly closed at sunset. There are two large mosques, besides several other places for prayer. In the centre of the city is a spacious market-place and there is another large square in front of the sultan's residence. The dwellings of the principal people are surrounded by high walls which inclose numerous flat-roofed houses, built in the Moorish style. The inhabitants are principally Fula, possessing numerous slaves who are employed in domestic duties weaving house-building shoe-making, and iron-work and in tending cattle. The necessaries of life here are cheap. British-trade is in great plenty and very good. The exports are principally ivory and hide-skin robes, called *akras*. The common imports are Goats' skin, brought from the borders of Ashantee and coarse calico and woollen cloth, in small quantities with brass and pewter dishes and a few spices. The Arabs from Tripoli and Ghadames bring unwrought silk, ostrich of roses spices, and beads. Slaves are both exported and imported. A great quantity of gumme resin is taken every year by the Fulares in exchange for salt. The market is extremely well supplied and is held daily from sunrise to sunset. — Denham and Clapperton

SACKETS HARBOUR, a vil and port U. States New York 150 m. N.W. Albany on Black River Bay, an inlet at the N. end of Lake Ontario, of which it is one of the most secure harbours. It contains three churches, a shipyard, Madison barracks belonging to the U. States, and a number of manufacturing establishments. Cleared (1849) for foreign ports 258 vessels, tonnage 142 799 entered 279 vessels tonnage 108 167

SACKINGEN, a tn Baden, circle Upper Rhine r. bank Rhine here crossed by a bridge, 61 m. S.E. Freiburg. It is walled and has an old church a bathing establishment, and some shipping trade. Pop. 1500

SACO a tn, U. States, Maine, on the Eastern and the Boston and Maine railways and on a river of same name, which here mingles with the tide-water after a beautiful fall of 43 ft. It stands in a district distinguished both by its fertility and the beauty of its scenery contains many handsome dwellings and public edifices, including five or six churches, and is connected by bridges with Biddeford with which it properly forms only one town. The water-power furnished by the falls, has led to the erection of important industrial establishments, including a woollen wine lace cotton, and a great number of new mills. Pop. 5794

SACOMB, par Eng. Herts, 1510 ac. Pop. 815

SACRAMENTO, a tn U. States, on river of same name, at the junction of the American about 150 m. N.E. San Francisco. It occupies a low and level plain, naturally inundated during the rainy season, but partly protected by an embankment and since 1849 when it contained only four houses, has suddenly sprung up into a handsome city having become the grand depot for the supply of all the northern gold-mines. The streets cross each other at right angles, and many of them are lined with large oaks and sycamores of the original forest. It has repeatedly been almost destroyed by fire, but has since reappeared in a neater and more substantial form; and contains Episcopal, Presbyterian Baptist, R. Catholic, and three Methodist churches. One of the last for coloured persons;

several hotels of a very costly description, several breweries, steam-mills, syrup and soda manufactories, numerous smithies, etc. Pop. (1855), 10,000.—The river, 800 m. in length, varies in width from 200 yards to 800 yards, is navigable to the town of all seasons, and a considerable trade is carried on, both by sailing vessels and steamers, which ply daily between Sacramento and San Francisco. Its general course is S.; it receives the Feather, American, Butte, and numerous smaller streams, and, near its mouth is joined by the Joaquin, when the united stream falls into the Bay of San Francisco.—The VALLEY with that of San Joaquin, is a vast depression between the Sierra Nevada and the coast-range.

SACRIFICIOS—A small green island, Pacific W. coast, Mexico, about 4 m. long, and about that distance from the land lat 18° 40' N. lon. 98° 6' W.—An Isl. Gulf of Mexico, off the coast and 8 m. N. E. Vera Cruz. The channel between it and the mainland affords the best anchorage on the E. coast of the gulf. On the island itself, which appears to have been used by the ancient Mexicans for sacrifices and burial, excavations have been made and a number of remarkable antiquities obtained including a beautiful urn carved in white marble or alabaster, and great numbers of clay-vases covered with paintings and etchings.

SACULHI or **SOWULI**, a river, Brand, formed in prov. Minas-Gerães, by the junction of the Coates and Vermelho and after an E. course of about 250 m. joins L. bank Doce. It is navigable for about 200 m.

SADIA **SADIA** **SADIA**, a town, and par. Spain, Galicia prov. and 9 m. E. Coruña. W. shore, Bay of Ares with a church a harbour, which admits vessels of considerable size and a valuable sardine fishery. Pop. 2198.

SADABA a town and com. Spain, Aragón prov. Sara go. on a plain, r. bank Jilquel. It is surrounded by ancient walls, with four gates, is indifferently built and has a church a suppressed convent, two primary schools, a courthouse prison, and a trade in corn.

SADAO a river, Portugal. See SODAO.

SADDELL, or **SADILL**, a town, par. Argent. 23 m. by E. from L. de.

SADDING (a) par. Eng. 159 sq. Pop. 282.

SADULE an Isl. in America off coast of Puerto-del-Fuego lat 55° 27' 50" S. lon 64° 4' 30" W. It unites with other two islands in forming the excellent harbour of Fort Maxwell and is conjoined, particularly towards its summit, of large blocks of granite which, from their ferruginous nature, have a remarkable effect upon the compass. Its surface is partly covered with low stunted brushwood, and its coasts abound with fish.

SADDLEFORD a mountain, England, co. Cumberland immediately E. of Skelbow. It has a height of 1787 ft. and consists of a nucleus of granite, overlain by green hornblende and slate.

SADDLEWORTH with QUICK a vil and par. England, co. York, about 12 m. E. N. E. Manchester. It is one of the central localities of the cotton and woollen manufacture and is traversed both by the Huddersfield canal and the Manchester and Huddersfield railway has several chapels of ease and Independent and Wesleyan chapels, national and other schools a paper and numerous cotton and woollen mills freestone quarries, and coal-mines. Area of par. 18 240 ac. Pop. 17793.

SADU an Isl. Japan Sea lat. (R. point) 39° 20' N. lon. 134° 30' E. in a large bay, 4 com. Nippon. It is about 90 m. in circumference.

SADJAH a decayed town in Hindostan, 42 m. S. W. Madras, lat. 12° 51' N. lon. 80° 14' E. It was formerly a populous place, and celebrated for its ginseng. A few Dutch houses, and a miserable native town to the W. see all that remain of this once flourishing place.

SADSKA **HACKA** or **SADSKA**, a town, Bohemia circle and 23 m. S. W. Hohenbow on the Salswatsch. It has a parish church, a castle, an hospital, and a bathing establishment. Pop. 2219.

SADY (A) a river, Sweden which rises in Umeå lappmark, near the frontier of Norway, flows S. E., and after a course of above 100 m., falls into the Gulf of Bothnia, 12 m. E. Umeå.

SADLICES a town, Spain, New Castile prov. and 30 m. S. W. Leon. with a church, courthouse, prison, and primary

school, brick and tile works, flour-mills, and a trade in rice, oil, and wine. Pop. 1754.

SADNS (S), a town, France, dep. Maine-Inférieure, on the Arques, 24 m. N. N. E. Rouen with manufactories of linen, glass, leather, and glass. Pop. 1816.

SADTEL, or **SADUNO**, a town, Sweden, M. and 20 m. S. S. E. Falun. It is a small place, but has important manufactures in its vicinity manufacture of articles in iron, and several saw-mills.

SADFAKES, a seaport in Tunis. See SADAX.

SADFT, or **SADIN**, a town, Syria, 25 m. E. by N. Acre. This was one of the five holy cities whither the Jews resorted from all parts of Christendom in old age to die and be interred. It was utterly destroyed by an earthquake in June 1857 when nearly the whole of its inhabitants, from 6000 to 7000, also perished.

SADFAH **SADFAH**, a vil and com. Belgium, prov. E. Flanders, 7 m. N. E. Ghent with two flour-mills two breweries, and a vinegar-manufacture. Inhabitants chiefly employed in weaving and agriculture. Pop. 2974.

SADFI or **SADFEZ**, an ancient seaport in Morocco, W. coast, S. Cape Cantin on the slope of a hill, in a sandy barren district lat 32° 20' N. lon 9° 12' W. It is surrounded by a wall 91 ft. high and a ditch on three sides, which is, however, filled up in many places and on the fortifications fronting the sea there are 24 heavy guns mounted. Water is scarce and in summer has to be procured from wells. Two bays in front of the town, during the summer months, or from March to October affords as good anchorage, and smoother water than any other on the coast but is entirely exposed to W. winds the bottom is sand and mud and there is generally about 15 fathoms water a mile from the shore. The population of Sadfi is gradually decreasing some years ago it was estimated at 8000 to 9000.

SADFON **WALLER** for market in. and par. Eng. See WALDEN HATTON.

SAG HANBOU R, a seaport in U. States, New York, in an inlet of same name on the S. shore of Gardner's Bay, at the E. extremity of Long Island, about 100 m. S. New York city. It has four churches, a grist-mill, and a port which, in 1851 sent out 4474 tons of shipping to the whale-fishery. The whole tonnage of the district is 12,398 tons. Pop. about 3000.

SAGA a town in Japan Isl. Kiuishu cap. prov. Fuzen and the most important town in the island lat 33° 15' N. lon. 130° 18' E. near one of the tongues of the Gulf of Simabara. Including the suburbs, it is about 8 m. long and 3 m. broad. Its numerous streets cross each other in exact order in the direction of the four cardinal points. The principal street is spacious and well kept, although the houses which are situated by tradespeople and workmen are low and but of mean appearance. The town is traversed by many brooks, and a considerable number of channels the principal of the latter that of Sentosofuta, is nearly 50 m. long and utilizing the Gulf of Simabara with the Northern Sea, is of great importance to the inland commerce of Kiuishu, of which Saga is the centre.

SAGALAKSHU, a seaport, Asia Minor See BODRUM.

SAGALIN **OGLA** a town, China, Manchuria, r. bank Amoor or Bagalia 620 m. N. N. E. Pekin; lat. 40° N., lon. 127° E.

SAGAN or **SEGAN** a town, Prussia, Silesia, prov. and 49 m. N. W. Liegnitz, r. bank Bobber. It is enclosed by ditches and a double wall has six churches, a castle, with fine garden and park, theatre, lycæum, and houses of correction, manufactures of woollen and linen cloth, blacksmiths, distilleries, tile-works, and copper worked, oil, saw paper, and numerous other mills. Pop. 7102.

SAGGART, par. and in Irel. Dublin, 4458 sq. F. 1408.

SAGII numerous places, Hungary, particularly —1 A vil Hungary, co. Raab, 1 m. from Marlbachberg, with two churches and a trade in corn. Pop. 218.—(Kernow) A vil. Hitherto Dunbar, co. Wexford, on Mount Kemara, about 8 m. from Roskilly, with a church. Pop. 1069.

SAGH DOLY, or **SAGH AN-DOLY**, a market in Hungary Hither Dunbar, co. Honth on the Toly, here crossed by a stone bridge. It has a R. Catholic church, and a trade in salt. Pop. 1264.

SAGHALIEN, an Isl. Asia. See TARKHAT.

SAGHALIEN, a river, Asia. See AMOOR.

SAGHYAR, a vil Hungary, co Veszprém, 4 m. S. Siofok, with a trade in corn and wine. Pop. 1210

SAGINAW a bay, U States, Michigan, a large inlet of Lake Huron, 60 m. long, by 80 m. wide, containing a number of islands, of which Shawagami, near the centre is the largest. It is navigable for ships of any tonnage, and contains numerous excellent harbours.—2. A river U States, Michigan, formed by the union of several branches, flows N E. into the bay, it is 25 ft. to 30 ft. deep total course, 30 m. There is a bar at its mouth, with generally not more than 5 ft. or 6 ft. water.—3. A vil on the river 23 m. from its mouth with a U States land-office, a courthouse, and two steam saw-mills. Pop. (1860) 917

SAGLIANO, a vil and com Italy Piedmont div Turin prov. Biella beautifully situated and traversed by a very handsome and commodious street. It has a church, and a suppressed Capuchin convent. Pop. 1801

SAGOREMA a maritime vil Brazil prov. and 40 m. E. Rio Janeiro, and about 60 m. W Cape Frio

SAGOR, or **SAGUR**, an isl Hindoostan, Bay of Bengal, E side, entry of the Hooghly forming the S.W. extremity of the Sunderbunds, and extending about 20 m. in length by 5 m. in breadth. It is a low alluvial tract, very little raised above sea-level bordered along its shores with trees and thick underwood which cannot be removed without exposing it to the encroachments of the waves, but in its interior covered merely with grass-juncus. Its anchorage is said to be the healthiest on the coast. From its situation at the junction of the holiest branch of the Ganges with the ocean, it is held in high veneration by the Hindus, who visit it in vast numbers and have here a great temple, where large numbers of aged persons and children used to be annually sacrificed.

SAGRES, a seaport in prov Portugal prov Algarve, near Cape St. Vincent, 21 m. W S W Lagos. It was founded in 1416 by the Infante Don Henrique, son of John I. who established in it a school of astronomy, navigation, and commerce and sent forth from its harbour the early Portuguese expeditions which discovered the Madeira and Azores, and explored a considerable portion of the African coast, paving the way for the grand exploit of doubling the Cape of Good Hope. It was burned by Drake in 1587, and destroyed by the earthquake of 1755. Pop. 310

SAGUINAY, a river Lower Canada, formed by two outlets of Lake St. John which unite about 9 m. below the lake from which point the river flows S.E. and falls into the St. Lawrence at Tadoussac Harbour lat. 48° 5' N. lon. 68° 45' W. its entire length being about 80 m. to 100 m. It is interrupted in its course by abrupt precipices, over which it dashes its foaming current and being bounded by banks of great elevation is remarkable for the depth and impetuosity of its flood, which runs through a section of rocks from 200 ft. to 1000 ft. high, and presenting remarkably picturesque scenery. It is of great depth. In mid-channel at its mouth, bottom was not found with 330 fathoms of line about 2 m. higher up, it was found to be 180 fathoms to 140 fathoms, and from 60 m. to 60 m. from the St. Lawrence 50 fathoms to 65 fathoms. The impetuous torrent of the Saguenay when the tide is low is sensibly felt in the St. Lawrence, which for a distance of many miles, is obliged to yield to its impulse and usually, apparently going their course, have thereby been carried adrift in a different direction. Above thirty rivers pour their tributary waters into the Saguenay, twelve of which are navigable for canoes, and some of them for large boats. The Saguenay is navigable for vessels of any size for a distance of about 60 m. to 60 m. from the St. Lawrence, and at high water for vessels of large dimensions from 15 m. to 19 m. farther. Boats were said to have been taken down from Quebec during the summer months with violence to its scenery.

SAGUR, British India. See SAUGUR

SAGUIN a vil Spain, prov. and 25 m. S.E. Leon on the Coa. It is walled has some elegant and substantial houses, a townhouse, two primary schools, an hospital, a prison, a granary, four churches, four hermitages, a monastery, and two suppressed convents; four towers and three lesser mills; a tannery and fifty houses for knights, sergeants, &c. In 1803, General Moore defeated a small party of French cavalry, and established his head-quarters at this point. Pop. 9403

SAHAM TOWRY per Eng. Norfolk 4046 st. P. 1239

SAHARA, is the plural of *Sahra* which signifies in Arabic an extensive and uninhabited plain, without trees or cultivation. From the frequency of its application in Northern Africa, this term has come to be considered as the proper name of the vast desert which extends throughout the interior, S. of Morocco and Barbary from the Atlantic to the Nile. Some, indeed, affect to distinguish between the Sahara in the W. and the Libyan deserts adjacent to Egypt. But neither usage nor reason countenance such distinction. The deserts E. and W. in Northern Africa are alike vast and inhospitable, and all equally entitled to be called Sahara.

Boundaries.—The limits of this region towards the N. and S. do not admit of being fixed with precision. On the N. the desert commences at the Libyan Hills, which, in Egypt, confine the valley of the Nile on the W. higher up in Nubia, the desert, arid and dismal of rubbish and black rocks often reaches down to the river. Thence it extends without interruption westwards to the Atlantic Ocean through 40° of longitude, or 2000 m. On the S. its natural limit depends on the extension northwards of the rains, the line of which, taken as it usually may be said to lie in lat. 17° 39' N. But there are many circumstances of local configuration which affect both the extension of the rains, and their influence on the diameter of the adjacent country. In general, the Sahara as far as the S. is a broad sea of country too dry for cultivation, yet abounding in excellent pasturage for several months in the year, with sufficiency of water in wells, and occasionally trees chiefly mimosa and the Doum-palm (*Phoenix Theophrasti*). The desert of Bahiyda adjoining the Nile W. of Maro, is of this description resembling a marsh park at one season of the year (about midsummer) while at another it is little better than an arid and desolate waste. Such also seem to be the southern districts of Darfur and Waday. On the frontier of Bornu also and of Houssa, the valley of Kewra, and the country named Adrar, all of which Adrar is the capital, partake at times of the diameters of desert and of oases, or interpreted fertile land. Farther west, the desert seems to reach southwards to the banks of the Inn, or river of Timbuctoo. This town, about 8 m. from the river, is surrounded by desert. But at a distance of a few days journey to the N. E. and N. are the oases of Malirik and Aradani which, seen however to be of the poorest description. Farther W. lies Fandani whence rock-salt is obtained. Fezha, formerly celebrated for its salt-mines, situated farther N. on the coast to Tidjideh. Not far from Timbuctoo probably to the S. W. is Wadai or (in the plural) Wadaï, one of the chief oases of the western desert. W. of Wadai, halfway perhaps to Arguin on the coast, is Wadan where the Portuguese (who called it Jolof) had once a factory. S. W. of Wadai are Tuhit and Laghat, the latter but seven days from Kaarta thence the gum tree forests extend westwards along the E. bank of the Senegal but towards the sea-side sterility predominates, and the bare sandy desert spreads S. of the Senegal even beyond Cape Verde.

Of Limits.—The N. limit of the Sahara is still more irregular and less perfectly defined than the S. Wad Vay may be conveniently assumed to be the commencement on the W. and thence, a line drawn E. to Tuat or Touat crosses a tract which is more desert during eight months of the year. It was, itself an extensive oasis in the midst of wastes, over its comparative fertility to the converging drainage of numerous streams from the distant mountains in the N. From the southern base of the same range of mountains farther E. pour down hundreds of rivulets, which are collected in the longitudinal valleys or oases of Warzila or Gurgila, Taggart or Taggart, Bouf Touzer or Touzer, &c. Thence, therefore, comes the great desert as far as the Hamada of Tripoli (itself an elevated desert plain) beyond which the Sahara reaches to the Mediterranean Sea on the shores of the Great Syrtis or Gulf of Sidrah (this is the name of the *Lotus nympha*, the characteristic plant of the country). S. of this lies the extensive oases of Fezzan, and at a less distance, towards the S.E. that of Ajdjab or Ajdja. On the coast, Cyrenaica hardly interrupts the prevailing barrenness, but farther in, towards the S.E., wherever fractures in the limestone rock allow the waters to gush to the surface, the oases of Sidra of 280 Wah, 22 Bahrani, 22 Kharjeh, and others adjacent to Egypt, present vivid pictures of luxuriance and dense population in the

midst of burning sands. The deserts lying beyond the lines thus drawn, particularly N of Tawt and Wargla, are of great extent. The Hamada of Wargla is at elevated and sunny track, cold and utterly desolate, and six or eight days' journey in extent and probably they equal in area the oases scattered within them. The area of the Sahara, therefore may be estimated to be not less than 2,000,000 sq. m.

Dry Desert.—In the W. Sahara there is a central region named *Azawad* or the Dry which is peculiarly dangerous as it unites all the worst characters of the desert—want of water, intense heat, and moving sands, which obliterate every trace, and render it difficult to find the way. And here superstition too adds its terrors, for the rolling sandhills are supposed to be haunted by spirits, who, calling the travellers by name, bewilder and lead them to destruction. The *Azawad* begins, probably on the shores of the Atlantic, and seems to lie chiefly between the 19th and 23d parallels. On the road from Tawt or Tount to Timbuctoo, it has a width of ten days' journey; and further E the route from Agades to Tawt crosses a sandy desert for 12 or 14 days. This utterly inhospitable tract probably extends, therefore, from W. to E. 1000 m. or 1200 m.

Climate.—The barrenness of the Sahara is obviously the consequence of its position, the almost total privation of rain, the explanation of which would be here misapplied, but it may be remarked, that the deserts of N. Africa are but the best portion of a desert zone which lies across the Old World in Arabia, W. India, Persia, and Chinese Tartary. As the skies are generally bright and unclouded so the evaporation is rapid and hence the nocturnal cold is often extreme. Ice has been found in Persia as well as on the Nile in Egypt, and this phenomenon is more frequent in dry years. In the noontide sun, on the other hand, the sand often attains a heat of 140° F. and even the rocks appear calcined. Where moisture is condensed, the surface of the ground is often incrusted with salt. The fall of occasional rains seems to be determined in some measure, by the inequality and elevation of the ground. The Serpentine Mountains, near Agades, are often visited by sudden torrents, which diffuse joy and plenty through the surrounding valleys. The floods rapidly absorbed fill the wells to a great distance, and these are in many cases carefully covered with skins to screen them from the sun's rays.

Configuration.—As the African continent presents externally a remarkably compact figure, little indented or penetrated by arms of the sea, so it exhibits internally few proofs of physical revolutions in the form of great chains of mountains. The inaccessibility of Bergeim, which advances into the Sahara from the S. (at lat. 18° N. lon. 8° E.) form but a small group, and rarely exceed 3000 ft. in height; but within the vast area of the desert, though we often hear of abrupt and rocky regions, there is no intimation of a chain of mountains. In crossing *Jebel Aures* southwards from Constantine to Algeria, the division of the waters is found at the height of 3550 ft. where the descent is rapid to Biskra (lon. 0° E., lat. 35° N.), the absolute height of which is but 130 ft. But the river of Biskra descends a long way (200 m. perhaps) before it reaches the Sahara and the extensive and fertile plains of Tougourt which are, therefore, probably not above the level of the sea. The Hamada of Tripoli, which is a uniform mountainous plateau, 2000 ft. in height, is as abrupt and apparently as elevated as its descent into Fezzan, so on its northern edge, and this oasis, which collects apparently all the waters of the plateau, has hardly risen much above the level. In like manner it is evident that Lake Tened can have but little elevation. The desert in the W. appears to fall rapidly towards the gum-forests of the Senegal, and from the ridge there formed a wady or water-course, very rarely filled, called *Ki Naura*, runs N. to W. Ad N. The desert E. of the road from Fezzan to Bornu is reported to be very mountainous and rocky, but nothing is known of it in authentic detail.

Geology.—Granite seems to be the rock which most frequently breaks through the sandstone covering of the waste. Towards Egypt, limestone comes into view. The Tripolitan Hamada is divided from E. to W. by a volcanic line, marked by at least one well-preserved crater, Tuggurt. Connected with this system, are the numerous hot springs, which issue forth copiously in many places towards the interior particularly at Ughat (lon. 10° 30' E.), and spread basins around them.

Ferruginous sandstone is common, and many rocky spots, chiefly in the W. desert, S. of Wad Nara, have the reputation of containing iron. Copper was once obtained in abundance from the hills W. of Agades, but at present the only mineral which increases the richness of the Sahara, is salt evaporated at Tademt on the route from Timbuctoo to Wad Nara, and at Bilma in the country of the Tibboos E. of the route from Bornu to Tregni.

Zoology and Vegetation.—In the desert, properly so called, there is little of animal or of vegetable life. The large animals which characterize S. Africa, are here wholly wanting. A few species of antelopes are met with in favored spots. The lion avoids the parched country. Leopards, jackals, and various of many kinds, retain undisturbed possession of the burning sands. The least tortoise of great size, is said to be common towards the S. where bushes grow (there the *Arak*, or *Salsodora Persea*, generally prevails). Prokely salicornia, with other tough and humble plants, are comprehended under the Arab name of *haskal* or *herbage*. As the country improves, the *Acacia ferruginea* appears, then the *Talia* (*Acacia Arabica*) and other trees, till the *Dorra* and date palms mark the limits of the desert. Yet the date-palm itself usually thrives best beyond the limit of the rains. In Fezzan and other tracts where the *date-grove* constitutes the basis of the inhabitants' heavy rains often prove fatal to the trees, by dissolving and carrying to their roots the salt formed on the surface of the ground.

The People.—The inhabitants of the Sahara, according to Leo Africanus, are all of one race, though distinguishable into five branches, viz.—1. The *Zenaga* Zenaga in the extreme W. 2. The *Zenaga*, next to them on the E., from Tawt towards Guber. 3. The *Targi* occupying the middle of the desert, from Agades to Ghardameh and Wargla. 4. The *Lempia* towards the S. E. And 5. The *Berber* in the N. E. adjoining Egypt. Of these, the *Targi* alone retain their place and celebrity of name. The names of the other four have all become obscured or lost by subdivision or dispersion. It has been supposed of late years that the Tibboos in the Eastern Sahara are not of the Berber race, as, though not negroes in feature they are quite black, and speak a language totally different from that of their western neighbors. But the Berber traditions collected in Algeria, represent them as members of the *Lempia* family, and as Dr. Barth also says, that the people of Ahir N. of Agades, call the Tibboos, *Berkus*, we may consider the question of their descent, decided for the Berbers are one of the two main branches of the Berber family. The fact then seems to be that on the borders of Wady and Darfur the people of the desert have mixed much with their southern neighbors, till this mixture has affected their complexion and language. But the flexibility in respect of the latter may be ascribed in a great measure to their position as carriers and agents between the interior and the coast. Their change of language is not more remarkable than that of the people of Agades (*Targi* or *Tawrik* by descent), who now speak the Songay or Klamir language, but it is to say the language of Agades used by the great river S. of Timbuctoo, and which was probably carried eastward from Agades by commerce also, though certainly in the 14th century Agades was subject for a short time to the empire of Mali.

Tawrik.—The *Targi*, or as they are called by the Arabs, the *Tawrik*, or *Towrik*, form the most characteristic portion of the population of the desert. Their chief tribe, the *Asgar*, are said to have come originally from Arabia, but they have been settled for centuries in the Sahara between Ghât and Tawt. The *Sekhamen* and the *Imat* or *Merdish* both tribes of the same family the latter very ancient but happy, extend further S. and W. and perhaps occupy still the same territory as in the 11th century, when the *Merdish* (*Imat*) adjoined Ghazal on the E. The *Targi* are a handsome, well featured, dark complexioned race, strict or even fastidious Mohammedans, and in mode of life resembling the Arabs. But they are singular in desiring it improper to let the mouth be seen. Hence, while they fold their ample toga of white cotton over the head so as to form a hood, they tie a smaller also round the lower part of the face, which conceals all except the eyes. To the use of this muffle, called *bilma*, they owe their Arab designation of *Muhammadiyah*, or the veiled people. The *Berbers* Berbers, who now hover over

Timbuctoo on the E., are generally reckoned as Tawarik but the name Anadimides (Adimides), given to them by the other tribes of the desert, seems to signify that they belong to the Lempa. Further W. the Berber tribes, such as the Tamas, Brakmas, and others, near the gum-forests, belong to the Saraga family, or are fragments of the great Mauritanian or Gethian tribes, the Magarawa, Lamptuna, &c. who sought refuge in the desert in former ages from the consequences of the Islamic wars in which they were perpetually engaged. But it must be observed that the Arab tribes throughout the Sahara, are nearly as numerous as those of Libyan origin nor can the two races be always readily distinguished, for in general the Berber dialects are confined to the towns and oases and the nomadic or desert tribes speak Arabic. The Targui have an ancient written alphabet which they call Tulek (Phoenician?) and boast of a few inscriptions. But these monuments of a civilisation now wholly extinct lie chiefly within the limits of the ancient Carthaginian and Roman provinces, and belong to the Tamasan territory rather than to the Sahara.

Character.—The tribes of the desert are collectively camel breeders, slave and dealers, guides and robbers. A few on the borders of the Sahara possess valleys producing dates, but in general they subsist chiefly on the milk of their herds, obtaining grain or fruits by barter from the Sahel or maritime district in the N. or from Negroland in the S. The towns, such as Timbuctoo, Agades, Twa, Ghat, &c. formed on the margin of the desert by the course of trade are generally remarkable for cleanliness as well as capacity. They resemble resorts frequented by pirates. Thence, man stealing is the most natural industry, slaves the chief wealth. None are so devoted by thought or fervour, as to take account of human misery. Perhaps the Sahra is fully as remarkable from the moral as from the physical point of view and may be regarded as the solid buttress on which rests the barbarism of Africa. In the middle ages, with the intervention of the Arabs, a great trade was carried on across the desert, chiefly in gold-dust and Guinea pepper besides slaves, ivory &c. But it is inconceivable that such a commerce should ever revive. As the waters of Guinea become more perfectly explored, its commerce will necessarily be diverted more completely from the desert.

There is no reason to believe that the routes across the desert to Negroland were based on any settled intention to the arrival of the Arabs in the W. In the later Roman histories, there is not the least hint of a gold or pepper trade, or of any established commerce between Mauritania and the S. The names which Strabo's map of Libya, S. of the river Niger (an hypothetical river representing collectively the Wadis from Twa to the Bileda i Jandi) are obviously all of Berber form, and probably belonged in reality only to the N portion of the desert.—(*Proceedings of the African Association*, *Travels of Hornemann* Lyen, Denham, &c. *Keyley French of the Breg Commerce* *Caillie's Travels to Timbuctoo*, *Cooley's Negroland and the Arabs*, *Carotte, Le Sahara Algérien* *Barth and Overweg's Journey*, in *Jour. Roy. Geo. Soc.* 1857.)

SAHARUPOOR, or GHANARUPOOR, a dist. and in Hindostan, formerly included in the upper provs of the presid. Bengal (or Agra) now in the new presid. Lahore lat. 29° 50' to 30° 30' N., lon. 77° to 78° 30' E. bounded N and W by the protected Sikh territory E. and S. the dists. Moradabad and Meerut. Area, 2165 sq. in. Its surface is level to the very base of the hills, which here rise abruptly on the N. from the Tanjuna. The Tanjuna forms the boundary on the W. and the Ganges traverses its E. part, bordering which river is an extensive tract lower than the rest, and covered with tall grass. The plain of Saharupoor about 1000 ft. above the sea, has for half of the year a tropical cal, and during the rest an European climate and vegetation. The thermometer at the capital sometimes descends below the freezing point, but snow never falls there.—(*Madras Jour.*, *Jacquemont*). Four-fifths of the soil are cultivated or capable of culture. Considerable quantities of sugar and wheat, with cotton, indigo, and tobacco are raised, and this was formerly one of the most flourishing parts of the Mogul empire. But for a century previous to 1803, when it became a British possession, it had suffered almost incessantly from invasions and depredations of the neighbouring Sikhs. Tabeta-Khan's

canal, which extends from the base of the hills to Delhi, intersects the W. half of this district. Principal towns—Saharupoor, thecap. Haridwar Ambeta, and Deoband. P. 557,355

—The rivers in lat. 29° 57' N.; lon. 77° 32' E. 30 m from E. Delhi, is according to Jacquemont, one of the best summer stations in British India. It is unsheltered by walls, but has a large quadrangular fort, with a double ditch, and ramparts faced with brick masonry. The town contains many brick residences, and is increasing by the addition of houses in the European style. Its environs are level and watered by an affluent of the Tanjuna and in the vicinity is a botanic garden intended for plants which will not thrive at that of Calcutta. Pop 8000 to 10,000.—(*Jacquemont*, *Voyage dans l'Inde*, vol. iii. p. 1, 33) *Sylvan in Jour. Stat. Soc.* vol. x p. 250, *Trigon. Survey of India*.)

SAI-GUN or SAIGON a city and river-port. Anam, cap. prov. Champa of which and of Cambodia it is the chief trading emporium, on the river Sai-gun, 85 m. from its mouth in the China Sea, lat. 10° 47' N., lon. 105° 45' E. It consists of two distinct towns about 2 m. apart, connected by a navigable stream and a good road lined with straggling Malay houses. Sai-gun proper the commercial town, stands on a point formed by the confluence of two branches of the Benue river. Eng-hi is on the W. bank of the Sai-gun river opposite the anchorage for large ships, and contains the citadel and residences of the Chinese merchants. Both towns extend 4 m. to 5 m. along the river. The streets are regular wide, and mostly lined with wooden or bamboo houses of one story thatched with palm leaves or rice-straw, some few are of brick, tiled, and with overhanging chambers accessed by ladders on the outside and many are built within courts or gardens. The citadel, begun on an European model by a French engineer in 1790, remains incomplete. It is a square fortress, with square bastions horn works, a glacis, sally yards, and dry ditch. But it is at present incapable of regular defence. In the N.E. part of Sai-gun proper on a deep creek are the naval yard and arsenal, the largest in the empire, and where many large junks and war boats are annually constructed. In the W. part of the city are two large Chinese pagodas, besides which Sai-gun has a royal palace built of brick and several extensive rice-magazines. It communicates with the Cambaja river by a canal about 35 m. long 70 ft. wide, and 12 ft. deep, and has an active trade with China, Siam, and Singapore, based on principally in junks navigated by Chinese. The principal articles exported for sale are Chinese pottery and iron goods, silk, paper, tea &c. with glass-bottles and broad-cloth, but scarcely any other European articles. Owing to the extortion practised by the Chinese and native traders and the faithlessness and rapacity of the government, both the Japanese and Portuguese of Macao have relinquished all connection with Sai-gun. Rice is a royal monopoly, and its exportation is prohibited under capital penalty. The markets are well supplied with poultry, beef, oxen &c. together with dog's flesh and alligators for native consumption. Rice, areca palms, and many intertropical fruit-plants grow in abundance around Sai-gun, being chiefly cultivated by women, and the variety as well as excellence of the fish in the river can hardly be surpassed. Pop., perhaps 120,000, of whom 10,000 are Chinese.—(*Crawford's Siam and Cochinchina*, vol. 1. p. 319-448. *Tomlinson's Annals*. *White's Voyages to Cochinchina*, *Jour. Ind. Archipel.* vol. iii.)

SAIBERK or SAIBAKIR, a mountain chain on the frontier of Siberia and the Chinese empire. It branches off near at right angles from the Altai or Taigoun Mountains, stretches first N. and then E.N.E. till it becomes linked with the ranges which proceed without interruption to Lake Baikal having a total length of above 800 m. All the rivers which descend from its N. slope belong to the basin of the Yenisei.

SAIDA or SAYNA a town in Saxony, circle and 25 m. from Dresden, in a bleak district, between the Freiburg Mide and the Elbe. It has a hospital, a chapel and manufactures of shoes and lace a brewery, some trade, and copper-mines. Pop. 1165.

SAIHUB a town and strong fortress Hindostan prov. Agra, 68 m. from Jeypore. The town contains some good houses surrounded by a strong mud-wall and wet ditch, and covered on one side by a pool or shallow lake. The fort is of masonry

and presents a lofty and striking group of castellated buildings, covering the entire ridge of an isolated white rock rising from the midst of an extensive plain.

SAILAUF (MIRVET, OMA, AND UTER), three contiguous hills, *Lower Fennoscandia*, near *Aschensberg* with a church, and several mills. Pop. 1000.

SALMA, a lake, Russia, in S. of Finland. It is very irregular in shape, and contains a great number of islands; greatest length, N to S, about 45 m. greatest breadth about 23 m. It discharges itself by the *Woson* into *Lake Ladoga*.

SALINGHIN-AN WERRAN, a vill. France, dep. Nord, 11 m. S.W. Lille. Pop. 1646.

SALINS, a vill. France, dep. Aisne, 24 m. N. Laon. Pop. 1293.

SALT AWAH a m. and com. Belgium, prov. and 15 m. S.W. Antwerp, on the Scheldt, with a church, and two chapels. commercial house, a mineral spring, a boarding and a communal school and considerable manufactures of linen, coarse woollens, and cotton stuffs also, breweries, tanneries, a salt refinery, soap work, rope walk, and bleachfield. Pop. 3066.

SALT ABERNETHY a m. France, dep. Gard 11 m. V. L. Alais, & bank *Corse*, in the midst of the mountains of the *Cevennes*; with a Calvinistic church, manufactures of silk-hosiery, a blast furnace, a manufactory silk mills and a trade in silk, silver, chestnuts, and wine. Pop. 3210.

SALT ABERNETHY, a vill. and com. Belgium, prov. W. Flanders, 2 m. S. Brugge with two breweries, a distillery two flour-mills and a trade in corn and flax. Pop. 1719.

SALT ANDREWS, a m. Lower Canada, on the *Riviere du Nord*, on Two Mountains, 3 m. from the *Ontario* at *Granville*, and 45 m. W. Montreal. It has a S. Catholic and three Protestant churches, and several schools. A large quantity of sawed lumber is produced in this part of the country, and there are several extensive sawing and great mills, a cloth factory carding and fulling mills, &c. P. 1250.

SALT ABERNETHY a vill. France dep. Nord 10 m. from Cambrai. Pop. 745.

SALT ABERNETHY a m. France, dep. Moselle, 10 m. W. Sarrebourg, on the *Raillie*. It is an ancient but well-built place, with some interesting remains: manufactures of stockings, and French blue, silk-works, dye-works, and tea works. In the vicinity are an old Roman fort, and the ruins of a temple of *Apollo*. Pop. 2990.

SALT BERRY LE CHATEAU a m. France, dep. Loire 11 m. S. Montbrun on a height, in a wild and romantic district, and on a fine old Roman road. It is an ancient place, which was once fortified, and has a large and handsome Gothic church with two steeples; manufactures of lace and locks and a trade in pitch and timber for building barges. Pop. 2035.

SALT BRADDOCK, a group of 12 small is. on the *Braden Bank*, Indian Ocean N. of the *Mauritius* lat. 16° 28' S. lon 59° 55' E. They form five groups, 3 m. to 6 m. distant from each other and extend over an area 27 m. by 12 m. These islands have no permanent population, being sometimes wholly submerged in great storms.

SALT CALAIS a m. France, dep. Sarthe, on the *Amblie*, in a hollow, surrounded by moors and forests, 25 m. E.S.E. Le Mans. It is tolerably well built, has a court of first resort, two fine promenades, a large square, a handsome Gothic church of some historical interest, a communal college; manufactures of linen, serge, and bombazine, and a trade in corn, cloverseed, wine, wool, poultry, and cattle. P. 5021.

SALT CATHARINE, a flourishing m. Canada West, on *Lincoln*, finely situated in a fertile district, 31 m. S. Toronto, on the *Welland canal*. It has a R. Catholic and six Protestant churches, a grammar and several other schools, a public library and reading-room, and a mechanics' institute, large manufactures of cloth, iron ware, leather, and pottery, several distilleries and breweries, and some of the finest flour grist, and saw mills in Canada, supplied with unlimited water power by the canal. Ship-building is likewise carried on to some extent. P. (1852), 4968. (Jan. 1854) about 5400.

SALT CROUX, a vill. France, dep. Vaucluse, about 10 m. from Orange with silk-mills, and a trade in silk. Pop. 1611.

SALT DESER, a vill. and com. Belgium, prov. Hainaut, 4 m. N.E. Mons. It has an extensive cotton-mill, established

in an ancient abbey of same name; manufactures of calico; a flour-mill, and a trade in corn. William, Prince of Orange, afterwards king of England, treacherously attacked *Marshall Luxembourg* in the plains of St. Denis, after the peace of Nijmegen was signed, but gained no decisive advantage. P. 744.

SALT DESER WERRAN, a vill. and com. Belgium, prov. F. Flanders, & bank *Lys*, 3 m. S.W. Ghent, with a flour-mill and a trade in corn. Pop. 1464.

SALT DESER, a m. Lower Canada, on the *Chene*, at its junction with the *Ottawa*, 21 m. W. Montreal, with two churches and a school. On Dec. 14 1867, the royal troops have defeated the rebels. Pop. 1000.

SALT DESER, a vill. and com. Belgium, prov. W. Flanders, on an affluent of the *Lys*, 28 m. S. Brugge. It has manufactures of linen, yarn, cloths, ropes, tobacco, and leather, a bleachfield, brick work, and several mills. Pop. 5919.

SALT DESER, two places, Belgium.—1. A vill. and com., prov. and W.S.W. Liege, on the *Yonne*, with many factories of alum, four breweries, and three flour-mills. Coal is worked in the vicinity. Pop. 8631.—2. A vill. and com. W. Flanders, 7 m. E.B.E. Brugge. It has a brewery, a distillery, an oil and a flour mill, and a trade in wood and cattle. Pop. 1436.

SALT DESER, a vill. and com. Belgium, prov. and 9 m. S.W. Namur on the *Bernart*, with manufactures of linen, cordage and yarn, building-stone and marble-quarries; marble saw-works, a flour-mill, and a trade in corn, wool, and cattle. Pop. 1443.

SALT DESER, a m. Belgium. See *SHIMLAIN* (St).

SALT DESER, a vill. and com. Belgium, prov. Brabant on the *Senne*, 1 m. S.W. Brussels. It contains a house of refuge for poor widows; and has a brewery, a distillery several flour mills and a trade in agricultural produce. Pop. 2701.

SALT DESER, a vill. and com. Belgium, prov. E. Flanders, 24 m. N. Ghent with manufactures of linen, several breweries, tanneries and flour-mills and a trade in cattle. Pop. 3984.

SALT DESER, a m. sp. of *Saint-Hyacinthe*, Canada East, situated on the *Yamaska*, 80 m. by railway from Montreal. It is improving rapidly more especially since the opening of it a railroad, which places it in connection with both Portland and Montreal and, through these cities with nearly every place of importance in Canada and the U. States. *Saint-Hyacinthe* is the residence of a R. Catholic bishop, and possesses a R. Catholic college, with 16 professors a large and handsome stone edifice, there are also a stone parish church, university and hospital of the Sisters of Charity; a fine court house and jail, and railway station. Pop. (1853), 3315. (Jan. 1854) about 4000.

SALT DESER, the sp. of *Antigon* (which see).

SALT DESER, a m. and port of entry, Lower Canada 21 m. S.E. Montreal with which it is connected by railroad, on the *Richelieu*, 16 m. from *Lake Champlain*, and at the head of the steam-boat navigation in connection with that lake. It has an Episcopal, a Wesleyan, and a R. Catholic church; a convent, several schools, and commodious barracks, to which, however there are no troops quartered. Its trade, chiefly in sawed lumber, is considerable. Pop. (1853), 3315. (Jan. 1854) about 4000.

SALT DESER, a village in Canada West, on the N. branch of the river *Thames*, about 100 m. W.S.W. Toronto. It is well laid out in the centre of a very fine farming country, where large quantities of potatoes are annually produced, and has three Protestant churches, several schools; manufactures of cloth and leather and several flour and saw mills. Pop. about 1000.

SALT DESER, a m. Lower Canada, on the *River au Chene*, 18 m. from Montreal with a Protestant and a R. Catholic church, several schools, and a R. Catholic college, several large sawing and saw mills, an extensive distillery, and steam-mill. Pop. about 1500.

SALT DESER, a village in Canada West, 184 m. W.S.W. Toronto, handsomely laid out, and well built. It has six Protestant churches, a R. Catholic church, several schools; manufactures of cloth, iron, and leather; several large mill-laying establishments, distilleries, &c. Pop. (1853), 1374. (Jan. 1854) about 1500.

SALT DESER, par. Eng. Gloucester; 1896 no. P. 134.

SAINT-CECIL, a vil. and com. Belgium, prov. Luxembourg, on the Moselle 36 m. W. Arlon. It has manufactures of serge, and three saw-mills. Pop. 1884

SAINT-CECIL, a vil. and com. Belgium, prov. W. Flanders, 5 m. S. Bruges, with two flour-mills and a trade in corn and cattle. Pop. 1884

SAINT-FOY a vil. and com. France, dep. Savoy, prov. Tarentaise, 9 m. E.S.E. St. Maurice, in a valley of same name, on a small stream near its confluence with the Isère. It has a considerable trade in cattle and dairy produce, and there are valuable minerals in the vicinity. Pop. 1868

SAINT-GERMAIN a vil. France. See ALBY

SAINTES, or **SAINT-REMI**, a vil. and com., prov. Breant, 15 m. S.W. Brignoles. It has a brewery, a flour-mill, and a trade in cattle and agricultural produce. P. 1993

SAINTES (anc. *Santonae*), a tn. France, dep. Charente-Inférieure, on a slope above the Charente, here crossed by a bridge, on which a remarkable Roman triumphal arch stands 86 m. N.W. Le Rochelle. It is a place of great antiquity, and rose to much importance under the Romans, of whose magnificent edifices, an amphitheatre, baths, and the arch already mentioned, are most interesting remains. The modern edifices deserving of notice are the cathedral originally founded by Charlemagne, but since rebuilt; the church of St. Eutrope, with an elegant bellry of the 16th century; the church of St. Marie des Dames, classed among the historical monuments of France, the library of 25 000 vols. the courthouse, and theatre. It has a court of sessions for the department, a court of first resort and commerce, an agricultural society, a society of sciences and art, and a communal college; manufactures of lumbrine, earthenware, canvas, and leather, and a trade in corn, wine, Cognac brandy, timber and wool. It was the capital of the ancient province *Santonae*. Pop. 1769

SAINTES (THE) a group of rocky islands, French W. Indies, between Guadeloupe and Dominica, about lat. 16° 51' N. lon. 61° 44' W. They consist of lofty and steep peaks some of which are united by flat ground and ridges of inferior elevation, others are entirely separated by the sea. The two largest are called *Terre du Haut*, and *Terre du Bas*, or the *Upper* and *Lower Land*; the first is about 4 m. in circuit, and contains a town or village, which is situated on its W. side. The inhabitants are poor and live chiefly on fish and vegetables. Exports, cotton and coffee. P. (1849) 1811

SAINTFIELD, a small tn. and par. Ireland, co. Down. The town, 11 m. N.W. Downpatrick has a large and elegant church and carries on a considerable trade in weaving linen cloths, corduroys, &c. Area of par. 19,334 ac. Pop. 5591

SAINTONGE, an anc. prov. France now forming the greater part of depts. Charente and Charente-Inférieure. It was originally inhabited by the *Santonae*, and under the Romans was included in *Aquitanie Secunda*. On the decline of the Roman empire, it was seized by the Franks, and in 1120 fell into the possession of the English, with whom it continued till it was finally united to France by Charles VII. Its capital was *Saintes*

SALA, a ruined city Egypt, near r. bank Rosetta branch of the Nile, 67 m. N.W. Cairo. It was a place of great importance during the reigns of the Saite kings, who ruled Egypt about 180 years, until the Persian invasion under Cambyses. Sala was the place where the fate of burning lamps was particularly celebrated, and to which strangers resorted from different parts of Egypt to assist in the ceremony.

SALADWALA, a considerable walled tn. Punjab, near r. bank Ravee, lat. 31° 5' N. lon. 73° 16' E. with a spacious and well-furnished bazaar, close to it on the W. is a small fortress of considerable strength, surrounded by a trench.

SALZON, a river France rises in the S. slope of the Pyrenees, dep. Basses-Pyrenees, flows N.W. past Mauleon, below which it sometimes takes the name of *Gave-de-Mauleon*, and after a course of about 46 m. joins r. bank Gave-de-Oleron.

SAJO, a river, Hungary rises in Mount Trench, near the source of the Gran, in S. of co. Girona, flows very circuitously S. past Reus and Palencia, then S.E. and joins r. bank Ebro at a place below Oso, total course, about 90 m. chief affluents, the Jolera, Turron, Rine, and Bodva.

SAJTERY a vil. Hungary Thibet Thaim, co. Canad, on the Seneca, 10 m. from Battonia. It has a Greek church, several mills, and a trade in cattle. Pop. 4562.

SAK, a salt-lake, Russia, near W. shore, Ormuz, gov. Taurida, 12 m. E.S.E. Bagastora. It is about 8 m. long, by rather more than 1 m. broad, and is celebrated for the mud baths which have been established upon it.

SAKARIA, **SAKARYAS**, or **SALA** (anc. *Asperus*, or *Sangerius*) a river Asiatic Turkey pass Andolia; has its rise near Akim-Kara-Hissar whence it flows N.E. for about 50 m., when it takes a N.W. and subsequently a N. direction, and falls into the Black Sea 20 m. E. Cape Kurpa, after a course of about 350 m. in some parts very tortuous and much broken by falls and precipices. Its whole basin rests upon a sy.

SAKAYT, or **SEKERT**, a large mining vil. Upper Egypt, about 25 m. from the Red Sea lat. 24° 35' N., lon. 34° 47' E. It consists of numerous miners huts and houses, with a temple excavated in the rock, and some Greek inscriptions.

SAKHFE SLAWAK, a large vil. Afghanistan, 86 m. W. Dera Ghasee Khan lat. 30° 5' N. lon. 70° 26' E. It gives name to a celebrated pass which commences 4 m. W. from the village.

SAKKA a tn. Africa. See FAYASA.

SARKARA or **SARKARA**, a vil. Egypt near l. bank Nile 21 m. S.W. Cairo, celebrated for its pyramids the largest of which has its degrees or stores striped of their triangular exterior. It measures about 187 paces square, and is surrounded by what may be considered a sacred inclosure, about 1750 ft. by 950 ft. Besides this, the largest pyramid, there are nine or ten smaller. Amongst the most curious of facts here are the the mummy-pits.

SARKARA a river, Sibutu, rises in an E. branch of the Ural Mountains flows first S. and then W. in a direction nearly parallel to that of the Ural and joins the r. bank of that river about 10 m. below the town of Orsk. total course, above 450 m. Its principal affluents are the Ik and Salmoik both of which join it on the right.

SAKOURA, an isl. Japan upper part of a large bay Isl. Kiusin formed on the S.E. by Cape Teinshagoff, and on the N.W. by Peak Horner. It is very elevated, and contains a lofty mountain called *Mitaka* lat. 31° 30' N. lon. 150° 5' E.

SALA, or **SEZ**, the most N.E. of the Cape Verde Islands, about 22 m. E. Boavista, lat. 16° 45' N. lon. 23° W. greatest length N. to S. 20 m. central breadth, about 5 m. Like the rest of the group, it is of volcanic origin and has several conical summits one of which the peak of *Marizade*, rises nearly 1400 ft. above sea-level and is 80 m. off. In the S. are several tracts impregnated with salt, and on the E. a salt-lake and a hill composed chiefly of saline substances. Turtle abound on the coast, which afford several good harbours. Salt has been, but is no longer collected.

SALA, a river Peru rises on the E. slope of the Andes, near Curato de los Cerros, flows first E. then S.W. and near Huancabamba with the *Jaya* in forming the Mantaro after a course of above 180 m.

SALA, a river Russia, rises in W. of gov. Astrakhan, flows N.W. into gov. Don Cossacks, then W. across that government, and after a course of above 900 m., joins l. bank Don, about 20 m. E.W. Novo-Felersk. Its principal affluents are the *Gashun* and *Esapoch* both on the right.

SALA, a vil. and com. Italy and 9 m. S.W. Fano. It has an old castle in a ruinous state, a church, a primary school, and a trade in corn, wool, silk, olives, and other fruit. Near it is the beautiful palace of *Calisto de Bontich* belonging to the duke. Pop. 3505

SALA a tn. Sweden, lon. and 21 m. N. Westerbö, on a plain, and traversed by a stream. It is well and regularly built, and has the largest and most productive silver-mines in Sweden. There is here a shot-factory, but instead of a tower from which to pour down the molten metal, an old mine-shaft is used. In the vicinity is the old castle of *Bleking*, which was the occasional residence both of Gustavus I. and II.

At a short distance are the mineral springs of *Skira*. Pop. 1690

SALA -1, (Za), a tn. Naples, prov. Principato-Citra, on a rocky eminence, about 50 m. S.W. Potenza. It is well built, and contains the palace of the Bishop of *Cyprippe*, a handsome edifice, five churches, and a Capuchin convent. -3,

(-Basilica), A vii and com. Lombardy, div. Turia, prov. Blusa. It was defended by an ancient castle, of which only a single tower remains; and has a church, and near it an old Benedictine abbey in ruins. Pop. 1638.—3 (4th div.) A vii. Naples, prov. Principato-Citra, S on N.W. II Valle on a lofty hill. It sometimes takes the name of *Salita*, P. 1350.

SALADO-DE-TARIFA, a small river *Spila*, prov. Cadiz, celebrated for the great battle fought on its banks, in 1340 in which the *Neuschwan* under *Abul Tenu* were again defeated.

SALADO (Rio) two rivers, La Plata.—1 *Rio* in the Andes, prov. Salta in the Cordillera de los Valles about lat. 24° 30' S., whence it flows, under the name of the *Avante*, S.E. to lat. 25° 40' S. when it turns N.E. and now assumes the name *Uachupia*, till it reaches lat. 24° 42' S., when it takes a S.S.E. course, and after a run of upwards of 600 m., falls into the *Parana* at *Santa-Espiritu*, lat. 32° 30' S., its entire course being about 850 m. In the mountain region the waters of this river are fresh, but in the flat saline country through which they afterwards run, they unlose a brackish taste from which the river takes its name of *Salado* or *Salit* River. In its course the *Salado* passes through the provinces of *Salta*, *Tucuman*, *Santiago*, and *Santa-Fé*. By means of the stream natural vessels bring down the hides and tallow of *Tucuman*—2 *Rio* rises about lat. 34° 23' S., lon. 63° W. flows S.E. through the pampas, and falls into the estuary of the *Plata*, 100 m. S.E. of *Buenos Ayres*, after a course of about 400 m. Although impregnated with salt in the early part of its course only it maintains its brackish taste throughout.

SALAHYAH a ruined cit. Asiatic Turkey on the *Topkapat* about lat. 31° 30' N. lon. 40° 30' E. The walls a noble gateway and an extensive castle are all that remain but these relics are imposing from their massiveness and simplicity.

SALAMIA a in Central America, Guatemala. W. Yucatan, in a mountainous district, on the *Salinas*, 55 m. N.W. of *Yucatan*. Most of the inhabitants are *Indians* P. 4,000.

SALAMANCA, a in Yucatan. *See* *Bucatan*.

SALAMANCA a small in Mexico dep. Guanajuato, on a gently rising plain 70 m. S. of *Salamanca*, 150 m. N.W. Mexico. It is a neat and pretty looking town and has considerable manufactures of woolen cloaks and cotton shawls. Pop. about 10,000.

SALAMANCA a prov. Spain Leon, bounded N. by prov. Zamora, F. Valladolid and *Lugo*, and W. Portugal area 7,455 sq. m. It is watered by the *Douro*, the *Tormes*, the *Alagon*, and various other smaller streams. A great portion of its counts of mountains, on some of which there is perpetual snow, and above three fourths of the whole surface of the province are covered with forests especially of oak, ash, poplar and elm. There are thermal waters in various localities, and mines of iron, copper, lead, rock-crystal and sulphate but many of them are abandoned. Pure gold is also found in the sands of the *Alagon*. There are likewise extensive pastures grazed by sheep, goats, horses, and cattle, wild and tame, while the straws are abundantly supplied with cereals. Grain and seeds of every kind, especially of wine, honey and almonds are plentifully grown. The *Salamancones* are grave, honourable, and courteous and the costume both male and female, is elegant and picturesque. Education has of late made some advances, but still much remains to be done. There is considerable contraband traffic carried on, from the proximity of the province to Portugal and crimes are somewhat more numerous than might be expected from the general character of the people, and their peaceful agricultural pursuits. Pop. 240,000.

SALAMANCA (see *Salamanca*), French *Salamanca*, a city Spain, Leon, cap. above prov. 120 m. N.W. Madrid, on three hills, in the middle of a kind of horse-shoe, formed by the river *Tormes*, which is here spanned by a fine Roman bridge of 27 arches, 600 paces in length and 12 paces in breadth, said to have been rebuilt by Trajan. The houses are, with few ex-

ceptions, old-fashioned but generally commodious and well protected from the cold, which is here felt with great season. The great square, the largest in Spain, is surrounded with colonnades, under which are shops, the post-office, and the town-hall, and in another square near it is the picturesque vegetable-market. Among the numerous edifices which adorn Salamanca, and which have procured for it in Spain the appellation of Little Rome, are the cathedral, a splendid example of the *Spain Gothic*, begun m. 1518 with beautifully carved portal, and three aisles, the roof studded with gilded roses, and supported by graceful shafts with small capitals painted in blue and gold. the old cathedral, erected in 1103 a simple and many structure, in the Norman-French style, but low damp and neglected the college of St. Bartholomew or Old College, founded in 1410, but renovated in 1760, a classic edifice, with a grandiose Ionic portico, the college of the *Jesus*, that of the military order of *Calatrava*, with a noble facade. King's College, with a serious and ample Doric quadrangle, partially restored from the ruinous state in which it was left by the French, and now converted into infantry barracks, the College of the Archbishop, founded in 1522 by *Alonso de Fonseca*, Archbishop of Toledo, and on which *Pedro de Herrera*, *Alonso de Covarrubias*, and *Berruguete*, the three great artistic architects of their age, were simultaneously employed. It is classical and exquisite fabric with a magnificent facade. The principal centre is particularly noteworthy for its double gallery of light, airy, fluted columns, and the elegance and delicacy which reign throughout. It has a beautiful chapel, with sculptures on the high altar by *Michal* Angel and *Berruguete*. It is in good preservation and is now occupied chiefly by the Irish students, and a military hospital. Of the numerous conventual establishments the most remarkable is that of St. Domingo a sumptuous building, combining various styles of architecture with a chapel entirely in the modern Gothic style. The university of Salamanca is one of the oldest and most celebrated in Europe. It was founded about the close of the 12th century and a century later was resorted to from all quarters, the number of students amounting at one time to 14,000 and its fame continued to increase till the 16th century after which it began to decline, and now its courts are almost deserted. The university consists of two colleges, called greater and lesser schools, begun in 1416 and finished in 1433 for up to that time the schools were kept in the old cathedral cloisters the clusters of both are fine, those of the latter having graceful arches and elaborate mouldings, and those of the former being remarkable for classic and elegant simplicity. Philosophy general literature, chemistry, physics, political economy jurisprudence natural history Greek and Latin, &c., are taught in the university. There are besides 24 parish churches few of them possessing any

PALACE OF THE COURT OF MONARCHS SALAMANCA.
From the public garden, 1. Monument.

architectural beauty; numerous primary schools, a normal school, and a school of design a theatre, a bull-arena, capable of accommodating 8,000 persons an asylum for the poor, a

boarding hospital, an hospital for the sick, and several other charitable institutions; various bachelors and oratories, several fountains, neither remarkable for beauty nor well supplied with water. Many of the private houses and palaces are also remarkable, either for their size and magnificence or for their elegance, those most distinguished are the palaces of the Marquis of Paphlagonia and the Counts Garraza, Malakofsky, Epifanio, and Wicherky. Salamis possesses manufactures of leather, ordinary cloths, and excellent blankets. Four manufactures of coarses have several of coarse earthenware and four flour mills and a trade in wheat barley, vetches, and dressed leather. Salamis was a large and ancient city of the Vettones. In 323 A.C. it was taken by Hannibal. Under the Romans it became the ninth military station on the road from Merida to Bero-gene, and was under the Goths a favoured city. It was ravaged by the Moors, and finally reconquered in 1066. In 1484-5 Columbus was lodged in the Dominican convent, the monks having espoused his scheme of discovery after it had been condemned by the university. In 1548 Philip II was married here to Mary of Portugal. The elegant and pathetic lyric poet, Louis de Leon, is buried in the Agostine Calzados, and among the more recent ornaments of the university were Melendez and Quintana. A famous battle was fought in this neighbourhood in 1819 July 22 between the French army under Marmont, and the English and Portuguese, commanded by the Duke of Wellington, when the latter obtained a complete victory. Pop. 15,736.

SALAMIS or **KOUKUN**, an island Greece in the N of the Saronic Gulf, about 10 m. N. Athens. It is of very irregular shape, nearly 10 m. either way N. to S. and E. to W. and by its opposite extremities, which are separated from the mainland by narrow winding channels, closes in the beautiful Bay of Eleusis, so as to give it the appearance of a lake. It has a rocky surface with a thin but not unproductive soil and in some parts is well adapted for the olive. Its other principal product is honey, but the vine thrives well, and together with the olive produces excellent wine. The old city of Salamis stood on the S. coast, between the Island of Egina, and the celebrated battle, A.C. 480, in which the vast and invincible Persian was signally defeated by a much smaller Grecian fleet, was fought chiefly in the narrow E. strait.

SALANDRA, a N. Naples, prov. Basilicata 21 m. S. W. Matera, near the source of the Salandrella, a small stream 45 m. long, which falls into the Gulf of Taranto. It contains a church, five chapels, and a Franciscan convent and has manufactures of linen and cotton from raw materials grown within the district. Pop. 1400.

SALANGORE, a N. and maritime state Malay peninsula, W. coast. The town is situated a short distance up a river about lat. 3° 20' N. lon. 101° 30' E. It has a fort, constructed of mud and brick work, on which are a number of guns, some of large calibre in bad repair. The river is shallow, and practicable only for vessels of little burden. Artificial obstructions have been made by the inhabitants. The Dutch had formerly an establishment here for the monopoly of tin. — The **DIAMANT** or **DIAMANT** lies along the W. coast of the Malay peninsula, between lat. 3° 50' N. and the Isthmus of Suez, about lat. 4° 40' N. 130° E., and about 45 m. broad, or, interiorly, it produces tin of excellent quality, dammer-wood, oil, and resins. The population, less than it once was, is supposed not to exceed 15,000. It is principally composed of the descendants of a colony of Bugis, from Goeck, in the Celebes, who settled here towards the commencement of the last century.

SALANKEMENT, or **SLANKEMENT** (Stank), a N. Hungary, on Stryna, generalship Peterwardia, near the confluence of the Theiss with the Danube, about 6 m. from Fodok. It was once strongly fortified, and has a B. Catholic and two Greek churches. In 1691, Louis of Baden here defeated the Turks, of whom 25,000 were slain.

SALAR, a N. Spain, Andalucia, prov. and 37 m. W. S. W. Granada, E. of slopes of Sierra de Alhama. It contains a church and two old castles, one of which used as a prison and another as a courthouse, and has oil seed flour mills, and a trade in wheat, charcoal, and apparel. Pop. 1839.

SALARA a vil. Mnd. of Italy, gov. Yenne, prov. Poll. some on the Po, 19 m. S. S. W. Rovigo. It has a B. Catholic church. Pop. 1400.

SALARINGE a vil. and som. Belgium, prov. M. Flandres, 31 m. S. Ghent; with manufacture of linen two flour-mills and a trade in agricultural produce. Pop. 1836.

SALARRE, a N. Spain, Andalucia prov. and 25 m. E. N. E. Malaga. It has a regularly-formed square, a church and a primary school and a trade in raisins and wine. P. 1025.

SALAS-GOMEZ a small isl. S. Pacific Ocean lat. 28° 37' 48" S. lon. 105° 20' W., somewhat less than 1 m. long, and 1 m. wide a cooling-place for the sea-fowl, apparently of volcanic origin.

SALAT, a river, France, which descends from the S. slope of the Pyrenees, dep. Ardege, flows very cautiously N. N. W. passing St. Girons, and after a course of nearly 60 m. of which 20 m. are navigable with the current, joins R. bank Garonne, in dep. Haute-Garonne. Its chief affluents are the Aeth which joins it on the right, and the Lizard or Lasseme, on the left.

SALAWATTY a considerable isl. Indian Archipelago, off N. W. extremity of Papua, from which it is separated by a narrow strait, lat. (W. point) 0° 59' S. lon. 130° 55' E. (N. point) it is about 80 m. long by 25 m. broad. The shore is mostly steep, and except in a few places is also bold to approach. The island produces great quantities of sugar of excellent quality.

SALAYER, or **SALAYEN** a group of isl. Indian Archipelago, off S. coast, Isl. Celebes, forming part of the Dutch province of Macassar. It consists of the islands of Salayer or Great Salayer, Kalama, Bonaccata, Hog Island, and the Boogieran. Salayer Island about 50 m. long, N. to S. by 8 m. broad lat. (N. point) 5° 42' S. lon. 120° 23' E. (N. point) is separated from Celebes by the Strait of Salayer 13 m. broad and interspersed with several islands. It is mountainous and woody but thickly peopled and well cultivated. The principal produce is millet which is the chief subsistence of the natives. Cotton also is raised from which coarse blue and white striped cloths are manufactured. The houses of the natives are good. Pop. 60,000.

SALAZAR a vil. and com. Italy Piedmont, dep. Turin prov. and 12 m. S. W. Ivrea R. bank Orso. It is an ancient place and was once surrounded by walls and defended by a strong castle, of which only a tower, now used as a belfry, still exists. It has a church, a confraternity three oratories, and an elementary school. Pop. 1153.

SALCITO a N. Naples, prov. Salerno, 15 m. N. W. Campobasso near R. bank Trigno, with three churches eight chapels and an hospital. Pop. 2700.

SALCOMBE a vil. and chapelry England, co. Devon 5 m. S. Kingsbridge, W. side, entrance to Kingsbridge harbour. It has several handsome villas and numerous residences in its vicinity. It is in general well built and contains an Episcopal chapel and places of worship for the Baptists and Wesleyans. About 50 vessels belonging to the place are employed principally in the fruit and coasting trades, and ship-building is carried on to some extent. Near it are the remains of an ancient castle. Pop. 1656.

SALCOMBE River, par. Keg Devon, 2805 ac. P. 476.

SALCOTI par. Eng. Essex, 255 ac. Pop. 25.

SALDAÑA, a N. Spain, Leon prov. and 25 m. N. Palencia, in a beautiful plain watered by the Carrion, here crossed by a stone bridge of 23 arches, in a somewhat dilapidated state. It has three churches a good townhouse, primary school hospital and the ruins of an old castle, surrounding a steep height manufactures of linen thread and earthenware, and several oil and flour mills. Pop. 920.

SALDANHA BAY, B. Africa, Cape Colony about 70 m. N. W. Cape Town, lat. 36° 14' 42" S., lon. 17° 54' E. (N. point) one of the best and most commodious harbours in the world. It extends about 8.5 m. S. W. to S. E., with a comparatively narrow entrance, not quite 5 m. wide. It affords, at all seasons, very excellent shelter and anchorage.

SALDA a vil. Sonagambila, Fouta l. bank Senegal lat. 16° 21' N. lon. 18° 37' W. Here ships bound for Galam stop to pay their customs-duties to the Almamy of Fouta. Here also is a mudbank which ships cannot pass in the dry season without discharging their cargoes.

SALDINSK (NAMES AND VERSIONS) two vils. Russia, gov. and 220 m. E. N. E. Perm, on the Balda, an affluent of the Tura. They have two blast, and a great number of saw-mill furnaces.

SALE -1 A in Italy Piedmont, div Alessandria, prov and 10 m N W Turin, in a plain, consisting of a rich alluvium left by the Po, which originally had its channel in it. It was once surrounded by fortifications of which no traces now remain, is the seat of a court of justice and has three churches, two schools and an hospital. Pop. 5684.-2, A vil and com Piedmont, div Coni, prov Mondovì, in the valley traversed by the Saluggia. It has a church and a charitable endowment. Pop. 1314.-3, A vil and com. *Sale Vesuvia*, prov and 15 m N W Brindisi, on a height above the E. shore of Lake Lucera with several churches, and manufactures of woollen cloths, which form an important article of trade. Pop. 1744.

SALE-CASLERVO a vil and com. Italy Piedmont, div Turin, prov Ivrea, a little N. Castellamonte, in a mountainous district, on a tributary of the Orco. It is a mere vil lage with a church. Pop. 2178.

SALE BY mar Eng. Lancashire, 1770 ac. Pop. 248.

SALES, SALES, or *SUA* a seaport in Morocco, W coast, at the mouth and on R. bank *Es Regreb* lat. 34° 3' N, lon 6° 50' W. It is encompassed by a wall 85 ft. high, strengthened and flanked by towers at regular distances, but is nevertheless weak, and could offer little resistance to a regular attack. At the S.W. angle of the town there is a battery mounting 18 heavy guns, which commands the N. passage over the bar of the river. The fortifications towards the sea are of a recent date, and kept in tolerable order. The guns are of large calibre, but the batteries are badly situated. The water is deep close to the shore and a frigate might approach within a cable's-length of the batteries. The export trade consists principally in wool. There is here a manufactory of carpets, the colours of which are beautiful and the texture excellent; but, being made for home consumption, they are generally too long in proportion to their width. The practical preparations of the people of Sales, which rendered them at one time so notorious, have now been entirely departed from them; no such lawless practices being now attempted. Opposite Sales on the E. bank of the river is the town of Rabat (which see). In November 1851 both Sales and Rabat were bombarded and nearly destroyed by the French. *Pop* (Sales) about 10 000.

SALEHURST par Eng. Sussex 3750 ac. Pop. 950.

SALEM several places, U. States -1 A seaport in Massachusetts, on a peninsula nearly surrounded by water and on the Boston and Salem railway and several other branch-lines, connecting it with Marblehead on the S., Cape Ann on the E. and Lawrence and Lowell on the N. W. about 14 m. N. E. Boston. Its site though low is pleasant and healthy being formed by two inlets of the sea, the one of which, called the North River is connected with Beverly by a bridge nearly 1500 ft. long while the other called the South River is the harbour. Not having been laid out according to any preconceived plan, it has assumed a very irregular shape and consists, for the most part of angular and winding streets, lined with houses built partly of brick and stone, but chiefly of wood. Many elegant houses have been erected in the vicinity of the Common. An inclosure of above 8 ac. in the E. part of the town tastefully laid out in gravel walks bordered with lofty trees. Among the public edifices are about 50 churches, several of them possessed of much architectural merit, and one, called the North church, distinguished by its beautiful Gothic front, the city-hall with a fine front of granite the courthouse a new and beautiful structure finely situated the custom-house, market-house, almshouse hospital, the almshouse, occupying a spacious hall, and possessed of a library of 11 000 vols., the Essex institute, designed to promote the study both of natural and civil history; the aqueduct, by which an ample supply of soft and spring water is furnished, and the museum belonging to the Essex Institute. The manufactory, though not enjoying the benefit of water-power, are of considerable extent, and include a large paper mill, two saw and two flour mills several distilleries and rope-walks, and numerous tanneries. The trade is still more important, and employs above 100 vessels in foreign commerce, besides a number in the whale-fishery. The East India trade, in which Salem had at one time a decided lead, has been unable to withstand the competition of Boston and New York, though many vessels which deliver their cargoes at these ports are still owned

by its citizens. In 1851 the number of vessels which cleared from the port for foreign countries was 508, tonnage, 45,989.

Salem was first settled in 1619, and is, next to Plymouth the oldest town in New England. In 1652, strange delusions with regard to witchcraft having become prevalent, no fewer than 19 persons were condemned and hanged as witches, on a spot which still bears the name of Gallows Hill. During the Revolutionary war, Salem distinguished itself by its naval prowess, and fitted out about 60 armed privateers, manned by 4000 men. *Pop* (1850) 18,880.-2, A vil. and township, New Jersey 37 m. W. S. W. Trenton, E. side, Salem Creek with a courthouse, jail, eight churches, an academy and some shipping trade. *Pop* 3003.-3, A vil. and township, New York, 44 m. N. E. Albany. It contains Washington Academy, has some manufactures and several mills, and is noted for its wool-market. *Pop* 3904.

SALEM a dist. and in Hindooistan presid. Madras. The dist. lat. 11 to 18 N, lon 77° 40' to 79° E. is bounded W. and S. W. by the Cavary river, separating it from Coimbatore, N. Mysore and the dist. N. Arcot, E. and S. by S. Arcot and Trichinopoly length N. to S., 130 m. breadth, from 55 m. to 100 m. Area, 8200 sq. m. It consists partly of a tract below the Ghats, but chiefly of the Barren-plateau plain above them, a fine tableland rising in many parts to between 5000 ft. and 8000 ft. above the sea, well cultivated and producing great quantities of rice, madder and rose-wood, cardam, gamboge &c. About one-third of the surface is cultivated and three-fourths are under the ryotwari settlement (see *INDIA* *Barren*) the remainder being in small communities. Half of the population is estimated to be employed in agriculture. Cotton of various species, indigo, tobacco, coffee, maize, and rice, are raised iron-ore is very abundant and rich and some of it magnetic, native carbonate of magnesia is met with cotton cloths are, or lately were, made for export to the W. Indies and America; iron and steel are manufactures, the chief exports are cloth, iron, gamboge, iron oil seeds, imports are opium and silk. *Pop* 946,181.-**SALEM** the cap. and only city of importance, is in the S. part, E. bank of the Tyronny 70 m. N. W. Trichinopoly, and 1070 ft. above the sea lat. 11° 39' N, lon 78° 32' E. It consists of two wide and many narrow streets, with numerous houses built of brick and tiled; and it is on the whole clean and improving, but not salubrious, from being seated in a narrow valley, and subject to great daily ranges of temperature. Many of the inhabitants are silk and cotton weavers, and these are the most healthy. *Pop* 19 000. (*Madras Adm.* *Rep.* on Statistics of Madras Presid. & Division.)

SALEMBRIA, or *SALYMBRIA* (anc. *Phoenice*) a river, Turkey in Europe, which rises near Mount Politis, on the frontier of Macedonia, Albania, and Thessaly flows S. E. past Kalabaki, E. N. E. to Larissa, then N. N. E. and falls into the Gulf of Salomon at Karli, after a course of about 110 m. Its principal affluents are the *Favari* Salago and the *Saranta* Ieros. It is navigable for about 50 m. and is remarkable for the impetuosity of its waters.

SALEMI (anc. *Halym*), a tr. Sinyi prov and 21 m. S. E. Tiflis. It is in the S. and is fortified, and contains a great number of churches and convents, but is on the whole a miserable poor place, with no kind of industrial establishments. *Pop* 8004.

SALENGHE a vil. and com. Italy, Piedmont, div Turin, prov and 2 m. E. Pinerolo. It was walled, and is still entered by two castellated gates from one of which the belty runs, and has two churches, a communal, and a free school an hospital and a charitable endowment. *P* 9981.

SALESIANO, a vil. and com. Italy, Lombardy, gov. Milan, prov and 5 m. W. Lomb. r. bank Lambro with a church; an oil-mill, and some trade in cheese. *Pop* 1008.

SALERNA, a tr. France, dep. Var, in a fertile district, 1 m. bank Esteron, 18 m. N. W. Digne, with quantities of coarse woollens and earthenware; and a trade in wine, figs, olive-oil, silk, cattle &c. Near it are the ruins of an ancient fortress built by the Saracens. *Pop* 3762.

SALLENO (anc. *Paestum Ance*), a gulf, W. coast, Naples, formed by Campanella Point on the N. W., which separates it from the Gulf of Naples, and Furore Point on the S. E. It is about 29 m. across its entrance, and 24 m. deep; receives the rivers Sele and Tundano, and has the towns of Salerno and Amalfi on its N. shore.

SALERNO (anc. *Salernum*) a tn. and seaport, Naples, cap. prov. Principato-Citra, at the N. extremity of the gulf of the same, 30 m. S.E. Naples, finely situated on the side and at the foot of a hill, covered by the remains of an ancient citadel. It is inclosed by walls, and has a broad road or macadam along the shore, which forms an excellent promenade. Its streets, paved with lava, are narrow and irregular and hemmed in by lofty gloomy looking houses, very indifferently built. The principal edifices are the cathedral, erected by Robert Guiscard, a Gothic structure, adorned with a facade of 26 granite Corinthian pillars, and possessing an ancient tomb, said to contain the ashes of the apostle Matthew the governor's palace, the new theatre, 17 churches, several convents, an extraordinary, and a foundling hospital. The port is well sheltered but is shallow, and frequented chiefly by fishing vessels, Naples having carried off its trade, which was at one time of some importance. Salerno is the see of an archbishop, and has a high criminal and a civil court, a university, an extraordinary which had acquired great celebrity in the 11th century, particularly as a school of medicine but has lost its reputation. The foundation of the town is attributed to the Greeks. It became a place of great importance under the Romans, from whom it passed first to the Goths and afterwards to the Lombards who retained it in possession till the 11th century, when they were expelled by the Normans Robert Guiscard. It was ultimately annexed to the crown of Naples. The extensive cultivation of rice in the neighbourhood makes the soil unhealthy. Pop. (1850), 16,892.

SALOTTO a vil. and com. Italy, Veneto prov. and 23 m. S.W. Padua, with two churches. Pop. 3041.
SALFORD three pars. Eng. —1, Bedford 900 ac. Pop. 809—2, Oxford 1670 ac. Pop. 873—3, (Priors) Warwick, 4780 ac. Pop. 863.

SALFORD a bor. tn. and par. Eng. See MANCHESTER.
SALGADO a tn. Brazil prov. Minas Gerais about 4 m. from I. head of the river, 870 m. N. Rio-Preto. It stands on a height, surrounded by marshy plains and has a church, Latin and primary school and a considerable trade in cotton, sugar, rum, and cattle. Pop. (dist.), 4000.

SALGADO a river Brazil rises in E. of prov. Ceara under the name of the Porcos, flows N. and descending from the slopes of a Serra, after many windings, takes the name of Salgado, shortly after becomes navigable waters the numerous districts of São-Vicente-de-Lavras and Ico, and several miles below the town of Ico joins the bank Jaguaribe.

SALGHIR, a sluggish muddy river, Russia, rises in the Kila Mountains, in the E. of the Crimea, goes towards the N.N.W. past Simferopol, then N.E., and after a course of about 110 m. falls into the Gulf of Sivash, in the large lagoon separated by a narrow belt from the Sea of Azov. Its principal affluents are the Burelitcha and Karsa.

SALHIEH or **SALAMANA**, a tn. Lower Egypt about 60 m. N.E. Cairo and at some distance S. of Lake Menzalah. It is a place of some strength, and is regarded as the key of Egypt on the side of Syria. It has a large mosque. All around it are seen mounds indicating the remains of ancient cities. One of these, Tel Douch, situated in a direct line between Salhieh and Pelusium, the modern Tinnis, marks the site of Daphne, identical with the Taphnephos of the Bible, where the king of Egypt is said (Gen. xlii 9), to have had a palace.

SALHOUSE, par. Eng. Northfolk 2090 ac. Pop. 601.

SALIAN, an isl. Transcaucasian Russia formed by the two arms by which the Kura falls into the Caspian. On the N. side of it stands the town of Salian, cap. dist. of same name, and an important station for the steppes fishery.

SALIBAGHO, or **TUZUNA BUKHARA**, a group of thirteen isl. Indian Archipelago, between Mindanao and Gilolo. The S. end of the most easterly, Kabungwan, is lat. 8° 47' N. lon. 127° 11' E. Karundun, the largest and most N. but one, is about 27 m. long and 6 m. or 7 m. broad. They are hilly and fertile, and yield rice, sweet-potatoes, and coconuts; grains, pigs, and fish are plentiful, as is also water. The group is partly under the sway of the Prince of Sangir. Though the natives of some of the islands are partially civilised, those of others of them are in a very low state, having no knowledge of a God, and living together like cattle. Pop. 11,800.

SALICITTO a vil. and com. Italy, Piedmont, div. Cogh, prov. and 18 m. N.N.E. Mondovì, on bank Bormida.

It is walled, entered by two gates. It traversed by a spacious street, opened up by several minor streets, and has a church, and an ancient castle in good preservation. Pop. 1674.

SALIES, a tn. France, dep. Basen-Pyrénées, 80 m. N.N.W. Pau. It derives its name from a saline spring, from which the salt obtained is remarkably pure, and is said to have no small share in improving the flocks of the department, so well known under the name of Fleams of Bayonne. The trade is in salt and salt provisions, horses and cattle. P. 8373.

SALINI BEXAR, a considerable tn. Punjab, 1 bnk. Indus, on the great route to Cashmere by the Deb Pass lat. 34° 57' N. lon. 73° 55' E. It has a large and well-supplied bazaar and within 2 m. of it is the fort of Kralan Ghar, one of the finest specimens of the square regular mud-fort in the Punjab.

SALINA a tn. U. States New York, E. extremity of Onondaga Lake, about 140 m. W. Albany, and 1½ m. N. Syracuse, which, though originally inferior, has so much outstripped Salina that it may now almost claim it as an suburb. It is celebrated for its salt springs which both supply extensive salt-works on the spot and at Syracuse from which, in 1850, about 789 000 bushels of salt were made. Salina has also extensive flour-mills, for which water-power is obtained from the Oswego canal, and an extensive furnace, machine-shop and other manufactures in which steam-power is employed. Pop. 2142.

SALINA, or **SALINI** (anc. *Didyma*) one of the Lipari Isles off N. coast, Sicily and 8 m. N.W. at Lipari, greatest length, E. to W. about 6 m., mean breadth about 4 m. It is of volcanic origin and mountainous the chief summits being Mount Vulture on the N. and Mount Salvatore on the S. It is very fertile, and produces much oil fruit, and wine. It is named from a lagoon on the E. coast from which a great deal of salt is made. Pop. 4000.

SALINE par. Scot. Fife, 7 m. by 6 m. Pop. 1702.

SALINAK, a maritime vil. E. coast of Cyprus, on the Gulf of Saloonia. It has a cathedral, a bazaar, and a salt-works. Pop. 1631.

SALING (Ghar) par. Eng. Essex, 1661 ac. Pop. 336.
SALINS (anc. *Salinae*), a tn. France, dep. Jura, in a narrow gorge between two lofty hills, at the extremity of a fertile valley, 24 m. N.N.E. Lons-le-Saunier. It owes its name to salt works carried on in a vast edifice about 300 yards long which stands in the midst of the valley is surrounded by walls, and derives its supplies from brim-springs which rise below from vaults of ancient construction. The whole town, with exception of the establishment already mentioned and the hospital, was destroyed by fire in 1825 and has been rebuilt chiefly by voluntary subscriptions obtained throughout the kingdom. The manufactures consist of salt and sulphate of soda, trestler and brandy and the trade is in wine brandy cheese, wax, honey, salt, fir and oak timber and gypsum. The last is extensively quarried in the neighbourhood. Pop. 6387.

SALIS, a river Russia, issues from a small lake, which rises near the centre of gov. Novoniz, flows easterly W., and after a course of about 100 m. falls into the Gulf of Riga, near the town of Salis or Sahabing which occupies a position, and has a small harbour rendered almost inaccessible by sands which have silted it up.

SALISBURY, several places United States —1, A township, Connecticut, 41 m. N.W. Hartford with several furnaces, forges manufactures of guns, anchors, engines, scythes, wrought-iron &c. Pop. 8103 —2, A township, Massachusetts, 36 m. N.E. Boston, on the Merrimack, at the junction of the Foreway, with several churches, extensive wooden factories, manufactures of cottons, three sawmills, fulling-mills and ship-building. Pop. 8100.

SALISBURY or **NEW SALISBURY**, an ancient city ruin and par. bor. England, cap. co. Wilt. 80 m. S.W. by W. London on the S.W. railway in a pleasant and fertile valley, at the junction of the Upper Avon with the united streams of the Willey and Nadder. Its houses, all of brick, are far from being handsome, and are greatly wanting in uniformity. The city is lighted with gas, and abundantly supplied with water from the Avon which runs in clear streams through many of the streets in artificial channels. At the head of its public buildings stands the magnificent cathedral, begun in 1220 and completed in 1256, one of the finest and most interesting specimens of Gothic architecture in the kingdom. It is in the form of a double cross, with a highly enriched tower,

404 ft. in height, the interior is exquisitely beautiful from the loftiness of the elevation and the delicacy and lightness of its structure. There are three parish churches in the city all fine edifices, as is also the R. Catholic chapel, a structure of great beauty by Pugin. There are places of worship for Baptists, Wesleyans, Independents, and several meeting-houses for other bodies. In the centre of the city is the market-place, a large open area, in which markets are held twice a-week; and on every alternate week, one of the largest cattle-markets in the west of England. At the S.E. corner of this area stands the council-house, a modern square building of white brick, with a handsome Doric portico. There are several ancient edifices in the city interesting from their antiquity and architectural merit, but now in a state of decay or altered to suit other purposes than the original. The principal schools are the chorister's, the city grammar and the bishop's school, in which last 40 boys and girls are clothed and educated at the expense of the see, a training school for governesses in connection with the church of England, the British and national schools, and various private establishments. The charitable institutions are numerous they comprise an infirmary the Godolphin charity endowed for the maintenance and education of eight young orphan ladies seven hospitals, the college of matrons and various other endowed charities. Salisbury was at one time celebrated for its woollen manufactures, particularly hosiery, but they are now extinct the manufacturing industry of the city being at present limited to the making of scissors and other fine cutlery a rope, twine and sock factory and to one or two establishments for hair-cloth weaving. Malt is extensively carried on and the trade in beer is considerable. Salisbury returns two members to Parliament. Pop. 11,657

SALISBURY an [w] British N America, Hudson Strait lat. (E. point) 53° 27' N lon 76° 40' W (w.) about 30 m long N.W. and S.E. and about 10 m broad

SALISBURY PLAIN an extensive and elevated chalk tract, England, Wiltshire immediately S. of the city of Salisbury extending about 20 m E. to W. and 14 m N. to S. Its general appearance at a distance entitles it to be called a plain, but on a closer inspection it is found to have a undulating surface, and to be intersected by numerous small valleys. It consists generally of a thin light soil covered with flints, and though not well adapted for agriculture, is for the most part covered with a fine green sward, forming excellent sheep-walks. The high price of grain during the late war tempted several of the proprietors to bring large portions of it under the plough, but the crops, large at first, rapidly fell off as soon as the superabundant vegetable matter began to be exhausted, and the anticipated gain passed in a very serious loss, from the difficulty of re-forming the sward which had been destroyed. The most remarkable objects on Salisbury Plain are the Druidical remains of Stonehenge.

SALKEED (Gorak) par Eng Cumberland, 3724 ac. Pop. 497

SALL, par Eng. Norfolk 1802 ac. Pop. 252

SALLÉ, a tn. Naples, par Abruzzo-Citra, S.W. Cilici, on a low but salubrious site with four churches. A great many silk-worms are reared in the neighbourhood. P. 1100

SALLÉ (LA) a vil and com. kingd of Italy Piedmont, div and about 12 m W. Aosta, 1 bank Dora-Baltea, here crossed by several wooden bridges. It has two churches a charitable endowment, and several primary schools. Many of the inhabitants emigrate to obtain the means of subsistence. Charrette, who distinguished himself as a leader of the Vendée during the revolution in France was a native of La Sallé. Pop. 2273

SALLENCHÉLÉ, a tn. France dep. Haute Savoie, prov. Faucigny on a height above 1. bank Arve, about 12 m. W. N.W. Mont Rhone, and 30 m S.E. Geneva. It was almost entirely destroyed by fire in 1860 and has been again rebuilt. It is the seat of a bishop; has a court of justice and a considerable trade in cattle, hides, butter and cheese. Pop. 2083.

SALLÓ (Hagy) a market to Hungary, Nither Danube, on Harg, about 10 m. from Léva with a church, and very important cattle-markets. Pop. 1618.

SALM, an ancient principality Germany belonging to a celebrated family which in the 12th century divided into two

branches; the elder possessing Upper Salm, on the E. frontiers of Lorraine; and the younger, Lower Salm, in Luxembourg, both on the left bank of the Rhine.

SALMERON a tn. Spain, New Castle, prov. and 37 m. S.E.E. Guadalajara, on a height with a church, clothed, and primary school, several oil and flour mills; and a trade in corn oil, and wool. Pop. 1158

SALMON, several rivers, U. States 1.—1. Runs in state of New York, flows N.W. through On. and falls into Mexico Bay in Lake Ontario. It is navigable by boats for 16 m. to the falls at Orwell, where a volume of water 250 ft. wide is precipitated over rocky precipices from a height of 107 ft.—2. Connecticut, falls into the river Connecticut at Haddam.—3. California, an affluent of the Klamath. It flows W., and gold is found throughout its whole course.

SALMONBY, par Eng. Lincoln 961 ac. Pop. 110

SALMÜNSTER, a tn. Helvetia, on the southern side of the lake with the Koenig. It is walled, and has a church the remains of a Capuchin monastery manufactures of woollens and four mills. Pop. 1890.

SALO a tn and com. Italy, Lombardy, prov. and 15 m. S.E. Brescia, beautifully situated at the head of a bay on the N. shore of Lake Garda. It was once walled, and is still defended by an old castle is well built, has well-ordered streets and spacious squares, lined by handsome buildings is the seat of a court of justice and several public offices and has several churches, an ecclesiastical seminary a gymnasium an academy founded as early as 1554 a casino a theatre and several charitable endowments. The manufactures consist chiefly of thread and of dusted stomachic waters, which are held in much esteem the trade is chiefly in lemons and other fruits. The surrounding district, covered with lemon and orange groves and a profusion of flowers, is one of the most beautiful in Lombardy. Pop. 4480

SALOBRENA [anc. Salobrena] a tn. Spain, Andalucia, prov. and 89 m. S.E.E. Granada, on a rather high and steep rock 2 m. from the Mediterranean, a bank of sand and surrounded with remains of ancient walls. It contains a townhouse, prison two primary schools, and a large and strong fort in a ruinous state and has some traffic in cotton with Barcelona, and in potatoes, figs, and apart from the power of Valencia and the ports of the west. Pop. (agricultural), 2044

SALOMAN or **SOLOMON ISLANDS**, a group, S. Pacific, having New Britain and Papua on the W. and Queen Charlotte's Islands on the E. Ymbel Island near the centre of the group, is in lat. 8° 34' S., and lon. 159° 58' 54" E. The Solomon Archipelago extends N.W. to S.E. for about 600 m., and contains eight or ten principal, with numerous minor islands. Their structure is similar throughout, consisting of a mountain chain often very lofty stretching in the direction of the group, and forming a kind of central axis from which the sides slope gently, and finally merge in low shores, often furnished with a belt of mangroves touching the water. The soil judging from the vigour of the vegetation is of great fertility. The inhabitants are numerous, and apparently in a very savage state.

SALOME-BERKHOE, par Eng. Oxford, 679 ac. P. 152

SALON [anc. Salona], a tn. France dep. Bouches-du-Rhône, 30 m. N.W. Aix on a fertile plain, on the canal of Cuyrenne. It consists of the old and new towns. The former, situated near the centre, is nearly of a circular form, and was surrounded with ramparts, of which only some ruins remain. It contains some good houses, and a church built by the Templars in the 13th century but the streets are irregular. It is separated by a well-planned boulevard, adorned with fountains, from the new town, which is entirely of modern construction, and built with great regularity. The parish church contains the tomb of the celebrated astrologer, Nostradamus, who died here, and is said to have occupied an old castle, built upon a rock at the extremity of the town. The townhouse is a handsome edifice. The manufactures consist of olive-oil and soap and there are several silk and woollen flour mills and wax-refineries. The trade, which is important, is in oil, silk, almonds, wool, wax, cattle, &c. Pop. 4390.

SALONA, a ruined city, Dalmatia, about 8 m. N. N.E. Spalatro at the head of a gulf of same name, at the mouth of the Zadra, here crossed by a bridge. An insignificant modern village occupies a small portion of the S.E.

tucky, flow W., white, and soon after John 1 bank Ohio, about 20 m. below Louisville, after a course of about 100 m., partly navigable.

SALT HILL, a vil. England, co. Buckingham, 2 m. N. E. It is a village of rather only a few houses connected with the now abandoned transatlantic, called Western of the Eten scholars, who they repaired as precaution to it towards on the S. side of the road, and served contributions on the passenger.

SALT LAKE CITY a tr. U. States, territory Utah, on the Jordan, which connects the Utah and Great Salt lakes, 105 m. N. by E. Fillmore City, about lat. 40° 15' N. lon. 112° W. It stands at the W. base of Wasatch Mountains, more than 4000 ft. above sea-level and consists of spacious regular and well-planned streets, lined with houses, principally of sun-dried brick, and neat appearance. It is the head-quarters of the Mormons, and was first founded in 1847 by Brigham Young, the successor of Joe Smith, the originator of the sect. Its progress has been very rapid, and its condition is apparently prosperous, notwithstanding the persecutions which are publicly sanctioned in it. Pop. estimated at 8000.

SALT LAKE (GREAT) See GREAT SALT LAKE.
SALT RANGE, an extensive mountain group Punjab, extending S.E. from the Khyber or Tera Range on the N.E. confines of Afghanistan to the Jhelum, a distance of nearly 200 m. It has a barren and regular appearance, exhibiting little vegetation, while bold and bare precipices rise in many places at once from the plain but some of its peaks exceed 2500 ft. Limestone, sandstone, and clay of various colors are the chief formations. Salt pervades them all but is principally enveloped in clay, occurring in enormous masses, some of which are 200 ft. thick, varying in hue from white to flesh-color. The quantity of salt raised annually from the mines, some years since, was 90,000,000 lbs. Most of the taracuts of the Salt Range carry down gold-dust in their sands.

SALT RIVER, two rivers, 1. In the territory N. of the state of Missouri, and flowing first to the S., and then to the E. falls into the Mississippi in Missouri, after a course of about 250 m.—2. Kentucky runs to the centre of the state, and flowing N. about 40 m., turns to the W. and after a course of about 100 m., unites with the Rolling Fork from the S. and again turning to the N.W. enters the Ohio at Shepherdsville.

SALTA a prov. and tm. of La Plata. The province, which is the frontier one to the N. extends from lat. 26° N. northwards to the confines of Bolivia, is bounded E. by El Gran Chaco, E. by provs. Tucuman and Catamarca, and W. by Bolivia. It consists of lofty mountain ranges, fertile valleys and tracts covered with wood or pasture with a climate varying from tropical heat in the E. part of the prov. to intense cold in the mountain districts on the W. The principal rivers are the Yerniozo and the Salado. It yields wheat, maize, indigo, cotton, and sugar; and the vine to a certain extent is cultivated and some trade is carried on in its market. Pop. about 60,000.—The river lat. 24° 25' S. lon. 65° W. about 560 m. N.W. Buenos Ayres, at the bottom of a narrow valley visible to occasional inhabitants has a neat appearance, possesses a cathedral and several churches, but from the distance is scarcely at certain seasons. Pop. about 9000.

SALTASH a market tn. England co. Cornwall 4 m. N.W. Plymouth, on bank Tamar, on a steep acclivity rising abruptly from the river, across which there is here a steam-ferry. It has an ancient chapel with a fine massive tower, places of worship for Wesleyans and Baptists, a free school, and mechanics institute. The inhabitants are mostly seafaring men or engaged in fishing. Pop. 1631.

SALTAY prov. Eng. Lancashire; 3650 sq. m. Pop. 296.

SALTWATER, a transport tn. Scotland on the Firth of Clyde co. Arg. 34 m. S.W. Glasgow, with which it is connected by railway. It is irregularly built, and by no means of pretensions appearance has a townish. Established, Free, and three U. Presbyterians churches, and a Baptist meeting-house, several schools, and a library. Many of the inhabitants are occupied in weaving annulins. There are extensive chemical works at either end of the town; some salt is manufactured; and at the harbour considerable quantities of coal are exported. Pop. 4538.

SALTRE, two small isles. Ireland co. Wexford, R.E. coast, St. George's Channel lat. 52° 5' 30" N. lon. 6° 41' W. The largest is about 1 m. long, by ½ m. broad; the smaller about half that size.

SALTRENE-Fors, a river Norway, hall Nordland, rises in a mountainous district on the coast of Sweden, near lat. 67° N.; flows N.W. and falls into the Arctic Sea in a wide meander, which takes the name of the Saltrener; and at the mouth of which are several violent whirlpools, by which vessels have been repeatedly engulfed. The whole course of the Saltrener exceeds 100 m.

SALTREESTOWN, par Eng. Lond. 1045 sq. m. P. 355
SALTREESTOWN, three par Eng. Lincoln—1. (All Saints) 1169 sq. m. Pop. 200—2. (St. Clement) 2305 sq. m. Pop. 125—3. (St. Peter) 2008 sq. m. Pop. 251

SALTREED, par Eng. Somerset 860 sq. m. Pop. 417
SALTREED, an isl. Denmark 6 m. R.E.E. Copenhagen area, about 6 sq. m. It is very flat, and lies so open to the waves and spray of the sea that very few people live upon it. It is famous for its quarries of limestone, which is of a light colour with dark spots, and susceptible of a fine polish.

SALTRESE, par Eng. Norfolk; 1814 sq. m. Pop. 232
SALTRESE, a tn. Maxeen Confederation, dep. Conakry, at the foot of a hill, in a fertile district, 1 bank Tigra, near the frontier of Fieve Leon 470 m. N.W. Maxeen. It is a well-built handsome town, consisting of streets proceeding either parallel or at right angles to each other, and meeting in a public square adorned with a fine fountain, and has extensive manufactures of woollen blankets, and serapes or ponchos, which are in demand in every part of the confederation, and an important annual fair which lasts eight days. It is up about 12 000.

SALTO-GRANDE, a lofty cascade, Brazil prov. Minas Geraes, on the Cordillera dos Ammores where the Jequitinhonha, bursting between two rocks, boils in a whirl, and precipitates itself into an abyss, with a noise which is heard at the distance of 10 m.

SALTON, par Eng. York (N. Riding); 3530 sq. m. P. 379
SALTON, par Scotland Haddington; 24 m. by 8 m. Pop. 697

SALTWOOD par Eng. Kent; 2600 sq. m. Pop. 609
SALLIDA, a river U. States, rises in the Blue Mountains, S.W. frontiers of N. Carolina, enters N. Carolina, flows S.E. and at Columbia unites with Broad River in forming the Can. gaves, after a course of about 130 m.

SALUEN SALUEN or THAN-LUEN, a large river of S.E. Asia, forming nearly all the E. boundary of the Burmese empire. It rises in Kachin (E. Tibet), apparently by three principal heads, flows S., at first between high mountain ranges, and afterwards through the W. part of the Chinese prov. of Yunnan, under the name of No-hang and Lo-king bounds throughout the territory of the free Laos on the W., separates the British Transvaal provs. on the same side from the Burmese dominions, and finally enters the Gulf of Martaban by a wide mouth between the towns Maitama and Martaban. Its course, estimated at 600 m. (but probably much longer) appears to be almost uniformly to the S., and between lat. 9° 30' and 9° E. It forms very few large heads, and differs from nearly all the other great rivers of Asia in not having a delta, neither has it any considerable affluents, but according to maps a communication with both the So-hang and Iravadi. It has been but scarcely surveyed or explored, boats may ascend it to about 100 m. from the sea, beyond which its navigation is said to be interrupted by rapids and cataracts. It flows, however through a country profusely timbered, and doubtless of great natural resources.—(Madsen, *Almanac*, &c.)

SALUGGIA a vil. and com. Italy, Piedmont, Riv. Novara, prov. and 24 m. W. Verucchi, near a bank Doga-Riboni, with five churches, a convent, and a school. Pop. 3837

SALUEN or SALUGGIA a vil. Austria, Tyrol, about 16 m. S.W. Bozen 1 bank Adige. It has a church, some ruins, and a castle. In the vicinity a little above the village, there is a remarkable water-fall nearly 300 ft. high. F. 1116.

SALUZZO, a tn. Sardisleni Sardinia, par. prov. of same name, 30 m. S. by W. Turin, partly on a hill, and partly in a plain between the Po and the Trebia. It consists of an upper and a lower town, the former once surrounded by strong walls,

and still entered by three gates, and wall built, though the streets are steep, and the latter of considerably greater extent, and in general of more modern construction. Saluzola is the seat of a bishop, the residence of the marquises of the name, and the seat of several important public offices, and has a large and handsome cathedral erected in the 15th century, surmounted by a lofty and elegant tower. The church of St. Bernard, not of much architectural merit, but containing several splendid and interesting monuments, the church of St. Dominica, also chiefly remarkable for its monuments several suppressed and two existing convents the courthouses, ancient townhouses, college, and other public schools a large old castle, now converted into a house of correction, cavalry barracks, a new theatre, a foundling and two other hospitals a *mont-de-piété*, and several charitable endowments. The manufactures consist of iron and iron-ware, articles in copper, brass, bronze, gold, and silver, hats, leather and span silk the trade is chiefly in wine, corn, and cattle. Pop. 14,426.—The province, area, 618 sq. m. is bounded N. by Peru, Turin and Pinarol, E. Mendoza and Alba S. Com. and W. France. In the W. it is covered by the Maritime Alps, among which is here the lofty summit of Monte Vico. The chief rivers are the Vio, which rises within the province, and its tributaries Melva and Fraiza. The soil in the lower districts is very fertile, and having the advantage of an excellent climate produces in abundance corn, hemp, fruit, wine, and silk. In the higher districts great numbers of cattle and goats are fed. The minerals include iron, copper, marble and roofing slate. Pop. about 156,459.

SALUZOLA, a in Italy Piedmont, div Turin prov and 10 m. S.E. Roella on a slope above a bank river, here crossed by a modern bridge of five arches. It has a court of justice and a parish church. Pop. 9181

SALVADOR, a republic, Central America, bounded N. and N.E. by Honduras W. Guatemala, from which it is separated by the Rio Paz. E. by Nicaragua S.E. by the Bay of Amatique or Fonseca, and S. the Pacific Ocean area, about 7800 sq. m. The coast line, which extends nearly 150 m. is deeply indented, particularly in the S.E., and furnishes several good harbours, of which the most frequented are La Unión, within the Bay of Amatique, the residence of Libertad, and Amatique or Fonseca. The waters from the coast N. for about 15 m., is moderately low and level, but it shortly after becomes broken and rugged and is traversed by mountain masses in distinct groups, giving it a wild appearance. This is increased by no fewer than five volcanoes, which may be considered the distinguishing features of the state. The most active is Yalob, but the loftiest are San Vicente and San Salvador each about 9000 ft. high. The inequality of surface produces a considerable variety of climate, which inclines to cold in the higher and becomes excessively warm in the lower districts near the coast, but taken as a whole, is very healthy. The largest river is the Lempa, which issues from the Lake of Guila, flows S.E., forming part of the boundary between Salvador and Honduras. Other streams, though generally of small dimensions, are both large and numerous enough to furnish the means of irrigation, and thus dispense fertility in all directions. The most important and next in magnitude to the Lempa, are the Pasa and the Sira or San Miguel. Besides Lake Guila already mentioned, which is about 15 m. long by 5 m. broad, there is another called the Yagango, 5 m. E. of the town of San Salvador, 9 m. long by 8 m. broad. Numerous mineral and thermal springs occur in many quarters. The soil possesses great fertility and the whole state was one of the best cultivated in Central America. Universal discord broke out, and among other devastating effects, three large tracts out of cultivation. The most important crop is indigo, which is generally grown, and is both abundant and of excellent quality. Maize, sugar coffee, tobacco cotton &c., thrive well, but wheat does not succeed except in a few places and fruits, though by no means deficient, are neither so various nor so abundant as in the state of Guatemala. Cattle of a fine race, and hogs and poultry are numerous, but sheep are few and very inefficient. The dairy produce is chiefly confined to cheese of very ordinary quality which forms one main article of subsistence, on some estates particularly near the coast, a rich and excellent cream-cheese is made. The mineral deposits, once supposed to form the chief wealth of the state, appear to be very much exhausted. Gold and silver

are still extracted, but the returns are not understood to be very profitable. Iron of excellent quality used to furnish ore to two or three smelting-furnaces in the neighbourhood of Masapa, but is no longer worked, though it still might be to advantage, as the iron is admirably adapted for being converted into fine steel and is said to resemble in this respect the celebrated wootz of India. The part of the coast between Amatique and Libertad is famous for producing the article known in commerce as the balsam of Peru, of which from 15 000 lbs. to 20 000 lbs. weight are annually obtained. Another tree of almost equal value with the balsam is the cedar; large quantities are annually cut for timber. For administrative purposes the state is divided into four districts called from their chief towns—San Miguel San Vicente San Salvador and Santa Anna or Fonseca. The inhabitants had long the reputation of being the most industrious in Central America, and the state, in proportion to its size, is still the most densely populated. Pop. 280,000

SALVADOR (SAL, a to Central America, esp. above state, on an elevated plain terminated by a lofty mountain, lat. 12° 45' N. lon 89° 8' W. It was founded as early as 1528 as the seat of a bishop the seat of government, and of several important public offices, is tolerably well built, containing many good private dwellings and several churches, convents, and other handsome edifices possesses a well-furnished market, and has a considerable trade, particularly in indigo and tobacco. Pop. 28 000 April 16, 1854 it was completely destroyed by an earthquake

SALVADOR (SAL, CAT ISLAND, or GUANAKANI, one of the larger of the Bahama Islands; lat. (S. 20. point) 24° 9' N. lon 75° 27' W. It is about 86 m. long, and from 5 m. to 7 m. broad. Its E. side is bound by a reef, on which the sea continually breaks, and renders it inaccessible on the S.W. side is good anchorage. This island was the first land seen by Columbus on his first voyage of discovery in 1492. He landed on it on the 12th October in that year, and gave it the name of St. Salvador

SALVADOR (SAL, a city Brazil. See BAHIA.

SALVAGES (TIN) two separate groups of rocky isles, N. Atlantic, between the Canary and Madeira Islands, distant from each other about 8 m. in S. E. and S. W. direction with a safe passage between them. The N. E. group forms the Great Salvage, with its surrounding rocks. It is high and rocky and may be seen at a distance of from 34 m. to 27 m. The W. point of the island is in lat 30° 16' N. lon 10° 51' 20' W. The S. W. group consists of two islands called the Great and Little Piton, surrounded by rocks and reefs. The Little Piton is about 1½ m. to the W. of the Great Piton. The latter is in lat 30° 1' N. lon 16° 0' W.

SALVAGEON, a vil Spain Extremadura, prov and 27 m. N. Badajoz. It has a townhouse prison, granary three primary schools, a church, and two harangues in the vicinity manufactures of coarse frieze and sackcloth, lace and net, beehives and agricultural implements an oil and 17 flour mills and some traffic in agricultural produce, hams, and pork-sausages. Pop. 2098.

SALVATIERRA, two places, Portugal.—1. (do Estremoz), A. in par, prov Baixo-Alentejo 28 m. E. Castello-Branco r bank edge, which separates it from Spain. It is defended by a strong castle, and near it are mineral-springs, which are much resorted to. Pop. 900.—2. (do Mogro), A. in par, prov Estremadura, 18 m. S.E. W. Santarém, in an extensive plain between L. bank Tagus and the Boreira. It is regularly and well built, and has an hospital and almshouse. The Tagus both furnishes facilities for trade, which is of some extent, and employs a good many persons in fishing. Near it is a theatre and royal palace. Pop. 3140

SALVATIERRA, a in Spain Extremadura, prov and 18 m. S.E. Cáceres on a mountain slope, near the Tagus; with a church, schoolhouse, and endowed school, manufactures of linen several oil-mills and a trade, chiefly transit, in oil, corn, and hides. Pop. 1206

SALVATIERRA DE LOS BARROS, a vil Spain, Extremadura, prov and 28 m. S. Badajoz. It has a townhouse, prison, elementary school, church, and two harangues, and in the neighbouring hill-tops stand a Franciscan convent and ruins of a castle, belonging to the Duke of Medinaceli; coarse earthenware is made. Pop. 2069

SALVATORE (San), a tn. Italy, Piedmont, div. and P. m. N. W. Alessandria, beautifully situated among sloping vineyards. It was once fortified by bastions, of which part still remains; is the seat of a court of justice, and has two churches, a school and an old castle, seated on a lofty rock, and still in tolerable preservation. Pop. 5029.

SALVE, a tn. Naples, prov. Otranto, S. E. Gallipoli, on a hill; with a handsome church, and a Capuchin convent. Pop. 1350.

SALVIAC, a vil. France, dep. Lot, 14 m. N. Cahors with numerous towers. Pop. 1189.

SALWARFF, par. Eng. Worcester 1850 ac. P. 446.

SALY, a vil. Hungary, Hither Thien, co. Borsod, on the Raitzthal. 7 m. from Harghy with a Protestant and a R. Catholic church, and three mills. Pop. 1511.

SALZA, or **SALZACH**, a river Germany rises in the N. W. corner of the Pfanzgau, in the lofty mountains which separate Salzburg from the Tyrol. It flows almost due E. till it reaches St. Johann, then N. W. to the town of Salzburg. Shortly after leaving Salzburg, it receives on the left its only important tributary the Saale, and thence for pursuing first a W. N. W. and then a N. E. direction, forms the boundary between Austria and Bavaria till its junction with the bank Inn, about 7 m. above Braunau. It has a course of about 135 m., of which about 90 m., beginning at Hallein, are navigable.

SALZBRUNN (New Norden, and Osnab), three adjacent vils. Prussia, Steina, gov. and 87 m. S. W. Breslau. There are here six mineral springs, with a bathing establishment which is much frequented. About 2,500,000 bottles of water are annually exported. Pop. 2207.

SALZBURG (anc. *Juvavum*) a tn. Upper Austria, cap. circle of same name at the base of two precipitous heights on the Saale, 156 m. W. S. W. Vienna. Its site is so fine, that it is generally regarded as the most beautiful spot in Germany. It stands in a narrow defile half covered by the Hohe Alps, through an opening in which the Saale passes out to join the Inn. The rich fields and meadows through which the river winds, the wooded slopes and abrupt precipices on either side and the ridges of hills rising tier above tier till they are terminated and overtopped by the main chain of the Alps, form scenery which excites little by comparison with the finest parts of Switzerland. The town itself is not particularly attractive. It is divided by the Saale into two unequal

by Hagmann. Between the two appears stands the cathedral, a heavy Gothic structure, 410 ft. long, by 260 ft. broad, with a facade of white marble, a dome, and two towers. Adjoining the cathedral is the archbishop's palace, an extensive edifice, now partly used as public offices. In the same neighborhood is the collegiate church of St. Peter, with a monument to Haydn and a cemetery remarkable for the number of curious ancient tombs which it contains. Attached to this church is an elegant hall with a library of 49,000 volumes, and an extensive collection of coins, engravings and natural curiosities. The castle, already referred to, is one of the most interesting edifices, though it has long been dismantled, and serves only for barracks. In one of its towers is shown the torture-chamber with part of the infamous apparatus employed. The Protestants, who were ultimately to the number of 80,000 mercilessly driven out of the town are understood to have furnished numerous victims, the castle having been the residence of the archbishops, who were at the same time princes of Salzburg and of the German empire, and had temporal sovereignty over 300,000 souls. The continuation of the ridge on which the castle stands forms the Hohenberg, which is surrounded on three sides by extensive precipitous heights and has a flat summit of considerable extent laid out in fields and pleasant grounds, and well planted with trees, through the openings in which views of exquisite beauty over mountain and valley are obtained. Through the sandstone-brooks, of which the hill is partly composed, a tunnel called Sigward's Thor has been driven 416 ft. long, 22 ft. broad, and 89 ft. high. The manufactures consist chiefly of leather, ironware, cotton goods, and majolica. The trade both in these articles and transit is considerable and there are two important annual fairs. Salzburg is the seat of an archbishop, the seat of superior provincial courts and offices and possesses a library with an extensive and valuable library a gymnasium, several industrial and other schools, a physical and zoological museum, botanical garden and deaf and dumb institution lunatic asylum, large houses of correction theatre, and several hospitals. It is a place of great antiquity, and under the Romans had acquired an importance of which ample proof is still afforded by the antiquities which it contains. The Roman town was destroyed by Atila in 456. It was rebuilt by the dukes of Bavaria, but in 1180 fell a prey to the flames. It soon rose again, and assumed much of its present form, under a succession of archbishops-princes, who continued to govern it till 1805 when it was secularized with the extensive domains which belonged to it, and given first to Tuscany and then to Bavaria, from which, with exception of the territory of Berchtesgaden, it passed to Austria in 1816. Pop. (1848), 14,165.—The circle, called also the duchy of Salzburg, contains 2086 sq. m. is a rugged mountainous country intersected by numerous valleys, of which that of the Saale is the principal. These valleys are chiefly pastoral, but in many of them much corn and fruit are raised. Wood is abundant, and the minerals, which are very valuable, include gold, silver, lead, copper, cobalt, iron, salt, and marble. Pop. 146,507.

SALZBERGHELDEN a vil. Hannover gov. Hildesheim, 1 m. back Lüne, 4 m. S. E. E. Einbeck with a church, manufacture of woollen and linen goods, and salt works. Pop. 1000.

SALZE (Osnab.) a tn. Prussia, gov. and 8 m. S. E. E. Magdeburg. It is situated by three gates; contains a Protestant church a synagogue, two hospitals, and workshops for the province; and has a bathing establishment, and five mills. Pop. 2563.

SALZKAMMERGUT, a dist. Upper Austria, in the S. E. corner, between Salzburg and Styria, has, with the county of Oriz and the lordship of Traunkirchen, an area of 956 sq. m. It is crossed almost throughout by lofty Alps, is watered by the Traun, contains the beautiful Lake of Traun and Hallstätt, and from its wild and romantic character has received the name of Austria Switzerland. It has little fertile land, but rears great numbers of cattle; is well wooded, well supplied with game and fish; and is rich in minerals, in-

SALZBERGHELDEN.—From Salzburg District

parts, which communicates by a wooden bridge, above 570 ft. long and is surrounded by a wall with 10 gates. The greater part of the town is on the left bank, where it is overtopped by a lofty height, crowned by a magnificent old castle. Many of the squares are handsome and regularly formed, and the superabundance of marble employed in the construction of the houses has a striking effect, but the streets are narrow, crooked, and gloomy and in many parts have a deserted look from being grown over with grass. The two finest squares are the Residenz or Haupt-Platz, and the Domplatz. The former is adorned with a beautiful statue of white marble, 45 ft. high; the latter by a noble bronze statue of the Virgin,

including marble, coal, and more especially salt, of which about 85,000 tons are annually produced. The chief towns are Ischi and Landen. Pop. 16,000.

SAUKOTTEN, a tn. Prussia, Westphalia, gov and 44 m S.E.W. Münster. It is walled, has a R. Catholic church, postoffice, distillery, and salt-springs. Pop. 1604.

SAUSCHLIEF, a vil. House-Cassel, Ger and 10 m N.W. Zella, 1 bank Aisch; with salt-works and several mills. Pop. 1098.

SAUSCHLIEF, a tn. Germany, Lappe-Deinold, on the Saale, 10 m N.W. Deinold. It is walled, contains a church and a postoffice, and has valuable salt-springs. Pop. 1864.

SAUSCHLIEF, a tn. Saxa-Mansfeld, 1 bank Werra, 20 m N.W. Mansfeld. It is walled; has several courts and public offices, three churches, two hospitals, a postoffice, and the old strong castle of Schreyenburgh situated on a lofty mountain-top, and several tanneries, dye-works, and mills. Rock-salt is worked to some extent in the neighbourhood. Pop. 3077.

SAUSCHLIEF, a tn. Prussia, gov and 54 m N.W. Magdeburg on both sides of the Jemne with four churches, a chapel, synagogue, gymnasium, and several schools and manufactures of shoes, and woollen linen, and cotton goods. Pop. 939.

SAN BARTOLOME-DE-LEONARDO commonly called SAN ROY or REMOY, a vil. Spain, Catalonia, prov and 6 m W. Barcelona, 1 bank Llobregat. It has a two-house, prison, church, a castle commanding the town, and several schools; and manufactures of lace. Pop. (agricultural) 2501.

SANABURA an ml Hindostan. See SYKRA.

SANABURA, a small tn. Bolivia, dep and 70 m S.E.W. Santa-Cruz-de-la-Sierra. Around it are cultivated potatoes, oats, and excellent tobacco, in which last a great trade is carried on, and oxen sheep and a great quantity of mules and asses are reared. Pop. 1000.

SANABURA, a tn. Turkey in Europe, N. slope of the Balkan, in S.W. extremity, Bulgaria, 33 m S.E.E. Sophia. It is surrounded by an embattled wall flanked with towers and has fountains, and other iron-works supplied from mines worked in the neighbouring mountains. Pop. about 7000.

SANABURA, a vil. Brazil, prov Rio-de-Janeiro dist Cantagalo, beautifully situated near the Paqueta in a wild and romantic district. Its existence is of very recent date, but it has made rapid progress; and now contains a handsome church of stone, with a number of good houses clustering round it.

SANABURA, a peninsula and bay N.E. coast, in Hayti, republic of Santo-Domingo. The peninsula stretches W to E 34 m, in 11 m across at its greatest breadth, and is terminated at its E. end by Cape Samana lat. 19° 18' N, lon. 69° 38' W. Its highest peak, Sugar-loaf Hill, is 1986 ft., and Morue-du-Diable is 1800 ft. above sea-level. There formerly existed a water-communication across its W. end, separating it from the island of Hayti, which though now silted up, could easily be re-opened, so that what is now a peninsula was formerly an island. Its soil is extremely fertile to a great extent it is covered with timber suited both for ship-building and cabinet-work, and contains copper, gold, and bituminous coal. Pop. (1851), 1721.—The bay lies on the S. of the peninsula, is about 43 m. E to W, by about 8 m broad and at its W. end receives the Yuna, the largest river in the Dominican republic. It forms one of the finest harbours of the world, and may be regarded as a most important maritime position in reference to the trade of the Gulf of Mexico and the inter-oceanic routes across Central America, both in a commercial and military point of view. On its N. shore is the small town of Santa-Barbara. It lies in a high of a land-locked bay lat. 19° 18' N; lon. 69° 19' W; and has natural facilities for repelling or receiving vessels—a de-templated R. Catholic church, a neat Wesleyan chapel and a custom-house. Samana being one of the open ports of the Dominican republic, the government maintains here a garrison of about 350 men, and a colonel who possesses the chief authority in the place.

SANABURA, a bay, coast of Peru, between the bays of Camana and Ferrol lat. 5° 18' S. lon. 78° 35' 46' W. It extends about 8 m. between N.W. to S.E., with a width of 8 m., and is the most extensive harbour on the Peruvian coast N. of Callao. The S. side is formed by a steep bluff

headland of same name. The river Yaguna, though the largest and most rapid on the coast of Peru is unable to force its way to the sea, and terminates in a lagoon at the S.E. extremity of this bay.

SAMAR, an isl. Indian Archipelago, forming a prov. of the Philippines. It is washed on the W. by the Bayan Sea, and on the E. by the Pacific and is separated on the N. from Luzon by the Strait of Bernardino, and on the S. from Leyte by the narrow channel of San Juanico. It extends from lat. 11 to 12° 48' N. lon. 124° 20 to 125° 55' E., with a length of 147 m. and an average breadth of about 50 m. Though thickly wooded, the climate is not unhealthy and epidemics are unknown. It is abundantly watered and fertilized by rivers of considerable size as well as brooks. The mountains are lofty and rugged. In these iron-stone and gold are found, and copper is said to exist. The forests produce useful trees of various kinds, some resins, others used for ship-building. Although now so productive as it might be, with greater security from piratical attacks and a better government, the scanty population of this insignificant island cultivates coconuts for oil, rice, and excellent cacao. Samar produces also Manila hemp, wax, mother of pearl, pearls and tortoise shell indigo and to equal that of Guatemala and trapping. The palm oil is of bad quality. St Ignace mts are abundant and were once profitably exported to America. *Sucomags* and *rupes* are manufactured, and also wax, called *delagaga*, from a plant of that name. The inhabitants are mostly Melis (descendants of Spaniards by Indian mothers) they trade with the other Philippines and the Pulav Islands. Many Indians seek escape from the capitation-tax in the mountains, but there are no Negritos in the island. The province contains 28 pueblos. Its capital is Cebolagan, situated on a creek in the W. coast. It is built with some regularity mostly of wood and nipa, but the church and governor's house are with a few others, built of stone. Pop. 60,470.—(Mallet's *Les Isles Philippines*).

SAMARA, a gov Russia, 1 bank Volga, formed by a decree of December 18, 1850 and consisting of three districts of gov Orenburg two districts of gov Saratov and of the districts of Samara and Stavropol gov gov Samarkand. Area. 89,000 sqo sq m. Pop. (1846) 1,115,968.

SAMARA, a tn. Russia, gov same name, 650 m S.E.E. Moscow at the confluence of the Samara with the Volga. It contains two wooden and three stone churches and has manufactures of leather and soap and carries on an extensive trade, particularly in caviar, and fresh and salt fish, corn, wool lamb skins, and hides. Pop. (1851), 18,753.

SAMARA, two rivers Russia.—1. Rises on the S. frontiers of gov Kharkov enters gov Ekaterinoslav, flows e. circularly W.S.W. across that gov. and joins bank Dnieper a little above the cataracts which impede the navigation of that river and a little below the town of Ekaterinoslav. Its principal affluent is the Volchok which it receives on the left total course, about 170 m. It abounds with fish but the water is bad.—2. Rises in gov and about 80 m. from the town of Orenburg flows W. N.W. enters gov Samarkand, and running first N.W. and then W. joins the Volga at the town of Samara. Total course, about 200 m. Its principal affluents are on the right, the Uren Tok and Dol Kinet and on the left the Samarkand. Its banks are generally covered with fine forests.

SAMARANG, a seaport in Java, N. coast, prov of its name, 263 m E. by S. Batavia lat. (approx) 6° 18' S., lon. 110° 37' E. (n). It lies near the mouth of the Samarang river which forms a kind of harbour, but large vessels lie in the roads, in which there are 3 fathoms, about 2 m. off. The roads are defended by a mole, with five bastions. The town is walled, and tolerably well built, but the streets are confused and airless, and consequently very hot, and the houses being kept white-washed, the eyes are so severely taxed that nowhere in Java are so many blind and half-blind people to be met with. It is, however, a healthy place, for the malarial in the vicinity are kept fresh and sweet by being daily covered by the tide. Behind the town, the country rises rapidly to heights of considerable elevation. Samarang has a Protestant and a R. Catholic church, several mosques, a public school, an observatory, government offices, a law-office, a warehouse, a general hospital, and an hospital for old men. It has manufactures of leather and of cotton fabrics, and carries on a

considerable shipping trade, exporting coffee, coffee, sugar, indigo, &c. Through the numerous Chinese and here a considerable business is done with Borneo in gold and sil-

SAMARATE SCENE ON THE BANKS OF THE CANAL
From the Dutch D. L. de Vries to the East.

monies. Pop. (1846), 50,000. — The PROVINCE, bounded N. by the Java Sea, E. by Java and Rambang S. by S. Borneo and S. by W. P. Borneo and S. by S. Borneo, is 80 m. long, E. to W. by about 80 m. broad and is divided into the governments of Samarang, Bontak, Gohorapan and Kandal. It is a hilly but the coasts are low and marshy. It is well watered by the Boegiwara, Bodein, Kandal, Samarang, Turbaya, &c. and is very fertile in rice, coffee, sugar, tobacco, and indigo. Tigers and other wild animals are numerous and fowls, buffaloes, sea and river fish are plentiful. Pop. (1846), 536,000.

SAMARATE, a vil. and com. Austrian Italy prov. Milan, 2 m. S. Gallarate. It has two churches and a clerical endowment. Pop. 2457.

SAMARANG and **SAMARANG** a to. khand, and 100 m. E. by S. city of Bontak, in a beautiful and fertile valley well watered by streams from the N. slopes of Agakih Tan. It is nearly in the form of a regular quadrangle, surrounded by a wall in good repair with six gates, and defended by a citadel, which is situated on the W. side, and continued beyond the walls so as to form a suburb. The walls inclose an area of about 8 m. in circuit, but a comparatively small part of it is occupied by inhabited houses, the much larger part being covered with rice or occupied as gardens. Notwithstanding the ancient celebrity of Samarang, particularly in the time of Timur it is now insignificant, and has almost nothing in its modern structure to attract attention except its four concentric walls and its bazaar, which is of considerable extent, but only indifferently supplied. Bontak having earned off most of its trade. The principal objects of interest are the emperor's palace, situated within the citadel, and containing the celebrated blue stone on which every new khand must sit in order to have his title free from challenge; the coffin of Timur placed in a lofty octagonal edifice, crowned with a dome, and consisting of two apartments, the floors of which are paved with white marble slabs and the walls ornamented with gilding and inscriptions from the Koran; three madrasahs or colleges built by Timur each forming a handsome quadrangular edifice, with walls of porphyry mosaic, and minarets, nearly in a round state, at the angles; and several mosques attached to the madrasahs, and though generally in a ruinous state, exhibiting many traces of former splendour. Outside the walls, a little N. of the town, the palace of Timur still forms an extensive and magnificent ruin. The bazaar of Samarang is carried on chiefly on Tuesdays and Sundays, during which it is visited by great numbers of Arabs, Chinese, and gipsies. On other days it is comparatively lifeless, and seems not to have a population exceeding from 25,000 to 30,000.

SAMARANG, or **SEBASTIA** (modern, Sebastia), an iso. to. Palestine, formerly cap. of a prov. or kingdom, and finally situated among barren gardens and olive groves, on the low hill of some name, 54 m. N. N. W. Jerusalem. It con-

sists chiefly of a number of cottages, substantially built for the most part out of the materials of the ancient city, but contains several remarkable ruins, the most conspicuous of which are those of a church dedicated to John the Baptist, because according to tradition either the scene of his martyrdom or place of his burial. Samarang was built by Omri, king of Israel, about A.C. 925, and continued to be the metropolis of the ten tribes till they were carried away into captivity by Sennacherib about two centuries after, A.C. 720. After having been razed to the ground and again rebuilt, it was given by Augustus to Herod, who, in honour of the emperor, gave it the name of Sebaste, a Greek term equivalent to the Latin Augustus, surrounded it with a strong wall, and adorned it with many splendid structures. The province or kingdom of Samarang formed the central portion of Palestine, having Galilee on the N., Judaea on the S., the Jordan on the E. and the Mediterranean on the W.

SAMARRAH a to. Arabia Turkey, path, and 65 m. N. N. W. Bagdad, on a height above a bank Tigris. It is an ancient place, indebted for its only importance to two handsome tombs surrounded by cupolas, which annually attract about 10,000 pilgrims from all parts of Persia. Pop. scarcely 1000. Ancient Samarra was a much more important place. Its site and extent are indicated by heaps of ruins in all directions. **SAMARRA** a vil. and com. - lat. 34° 15' N. and 31° 15' N. W. Cagliari is a fertile but unhealthy plain, with a church and a monastery. Pop. 1783.

SAMATAN (anc. Samatana), a to. France, dep. Gers, 1 bank Save, 20 m. S. E. Auch, with manufactures of leather and bricks, and a trade in corn wool and cattle. Pop. 1324.

SAMBA CORRA, a vil. W. Africa. Bonten. between Bakel and Boulemane, lat. 14° 41' N., lon. 13° 25' W. with an earthen citadel and mosque.

SAMBAS, a state its cap. and a river, in Borneo. The river, on the W. coast, E. of Sarawak, is shaped somewhat like a triangle, each side which measures about 100 m. It is separated from Sarawak by the Krimbang Mountains, from which it slopes S. W. to the sea; and is watered by the Sambar its principal stream, the Selakoo, Bakawan, &c. It is fertile, and contains the richest gold-mines in Borneo, which are worked by a colony of Chinese. It is very populous, and is governed by a Mahometan sultan. — The town, near 1 bank Sambar, about 30 m. from the sea, about lat. 1° 15' N. lon. 109° 20' E. lies on a low marshy site, and is the seat of the sultan and of a Dutch resident, who has a small force for the protection of Dutch interests. The houses are raised above the ground on piles, and the sultan's palace is a large building surrounded by a sort of fortification. Many of the inhabitants are prahm. — The river rises near the N. frontier of the state, flows N. W. for about 50 m., then turns S. W., and enters the Strait of Carimata by a broad estuary after a total course of about 100 m. It is navigable as far up as Sambar for native vessels, and contains a good deal of gold in its sands.

SAMBATIKILA, a walled to. W. Africa, Mandingo country on the route from the coast to Jemba; lat. 0° 56' N. lon. 75° 20' W.

SAMBER, a to. Hindostan, prov. and 51 m. N. N. E. Ajmer city lat. 26° 58' N. lon. 74° 57' E. To the N. E. is a large salt-lake, 30 m. long by 14 m. broad, whence a considerable portion of Upper Hindostan is supplied with salt. It is collected towards the close of the hot season, without having undergone any artificial process, being found crystallized in large quantities under a layer of mud.

SAMBILANG, or **NIHA ISLAND**, a group of islands. Indian Archipelago, Strait of Malacca, off the entrance of the river Perak or Perak, about lat. 4° N. lon. 100° 50' E. They extend 7 m. or 8 m. N. E. and S. W., and are mostly small high, steep islands, covered with trees. The channel between the islands and the peninsula is deep, with soundings of 15 to 25 fathoms.

BAMBOANGA, **BAMBOANGAM**, or **NUEVITA BANCORANDE**, **PIRAN DE LIPARONA** a to. **PHILIPPINE ISLES**, on the S. W. extremity of Mindanao, lat. $8^{\circ} 54' 57''$ N.; lon. $118^{\circ} 5' 2''$ E. It occupies a low site on the shore, at the mouth of a small stream, and is, after Manila, the most important fortress which the Spaniards possess in the Philippines. It is built in the form of a square, with a bastion at each angle and has more

A STREET IN BAMBOANGA.—From Dumas 1747, Voyage au Polo Sud

over an inner enclosure flanked by four bastions which serves as a citadel, and occupies the only buildings of note. These are an old parish church in a dilapidated state, a new chapel, a governor's palace, and an hospital. The houses of the town erected on posts, formed of bamboo and covered with mats, are generally of very poor appearance. The district depending on the fortress is a kind of penal settlement, and though of considerable extent, does not produce sufficient food to maintain its inhabitants, cultivation being almost confined to some fields in the vicinity of the town. The anchorage of the roads is good, but becomes unsafe at certain seasons and there is no harbour. The want of it is in some measure supplied by that of Caldera, which is about 8 m. W. N. W., and may be considered as the port of Bamboanga.

BAMBOR, a to. Austria, Galicia, in an extensive plain, 1 bank Danube 45 m. S. W. Lemberg. It is well built has a N. Catholic and Greek united church, a gymnasium, a criminal court, and several district offices. It has some manufactures of damask, and a blacksmith. Pop. 6800.

BAMBRE (anc. *Saba*) a river which rises in France, in the forest of Haye Carigny near Fontenelle dep. Aisne, and proceeds N. E. to Landreville, then N. E. to Maubourguem, enters Belgium a little W. of Marais, prov. Hainaut, and proceeds to Charleroi. Here it turns almost due E. and reaching Namur by a long series of remarkable windings, thence it S. extremely, passes immediately beneath its citadel, and falls into the Meuse. Its whole course is about 120 m. Its navigable course, which commences at Landreville, is about 99 m., of which 45 m. are in France, and 57 m. in Belgium. The chief traffic upon it is in coal, wood, sandstone, and iron. It is well supplied with fish.

BAMBUCA.—1. A to. Bionly, prov. and near Girgenti, Pop. 8000.—2. (*della Montagna*) A vil. and par. Tuscany, camp Florence, about 17 m. from Pistoja, with a court of justice, a parish church, a castle, a school, and a trade in cattle. Pop. 1208.

BAMBUCCO, a vil. and com. Italy, Piedmont, div. Cogl near Vinadio, with two churches, and an oratory. P. 1412. **BAMER** (anc. *Palmer Montemare*), a to. Franco, dep. Franco-Cote, 8 m. S. E. Boulogne, on a gentle height overlooking extensive meadows with the remains of a celebrated abbey. Pop. 1627.

BAMBOAN ISLANDS. See **NAVIGATOR ISLES**.

BAMOCZIN, or **BAMOCZIN** a to. Prussia, prov. Posen, 200 and 28 m. W. S. W. Bromberg, in a fertile district, watered by the Netze. It contains a synagogue, and has manufactures of woollen cloth, the works, and a trade in cattle. Pop. 1845.

BAMOENS, a to. Franco, dep. Haute Savoie, prov. Faucigny in a valley r bank Giffre, 15 m. E. Bonneville, with a court of justice, several schools, and charitable endowments. Manufactures of linen and cotton cloth, and a trade in cheese and in cattle and wool. Pop. 3911.

BAMOGITIA an ancient territory, which formed a province in the kingdom of Poland and was bounded N. by Cowlard and the Baltic, W. the Baltic and Prussia, and S. and E. Lithuania. The greater part of it is now included in the Russian gov. Wilna.

BAMOR, or **BOMAM ADAM** an isl. Asiatic Turkey, S. side, Gulf of Scania-Nuova 45 m. S. W. Smyrna lat. $38^{\circ} 10' 47''$ N. lon. $28^{\circ} 53' 45''$ E. N., greatest length, E. to W., 25 m. central breadth about 12 m. It is separated from the coast of Asia Minor on the E. by a narrow channel, called the Little Bosphorus, not more than 2 m. wide and from Nikaria and the Fuzul Islands on the W. and S. W. by another channel called the Great Bosphorus, nearly 8 m. wide, and with its N. coast forms the S. side of the Gulf of Scania-Nuova. Its coast furnishes several good harbours, well situated for commerce, and its interior is traversed by two mountain ranges, mostly rocky and barren, but occasionally relieved by pine-forests while their lower slopes are covered with vineyards and olive-groves. The valleys are generally well watered and fertile, and present much beautiful scenery. Besides corn, fruit, and vegetables, the vine is extensively cultivated, and produces excellent Muscadine wines, which are much esteemed in the Levant and form the principal source of revenue. The minerals though not worked, include silver, lead, iron, heavy cobalt, and white marble. The last particularly abundant, as most of the rocks are composed of it. The principal towns are Vahie, which is situated on the N. E. side, and has a commodious harbour, and Cora, which is considered as the capital. This honour it owes to its occupying part of the site of the ancient Bamos, which was once among the strongest and most flourishing cities of Greece and is celebrated as the birthplace of Pythagoras. This island, known by the name of Samos of Ionia, to distinguish it from Samos of Thracia, an island near the Dardanelles, and Samos the Bishop, the present Cephalonia, is famed as the native place and favourite abode of Juno, who had here one of the most celebrated temples in the world. It was situated on Cape Colossaea, the most S. promontory of the island, and still marks its site by a standing column of white marble. Pop. about 20 000.

BAMOBONY a vil. Hungary, no Geograph. about 4 m. from Komlos, in a fertile district with a considerable trade in fruit and tobacco. Pop. 1137.

BAMOTHRAKI or **BAMOTHRAC** —1. An isl. Turkey in Europe, in the N. part of the Archipelago, 40 m. N. W. the entrance to the Dardanelles, greatest length, E. to W., about 14 m.; breadth, about 8 m. It is of a somewhat oval shape and very mountainous. One of its summits rises 2248 ft. above the sea. Its principal products are corn, oil, honey, and wax. It also feeds a considerable number of goats. On its W. coast are the ruins of ancient Bamos—the 2 (*Samos*), or *Samos*—One of the smaller Ionian Isles, 5 m. W. Corfu, and about 8 m. long.

BAMOYFIDIS, or **SAMOKOZOS**, a people inhabiting the shores of the Arctic Ocean, from the mouth of the Peleorus in the N. E. of gov. Archangel, to the Gulf of Katchuk, in the N. E. of gov. Yuzelsk. They consist of three principal tribes, speaking different dialects. Their origin is unknown, but they are supposed to have come from more S. regions, and have been erroneously confounded by the Russians with the Laplanders whose country called in the Lapland tongue Samandee, has probably given them their name. They are nomads, and live chiefly by hunting and keeping reindeer.

BAMOZERO a lake, Russia, in W. of gov. Olonok, 21 m. long, 7 m. to N. E., by 9 m. broad. It sends its waters into Lake Onega, by an affluent of the Shura.

BAMPER-DE-CALANDA, a to. Spain, Aragon, prov. Teruel, r bank Martin on a gentle slope between two hills, 45 m. S. E. Saragossa. It contains a parish church, hospital, and two primary schools, and has manufactures of linen, dyewoods, a flour, a tanning, and several oil mills. Pop. 1528.

SAMPYRE is in Italy Piedmont, div. Cuni, prov. and 17 m. W. S. W. Saluzza. It is in the most mountainous part of the valley of the Unica. It is tolerably well built, containing a number of handsome houses, and a square headed with porticoes has a court of justice, a handsome parish church, a public school, and a charitable endowment. P. 4985.

SAMPFORD par. England—1, (Drumell), Somerset, 1144 sq. Pop. 415—2, (Drumell), Somerset, 333 sq. P. 246—3, (Creston), Devon, 1948 sq. Pop. 1084—4, (Grove), Essex, 2224 sq. Pop. 908—5, (Laid), Essex, 1890 sq. Pop. 471—6, (Frover), Devon, 2000 sq. Pop. 855—7, (Spence), Devon, 1731 sq. Pop. 522.

SAMPSON (St.), par. Eng.—1, (or Poland), Cornwall, 1470 sq. Pop. 336—2, (Ld. Guernsey), Pop. 3006.

SAMBOE, or **SAM**, is in Denmark, near the middle of the Samsø Belt, 76 m. W. N. W. Copenhagen, greatest length, N. to S., 15 m., greatest breadth, about 4 m., area, 82 sq. m. Two bays belong on the W. side, and Florida on the E., which are only separated by a narrow isthmus, divide it into two unequal portions, of which the E. and far less, called Hørsholm, is better particularly along the N. W. coast, while the S. and larger is flat, and poorly provided with wood. The soil is very fertile, producing much corn particularly barley, and some peas, and rearing a good many cattle. Samsø, with the small islands of Kjøholm and Tønde annexed, forms a district of its own name. Pop. 5550.

SAMSON a vil. Hungary, Thierse, co. Bihar, about 6 m. from Debrecen, with a Protestant church, inhabitants chiefly employed in agriculture, and though nominally living in a village named Samson, occupy houses which are scattered over a considerable tract of country. P. 22 247.

SAMSON **SAMSON** or **SAMSON** a seaport in Anatolia, Turkey, push Straits, on the Black Sea, 166 m. W. N. W. Trabzon, lat. 41° 20' N. lon. 30° 25' E. At the E. extremity of the town, is a fortress now converted into a prison, and at the W. extremity is a capacious government store. The houses, though small are well supplied with merchandise. About their centre is a stone building, used as a retail market for the sale of manufactured goods, and there are, besides it, several warehouses and large stone-built khans. The local consump-

SAMUGHEU, a vil. and com., in Serbia, div. Ogulien, prov. Banat, on an affluent of the Tisza, 21 m. E. Orskan. It has a fine marble-quarry. Pop. 1560.

SAMULCOTTAN a co. Hindocost, presid. Madras, dist. and 28 m. E. by N. Raghunumy, lat. 17° 4' N.; lon. 83° 17' E. It is a healthy station, and has been selected as the chief garrison-post in the district. Its old fort was levelled in 1835.

SAN, **SAN**, or **SANA**, a river Austria, which rises in S. W. corner, circle Salmir in Gallia, in the N. slope of the Carpathian chain, near Sank, on the borders of Hungary, flows N. W. to Sank and then by a long circular bend, first N. and then E. reaches Przemysl. Here it resumes its N. W. direction, traverses a considerable portion of Gallia, and on reaching its N. frontier joins r. bank Vistula, about 8 m. below Sandomir. Its whole course is about 220 m., the first part of it as far as Przemysl over a rocky bed the narrow valleys, hemmed in by lofty precipitous mountains; the latter part of it through a level open country. Its chief affluents are, on the right bank, the Vise and Ulanow; and on the left bank, the Olsava and Walch.

SAN a river, Austria, Styria, rises in a valley near Mount Sankt, on the frontier of Styria, flows E. S. E. to Oml, and then nearly due S. to its confluence with r. bank Save, total course about 60 m. It is much wood, particularly below Oml, and furnishes water-power to a vast number of saw and other mills.

SAN ALDEMARINO a vil. and com. Italy Lombardy, prov. and 30 near the S. side of Brescia, as to be properly its suburb. It stands on a height, and contains a church with eight chapels. Pop. 2030.

SAN ANTONIO in Texas. See **ANTONIO-DE-BEKKAN** (San).

SAN BLAS, America. See **BLAS** (San).

SAN CIPRIANO a vil. and com. Italy Piedmont, div. Genoa, at the confluence of the Riva with the Verda. It consists of an upper and lower part and has two churches, one of them a handsome structure, an old castle, and a Capuchin convent. Pop. 3048.

SAN-CRISTOBAL, a lake, Mexico, forming one of five situated in the valley, is the immediate vicinity of the capital.

It is to the W. of that of Texcoco, into which it discharges itself, having a level of 12 ft. 6 inches higher, and covers an area of nearly 4 sq. leagues. A dam divides it into two basins—a N. called the Laguna di Xaltocan, and a S. called properly San-Cristobal. It contains several islands on two of which, in the N. division, the village of Xaltocan and Tlacotal have been built. The village of San-Cristobal stands on the S. shore.

SAN DAMIANO, a vil. and com. Italy Piedmont, div. Alessandria, prov. Voghera; with a church situated in a central square, and an oratory. P. 1160.

SAN DAMAZO, two places, Naples—1, A vil. and com., prov. Avellino, Ultra II, 11 m. E. E. Aquila; with these churches. Near it almonds and saffron abound. Pop. 2000—2, A vil. and com., prov. Calabria-Citer., 18 m. N. N. E. Cassano; with a R. Cathello and a Greek church, inhabitants almost all Albanians, for whose instruction and that of their countrymen throughout the kingdom, a college was founded in the vicinity by Ferdinand IV. Pop. 3040.

SAN DIEGO, a co. California. See **DIEGO**.

SAN DOMINGO (Island of); see **HAITI** (REPUBLIC) and **CRISTO**.

SAN DOMINGO, a vil. and com., dist. and 4 m. E. Parma, with a church, manufactures of cloth and paper; and a trade in corn, wine, silk, and cattle. Pop. 2084.

SAN FELIX-DE-BAGALL, a vil. Yucatan. See **BAGALL**.

SAN FELIX-DE-LERAN, a co. Mexico, Confederation, 1 dep. New Leon, 60 m. E. by E. Monterrey. Pop. 6000.

SAMPYRE From a sketch by Dr. G. F. Smith.

tion of foreign goods here is trifling but as a place of transit it is of great importance. The country inland, and the districts along the coast to the E. and W. of Samson, yield wheat, barley, maize, rice, hemp-cord, haxed, hemp, flax, hides, and bees wax, as well as large quantities of tobacco, and from the interior wool, silk, galls, gums, and grain are obtained. The roadstead is open, and reputed unsafe in winter by the native mariners, but foreigners entertain a more favourable opinion of it. Samson serves as an active coasting trade with Constantinople. Pop. 5000.

SANTER, or **SANTIVILL**, a co. France, gov. and 30 m. N. W. Paris, on a small affluent of the Marne. It has several courts and offices, a R. Cathello church, synagogues, and cattle; and manufactures of linen and leather. Pop. 3086.

SAN FRANCISCO-DE SELVA, a tn. Chili. See **CORTARO**.
SAN FETTUOSO, a vil and com. Italy. Piedmont, div. and E. Garca, in the valley of Susgno. It has a number of elegant mazzonis, belonging to the citizens of Genoa, and a handsome church. Pop. 8700.

SAN GAVI (also *Aspergum*) a tn. France. dep. Savoie situated at the confluence of the Grotte with the Rhone, 18 m. W. N. W. Chambery. It is tolerably well built, and has several silk mills, silk forming the principal trade. Pop. 1786.

SAN GIOVANNI—1 A tn. Italy. Piedmont. div. Turin prov. and about 18 m. S. W. Ivrea, at the foot of a hill crowned by a very ancient castle. It is a handsome place consisting of several spacious streets and three public squares. Has a court of justice, a beautiful public walk about 1 m. in circuit, four churches, and a superior school. Pop. 4656.—2 A tn. San diana Suavia, div. Novara, prov. Lombardy, in a plain between the Terdoppio and the Agogna, about 7 m. S. E. Mortara. With a court of justice, a church, a convent, the only one now existing in the province and a charitable endowment. Pop. 1634.—3 A vil and com. Parma, duchy and 8 m. S. E. Piacenza, in a plain on the Nure, here crossed by a wooden bridge. It has a fine old castle, a primary school and a trade in corn, cattle, and excellent wine. Pop. 8407.

SAN GIOVANNI BATTISTA, a vil and com. Italy. Piedmont, div. Geneva, close to *Peccat-de-Poentes* beautifully situated on a hill covered with vines. It has a handsome church. P. 1249.

SAN GIUSEPPE, a tn. Italy. Piedmont. div. Ivrea, prov. Ivrea, not far from San-Giorgio. It consists chiefly of a large circular square, lined with houses and laid out in walks, with a handsome church in its centre. Pop. 2481.

SAN ILARIO, a vil and com. Italy. Piedmont, div. Geneva, near Nervi, on a mountain slope. It has a parish church and a communal school. Pop. 1345.

SAN LUDOVICO, a group of isls. E. America, S. of Terra del Fuego, and about 30 m. from the mainland. It consists of a number of rugged islets and rocks, extending 6 m. from N. W. to S. E. and much frequented by seals and sea-gulls. They can only be approached in very calm weather. lat. (middle) 52° S., lon. 69° 19' W. (n.).

SAN JACINTO, a river Texas. See **JACINTO**.
SAN JACINTO OCOINGO, a tn. Mexican Confederation, dep. Chiapas, on an affluent of the Usumacinta, 70 m. S. N. E. Ocosingo. The inhabitants are chiefly employed in raising cattle, and cultivate cacao and corn. In the vicinity are some remarkable remains. P. 2000.

SAN JOAQUIN, a river California, which rises in Tulare Lake and the Sierra Nevada flows first S. W. through a fine valley into open plains, then S. W. for about 80 m. and in flowing gradually N., joins the Sacramento after a total course of above 300 m. It is navigable for a considerable distance by vessels of 2 ft draught, and abounds with salmon and other fish.

SAN JOSE, a tn. California. See **JOSE**.

SAN JUAN CHAKALA, a tn. Mexican Confederation, dep. Chiapas, on the frontiers of Guatemala S. of Ciudad-Real. Pop. 4080.

SAN JUAN DE LA FUENTE, a prov. tn. and river Peru. See **CHACAPOTAS**.

SAN JUAN DE NICARAGUA, a seaport in Central America. See **CHARTRETT**.

SAN MARINO, a republic in Italy. See **MARINO** (Italy).

SAN MIGUEL—1 A tn. Central America state Salvador, cap. dist. and on a river of same name, sometimes called the Riera, 80 m. S. E. San-Salvador. It is an ancient place, founded about 1630, and has many substantial and well built houses partly constructed of lava, quarried from streams which have issued from the volcano of San-Miguel, which stands at some distance to the S. W. of the town. The trade is wholly in indigo, for the cultivation of which the district is celebrated. Pop. 9000 to 10,000. The volcano which rises from low level ground to the height of about 5000 ft., has a base of several leagues in circuit, and has sent forth repeated discharges of volcanic matter at intervals of about 25 years, though none of serious violence have occurred in modern times.—2 A gulf, New Granada. See **MIGUEL**.

Vol. II

SAN PO, the principal river of Tibet. See **YANG TSANG** DO-TSU.

SAN SALVADOR, a tn. Cuba. See **BATIAN**.

SAN-SALVADOR. See **SALVADOR** (SAN).

SAN SEBASTIAN—1, A city and seaport, Spain, cap. prov. Guipuzcoa, on the side of Mount Urgull, at the extremity of a low sandy tongue of land washed on the E. by the Urola, here crossed by a bridge, and on the N. and W. by the Bay of Biscay and attached to the mainland only on the S. by a narrow isthmus, 42 m. N. W. Pamplona; lat. (summit Urgull) 41° 53' N. lon. 3° 19' W. (n.). It is a place of great strength both by nature and art, being surrounded by walls vaulted by the sea though partly left dry at low-water and otherwise defended both by outworks and by the castle of Mola placed at an elevation of about 430 ft. on the summit of Urgull. It is built in the form of an irregular pentagon and having been nearly destroyed by a conflagration in 1813, when it was taken by the British, consists for the most part of modern houses, arranged with considerable regularity in spacious streets and squares. The more important public buildings are the parish churches of San Maria and San Vicente both large irregular structures of three naves possessed of little architectural merit, a monastery, finely situated on a height overlooking all the other houses a suppressed monastery now converted into an arsenal a handsome courthouse with a Doric portico, navigation commercial, and elementary schools public baths, barracks, theatre, and civil and military hospitals. The manufactures comparatively insignificant, consist chiefly of cordage, stained paper, bear leather candles, and soap. The harbour is small exposed and difficult of access, and though once important has greatly decayed. Its principal articles are imports of colonial produce and salt-fish. San-Sebastian is a place of considerable antiquity and having by its early fortification become the key of Spain on the side of France, figures much

SAN SEBASTIAN.—From Lubbock's View in Spain.

in all the wars between the two countries. Of the numerous sieges to which it has been subjected, the most celebrated, and at the same time, the most disastrous, was that of 1813 when being in possession of the French it was stormed by the British with a loss of about 5000. The victors suffered their turn by fearful atrocities perpetrated, against without distinction, on friend and foe, and the greater part of the town was laid in ashes. Pop. 10,026.—2, A tn. Castile, capital Guisena, between three mountains on the E. shore. It is tolerably well built, is well supplied with excellent water contains a parish church with three naves; a courthouse, prison, primary school and suppressed convent; and has a good harbour, defended by two forts, manufactures of tobacco, an active fishery, and a trade in fruit, wine, and silk. Pop. 1694.—3 (de-los-Reyes) A vil Spain, New Castile, prov. and about 10 m. from Madrid, near the Jarama. It contains a church, courthouse, prison, and primary school. The inhabitants are almost all employed in agriculture. Pop. (agricultural) 1287.—4 A cape and bay, E. America, E. coast, Terra-del-Fuego, lat. 53° 18' S., lon. 68° 10' W. The cape is a bold cliff headland of a dark colour, terminating land

203

which rises to a height of 1000 ft. above the sea. The bay, situated between the cape and Aramus Point, forms a spacious and well-sheltered harbour.

SANA is an Arabian, cap. Yenna, and residence of an independent prince lat. 15° 23' N; lon. 44° 31' E. 15 days' journey N.E. by N. Mecca, and probably about the same distance due N. Aden. This is on many accounts the most interesting of Arabian cities. Its undoubted antiquity the superior civilization of its inhabitants its vicinity to the ruins of the great dykes at Mareh, the ruins of which constitutes so important an epoch in Arabian history; the fact that it was a city of the Sabians whose commercial greatness may be traced back to the earliest ages of history; these circumstances all combine to render it an object of attractive inquiry. The valley in which Sana stands has an elevation of about 4000 ft. above the sea. It is 6 in to 9 m. wide, extending N. as far as the eye can reach. E. it is bounded by a ridge of mountains called Jabal Nihum, rising about 1500 ft. above the plain. W. is the table land of Asmar about 1900 ft. in height, while S. it connects into a narrow valley called Turk-el-Yemen (Yaman Road). On the summit of Mount Nihum, E. of the town are the ruins of a castle, popularly said to have been built by Shams the son of Noah. On the hill of Ghurudif lower down, stands a modern castle, state prison, mint, and other buildings inclosed by walls with towers and other defences. W. of the town again are two royal palaces and gardens, with their separate walls and fortifications. The city approached from the S. is entered through the suburbs called the Bir-el Asah, in which is the Jews' quarter. The stranger on entering Sana is agreeably struck by the width of the streets, and their comparative cleanliness. A well-informed traveller (Dr. Seetzen) has declared that Sana is in many respects the handsomest city in the East. The houses indeed are crammed close together but they are massive, lofty and well whitened or painted. In his opinion, Constantinople has no advantage over Sana except in its mosques and minarets and were the 20 gardens of the latter city neatly inclosed and its streets paved it might be deemed pretty even according to the European standard. The wall inclosing Sana and the suburb of Bir-el Asah has a circuit of 5½ m. It has everywhere a mean appearance, being built of clay and in bad condition. The two palaces of the Imam with extensive gardens at the W. side of the city have

THE IMAM'S PALACE AT SANA.—From Col. Chesney's *Stephania Expedition*.

their separate walls and fortifications. The larger is called Bostan el Sultan, or the Sultan's Garden; the other which is the more ancient Bostan el-Matawakkil from the Imam's title Muti-wakil Allah (he who trusts in God). They are built of hewn stone and covered with a gray plaster and have the courtyards and windows whitened. Fountains, which ornament all the good houses in Sana, are not wanting in the palaces. In many of the houses the place of window-glass is supplied by small plates of alabaster joined neatly together but the windows of the higher classes are of fine Venetian stained-glass. A small river, dry in summer runs N. through

the E. side of the town, and is crossed by a neat stone bridge. On the E. side, at a little distance, flows a larger stream, the banks of which are covered with gardens and handsome villas.

Besides the Imam's palaces, Sana has several large public buildings, particularly baths and caravansaries, one of the latter of which, the Bimarsa el Mahdide, is three stories high and a handsome edifice. There are 10 minarets and a great many mosques the smaller of which built by the Turks are the most adorned. An aqueduct, which supplies the city with water from the mountain on the E., is also of Turkish origin. Sana is said to have been originally called Oud, or Udi, after its founder the son of Shams (Sennas x. 17), and the Jewish quarter while it was still a separate village, and not joined to the city by an inclosing wall, preserved the name of Oud. But at present there are few or no monuments of early age, or remains of ancient buildings in Sana. Building materials and space are so valuable, that ruined walls are speedily removed. A recent traveller (M. Arnaud) saw stones, with inscriptions built into a fireplace and into a doorway. Similar stones seen by Mr. Cruttenden who copied the inscriptions (see next Hentyarib) had been brought from Mareh, five days distant, to the N.E.

The climate of Sana is comparatively mild, owing to the elevation of the place while the people in the Tehama go nearly naked, the peasants in the hills of Yemen wear sheepskin jackets, and in the capital the better classes wear furs. During winter the nocturnal frosts are severe. Sana is expected three times a year—in January when it falls in small quantity in June when the harvest is over, and the swelling begins, and again at the end of July when the rain is heavy, and the hill torrents, swelling suddenly cut off all communications. But the general defect of the climate is the deficiency of rain which sometimes fails for several years in succession. The long-continued drought, always accompanied by swarms of locusts, is then followed (as in 1880) by pestilence and famine, which tend to disperse the people, or otherwise to produce revolutions.

The chief people of Sana are the merchants, who are generally wealthy and live in good style. Comparing Sana with other Arabs, they may fairly boast of still representing the Sabians whose merchants are praised. To European visitors they have uniformly shown the utmost kindness and hospitality. Although, as Zeffi, they are forbidden to smoke yet in private they indulge in tobacco as well as wine. They constantly chew *khat* (*Coffea arabica*), an exhilarant much used in Yemen) which they offer their visitors with *kafir* or the infusion of the coffee-bush for strangers to say, in the heart of the coffee country coffee is never taken as a beverage, being thought too heating. The *kafir* is said to be very palatable and refreshing. The lower class live chiefly on fruit, peaches, apricots, plums, &c. which are abundant. There are said to be 20 varieties of the grapes at Sana, ripening at different seasons, so that fresh grapes may be had there throughout the year.

The artisans in Sana are mostly Jews, who number about 2000 and live in a quarter appropriated to them exposed to much insult and extortion. They are the gold and silver smiths, they make the wine, distil the brandy and manufacture the gunpowder consumed in the country. Though much oppressed they are by no means indigent, and are on many accounts an interesting people. The Banyans in Sana are comparatively few, not above 150 perhaps, and are also subject to heavy exactions, yet they have the reputation of being extremely wealthy.

The staple article of trade in Sana is coffee which does not grow however on the high land round the city; the nearest place in which it ripens thoroughly is Hadif, a short day's journey to the S.E. Since the Turks have taken possession of Mecca, the coffee is warehoused in Sana, instead of being sent as hitherto to the former place. Dried fruits and resins, especially of the stamless kind, called in the East *Mahdide*, fine salt from Mareh, some camellins, gunpowder, and a few sword-blades of very inferior quality are the exports. The imports are chiefly pine-apples, Persian tobacco, and dates from Tehama, with a great quantity of thread or twist for

weaving Glass is in great demand, and is supplied through Egypt. The duties on importation are little more than nominal.

The Imam of Sanaa keeps what may be called great state. He goes to the mosque on Fridays in splendid procession, the gates of the city being closed in the meantime. But his real power is now fast very low. A great number of the sheikhs are continually dependent on him, neither pay him tribute nor hearken to his commands. The Turks, taking possession of the Tahrir, have deprived him of his seaports, and greatly impaired his revenue, so that the ruler of Yemem is hardly able to maintain a force of 2000 men. In 1888 the Imam Ali Mansur was deposed by a sudden revolution, directed by his uncle Sadi Kanne, who succeeded to the sovereign power.

About 5 m N W of Sanaa is the village of Bahah, which is much more clean and elegant than the city being the residence of the chief merchants, who retire to their country houses when the business of the day is over. Five miles W of Bahah is Wadi Dhar distinguished like the former for the excellence of its gardens and vineyards. The vines are trained on trellis-work 4 ft. high and cover a great extent of ground. The towns of Jeddah, half-way between Bahah and Ruma, supplies with vegetables the market of the latter place. Each of these towns or villages is governed by an emir who levies the taxes in the name of the Imam. The population of Sanaa and its suburban dependencies has been estimated at 70,000 souls of whom 40,000 live within the walls of the city. Could direct communication and intimate relations be established between Sanaa and Aden the results would not fail to be highly advantageous to both.—*Nebuk's Travels in Arabia, Christianism, in Jour of the Royal Geo. Soc. vol vii; Wolf's Missionary Journey*

SANAHUJA a town Spain Catalonia prov and about 41 m N N E Lerida, on the Riera di Sana. It is in a very elevated site, many of the houses having been ruined during the last civil war. It contains a church, an old Episcopal palace, a primary school, and an hospital and has a trade in corn, wine, oil, and wool. Some suppose the town to be the ancient Allanagla mentioned by Livy. Pop. 1037

SANGLLO, a vil Spain prov and about 80 m from Leon; with a church a primary school manufactures of linen and a trade in corn and cattle. Pop. 1089

SANCHEZ (see *Sanchez*) a town in France, dep. Cher pleasantly situated on a hill covered with vineyards 39 m N N E Bourges. It is for the most part poorly built has irregularly steep streets, almost inaccessible to carriages a good promenade, three tolerable squares several churches, a college and hospital a court of first resort, a communal college, and agricultural society, manufacture of hosiery and leather, and a trade in corn wine, walnuts, cattle, wool and marble obtained from neighbouring quarries. P. 2818.

SANCOINS (see *Freemantle*) a town in France, dep Cher on the canal du Centre, 34 m S E Bourges with a trade in corn, wood, cattle, and gypsum. Pop. 1487

SANCREED, or **SANCERY**, par Eng Cornwall 4471 ac. Pop. 1894

SANCT LEO a vil. Baden circle Lower Rhine near Philipshurg with a church. Pop. 1372

SANCTON, par Eng York (E Riding) 4706 ac. P. 619

SAND LAKE, a vil and township, U States, New York on the Postenkill and Wynnemkill creeks, 9 m E Albany with woollen and cotton factories, glass-works, a tannery, and several mills. Pop. 2563

SANDA, an isl. Scotland, about 9 m. off S.E. extremity of the peninsula of Kintyre, co. Argyre, 1½ m. long, and ½ m. broad. There is a good natural harbour between the island and the main. It contains the ruins of an old chapel dedicated to St. Columba. Sanda was a common place of residence of the Scandinavian Scots. Pop. 28

SANDALL (Gazett), a vil. and par England Yorkshire pleasantly situated on the S. side of the vale of Calder 2 m. S.E. Wakefield. It has a handsome church with a square unadorned tower in a walled school, some remains of an ancient castle which figures in English history, coal mines, and freestone quarries. Area of par., 7713 ac. Pop. 4038

SANDALL (Rice), par Eng York (W Riding), 990 ac. Pop. 329

SANDALWOOD ISLAND, or **JAKENDANA**, a large isl Indian Archipelago, G. Flores isl. (E. extremity) 10° 0' S

lon 120° 45' E. about 100 m. long by 80 m. broad. The S. point of the island terminates in a peninsula, almost as high and apparently as inaccessible as the rock of Gibraltar, having a spacious bay on each side of it. The other coasts of the island are generally bold, and no soundings are got until near the shore in some places. Edible birds-nest, bees wax, and sandal-wood are obtained here. The natives are described as treacherous and ferocious.

SANDAU a town Prussia, gov and 49 m N N E. Magdeburg on the Elbe. It is walled has a Protestant church, tile-works some shipping trade, and several mills. 1 1908

SANDAU, or **ZIANDOW** a town Bohemia, circle Leitmeritz, near Pölnitz, with a church, an hospital tile-works and a mill. Pop. 1078.

SANDAY, or **SANDA** an isl. Scotland one of the Orkneys, lying open on the W. to the Atlantic Ocean and separated on the N. and E. by the Bonadilly strait from the island of North Ronaldshay and on the S. from that of Burray, by a strait of about 2 m. wide, interspersed with several islands (l. Treaness, on E. coast) 59° 13' N. lon. 2° 18' 30" W (n). It is very irregular in shape having a length of 18 m. with a breadth varying from ½ m. to 3 m. has deeply indented coasts and a very bleak and generally barren surface. Pop. 800.

SANDBACH a market in and par England co. and 34 m. E by S Chester on an eminence, at the foot of which flows a streamlet called the Wheelock. It is amply supplied with water of excellent quality and is lighted with gas. The houses are mostly of red brick, and well built and in the market-place there are two minute obelisks. Sandbach possesses a handsome church in the Perpendicular style, chapels for Primitive Methodists, Old Methodists, Wesleys, and Calvinists a spacious grammar-school in the early English style a national school and other schools several charities including an extensive one called the Burdon charity. Boots and shoes are manufactured here to a considerable extent, though much more limited now than formerly. There are two large factories for silk throwing employing about 600 hands and several salt-works are carried on at a short distance from the town. Pop. (in) 2762 Area of par. 18 610 ac. Pop. 8533

SANDEBOUR par Eng Essex. See *Essexham*. **SANDELO** (Bany or Aco) a town Austria, Galizia, circle Sanden, on the Poprad, here crossed by a long wooden bridge, 104 m. W S W Lemberg. It has a deanery church a castle an educational institution, a manufactory, and a female school. Pop. 3060

SANDELPAY one of the Barra isls., Scot. See *Barra*. **SANDERS** (BHPN) a town Anhalt-Dessau, a bank Wip per, 28 m W B.W. Dessau entered by four gates, with a castle townhouse church, synagogue and hospital cypress and lime kilns and several mills. Pop. 1779

SANDESTEAD par Eng Surrey 8600 ac. P. 615

SANDFORD a vil. and par England, co. Devon, 2 m. N N W Crediton with a neat church surmounted by a low square tower and an annual cattle-fair. Area of par., 7738 ac. Pop. 1970

SANDFORD (Oxford), two pars Eng —1, Oxford 1600 ac. Pop. 593 —2 Somerset 1091 ac. Pop. 940

SANDGATE, a maritime vil England, co. Kent, 1½ m. W by S Folkestone. It is pleasantly and healthfully situated on the shore with hills immediately behind it. It contains principally of one long street formed by irregularly built houses with a neat cruciform chapel and a place of worship for Wesleyans. It is now much resorted to as a sea bathing place. Upon the heights above it is Sherborne camp.

SANDHURST, three pars England —1 Ox. Berks about 5 m. S. by E. Wokingham famous for its royal military college, which is a simple but majestic structure with a fine Doric portico, situated in the midst of extensive and picturesque grounds, and capable of accommodating 600 cadets, who here receive a complete military education area, 4562 ac. Pop. 615 —2 Gloucester 2227 ac. Pop. 494 —3 Kent, 4382 ac. Pop. 235.

SANDIACRE a vil and par England co. and 9 m. E Derby on the Erwasch and Derby canal, with a very ancient parish church, finely seated on a height; a Wesleyan chapel, and manufactures of starch and lace. Area of par., 1420 ac. Pop. 1055.

fully recognized in it, and less hampered by the influence of powerful ebbets, than in most other islands of the Pacific. The advantageous position of the Sandwich Islands making them a kind of connecting link between America and China, led to the early establishment of numerous European and American settlers, and the rapid rise of a very extensive trade. To the three principal whaling-grounds of the N Pacific—one on the Equator, another near Japan, and the third toward the Hebrides—they form a kind of common centre to the ships passing between them and hence Honolulu, the capital of the group, promises to become the entrepot of the N portion of the great ocean. One very remarkable circumstance connected with this group is the rapid decrease of its population. Cook estimated it at 400,000. Probably 300,000 would have been nearer the truth. In 1833, within the course of half a century it had diminished to 140,000. An actual census in 1832 gave only 130,810, and another in 1836, 108,579. In a census of 1863 the population numbered only 73,187. The decrease has thus continued without interruption since the islands were discovered and independent of the census, is proved by the quantity of job land now occupied but now lying waste from want of hands to cultivate it. One cause of the decrease is the number of young men who leave the islands in whalers and other ships, and never return, but the main cause appears to be the prevalence of measles, hooping-cough, and similar diseases by which in 1816 killed significantly the year of death, 10,000 persons are supposed to have been cut off.

SANDWICK par Scot Orkney 6 m. by 4 m. P 1107 SANDY, par Eng Bedford, 4010 a. Pop. 1948

SANDY a lake, U States, W S W Lake Superior in the Wisconsin territory. It is about 80 m. in circuit, receives the Neversink on the E and discharges itself into the Mississippi not far from its source.

SANDY three rivers N America.—1 Upper Canada, falls into Lake Superior 30 m. E Cape Chellous.—2 (Dig) U States, rises in the Laurel Mountains, and forms part of the boundary between Virginia and Kentucky and flows N N W into the Ohio 40 m. above the source. It has a course of about 180 m. and is 200 yards wide at its mouth.—3, (Little), U States, Kentucky falls into the Ohio.

SANDY BAY a vil Van Diemen's Land 1 bank Derwent on Backhouse Bay. It is large and strategic, but contains several neat residences with well cultivated farms and gardens.

SANDY Hook a sandy (al) or promontory U States, New Jersey 6 m. long by 2 m. broad near the entrance to New York Bay. There is a lighthouse on it.

SANDY LUCK, a river, L States, which rises in the N W of Pennsylvania flows S W and joins 1 bank Allegheny after a course of about 75 m.

SANDYMOUNT a maritime vil Ireland 50 and 8 m. S E by E Dublin S coast, Bay of Dublin with about 100 houses, many of which are handsome, and a church, in the Anglo-Norman style, of recent erection. The neighbourhood is much frequented in summer for sea-bathing. Pop. 1419

SANFELICE a vil and cne Italy Piedmont div Cune prov and 12 m. N Alba with two squares several elegant mansions and several churches. Pop. 1719

SANFRONT a vil and cne Italy Piedmont div Cune prov and 7 m. S Belmonte, in a valley 1 bank 10 with a court of justice, a church, a confraternity and a charitable endowment. Pop. 4115

SANG-KOT or TONGKUN BYEN, India. See TONGKUN SANGALHOB, a tn and par Portugal, prov Douro, com and 12 m. E Avaro 1 bank Agueda. Pop. 2160

SANGAMON a river U States, issues from a lake in E of Illinois, flows S W, then circuitously N W passing this town of Springfield, and joins 1 bank Illinois after a course of about 160 m. partly navigable.

SANGAR, or TUBAK, a strait communicating between the roan ocean of the N Pacific and the Sea of Japan, and separating the island of Nippon on the S from that of Yesso on the N. At the E entrance between Cape Rakme or Jesso in Yesso, and Suruga-haki, in Nippon, it is about 37 m. wide Matsuyama or Matsima, the capital of Yesso, is situated on a bay at its N W entrance.

SANGAY a remarkable volcano mountain S America, in the Cordillera of the Andes, state Ecuador, about lat 2° 7

S. It has a height of 16138 ft. and having been in a state of almost constant activity since 1738, has covered the surrounding district with lava and ash, making it almost sterile.

SANGREAL-SIS a tn. Prussia Saxony gov and 33 m. W N W Merseburg cap. cne, on the Elbe. It consists of the town proper surrounded by walls, with four gates and of two suburbs; contains two castles, two churches, two hospitals, and an orphan asylum. Has several courts and offices manufactures of linen, leather and earthenware, a copper-furnace, oil mill, and two salt-petre-works and a trade in corn fruit, and garden produce. Lignite is worked in the vicinity. Pop. (1846) 6238. —The castle, area, 234 geo. sq m. is generally flat, though occasionally broken by a few low hills, is watered by the Unstrut, Selke, Giesse, Tyra, and Wipper and is very fertile both producing much corn and rearing great numbers of cattle. Pop. 56,202

SANGILI, or SANGU, an Isl Indian Archipelago, Celebes Sea, lat 3° 38' N lon. 124° 44' E about 30 m. long by 10 m. broad. It is of moderate height in the N part, but mountainous northward where is situated the smoking volcano of Aboe. There is said to be a harbour on the E side formed by some adjoining small isles several of which are at a considerable distance from Sangir conspicuous to the S, part there are other islands. The W side is indented by several small bays, with soundings of from 40 fathoms to 80 fathoms about 1 m. and 2 m. off shore. Poverty, fruit, and vegetables are obtained here in abundance, and are readily exchanged for handicrafts, knives, &c. Pop. 12,000 Sangir is surrounded by about 45 small islands, called the Sangir Islands, some of which are inhabited.

SANGO a river Madagascar which descends from the range of mountains which traverse the island longitudinally flows N W and falls into the Channel of Mozambique about lat. 21° N after a course of about 160 m.

SANGORA a maritime in Lower Sum on a bay W side Grief of Sum lat 7° 10' N lon 101° 1' from the sea the town has an imposing appearance from the numerous pagodas everywhere visible. It is divided into a Chinese, a Samsa, and a Malay quarter that inhabited by the Chinese being the centre of trade and containing about 1000 people. There are many brick houses in the town, but built separate one from another each having its own party walls and the doors and windows being all covered with a black and mortar in order to prevent the spread of fire. The trade of Sangora is principally confined to junk and native vessels passing up and down between Sum and Singar 1st exports are iron dried prawns, and a little pepper.

SANGRO (anc Sagras) a river Naples, rises in prov Abruzzo-Ultra II near Gropa flows first 4.5 l then circuitously E. enters Abruzzo Ultra in a N E direction, forms part of the boundary between that prov and Samnium, and turning S W proceeds across Abruzzo-Ultra to its mouth in the Adriatic, 11 m. N E Ortona. total course about 80 m.

SANGUISA a tn Spain prov Navarra, 25 m. S E. Pamplona 1 bank Aragon in an undulating country. It has four large and three small squares streets generally straight and some paved a primary school an educational establishment, managed by Sisters of Charity in which there are about 200 girls a promenade on the banks of the river two churches, several suppressed convents, and an hospital Sanguesa is a very ancient, and has some Roman inscriptions and antiquaries. Pop. agricultural 2412

SANGUIN, a river W Africa, Guinea, Gambia Coast, falls into the Atlantic about 110 m. N W Cape Palmas

SANGLINETTO, a tn Italy gov Venice prov and 20 m. S S E Verona. It is well built and has two churches and manufactures of hats and a royal silk. Pop. 600

SANKABER a tn Hindoostan prov Bijapur 1 bank Hurrenasey, 230 m. S S E Bombay. It is a place of considerable extent, and has a remarkable temple of Mahadeva to which the town and adjacent lands belong. On a hill above the town is the fortress of Wullabghur.

SANKBY (GREAT) a vil and chapel England, co Lancashire, on the Banker, 8 m. W Warrington. It deserves notice for its canal which was constructed in 1755, and is the first which was cut in England for purposes of trade. P. 527

SANLUCAR-DE BARRAMUNDA a city and seaport, Spain, Andalusia, prov and 18 m. N Cadix, at the mouth on bank Guadalquivir lat 36° 45' N, lon. 6° 21' W amid a tree-

less, sandy undulating country and with a tropical but healthy climate. Its streams are broad straight, and generally paved, although rather badly and on the whole it is a fine town, although dull and decaying. The principal buildings are the prison, a barracks for the garrison, the town-house, an hospital, a house of refuge, a lending hospital, and poor-school, several establishments for primary and advanced education, the English hospital of St. George, a parish with two auxiliary churches, as well as some of various suppressed monasteries. There is also a pretty paseo, several fountains, and hermitages. Agriculture is here the chief occupation, at the same time that fishing employs a considerable number and it is the heart of the inferior and scattered villages which are located off in England as sherris but the *mangrove* wine is excellent and very cheap, the same describes its peculiar light champagne favour for it has nothing to do with the town of Montserrat on the opposite side of the river. At Bonanza a short distance from here, there are the pier and custom house. Sanlúcar was taken from the Moors in 1264, and granted by Sancho-el-Bravo to Juanan el-Bueno. The importance of the transatlantic trade induced Philip IV in 1645 to resume the city and make it the residence of the captain-general of Andalusia. It was here that Columbus embarked on his third voyage, on May 30 1498 and he returned in 1504. Magellan also started from hence August 10 1519 in the first voyage of circumnavigation of the world. Pop. 16,800.

SANTO LUCAS-LA MAYOR [see *LUCAS* Forum] a town in Spain, Andalusia, prov. and 13 m. W Seville, in an extensive plain, and surrounded with olive-plantations. It is built in form of a cross and divided into four quarters, with four squares good but badly paved streets, and houses of good construction. It has a town-house, granary Carmelite convent now converted into prisons, two hospices, various schools and academies, three parish churches an asylum for old women a foundling hospital and four hermitages, two promontories and several fountains. Pop. agricultural 22,845. **SANNA** a river, Turkey in Europe, rises in E. slope of a mountain range in Turkish Greece flows S-E. then S-W. then S-E. to the sea where it joins a bank line, after a course of 75 m.

SANNAZARO a vil. and c. in Italy, Piedmont, div. Novara prov. Verce is near the sea. It is built chiefly of a square, around which the principal houses are arranged among others a handsome little parish church. Pop. 119. **SANNAZZARO DEL BOSCONI** a c. in Italy, Piedmont, div. Novara, prov. Locatelli 19 m. N E Alessandria. It is well built, has a court of justice, three churches, and a public walk.

SANNO or *Sancto* a prov. Naples, bounded N by Abruzzo Ultra, S by which it is partly separated by the Sangro and Trigno, N W Abruzzo-Ultra W and N W Lavoro S. Principato-Ultra E Capitanata, from which it is partly separated by the Fortore and N E the Adriatic. Its shape is very irregular and it varies much both in length and breadth the former may average about 55 m., the latter about 40 m. In 1785 m. The surface has a general slope towards the N E but is on the whole mountainous, being traversed from N W to S E by the chain of the S Apennines and much broken throughout by its ramifications. This chain forms the great water-shed of the province and divides it into two very unequal basins the smaller belonging to the Tyrrhenian Sea which receives its waters indirectly by the Volturno and Tamaro and the larger belonging to the Adriatic, into which its waters are directly carried by three almost parallel streams—the Trigno, Siferno, and Fortore. The sides of the mountains are covered with fine timber or rich pasture, and the valleys and plains are of great fertility producing in abundance corn, maize, millet, rice, also much oil fruit and wine. The mode of culture are very indifferent, and manufacturing industry has made very little progress. The domestic animals are generally of inferior breeds; horned cattle are not numerous, the principal stock consists of sheep, goats, and swine. The raising of bees is an important branch of economy. The inhabitants are generally in poor circumstances, and both theft and murder are said to be more frequent than in any other Neapolitan province. Sanzio is divided into three districts—

Campobasso (the capital) Isernia, and Larino subdivided into 88 circondari and 185 communes. Pop. (1850), 800,549. **SANOK**, a tn. Austria Galicia, cap. circle, in an extensive plain, 1 bank San 86 m. S W Lemberg. It is poorly built, for the most part of wood; has district courts and offices a church, and high school, and an important cattle-market. Pop. 1800. — The circle bounding S on Hungary area, 1824 sq. m., is traversed on the S. by ridges of the Carpathians generally well covered with wood, but flattens down in other directions into a thin sandy saline surface. The San traverses it centrally. Its most important mineral is salt. Pop. 217,800.

SANQLHAR, a pavl and man bor. and par Scotland, co. and 24 m. N N W Dumfries, in the hollow of a parallel range of hills of no great elevation, a short distance from the Nith. It consists of one principal street extremely irregular, and but indifferently kept. The houses are in general well built or freestone, obtained in the neighbourhood and it has an Established and a Free church, two U Presbyterians churches, and a Cameronian and a Baptist meeting-house, two schools, a reading-room, and an excellent library. There is here a carpet-factory but the chief employments are handloom weaving and woolen-dyeing the latter by females. It unites with Dumfries, &c. in sending a member to Parliament. Pop. (in.) 2861 Area of par. 59,529 ac. Pop. 4071.

SANSANDING—1 A m. N Adriatic, 1 bank John, 15 m. N E S. and 85 m. W by S. Japan has an extensive and active trade particularly in silk. The market place is an extensive square, constantly crowded with people, where the different articles are exposed on stalls abated by mats from the heat of the sun. Pop. 11,000. — 2 A vil. W Adriatic Bondon 1 bank Talest 1st 13 45' N 100 12' 30' W It has an appearance of great poverty and it is no uncommon thing to see wild boars walking the streets without molestation from the inhabitants, who pay too dear for their powder to waste it in the destruction of an animal whose flesh they are forbidden to eat.

SANSIGO an vil. Austria, in the Adriatic near the entrance of the Gulf of Quarnero, 56 m. S W Fiume. It is a low sandy site with a light but not unfavourable soil. The principal village which bears the same name, seems from the remains found near it to have been the summer-residence of some Roman of consequence. Pop. (vil.) 700 (in.) 938.

SANSELE, a tn. Spain at Majorca, N E Palma with two squares, in one of which, forming the centre of the town, stands the town-house and parish church. It has manufactures of ordinary linen, and some flour-mills. P. (agricultural) 3977. **SANSA**, a river Pura rises in W slope of the Andes, 55 m. N W Cuzcoambo near lat. 5° S, flows first N W parallel to the mountain chain then W past the town of Santa and after a course of about 250 m., falls into the S Pacific Ocean.

SANTA ANA a tn. Central America state and 37 m. W N W Salvador dep. Zomonte in a fertile district in which much sugar cane is cultivated. It has a hot and half ruined appearance, having been the scene of some conflicts between the troops of Salvador and Guatemala, but has a considerable trade in lump-sugar remarkable for its whiteness and hard ness. Pop. about 6000.

SANTA BARBARA a tn. Brazil prov. Minas-Gerais, at the source of the river of same name, 40 m. N N E Ouro-Preto with a church, and a considerable trade in sugar. The gold-mines of this district, once important, have ceased to be productive. Pop. (dist.) 4000.

SANTA CLARA, an vil. Spain Bay of Biscay, at the mouth of the creek of San Sebastian, prov. Guipuzcoa. It is of an oval shape, and presents steep and almost inaccessible cliffs to the sea. It was partly fortified during the Peninsula war but being commanded by Mount Urgoiti, is not capable of successful defence.

SANTA-CLARA, or *AMONTAJADA* an vil. Ecuador, at the entrance of the Gulf of Guayaquil. It has an elevated surface, and from several points presents the appearance of a gigantic shrouded corpse. To this it owes its name of Amontajada, or Amerto. There is a lighthouse upon it, with a fixed light 120 ft. above the sea, and visible in clear weather at the distance of 18 m.

SANTA COLOMA DE FARNES, a tn. Spain, Catalonia, prov. and 12 m. S W Gerona, at the foot of a mountain. It has a

spacious square, with arcades on one side; a church, chapel, and refectory convent, and a flour-mill and two glass works. Pop. (agricultural) 8180.

SANTA COLOMAL DE QUERÁ, or **SANTA MARIA DE BELLOSCA** a *tu. Spain*. Cantabria, prov. and about 28 m. N. Terragona, with a church, seminary, old castle, primary school, and hospital; manufactures of cotton cloth and cotton twist, and a trade in fruit and cattle. Pop. about 2000.

SANTA CRUZ, a *tu. Austria*. See **HILDEBRUNN**.

SANTA CRUZ, *Isl. W. Indies*. See **CAUS (SANTA)**.

SANTA CRUZ—1, A seaport in Morocco. See **AGADIR**.—2, A bay, S.W. coast, Africa. See **ANDRA PEQUEÑA**.

SANTA EUGENIA a *tu. Spain*, in *Isl. Mallorca*, on the side of a mountain of same name. It contains a parish church and a primary school; and has several mills, and a trade in corn, oil and wine. Pop. 1169.

SANTA FE, several places America. See **FE (SANTA)**.

SANTA GUZBERTA a *tu. Sardinian States*, div. *Alghero*, prov. *Voghera*, with a court of justice, a church, and four churches. Pop. 2070.

SANTA ROSA—1 A *tu. Chili* prov. *Aconcagua* 66 m. E. by N. *Valparaiso*, 1. *hark Aconcagua*. Pop. 6000.—2 A *tu. Mexico*, dep. and 40 m. N. *Cobahilla* and esteemed one of the most healthy situations in the department. It has fruit in abundance, and excellent water. Near it are some rich silver-mines. Pop. 4000.

SANTA RITA, or **CRISTO** a *tu. Brazil* prov. and 280 m. W. N. W. *Bahia* a *bank São Francisco* with a court of justice a church a primary school and a comfortable trade in salt obtained from salt-mines in the district.

SANTAELLA, a *vil. Spain*, *Andalusia*, prov. and 20 m. S. S. W. *Córdoba* with a townhouse prison, ancient castle, two primary schools, a church, and several fountains some mineral sulphureous springs discovered in 1828 and much resorted to a brewery distillery oil and flour mills, and potteries. Pop. (agricultural), 1048.

SANTA FÉ a *tu. Spain*, *Andalusia*, prov. and 7 m. W. *Granada*, a somewhat marshy place in the vega of *Granada*. It has straight but badly paved streets a large square in the centre of the town, in which stand the town house, granary prison and hospital; symmetrically disposed two primary schools, a church of the *Doña* order with three naves and a semicircular convent. Santa Fé was built by Ferdinand and Isabella which besieging Granada, and the death of capitulation was signed here. It was also from this place that Columbus set out on his first voyage of discovery, after having at length obtained the royal sanction. In 1806 it was much shattered by an earthquake. Pop. (chiefly agricultural) 4172.

SANTAGNY a *tu. Spain* *Isl. Mallorca* 29 m. S. E. *Palm*. It contains about 1160 houses but in the N. and S. there is a great number of hamlets and mills scattered at short distances from one another which add greatly to the apparent length of the town. Near its centre stands an old fortress, which served as a protection against the frequent attacks of the Algerine pirates. It has a school for primary and advanced education, and an elementary school for girls a townhouse, prison, fish-market, fish-market, and a solid and spacious church, brewery distilleries, and flour-mills. Grain and fruit are exported. Pop. 5214.

SANTANDER, a maritime prov. Spain bounded, N. by the Bay of *Biscay* E. by prov. *Biscay* S. E. *Burgos*, S. W. *Palencia*, and W. *Oviedo* area, 9408 sq. m. It is surrounded on all sides but the N. by high peaked mountains in which the *Dura*, *Carro*, *Nansa*, *Saga*, *Bosca*, and other streams take their rise and which abound in forests, whence timber is obtained for building and other purposes. Between them lie fertile valleys, which produce all kinds of grain especially maize, fruit, and vegetables, and afford pasture to every description of cattle. Besides mines of iron, argenteous lead, and other metals, there are various quarries of limestone marble, and gypsum, and in the neighbourhood of the capital *Santander* are beds of plastic clay. In different parts of the province also are found mineral-springs, some of which have considerable medicinal properties. The principal sources of wealth to *Santander* are its extensive forests and iron-works, besides which a considerable number of people are employed in catching and curing fish, manufacturing leather cotton stuffs, implements of tillage butter, &c.; but trade of all kinds is greatly hin-

dered by the want of good roads. The people of this province are sober peaceable, and industrious. They stand higher in point of education than most other provinces of Spain but have a marked tendency to litigation, arising perhaps from the nature and subdivision of property. Pop. 194,000.

SANTANDER (*Portus Blandani*) a city, Spain, cap. above prov. 207 m. N. *Madrid* lat 43 38' N. lon. 4° 41' W. on the E. tongue of a headland and protected to the N. by a hill in a large and secure bay in the Bay of *Biscay*, with good anchorage and shelter but which requires constant efforts to prevent the accumulation of deposits brought down by three streams which discharge into it. The mole is a handsome construction 760 yards long, with unfinished docks, embracing a circumference of 808 yards. Scarcely a trace of the ancient walls of *Santander* is to be seen, and the city now extends far beyond its circuit. It may be divided into the high and low town, and the latter into two portions the old and the new. In the more ancient quarter the streets are narrow and straight, and the houses lofty while in the modern the streets are spacious as well as straight, and the houses of moderate elevation but good architecture. There are 10 squares large and small, a townhouse and prison, theatre, shambles, baths two public markets, three processions, and an elm-planted road surrounding the entire city.

There is also a handsome hospital for the sick, an asylum for the indigent, a founding hospital a custom-house an educational establishment called the Provincial *Cantabrian* Institute, with professors of mathematics, Latin, experimental physics and chemistry, natural history general history with that of Spain, religion and morals rhetoric and poetry French English geography navigation commerce, and de sign a normal school, and numerous primary schools. *Santander* is a busy thriving and at the same time a cheap and well provided place, the fish both of sea and fresh water are plentiful and excellent. A line of steam vessels plies between *Nolaga* and *Havre* which touch here as well as at *San Sebastian*, *Coruña*, and *Lisbon*. It has a cigar-manufacture in the suppressed nursery of *Santa Cruz* in which 1600 persons are employed and about 800 000 lbs. of cigars are made yearly a sundry brewery coopersmiths fish curing establishments tanneries besides manufactures of refined sugar sugar-candy, wax and tallow candles, vermilion hats, &c. In 1847 834 vessels entered the port, tonnage 88 636 and 747 000 G. R. 1848, cleared. The imports consist chiefly of sugar brandy cacao hides coffee dye-woods dried cut, wrought iron tin plates oil, rice, bar-tron figs and raisins &c. and the exports, of flour rice, hides, wheat, maize, nails, gypsum, pulse, kidney beans, brandy, &c. *Santander* has prospered at the expense of *Bilbao* for during the civil wars the merchants removed their establishments to this less disturbed district. Here, as in *Bilbao*, porters work is done by women. The bay and port were much esteemed in the early periods of Spanish history. It afterwards decayed into a mere fishing town but rose when made a *puerto habilitado*, or port entitled to trade with S. America, and it still supplies Cuba with corn from the Castles, bringing back colonial produce. Here *Charles V.* landed, July 16, 1522, to take possession of Spain and from the same quay our *Charles I.* embarked to quit Spain after his romantic visit to *Madrid*. *Santander* was sacked by *Scott* in 1808. Pop. 16,222.

SANTANDELL, a river, Mexico, proceeds from some small lakes, state *Zacatecas*, whence it flows E. until it enters the state of *Tamaulipas*, when it runs N. E. then E. and falls into the Gulf of Mexico, lat. 23 46' N., lon. 98 6' W. after a course of about 200 m. above 100 m. N. *Tamaulipas*.

SANTANILLA, or **SWAN ISLAND**, two *isls.* Caribbean Sea, at the entrance of the Bay of Honduras, lat. 17° 35' N. lon. 83° 50' W. They are situated on a bank of 5 fathoms, which stretches 5 m. to the W. of the western island.

SANTANILHÉM, a *tu. Brazil* prov. *Pernambuco* bank Amazon, at the confluence of the *Tapajós*. It is well-built and thriving place, and has a considerable commerce with *Pernambuco* and the countries on the *Tapajós* and Amazon, and even with the towns in the valley of the river *Essequibo* in *Peru*, especially *Tarapoto*. Pop. 3000 to 4000.

SANTARHÉM (*anc. Prætorium Julianum*) a *tu. Portugal*, prov. *Entre-douro* on the slope and crest of a rugged hill, a *bank Tagus*, 46 m. N. E. *Lisbon*. It is divided into three

quarters and is generally well built but many of the houses have been allowed to become ruinous. It contains 18 churches, seven monasteries, two monasteries, a diocesan seminary, two Latin schools, an orphan asylum, a hospital and other benevolent establishments, and carries on a considerable trade with Lisbon, chiefly in oil grain and wine. There are many interesting antiquities in the town, and the district around is remarkable for its fertility. Pop 7862

SANTIFRANCO a vill and com. Belgium prov E. Flanders, on the IJzer 21 m. S.E. Ghent. It has manufactures of linen two flour mills and a trade in corn. P 1353.

SANTO a river U. States. See CATANA.

SANTO a river Italy rises in comp. Florence Tuscany flows E. then N.E. enters the Pomapio, and after a course of about 70 m. joins the Podo-l-rnaro a little N. of the lagoons and 12 m. W. of the town of connection.

SANTO an old fort. France which belonged to the P. and is now built on the E. part of the fort.

SANTO a vill and com. Italy. F. Lombardy, div. Novara, prov. and 18 m. W. of Verceil in a fertile plain near the canal between Isonzo and Verceil. It is an ancient place, consisting of three square fortresses and a public walk, and has several churches, a college and superior school, a townhouse, and theatre. Pop 4174.

SANTIAGO or COMPTONVILLE a vill Spain Galicia, prov. and 22 m. S. Orense, picturesquely placed on an eminence, with an uneven and irregular site. The houses are generally three stories and well built streets for the most part broad and paved. Many of the latter radiate from the cathedral, which occupies the centre of the city. It is a damp, cold, sombre looking place. (In the noble Plaza or square the bull fights take place and fireworks are set off especially on the day of Santiago (St. James the Elder) the patron of the city and of Spain. Among the public edifices are the cathedral dedicated to Santiago, completed in 1123 well preserved and very attractive interior. The episcopal palace the hospital a grand building the townhouse built after the plan of the royal palace at Madrid with a fine equestrian statue of Santiago on its facade the college of Fonseca, now suppressed the enormous convent of St. Martin, partly overhanging a ravine, and with a fine garden it was once one of the wealthiest of the Benedictine establishments now it is a barracks and to chapel a parish church the university a heavy building with an Ionic portico but with a fine tower in the middle dome. In it is taught theology jurisprudence and medicine. It is much frequented as the minor colleges have been suppressed and incorporated with it. There are altogether two colleges and 15 parish churches various nunneries, numerous suppressed convents, which were plundered by the invaders in 1809 and now untenanted and ruinous, add to the melancholy appearance of the town. Clinics and hospitals, public and ecclesiastical prisons a granary numerous schools for elementary and advanced education which which Santiago is better supplied than any place in Galicia a college of advocates, theatre and besides the hospital above mentioned various other benevolent institutions. The town is well supplied also, with provisions and furniture, and washed by two small streams the Bar and the Baralla there are also mineral springs in the neighbourhood. It has manufactures of leather numerous handlooms, flour-mills and many almshouses, engaged in making great numbers of little green images, trinquets, and laces, as well as medallions of Santiago which are purchased by pilgrims. Santiago declined after the Reformation, which diminished the number of pilgrims, offerings, and legacies, and the removal of the captain general and the audiencia to Coruña has completed the impoverishment, by taking away the military the legal profession and clerical. Pop. about 30,000.

SANTIAGO several places, S. America. — 1. A vill. Ecuador prov. and 150 m. N.E. Juncos-de-Brazos, at the junction of the Santiago with the Marañon. — The river, formed by the junction of the Puta, which rises near Cuenca, and the Zamora, flows E.S.E. and has a total course of above 240 m. — (Porto) A. in Ecuador, prov. Imbabura, on the Santiago, 50 m. N. Quito. The river rises near Ibarra, flows N.W., and falls into the Pacific in Salinas Bay lat. 1° 30' N. total course, about 80 m. — 2. A. in Bolivia, dep. of Misiones, 270 m. E.S.E. Santa-Cruz-de-la-Sierra. — 3. A. in Paraguay cap. dep. of its name 140 m. S.E. E. Assumption.

SANTIAGO, several places Mexico. — 1. A vill Lower California, on the Gulf of California, 40 m. N.E. Cape St. Lucas. — 2. A. in dep. Jalisco, 135 m. N.W. Guadalajara. — 3. (Rio-Grande-de) A. river, Mexico, dep. Jalisco. See TOLOTEPEC. — 4. A. vill, dep. Vera-Cruz, near Jalapa.

SANTIAGO a vill S. coast, Isl. Tenerife consisting of very indifferent houses built of wood and mud with a parish church. The inhabitants live chiefly by fishing. Pop 1097.

SANTIAGO or ATACAMA a Central America, state and 20 m. N.W. Guatemala, on the shores of the large lake of Atitlan (which see) with manufactures of woollen and cotton goods and a trade in agricultural produce. Pop about 2000.

SANTIAGO or St. Jago, the largest of the Cape Verde Islands lat. (E. point) 16° 1' N. lon 23° 30' W. (w.) about 55 m. long by 17 m. broad. It rises in the centre to 7400 ft. and although the coast presents little that is attractive, the interior country is exceedingly beautiful presenting numerous fertile valleys. Fruit is abundant, including oranges, grapes, plantains, bananas, sour-sops, mangoes, apples, pineapples, guavas, guineas, sapodillas, papaw-apples, pineapples, melons, medlars, figs, and occasionally apples. Large crops of corn are also obtained. Vegetables of various kinds are abundant in clear seasons. Wild guinea-fow are found in flocks, and there are wild-cats in the unfenced parts of the island. Some turkeys, and pigs are very plentiful.

From August to October is the rainy and sickly season excepting this period the wind is always N.E. and then the sky is clear and the sun very powerful. In estimated at 20,000.

SANTIAGO two places, Cuba. — 1. (de-Cuba) A. on port in S.E. coast lat. 19° 57' 30" N. lon 76° 54' 45" W. at the mouth of a small stream of same name. It is the oldest town of the island, is well built, consisting of a handsome square and a number of straight and regularly formed streets, lined with houses constructed for the most part of stone, is the seat of an archbishop, and has a fine cathedral, and several other churches, some convents and hospitals and a harbour which though difficult of access from being narrow and crooked at the entrance, is spacious and deep within and defended by several strong forts. Its trade is considerable, both with Europe and America, but has declined much since the rise of Havana. Pop about 12,000. — (de-la-Pages) A. in, 19 m. S. Havana. Pop. 5500.

SANTIAGO or CHILÍ a prov. Chile extending from the Coast to the Coast between the N. to the river Maipo and Itata in the S. about 120 m. long, and 114 m. broad. It embraces some of the richest valleys in Chile, and agriculture is here in a more advanced state than in any other part of the country. It yields in abundance every kind of grain, pulse vegetables and fruit the grape, almond and olive grow luxuriantly everywhere, and require little or no care they are among its most valuable productions. Hemp of excellent quality could be easily raised, but the cultivation of this plant being deemed less remunerative than that of many others it is grown only for the consumption of the district. Tobacco in like manner finds here a congenial soil and climate but as it happens that the state derives a large revenue from the monopoly of the article, its cultivation is strictly prohibited throughout the land, and all that is consumed is imported from foreign countries. The rearing of cattle is another lucrative branch of rural industry besides supplying the wants of the province, and that of Valparaiso, a large quantity of jerked beef is prepared for exportation to the mineral districts of the N. and indeed to every part of the coast. California, by opening a new outlet for the productions of this province, has done much for its prosperity and the railway now (1854) in course of construction, intended to connect it with Valparaiso and Antofagasta, will tend still more to develop its natural resources. There are some valuable mines of silver and copper, iron lead and many other metals are found also, but the first two only are thought worthy the attention of the miner. The province of Santiago is supplied with foreign commodities through Valparaiso, which is also the outlet for the various exports consisting of grain, flour, pulse, hides, tallow, cattle, dry and preserved fruits, jerked beef, gold, silver and copper. The Maipo is a mountain torrent, passing through the capital and, during the heavy rains of winter frequently overflows its banks, causing extensive and disastrous inundations. It loses itself in a sandy bed a little to the W. of the city and re-appears, after a while, purified as it were, and free, in a

great measure, from the slumy matter it formerly carried with it by and by it unites its waters with those of the Mapocho, a stream issuing like itself from the Andes and like it, also swift and turbid. The latter traverses a great part of the province, and, after fertilizing the beautiful valley of Rancagua, suddenly turns W. towards the coast, and ultimately falls into the Pacific a little to the S of Valparaiso. Within that portion of the Andes that runs through the province, is to be found the stupendous peak of Tupungato, rising to the height of 22 000 ft. besides other mountains of nearly the same elevation. Within its limits, also, are the tuncaguals of Colina and Apoquindo strongly impregnated with sulphur and much rendered by its use. Here were fought two battles against the Spaniards, celebrated in the annals of Chili: that of Chacabuco in 1817 under General San Martín, who obtained a complete victory; and that of Maipo, on April 5, 1818, under the same general, which proved still more fatal to the Spanish arms, and finally sealed the independence of the country. Principal cities.—Santiago and Rancagua. Pop (1847) 307 484 (1860), 541 638.

SANTIAGO DE LOS CABALLEROS, the cap. city of the república of Chili and of above prov., is situated in a large and fertile plain at the foot of the Andes lat 33° 30' N., lon 70° 43' 88" W. at an elevation above 1500 ft. above sea level, and 90 m. to E of Valparaiso. It is watered by the Mapocho, a rapid stream issuing from the Andes which divides it into two unequal parts connected together by a substantial stone bridge the principal one being on the northern or right bank of the river.

Santiago was founded on February 12 1541 by one of the early Spanish conquerors, Pedro de Valdivia, who struck by the beauty of the spot, and the uncommon fertility of the soil, resolved to fix here the metropolis of his recent conquest. At first he built himself a house on San Gabriel a commanding point to the left bank of the river where he erected works of defence, both to guard against a sudden surprise by the natives, and to form a secure retreat in the event of future reverses. War was at long before the infant settlement was put upon its trial, for, during the temporary absence of the general, who had marched S with part of his followers the Indians suddenly fell upon it, and but for the strength of the position and precipitate return of Valdivia, all must have been exterminated. Valdivia, however, by a judicious course of resistance, contrived gradually to overcome the hostility of the natives and, in course of time, converted them into faithful and devoted auxiliaries, through whose active assistance he achieved the subjugation of the S part of Chili. Santiago soon emerged from its insignificance, and early became a populous and opulent city. But the jealous policy of Spain and the oppressive restrictions which she imposed on her colonies, naturally checked the progress of this, as of every other place subject to her dominion and it was only when Chili threw off the yoke of the mother country that it sprang into real and active life. From that time it has steadily and rapidly advanced in civilization, population, and wealth, and it is now fully entitled to be ranked among the most important and flourishing cities in S. America. Few places on coast of a finer situation more delightful climate and grander scenery than Santiago. It is seated at the very base of the mighty Andes which stretch N. and S to the utmost bounds of vision rising in sublime grandeur before the spectator, like a great wall of fire forming the confines of a world, its masses of smoking white exhibiting a magnificent contrast with the deep shades below. To the W. of the city runs a parallel range of much less elevation constituting with the main chain opposite the natural boundaries of the plain of Maipo, in which the city is situated. The climate is at once genial and salubrious, and supports a vigorous vegetation, which includes every necessary and many of the luxuries of life. In a country like this, subject to a regular recurrence of droughts a plentiful supply of water is of great consequence and the Mapocho, with its copious and never-failing stream, affords it in the greatest plenty, not only for the use of the city but also for the purpose of irrigation to which it is largely applied. Large meadows, fed from the Mapocho have been and at great expense through tracts of land formerly mere barren wastes, and what was before with out the least value, has become, through this means a perfect garden, teeming with all the varied productions of this

favoured clime. Much attention has of late been devoted to agriculture many improvements have been introduced, both in the mode of cultivation, and in the implements used in husbandry chiefly through the zealous efforts of a body styled *Asociados de Agricultura*, whose labours in this respect cannot be too highly commended. The country immediately round Santiago is very well cultivated and is chiefly made up of small properties, or farms belonging to the wealthy with tasteful villas on them, where they generally go to spend the summer-months not a few of these are extremely pretty and fitted up in a style of comfort and elegance not often exceeded in similar residences in Europe. Santiago, like all Spanish cities in the New World is laid out in squares intersecting each other at right angles. Owing to the prevalence of earthquakes, which are much dreaded by the natives, the houses are seldom more than one story high and generally occupy a large space of ground having gardens and patios or courts in the interior intended to afford a refuge to the family on the occurrence of these dreadful convulsions. All the houses are plentifully supplied with water from the Mapocho. A better style of architecture has been introduced of late years, and many stately mansions are now to be seen fitted up with great splendour and elegance. The approaches to the city, particularly on the Valparaiso side, are exceedingly unpromising, the houses are mostly low, dirty and unwholesome, and the streets always deep with mud are wretchedly paved. On penetrating farther into the city matters gradually improve still it must be confessed that Santiago does not deserve the appellation of a clean well paved or well-drained city. Santiago possesses very fine public walks. The Alameda, planted by the late General O'Higgins is truly a rare,ificent promenade of more than 1 m. in extent, consisting of three double rows of stately poplars, with a stream of running water between each imparting at all times a delicious coolness to the air. A fine marble fountain is lately brought from Italy forms the termination of this charming walk. The Pajarero on the banks of the Mapocho, is nearly 2 m. in extent, and consists of an arrangement of solid masonry erected last century by one of the Spanish governors for the purpose of protecting the city from the floods of the river which previous to this time had completely swept away portions of it by overflowing its banks this is a very favourite walk in the winter-months. The view towards the Andes is here, wholly unobscured. It embraces the grandest display of mountain scenery perhaps to be found in the world and towards sunset when the declining sun illumines with a flood of golden light the mighty bulwarks of nature the spectacle is magnificent beyond all description. The hill of Santa Lucía, in the centre of the city commands a noble view of the place and environs and of the whole plain of Maipo the ascent is easy and the charming panorama which gradually unfolds itself to the stranger as he progresses upward amply repays him for any little fatigue he may have to undergo. Here is a small fort, and above it an observatory lately erected, whence some scientific gentlemen from the U. States have for some years been prosecuting a series of astronomical observations. The Plaza, or Great Square is a large open area, adorned with a fine fountain in the middle and the old palace an irregular heavy looking pile formerly the residence of the presidents now used as barracks public prison and treasury. The S. side is ornamented with lofty pinnacles, which, and in the neighbouring arcade, called Buñes Arcade are to be found most of the fashionable abodes in the city, that is the favourite resort of the fair Santiaguines particularly after mass in the morning when they are seen in their church dress as striking to a stranger and at the same time so appropriate and elegant. On the W. side stands the cathedral, a spacious and not particularly fine edifice, built of a coarse kind of porphyry successive shocks of earthquakes have seriously injured its walls and arches and in 2000 persons principally ladies were burned to death on Dec 8 1803 during a festival. The fire was communicated from the altar fire to the chimney with which the building was profusely adorned and while it was crowded with worshippers. The Moneda, or Mint has a stately and commanding appearance here is an extensive counting establishment from which has issued all the coined money now existing in the country, a part of this large building is fitted up as a new palace for the president, and into offices for the ministers. Santiago is an archbishop's see, the

east of the supreme government, of the courts of law and of the legislature. It has also numerous churches and monastic establishments, two large and well-endowed hospitals that of San Juan-de-Dios for males and that of San Francisco-de-Asis for females. The inhabitants of Santiago are naturally affable and courteous, and are remarkably kind and hospitable to strangers, whom they readily admit into their circles. The children of the wealthy are all taught foreign languages, particularly French and Latin. All classes are remarkably fond of music and many have acquired a degree of proficiency in it already extended in older and more advanced countries. There are in boutique eight printing establishments, one daily and one weekly paper besides other periodical publications. The university of Santiago, formerly San Felipe obtained its first charter from the king of Spain in 1736. It was re-organized a few years ago and constituted into five faculties, namely philosophy mathematics and physical sciences medical law and theology. The Instituto Nacional (National Institute) is the oldest and best conducted college in Chile and here are educated the children of the wealthy families destined for the learned professions. There are besides numerous private schools, where are taught the usual branches of education. The Military academy is a government institution for the education of young men intended for the army and navy. It is conducted on the French system and has done much to improve the personnel of both services. The Normal is also of its own erection and is intended for the training of those destined for public schools in the government schools. It is under the supervision of the minister of education. The National museum is not extensive but contains a good collection of minerals, as many interesting specimens of the animal and vegetable kingdoms particularly of such as are peculiar to Chile. There is a medical school (Facultad de Medicina) for the special study of examining candidates for the medical profession. The national library contains 110,000 volumes and 1,000, which are numerous ancient and rare manuscripts. 1840. 110,377.

SANTIAGO DE LOS RIOS, *de Mendoza*, a city of strategic position, 108 m S.E. Bahia de San Martin 4 m of the sea. It is regularly built but raised fortifications and other architectural remains show its former importance. At one time it was named Los Ordeales producing excellent oranges and the best peaches in the kingdom. 1740. 1400. — *Instituto Geográfico de Portugal* 1400.

SANTIAGO DE LASAYATA or **SANTIAGO DEL** *Spain* Andalusia, prov and 18 m from Jaen with a church, courthouse, prison, primary school and a trade in corn. Pop. 1104.

SANTIAGO DE LOS RIOS, *Spain* Extremadura, prov and about 50 m N.W. Cáceres, near the Tagus with a church, courthouse, and primary school and a trade in corn and excellent cheese. 1800. 91.

SANTIAGO DE LOS RIOS, *Spain* Extremadura, prov and about 70 m from San Juan, poorly built with a church, courthouse, prison, primary school several flour-mills, and a trade in cattle. 1800. 473.

SANTIAGO DE LOS RIOS, *Spain* Extremadura, prov and 12 m from La Alfranca, the province lies between 12 and 40 N. and 61 and 65 W. and borders on Truena, Guadalupe, Cordova, Badajoz and El Caceres. The soil is general in wood and muddy but along the banks of the Dulces and the Buleto are tracts of extraordinary fertility where wheat and pasture for cattle are produced in abundance. In this province the census statistics an unusual size, and formerly from 8000 lbs. to 10,000 lbs. of colonial gathered from it, were annually sent to Chile and Peru. Wax and honey were collected in great quantities in the woods and exported to the other provinces. Linches, and coarse saddle cloths or blankets, are manufactured in great numbers by the women. The population which is scattered chiefly in small villages near the cultivated lands on the banks of the rivers, is estimated at about 50,000.

— The river, esp. of the prov is situated 94 m N.E. from San Juan, about 28 S. 100 64 W. on the Rio-Dulce. It is well hilly built. 1800. about 4000.

SANTIAGO DE LOS RIOS, *Spain* Extremadura, a city of strategic position, 108 m S.E. Bahia de San Martin 4 m of the sea. It is regularly built but raised fortifications and other architectural remains show its former importance. At one time it was named Los Ordeales producing excellent oranges and the best peaches in the kingdom. 1740. 1400. — *Instituto Geográfico de Portugal* 1400.

SANTIAGO DE YBARRA, *Spain* Extremadura, prov and about 20 m from Cáceres, on a gentle height, between the Alagon and the Brucos. It is well supplied with water and has a church, courthouse, primary school and a trade in corn, oil and cattle. Pop. 1200.

SANTIPONCE, *Spain* Andalusia, prov and 10 m from San Juan, near the bank of the Guadalquivir. It is one of the seats of the House of Alba. It has a parish church, originally belonging to a suppressed monastery, a primary school, courthouse, and a trade in maize oil and wine. Pop. 955.

SANTIPUOR, *Spain* Extremadura, prov and 10 m from San Juan, near the bank of the Guadalquivir. It is one of the seats of the House of Alba. It has a parish church, originally belonging to a suppressed monastery, a primary school, courthouse, and a trade in maize oil and wine. Pop. 955.

SANTISTEBAN, *Spain* Extremadura, prov and 10 m from San Juan, near the bank of the Guadalquivir. It is one of the seats of the House of Alba. It has a parish church, originally belonging to a suppressed monastery, a primary school, courthouse, and a trade in maize oil and wine. Pop. 955.

SANTO AMARO, *Spain* Extremadura, prov and 10 m from San Juan, near the bank of the Guadalquivir. It is one of the seats of the House of Alba. It has a parish church, originally belonging to a suppressed monastery, a primary school, courthouse, and a trade in maize oil and wine. Pop. 955.

their authority to him, leaving thereby the whole island under one government. The Haytiens governed the former Spanish colonies with great oppression. After twenty-one years of suffering under an iron yoke, the latter on the fall of General Royer declared themselves independent.

A number of young determined men, rose in the night of February 26, 1844, and having succeeded in driving the Haytian garrison into the shade they proclaimed at the sun rise of February 27 the Dominican Republic. The Haytian troops were obliged to capitulate, and they were embarked for Fort au Prince. The new president, Herard Riviere marched with an army of 30,000 men upon Santo Domingo, but General Pedro Santana defeated him at Azua, and compelled the invading army to retreat within their own territory. The provisional Junta of the Dominican Republic framed now a constitution and elected Pedro Santana as first president. He was followed, in 1848, by General Jimenez. Souleque, the present (1884) emperor, then president of Hayti, attempted in 1849 anew to re-conquer the territory with an army of about 6000 men, but was signally defeated at Las Caerteras, on the river Yoco, April 21 1849 by General Santana, who had only four hundred men under his command. For this great victory Santana received the title of "Liberator of la Patria," and pecuniary votes from the Congress.

General Jimenez the president of the Dominican Republic, not being fitted for his task, and the invading army having been driven out of the country, General Santana was called upon to restore order within the republic and to force Jimenez to resign. The latter refused and Santana laid the city of Santo Domingo which was in the possession of Jimenez under siege. After some bloodshed the consuls of Great Britain, France, and the U. S. States, succeeded in inducing Jimenez to resign, and to embark with a number of his partisans on board of a British ship of war for Caracas.

General Santana directed now the affairs until a new election had taken place, by which upon his recommendation Señor Buenaventura Hues was named president. During his administration Hues succeeded in entering into treaties for the recognition of the republic and reciprocal commerce with Great Britain, France, and Denmark. The secession of Great Britain, France, and the U. S. States was likewise solicited to procure a peace with Hayti and the recognition of the independence of the Dominican Republic. But Souleque new emperor of Hayti has hitherto (1884) strenuously refused to recognize the independence of the Dominican while Britain and France have declared that on any invasion by Souleque of the Dominican territory they will blockade his ports. It may be likewise observed that Spain has not yet (1884) relinquished her rights upon her former colony.

The constitution of the Dominican Republic is based upon that of Venezuela. The Congress, which under ordinary circumstances assembles annually consists of 15 deputies, three for each prov., who form the Lower Chamber or Tribunado, and five senators, one for each prov. constituting the Upper Chamber, or Consejo Conservador.

The French mode of the Restoration has been adopted in legal proceedings, and for the maintenance of order. The executive power rests in a president, who must be a Dominican by birth and 35 years of age. He is elected for four years.

The Dominican Republic claims for her possession the extent of territory as settled by the treaty of limits between Spain and France in 1777. The area comprises more than three-fifths of the whole island, and may be taken on a general estimate at 17,000 geo. sq. m. Consequently the territory is larger than the kingdoms of Hanover and of Holland and equal to Switzerland. It is divided into the following five provinces, which are subdivided into communes.

Santo Domingo, including the capital,	Pop. 31,000
Azua de Compostela	" 10,000
Bayia,	" 80,000
San Pedro de los Caballeros,	" 20,000
San Juan de los Rios,	" 25,000
Total	126,000

Santo Domingo is the largest city in the S., Santiago in the N.

The two principal ports are Santo Domingo and Puerto Plata, but it is probable that the Bay of Samana (which also) will by and by outstrip Porto Plata. Among the towns and places in the interior the following deserve to be mentioned, namely Azua, where Hieronymus Cortes was a public notary, Concepcion de la Vega for the proximity of Puerto Concepcion was erected by Christopher Columbus, and San Carlos where he erected a cross. The ancient town of La Vega, situated at the foot of Santo-Carro, was buried by an earthquake in 1684. It was afterward removed to its present situation on the r. bank of the Lamas. Santiago-de los Caballeros was founded by the disolute Indians in the company of Christopher Columbus. It lies on the r. bank of the river Yaco, and is the second town in the Dominican Republic. Besides these, Higüey, Bayo, San Juan de Maguana, Neybo, San Juan Cristobal, Bayaguan, Monte-Plata, Cotoy and Bayo formed as the place of refuge of Urruquillo, the last of the Haytian caudillos whom Charles V. permitted to return there with the miserable remnant of the indigenous race.

The products in the S. provinces of the republic consist of the spontaneous produce of mahogany (of which Santo-Domingo furnishes the best in the world) satin wood, fustic, lignum vite and brazil wood in prov. Bayo mainly raised but by far the most important part is the h. generally called the "Cacao" where the staple article consists of an excellent quality of tobacco, of which according to the census 50,000 to 80,000 tonnes (1 ton each) are produced.

The soil of the republic is suited for any tropical produce, but unfortunately a great indolence prevails amongst the generality of the inhabitants and the great advantages which nature has bestowed remain undeveloped.

The following table exhibits the imports and exports, &c. of the Dominican Republic during the undermentioned years.

STATEMENT OF THE NUMBER OF VESSELS AND TONS OF GOODS IN THE PORTS OF SANTO DOMINGO, during the undermentioned years

Years.	ARRIVALS AND IMPORTS.				DEPARTURES AND EXPORTS.			
	From S. to DOMINGO		From DOMINGO		To S. from DOMINGO		To S. from DOMINGO	
	No. of Vess.	Tons.	No. of Vess.	Tons.	No. of Vess.	Tons.	No. of Vess.	Tons.
1880	14	11,873	86	126	1,180	60,388	2	22,429
1881	12	10,078	71	101	1,177	52,121	2	22,429
1882	10	10,170	71	101	1,177	52,121	2	22,429
1883	10	10,170	71	101	1,177	52,121	2	22,429
1884	10	10,170	71	101	1,177	52,121	2	22,429

The revenue of the republic amounted in 1882 to 274,516 Spanish dollars (£78 0/4). The expenditure under ordinary circumstances amounts to about 250,000 Spanish dollars (£67,500). The republic owes no foreign debt. Unfortunately a deficit in currency is in circulation, which as it is not redeemable, is subjected to continual variation.

The effective army amounts to 12,000 men but in case of need 16,000 men may be raised. The republic possesses, moreover, three corvettes and five schooners, equipped as men-of-war and mounted with 41 guns.

The prevailing religion is R. Catholic, with an archbishop, who still bears the ancient title of Primate of the Indies, although he has not a single suffragan. Other creeds are tolerated. The R. Catholic inhabitants are superstitiously religious. public instruction is neglected, even in the primary schools. (Communicated by Sir Robert H. Schomburgk, H. R. M. Consul, Santo Domingo.)

SANTO-DOMINGO more commonly, SAN DOMINGO, the capital city of the Dominican Republic, which includes the E.

San Domingo, the usual form of the name in English works, is contrary to Spanish grammar for though Santo means the holy syllable before the proper name of saints, yet the names Domingo, Thomas, James, and Terence, form an exception to this rule.

part of the island Hayti, on the S. coast, at the mouth of the bay of San Juan de los Rios. It is nearly in the form of a triangle, extending about 4 m. E. to W. with nearly the same maximum breadth and is surrounded by walls furnished with bastions. It is built with great regularity, consisting of squares and mostly unvaried streets which intersect each other nearly at right angles, and are lined by houses the greater number of which are of stone and the remainder of wood. The houses have generally only one story, flat roofs, and barred windows with projecting lattices. Some of the houses built by the early settlers in the Moorish style, are still standing. The most conspicuous public building is the cathedral, commenced in 1514, during the government of Don Diego the son of Columbus, and finished in 1549. It is a large and handsome Gothic structure, with a lofty roof supported by 14 massive columns and a richly ornamented high altar. The ashes of Columbus and his brother Bartholomew repose in it for nearly two centuries and a half, but on the occasion of the island's entrance were removed to Havana. Besides the cathedral there are 14 other churches and chapels, one of the latter belonging to the Dominicans. The convents of which there were several are now in ruins. The largest and most celebrated that of San Francisco, during its greatest splendour contained 300 monks; its extensive ruins form one of the most striking features of the city when approached from the sea. The other principal buildings are the natural palace where the Spanish governor used to reside and immediately adjoining it the ruins of the Diego palace the handsome modern building where the streets of the national convales are held the treasury or cabildo an ancient, well-constructed with Moorish arches and an old carved ceiling in its principal hall. The Jesuits college, now a ruin a few college indifferently attended a citadel with extensive barracks a well kept arsenal an infirmary and a large hospital. Santo Domingo was founded in 1496, by Bartholomew the brother of Columbus, on the E. or left bank of the Ozama and here it was that Holandais arrived Columbus. In consequence of a great hurricane which laid the town in ruins in 1502 it was transferred to its present site on the right bank and advanced so rapidly that its history of its buildings.

REMAINS OF THE PALACE OF DIEGO COLUMBUS, SANTO DOMINGO.—From a Daguerreotype.

grapher Oviedo in describing it to Charles V. in 1522, describes it as the seat of

the regularity of streets and the magnificence of its buildings. The first blow to its prosperity was struck in 1586 by Sir Francis Drake, who took it by assault, pillaged and nearly destroyed it. The earthquakes of 1684 and 1691 ruined most of the magnificent buildings which Drake had spared. The spoils of the Haytian during their occupation of the city from 1822 to 1824, deprived it of many of its most interesting monuments. Pop. 200,000.

SANTOMERA a vil Spain, prov. and 6 m. N.E. Murcia with two schools, a church and, outside, a cemetery and a hermitage. Pop. (chiefly agricultural) 3078.

SANTON HOUSE, par Eng. Norfolk, 1500 ac. Pop. 84.

SANTONA a small fortified town and resort, Spain, on the Bay of Biscay, prov. and 19 m. E. Santander lat. 43° 37' 30" N. lon. 1° 19' W. at the extremity of its beautiful and extensive bay and at the foot of a hill which advances into the sea forming a peninsula, a position which gives it some resemblance to Gibraltar. It has a town-house, schools, lyceum, church, military hospital, custom-house, &c. and contains some ruins of the Roman period. The commerce of Santona is considerable, as it is an outlet for the iron of Biscay. English

and French vice-consulate reside here. This is one of the best points of defence in the whole Spanish peninsula, and was strongly fortified by the French who were regularly supplied from France by sea. It capitulated in 1814. Pop. 723.

SANTORIN *Thera* or *Calistvo*, the largest of a small group of islands in the Grecian Archipelago, about 60 m. N. Crete, and 10 m. S. Rio. It is in the shape of a horseshoe, or rather of a crescent, with its two extremities elongated and pointing W. The outer curve has a length of about 18 m. and the inner curve of about 12 m. thus making the whole circuit of the island about 50 m. Its width nowhere exceeds 5 m. and in some parts falls short of 1 m. The shores round the inner curve present frightful precipitous from 500 ft. to 1200 ft. high and celebrated like iron-draws except where their summits are capped by a deep layer of pumice. They are evidently the edges of a crater which stretches without interruption to the two terminating capes of Akrotiri and St. Naxos and must also at one time have been contained between these capes though the continuation is marked only by the small island of Therasa and the little island of Aspro Nio. Within the crater thus marked out, and not far from its centre, the three islands of Nea Kalloni, Palaeo-Kalloni and M. K. Kalloni, are evidently of the nature of cones thrown up by the volcanic force. Accordingly as might be anticipated under such circumstances the water around these cones is at first sulden more than elsewhere but deepens rapidly as it recedes from them. It is a short distance from the edges of the crater it varies from 150 fathoms to 200 fathoms. Lynceum, Merovendi, and Thera, the principal towns of the island are built along the edges of these precipices and the houses many of them perched like eyries or excavated in the pumice, have a very singular appearance. The access to them is by zigzag stairs or roads which have been cut in the sides of the precipices with immense labour. The N. part of the island consists entirely of volcanic substances the S. part is of Pliocene formation, and in its highest peak, called the Crater Blass, attains the height of 1887 ft. above sea level. From the W. cliffs the island slopes rapidly E., N., and S. and in summer presents a very beautiful appearance consisting in fact, of an uninterrupted smiling vineyard. The principal product is wine, of which two kinds are made—*vino-branco* a rough, or dry wine, resembling Rhineish and *vino-rosado*, a dark red very sweet and insipid wine scarcely inferior to that of Cyprus. Of the former, the annual quantity is about 5500 barrels of seven to the pipe of the latter 2500 barrels. The other principal products are barley, vegetables of a sort of pea, muscic eggs and cotton. Pop. about 14,880.

SANTOR a town and seaport, Brazil prov. and 40 m. S. E. São Paulo, on a height above N. shore of the island of Ilha de São Paulo. It is built for the most part of stone and contains two churches, a townhouse, arsenal, two hospitals, and various convents, and has building docks and a harbour with depth of water sufficient for the largest vessels, at which almost all the exports of the province are shipped consisting chiefly of sugar, rum, coffee, raw hides, cane tobacco, and cotton of all striped blue and white. Owing to the numerous swamps in the neighbourhood, malaria is very prevalent.

SANTOS (Los de Maricao), a town, Estrada, prov. and 40 m. S. E. Ilha de São Paulo. It has a townhouse, prison, two public fountains, two primary schools, a suppressed convent, a hospital, a church, and a chapel and near it a ruins castle. Most of the inhabitants are engaged in tillage and there are four mill presses, numerous flour-mills, and two main factories of carban jars. Pop. 4150.

SANTU, par. and in the Duobis 4728 sq. P. 1140. **SANTU**, a village and com. Belgium, prov. and 10 m. N. W. Antwerp, a bank, Scheldt, with a church, primary school, a brewery, tannery and several mills, and some trade in grain. Pop. 1874.

SANYIO [also *Sanyon* Tien], a town, France, dep. Seine-Inférieure, 2 m. S. E. Havre. It has manufactures of earthenware, and brick and tile works. Pop. 2080.

SAZA, a town, Naples, prov. Principato-Città, 13 m. S. La Sala, on a lofty hill with a convent, marble is quarried in the neighbourhood. Pop. 2380.

SÃO-BRASIL, a town, Brazil, prov. Maranhão 130 m. S. S. W. Alcantara, with a parish church. The cotton grown in the district is of superior quality.

SÃO-BERNARDO, or *Romaria*, a town, Brazil, prov. and 50 m. E. S. E. Ceará, with a parish church, and a trade in cotton and cattle sent chiefly to Natal and Paraíba. Pop. (dist.) 6000.

SÃO-CARLOS a village and par. Brazil, prov. Minas Geraes 11 m. N. W. Mariana. It contains a parish church and a primary school. Cotton and indigo thrive well in the district. Pop. 1500.

SÃO-PALO, a maritime prov. Brazil, lat. 25° to 28° S. and lon. 44° 30' to 55° W. bounded, N. by Rio Grande, N. E. Minas-Geraes and Rio-de-Janeiro, S. the Atlantic, S. S. E. Santa-Catharina and São-Pedro-do-Rio-Grande, and W. the republic of Uruguay and prov. Mato-Grosso area, 173,160 sq. m. The coast line stretches N. E. to S. W. for above 400 m. Part of it in the N. E. is bold and rocky but the rest is generally low. At a short distance behind it, however the surface begins to rise rapidly and soon terminates in mountains which have a direction nearly parallel to that of the coast. These chains, composed chiefly of granite, form the great watershed of the province dividing it into two basins of very unequal magnitude that on the E. side consisting of a belt of land along the coast, which sends its waters directly E. to the Atlantic by numerous small streams, or N. to swell the channel of the Paraíba while the larger basin comprising about four-fifths of the surface, belongs to the Paraná which bounds the province on the W. and drains it by a vast number of streams, of which the most important are the Itaipu and Iguazú. The mountains are generally clothed with forests furnishing inextinguishable supplies of the finest timber particularly cedar and pine but the lower slopes, and the valleys and plains which lie along the banks of the river are with few exceptions of great fertility. At one time wheat sufficient for the home consumption was grown, but the introduction of American flour has almost entirely superseded it, and its place is supplied by more profitable crops of sugar-cane, coffee, rice, millet, mandioc, tobacco and diamonds. Lying just beyond the tropic, the climate is mild and healthy, and seemed likely to be well adapted for the tea plant of China.

Attempts were accordingly made to introduce it but the hopes entertained were disappointed, and the attempted culture has almost if not entirely, ceased. One cause of failure may be the prevalence of heat frosts which have had the effect of excluding cotton from the regular course of cultivation. The province is well supplied with means of communication both by land and water and has several harbours on the coast, particularly that of Santos, admitting all ordinary sailing vessels. An important trade is carried on with the interior, which sends by land, chiefly to Rio de Janeiro, horses, cattle and wine, and exports by sea rice, coffee, sugar, bacon, tobacco, slaves, and such, or Paraguay tea. For administrative purposes São Paulo is divided into seven comarcas—São-Paulo, Santos, Curitiba, Itajaíba, Foz de Iguaçu, and Franca. It sends nine deputies to the general legislative assembly, and appoints four senators. The provincial assembly, composed of 26 members holds its sittings in the town of São-Paulo. Pop. 455,000.

SÃO PAULO a town in Brazil, above prov. on an elevated but uneven piece of ground between two small streams, 220 m. W. S. W. Rio-de-Janeiro. It is built with little regard to regularity. The streets are narrow, but have both canopy and side pavement and the houses are of earth plastered over and white-washed generally of a straw yellow or pink colour which gives them a clean comfortable and pleasant appearance. They are all roofed with tile and for the most part two stories high with occasional balconies. The environs are still more attractive than the town, being generally laid out in handsome villas and gardens. The principal edifices are the cathedral more remarkable for its size than its architecture, the parish church of St. Ignace, several monasteries and convents, with churches attached the governor's and the bishop's palace, the townhouse, prison, infantry and military hospital. The educational establishments include a school of law an ecclesiastical seminary a Latin school school of philosophy and several primary schools. São Paulo as the capital of the province, is the seat of several important courts of law and public offices the place where the provincial assembly holds its sittings, the residence of the president, and the seat of a bishop. It also possesses a public library, and an extensive botanical garden. Pop. 52,082.

SÃO-PEDRO D'ALCANTARA, a town, Brazil, prov. Goias, on the frontiers of this prov. and Maranhão, a bank Tocantins,

410 m E W Marabá. It contains a church, and possesses to become an important point for the commerce of the interior.

SÃO LUIZ DO RIO-GRANDE, or RIO-PARDO-DO-SUL, a maritime prov. in the S. of Brazil bounded N by prov. Rio-Pardo N. E. Santa-Catharina, S. E. the Atlantic, and W by the state of Santa Catarina. In the S. it assumes almost a point, and has for the extreme frontier Lake Mirim lat. 28° 30' to 31° 30' S.; lon. 48° 40' to 54° 40' W. area, 113,758 sq. m. This province is divided into two unequal parts by a mountain chain, which takes the general name of Serra da Gramma and Serra-do-Ipiranga and is, the S. by that of Serra-da-Faça. Between this mountain chain and the sea the vast lakes of Ypanema, Palos, and Mirim which form one of the characteristic features of the province communicate with each other and have a length of about 240 m. with a breadth varying from 4 m. to 38 m. A considerable portion of the S. division of the province pours its waters into these lakes but, in the N. portion of the province, the rivers take an opposite direction, and flowing W, being partly to the basin of the Gramma, and partly to that of the Gramma. The sea-coast is generally flat and sandy but is lined by a series of reefs, which makes the navigation dangerous. The interior though partially occupied by arid areas, is generally fertile. The productions, however, are not those common in other parts of Brazil. Instead of the tropical fruits a temperate climate prevails, and coffee plants and bananae are cultivated near the objects of commerce in general utility. The finer fruits of Europe particularly apples and peaches find a general soil the ordinary cereals more especially wheat, enter largely into the general course of cultivation their place being occasionally supplied by rice and fax. Building-timber is somewhat rare, but the quality is superior. The minerals include gold and, it is said, even particularly rich beds of iron sulphur and the most precious clay. The principal occupation of the inhabitants however is the rearing of cattle which are partly sent in droves to two Paulo de Ferro-lanceros. But there is much greater extent still, based to furnish the dried beef for which the province has long been famous and which is exported to all parts of Brazil and to Mexico, Havana, and the I. Brazil. The same cattle likewise furnish an important export of hides and tallow. Maize and melons are especially the latter are reared in great numbers, and with particular attention to the excellence of the fruit and have a large sale often at high prices, in the other provinces. As a frontier province São-Pedro do Rio-Grande is divided into four military divisions—Porto Alegre I. Grande Rio-Pardo, and São-Miguel. It sends three deputies to the general legislative assembly and appoints one senator. The provincial assembly consists of 24 members. There is a German colony which in 1841 had a population of 5311 at St. Leopoldo about 40 m. N. Porto Alegre. Pop. 260,000.

SÃO BOM-DE-MANGA a town in Brazil prov. Minas-Geraes, in a low plain subject to inundations. It bank N. E. Francisco lat. 15° 10' S. 31° 30' W. Salgado. It is tolerably well built has two churches and a considerable trade, being the entrepôt for the various kinds of produce sent from the surrounding districts to be exported by the São-Francisco. The chief articles of culture are rice, millet, sugar-cane particularly the last which furnishes a large export of sugar and spirit. Great numbers of cattle also are reared. Pop. (dist.) 3000.

SÃO-ROQUE, a town in Brazil prov. and 30 m. S. W. Rio-Pardo. It is the seat of an electoral college, contains a parish church, and exports a good deal of produce to São-João. Pop. (dist.) 4000.

SÃO ROQUE, a cape, Brazil. See ROQUE.

SÃO SALVADOR, a city and seaport Brazil. See HATIA.

SÃO-SALVADOR-DO-CAMPO, a city Brazil. See CAMPO-DO-CAMPO.

SÃO-SALVADOR a town and seaport, Brazil prov. São-Paulo. It is the seat of a municipality which projects into the Atlantic, opposite to an island of same name 65 m. E. N. E. lat. 23° 47' N. lon. 45° 21' W. (N.) It is poorly built, the houses being very paltry and the streets merely covered with sand. It has a church a Franciscan convent, a 1st and a primary school and a spacious harbour, with a depth of 24 ft. at which an extensive trade is carried on, all the produce of the neighbouring districts consisting chiefly

of sugar coffee, rum tobacco, and earthenware, being shipped at St. Pop. 7000 (dist.) 6000. —The island, lat. (S. point), 23° 57' N., lon. 45° 18' W. (N.) separated from the town by a deep but narrow channel, called the Strait of Igoe-Toque, is of a somewhat triangular shape and, at the widest, is about 10 m. across. Its shores are steep and rocky, but vessels sail along them in safety and first-class and sub-mergence in from 3 fathoms to 35 fathoms. The interior is elevated. The soil is fertile, and yields abundance of sugar-cane and the other produce of the climate. Vessels obtain cheap supplies of fresh meat, poultry and other provisions, and there are copious springs, where they can take in excellent water. A whaling establishment has long existed on the island and a small town, called Villa-Rhila-de-Princesas has recently been built on its W. shore. Pop. 3000.

SÃO VICENTE, a town in Brazil prov. and 45 m. E. S. E. São-Paulo, on a strand which once took the name of the river of São-Vicente. It was the first town founded by the Portuguese in Brazil and was long regarded as its southern capital but owing partly to the increase of the bar across its harbour and the rise of the town of Santos in its neighbourhood it has dwindled away till its population barely amounts to 600.

SÃO-VICENTE-DAS-ÁGUAS, a town in Brazil prov. and 125 m. S. E. Cuiabá, on bank São-João, about 40 m. above the town of Iguazú with a church, house, and prison and a considerable export of cotton and other produce to Iguazú and Pernambuco. Pop. (dist.) 5000.

SÃO-VINCENTE, an old fort S. E. coast Brazil lat. 18° 18' N. lon. 68° 31' W. (N.) about 10 m. long E. to W. and 3 m. to 5 m. broad covered with trees and surrounded with a white shroud to the distance of 2 m. The N. E. point of the island is bold and the S. E. low. The passage between it and the mainland is short and narrow and practicable for small vessels only.

SAONE [anc. *Saron*] a river France, rises at Vionnet dep. Vignes flows S. W. through that dep. enters dep. Haute-Saône which it traverses, forming first N. E. then N. W. and immediately on quitting it for dep. (S. E.) is greatly augmented in volume by the access of the Ognon. Thence it continues its S. W. course, passing Auxonne, and receiving its most important tributary—the Doubs. After reaching Lézignan, its course becomes almost due S. past Macon to Lyons, where it joins or from its volume may more properly be said to be joined by the Rhone. Its whole course is about 280 m. of these 190 m. are navigable. The importance of its navigation is greatly increased by means of three canals—the canal de Centry canal de l'Argonne and Rhone and Rhine canal—which bring it into communication, respectively with the Loire, Seine, and Rhine.

SAONNE, ex-Lux, a dep. France, bounded, N. by Côte-d'Or E. by Jura, S. E. Am. S. Rhone and Loire and W. Allier and Nièvre, greatest length E. to W. 75 m. average breadth 10 m. area, 3270 sq. m. It is traversed N. to S. by a mountain range, which forms the commoning chain of the Cevennes. The culminating point Mont Auvray has a height of 3280 ft. above the sea. Its range divides the department into two distinct basins, that on the W. belonging to the Loire which first traverses it S. W. corner and then bounds it on the W. and then on the E. belonging to the Saône which traverses it N. to S. and transmits its waters to the Rhone. In addition to these two rivers from which the department takes its name, important water communication is afforded by the canal du Centre. The climate is in general temperate and healthy. More than one-half of the whole surface is arable, and one sixth is in wood. The waste-land is about one-thirtieth. The soil on the whole, is not of remarkable fertility, the grain raised barely sufficing for the consumption. The finest part of the department is the valley of the Saône, where the surface is beautifully diversified by hill and dale, valley and plain, vine and wheat, rich pastures and fertile corn fields. The vine is extensively cultivated and though none of the wines are of great quality, they are much esteemed as *vins ordinaires* and largely exported. Those in most repute bear the name of Macon. Hemp, of excellent quality, is grown in several cantons and attention has lately begun to be paid to the culture of the mulberry for rearing silk-worms. Excellent cattle are reared on the pastures and the horses, though generally of small size, are hardy and active. The most important mineral is coal of which there is an extensive field; but the

quality is inferior. Iron is also partially worked but the ore is seldom rich, and there is a mine of manganese. The most important branch of industry is the manufacture of iron. After it may be mentioned leather glass, linen and cotton goods, hats, and earthenware. The trade is chiefly in agricultural produce coal, iron wine, and leather. For administrative purposes the department is divided into five arrondissements—Mâcon (the capital), Autun Chalon-sur-Saône, Charolais, Louhans—subdivided into 45 cantons, and 566 communes. Pop (1862) 574 720.

SAÔNE (Haut-) [Upper Saône] a dep France bounded N by dep. Vosges, E Haute-Rhin S. Doubs and Jura, S W Côte d'Or and N W Haute-Marne greatest length N to S. W 70 m average breadth 40 m lat. 47° 15' to 48° N, lon 5° 25' to 7° E area, 2022 sq m. This department consists in a great measure, of an extensive basin inclosed by a succession of mountain ranges—the Vosges the chain of Langres, the Côte d'Or, the mountains of the Jura and the Jura. In the N E a portion amounting to nearly a fourth of the whole surface is entirely covered by mountains. The soil consisting of the Dôle, de Lure, or as it is sometimes called l'haute-d'Or, has a height of 2264 ft. The whole department belongs to the basin of the Rhone, being drained by the Saône which traverses it first S E, then S W the Upper, which pursues nearly the same direction on the N E frontier, and several small tributaries. The climate is upon the whole, more temperate than that of the adjoining departments, but is subject to sudden and violent alterations, particularly in spring by which vegetation often suffers severely. The mountainous part of the department is extremely rugged and the soil is arid so that the ordinary cereals are scarcely able to maintain a languishing existence. The rest of the department, lying within the extensive basin already referred to is very fertile and has a surface finely diversified by gentle slopes often covered with vineyards extensive, well watered verdant meadows, and productive corn-fields. The crops raised, after supplying the home consumption leave a considerable surplus for export. About one-half of the whole surface is arable and considerably more than one-fourth is covered with wood which furnishes excellent timber and is one of the principal sources of wealth. In addition to cereals, flax and hemp are extensively cultivated. The ordinary fruit is generally thrives well and some districts are almost covered with cherry plantations the produce of which is employed in the manufacture of cherry brandy. The minerals of the department are numerous but by far the most important is iron, which is so extensively worked and manufactured as to form the most important branch of industry. The other principal articles of manufacture are cotton, houses paper glass and earthenware. The trade is chiefly in corn flour iron and ironmongery wine wood, butter cheese horses and cattle. For administrative purposes the department is divided into three arrondissements—Vesoul (the capital) Gray Lure—subdivided into 28 cantons and 563 communes. Pop (1854) 347 489.

SAOPECIO a town in France dep. Alpes-Maritimes, 27 in N. E. Nice on the Rive in a wild rugged district. It consists of miserable huts like nests among the rocks and has two churches, a convent, a communal school an hospital, and the ruins of an old castle. Pop 2089.

SAOUK a river, Rames river in gov. Lavonia, flows S. S. W. and forming a junction with the Parnai at the town of that name, falls into the Gulf of Livonia, after a course of about 45 m.

SAOUNE, a river France, which rises in the S. of dep. Lot near Langsch flows S W and joins a bank Garonne, 4 m. S E Agen after a course of about 45 m.

SAP (Maz) a vil Hungary. Hither Lianbo on Gran, about 3 m from Nyerges-Lőrinc. It has a church, a paper-mill, and a trade in corn, cattle and wine. Pop 1257.

SAPAN TAGH, a bare, trouless mountain. Asiatic Turkey, peak and 40 m. N W Van, on N side Lake Van supposed to rise 9500 ft. to 10 000 ft. above sea level. It is apparently of a volcanic nature, although there is no record or tradition of its having been in a state of activity.

SAPAROUA, or HOXOMA, an mt. Indian Archipelago one of the Moluccas, off S. W. coast, Ceram. Lat. 8° 5' S lon. 139° 54' E (n.). There is a village of the same name, and a fort at the head of a bay formed between the S. and S E

points of the island there is good anchorage in 12 fathoms near the fort. This island is very fertile, yielding large quantities of coconuts and coconut oil and at great an amount of cloves as the islands of Ambon, Harrokon, and Noos last collectively.

SALATA or **PUGO SARITA** a small elevated barren mt. Chinese Sea lat. 10° N lon 109° 27' E (n). In appearance from the sea it is nearly perpendicular, and white with insubmersible rock-floes continually heaving over it.

SAPCOLE par Eng Leicester, 1365 ac. Pop 724. **SAPY** two parts. Eng.—1 (Lower or Frickers) Worcester 1907 ac. 1 pop 443.—2 (Upper) Hereford 2190 ac. 1 pop 851.

SAPIENZA an mt. Greece S W coast, Morea, 3 m S. of the town of Modon. It belongs to the promontory anciently called Ctenus and is now included among the Iouan Islands, and the prehistoric of Great Britain. It is of very irregular shape, about 8 m long, N to S by about 3 m broad and has a finely diversified surface. It is inhabited chiefly by Greek shepherds, but has a good harbour in Port Longue.

SAPISION par Eng Suffolk 1250 ac. 1 pop 205.

SAPONARA a town Naples, prov. Basilicata, 20 m S. Potenza on a rocky height. It contains two churches, two monasteries, two nunneries and an hospital. A little below it are seen the ruins of Grammont an ancient Roman colony under the walls of which the consul Claudius gained a victory over Hannibal. Pop 4000.

SAPORNIK a town Russia gov. ul'60 m S E Riazan on the Sapozhka. It has manufactures of linen and cotton goods. Pop (1849) 3104.

SAPMIEKE or **SAPMIE**, a vil. Holland and 11 m. L. N. Groningen on the Winthor canal with three churches and a school. Some building yards, rope-works, saw mills and a considerable transit trade on the canal. 1 2240.

SAPPLETON two parts, Eng.—1 Gloucester 8908 ac. Pop 446.—2 Lincoln 656 ac. 1 pop. 61.

SALITI [anc. Sypris] a town Naples, prov. Principato-Citra 26 m S. E. La Sala on the Gulf of Policastro where it has a large and commodious port, and an active fishery. 1 1430.

SAP-LAPIO a vil Hungary Hither Danube, on a ledge on the Tapio, about 24 m from Kerepes with a R. Catholic church. Pop 1379.

SAPULALI a vil Brazil prov. Minas Geraes, 20 m S W Campanha 1 bank Napuana with a church. It has a fertile district, in which millet rice, hemp, and cotton are grown and many cattle are reared. 1 pop (dist) 8000.—The river rises in N. slope of Serra-de-Mangueira, in S of prov. Minas-Geraes flows N W receiving on its left the Dourado, Verde and Santa-Barbara, and then W till it receives the Verde and Texu, and running due N for nearly 40 m, joins 1 bank Gramme after a course of 160 m. of which about 80 m are navigable.

SAPULALMA or **MACAREMA**, a vil Brazil prov. and 46 m S E Rio-de-Janeiro near Cabo-Fra between the sea and a lake of its own name. It contains a parish church, townhouse and prison at 2 m from an active trade with Rio-de-Janeiro in timber, coffee and fish. Both salt and fresh. Much of the district is annually flooded by the lake. Pop (dist) 7000.

SARA a river Russia, rises near Ivanovo gov Jaroslavl, flows E. then N E, and falls into S shore of Lake Nura 4 m S Rostov after a course of about 48 m.

SARABAI, or **KEDOU** [anc. Zernua] a river Asiatic Turkey pass Anatolia rises near Mount Duen in the N of sandjak Kermanshah flows first S S W then W and about 12 m N W W. Ruzum, falls by several mouths into the gulf of the sea, after a course of about 200 m. Its principal affluents are on the right the Hylla, and on the left the Koptan Aine-Tahur and Begouly or Aclatun.

SARABILA or **RYANER**, a river New Granada, rises about 20 m S W Tunja, near the centre of the state, flows N E, in a direction nearly parallel to that of the Magdalena, and after a course of about 160 m joins 1 bank Galmazo or Bogamazo, an affluent of the Magdalena.

SARACUBA [anc. S stem] a vil Naples, prov. Calabria-Citra, dist. 3 m. S S W Cassovilla, at the foot of a mountain with two churches, several chapels, and two convents. Cotton and maize are produced in the neighbourhood. Pop. 2367.

SARAGOSSA a prov. Spain, Aragon bounded, N. by Navarre, E. prov. Huesca, N. Teruel, and W. Soria Logroña, and Navarra; area, 7810 sq. m. Although not so mountainous as the rest of Aragon, it is crossed by several ranges of hills, of which the highest is El Moncayo, with its ramifications in the W., containing various kinds of minerals, especially lead, copper, argilliferous gales, iron and sulphur, but there are very few mines in operation. They also abound with basaltic gneiss, granite, alabaster, and jet, and the forests with which they are clothed are tenanted by bears, wild boars, wolves, and deer. A considerable portion of the province is tolerably level and where there are facilities for irrigation very fertile, the richest tracts being that surrounding the city of Saragossa, and the plain of Caspe. The principal streams by which this province is watered are the Ebro, Jalon, Gallego, Jiloca, Moerva, Aragon, Arba, Quellas, Piedra, Minobibre, and Aranda. Besides wheat, rye, barley, oats, and maize, its chief productions consist of flax, hemp, silk, oil, barilla, good wine is also produced, but lacks a ready market. The forests only yield wood for charcoal. This being an essentially agricultural district, there is little attention paid to manufactures. Silk and soap which were formerly manufactured to a great extent, have now sunk to insignificance. Education, although not quite so backward as in some other provinces is nevertheless in an unsatisfactory state. The people are a vigorous active and warlike race, with a certain Spanish simplicity, but they are stubborn, prejudiced, and contempt of civilisation. Pop. 450,000.

SARAGOSSA a *Ciudad Augustea*, north Spain, Aragon, cap. above prov. as W. N. of the ancient kingdom of Aragon. 1° 4' N. L. 1° 41' 47" E. Lon. 0° 42' 38" W. in a fertile plain irrigated by the Ebro. This noble stream separates this city, which is entered by eight gales from the suburb and is crossed by a good stone bridge. Seen from outside the place with its towers, cupolas, and spires, has an imposing character, but inside the streets are miserably tortuous, lanes ill-paved and worse lighted, except the *Casa* or mosque, which is the great thoroughfare, containing many good specimens of Saragossan architecture, rivalled with about works and altogether the town is full of gloomy and old fashioned. The houses are indeed castles being built in solid masonry but bare, and have been abandoned by the Aragonese to build for Madrid and their mansions are falling into a state of dilapidation. rare to a agriculturist, who convert the noble courts into *arrastales* with dingy pots. Here the architect, besides the substantial style of building will observe the superbly carved *soffits*, rafters, and external corbels, the rich internal carvings, and decorations and the slender *chapel* *belly towers* which are usually constructed in brick, angular in form, and ornamented outside with an embossed tracery, while the artist may study a school of painting little known in Spain and quite unknown out of it. Among the principal edifices are the two cathedrals, the chapter residing in each alternately for six months, the one an ancient severe Gothic church, raised to the *Bevis* and the other a modern theatrical temple, dedicated to the *Virgen*, and to which 50,000 pilgrims have been known to resort to see the *Idol* of the Virgin which has descended from her on an object of great devotion in Saragossa, the vast archiepiscopal palace, which was gutted and plundered by the French the remains of a parliament house, built in 1437-40 whose magnificent saloons contained the rich national archives, an excellent library and the portraits of the Aragonese worthies—all utterly destroyed by the invaders, the exchange, built in 1601, a square brick edifice with projecting enriched *soffits*, towers, covered with green and white tiles, and a noble interior, the *Torre Nueva* (new tower) or tower of San Felipe, an octagonal clock tower for the city, which house considerably (about 5 ft) tall, or the perpendicular, like the towers of *Paris* and *Bohemia*, the old irregular castle called the *Alfalfa* built by the Moors, which *Sachet* converted into a barracks after having damaged it with his bombs and during the civil war was degraded into a prison. There are besides a hospital, a hospital one of the largest in Spain, the former having been recklessly burnt with its patients by the French; various other benevolent institutions, numerous churches, among which one of the best is *San Felipe*, with its fine *facade* and columns,

and grand *plateresque* high altar, a townhouse, chamber of commerce, new university in room of that destroyed with its precious library by the French, a normal school, academy of medicine and surgery, theological college, and various other

THE LEANING TOWER OF SAN FELIPE, SARAGOSSA.
From Lecher's View in Spain.

educational establishments, numerous monastic institutions, most of them suppressed, a theatre, baths, botanic garden, a museum of pictures and sculptures, a bell ring and beautiful promenades on all sides of the town. Aragon true constitutes the main occupation in the tribulation, and there are several extensive manufactures of *linen*, several foundries, dye-works, and a large *textile* work. The other articles manufactured consist of soap, brims, liquors, beer, coarse paper, bricks and tiles, sheep-skins, linen and cotton stuff, silk-articles, search boots, blankets, &c. Some of the articles just mentioned are also imported as well as rice, dried cod, bar-iron, timber, dye-stuffs. Among the articles exported are chocolate, paper, cast iron, wine, dyed silks, hats, soap, and above all wheat and flour, the last two chiefly to Catalonia.

Saragossa was the *Salubra* of the *Celtiberians*, but when Augustus became its benefactor it was called after him and the modern is a corruption of the Roman name. It was always a free city or *colonia*, *municia*, had a mint, and was a seat of judicial authority. But no traces of the ancient city are left except in the walls. Saragossa only renounced Paganism and here *Anius Prætorius* the first Christian pontiff, was born A.D. 248. It was captured by the Moors in the 8th century and was wrested from them in 1118, by *Alonso* of *Castile* after the siege of five years, when the stubborn population had almost all perished of *hunger*. Below the hill of *Tortosa*, which commands the town, General *Scalapelo* 20th August, 1710 came up with and completely defeated Philip V., flying from his defeat at *Lécide*, the *old* abandoning *munio* colours, and everything. In 1808 it sustained two memorable sieges. The first was raised by the defeat of the French at *Bailen*, but being again invested it resisted most heroically for 62 days attacks conducted by the four French marshals *Lannes*, *Mortier*, *Moncey* and *Junot*, but ultimately capitulated, February 20, 1808. These two sieges cost the lives of nearly 60,000 brave men, and for nothing, as the defence of the town was altogether a military mistake, and entirely the result of popular supplies and soldiers. 1, 20,000,

SARAIK a tn. Russia, gov and 53 m. N N W. Ruzma, on the Oestr. It contains five stone and three wooden churches, and has several manufactures, and a trade in fat cattle and honey. Pop. (1848), 6722.

SARAIKINO or **PARAIKINO**, an Isl. Grecian Archipelago, lat. 39° 12' N, lon. 24° E. It is situated to the E. of Kithira, or Halonnesos, from which it is separated by a narrow channel and is about 7 m. long, by 2 m. broad.

SARAMACA, a river Dutch Guiana, which falls into the Atlantic near the mouth of the Coppename, 45 m. W Paramaribo after a course (chiefly N) of about 520 m.

SARANSK a tn. Russia, gov and 73 m. N Pensa, on the Saraga, at its confluence with the Insara. It is irregularly built, and consists of narrow winding unpaved streets and has eight stone and two wooden churches, a monastery and a bazaar; numerous soap-works, and tanneries, and a considerable trade in wine, and in woolen cotton, and silk goods. Pop. (1848) 10,109.

SARAPUL, a tn. Russia gov and 197 m. S.E. Viatska on the Kama, at the confluence of the Jourmanka. It occupies the site of an ancient Tartar town and is poorly built consisting of very indifferent houses, and winding and extremely dirty streets. It contains a kind of fortress within which the courts of justice and the principal church are situated and two other churches and has manufactures of soap and leather and a considerable trade greatly facilitated by the Kama, and consisting chiefly in corn and wool. Pop. (1850) 5,437.

SARAKE a river Brazil, near Mato-Grosso runs in the Campos-Parede, and flowing first E and then W joins the Guapore, in lat. 14° 51' S lon. 68° 30' W. At one place it passes within 4 m. of the Securus an affluent of the Juruma and both streams being navigable at this point canoes are drawn across from one to the other and thus are enabled to continue their navigation over an immense tract of country.

SARASWATI a river, Upper Hindoostan which has its source in the Himalayas towards the N E of Birkhad whence it flows S.W. into Bagpote, where it is absorbed during its progress through that region.

SARATOGA SPRINGS, a tn. U States, New York, about 2½ m. N Albany pleasantly situated on a sandy plain partly surrounded by a beautiful grove of pines, and brought into communication with distant parts of the country both by line of railway and by lakes George and Champlain. It owes its existence and prosperity to its mineral-springs, which have made it the most celebrated watering-place in the U States and consists chiefly of a spacious street, fringed the W margin of a narrow vale, and presenting a very imposing appearance with the churches and other public edifices, and more especially the hotels. These are on the most extensive and magnificent scale, with spacious piazzas and colonnades and generally with beautiful grounds attached to them. The U States hotel, considered the largest and most splendid of these establishments, can accommodate 400 visitors. The springs 10 or 12 in number are found in the vale already mentioned and are characterized by their saline and chalybeate ingredients, combined with carbonic acid gas. They are not only very efficacious in many cases of Incurable Rheumatism, but have a powerful effect in renovating the system when enfeebled by sedentary habits or over-exercution and are hence in such repute as annually to attract in the summer season upwards of 25,000 visitors. Besides the water thus used large quantities are bottled and sold in various parts of the Union. Pop. (1850), 4550.

SARATOV, a gov in S.E. of Russia lat. 49° to 56° 10' N, lon. 42° 50' to 51° 30' E bounded W by Icosia and Simbirsk, E. Orenburg S. Astrakhan, S.W. Don Cossacks, and N.W. Tambor greatest length, N to S, 570 m. greatest breadth 515 m., area, 85,672 sq. m. The surface is divided into two nearly equal parts by the Volga, which traverses the government in a S.W. direction. The land on the E. and S.E. consists of an immense steppe, thinly wooded very infinitely supplied with fresh water, and exposed on every side to the violence of the winds. On the W side a range of heights of moderate elevation extend at a short distance from the river and in a direction nearly parallel to it, forming the water-ashed between the basins of the Caspian and the Sea of Azov. To the former basin the far greater part of the government belongs, but the whole of the S.W. belongs to the latter being drained chiefly by the Choper and Nedveditsa,

affluents of the Don. The W division is much more fertile than the E. and presents a much more pleasing appearance the monotony of the steppe being here broken by numerous hills and low ranges, with intervening valleys, where a mild climate and good soil combine in raising heavy crops of corn and covering large tracts with the richest pasture. Many parts of the E. division are rendered almost sterile by the extent to which the soil is impregnated with salt, which increases the surface not of the ground merely, but also of the surface of the lakes, and makes them appear as if they had received a coating of ice. The most remarkable of these lakes are the Gork Solonchok, and the Jaiton both in the S.E. The salt thus accumulated is collected in vast quantities, and forms perhaps the most valuable of the exports of the government. The other principal exports are corn, hemp, flax, tobacco, hops, and madder. In the neighbourhood of the town of Saratov the salt-works are cultivated to some extent for raising silk worms. With exception of salt already mentioned, there is no mineral product of any consequence. The great majority of the inhabitants are Russians with a considerable mixture of Tartars, Cossacks, Tschuwashes, and Morisians. Besides these, a number of colonies, consisting of Germans, French Swiss and Swedes have been introduced. They amount to about 10,000 and have considerably improved the industry of the district both by their labour and their example. For administrative purposes the government is divided into 10 districts. Pop. (1850) 1,769,000.

SARATOV a tn. Russia, cap. above gov. r. bank Volga 459 m. S.E. Moscow in a warm and fertile valley, enclosed by lofty and well wooded limestone hills. It consists of the town proper surrounded by a wall and fence, and of a suburb and having been nearly burnt down in 1811 has been rebuilt in a much improved form, though most of the houses still continue to be of wood. It is the seat of several important courts and public offices contains six churches, two monasteries, a schoolhouse, a merchant house, gymnasium, with botanical garden and several handsome mansions, embellished by sculpture and has manufactures of cordage and hats. An important trade, principally transit by the Volga, between Moscow and Astrakhan and a very large annual fair. Pop. (1842) 42,337.

SARATOVKA, a vil. Russia, gov and S.W. St. Petersburg, r. bank Neva. It is inhabited by a German colony who send large quantities of dairy produce, vegetables, and poultry to the capital.

SARAWALL, a large and populous tn. Borneo, prov. Pegu on the Irawadi, 80 m. N W Rangoon lat. 17° 30' N lon. 95° 00' E. It was formerly the head quarters of his Burmese majesty's war boats in Pegu.

SARAWAK a tn. in the W. of Isl. Borneo, cap. Jessel ship and on a river of same name, lat. 1° 33' N lon. 110° 30' E. It consists of a native and an European town the former built on each side of two reaches of the river and divided into kampongs or clusters, each named after the chief whose house is placed in the centre, and the latter occupying some heights on the left bank of the river. A large battery commands the reach immediately below the town, and there are several Chinese houses have been built. Many of these houses, raised on posts, and formed of wood have a very respectable appearance. The trade of the town is considerable and is carried on chiefly in large boats, some of them of 100 tons, which sail annually to Singapore, with sugar and other productions of the coast, receiving in exchange European goods, Java rice, cloths, brass-work and coarse earthen ware, made in China. Many of the inhabitants are employed in the gold mines in the vicinity. Pop. estimated at about 8000.—The **RAJANG**, situated in the W. corner of the island, extends from Tanyung (cap) station on the W. to the river Samarahan on the E. It has a coast-line of about 80 m. fronting to the N and nearly the same average breadth, bounded W and S by respectively Sarawak and E. by Borneo Proper. The shore is generally low and undulating, but immediately behind it the ground rises rapidly and becomes mountainous. The soil consisting generally of a covering of black vegetable mould, resting on a strong yellow loam is very productive, and seems peculiarly adapted to the sugar cane, which grows readily even without cultivation, and under the careful culture of the Chinese, often attains a height of 18 ft., and abounds in saccharine juices of the highest quality. Cloves, nutmegs, and cinnamon also thrive well but the

more important vegetable productions are coconuts, rice, and sugar. Metals, particularly gold, antimony, and nickel, are very abundant, and are worked to a considerable extent. Diamonds and other precious stones are also found and excellent coal, favorably situated both for working and shipping, has been discovered. The inhabitants appear to have come originally from Java, but are now very much intermixed with Malays and Chinese. They had made considerable progress in civilization, but owing to misgovernment and marauding expeditions, for the purpose of obtaining slaves and other plunder were in a wretched condition till Sir James Brooke was appointed ruler. Under his mild yet vigorous administration a happy change has been produced, and promises to extend its benefits beyond Sarawak to the adjoining territories.

SARAWAK or **SARAWAK** a prov. Borneo, occupying the N.E. portion of that territory, bounded N. and W. by Afghanistan, E. prov. Cutch-Gundava, S. Bhalawan. It is about 100 m. long, and nearly the same broad and in most parts, particularly the E. and N.E., mountains and rugged, rising in the latter to the lofty heights that overtop the Salween Pass, and on the N. frontier attain in the mountain Taktou, an elevation of between 11,000 ft. and 12,000 ft. With exception of the Holan, a small stream which traverses the Holan Pass, there is said to be no river in Sarawak. A few scanty rivulets and transient torrents, widely distributed, are the only sources of irrigation. To compensate this deficiency a cool temperature, the result of elevation, is favourable to vegetation, and allows the soil to retain for a sufficient period the moisture supplied by the vernal rains, so generally to insure good harvests of grain. Owing to the same cause, the hills and plains are covered in the spring and summer, with a profusion of flowers and herbage, yielding abundant pasturage to the numerous flocks of sheep, which constitute the greater part of the wealth of the inhabitants. When spring and summer however have passed away the flowery plains become cheerless wastes, presenting only a scanty clothing of wild thyme, and similar plants, which thrive in soil and elevated tracts.—(Mason, Thornton)

SARAWAK, a small Is. Borneo, prov. Sarawak 89 m. W. Teluk. lat. 28. 47' N. lon. 64° 55' E. Is. consists of about 240 houses, built of wood and surrounded by a small wall with bastions

SARCONI a vil Naples, prov. Basilicata, 13 m. N.N.E. Lagesse. It has an important fair which lasts three days.

SANDAM, a tn. Holland. See **SARAWAK**

SARDARA a vil and com., lat. Sardinia, div. and 38 m. N.W. Cagliari, on a plain at the foot of a hill, in a fertile but unhealthy district. Near it are thermal springs, with a temperature of 139° and a bathing establishment, which though very defective is much frequented. Pop. 2000.

SARDINIA (Island of) [Italian, *Sardegna*; French, *Sardaigne*; German, *Sardinien*; Dutch, *Sardanië*; Spanish, *Sardegna* or *Coruña*; and *Isola*] the largest island in the Mediterranean Sea after Sicily and before the formation of the kingdom of Italy forming with its surrounding islands, the principal of which are San Anteo, San Pietro, Asinara, Maddalena, Tavolara and others that part of the Sardinian States named the Kingdom of Sardinia. It extends from lat. 39° 0' to 41° 15' N. lon. 8° 5' to 9° 50' E. greatest length from Cape Teulada to the N. in Longa Sardo in the N., 152 m. central breadth, about 68 m. area, including the small islands along the coast 9248 sq. m. It is divided into three divisions, subdivided into 11 provinces, which with their pop. are enumerated in the following table.

INCREASED AND PROGRESS OF THE ISLAND OF SARDINIA, and their POPULATION IN 1862.

Division.	Provinces.	Area in sq. m.	Pop. 1862.
CAGLIARI.	Cagliari.	The total area of the island of Sardinia is 9248 sq. m. The provinces have not yet been measured.	109,127

It is nearly in the form of a parallelogram, and though not without considerable indentations, especially on the S. and W. coasts, is very compact. On the N. it is separated from the island of Corsica by the Strait of Bonifacio, not quite 7 m. wide. The opinion of geologists, founded on the similarity and general appearance of the strata on the opposite coasts, is that the two islands were originally one, and that a subsidence in the strata formed the channel which now flows between them. This view is confirmed by the number of islands which lie in the N. part of the channel, and form kind of connecting links by which the continuity of the two islands is still rendered almost visible.

Coast.—The N. coast is generally rugged and precipitous, presenting a succession of bold headlands, of which those of Costa Grossa, near the Bay of Santa Reprata, and Falcone, are the most conspicuous. The principal bay is that of Porto Torres in the Gulf of Asinara having a low beach, with lagoons extending along its E. and S. shores, but rising towards the W. into precipitous cliffs, terminating on the mainland at Cape Falcone, and thence continuing N. in the long and rugged island of Asinara. The W. coast, stretching S. from Cape Falcone, continues steep and rugged, and presents, among other remarkable headlands, that of Capo Argentario, forming the extremity of a rocky mountain upwards of 2000 ft. in height; but beyond this, after passing the bold and picturesque cliffs of Monte Ghinera, the coast turns suddenly E., and forms the Bay of Alghero where a remarkable change takes place, and the beach becomes fringed with hills of fine white sand. To the S. of Alghero the sand disappears, and a range of gentle hills, planted with vineyards, rises the shore as far as Fertilia, when the coast again resumes its rocky character, presenting a succession of trap cliffs which extend to Cape Murru, and thence to Point Mura, near the town of Bosa. A kind of table-land succeeds, and is continued, though with occasional interruptions, as far as Cape Mannu, conspicuous by the round tower on its tabled cliff of moderate height. The beach now lowers, and trending E. forms the large and nearly semicircular expanse of the Bay of Oristano, the N. and E. extremities of which, Cape San Marco and La Fiesca, are above 5 m. apart. The shore around that bay consists of a low alluvial tract, bounding a succession of large lagoons. Rocks again appear towards Cape La Fiesca, a long flat point of moderate height, but no great elevation is attained before reaching Monte Arzo, a sterile headland presenting bold cliffs to the sea. These continue with little interruption to Cape Pecore, from which the coast trends along the base of Monte Ferru to Point Name, where a remarkable conical rock, called Punt' Zaccareo, comes into view. A large open bay, called Porto Paglia, succeeds, and beyond it the coast becomes fringed by a group of islands, of which St. Pietro and St. Antonio form, with their opposite coasts, a spacious harbour, with safe anchorage in every wind. Between the E. coast of Antuco and the mainland is the Gulf of Palmas, the N. shore of which consists of a succession of flat islands which often join at low water, while its S. extremity after presenting the bare and sloping promontory of Point Fiume, terminates in the still more remarkable headland of Cape Teulada, which consists of a long range of precipitous cliffs, nearly 900 ft. high, running out into the sea, with a breadth of little more than half a mile and forming the most E. point of the whole island. A bay of the same name opens between this headland and Cape Argentario. The shore is in some parts flat, but in others runs along the base of rugged granite mountains, and particularly towards the E. has a barren and desolate appearance. Turning N. from Cape Argentario, a number of rocky islets present themselves, rising a low and marshy beach, which continues almost unbroken till the island of San Marco is reached, forming the S.W. entrance of the Gulf of Cagliari. This gulf, extending from Cape Pula on the W. to Cape Carbonara on the E., is a distance of about 34 m., and stretching inland for nearly 12 m., is in every respect the most important of the island. The bay being the capital situated on its W. shore, it everywhere furnishes convenient anchorage in every depth, and in the grounds along and behind it, exhibits the best specimens of civilization of which Sardinia can boast. The E. coast, from Cape Carbonara northwards, stretches nearly in a straight line, the continuity of which is broken interrupted by indentations. The only bays deserving of notice are those of Terranova and Olbia.

The coast-line presents similar features to those which have already been described, low beaches and rocky cliffs often succeeding each other within very short distances. The most conspicuous of all the headlands is that of Monte Bantio, a rugged promontory of respect of 2400 ft. sloping towards the sea, and terminating in bold precipitous of limestone, within which is an extensive cave fantastically adorned with enormous milk white stalactites.

Mountains and Streams.—The interior is generally mountainous, the great chain which traverses Corsica, from N to S, being evidently, notwithstanding the interruption of the strait of Bonifacio continued into Sardinia, where it usually follows the same direction but occasionally sends out transverse branches E. to W. The culminating point of these mountains is the peak of Gennargentu, which is situated a little to the E. of the centre of the island, and attains the height of 5278 ft. The next highest summit is the peak of Limbara, 3688 ft., belonging to the transverse range of that name and situated in the N. Several other summits reach 3000 ft., though the average height does not exceed 3000 ft. Between the mountain ridges are several extensive plains, of which the most celebrated for beauty and fertility are those of the Campidano in the S., stretching between Cagliari and Oristano, and of Ozieri in the N. Besides these there are several large sandy or stony sections called *macchie*, of a very sterile nature. The streams are numerous, and all considerably to the fertility of the districts through which they pass, but are of no navigable importance. The Tivo, the largest, pours its waters into the Gulf of Oristano on the W. coast. Next to it are the Coginas, which flows N.W. into the Gulf of Porto Torres or Asinara, the Flumendosa, which pursues the easterly part of its course between two mountain ridges turns S.E. and discharges itself on the E. coast and the Mannu which falls into the Gulf of Cagliari. The lakes are situated chiefly in the vicinity of the coast, where they form a series of lagoons.

Geology.—In regard to geological structure, the far greater part of the rocks are of crystalline texture, and belong to the earliest formations, consisting of granite overlain by gneiss and mica-schist. These rocks extend without interruption over the whole of the N.E. and E. side of the island and after disappearing beneath an irregular belt of sedimentary rocks of the Silurian system again rise to the surface and occupy considerable tracts both in the S.E. and S. Trachyte, basalt, and other rocks of volcanic formation are most largely developed in the N.W., but also occupy a great number of isolated spots throughout the island, and more especially in the S.W. where the adjacent islands of St. Pietro and St. Antioco are almost entirely composed of them. In many cases the mouths of ancient craters and the lava-streams issuing from them, can be distinctly traced. Besides the sedimentary Silurian rocks, already mentioned as breaking the continuity of the granite on the E., a large tract in the S.W. belongs to the same formation, appearing on the W. coast both to the N. and S. of Cape Peccore, extending considerably inland past the town of Iglesias, and then curving round in a S.W. direction till it reaches the S. extremity of the island, and forms the remarkable promontory of Perula. The limestones and shales at the top of the secondary formation are not largely developed, but occupy a number of isolated tracts both in the interior and on the coast. In the latter portion they form conspicuous objects in the N.W., where the cliffs of the N. of the Gulf of Alghero are composed of them, and in the E. where they form the great mass of Monte Bantio and contain its celebrated stalactite cave. Tertiary rocks of travertine, marl, and sandstone, occupy a considerable tract near the town, and along the Gulf of Sestu, and also in the S. where they form the E. boundary of the plain of Campidano. That plain itself, however, has a deep covering of alluvium, which partly accounts for its remarkable fertility. Similar tracts of alluvium, though of much more limited extent, are found in the plain of Ozieri in the N., and along the Gulf of Palmas in the S., and that of Paglia in the S.W.

Minerals.—The mineral riches of the island were well known to the ancients, whose extensive workings can still be traced. Tin mines numerous gold among its metals but no traces of it can now be found. Lead, however exists in considerable abundance, and is generally highly argentiferous. Mines of it are profusely scattered over various districts. Copper though less widely diffused, occurs in several quarters, and

occasionally furnishes beautiful specimens of malachite. Quick silver has been found, and was once partially worked, and both basalt and andesite are said to exist. Iron of excellent quality is plentifully distributed, and is worked in several districts.

The other mineral products deserving of notice are porphyry, bauxite, alabaster, marble, volcanic basalt, rock crystal, and a variety of beautiful pebbles, jaspers, gneiss, and nitre. Salt, in its mineral form, has only been found in the grottoes of Nervi, but is extensively obtained from the salt-pan along the coast, and forms one of the most profitable sources of royal revenue, for the sake of which it is strictly maintained as a monopoly.

Climate.—The climate of Sardinia has for many ages borne a very bad name, and though the cause cannot be easily ascertained there can be no doubt as to the fact that, at certain seasons, large districts become so insalubrious as to be regularly deserted by their inhabitants while in others the mortality is remarkably great. The range of the thermometer is between 34 and 90° and the mean annual temperature 61°. Hence neither heat nor cold can be said to be in excess. The weather too, though variable, is not more so than in many countries remarkable for healthiness, and refreshing breezes blow regularly from the sea towards noon, and are as regularly succeeded by a land-wind as the sun goes down. The unhealthiness of the climate would, therefore, appear to be owing not to general but to local causes among which the extensive lagoons and marshes which line the coast, and are also prevalent to some extent in the interior, are the most obvious. During the hot season febrile miasmas are continually arising to taint the air the malignant properties of which become so violent that the very breathing of it by a stranger at night or in the cool of the evening, is considered as fatal as it would be to swallow poison. At such times the natives never quit their homes until an hour after sunrise, and hasten to return before sunset, carefully closing every door and window. The disease which then prevails is known by the name of *mal de pays*, and is said to be even more fatal than the malarial fever which prevails in Italy and Sicily are infected. That human agency by the removal of noxious substances and the draining of marshes, can do much for the removal of this scourge, has been proved in many instances. But the subdivisions of property contending interests, and the natural indolence of the inhabitants, opposes apparently insurmountable obstacles and many of what ought to be the fairest portions of the earth's surface are permitted in consequence, to remain dreary wastes.

Fertilization.—The whole surface of Sardinia has been divided into three portions—one occupied by mountains which, where not absolutely barren, are covered with forests or clothed with pasture one occupied by marshes, lagoons, and the almost sterile *macchie* and one under tolerably regular culture as arable land or vineyard, &c. Much of this land is of very remarkable fertility and though from the very imperfect system of agriculture pursued, the average produce does not exceed one in seven or eight, a return of 15 to 20 in some favored districts, is not uncommon. The grain thus raised considerably exceeds the consumption of the present inhabitants, and might easily be increased so as to supply three times the number. The whole operations of the farm are conducted in the most antiquated and slovenly manner. The plough a rude instrument without a collar and frequently devoid of any iron appendage, merely scratches the ground to the depth of two or three inches and the corn, first thrashed on the ground by the tread of man and oxen on a spot called *aripolo*, prepared by passing the seed and beating smooth with a mallet, is sown by being thrown up into the air. The principal crop is wheat, which is generally of excellent quality, and forms an important article of export in the form not only of grain but of flour, biscuit, and macaroni. The culture of barley is more limited and the quality of the produce is comparatively inferior maize thrives well, and though not yet a general crop, is rising rapidly into favor beans and pease are extensively grown, both for home consumption and export. The vine, being well adapted both to the climate and the soil, already occupies extensive tracts, and its culture is every year becoming of increasing importance. The produce, however, is more remarkable for its quantity than its quality, all the preparatory processes being conducted in a careless and imperfect manner. The most

estimated where are those of the Campidano, Alghero, Bono, and Cagliari. Beautiful and extensive olive-grounds are met with in various quarters, but the culture might easily be extended, and made much more profitable than it has yet proved to be. The best oil is that of Sassari. The only other crops deserving of notice are tobacco, which is grown to some extent in several districts, but particularly around Sassari, Alghero, and the adjacent coast, which is renowned in the greatest abundance in the neighbourhood of Cagliari, cotton, for which the soil and climate of the Campidano appear well adapted; madder, which grows wild in many parts of the island, and though neglected, might easily be cultivated to great advantage; and silk, well fitted to become a staple product, but at present produced chiefly for amusement.

Zoology.—Among domestic animals, the first place is due to the bullock, which, though of small size, is the principal animal used for draught, and gives beef of excellent quality. Cows are much neglected, and little milk is obtained from them, but the making of cheese from the milk of goats and sheep forms a very important branch of rural economy. The sheep themselves are of very tolerable breeds, and the swine are said to be among the best in Europe. The horses are in general free from vice, patient of fatigue, and easily kept; considerable attention has been paid to the improvement of the breed of the mule, though admirably adapted to the country is unknown but a small pony anciently in high esteem with the Roman matrons for its liveliness and easy pace, still retains its character. Game of all kinds is very abundant. Wild boars, stags, deer and antelope frequent the woods and forests, and hares, hares, and rabbits are numerous, that their skins furnish a considerable article of export.

From the extent of sea-coast, the fisheries naturally form an important branch of industry. The sluggishness of the Sardinians has allowed the management of them to fall almost entirely into the hands of strangers. The most valuable fishery is that of the tunny which is carried on extensively on various parts of the coast. Anchovies and sardines, the latter at one time so numerous as to have derived their name from the island, have become comparatively scarce. Fine mullet, bream, eel, and other fish abound, and are staple articles of consumption and commerce. The coral-fisheries, more celebrated in ancient than in modern times, are still carried on on the W and S coasts where they employ from 200 to 300 boats which arrive annually from Naples and Genoa. The *Purse snails*, also the inhabitant of a shell of from 15 m. to 27 m. in length, abounds in the smooth water of shallow bays, as at Porto-Conte and Lanau, and become the object of an important fishery partly on account of the pearls, generally of very indifferent quality obtained from it, and still more on account of its byssus, or taw of silky hair which is about eight inches long and is spun into gloves, stockings, or other articles of dress.

Manufactures and Trade.—Manufactures have made very little progress, and are chiefly confined to a few coarse tissues woven by the women at their homes for private use. Femur, however produces linen, carpets, and bed-covers, which, though coarse, are in general use. At Dorgali, a coarse kind of silk goods is made for sale. A few coarse woollens and cottons, leather earthenware, and glass are also made to some and gunpowder, both like only government monopolies are manufactured to a considerable extent. The trade consists of the exports of raw produce, the greater part of which have already been mentioned, including corn, wine, brandy timber seeds, fish, cattle, milk, tobacco, &c., the imports include all the ordinary tissues, more especially cotton colonial produce, luxury hardware, and metals, hemp, and cordage, &c. One great obstacle to the progress of trade, was the miserable state of the roads, which long continued impracticable for wheel-carriages. This has been to some extent removed by the formation of a good road, which traverses the island throughout its whole length from Cagliari to Sassari, and of several branch roads to the most important places, not on the direct line.

Coin Weights, and Measures.—Aerounds are kept in two, solid, and denari. The lira being = 10. 6d. sterling; the solid 1/2 lira, and the denaro 1/4 solid. The principal coins are, in gold the corona = 25 lire 5 soldi, or 22 sterling nearly and the doppio = 50 sterling in silver, the scudo = 50. 6d. sterling, the lira = 10. 6d., and the cruca = 4 1/2. and in

copper, the soldo nearly = 1d. sterling, and the others = 1/2 soldo. The principal weights are the lb. subdivided into 12 oz. = 14 oz. 5 dr. avoird., the rubbo = 23 lb. 4 oz. 3 dr.; the oncia = 4 rubbi and the oncia = 10 sarti. For linear measure, the palm chiefly is used = 10 1/2 inches imperial; it is subdivided into 2, 4, 8, 16 and 32 paces. For greater length, the canna is used, but its length varies, the canna containing 58 1/2 the Sardinian canna 108 1/2, and the Trabocco canna 154 inches long. Wine is measured by the pipa = 3 1/2 pints imperial, the quartaro = 1 gal. 1 quart 1/2 pt., the boccone = 3 gals. 1/2 qts. 1/2 pt., and the botte = 182 gals. 3 qts. 1/2 pt., oil by the gallesone = 1 gal. 0 qt. 0 1/2 pt., the perra = 4 quartaro, and the barra = 3 galles salt by the sola = 1400 Sardinian lbs. or nearly 83 bushels imp., and corn by the stercello or scoppa = 1 bush. 1 peck 1 gal. 1 pt., and the rotella = 7 stercelli. The principal measures are the stercello, which varies in extent, that of Cagliari containing 240 square paces = 8 rods 27 poles 18 yards, while that of Sassari contains only 170 square paces = 1 rod 36 poles 24 1/2 yards.

Government, People, and History.—Sardinia until 1848, was governed by a viceroy. It is now governed in the same manner as the divisions on the mainland, by General Intendants, one of which superintends each of the three divisions—Cagliari, Nuoro, and Sassari—into which the island is divided. The inhabitants bear a considerable resemblance both in physical features and in manners and customs, to the Sardinians. They are of middle stature, and well shaped, are exceptionally attached to their country and have good intellectual capacities. They have suffered much however from long neglect and misgovernment, are both ignorant and bigoted, and when they have received an injury are insatiable in their thirst of revenge. Feuds of course become almost implacable, passing down with unabated animosity from father to son and monstrous crimes, too often either whetted or incited by the authorities, are of common occurrence. It is said that great improvements have recently taken place, and that one of the first results of a more general diffusion of education, has been a marked diminution both in the number and the heinousness of crimes. The early history of the island is involved in much obscurity. Its original inhabitants, according to Cicero, of Ialio-Pheonidia and according to Strabo of Tyrrhenian extraction, were living independent, when, about A.D. 530, they were attacked by the Carthaginians, and obliged, after a valiant but ineffectual resistance, to quit the low country and retire into their mountain fastnesses. During the first Punic war the Romans made strenuous exertions to become masters of the island, but ultimately, on agreeing to make peace, obtained a formal cession of it. Thus comes appear to have left a sinking feeling in the breasts of the Carthaginians, and is expressly mentioned by Lily as one of the causes which led to the second Punic war, in which Rome, though finally victorious, was brought to the brink of ruin by Hannibal. During the struggles between Rome and Carthage, Sardinia often became the theatre of war and suffered equally from both the powerful states which contended for its possession. At a very early period, the inhabitants were converted to Christianity, and were, in course of time, brought into close connection with the Papal see, which, having once fixed its hold, has never relinquished it. In civil affairs they were not more fortunate, and passed successively into the hands of the Vandals, the Goths, the Lombards, and Saracens. The modern history of the island possesses little interest.

SARDINIA, a former state of Europe in N Italy imp. Turn now incorporated in the kingdom of Italy. It was composed of 1st Sardinia (which see) and a continental portion called the Sardinian States [Italian, *Stati Anni di Terra Ferma*] comprising the duchy of Savoy, the marquis of the monarchy, the principality of Piedmont, the county of Nice, the principality of Monaco, the duchy of Montserrat, a part of the former duchy of Milan, and the duchy of Genoa, with the island of Corsica. This continental portion extends from lat. 45° 58' to 46° 27' N.; lon. 5° 50' and 10° 5' E.; and is bounded, N by Switzerland, E by Switzerland, Lombardy, Parma, and Tuscany; S. the Mediterranean, and S.W. and W. France, greatest length, N.E.W. to S.E.E., 249 m., greatest breadth from N.W. to S.E.W. 301 m. For administrative purposes they are arranged in 11 divisions,

subdivided into 39 provinces, of which the names, areas, and populations are as follows:—

DIVISIONS AND PARTS OF THE CONSTITUTIONAL STATES OF SARDINIA: (Area and Population in 1911.)

Administrative Division	Province	Area in Sq. M.	Population, 1911.
AGLIATA	Alghero	306	134,544

Total of constitutional provinces		18,994	4,597,150
Island of Sardinia		9,235	543,854
Total of Sardinia monarchy		28,229	5,141,004

Its area is consequently greater than that of the kingdom of the Netherlands, but smaller than that of Portugal. The surface is covered and traversed in various directions by the loftiest mountain chains of Europe. These, commencing at the N.E. extremity on the frontiers of Switzerland form the boundary between the two countries, proceeding first under the name of the Helvetic or Lepontine Alps to Mount Rose, and then almost due W. under that of the Pennine Alps to Mount Blanc, which lies wholly within the Sardinian territory. From Mount Blanc the principal chain proceeds under the name of the Graian or Graian Alps, first easterly to S. and then W. so as completely to isolate Savoy from the rest of the Italian States. Having reached the frontiers of France, it proceeds along them in a S.E. direction to Mount Viso, to the S. of which it becomes linked to the Maritime Alps. These quitting the French frontier stretch eastward between Piedmont and Nice, and, finally, almost skirting the Gulf of Genoa, become linked a little above Savona with the main branch of the Apeninæ, which at first recede a little from the shore, and then proceed E. through div. Genoa to the frontiers of Parma and Tuscany. The lofty chains which have now been traced derive not numerous branches, sometimes parallel and sometimes at right angles to their principal axis, and hence, as it is obvious that the far greater portion of the Sardinian surface must be decidedly mountainous, it might hardly be concluded that no space is left for the expansion of plains. The fact, however, is, that between the S. slopes of the Pennine and Helvetic Alps, and the N. slopes of the Maritime Alps and the Apeninæ, large open plains of almost unrivalled beauty and fertility occur, and render a country which, from overlooking the loftiest mountains, might be supposed to be one of the most barren, actually one of the most productive in Europe.

Shore and Lakes.—From the configuration and position of

the mountain chains, it is evident that they must form several water-sheds, and share the drainage of the country among several basins. First Savoy, which, as already observed, is completely isolated on the E. and S., is forced to find an outlet for its waters either by the W. or N., and thus belongs to the basin of the Rhone, which, watering the W. frontiers, receives part of the drainage directly, and a much larger part indirectly, by the Lake of Geneva, the Arve, and the Isère. In like manner in the S., the Maritime Alps and the Apeninæ cause all the water sent from their S. slopes, or collected on the narrow belt of land below to descend directly to the Mediterranean so numerous streams, all of them, except the Var in the W., and the Taro in the E., too insignificant to be deserving of special notice. A third basin of far more importance, since not less than three-fourths of the whole surface belongs to it, is that of the Po. This important river, commencing its course in the mountains on the W. proceeds across the country to its E. frontier, winding somewhat circuitously but never wandering far from its centre, and receiving constant accessions from numerous affluents, which hasten to join it on either bank with water often furnished from exhaustless reservoirs among the regions of perpetual snow. These affluents alone drain on the left bank an area of 7856, and on the right an area of 4211 sq. m. On the right the only affluent of consequence is the Tanaro on the left the most important are the Tignes, Dora-Baleine, and Sesia. In general, however, their currents are too shallow or too rapid to be used for transport, and the benefits which they confer on all the districts through which they pass are confined to irrigation. While the rivers are thus numerous, there is a remarkable deficiency of lakes. Neither the Lake of Geneva nor Lago Maggiore properly belongs to Sardinia, and the only lakes worthy of the name within the territory are the comparatively trivial ones of Anney and Bourget in Savoy.

Climate.—The climate necessarily varies much according to locality. In the regions of perpetual snow, and in all the districts so near as to be within the sphere of their influence, the winter-cold is severe, the weather at all times variable, and violent storms frequent even when the season has far advanced. In the lower districts and especially in the plains of Piedmont, a much milder and more genial climate prevails, the winter is short, and in summer long tracts of the brightest sunshine continue without interruption from either clouds or rain. The heat, however, is often extreme, and the ground becomes so scorched that the crops are only saved by the general practice of irrigation. In spring the worst feature in the weather is its variability. Violent winds often blow from the surrounding mountains and local storms of hail descend with an impetuosity which not only devastates the fields, but sometimes proves fatal to animals. In the S. portion of the Sardinian States, situated on the S. side of the Maritime Alps and Apeninæ, and forming the divisions of Nice and Genoa, the complete shelter from the N. and the vicinity of the sea, combine in forming a climate remarkable for the mildness of its winters and its almost tropical summer-heats. Here the orange flourishes vigorously in the open air, the olive is the most important object of culture and many plants, seldom found within the same latitude, are found growing spontaneously among its rocky and sunny slopes. Turin, situated not far from the centre of the country, may be considered as furnishing a tolerably fair average of the mean temperature, and as meteorological observations have been made for many years at the observatory there with great accuracy it may be proper to mention that the medium summer temperature thus ascertained is 72° and the ordinary maximum 85° 82, but that the thermometer exposed to the sun has a mean height of not less than 91° 57. The average annual fall of rain deduced from ten years' observation is nearly 57 inches, and of these the large proportion of 25½ inches falls between March and September. The rainiest month is May and the next rainiest August. The prevailing winds throughout the country are the W. N. and E. The S. is felt particularly in Savoy and in parts of Piedmont, but being varied off by the Maritime Alps and Apeninæ, makes little impression in div. Nice and Genoa.

Geology and Minerals.—The lofty chains of the Alps are composed mostly of granite and crystalline schists. To the W. of the chain which forms the W. boundary of Piedmont,

the Jura limestone is largely developed, and extends over the greater part of Savoy. The same system also extends to a considerable distance along the S. slopes of the W. part of the Maritime Alps, and descends to the shore near the W. entrance of the Gulf of Genoa. The most striking display of volcanic rocks is near the same gulf, near the point where the Maritime Alps are considered to terminate and the Apennines to begin. In the interval between the chains, the rocks are composed chiefly of granite. To the E. the orocretaceous system begins to prevail. Almost the whole of the Apennines within the Piedmont Basin, and the slopes on both sides of it, are composed of calcareous rocks belonging to this system. They exhibit numerous marks of violent disturbance, by volcanic rocks, which, though nowhere largely developed, are seen placing the surface in many isolated spots. Another large development of the orocretaceous system is seen in the S. W. where it stretches both along the shores and backwads into the interior forming a small portion of the N. side. The tertiary formation predominates in Piedmont on the slopes and undulating plains situated on the right bank of the Po. The plains on the left bank appear also to be tertiary but are covered for the most part with thick beds of alluvium. The materials include most of the known metals, but in such limited quantities as to possess little economical value. Gold has been washed from the sands of several rivers, particularly the Orco and Dora-Baltea, and from a mine of sulphuretted iron in the Orco. Gold and silver have been extracted. In Savoy the mines of argentiferous lead, which have been worked from an early period by the Romans and Moors, still continue productive. Lead is worked to advantage in various quarters and several extensive salt-works have been erected to purify the salt obtained from mines and springs. Gypsum, chalk, limestone, and slate are very abundant, and there are few provinces in which excellent quarries of alabaster and marble might not be opened. Amethysts, garnets, and rock-crystals of great size and beauty are often found. No coal fit for fuel has been discovered, but there are several seams of lignite.

Vegetation, Agriculture, &c.—Many of the mountains either rise above the limit of perpetual snow, or extend their snowy covering till the base is so far advanced that they have scarcely time to cover themselves with any kind of vegetation. Beneath these snowy regions, where the harder trees can grow, many well-wooded heights are seen, particularly in Savoy, and on parts of the Apennines and Maritime Alps; and at the same or similar elevations in all the mountainous districts of the country extensive pastoral tracts occur where great numbers of cattle sleep, and goats are reared chiefly with a view to the dairy produce which may be obtained from them. In still lower regions the pine, birch, alder and hazel are succeeded by the more valuable species of hardwood timber and among others by the Spanish chestnut, not more valuable for its timber than its fruit. In Savoy and other mountainous regions of the N. the extent of arable land is very much limited, both by the nature of the climate and the configuration of the surface and though, in lower and more favored spots, the vine is successfully cultivated, and corn-fields are sometimes seen stretching continuously over considerable tracts, the cereals produced fall far short of the consumption. In the N. d. of Nice and Genoa the quantity of cereal produce is equally deficient, not certainly from any want of genial climate, but partly from the thin soil and soil, either covered with stones or bristling with rocks, and partly from its adaptation to the growth of plants from which a more valuable return can be obtained—the orange, the vine, the mulberry, and, above all, the olive, which grows here in the greatest perfection, and yields an oil equally abundant in quantity and excellent in quality. The true granary of the Sardinian Nation must be sought for in the plains of Piedmont, where the soil, deep though light, possesses great natural fertility and lies in numerous seasons this fertility increased tenfold by artificial and skilful management. The light nature of the soil, and the withering effect of long-continued drought, must every year have called the attention of the Piedmontese to the importance of artificial irrigation, while the vast number of streams descending with rapidity from elevated sources must have suggested every mode of diverting them from their native beds to water and fertilize the adjoining fields. To such perfection has this system now been carried, that whole

tracts of country are literally covered by artificial channels of various dimensions, so that in the plains of Piedmont 486,618 acres are under regular irrigation, the supplies of which are received and paid for according to fixed rates, forming a most enlightened hydrographic code. The results are astonishing. Whole districts, which had remained almost waste because the soil, when light, was probed up, or when heavy was so retentive of moisture as to form pestilential marshes, have been converted, merely by the application of irrigation, into luxuriant corn-fields, vast meadows, and vine-grounds, and instead of a scanty and impoverished population, now rival the most densely-peopled regions of Europe. A considerable portion of the ground thus irrigated is kept in permanent meadow which yields repeated heavy cuttings of grass and luxuriant crops of hay for the maintenance generally of Swiss cows, which are kept in large dairies, their produce forming one of the principal sources of agricultural wealth. A still larger portion of the same land is under a regular rotation of rice, maize, green crop, and wheat. French beans and lupins are extensively grown, and barley and rye more partially. Much of the ground not irrigated is devoted to the culture of the vine, and more especially of the mulberry, for the rearing of silk-worms. The silk obtained is abundant and of excellent quality and both in its raw and spun state forms one of the principal articles of export. Fruit of the finest kinds is every where abundant.

Manufactures and Trade.—The former occupy a very unimportant place compared with agriculture, and consist chiefly of silk stuffs, velvet, silk hosiery, woollens generally of coarse quality, linen chiefly for domestic use, hardware, earthenware, porcelain glass, leather, soap, paper articles in alabaster marble, and coral combs and perfumes, white lead, brandy liquors, chocolate, vermouth, &c. The transit trade between France, Switzerland, Germany and Italy is very extensive, and an important foreign trade is carried on, chiefly through the port of Genoa. The principal exports are olive-oil, corn rice, silk silk goods, velvet, white lead, and several of the above articles of manufacture the principal imports are colonial produce, cottons, metals, hides, salt-fish, tea and pitch, &c.

Weights and Measures.—Accounts are kept in lire, which in name and value nearly correspond to the French livre or franc—about 10d. but old lire, which vary in Piedmont and France, are also used. The principal coins are, in gold, the new pistole or doppia—about 16s. sterling, the half pistole and the sequin—10s. nearly, and in silver the scudo or crown—about 6s. the demi-scudo, the quart-scudo, and the demi-quart-scudo. The Piedmont foot is about 18 inches imperial. The pace contains about 5 and the stadia 8 of these feet; 800 stadia make a mile. Nice, Genoa, and Savoy have separate measures. The principal measures of capacity are the sacco for grain—246 bushels; the corno for liquids—108 4/5 gallons.

Government, People, &c.—The government is in form an hereditary monarchy, in which the powers of the sovereign have recently been placed under proper constitutional restraints. This new constitution voluntarily granted by King Charles Albert in 1848, appoints a legislature of two chambers, which meet annually, guarantees the freedom of the press, and introduces many other important reforms. The clergy and nobility had from an early period possessed peculiar privileges, which exempted them from taxation, and in a manner placed them above the law. These privileges had long been felt to be intolerably oppressive by the great body of the people, and had engendered feelings which became so strong and general as to render some modifications of them imperative. These have met with serious resistance, especially from the clergy who, backed by the court of Rome, and probably also by the bigotry and ignorance of great numbers of the peasantry, have almost set the government at defiance, and attempted to overawe it by threats of excommunication and other terrors, which, though common in the dark ages, seem somewhat out of place in the 19th century. Justice is administered by four superior courts, which have their seats at Turin, Genoa, Nice, and Olmetto; provincial courts, one in the capital of each province; and a great number of local and inferior jurisdictions. In addition to these a supreme court, called Camera degli, sits at Turin in conformity

court at Genoa, and commercial courts at various places. The revenue, derived to the extent of more than a half from custom and excise duties, and of a third from direct taxation, is about 24,000,000 sterling, and falls short of the expenditure, which exceeds it by nearly 2,600,000. The public debt is estimated at £15,000,000 sterling. Nearly a half of the whole amount has been recently contracted in two large portions—the one, not more than 10, for the construction of a system of railways, of which lines from Turin to Genoa, through Alessandria, and from Turin to Savignano, have been (1854) opened; and the other to say the least, very unfortunately, by the late war with Austria. The army amounts, on the war footing to about 140,000, but in peace to only 48,000 men; the navy amounts to about 60 vessels of war of all descriptions, amounting about 900 cannons. Among the vessels there is not a single ship of the line, but there are four frigates and six steam-vessels. The established religion is the Roman Catholic. It is governed by four archbishops and twenty-three bishops and for ages possessed such an ascendancy that it would not tolerate any other form of religion. Its possessions of Piedmont and Savoy form one of the darkest pages in the history of Popery. In more recent times, owing not to any change in its spirit, but the general progress of public opinion, not only have its more violent outbreaks and aggressions been restrained, but a general toleration has been proclaimed, and the long-persecuted Waldenses, still numbering above 20,000, can now worship peacefully in their mountain valleys, but now their churches in the very heart of the capital. The enlightened spirit thus manifested has not confined itself to the extension of religious freedom, but taken a distinguished part in the great cause of general education. Besides superior institutions for professional instruction national schools are widely diffused. Besides Turin (the capital) the principal cities and towns are Genoa, Novara, Alessandria, Chambery, &c.

History.—The country which now forms the Sardinian States was known in ancient times in its S. part by the name of Liguria, and in its N. part by the name of Etruria. The Phœnicians and the W. by the Graeco and Cottian Alps by the name of Gallia Cisalpina. Savoy separated from the other parts, and lying beyond the Alps, was considered as belonging to Gallia Narbonensis. To this remote corner of the territory belongs the honour of having established the present monarchy. Much obscurity, however, hangs over the origin of the house of Savoy. Its records cannot be considered authentic before the middle of the 11th century when Humbert, Count of Maurienne, a great vassal of Rodolf III. of Burgundy, appears exercising jurisdiction not only over Maurienne, but various other parts of Savoy (the Lower Valais, and Aosta). This jurisdiction was extended to the banks of the Po by Humbert's son Otto, who died in 1080, leaving two sons, who became successively counts of Savoy. The younger Amadeus II. was succeeded by Humbert III. in 1091. Under him the fortunes of his house suffered a temporary eclipse and several great towns including Turin, Aosta, and others, threw off their allegiance. His successor Amadeus III. recovered the greater part of what had been lost, but a long series of changes followed, during which the house of Savoy was sometimes brought to the very verge of destruction, and at other times attained to such prosperity as to excite the jealousies or fears of neighbouring states. One of the counts, called Peter, ruled from 1268 to 1288. He added the county of Vaud to his domains, and in many ways improved the fortunes of his house. He is not unknown to English history, having, in 1341, before his accession, paid a visit to Henry III. of England, who had married his sister Henry made him Earl of Richmond, and gave him for residence a palace on the banks of the Thames, which he took the name of Savoy-house. Among Peter's successors the most distinguished are Amadeus V. whose prosperous rule, from 1368 to 1393, procured him the title of Great Aymon, who succeeded

in 1399 in the exclusion of his niece, in virtue of the Salic law then first declared to be in force in Savoy, and his successor Amadeus VI. VII. and VIII. all of whom ruled prosperously. Amadeus VIII. in particular at the termination of his long reign of 46 years, in 1440, left his successor in possession of territories which gave him a distinguished place among the sovereigns of Europe. Being, however, interposed between France and Germany, they have too often been ready the battle-field on which these great countries met to decide their quarrels. But, notwithstanding this disadvantage, the house of Savoy at the peace of the Pyrenees in 1659 by which the wars of the French and Spanish monarchies were terminated, after they had reigned for nearly 80 years, found itself under Charles Emmanuel II. as great and prosperous as ever. He was succeeded, in 1675, by Victor Amadeus II. during whose reign war between France and Germany again broke out. Amadeus became almost necessarily involved, but played his part so ably, that at the peace of Utrecht, in 1713, he not only added considerably to his continental possessions but obtained possession, and was formally crowned King of Sicily. By a subsequent arrangement he exchanged Sicily for the island of Sardinia, from which he and his successors have since taken the title of king. On his death, in 1780 he was succeeded by Emmanuel III., who became involved in the war of the Spanish succession and saw his territories laid waste by contending armies. The peace of Aix-la-Chapelle compensated him by the addition of several important districts and his own enlightened administration added greatly to the external resources of his kingdom. He was succeeded, in 1772, by his son Victor Amadeus III. who reigned till the French revolution broke out and was succeeded, in 1796 by his son, Emmanuel IV., who, after seeing his continental dominions overrun by the armies of the French, took refuge in the island of Sardinia in 1799 and three years after abdicated in favour of his brother Victor Emmanuel who remained in Sardinia till 1814, when he again fixed the seat of government at Turin. Shortly after the congress of Vienna added Genoa to his territories. An insurrection led to his abdication in 1831, in favour of his brother, Charles Felix, whose reign of ten years was marked by some important internal improvements. Having left no male issue, a collateral branch succeeded in the person of Charles Albert, who in 1848 promulgated the liberal constitution which the Sardinian States still enjoy. The same year saw him at the head of a league intended to expel the Austrians from Italy. The disastrous results led to his abdication in March, 1849 in favour of his son, and very probably to his death in July thereafter.

SARDIS, a ruined city Asia Minor and cap. Lydia, beautifully situated in a fertile plain, watered by the Pae-

THE ACROPOLIS AND SITE OF THE ANCIENT SARDIS.

tolis, at the foot of Mount Taurus, now called by the natives Sardinia 50 m N. E. Smyrna. Under Croesus, his last king, from whom it was taken by Cyrus, it was one of the most

opulent and luxurious edifice of the East. After passing to the Romans it rapidly declined, and during the reign of Titus was almost destroyed by an earthquake. It was, however, immediately rebuilt, and acquired new interest from becoming the seat of one of the Apostolic churches. This church, though nominally alive, was truly dead, and the message sent to it through John predicted a sudden and fearful destruction. The prediction has been fulfilled and in consequence of the ravages both of earthquakes and war the site of the ancient city is now only marked by heaps of ruins. Of these the most conspicuous are those of the Apse which stood on a steep rock of sandstone, remarkable for the manner in which it has been rent and distorted by physical convulsions, but they yield an interest to two pillars, which are believed to have belonged to the temple of Cybele, built only 300 years after the temple of Solomon. The only modern representative of Sardis is a miserable village called Sart

SARDOAL, a *tu.* and *par* Portugal prov Beira-Baixa 14 m. S.E. Thomar in a flat and fertile district, in which wheat is extensively grown. It has a Latin school. P. 3500.

SAREE, or *Sat*, a *tu.* French prov Massena, 90 m. N.W. Astrakhan, lat. 50° 50' N. lon. 68° 10' E. It is about 2 m. in extent, and is surrounded by a wall and ditch, both in a state of decay. The town is in an equally neglected state the streets are unpaved, and are often impassable in bad weather with mud. The houses, which all communicate together are extremely miserable near them a dirty open space serves as a market-place, where, on certain days, the produce of the adjoining country consisting of sugar, cotton, grain, fruit, meat, fish, and vegetables, is exposed to sale. The chief public buildings are a principal mosque, a palace, 4 or 5 madrasahs or colleges, several baths, and a lofty tower popularly known by the name of Gumbuz-e-Salm-e-Tour. None but the best are in any way remarkable. It is of cylindrical form, built of sun burnt brick coated with mortar, with a conical top and rises to the height of about 100 ft. It is hollow throughout the whole of its height, yet without any means of ascending. There are several ancient tombs of mounds in the vicinity of the city. Pop. estimated at 30,000, to 40,000.—(Fraser's *Shores of the Caspian Sea*.)

SARIFTA, a *tu.* Russian gov and 123 m. S.E.W. Saratov, on the lower course, its mouth in the Volga. It is surrounded by a rampart and a fence and otherwise defended so as to be effectually secured against the attacks of the wandering tribes of the steppes and is inhabited by a colony of German Muscovites or Harnbatters, who have built a town of great beauty, consisting of handsome houses, and regular squares, and well-kept streets, often lined with rows of trees. The principal buildings are the church, and, beside it, the boys and girls schools. The manufactures consist of silk, cotton, and linen stuffs, coloured cotton stockings and hosiery. In great request among the Cossacks of the Don, soap, candles, &c. Though the district around is by no means naturally fertile, it has been completely changed by the hand of industry and is covered with fine fields, meadows and gardens. Pop. 4000.

SAREZZO a *vil* and *com* Italy Lombardy prov Brescia, and 2 m. N. by E. Gardone, 1 bank Mella, with three churches, important iron manufactures, and some trade in wood, charcoal and limestone. Pop. 1424.

SARGADELA, a small maritime *vil* Spain, Galicia, prov and 48 m. N. Lago. An iron-foundry was established here in 1729, by Antonio Ballea, and in it are seen the clock and chandeliers of El Ferrol. There is also here a manufactory of fine earthenware, rivaling in quality the best of other countries. About 1000 families are employed in both the above works.

SARGANE, a *tu.* and *par* Switzerland, *can.* and 37 m. S.E.E. St. Gall, on a height, the rocky summit of which is crowned by a castle, with a very notable tower. Near the town is a sulphur-bath, with a bathing establishment. The height on which Sargane stands is the water-shed between the Rhine and the Lake of Wallenstadt, and it has been ascertained by measurement that a rise of 1/4 ft. would send its waters into the lake, and thus entirely change its course. The similarity of the deposits of gravel on the two sides, seems to justify the belief that it once did so. Pop. 802.

SARI a *vil* Hungary, Higher Danube, *co* Fiume, between Dobos and Uy-Harva, 4 m. from Iuzs. It has a R. Catholic church. Pop. 1246.

SARINE, a river, Switzerland. See Saazna.

SARINENA, a *tu.* Spain, Aragon, prov and 56 m. S.E. E. Huesca with an hospital, a grammar-school, and two schools for primary instruction, all endowed; a parish church, once belonging to the suppressed Franciscan convent; a nursery, and three fountains. Pop. (chiefly agricultural), 5671.

SARJOU a river, Hindoostan. See Gona.

SARK, or *Smar*, a small *isl.* English Channel, 6 m. E. Guernsey; lat. 49° 25' 30" N. lon. 5° 27' 45" W. (J.), about 3 m. long, and 2 1/2 m. broad at the widest part. In one place it is not more than a few yards broad. Almost cliffs, from 200 ft. to 300 ft. in height, bound it on all parts. Copper, lead, and silver ore have been wrought, but not profitably. The surface of the island, though high, is everywhere intersected by deep valleys, commanding much to the picturesque appearance. The inhabitants are mostly at once farmers and fishermen. The soil is fertile, producing apples, from which an excellent cider is made, turnips, parsnips, potatoes, and other vegetables. Stocking, gloves, and Guernsey jackets are manufactured and exported to Bristol.

SARKAD, a *mar*ist *tu.* Hungary, Thither Thelm, *co*. Either in a swampy but fertile district; with a Protestant church and a trade in agricultural produce. Pop. 5334.

SARKANY several places, Hungary.—1 (or *Sarkany*) A *vil* Transylvania, dist. Fogaras, near Vamtu, on the Ak, here crossed by a bridge. It has a Protestant and a Greek non-united church. The inhabitants are Germans and Wallachians. Pop. 1493.—2 (*Sark*), A *vil*, *co*, and 26 m. from Odenburg with a parish church. Pop. 1174.—3, (*Sark*), A *vil*, Thither Danube, not far from the former; with a Protestant and a R. Catholic church. Pop. 1212.

SARKOZ, a *vil*, Hungary, *co* Szabolcs on the Ujlak 4 m. from Aranyos-Magyar. It has a Protestant and a R. Catholic church, and a trade in wine. Pop. 1248.

SARLAT (*anc. Sarlatum*) a *tu* France, dep. Dordogne, 23 m. S.E. Périgueux in a basin enclosed on all sides by and hills. It consists, for the most part, of narrow streets, lined with very indifferent houses, but has a college, an hospital, and an ancient parish church a court of first resort and commerce, and a spacious manufactory. The only articles of manufacture and trade is wool. Pop. 4157.

SARMATO, a *tu.* and *com.* Parma, dist. and 10 m. W. Plasencia, on a fertile district watered by the Po, but subject to inundation. It has an old castle, two primary schools, and a trade in corn, wine, cattle, and wool. Pop. 2682.

SARMINTO (*Mournt*) a remarkable mountain, Terra del Fuogo, S. side of Gabriel Channel; lat. 54° 27' 12" S; lon. 70° 51' 30" W. Its height is 6300 ft. above sea-level, rising from a broad base. When viewed from the N., it appears like the crater of a volcano, but when seen from the W. its volcanic resemblance ceases, and it has never been known to present any indications of activity. It is the most striking elevation in the strait; but, from the state of the climate, and its being clothed with perpetual snows, it is almost always enveloped in condensed vapour.

SARNE, or *Sarnow*, a *tu.* Prussia, gov and 54 m. S. Posen, with three R. Catholic churches, and a trade in cattle. Pop. 1444.

SARNEN (*Latin, Sarnodis*), a *tu.* Switzerland, *cap. can.* Unterwalden, on the Aa, as it issues from the Lake of Lucerne, 11 m. S.E.W. Lucerne. It is agreeably situated at the foot of an eminence called Landsberg, and contains a townhouse, a parish church, a large and handsome edifice; an ancient, occupying the site of the castle of Landsberg; a Capuchin monastery, and a superior school. The principal manufacture is leather. There are also dye-works, and a saw-mill. Sarnen makes a considerable figure in the early history of Switzerland. The Austrian half having cruelly put out the eyes of an aged and venerable citizen, and some other deeds of cruelty, a conspiracy was formed, and on New-year's day, 1505, twenty peasants having obtained access to the castle, on the pretence of making the citizens present, but well provided with concealed arms, gained possession of it without a struggle. All the holdings of the castle have disappeared, but the tower commands a beautiful view, and is the well-known spot on which the citizens of the canton have met since 1546, to make their elections. Pop. 8007.

SARNESFIELD, *par.* Eng. Hereford; 1266 *ac.* P. 1465.

SARINIA, or **PORT SARINIA**, a tn. Canada West, on the Lambton, beautiful situation on the St. Clair, not far from the point where it issues from Lake Huron. It is a large and thriving place, with Episcopal, Free Methodist, Baptist, Congregationalist, and E. Catholic churches, grammar and common schools, a large foundry, two tanneries, a saw-mill driven by water, and two flour-mills driven by steam. Having a regular ferry across the river to Port Huron, in the U. States, and being a port of entry, and the last port at which steamers bound to the upper lakes can touch, it already commands a large trade, and promises to become a place of importance. Pop. (1850), 1854.

SARNICO, a tn. and com. Italy, Lombardy prov. and 14 m. E.S.E. Bergamo, at the S. extremity of Lake Iseo, where it discharges itself by the Oglio, here crossed by a bridge. It has a court of justice, several public offices, and three churches, a valuable fishery, silk mills, quarries, and a trade in silk, timber, and building-stone. Pop. 1768.

SARNO, a tn. Naples, prov. Principato-Citra, 12 m. N. W. Salerno, near the source of the river of its name, at the foot of the Appennines. It is tolerably well built, and contains an abbey, belonging to the dukes of Salerno, a handsome cathedral, adorned with some paintings of the first masters, a collegiate church, two monasteries, two nunneries, a seminary, an hospital, paper-mill, and copper-foundry. In the centre of the town are a salubrious and several sulphurous springs, which are much frequented. A great deal of silk of superior quality is produced in the neighbourhood. Sarne is the sea of a bishop, and in its vicinity two celebrated battles have been fought, the one between Marce, the general of Ferdinand, and the king of the Greeks, when the latter was taken prisoner and put to death, and the other in which Ferdinand of Aragon defeated John of Anjou. Pop. 12,000.

SARNIHEIM a vil. Tyrol, circle and about 24 m. from Innsbruck, with a deanery church, and two castles. There is a bathing establishment in the vicinity. Pop. 2734.

SARONIO GULF, or **GULF OF SOINA**, an extensive bay in the Grecian Archipelago, washing the shores of Attica, on the N. and N.E., the latitude of Corinth on the W. and N. W. and Argolis on the E. W. Its length is about 45 m., and its width, at the entrance between Cape Sphic and Colonus, about 30 m. It contains numerous islands of which the largest are Kolos or Salamis, situated near the Attic coast, and famous for the naval victory gained by the Greeks over the Persians; and Egina or Ægina, which is situated near its centre, and gives it one of its names.

SAROVNO a tn. Italy Lombardy prov. and 16 m. N. W. Milan, on the Lura in the midst of a beautiful and fertile plain, which sometimes suffers from inundation. It has two churches, both handsome, and one of them regarded as among the finest in Lombardy, adorned with beautiful frescoes by Luzzi, and other celebrated masters, a suppressed convent, which numbered among its inmates Lorenzo Ganganelli, afterwards Pope Clement XIV. several superior educational establishments, manufactures of various articles in cotton, and three important weekly markets, chiefly for corn, cattle, flax, and silk. The learned Orientalist, Bartolomeo Catena, and the famous singer, Giuditta Pasta, were natives of Sarovno. Pop. 4915.

SAROS, a gulf, Turkey in Europe, Ægean Sea, separated from the Strait of the Dardanelles by the peninsula of Gallipoli. At its entrance it is about 35 m. broad. It extends about 45 m. inland, narrowing gradually.

SAROS, or **SAROS-VARZOKA**, a co. Hungary, bounded N. by Galizia, E. by Zemplin, S. by Abaujvar and W. Zips, area, 1880 geo. sq. m. The Carpathian chain stretches along its N. frontier, and sends out ramifications which extend into the interior, and occasionally ascend to a considerable height. From their sides descend numerous streams, of which the principal are the Torna or Torna, and the Topoly or Topia. In the mountainous districts, oats is the only cereal that thrives, but the lower valleys are fruitful in all kinds of grain. Much hemp and flax are also grown, and there is a good deal of fruit. The forests are extensive, and yield excellent timber. The minerals include iron and salt, and also precious stones, particularly opals, which are said to be the finest in Europe. The inhabitants, chiefly Slavos and Rumanians, are very industrious. The capital of the co. is Saperia. Pop. 201,200.

SAROS-MARY-PATAK, a tn. Hungary. See PATAK.

Vol. II

SAROWY, or **SAROWA**, a tn. Hindoostan, Ajmeer, capital of Sarow, near an affluent of the Indus, 60 m. N. W. Mogyoor. It is advantageously situated on the most frequented road for commerce, between Gajerat and Upper Hindoostan, and also forms an important military position, from commanding several strong passes. The vicinities occupying the S. W. portion of prov. Ajmeer, between lat. 24 and 26 N., is bounded, N. by the Indian desert, E. the Aravalli Mountains, S. prov. Gajerat, and W. the Saraw and Sarinda. By the wars of the petty chiefs, it had been almost reduced to a desert; but has a naturally fertile soil, is well supplied with water, and rears very superior cattle. It has greatly improved since taken under British protection in 1825.

SARPA a river Russia, rises in gov. Astrakhan, lat. 46° N., flows N. forming several small lakes, enters gov. Saratov, passes the town of Sarapa, and a little below joins the bank Volga, after a course of about 220 m.

SARRALBE [see *Albo of Sarawen*] a tn. France, dep. Moselle, at the confluence of the Sarre and Albe 40 m. E. S. E. Known with manufactures of linen, straw hats, and sand-boats. Pop. 3265.

SARRAT, par. Eng. Herts, 1550 ac. Pop. 611.

SARRE, a river, France, rises in the Vosges, near Sarrebourg dep. Meurthe flows easterly N. N. W. across dep. Meurthe, Bas-Rhin, and Moselle, enters Rhodan Franca, passes Saarbourg and Sarrebourg and after a course of about 136 m. joins the bank Moselle 3 m. above Treves.

SARRE CHEMUN a vil. and com. Italy Piedmont, div. and 10 m. S. Aosta with two churches and an elementary school. Pop. 1116.

SARREAL, or **SARREAL**, a vil. Spain, Catalonia, prov. and 23 m. N. Tarragona, near the Anguera. It has a town-house, small prison, primary school, and a parish church. Near it are quarries of gypsum and alabaster. Pop. (agregat. total), 2124.

SARREBOURG, a tn. France dep. Meurthe, in a fertile district 10 m. S. Sarre, 40 m. N. E. Nancy, at the entrance to the principal pass of the Vosges. It is an important military depot, and has a large building establishment, and vast magazines, a court of first resort, and an agricultural society and manufactures of coarse cottons, dress, raws sheet-iron, lamp-black, and chemical products. Pop. 2443.

SARREBREMERS, or **SARREBREMERS** [and *Saraw Zedema*] a tn. France dep. Moselle, at the confluence of the Sarre and Beloe, 41 m. E. N. E. Metz. It has a court of first resort, an agricultural society and communal college, an old Capuchin convent, the buildings of which are now occupied by the prefecture, a *palais-de-justice*, and well-constructed prisons, manufactures of silk and earthenware, glass, and velvet, and a considerable trade in corn, hemp, cloth, yarn, and timber. It is also the central locality for the manufacture of sand-boxes of which above a million are annually made in the town and the surrounding villages. Pop. 4418.

SARRELOUIS, a tn. Prussia. See *SARRELOUIS*.

SARRIA a vil. Spain, Guadalupe, prov. and 3 m. from Barcelona. It has a handsome parish church in the principal square, and in another square are the townhouse, prison and primary school. In the vicinity are the cemetery, two suppressed convents, a monastery, and a royal palace, where the kings of Aragon and counts of Barcelona used to spend the summer. There is but little industry of any kind, the place being chiefly used as a summer resort for the wealthier inhabitants of Barcelona. Pop. 8225.

SARRIANS, a tn. France dep. Yvelines, 7 m. from Carpentras. Silk worms are reared on an extensive scale, and there is some trade in silk, hay and cotton. Pop. 1256.

SARRION, a vil. Spain, Aragon, prov. and 23 m. S. E. Teruel. It is poorly built, has a parish church, a school, and an old convent, which was fortified during the last civil war manufactures of linen, and a trade in hemp. Pop. 1007.

SARROHNO a tn. Italy. See *SARROHNO*.

SARRILLE a vil. and com. lat. Saradina, div. Capistrano, prov. and 12 m. S. W. Nocerone on a hill in a healthy district. Pop. 1600.

SARSDEN, par. Eng. Oxford 1770 ac. Pop. 188.

SARIN A, a tn. Italy, The Romagna, leg. and 24 m. S. E. S. E. Forlì, 1 bank Savio. It is the see of a bishop, and has salphureous in its vicinity.

BARSKOE-SKOLO, a village in Russia. See *BARSKOE* (for).
BARSTEDT, a village in Hanover prov and 9 m. N.W. Hildesheim, with a parish church, and a handsome manor-house. Pop. 1463.

BARTE, a village and com. Belgium, prov and 18 m. S.E. Liege. Wheat and barley occupy the majority of the inhabitants, and some trade is carried on in grain, cattle, and deer. Pop. 2438.

SANT DAMA-AVLENGE, a village and com. Belgium, prov Brabant, on the Thil 13 m. S.E. Brussels. It has a brewery, an oil and two flour mills, and a trade in corn and wood. Pop. 1672.

SARTEANO, or **SANTIARO**, a village in Tuscany comp. Arezzo, on the side of a hill above the Orto, about 12 m. from Montepulciano. It has two parish churches, two small hospitals, a seminary, a school, several tanneries, dye-works, and a trade in corn, oil, and wine. Pop. 3036.

SARTEN, a village in the Corvée, pleasantly situated on a ridge between the valleys of Valence and Orto, 30 m. S.E. Aljona. It rises in the form of an amphitheatre, is surrounded with walls in a ruinous condition, contains a number of well built houses, and has some trade in corn of wax, leather, goat and sheep skins, furs, &c. Pop. 2648.

SARTHE (Latin, *Sarta*), a river, France, rises near the ancient abbey of La Trappe, in the village of Somme-Barthe, dep. Orne. It flows first W.S.W., forming part of the boundary between dep. Orne and dep. Sarthe, to which it gives its name, and passing the town of Alençon, then on reaching the frontier of dep. Mayenne, turns S.E. flows circuitously in that direction till it reaches Le Mans, when it turns S.W. enters dep. Maine-et-Loire, and joins L. bank Mayenne a little above Angers, after a course of 125 m. of which about 74 m. are navigable. Its principal affluents are, on the right, the Vègre and on the left, the Orne, Hanne, and Loir.

SARTHE, a department, bounded N by Orne, E. Eure-et-Loire and Loir-et-Cher, S. Indre-et-Loire and Maine-et-Loire, and W. Mayenne. lat. 47° 35' to 48° 30' N. lon. 0° 50' E. to 0° 25' W. It is a very fertile, and, but for a considerable part of the surface in the N., almost of a level. Its greatest length, N to S, 61 m.; greatest breadth, 48 m. area, 2571 sq. m. The surface consists generally of tolerably fertile plains, sloping vineyards, extensive forests, and pleasant, well-watered valleys. The Sarthe and Loir are the only navigable rivers, but numerous minor streams traverse it in all directions. The climate is temperate and, though somewhat overcharged with moisture is healthy. Rather more than a half of the whole surface is arable, and is generally laid out in well-timbered fields. The corn raised here is sufficient for the home consumption. Hemp also is an important crop and the soil being particularly well adapted for fruit, a considerable portion of it is occupied with orchards, from the produce of which large quantities of cider are made. Stone-fruit, wine, and chestnuts also abound. The domestic animals are of inferior breeds, with the exception of swine, to which particular attention appears to be paid. Poultry are extensively reared, and disposed of chiefly in the Paris market. The minerals are of little consequence. Iron is the only metal worked, and that to a very limited extent, but there are good seams of red and yellow ochre, and excellent quarries of sandstone, limestone, siliceous slate, and marble. A mine of graphite is partially worked, and fine rock-crystals, fossil amber, and garnets are found. There is also some basalt. The manufactures consist chiefly of silicoth, and linen raw and dyed, chiefly for the colonial market. The trade includes, besides these articles, iron, marble, chalk, goose-quills, corn, wine, malt, clover and horse seed; poultry and pork. For administrative purposes the department is divided into four arrondissements—Le Mans (the capital), La Flèche, Mamers, &c. subdivided into 33 cantons, and 361 communes. Pop. (1852), 479,371.

SARTIRANA, a village in Italy, Piedmont, dep. Novara prov. Locatelli, near the confluence of the Po with the Po. It has a court of justice and three churches. Pop. 2381.

SARTOR, a village in Norway, W. coast of S. Bergenhus, about 15 m. W. of Bergen, lat. 60° 15' N.; lon. 4° 10' E. It is of very irregular shape, and so deeply indented, especially near its centre, as to be divided into two parts, a N. and a S., only connected by a very narrow isthmus. Its greatest length from N. to S. is about 24 m.

SARUD, a village in Hungary, Hither Thule, on Sarud, 21 m. from Eszék; with a church, and a trade in cattle. Pop. 1363.

SARUM (Old Sax. *Saraburum*), an ancient representative borough, England, co. Wilt, about 14 m. N. Salisbury. It long stood foremost in the list of what were usually termed 'royal boroughs', and was finally disfranchised by the Reform Act, but is of very great antiquity, and still possesses much historical interest, having been an important settlement of the early Britons, then a Roman station, and lastly the residence of the west Saxon kings, till the heptarchy was merged into one kingdom under Egbert.

SARUN, a district, Hindostan prov. Bengal, dep. Bahar, lat. 25° 30' to 27° N.; lon. 84° to 85° 30' E.; bounded N. by Nepaul; E. the dist. Tirhoot, W. Gorakhpur; and S. by the rivers Gogra and Ganges, which separate it from the dists. Ghazipur, Shahabad, and Patna. The Ganges river forms portions of both its W. and E. frontiers, and traverses its centre, draining the dist. into Champaran in the N. and Sarun proper in the S. Area, 5118 sq. m. Surface almost wholly level, thickly covered by mango-groves; with intervening cultivated tracts, and well watered during the rainy season. Many marshy jungles border on Nepal, and only about one-third of the Champaran dist. is tillal, producing, however, wheat, barley, oats, rice, maize and European fruits, together with opium, indigo, cotton, and other Indian staples. Sarun proper is in the highest state of cultivation, and is one of the most flourishing parts of British India. Wine and sale of soda effluents in abundance on the soil. Cotton cloth and pottery are made, and large quantities of grain, cotton, hemp, tobacco, indigo, &c. are sent into Bengal, with timber of all kinds, from Gorakhpur, Hajipur, and Kharagpur, the seats of large annual fairs. Principal towns are Chuprah (the capital), Bettiah, and Manjor. The inhabitants are mostly Hindoos. Pop. 1,700,000.

SARUNGPOOR, an ancient city, Hindostan, prov. Malwa, lat. 22° 35' N.; lon. 76° 35' E. In 1820 it contained about 2000 houses.

SARVIZ, a market in Hungary, co. Eisenburg, on the Raab, near the confluence of the Gylla, 20 m. S. of Gylla; with a church, a courthouse, an old castle, several mills; and a trade in sheep and tobacco. Pop. 1187.

SARVIZ, a river, Hungary, rises N. of Lake Balaton, flows circuitously S.E.; and after a course of about 80 m., joins the Danube, where, by two branches, it forms the island of Margitta. The upper part of the Sarvitz has been converted into a canal, which serves the important purpose of draining the extensive marshes which flank its banks.

SARZANA, a village in Italy, Piedmont, dep. 68 m. S.E. Genoa, prov. Levante, near the Mare. It was formerly occupied by some, which have been partly filled up and converted into gardens, but is still surrounded by massive walls, constructed in the 15th century; and is traversed throughout its whole length by the public road, which forms a spacious, handsome, and well-paved street. Sarzana is the seat of a bishop, and has a cathedral of three naves, with a simple but majestic facade, covered with white marble and good sculptures, another elegant church, four oratories, a handsome townhouse, an episcopal seminary, a missionary college, superior public schools, a hospital, and an old castle. Sarzana originally belonged to Yvrea, but was exchanged in the 15th century for Leghorn, which the Genoese then possessed. Pop. 8452.

SARZANELLO, a village and par. Italy, Piedmont, dep. Genova, prov. Levante, about 1 m. from Sarzana with a church, and a celebrated castle. Pop. 1014.

SARZEAU, a village and com. France, dep. Morbihan, on the peninsula of Ruz, which forms the S. side of the Bay of Morbihan, 14 m. from Vannes. It has a church, with a lofty tower, some trade in salt, obtained from the surrounding marshes; and salted wine, the growth of the dist. In the neighbourhood, near the Village of Toulon, is the Grand Mont, or Barre-de-Toulon, the largest volcano in France. It is of a conical shape, measures 108 ft. in circumference at the base, and is so high as to form an important landmark for sailing vessels. Le Sage was born at Sarzeau. Pop. 7185.

SARZEDAR, a village and par. Portugal, prov. Baixa-Alentejo, 18 m. W. Castello-Branco, on a lofty and rugged steep above a lake Almada. Near it considerable quantities of honey are obtained, and numerous sheep are fed. Pop. 2540.

SAR-VAN-GEAT, a small fortified tn. Holland, prov Zeeland, on the Belgian frontier, 18 m N Ghent, with which it communicates by canal. It has two market-places, two churches, and a school; several corn-mills, two breweries, and some trade by the canal. Though its fortifications are still quite complete Sar-van-Geat cannot be considered a fortress, though it would be used as a field-work. Pop. 334.

SARBACH, or **SARASACZ**, a vil Baden, circle Middle Rhine, 18 m E.N.E. Strasbourg; with a parish church. The celebrated Marshal Saxe was while reconnoitring in the vicinity was killed by a cannon-ball. A monument to him in granite marks the spot. Pop. 1870.

SARIK, a lake, Russia, in S. of gov Dnestrovia, about 24 m. long, N to S, by 9 m. broad. It receives the Zagabuk, of which it is properly only an expansion, and communicates with the Black Sea a little N of the mouth of the Danube.

SARKATCHEWAN, **SARKATCHEVAN** or **KIZILSU**, a river, British N America rises in two large branches in the Rocky Mountains, the more S. about lat. 49°, the more N about lat. 52° N these branches, the one of which flows E.S.W., and the other E.N.E. unite about 450 m. from their sources, and after a course of 300 m. more the Sarkatchewan falls into Lake Winnipeg, from which it issues under the name of Nelson River. Its lower course is other 350 m. so that its whole length exceeds 1000 m. in a straight line and 1600 m. measured along the windings. It gives its name to one of the districts of the territories of the Hudson's Bay Company.

SARNEE, a tn Hindoostan, prov and 88 m. N.N.E. Agra lat. 27° 45' N; lon. 78° 4' E. Its fortifications, partially destroyed by Lord Lake, are now in ruins. The town however, is still extensive and populous.

SARS (THAK), a vil. Hungary on Hores, l. bank Theiss, 4 m from Alpar. It has a trade in corn and wine. P. 1230.

SARLAND, two places, Naples, prov Salerno —1 A tn, S.W. Is. Ischia, with a church and eight chapels.—2 A tn, E.N.E. Ischia, on a rocky eminence. Pop. 1430.

SARSAH a tn., Isl Sardinia, cap. div of same name, on a gentle declivity above the Turrisano, about 9 m. from its mouth at Porto Torres, and 106 m. N.W. Cagliari. It presents a pleasing appearance at a distance, standing amidst vineyards, olive-yards, orchards, gardens, finely planted walks and fertile and well-cultivated fields, and surrounded by walls partly destroyed, flanked with square towers. It is entered by five gates, and is well built. The main street, in particular, and many of the houses and shops, have a substantial and showy appearance. It has 24 churches, one of them a large cathedral, with a very elaborate facade, several convents and nunneries, a governor's and an archbishop's palace, another fine palace, belonging to the Duke of Asinara, a university, occupying the buildings of the former Jesuit college, an episcopal seminary, an imposing old citadel now converted into barracks, a public hospital, a public library and several fine fountains. It is the only manufacture of consequence in that of tobacco, which is here grown in large quantities, and worked up in one of the largest establishments in the island, and the trade, for which Porto Torres, at the mouth of the Turrisano, is the harbour, consists chiefly in grain, oil, cheese, and sheep and goat skins. Sarsa is the see of an archbishop, the residence of a governor, and the seat of several important courts and public offices. It began to rise in importance as early as the 7th century, and was for some time governed as an independent republic. It has suffered much from war having been pillaged by the Genoese in 1166, and by the French in 1537. Pop. 57,838.

—The **DET Sarsa**, occupying the N. the healthiest and more fertile part of the island, consists of four provs.—Sumra (the capital), Alghero, Oueri, and Tempa. Pop. (1848) 147,045.

SARSELLO, a tn Italy Piedmont div and 21 m W.N.W. Geneva, in a low valley. It was once fortified but now only one of the towers of its old castle remains. It has two churches, a superior school, a convent, a theatre, and an hospital. Pop. 4640.

SARSENBERG, a tn. Prussia, Westphalia gov and 17 m. E. Münster l. bank Hoeser with a castle, a church, manufacture of linen, an oil-works, and a trade in cattle. Pop. 1565.

SASERAM a tn. Hindoostan, prov Bihar, 54 m. S. Buxar, lat. 24° 58' N, lon. 85° 56' E chiefly remarkable

for a magnificent mausoleum, built in the centre of a great reservoir of water, about 1 m. in circumference. The dome and the rest of the building is of fine gray stone. The town is large, is partly built of stone also, and contains other Mahomedan remains besides the mausoleum.

SASSI, **SAS-VAN**, or **SASSOARONA**, a market tn. Hungary, co. Buda, and 8 m. from Hollas, on the Rhaya. It contains a R. Catholic church, a synagogue, and a Pauline cloister. The last possesses an image of the Virgin, which even in recent times, 100,000 pilgrims have visited in a single year. The principal manufacture is calico, which is made very extensively. Pop. 3690.

SASSINOLO, a tn. Naples, prov Salerno S. Campobasso; with a church, and three chapels. Pop. 1155.

SASSO, a tn. Naples, prov Basilicata, S.S.W. Potenza, at the foot of several small hills. It contains a church, and two chapels. Pop. 2700.

SASSUOLO a tn Italy, duchy and 10 m. S.S.W. Modena, r. bank Secchia with a fine castle. In the vicinity is Mount Zibio, remarkable for its petroleum-springs, and its frequent eruptions of sulphurous steam, flame, and mud.

SASTAGO a tn Spain, Aragon, prov and 40 m. S.E. Saragossa, r. bank Ebro. It is well built, has three squares, a church, castle, and hospital, oil and flour mills, and a trade in salt, charcoal, and agricultural produce. Pop. 1481.

SATA, one of the muruks of the Indus (see vol. 1).

SATADL, or **SATADPOO**, a state, Senegambia, extending chiefly along r. bank Falemé, and between it and the Badger or Feneag. Gold is found in its soil and in the sands of its rivers from which it is extracted by the natives by washing.

SATALGE, a tn. European Turkey Thessaly, 20 m. S. Larissa, on an acclivity. The river of the same name is an affluent of the Balympnia. The famous battle of Pharsalia was fought on the plain immediately adjoining the town.

SATALIAH a tn and golf, Asia Minor. See **ASATIA**.

SATANOW a tn. Russia, gov Podolia l. bank Podhorca, N.W. Kamienetz. A great part of the inhabitants are Jews who carry on a considerable trade with Galicia. Pop. 3900.

SATGONG an unconsiderable tn. Hindoostan Bengal on a small creek of the Hooghly and about 4 m. W. the town of that name. In the 16th century it was a large trading city in which European merchants had their factories for procuring the productions of Bengal.

SATHEH, or **SHEH**, a tn. Sweden. See **SATEN**.

SATIMANGALUM a tn. and fortress, Hindoostan prov Madras, dist. and 48 m. N by E. Coimbatore, lat. 11° 21' N lon. 77° 16' E. It is a scattered place, standing on a plain, and contains only about 600 houses. In the town and neighbourhood cotton goods are manufactured from the cotton raised in the surrounding country. There is here a temple of considerable repute dedicated to Vishnu. The fort was extensive, and constructed of cut stones.

SATORAJLYA USTRUK, or simply **USTRAK** a market in Hungary Hódmezővásárhely on 5 m. W. W. Szepes on the Kocva. It contains a Protestant, R. Catholic, and Greek church, a synagogue, and a Jewish monastery. The district is famous for its wine, usually sold under the name of Tokay. Pop. 7600.

SATPOORA, an extensive range of hills, Hindoostan in the Deccan, between the Nerbudda and Tapti. It extends along from near Surat, where it approaches the N.E. termination of the W. Ghats, to lat. 77° E., and is almost wholly occupied by the Bhil tribes. They have here considerable settlements, rising into lofty peaks, the highest being about 2500 ft above sea-level, and consist of amygdaloid, gneiss, and basalt.

SATPUR, a defile, Buld, or Little Tibet, lat. 30° N lon. 75° 24' E. It has a height of about 12,000 ft. and leads N. from the elevated table-land of Docton, into the valley of Iskardoh. The path lies along the base of a steep mountain, and could scarcely be forced, as an enemy, by occupying the mountain side, might effectually bar approach by merely rolling down stones.

SATHANO two towns, Naples—1, Prov Basilicata, dist. and 7 m. S.W. Potenza formerly the see of a bishop.—2, Prov Calabria-Ultra L., S. Ciamarra, on a hill with two churches. Silk-worms are extensively reared in the neighbourhood. Pop. 3200.

BATTARAH, a dist. and tn. British India, preside Bombay which until lately formed a state tributary to the Anglo-Indian government, and was in the 17th century the dominion of the hand of the Mahabita confederacy. It extends from lat. 15° 40' to 18° 50' N., and lon. 75° 40' to 76° E., and is nearly surrounded by the British districts Orona, Poonah, and Darwar. On the W it is mostly bounded by the mountain range of the W Ghats, but a portion extends across them to the Indian Ocean, on which it has a coast-line of 10 m., limited E. by the Portuguese territory of Goa. Length, 2 W to E.E., 180 m.; greatest breadth, 100 m. area, 10,525 sq. m. This country belongs to the table-land of the Deccan. Its surface is much broken by heights and ravines, and in the district are numerous isolated and abrupt hills, crowned by fortresses. The Krishna river flowing S.E. intersects its centre the Neraah and Beemah rivers form nearly all the N., and the Gopurika the E. boundary. Battarah has been one of the best-managed of the native states of India under its late rajahs. Its several divisions containing from 150 to 300 villages each, were administered by a sonbahar and subdivided into other divisions, with from 5 to 20 villages each under junior officers, through whom the whole civil and judicial business was conducted. The land revenue assessed on the ryotwary system varying every year with the quantity of land cultivated and the revenue was always paid in money.—(For. Rep. 1836.) The last rajah abolished duties on water-burden, disclaimed the levy of transit duties, and declared the collapse of the East India Company current in his dominions, established a free hospital, introduced vaccination, founded hospitals or halting-places for travellers, built an aqueduct at Battarah, and formed roads and bridges, two of which later are the head-quarters in the Deccan.—(For. Rep. 1849.) In a minute of the Governor of Bombay after the lapse of the district to the British rule it is stated that no great changes would be required there, 'for we have to deal with a system greatly in advance of those which usually exist in native states, and in the practical working of it, particularly in the police, we may find portions which may not be so improving our own.'—(For. Rep. March 1851.) The total annual revenue is estimated at £140,000 After Battarah (the capital), the chief towns are Kolapoor, Pundarpoor, Matricha, Tampus, Vagaria, and Belapoor. The state of Battarah was founded by Sevajee, the famous Mah raja leader in the conquest of Aurangzeb. The son of his co-conqueror, in 1749, the leadership of the Mahabita was resigned to an officer of his court named the Peshwa, who transferred the seat of the Mahabita government from Battarah to Poonah. The finding war of 1817-18, finally placed the whole dominion of the Peshwa at the disposal of the British, when the present territory was erected into a sovereignty for the rajah Parthab Singh, who was raised to the throne under British protection in 1819. In 1839 that sovereignty was, however, deposed by the Anglo-Indian government on account of alleged intrigues against its supremacy in India, the real interest of which has been since the subject of much controversy in England, both in and out of Parliament. Parthab Singh retired to Benares, in Hindoostan, where he died in 1847. His brother, the late rajah, died at Battarah in 1848, without legal descendants, and his adoption of a successor not being ratified by the Anglo-Indian government, Battarah then ceased to exist as a separate state, and was incorporated into the Bombay presidency.—**HATTARAH**, the cap., 60 m. S.E.E. Poonah, consists of a decayed fort at the W extremity of a hill range, sharply raised 800 ft. above an adjacent plain, and a town clustered around the base of the rock. The town was some years ago composed of a long street of tiled huts, and except a few palaces then building for the rajah, it had no edifice worthy of note. Its value, within the influence of the sea-beach, is one of the most pleasing tracts in the Deccan, and about 2 m. E. are European encampments. The fort was taken from the Rajapoor sovereign in 1673, by Sevraj, who made it the seat of his empire.

BATTARAH, par Eng. Deccan; 515 m. Pop. 57. **BATUR** (Str.) a tn. France, dep. Cher, l. bank Loire, 20 m. N.E. Bourges, with manufactures of leather. It depends upon the small port of St. Thibault, in its vicinity, where there is a considerable export of wine and vine products from the surrounding districts. It formerly possessed a rich ancient abbey. Pop. 1065.

BATURNI (non-arr. Str.), a tn. France, dep. Tarn-et-R., 20 m. N.E. Aragon, at the foot of a rocky mountain. It has some manufactures of galena ore. Pop. 118. **BATZING**, a vil. Saxony, circle Eriksen, hall and near Wolkstein; with manufactures of lace, several mills, and a trade in timber. Pop. 1303.

BAUBERHUTTE, or Bannarvut, a river, Hindoostan, issues from the Dhanur Lake, S.E. of Oodypoor flows S.E.E. through prov. Gujarat, passing the towns of Ahmednagar and Ahmedabad and after a course of about 200 m., falls into the N. extremity of the Gulf of Cambay.

BAUDELO (Str.) a vil. Spain, Andalucia, prov. and 37 m. S.E. Seville. It has a seminary, grammar, two primary schools, a church and two barns, three flour and two oil mills, and two manufactures of coarse earthenware. Pop. (agricultural), 5435.

BAUDRE, a river, France, formed in dep. Lot-et-Cher a little N.E. of Salbris, by the union of two streams called the Great and Little Baudre, flows S.W., passing Marnatrin, and joins r. bank Cher after a course of about 89 m.

BAUESCHWABENHIM, a vil. Hesse-Darmstadt, prov. Rheinhessen, circle Hagen, on the Selbach, 7 m. S.W. Meuse. It has a parish church. Pop. 1100.

BAUGUES, a tn. France, dep. Haute-Loire, 19 m. S.W. Le Puy. It has a very ancient castle tower with a curious chimel manufacture of coarse woollens and worsted, and a trade in wool, cheese, and cattle. Pop. 1896.

BAI GUR a large tn. Hindoostan, prov. Malwah, 74 m. E.S.E. Berozga, lat. 23° 48' N. lon 76° 47' E. Little was known of it until it was taken by the British in 1818, when it was found to be a large, flourishing, and opulent city.

BAUJON, a tn. France, dep. Cherbourg-Inférieure, on the Senna, which here begins to be navigable, 25 m. S.E. La Rochelle. It has manufactures of coarse and woolen goods, and a trade in salt, corn, wine, and brandy. Pop. 1693.

BAUL, par. Irrel. Down 5273 m. Pop. 1370.

BAUL, par. Eng. Gloucestershire 564 m. Pop. 550.

SAULGE (Str.) a tn. France, dep. Nièvre, 30 m. N.E. Nevers, between two well-wooded hills. It was anciently a place of considerable importance. Pop. 1280.

SAULHEIM (Nimrod), a vil. Hesse-Darmstadt, Rheinhessen circle Almy dist. and near Wirtstadt. It has two parish churches, and a castle. Pop. 1606.

SAULIEU (anc. Solvieu), a tn. France, dep. Oise, 39 m. W. Dijon. It is surrounded with walls, but, with exception of the suburbs is poorly built, has a court of commerce, a communal college, an ancient Romanesque church, with beautiful columns and mouldings, manufactures of common cloth, leather and embroidery; and a trade in wine, corn, hemp, wool, wood, and fish. Pop. 2863.

SAULT (anc. Salina), a tn. France, dep. Yvelines, in a valley of its name, on the Mesque 30 m. N.E. Angers. It has manufactures of serge and a sulphureous spring. F 1476.

SAULT (Str. Maine), a vil. U. States, Michigan 500 m. N. by W. Detroit, 8 m. St. Mary's River, at the falls of St. Maria. It contains a courthouse, a jail, three churches, and two schools. Here also is Fort Brady, a U. States military post, and a storehouse of the American Fur Company. The falls or Sault of the river are nearly rapid, immense quantities of white fish are caught here, and cured for the W. markets. Pop. (1860), 890.

SAULKUREB, a tn. France, dep. Vaucluse, 31 m. S.E. Epinal. It has a cotton-mill, and some trade in cheese. Pop. 1392.

SAULZOR, a vil. France, dep. Nord, 12 m. from Cambrai. It has manufactures of cotton, textile, and cotton waste, breweries, a dist. and several oil mills. Pop. 2263.

SAUMUR (anc. Solvieu), a tn. France, dep. Maine-et-Loire, picturesquely situated on the Loire, here crossed by a magnificent bridge, 25 m. S.E. Angers. It consists of a high and low town, both situated on the l. bank, and a suburb on the r. bank of the river. The high town so called from occupying a steep acclivity, is irregularly built; the low town has a much better appearance, and is adorned by a fine quay lined with handsome houses. The buildings despoiled of notes are the old castle, occupying the summit of the hill above the town, now much dilapidated, though still used as an arsenal; the *Isle-à-la-Croix*, the church of St. Pierre, in the form of a Latin cross, with a massy tower; the church of

Mère Dame de Namilly, the oldest and most curious church of the town, with a nave and apse, which have been supposed to date from the sixth century; the church of **Mère Dame des Artilleurs**, surmounted by a magnificent dome, the baths, theatre, and public library. The manufactures consist of linen goods, and works in enamel and glass; there are also salt-petre-refineries and tanneries. The trade is in corn, flour, tanning, wax, lamp, wax, and iron. **Saumur** is the seat of a court of first-resort and commerce, and possesses a communal college, riding-school, and Ecole de Cavalerie, in which from 800 to 400 youths are instructed in all the branches suited to their military profession. It early distinguished itself in the cause of the Reformation and was placed by Henry IV under the government of the wise and able Protestant leader Duplessis Mornay, under whose fostering care it soon attained great prosperity, but declined after the revocation of the edict of Nantes. One of the greatest exploits of the Vendéens was performed here in 1793, when, headed by Henri de La Roche-Jaquelin, they stormed the heights on which the republicans had entrenched themselves 15,000 strong, and gained possession of the town. About 2 m. from Saumur is a Dolmen or Tumulus consisting of huge blocks of unheaven stone set upright, with others laid across them, and forming one of the largest and most perfect Druidical monuments in France. The baronet Madame Uxler was born here. Pop. 10,626.

SAUMUROIS, a town, France, which formed part of prov. Anjou, and is now divided between depts. Indre-et-Loire, Maine, and Vienne.

SAUNDBY par Eng. Notis, 1573 sq. Pop. 68.

SAUNDERS, an isl., S. Atlantic lat. 57° 49' S. lon. 26° 44' W. It is apparently about 80 m. in circumference, showing a surface of considerable height, covered with snow.

SAUNDERTON, par Eng. Bucks 1690 sq. P. 880.

SAUNG a large river Anam. See DOHNAI.

SAURAT, a vil. France, dep. Ariège, 15 m. from Foix with an ancient church, manufacture of iron, and several saw-mills and distilleries. Pop. 3665.

SAURITSCHE a vil. Austria, Styria, circle and near Marburg, on the Drava. It has a court of justice, a parish church, a castle, a parsonage, and a common school. Pop. (dist.), 1760.

SAUTHORPE, par Eng. Lincoln, 128 sq. Pop. 193.

SAUTELLES, a vil. France, dep. Gironde, 12 m. from Bassa, situated in the midst of rich vineyards, which produce one of the best white wines of all the Bordeaux. Pop. 1087.

SAUTHUR, a picturesque situation in Hindostan, 106 m. W. by S. Madras, lat. 13° 57' N. lon. 78° 46' E. The nabob of the Carnatic has a garden here, which is considered one of the best in the country but, like most Eastern gardens, is totally devoid of taste and beauty.

SAUVE, a town, France, dep. Gard, 19 m. N.W. Nîmes. It has manufactures of hosiery and silk forts. The latter are extensively made, and form a considerable article of trade. Near it are the thermal baths of Fozzanga, efficacious particularly in cutaneous affections, and much frequented. Pop. 3820.

SAUVENIERE, a vil. and com. Belgium, prov. and 10 m. N.W. Namur, with a brewery, corn, oil, and other mills, and a trade in agricultural produce. Pop. 1101.

SAUYETERRE, a town, France, dep. Haute-Garonne, 11 m. S.W. Gandema. Pop. 5176.

SAUYEUR (Br.), a town and com. Belgium, prov. Hainaut, 19 m. N.E. Tournay. The chief employments are agriculture, spinning flax, and weaving linen. There are also a brewery, distillery, bleachfield, and five flour-mills. Agricultural produce is exported. Pop. 3207.

SAUX, or SAUXA, a river France, rises from the Lake of Remoncourt, 6 m. E. Fozzanga dep. Haute-Marne, on the

confines of dep. Meuse; enters that dep., flows N.W., enters dep. Bassin-Marne, and joins 1 bank Ornain, after a course of nearly 60 m.

SAUXILLANGES (Latin, *Colonienses*) a town, France, dep. Puy-de-Dôme, in the Cironne, 19 m. S.E.E. Clermont, with manufactures of bombazine, camlet, and sayes, sermills and tanneries. Pop. 1485.

SAUZET-DE-LIMAS, a vil. and com. Italy, Piedmont, div. Turin, prov. Susa, on the Dora, at the foot of the Yverdi-Bestridres with a parish church. Pop. 1166.

SAVA, a town, Naples, prov. Otranto 19 m. E.S.E. Taranto. Pop. 2000.

SAVAGE ISLAND an isl., S. Pacific Ocean lat. 19° 10' S.; lon. 169° 50' W. (u.); about 23 m. in circuit of a round form, and good height. It appears to consist wholly of coral-reefs, all overgrown with woods and bushes. It was discovered in 1774 by Cook, and was so called by him from the ferocious disposition evinced by the natives. It now (1854) contains two churches, two native teachers, and about 1000 inhabitants, 300 of whom profess Christianity.

SAVAII, an isl., S. Pacific Ocean; lat. (S. point) 15° 49' S.; lon. 173° 29' W. (u.) It is the largest of the Samoan group being 40 m. long, and 20 m. broad. Its shore is low and the ascent to the centre gradual except where the cones of some extinct volcanoes occur. In the middle of the island a peak rises above 4000 ft. visible at a distance of between 50 m. and 60 m. The interior has never been explored and is rarely entered even by natives. It produces spontaneously the citron, nutmeg, indigo coffee, and sugar plants. The S. side of the island is rocky and iron-bound with a heavy surf breaking on it. The only safe harbour is on the N. point, called the Bay of Matatua. Supplies of hogs poultry vegetables, wood and water, may be obtained here.

SAVANNA LA MAR—1 A town, Hayti republic of Santo Domingo, N.E. coast, S. shore of Samana Bay.—2, A small town, Jamaica, Fifehead Bay, E.W. coast.

SAVANNAH, a town and port, States Georgia, a bank river of same name, 17 m. above its mouth in the Atlantic on a canal connecting its river with the Ogeechee and on a

railway connecting it with some of the main lines of the river, and giving it immediate access to the basin of the Mississippi, 500 m. S.W. Washington. It stands on a sandy flat about 40 ft. above the water, and used to be considered unhealthy, partly on account of the marshes which bordered the flat at its E. and W. extremities and still more on account of the inundation of the neighbouring district for the subsidence

of rice. The latter evil has, however, in a great measure ceased in consequence of an arrangement with the proprietors of the rice-grounds, who have been induced by a payment of about £14,000, subscribed by the citizens, to cultivate the dry for the wet mode of cultivation. The town is laid out with great regularity in a series of spacious streets and squares, the former crossing each other at right angles, and generally lined with a double row of trees and the latter, about 20 in number formed by the intersections of the streets, and usually enclosing a space of about two acres, laid out in grass-plots and shady walks, so as to give the whole place, during the spring and summer months, an airy cool, and rural appearance. Up to 1834, a large proportion of the houses were constructed of wood, but in that year a dreadful conflagration having burnt down 463 of these, and destroyed property to the value of about £200,000 sterling, brick has been generally substituted for wood, and many improvements, tending to secure cleanliness, comfort, and health, have been introduced.

The public buildings include 13 or 14 churches, among which the independent Presbyterian church, an elegant structure, of light-coloured granite, erected at a cost of about £20,000, deserves particular notice; a Jewish synagogue, an academy, a courthouse, jail, exchange, several fine banking-houses, an arsenal, U States barracks, a market-house, theatre, female asylum, widows asylum hospital, and churches. The manufactures are insignificant, but the trade is important, and gives employment to its extent in the large number of warehouses, from three to four stories high, built along the river, so as to be accessible at once from the wharfs below and from the streets behind. The harbour is one of the best on the E coast of the U States. The bar across the mouth of the river has from 18 ft. to 21 ft. of water at ebb-tide vessels drawing 16 ft. or 18 ft. water get up to the Five-Fathom Hole, about 3 m. below the town, and thence drawing only 13 ft. get up to its wharfs. Beyond this the navigation is continued by steam-boats for 200 m. to Augusta, and by pole-boats for 150 m. farther. The commerce of Savannah has been greatly extended by railways, completed or in course of erection. The staple exports of Savannah are lumber, rice, and more especially vast quantities of upland cotton. The exports in 1853 comprised 873,000 bales of cotton - 9,992 casks of rice and 25,508,500 feet of lumber of which Britain received 110,408 bales cotton 7590 casks rice and 4,245,000 ft. lumber. In December 1854 the Confederate General General Hides captured Savannah, which was thenceforward occupied by the Federal General Sherman after his remarkable march from At-Lanta to the coast. The capture of Savannah was the first death-blow to the Confederate cause, which immediately began to decline rapidly. Pop (1858) estimated at 25,000.

SAVE, or SAV, a river Austria, rises in the E. slope of the Durmo or Julian Alps, in circle Laybach, Illyria, about 12 m. S.W. Willeh flows S.E. through Illyria, along the E. frontiers of Styria, and into Croatia, where, about 10 m. E. Patras, it receives its first important tributary, the Kalpa, which joins it on the right. On reaching the E. frontiers of Croatia, it receives its second important tributary the Una, which also joins it on the right. From this point, its course, though very sinuous, becomes on the whole E.N.E., and till its junction with L. bank Durnitz at Bolgrade, it forms the S. boundary of the Austrian dominions, separating them from Turkish Croatia, Bosnia, and Servia, and receiving from these countries - and, like the other tributaries already mentioned, all on the right - the Varha, Bosna, and Drin. Its whole course is about 540 m., and, with exception of the first part, which is between narrow and rather steep banks, is through an open country along which it winds with an almost sluggish current, not sufficiently overflowing its banks, and producing fearful devastation. The great length of its navigable course is of vast advantage to the surrounding districts, particularly by enabling them to find an easy market for their agricultural produce. Above the confluence of the Kalpa, it floats barges of 15 tons to 20 tons, and below, vessels of 150 tons to 200 tons.

SAVE, a river, France, rises in dep. Haute-Pyrénées, on the frontiers of Haute-Garonne; flows N.E., and joins L. bank Garonne, after a course of about 70 m.

SAVELLANE, a mountain, Persia. See SAVKAN.

SAVELLA, a river, dep. Loire-Inférieure, on a hill above the Loire, 22 m. N.W. Nantes. It is poorly built, has a fine sandy prairie, a court of first resort, and its

agricultural society. The Vendéens sustained a defeat here, by which their force was finally annihilated. Pop. 1150.

SAVENTHEM, a vil. and com. Belgium, prov. Brabant 4 m. N.E. Brussels; with a church; a brewery, paper, oil, and flour mills, and a trade in corn. Pop. 1310.

SAVERDUN, a tn. France, dep. Ardèche, L. bank Rhône, 20 m. N. Fots. It was anciently fortified, and, during the war of the Albigeons, successfully stood a siege by Simon de Montfort, who was finally obliged to retire. It is a general well built; and has a well-endowed hospital, saw mills, and silk-works. Pop. 2077.

SAVERNE [German, Rheine-Kehren or Zornen] a tn. France, a tn. France, dep. Bas-Rhin, on the Zorn, 18 m. N.W. Strasbourg. It is a place of great antiquity, and rises to some importance under the Romans. It was afterwards fortified and stood numerous sieges, particularly during the Thirty Years' war when it was repeatedly taken and re-taken. The modern town is irregularly built, and contains no edifice deserving of notice except the old episcopal palace, which has been converted into barracks and a prison, and the parish church, which is surmounted by a very ancient and lofty tower. The manufactures consist of woollen cloth, hosiery, copper and iron ware, leather, bricks, and tiles. The trade is in ironware, tobacco, and wood, which is floated down the Zorn. Pop. 5694.

SAVIANO, a tn. Naples prov. Lavoro, S.W. Nola in a fat and fertile district with three churches. Inhabitants chiefly employed in rearing silk-worms. Pop. 3550.

SAVIGLIANO, a tn. Italy Piedmont, prov. and 8 m. E. Saluzzo pleasantly situated in a fertile plain, at the confluence of the Maesa and Grana, the former watering its W. and the other its E. side. It consists of the town proper and several suburbs, and a well built, the principal streets being regular and spacious though these which intersect them are narrow and dark. There are also two squares, one of which is used for the public markets, a lined with porticoes; while the other, of a quadrangular form and considerable extent, is formed by regular and well-constructed houses. The principal buildings are four churches an oratory of great architectural merit, and richly decorated; three monasteries and a seminary a college and several schools, a large hospital or infirmary, a flourishing hospital, a house of refuge, and several other charitable endowments a handsome theatre and large cavalry barracks. The manufactures consist of woollens partly fine but chiefly of coarse quality; linen, silk, leather, refined wax, tapers, and candles, the principal trade, in addition to the above articles of manufacture, is in cattle. The French defeated the Austrians here in 1796. Pop. 15,546.

SAVIGNANO, -1 A tn. Italy The Romagna, toleg, and 19 m. S.S.E. Forlì. It is a fine country-town and was fortified in 1561. Pop. 5000 - 3 A tn. Naples prov. Capitanata 9 m. W.S.W. Bovino, on a hill. Pop. 1568.

SAVIGNONE, a tn. Italy Piedmont, div. and 12 m. N.E. Geneva. It is an ancient place consisting of steep and ill-paved streets, and an irregular square, and has an old feudal castle, a parish church, and a large structure, originally an hospital but now converted to private use. Pop. 3833.

SAVINDROGO, a hill fort. Mysore See SAVANNAH.

SAVINIEN (St.) a tn. France, dep. Charente-Inférieure, r bank Charente, 30 m. S.N.E. La Rochelle with a curious church of the 11th century, the ruins of an extensive monastery and a trade in corn wine, and brandy. Pop. 1516.

SAVIOUR (St.) four par. Eng. - 1 Devon, 85 ac. Pop. 2121 - 2 York (St. Richard), 3778 ac. Pop. 2769 - 3 1st Jersey, Pop. 1087 - 4 1st Jersey, Pop. 2404.

SAVONA a seaport in Italy Piedmont, div. and 24 m. S.W. Genoa, cap. prov. of same name, W. side, Gulf of Genoa, at the foot of a hill which commands it on the E. It is partly surrounded by old walls, and flanked by a citadel, but does not possess much strength. It has several good houses, but the majority are indifferent; and the streets, though well-paved, are inconveniently narrow. The objects most deserving of notice are the cathedral, a majestic structure, with fine pictures, bas-reliefs, sculptures, and carvings; several other churches, many of them rich; the seminary; six convents, two monasteries, an episcopal seminary, two colleges or gymnasia, a large hospital, and various other charitable endowments. At the harbour, which is good, and defended

by a fort, a considerable trade is carried on in silk, wool, and fruit. Savoy is the seat of a bishop, and the seat of a superior court of law, and several public offices. It was annexed called Sabaud or Sabaud, had bishops as early as the 7th century and had a large and flourishing commerce till the 18th century when the Genevois, who had become jealous of it, destroyed its harbor. Pope Sixtus IV. and Julius II. and the post Chablais, was born at Geneva. Pop. 16,811.

The river, area, 804 sq m, is bounded, N by prov Aquet, N.E. Geneva, S.E. and S. gulf of that name, S.W. Aiguille, and W. Mondovì. It is traversed in a N.E. direction by the Apennines, which here send the waters on its S. side in impetuous torrents to the Gulf of Genoa, and those on its N. side to the basin of the Po. Pop 79,748.

SAVOY (Duchy of) [Italian *Savoia*, French *Savoie*, German, *Sachsen*, Latin *Sabaudia*] formerly a div. *Sardinian* States, now forming two of the departments of France, lat 45° 4' to 46° 22' N. lon. 6° 30' to 7° E. bounded N by Switzerland, from which, on that side it is almost entirely separated by the Lake of Geneva; N.E. Switzerland, E. and S.E. Piedmont, and S. and W. France, length, h to S., 92 m., breadth, 66 m. area, 3597 sq m. Savoy is one of the most mountainous countries in Europe, the culminating point of this continent, Mount Blanc, lying within its territory in connection with the loftiest chain of the Alps, which stretch along its E. and S. frontiers, and sending out numerous ramifications in all directions, make its surface almost a continued succession of lofty mountains and valleys. It belongs entirely to the basin of the Rhone, which, forming its W. boundary, there receives its drainage directly while the drainage of the N. is transmitted to it chiefly by the Lake of Geneva and the Arve, and thence of the S. chiefly by the Isère and its tributary Arc. The lakes are not numerous; and, with exception of that of Geneva, which is shared with Switzerland, not individually of large extent. The most important are those of Bourget and Annecy. From the physical structure of the country the extent on arable ground is necessarily limited, but in ordinary years, with the aid of chemistry, which forms an important part of the food of the lower orders, the grain raised nearly meets the consumption. In favored spots, particularly in the N., in the lower valleys and slopes, the vine is cultivated with success. But the chief riches of the country are in its cattle and dairy produce, a large proportion of the surface yielding nothing but hay or pasture. The timber tree, which clothes many of the mountain slopes up almost to the limits of vegetation is of great consequence beyond these limits is a still higher region of perpetual snow and ice, where both vegetable and animal life are all but extinct. The minerals include iron, copper, silver, lead, and lignite, but seldom in such quantities as to make the working of them important; the rock-crystals found are often remarkable for their size and beauty. The manufactures consist chiefly of coarse woollens, leather and hardware. The trade, so far as derived from native resources, is almost confined to cattle, skins, wool, and dairy produce but there is an important transit trade carried on across the country between France and Italy, chiefly by way of Mount Cenis. By treaty of 24th March, 1860, Savoy was ceded by Sardinia to France, of which it now forms two departments, Savoie, pop. (1859) 975,989 and Haute Savoie, pop. 287,496. Under Sardinia it was divided into the prov. Chablais, Upper Savoy, Maurienne, Tarentaise, Annecy, Emmental, and Chablais.

SAVU, SAVO, SAVON, or SAVON, an isl. S. Pacific, between Iles. Timor and Sunda; lat. 10° 33' S., lon. 121° 35' E. (n.) about 21 m. long E. and W.; low to seaward, with hills of moderate height in the centre. At each extremity of the island there are low sandy points, with heavy breakers. It is well-watered and fertile, yielding millet, maize, beans, watermelons, sugar-cane, cotton, tobacco, indigo, betel, and cinnamon, with sugar-melons, amaranth, mangoes, loquats, etc. Buffalo, goats, sheep, horses, swine, dogs, and cats are plentiful there as are a few wild birds and deer and superabundance of swine, fish, and turtles. It is divided into five native principalities, all of which are subject to the Dutch government of Timor. Pop. 24,000.

SAWBRIDGEWORTH, par Eng. Herts; 6608 ac. Pop. 2631.

SAWLEY a vil. and par. England, co. and 9 m. S.E. Derby, on the Trent and Mersey Navigation, and on the rail-

way to Leicester. It is neatly built, and has a large and venerable church, with an ancient carved oak screen; a chapel of ease, and Baptist, Wesleyan, and Congregational Methodist chapels. Many of the inhabitants are employed in frame-work, knitting, and lace-making. Area of par., 1915 ac. P. 1934.

SAWTON, par Eng. Cambridge; 1856 ac. Pop. 1134.

SAWTRY, Aze. Bawtry, or St. Andrew, par. Angl. Huntingdon; 5780 (inclusive of St. Just) ac. Pop. 1871.

SAX [Latin, *Saxonia*] a m. Spain, Valencia, prov. and 26 m. N.W. Alicante, r. bank Vinalopó, on the side of a lofty precipice crowded by the ruins of an old castle. It has generally steep streets, a parish church, court house, prison, hospital and primary school, manufactures of coarse paper, several distilleries and oil and flour mills. Pop. 3196.

SAXAPAHAW, or HAW, a river U. States, rises in the N. of North Carolina, flows N.E. and unites with the Deep in forming the Cape Fear river after a course of about 80 m. SAXBY, three par. Eng. —1 Leicester 1480 ac. P. 140.

—2, Lincoln, 2323 ac. P. 120 —3, Lincoln 2323 ac. P. 278

SAXE-ALTEMBURG, *See* ALTEMBURG.

SAXE-COBURG-GOTHA, *See* COBURG.

SAXE-MEININGEN-HILDENBURGHAUSEN (German, *Sachsen-Meiningen Hildburghausen*) a duchy of Central Germany,

forming the seventeenth state of the Germanic Confederation, and consisting of a main body, and several minor portions isolated from it, and partly situated at a considerable distance as Kumburg, Kramrichold, and Lichtenhain. The main body consists of a long and narrow zone of a crescent shape, the concavity turned northwards, and bounded N. by Saxe-Weimar the district of Schmalkalden belonging to Hesse Cassel an isolated portion of Prussia, and the principality of Schwarzburg. W. Saxe-Weimar and Bavaria; S. Bavaria and Saxe-Coburg-Gotha, and E. Bavaria, Naumburg, and Schwarzburg. greatest length, N.W. to S.E. about 90 m., greatest breadth, 16 m. area, including the minor portions, 753 sq. m. It is hilly though scarcely mountainous, the loftiest summit being usually of moderate elevation and covered with forests. On the E. the ridges belong to the Frankenthal, on the V. to the Thuringerwald, and on the W. to the Rillingbirge. The greater part of the surface belongs to the basin of the Werra which traverses it, first in a W., and then in a N.W. direction. A small portion in the N.E. sends its waters to the Elbe by means of the Saale, and another small portion in the S.W. belongs to the basin of the Rhine being drained by some small tributaries of the Main. There are several small lakes and some mineral-springs. The higher districts though well wooded, are very bleak, and altogether unfitted for agriculture the best land is in the valleys of the Werra and Saale, but partly from its limited extent, and partly from the general inferiority of the soil, the corn raised is considerably short of the consumption, and requires to be supplemented by imports, chiefly from Bavaria and Gotha. The principal crops are oats, buckwheat, potatoes, turnips, and hemp. Hops tobacco, and even a little wine, are grown in the more sheltered localities. The pastures are abundant and rear considerable numbers of cattle, sheep, and horses. Many of the last are of a superior description. The minerals include iron and copper, and are worked into a small extent; sufficient lead, salt, sulphur, schist, slate, marble, porphyry, and fuller's-earth. Some pearls are found in a small stream, called the Steinach. Coal and bit. are abundant. The inhabitants are very industrious, and when prohibited by the nature of the soil from engaging in agriculture, manage to earn a comfortable subsistence by manufactures, chiefly of ironware, porcelain glass, and various ingenious articles in wood and pasteboard. The chief exports, in addition to these articles, are wool, salt, wool, and cattle. For administrative purposes the duchy is subdivided into four circles—Meiningen the capital Hildburghausen, Gotha, and Saxe-Weimar. The government is an hereditary and constitutional monarchy. The great majority of the inhabitants are Lutherans, but universal toleration is promoted. As the 17th member of the Germanic Confederation it shares the 12th vote, along with the other Saxon duchies. Its contingent of men is 1150 Pop. (1859), 165,362.

SAXE-WEIMAR, or **SAXE-WEIMAR-EISENACH** (German, *Sachsen-Weimar-Eisenach*), a grand duchy of Central Germany, forming the 15th state of the Germanic Confederation, and consisting of three larger portions, Weimar, Naumburg,

about 50 percent is covered with wood, and above 16 per cent with grassland and meadow. Not a spot capable of being turned to account is allowed to remain waste, and the land of industry is everywhere visible. The soil, however, is not in general of great natural fertility, and hence, though some of the lower grounds are very productive, the total yield of grain falls considerably short of the home consumption. The most important crops cultivated in regular rotation, are rye and oats next to these comes barley and last of all, wheat, for which the greater part of the soil appears not to be well adapted. One crop so universal, that it ought, perhaps, to be regarded as the staple, is potatoes. The chief subsidiary crops are pulse, rape, turnips, oil-seeds, hops, tobacco, flax, tassel mulder, and other dyestuffs. All the common orchard fruits, particularly apples, pears, and plums, are very abundant. Considerable attention is paid to the culture of the vine, which occupies considerable tracts on the E bank of the Elbe, between the towns of Meissen and Pulsnitz, and is also cultivated with success on the stony slopes both to the N and the E of Dresden. The grain-harvesting also is not neglected. Many artificial meadows have been formed, and heavy crops of the finest artificial grasses—timothy, timothy, clover, and ryegrass—are everywhere seen. Much of the fodder is employed on dairy stock, from which large quantities of butter and cheese of excellent quality are obtained. Large numbers of horned cattle are also fattened, and annually exported, to the number of 7000 or 8000 head, to Poland and Galicia. But the superiority of Saxony is nowhere so apparent as in its sheep, the breed of which, formed by careful crossing by the merino was brought to such perfection, as to create for them an eager demand in all countries where the improvement of the fleece was regarded as an object of importance. Hence the improved British breeds have derived many of their excellences from those of Saxony but as often happens, the scholar has in many parts equalled if not surpassed the master, and hence the superiority of Saxon sheep has become much less apparent in more recent times and the foreign demand has greatly diminished. The only other domestic animals deserving of notice are horses and swine of both of which superior breeds are found. Poultry, particularly geese, are very numerous the rearing of bees, once a very important branch of industry, has greatly declined, but that of silk-worms is still protected with considerable success, particularly in the vicinity of Leipzig, Dresden, Zittau &c. The great number of forests in Saxony naturally secures an abundance of game, and at one time bears and wolves were not uncommon, but the increase of population has so greatly diminished their numbers, that they are considered to be almost exterminated. Others of the larger kinds of game have also become scarce, but the smaller kinds continue to be numerous. The fishing in the lakes and rivers is tolerably productive, though strictly equal to the consumption. Among the species of fish are salmon, carp, pike, and trout. In some of the streams, particularly the White Elster and its tributaries good ponds are often found.

The minerals of Saxony form, perhaps, the most important source of its wealth, and have long been worked with great success, and a skill of which many other countries in Europe were contented to be only humble imitators. The metals comprehended almost every one of economical value with the exception of quicksilver, which does not seem to be found at all, and gold, which is found only in very small quantities, silver, found in connection both with copper and lead, is extracted annually, on an average, to the amount of 45,100 oz. The principal localities where it is found are Freiberg, Annaberg, and Schneeberg. The copper and lead ores which yield it are of still greater value. The tin, iron, and cobalt mines are also of great importance, and, though in much smaller quantities, zinc, bismuth, and arsenic are worked to considerable advantage. The final necessity for the smelting and refining of these metals also exists in great abundance. Not only are the extensive forests, covering nearly a fourth part of the whole surface of the kingdom, made available for this purpose, and, above, under a system of management, in which science and practical knowledge are alike conspicuous, but numerous streams, both of lignite and coal, are found in various districts, and are worked to a considerable extent. Other minerals of value are alum, copperas, mountain-green, ochre, magnesia, salt, potash, and porcelain earth. The

quarries furnish in abundance granite, marble, porphyry, basalt, roofing-slate, pavement, sandstone, limestone, and marble; and numerous beautiful crystals and pebbles, including in the former rubies, sapphires, garnets, topazes, &c., and in the latter, jaspers, agates and corals are found both in the Erzgebirge, and in the districts of Leipzig and Meissen. Mineralogical operations are remarkable not only for the magnificent scale on which they are carried on, but also for the consummate ability displayed, and not a few of the most eminent geologists of Europe willingly confine their obligations to the instructions which they received in the mining schools of Saxony.

The manufactures connected with the minerals just referred to, taken in conjunction with the mining operations themselves, give employment to a very large proportion of the inhabitants; but there are several other branches of manufacture distinguished for the ability and success with which they are carried on, and in two of which the long acknowledged superiority of Saxony to most other countries has only been recently called in question. The branches referred to are those of woollen cloth and porcelain. The excellence of the former was partly owing to the fineness of the wool obtained from the improved breed of sheep and hares, in every country where the Saxon broad-cloths were permitted to enter the market, they commanded higher prices than could be obtained for similar native products. It is said that the greater part of the fine wools of Saxony are now exported in a raw state, and that foreigners possessed of larger capital and superior machinery are able to give the wool-growers better prices than their own manufacturers can afford. The consequence is, that the present woollen manufactures of Saxony, though still extensive, have lost much of their reputation for superior fineness, and contain a much larger proportion of goods of an inferior description. In regard to porcelain, the fame of the Saxons was well-earned, because in addition to the excellence of the articles produced, they had the merit of inventing, or rather re-inventing the process. So long as they were able to keep the secret to themselves, the only competition to which they could be subjected was that of importation from the distant East, and a most lucrative trade was carried on. The Dresden kilns became famous over Europe, and many of its finer specimens were thought not unworthy of a place in the most celebrated collections of articles of virtue. The manufacture is now so successfully competed with in other countries, and has in consequence declined so much that it can scarcely now claim to be regarded as one of the great branches of national industry, but where the great body of the people have become thoroughly imbued with the spirit of industry the decline of one branch only makes way for the introduction of another, and hence several tissues previously unimportant have advanced with astonishing rapidity. At the head of these is cotton, which both employs numerous large factories, and is manufactured to a very large extent by domestic looms. The rapid extension of the cotton manufactures may be judged of from the following table, showing the number of spinning-mills and spindles in the country at different periods—

Year.	Mills.	Fine Spindles.
1824	14	270,825
1843	114	4,474,725
1848	223	5,412,825
1861		990,000

Other very important tissues are linen, silk, and mixed goods, and in connection with them and the other tissues must be taken the vast number of worsted, flax, and filling mills, which are scattered over the country, and meet the eye at almost every turn. Other manufactures deserving of notice are lace, in which great numbers, both of young and aged females, who might be sent for other labours, find the means of subsistence; hosiery, washcloth, straw-plait, wooden ware, including furniture; machinery, chemical products, musical instruments, tobacco, chocolate, and silken; paper, types, and books.

The trade, both external and internal, created by all these branches of manufacture, is necessarily very great, at the fairs of Leipzig (about 200) alone, business to above 25,000,000 is done. Its foundation was laid by the enlightened commercial policy which Saxony had the wisdom to pursue, when most

other countries were strangers to it, and its continuance is secured by a careful attention, not only to remove every obstruction to trade, but to afford it new facilities. Among these may be mentioned the introduction of the railway system, which has brought Leipzig and Dresden into immediate connection, not only with the other leading towns of Saxony, but with the great trunk-lines which now traverse the whole, at least, of central Europe, and the still more recent introduction of the electric telegraph system as kept in *Flieher, Grotchen, and Zymmer*. The telegraph is 24 or more exactly, 24, 1082. sterling, contains 80 new grotchen, each of which is divided into 14 pfennigs.

The government of Saxony as fixed by a constitution granted in 1831 and modified by the laws of March 31, 1849, and May 5, 1851, is a limited monarchy, in which the executive power is lodged solely in the crown, and the legislative power jointly in the crown and two chambers—a first and a second. The first chamber is composed of the princes of the royal family who have attained majority, the possessors of certain specified domains, certain individuals ex officio, 15 deputies chosen for life by the larger landed proprietors, and 10 individuals nominated for life by the king. The second chamber is composed of 20 members elected by the large landed proprietors, 25 by the towns, 25 by the peasantry and five by the trades and artisans. For each member of the second chamber a substitute is chosen to act in the case of his temporary absence or incapacity, or during the subsisting diet, in the event of his death. Every third year a certain proportion of the members of the second chamber retire, but, in supplying that vacancy, the retiring members may again be elected. Justice is administered by three classes of courts, or courts of primary, secondary and tertiary resort (*erste, zweite, and dritte instanz*). The first includes all the inferior courts of the kingdom, as *Justiz-amter, Haupt-gerichte, stadt, and gerichtshof-gerichte*, the second consists of the four appeal courts (*Appellations-gerichte*) which hold their sittings at Dresden, Bautzen, Leipzig and Zwickau, and have each jurisdiction within the four circles of same name, the third is confined to the supreme court of Dresden (*Rechts-Appellations-gerichte*), whose jurisdiction includes all kinds of cases, and extends over the whole kingdom. In regard to religious and moral toleration is guaranteed, but the only religious bodies specially recognized by the state are the Lutherans (*Evangelisch-Protestantische Cultus*) who form sixteen-twentieths of the whole population, and have 35 dioceses (*episcopus*) 379 parishes, and 1199 churches, the Calvinists (*Reformirter Cultus*) who have only two parish churches and four ministries; and the Roman Catholics, who are under an apostrophe year have 14 parishes and 19 churches, and possess more influence than would naturally belong to them, by counting the royal family among their adherents. At the head of the educational establishments of the kingdom is the university of Leipzig. Next to it, in order, are seven gymnasia, situated in the principal towns 11 normal schools and a considerable number of upper town, and grammar schools. For elementary education one school at least is opened in every parish, and all the children between six and fourteen are understood to be in attendance, in 1849, of 315,135 children between the ages of six and fourteen, which the king then contained, 411,454 were actually attending school. By this means, Saxony has become one of the best educated countries in Europe. The revenue in 1851-2 was £1,242,558 raised from the rent of land and other crown-lands, and by direct and indirect taxation, in 1850-51 it was £1,683,740. The expenditure in 1850-51 amounted to £1,404,780, and in 1851-52 to £2,048,847. The amount of the debt in 1852 was £6,457,711; in 1854 £1,036,527. The army is raised chiefly by conscription; all male citizens, with a few specified exceptions, being bound on attaining their 20th year, to serve for six years in the army, and three years in the reserve. The effective force amounts to 25,950 men. After the defeat of Austria by France in 1866 Saxony permitted to retain her independence, but had to place her army under the command of Prussia.

Saxony owes its name to the most ancient and distinguished of the nations of Germany. Not contented with their territories, which they reached from the Elbe to the Rhine, they penetrated far into France, and fitting out powerful naval armaments, ultimately made themselves masters of the far

Sea portion of Great Britain. The inhabitants of Saxony are said still to bear a remarkable resemblance, in person and manners, to those of our own island. It is impossible, however, to trace back the history of the existing kingdom of Saxony to a very remote period, though the reigning family claim descent from the celebrated Wittekind, who was vanquished by Charlemagne. The earliest existing records connected with the present kingdom belong to the 10th century, when Henry I., king of the Saxons, made a considerable addition to his territories, which from that time came to be distinguished by the common name of Saxony. In 1433 Saxony became an electorate, in the person of Frederick the Brave, by whom the university of Leipzig was founded. His successor had two sons, Ernest and Albert, who shared the electorate between them, and became the heads of two separate branches, of which the Albertine is represented by the king of Saxony. Its history now becomes extremely interesting, being in fact that of the Reformation, which here had its cradle, and successfully passed through the first years of a precarious existence, preparatory to its complete development and the noble triumph which it continued to achieve. All its army was acknowledged by half of the population of Europe, and by far more than the half of its intellect and virtue. The more recent history of Saxony furnishes few incidents deserving of particular notice. The great body of the people have never forgotten the benefits which the Reformation conferred on them, and clinging to it with strong attachment, have been rewarded by a general diffusion of intelligence, and a great increase of commercial prosperity. Unhappy, however, they have at times been sadly misled by their political advisers, and the blunders committed during the war of Liberation have cost them a large portion of their territory. When almost every other power in Germany had thrown off the tyrannical yoke of Napoleon, the king of Saxony continued to give him a cordial adherence, calculating, perhaps, that some sudden turn in his favour might again place his master in the ascendant, and displace him, not only to confirm his kingly title, but still further extend his territories, so as to make them more worthy of the name of kingdom. The crooked policy did not succeed, and though at last the Saxons were turned against Napoleon, it was only on the field of battle, in circumstances which gave the act all the appearance, and not a little of the reality of treachery. Such an act could not be honourably rewarded, and hence, in the new arrangements carried into effect by the Congress of Vienna, though Saxony was permitted to continue a kingdom, it was with such a curtailment of territory as deprived it at one stroke of nearly 1,000,000 of inhabitants. Still, even within its present limits, it holds an important station among the German states and possesses almost inexhaustible sources of prosperity, both in its natural resources, and in the industry and intelligence of its people.

SAXONY (PRUSSIA), a great Prussian monarchy of very irregular shape, bounded, W by Hanover, Brunswick, and Hesse-Cassel, S. the Saxon duchies and kingdom of Saxony and E. and N.E. by Brandenburg. It has also several isolated districts, and includes Anhalt-Dessau and Schwarzburg. It consists of the three towns, Magdeburg, Merseburg, and Erfurt, which have a united area of 2869 sq. m., and owes its name to its having originally belonged to Saxony from which the far greater part of it was dismembered, and given to Prussia, by the Congress of Vienna. Pop. 1,781,830.

SAXTEAD, par Eng. Sedfold 1702 ac. Pop. 441.

SAXTHORPE, par Eng. Norfolk, 7118 ac. Pop. 856.

SAXTON, par Eng. York (W. Riding); 4023 ac. P. 489.

SAYN, a vil. Prussia, gov. and S. m. N. Gohls, at the confluence of the Weichsel and Saynbach, with a fine castle, a blast-furnace, and other iron-works. Pop. 1130.

SAYFAR, or **SERFAR,** the largest of the Marston Is., 26 m. long, N to S., lat. 16° 20' N.; lon. 145° 50' E. (s.) It is distinguished by a very good 2000 ft. high. It is fertile and wooded, abounds with lions, leopards, and wild dogs; and has also some cattle.

SAXAWA, a river, America, rises in Bohemia, near the frontiers of Moravia, flows E. through Bohemia, and joins 1 bank Moldau, about 15 m. above Prague; total course, about 120 m. No part of it is navigable; but from Ledetich it is much used for floating timber.

SCAFATI a *tn*, Naples, prov. Principato-Citra, 14 m. N.W. Salerno, a bank *terro*. Its site is unhealthy. P. 2390.

SCAFELLA, or **SCAW FELLA**, a mountain, England, in S. of Co. Cumberland, near the borders of Westmoreland, consists of two principal summits, separated from each other by a deep chasm, and differing only 66 ft. in height, the one being 3166 ft., and the other 3100 ft. It has a nucleus of granite, overlain by slate, but its summit is composed of trap-porphyrus. Barroville, famous for its graphite, is immediately E. of it.

SCALA, two *tas*, Naples—1, Prov. Calabria-Citra, 10 m. S.E. Rossano, on a mountain, near 1 bank Fusonetto with a collegiate church. Pop. 1800.—2, Prov. Principato-Citra, 8 m. W. Salerno, at the foot of a mountain, near the Gulf of Salerno, with a cathedral and seven parish churches, two universities, and an hospital. Near it are lead mines. P. 1700.

SCALA NUOVA [*anc. Neopolis*] a seaport *tn*, Asiatic Turkey, at the head of the gulf of same name, 40 m. S. Smyrna. Lat. 37° 19' 50" N. lon. 28° 34' E. (n). It is built on a steep and rounded hill which overhangs the sea, and faces N and W. Though highly picturesque in appearance, its houses are poor and wretched. Part of the town is isolated by a strong and massive wall. The Gulf of Scala Nuova, the S. side of which is formed by the island Samos, is about 45 m. long, and 30 m. in S.W. broad.

SCALAPLAVO, a *vil* Sardina. See **SCALAPLAVO**.

SCALBY, par. Eng. York (N. Riding), 11 985 ac. Pop. 1839.

SCALDAROLE a *vil* and com. Italy Piedmont, div. Novara, prov. Lomellina in a fertile plain. It has a church. Pop. 1049.

SCALDWELL par. Eng. Northampton, 1060 ac. P. 893.

SCALÈA, a *tn*, Naples, prov. Calabria-Citra, 39 m. N.W. Cassano, on a hill, near W. shore of Gulf Policastro. It contains three churches and a convent. Pop. 2089.

SCALEBY, par. Eng. Cumberland, 3100 ac. P. 596.

SCALFORD par. Eng. Leicester, 2520 ac. Pop. 655.

SCALLOWAY, a *vil* Scotland Shetland *isls*. W. side of Mainland, 6 m. S. by W. Lerwick. It is a very ancient place, and was once the capital of Shetland. It contains a number of good houses, a parish church, independent chapel and a school, and has recently acquired some importance from the herring-fishery. A little E. of the village is the ancient castle of Scalloway, overlooking an excellent harbour called Scalloway-Voe.

SCALPA, two small *isls*. Scotland, co. Inverness.—1, One of the Inner Hebrides, off S.E. coast, Skye, and between it and the mainland, lat. (N. point) 57° 30' N. lon. 6° W. of an irregular oval shape, and about 8 m. by 2 m. in extent. It consists of a single mountain, with an uneven summit and rounded outlines.—2, One of the Outer Hebrides, off N.E. coast, Harris, lat. (S.E. point) 57° 50' N. lon. 6° 35' W. about 8 m. long and 1 m. broad. It is low, but is conspicuous from its lighthouse.

SCALPA FLOW, a beautiful bay Scotland, to the N. of the Foulard Firth about 50 m. in extent, formed by 13 different islands of the Orkney group, containing numerous lagoons and safe roadsteads, with outlets to the firth, the North Sea, and the Atlantic Ocean. The bay takes its name from the village of Scalpa, situated on its shores, about 1½ m. S. Kirkwall.

SCAMANDER, or **KARISTUS**, a river Asiatic Turkey, said to have had its source not far from the site of ancient Troy, and the scene of many exploits celebrated in the *Iliad*. It has now either altogether disappeared or become so very insignificant that its identity is a subject of dispute. It joined the Simois, which is supposed to be the modern Menderes-Su.

SCAMLEBY, par. Eng. Lincoln 2150 ac. P. 582.

SCAMPTON, par. Eng. Lincoln 2147 ac. Pop. 228.

SCANDEROUN, seaport, Syria. See **ALEXANDRIA**.

SCANDIANO a *tn*, Italy, county and 12 m. W. S.W. Modena, with a castr. Arcofo is supposed to have been here.

SCANDINAVIA, the ancient name of Norway and Sweden (which see).

SCANIA, an ancient Swedish prov. now forming the Malmö and the Kristianstad.

SCANNO a *tn*, Naples, prov. Abruzzo-Citra II., 10 m. S. S. Bettona, in an unhealthy site. It contains two convents. Pop. 2000.

SCANBARO, a *vil* and com. Turkey 11 m. S.E. K. Groussa, with a church, and a trade in potash, charcoal, and timber. Pop. 1688.

SCANZANO, a *vil* Naples, prov. Naples near Castel-Mare. It consists of three separate hamlets, and contains three churches, and a Dominican convent. Pop. 2000.

SCARBA an *is.*, W. coast, Scotland, co. Argyll, N. of Is. Jura, from which it is separated by the Gulf of Garryvreckan. It is nearly of a circular form with a diameter of 5 m.

SCARBOROUGH, a town and par. bor., market *tn*, and seaport, England, co. York (N. Riding). The town is beautifully situated on the declivity of a high steep rock, in the recess of a fine open bay on the North Sea, 88 m. N.E. York, with which it is connected by railway. It consists of numerous streets, lighted with gas, rising in successive tiers from the shore in the form of an amphitheatre, and contains several elegant terraces, crescents, and isolated mansions. It has a townhall, custom-house, jail, assembly-room and theatre, several Established churches, and places of worship for Independents, Methodists, Baptists, Presbyterians, E. Catholics, &c. a grammar, Lancasterian national and various other schools several hospitals, and a sea-bathing infirmary for poor invalids, supported by subscription. a museum of geology and natural history a mechanics institute, two public libraries, and a philosophical society. Scarborough is much frequented for sea bathing and for its mineral waters, which have long been in repute. These last are obtained from springs on the sea-shore under a cliff, and are approached by a bridge resting on piers 70 ft. high and leading across a chasm 400 ft. wide. They contain carbonate and sulphate of lime, magnesia, and oxide of iron, and are esteemed efficacious in stomach complaints. Scarborough harbour is the only port of any consequence on the E. coast between the Humber and Whitby, and is used as a place of shelter from the E. gales which prevail on this coast though confined at the entrance, it is easy of access and safe and commodious within. The bay is protected on the N.E. by a high promontory, on which the castle stands. The port to which the privilege of bonding was granted in 1541 is a member of that of Hull. It carries a limited foreign trade, principally with France, Holland, and the Baltic and a considerable trade in corn, butter, bacon, and salt-fish, with Newcastle, Sunderland, and other places on the coast. Ship-building, rope and sailcloth making are carried on but to a much less extent than formerly. The fishery, once a source of great profit to the town, has also declined, although there still exists here an establishment for curing harrings. On the summit of the promontory on the N.E. side of the bay, 200 ft. above sea-level, are the ruins of the celebrated castle of Scarborough. The borough sends two members to Parliament. Pop. 12 915.

SCARBOROUGH or **LOS DUMOS JANDRE**, a group of *isls*, N. Pacific, W. of the Marshall Archipelago, lat. 21° 40' N.; lon. 151° 55' E. They are of small size, and so insignificant that some doubt is entertained as to their identity.

SCARLIFF par. Eng. Derby 3674 ac. Pop. 572.

SCARDONA or **SCARDIN**, a *tn*, Austria, Dalmatia, circle and 30 m. S.E. Zara, a rank *terro*, in a situation rendered unhealthy by miasmata. It consists of little more than a single street, but is well built, is the seat of a bishop, and the seat of several public offices, and has a cathedral and the ruins of a Turkish castle overlooking the town. The harbour admits only small vessels, but some trade is carried on, chiefly with Turkey. Scardona was a place of considerable importance under the Romans. In its vicinity the Kerka furnishes some fine cascades. Pop. 1200.

SCARENA, a *tn* France, dep. Alpes Maritimes, 10 m. N.E. Nice, on the Fugione with a court of justice a church, several convents, an hospital and two schools. Pop. 1505.

SCARLEIF—1, A small *is.* Ireland, co. Clare, 17 m. N. by E. Limerick on a river of same name, here crossed by a bridge. It has a E. Catholic chapel and wool washhouse. Pop. 954.—2, (or *Scarl*), A small inhabited *is.* Ireland, co. Kerry S.E. side of Ballyvaughan Bay, 2½ m. S.W. Hog's Head, about 1 m. in length, by ½ m. in breadth. It is lofty, bold, and rocky, and feeds a few sheep and cattle.

SCARLE, two par. Eng.—1, (North), Lincoln; 1955 ac. Pop. 685.—2, (South) North; 2050 ac. Pop. 810.

SCARMAGNO, a *vil* and com. Italy, Piedmont, div. Turin, prov. and about 7 miles S.E. W. Ivrea, formerly ear

the line of traffic between Switzerland and Germany gives it an important transit trade. It has several provincial courts and offices, a college or gymnasium, with nine professors, and a good library. The environs of the town are beautiful, and afford many fine promenades. About 8 m below it are the

factures of white chalk, and some transit trade.—3 A mountain pass, known anciently under the name of Porta-Glandia. It follows the valley of the Isar and leads from the Tyrol into Bavaria. The Tyroleans here distinguished themselves in their struggles against the French in 1809.

SCHAFTHAUSEN
From Franz's *Merkmale in Fria u. Schwyzland*, and Italy

celebrated falls which bear its name and by which the whole volume of water in the Rhine, which is here nearly 500 ft. broad, is precipitated over a height of more than 70 ft. in three separate sheets, formed by two isolated pillars of rock. Schaffhausen is the birthplace of the historian Voltaire's son. Müller. Pop. 7710.

SCHAFHUSEN a market in Holland prov N Holland 29 m N by W Amsterdam. It has a townhouse, two churches, two orphan hospitals, two schools and several important textile and sheep farms. Pop. 13,450.

SCHAGALLI a vil and township in States, New York, 16 m. N. by E Albany on the Hudson with extensive cotton linen and hempen manufactures and grist saw and powder mills. Pop. 3590.

SCHAIKAL a tn Saxony-Meiningen on the Its 28 m. E S E. Meiningen. It has a church and a trade in cattle. Pop. 1037.

SCHALKWIJK a vil Holland prov and 8 m S. H. Utrecht with Protestant and 1 Catholic churches. Pop. (agricultural) 789.

SCHAL or **SCHAL** a lake, Germany, principally in the L. of the duchy of Lauenburg belonging to Denmark, but partly also in the W. of Mecklenburg between Jemnitz, N to S about 10 m. mean breadth under 2 m. at its S. extremity discharges itself by the Schall into the Rugitz, an affluent of the Elbe.

SCHILAMA a volcanic summit, Peruvian Andes. See GUALATEPE.

SCHIMAKHI a tn and gov Transcaucasian Russia. See SHIMAKHI.

SCHIMMELARI mountain, Thuringia. See CHIMMELARI. **SCHIMMELARI** a tn Saxony circle and 21 m. S. E. Dresden, 7 m. N. by E at the junction of the Ostrabach. It contains a church, hospital and the ruins of an old castle and has a chalybeate spring with a bathing establishment, which is much frequented. Manufactures of tobacco and two mills. Pop. 1638.

SCHLAUMHUI a tn Saxony, a state Germany. See SCHLAUMHUI.

SCHLAWAT a tn Central Asia, Khokand and 22 m. N. Khiva on a canal of same name 10 m. from the Amu-Darya. It is surrounded by an earthen wall in a very dilapidated state, and consists of a comfortable number of earthen huts, irregularly placed and generally separated by gardens. It contains a castle of the Khan a mosque and 100 but the fortification is decayed. It is inhabited by Uzbeks.

SCHLACK a tn Russia, gov and 94 m. N. W. Tambour on the Nevelska. It is an old and ill built place, contains three stone and five wooden churches and several government buildings and has manufactures of linen and a trade in hemp. Pop. 1861. 688.

SCHLEMDA a vil Holland prov and 17 m. E. E. Groningen on the canal thence to Windevoorde with a church and a school. Pop. (agricultural) 928.

SCHLEIDENBURG a tn Saxony circle and 11 m. S. E. Zwickau at the foot of a lofty hill of same name. It contains a church and has manufactures of ribbons and lace, earthenware, and paper maché. Near it some iron and silver are found and there are limekilns, and a marble-quarry. Pop. 1638.

SCHKEI, or **SCHKEI** a tn Transcaucasian Russia, gov and N. W. Shumakhi cap. Khanat of same name, on a height above the Selkighian in a mountainous and fertile district. It consists of about 600 houses, and has a mountain fortress. The Khanat is very mountainous in the N., where it is covered by the snowy range of Salawat, separating it from Daghestan. From this direction it slopes gradually, though the surface is much broken. On the lower slopes the vine is extensively cultivated. The cotton-plant also thrives and much silk is obtained. Fruit is very abundant. The principal regular crops are grain and rice.

SCHIEDT a river Europe. See **SCHIEDT**.
SCHIEDT, a v. and com. Belgium, prov. E. Flanders, on the Scheldt 7 m. S. Ghent. It has manufactures of linen and cotton goods, brick works and an oil and a flour mill. Pop. 1063.

SCHIEDEWINDPARK, a v. and com. Belgium, prov. E. Flanders, on the Molenbeek, 9 m. S. Ghent. It has manufactures of linen, two flour-mills and a trade in corn. P. 1063.

SCHIEDT (Dutch, *Schiedt*, French, *Escout*, Latin *Scutula*) one of the most important rivers of Belgium and the Netherlands, issues from a small lake near Beauraive on Mount St. Martin in the French dept. Aisne flows circum-

navely E. past Cambrai to Coude where it first becomes navigable then N.W. past Tournai in the Belgian prov. Hainaut to the frontiers of W. Flanders then N.E. be-

tween these two provs into that of E. Flanders, passing Oudenarde and reaching Ghent. Here receiving the naviga-

ble, it is joined by two large canals which maintain the communication between Bruges, Ghent, and Sea; it

turns nearly due E. and maintains that direction till it passes Dendermonde and reaches the frontiers of prov. Antwerp,

after which, during the remainder of its course through Bel-

gium, it flows circumnavely N. forming the boundary between provs. Antwerp and L. Flanders. At the city of Antwerp

owing partly to the influence of the tide it attains a breadth

of about 1600 f. and a depth of 45 f. and becoming still

water immediately below forms a spacious and secure har-

bour capable of receiving the largest ships. About 15 m.

below Antwerp, shortly after reaching the Dutch frontier it

divides in the E. and the W. Scheldt. The latter which

is called Ron and is the main stream flows W. between the

mainland of Dutch Hainaut on the E. and the islands of

Belgium and W. Flanders on the W. and falls into the North

Sea a little below Eindhoven, the other called the E. Scheldt

winds round the E. and W. sides of the island of Dordrecht

and then between the S. of the same island and the S. of it

between forming a broad ventral. Both of these arms are

in communication with the Meuse and the Rhine. The whole

course of the Scheldt is 211 m. Its principal affluents are on

the right the Haine, Dender and the Rupel formed by the

union of the Seine, Dyle and Nete and on the left the

Meuse, Scarpe and Lys. The mouth of the Scheldt bears

almost directly opposite to that of the Thames adds great

both to its naval and commercial importance.

SCHIEDEWINDPARK (see *Telefoon*) a v.

France, dep. Bas-Rhin 1 bank III 21 m. S.W. Strasbourg

on the railway to Basel. It ranks as a fort. of the fourth

class, is surrounded by wall & flanked with bastions and other

works fortified by Vauban in the form of an irregular octagon.

It is entered by three gates. The houses are irregularly

built, and the streets though clean are narrow and winding.

The principal edifices are the parish church of St. George a

Gothic structure of the 14th cent. with a square tower

180 ft. high the church on the S. and falls into the North

Sea a little below Eindhoven, the other called the E. Scheldt

winds round the E. and W. sides of the island of Dordrecht

and then between the S. of the same island and the S. of it

between forming a broad ventral. Both of these arms are

in communication with the Meuse and the Rhine. The whole

course of the Scheldt is 211 m. Its principal affluents are on

the right the Haine, Dender and the Rupel formed by the

union of the Seine, Dyle and Nete and on the left the

Meuse, Scarpe and Lys. The mouth of the Scheldt bears

almost directly opposite to that of the Thames adds great

both to its naval and commercial importance.

SCHIEDEWINDPARK (see *Telefoon*) a v.

SCHELLENBERG a tn. Saxony circle Zwickau 8 m. E. Chemnitz. It has a church and manufactures of linen and yarn. Pop. 1493.

SCHELLING (Tux) on Isl. Holland, prov. N. Holland

10 m. off the coast of Friesland, between Isl. Vlieland and

Ameland lat. (W. and E.) 53 21 36 N., 1 m. 5° 13 10' E. (N.)

It is about 15 m. long, N.E. to S.W., by 8 m. broad flat and

sandy exposed in some parts to inundation and has on its

N. coast broad banks on which many vessels are wrecked.

It possesses some good arable and meadow lands, yielding

corn and grazing cattle and a horse breeding establishment,

producing 180 foals annually. The inhabitants are chiefly

sovereign pilots, and fishermen. The island is divided into

Oster and Wester Schelling, the latter comprising only the

village of that name besides which there are the small vil-

lages of Midland and Hoorn. Pop. 2743.

SCHELLING (Werra) a vil. Holland, prov. N. Hol-

land on the extreme S.W. extremity of Isl. Tex-Schelling

with a church and school. The point on which this village

stands is protected from the sea by strong dykes. At the

N. end of the village is a lighthouse. Pop. 1869.

SCHEMATIZI Transcaucasian Russia. See **SHAKUMI**.

SCHENITZ or **SCHENITZ** Hungary, on the Danube

65 m. N. by W. Budapest 2282 ft. above the sea level.

It was once surrounded by walls, of which, however,

only a few traces now remain, and is very irregularly built.

It contains a Protestant and four E. Catholic churches, a

townhouse, castle two large mansions one called the Hobe-

haus and the other the Hellenbachhof and an im-

portant academy founded by Maria Theresa in 1769 in which

a very complete mining education is given. The mines of

Schenitz were long regarded among the most important in

Europe, yielding gold, silver, lead, copper, iron, arsenic,

and sulphur. The works have been carried to the depth of

181 fathoms, but the produce has, in recent times, greatly

fallen off. In the neighbourhood are the celebrated thermal

baths of Eisenbach or Viehny. Pop. 1846, 18 100.

SCHENDELBEKE a vil. and com. Belgium, prov. E.

Flanders, on the Dender near the road from Grammont to

Alost, 24 m. S. E. Liège. It has manufactures of linen and

yarn two flour mills, and a trade in corn. Pop. 1185.

SCHENIDTZA, a tn. Prussian Saxony prov. and 9 m. E.

Mersburg. It is an ancient place and has a Protestant

church, a chapel and a trade in timber. Pop. 3040.

SCHENKOTADY a tn. U. States, New York, 7 bank

Mohawk on the Erie canal and the railway from Albany and

Troy to Buffalo 17 m. N. W. Albany. It consists of about

20 streets built with considerable regularity but intersected

diagonally by the canal and has Dutch Reformed Presby-

terian Episcopal Baptist, Methodist, Cameronian Univer-

salist, and E. Catholic churches, a city hall and jail Union

college, occupying three large buildings of brick, covered

with white stucco each 300 ft. long, and four stories high

possessed of a valuable library of 15 000 vols apparatus, &c.

and attended in 1850 by 230 students a library a female

seminary and many other schools. Previous to the opening

of the Erie canal and the Albany and Mohawk railway,

Schenectady was a great depository of the commerce of the

W. on its passage to the Hudson. But much of this trade

has since been transferred to Albany and Troy. Its prosper-

ity however after suffering a decline, has been in some mea-

sure revived by the railways which have made it a common

centre, and the increased traffic on the canal, for the packet

boats of which, conveying large numbers of emigrants it has

always been an important station. Its manufactures include

a cotton and three flour mills three tanneries two foundries,

two machine-shops, a tobacco, and a plough and wagon fac-

tory. In its early struggles, Schenectady was repeatedly the

scene of cruel atrocities by the French and their barbarous

Indian allies. Pop. (1850) 8321.

SCHENKLE (see *Telefoon*) a market in Home Cassel

prov. Fulda, 6 m. S. E. Harsfeld, on the Main. It has four

mills. Pop. 1841.

SCHENKURSK a tn. Russia, gov. and 193 m. S. E.

Arhangel on the Vaga. It contains a church. Pop. 480.

—The crux, the most E. of the gov., between Olinda

and Olinda, is covered with lakes and swamps, but has con-

siderable tracts of fertile land, which, in good years, supply

the home consumption and leave a surplus for export.

SCHENNIS, or SCHNIS a vil and par Switzerland con, and 34 m S.W. St Gall at the foot of a mountain of same name, r bank Luth. Pop 1744.

SCHETDAEL, a vil and com Belgium, prov Brabant, 9 m W Brussels, with a flour-mill Pop (agricultural) 1661.

SCHETPAH, a vil Bavaria, circle Swabia, dist and near Bregenz with a R. Catholic church a mill and a trade in wool obtained from a large forest in the vicinity P 1004.

SCHERBOLCK, or SCHERBOURG, a tn Rhineish Prussia, gov and 33 m N Düsseldorf, with a Protestant church a cattle manufacturers of woollen and linen cloths mail and earthenware and several cotton mills 1 op 632.

SCHESKLEW, a tn Russia gov and 73 m N W Pensa at the confluence of a stream of same name with the Kama. It has two wooden churches and a large brandy distillery 1 op (1842) 2049.

SCHESLITZ, a tn Bavaria Upper Franconia, on a stream of same name, 22 m W N W Bamberg with two churches, a chapel, townhouse, and hospital manufactures of potash, a brewery and tannery, and a trade in wood Pop 1054.

SCHERVEN, a vil Rhineish Prussia, gov Düsseldorf circle and near Elberfeld with manufactures of linen and cotton goods Pop 1425.

SCHWINGEN, an important fishing in Holland prov S Holland 3 m W the Hague. It has a Reformed and a R. Catholic church a town school attended by about 800 children and several other schools, an hospital for old men and another for old women, an elegant bathing establishment, and in the vicinity a Royal Lavilion in the Tuscan style built in 1829 by King William I. It has also three boat building yards a rope walk, smithy and sail loft, but the great staple of the place is the taking and disposing of fish. Fresh fish are sent to the Hague, Breda, and Rotterdam and cod, dried fish smoked herrings and shell fish are largely exported to Belgium Germany, &c. Schwingen is likewise much resorted to for sea bathing Pop 5009.

SCHIALKOWITZ, or SIAKOWICE (Ait and Slav) two nearly contiguous vils Russia, prov Silesia, gov and not far from Oppeln with a R. Catholic church and a mill 1 1726.

SCHIAVI two places, Naples - 1 A tn prov Abruzzo-Citer, S E W U Vasto, on a lofty eminence at some distance from 1 bank Trigno 1 op 2190 - 2, A tn prov L'Aquila S E Sora with an hospital and an interesting spring Pop 1500.

SCHIEDAM a river port Holland prov S Holland 4 m W Rotterdam, near r bank Meuse where it is joined by the Schou, an artificial water-course formed some centuries ago for the purpose of draining the country around Delft, where it commences. The town is very regularly built, has broad streets many good looking houses, and numerous canals, one of which unites the Schou with the Meuse, and presents on its banks a pleasant promenade named the Plantsoe.

It was formerly fortified but of its four gates only the remains of one now exist and along the site of the walls stand 17 elegant stone corn and malt mills. The chief edifice and institutions are the townhall, the exchange, extended the finest building in the town the Doelen or gathering-place, the Meuse Baan an elegant concert-hall two Reformed churches and Lutheran Dispensary R. Catholic, and Jesuit churches; Latin, drawing, commercial and many other schools; a public library a physical and a mineral society, and numerous hospitals for the sick, for orphans, old men and women and other benevolent institutions. The manufactures of Schiedam include copper and iron casting, white lead and litharge, linen-weaving and flax-spinning vulgar-works, breweries, rope-walks, and building yards, but the article for which it is most noted is gin or Hollands usually known by its own name Schiedam for the manufacture of which, and other spirituous liquors there are 170 distilleries in the town and its vicinity. Beside the trade in gin, it has a considerable

trade in grain and coals. In 1801 there arrived 248 vessels, tonnage 55,521 and there departed 243 vessels, tonnage 41,505 Pop 1850 1874.

SCHLITZ, a tn. Germany, on the Hesse Schleife I bank Wiesenthal 24 m. S. W. Gera. It contains a castle, four churches normal school orphan asylum and infirmary and has manufactures of woollen cloth a tannery brewery distillery a general trade and several mills. Pop. 4850.

SCHLITZ a tn. Prussia. See Gumb.

SCHLESWIG (Duchy of) (Hawke's River), a prov. Prussia bounded N. by N. Jutland, from which it is separated by the Stodborger or Lauenburg the Holting Ford, and a short tract of land lying between these waters. E. the Little Belt and the Baltic S. Holten from which it is separated by the Eider and the Schleswig Holstein canal and W. the North Sea or German Ocean average length 42 m. average breadth 46 m. area, including the adjacent islands 2,000 sq. m. Schleswig being only the N. portion of the peninsula, which is still some times comprehended under the general name of Jutland and was known in ancient times as *Chersonesus Comen* naturally bears a considerable resemblance to the N. portion or great N. Jutland of which it may be regarded as the continuation. Hence the same physical features which characterize the latter province are repeated in Schleswig but in a somewhat modified form. Lakes N. Jutland it has its central ridge stretching N. to S. and presenting a considerable expanse of dreary heath, in W. coast of sandy flats with a long line of shoals and quagmires where vessels at no time sail with safety and in times of greater danger find no harbour in which they can take refuge; and its E. coast where everything assumes a more favourable form, where the coast is scooped out into five natural harbours, where the eye is constantly delighted by scenes of rural beauty and the labours of the husbandman obtain an easy and ample reward. Where there is a difference in the physical features of the two provinces, it is almost invariably in favour of Schleswig. The shifting sand which makes many parts of the northern province a mere desert are here unknown. The land of the central moorland is greatly circumscribed, and those of the rich meadow flats greatly extended. In Schleswig for though this can scarcely be considered an advantage the general slope to the W. is most important as the great Jutland and hence all the important streams, without a single exception flow in that direction. The chief of these in addition to the frontier rivers already mentioned, are the Ripe or Ripen Hyd and Treene. In the lower part of their course, their volume is so much increased and their banks become so low that, particularly in winter and spring inundations are not uncommon, and the artificial aid of dykes and sluices becomes necessary as a protection against the most serious dangers. Lakes, though few in comparison with those of the N. Jutland of the peninsula, are numerous, but generally of limited extent. The two most important are the Mitten and the Gottolowsee. The W. side and centre of the duchy are very poorly wooded. Accordingly the chief dependence of the inhabitants for fuel is on their bogs, which, in consequence, notwithstanding their uninviting appearance, often prove the most profitable portion of the surface. On the E. side of the duchy wood is found in every quarter and in some parts, particularly along the fords of Hadersleben, Apenrade, and Plensburg, considerable forests occur. The inhabitants of the duchy are a much more mixed race than those of N. Jutland. Over about two thirds of the area

Danish is the vernacular tongue over the remaining third German is chiefly spoken. Along with Holstein, Schleswig rose against Denmark in 1648 but submitted again in 1650. With the death of King Frederick VII. of Denmark (16th November 1863) the male line of the succession to Schleswig ceased. His successor Christian IX. refusing to comply with the demands of the Germanic diet, federal execution was decreed and the combined armies of Austria and Prussia entered the Duchies and vanquished the Danes after a bloody contest. By the preliminary of peace signed 1st August, 1864 the Duchies were separated from Denmark. In 1866 they were incorporated into Prussia. (See DENMARK.) Pop. (1900) 409,807.

SCHLESWIG (Danish *Slesvig*) a tn and seaport, Prussia, cap. above duchy W end of the Schlei here crossed by a bridge, 69 m. N W Hamburg. It is irregularly built of brick, but in a neat clean town, strongly resembling some of those in Holland. It is divided into three portions—the Altstadt or Old town the Lollhus and the Fredericksberg. The first is the N portion, and is connected with a small hollow or inlet, mostly occupied by fishers, the second is in the centre, and the third lies immediately below, in connection with a small suburb called Bastorf. The market-place, the only public square, is in the Altstadt the principal street, exceeding 1/2 m. in length is in the Lollhus. The principal edifices are three churches, one of them a cathedral of the 12th century, a fine Gothic pile with an altar-piece beautifully carved in wood. The old castle of Gickorp on a little island at the N end of Fredericksberg the residence of the stadtholder of the duchy (an office now vacant) and the seat of the Schleswig-Holstein government, the lunatic asylum the deaf and dumb institution, and several benevolent establishments of which the most important bears the name of the Gray Cloister. Immediately N of the town is the convent of St. Johanna, for noble families and a little S are the remains of a famous wall called *Deenswerke*, erected by the pagan kings of Denmark to protect the duchy from the incursions of the N Jutlanders. The harbour is very shallow, admitting only small vessels and neither trade nor manufactures are of any importance. Schleswig is the oldest town in the duchy, dating from the 9th century. For nearly six centuries it was the handsomest, largest, and most important commercial city in the kingdom. In the 12th and 13th centuries it was repeatedly pillaged and devastated, and in the middle of the 14th century, it suffered much both from hostile violence and fire. Its greatest disaster was the sitting up of the mouth of the Schlei, in the beginning of the 15th century. This in connection with some other circumstances particularly the rivalry of the Holsteners, deprived it of its commercial pre-eminence, and has gradually reduced it to comparative insignificance. Pop. 1860 121,197.

SCHLETTAU a tn Saxony circle and 22 m. S.E. Witten. It has a church several mills, and flour and spinning mills. Pop. 1838.

SCHLEIBINGEN a tn Prussia, gov and 35 m. W B.W. Erfurt, at the confluence of the Elbe and Nahe with the Schleihe. St. Petersburg, at the point where the Neva issues from Lake Ladoga, and partly on an elliptical island of same name on which stands the fortress of Schlisselburg often used as a state prison. It is built chiefly of wood contains several Greek churches, and has manufactures of cloths and silks, and a considerable trade, chiefly transit, with St. Petersburg. Pop. 1843, 2224.

SCHMALHEDDEN, a tn Hesse-Cassel, prov. and 34 m. E.N.E. Fulda, in a valley at the confluence of the Sille with the Schmalkald. It consists of the town proper enclosed by a double wall and ditch and of three suburbs. It is an antiquated town of a peculiar and picturesque appearance, with dark narrow streets, and with houses built mostly of wood or framed with it. It contains two churches, one of them a handsome Gothic structure a workshop, hospital, gymnasium industrial and other schools, and has important manufactures of iron and steel particularly gimlets and awls in the making of which the most of the inhabitants are employed. Indeed, the whole valley in which the town stands may be regarded as one great smithy, the raw materials of which are supplied by extensive iron mines in the vicinity. Below the town are extensive salt-works. Schmalhede is famous for the Protestant league which bears its name, and was signed in 1531. The house in which it was signed is now the throne hall and in another building called the *Stammesche-Illust.* the articles were drawn up by Luther Melancthon and others. Pop. 6478.

SCHMIDEBERG several places, Prussia a portion early - 1 A tn prov. Silesia, gov and 29 m. S.W. Liegnitz, on the Yaul, at the foot of the Kaenberg. It consists principally of two very long streets, is the seat of a provincial and town court contains a Protestant and a R. Catholic church and has manufactures of woollen cotton and silk fabrics and a trade in cattle. In the neighbourhood are blast-furnaces and other extensive iron works, and at a short distance is the Friesensten a group of rocks 2888 ft. above the sea and commanding a magnificent view. Pop. 3520. 2, A tn., prov. Saxony, gov and 40 m. N.E. Merseburg, in a wooded district between the Elbe and Mulde. It contains a church and school and has manufactures of woollen and linen cloth, and a trade in cattle. Pop. 1840.

SCHMIEDBERG, a vil Bohemia, circle and W.W. W. Silesia, on the Flot, with a church, a school, an iron-works, and a wire-mill. Pop. 2712.

It is surrounded with walls and ditches and well built contains a town church, castle, Latin and grammar school and hospital, and has manufactures of woollen and linen cloth, carpets, plated ware, and tobacco a bleachfield several mills, and a trade in shoes. Pop. 13515.

SCHORZINGEN a. vil. Württemberg, circle Schwabmühl, near Späichingen on the Rhine, with a church and a mill. Pop. 1044.

SCHOTTEN a. in Hesse-Darmstadt, Oberhessen on the Rhine, at the foot of the Vogelsberg, 21 m. S. E. Gießen. It has a handsome church manufactures of woollen cloth, tannery, hats, and famous sausages several tanneries, and important fairs, chiefly for cattle. Pop. 2703.

SCHOUTEN—1, A. in E. coast, Van Diemen's Land, lat. 42° 21' S. lon. 148° 18' E. (s) separated from Frey (s) by a narrow strait, it is about 64 m. long, by 4 m. broad—2 (for *Myssor* or *Myssor*) An island Indian Archipelago, off the Bay of Guelmuk, N. coast. Pays about lat. 1° 15' lon. 126° E. Though represented in maps as one

Island. It is really consists of three islands—Bosch the most W. Myore the most N., and Bink the most E.; separated by narrow straits said to be navigable on account of rocks and reefs. Bink is middling high, but Bosch is very high and steep. Myore is very low, on its N.E. side is an extensive reef, and on its N.E. point a village.

SCHOUWEN, often called the *LAND VAN STREKKEN*, an old Holland, prov. Zealand, between Isla. Overstaken and Daveland, bounded W. by the North Sea, and separated on the E. from Daveland by the Dijkwater 14 m. long E. to W., by 4 m. to 7 m. broad. It is fertile, yielding grain, oil-seeds, meadow, flax and possessing excellent meadow-lands. On the S. side of the island, immense flocks of one-fowl broad and their eggs are brought in thousands to the market of Eertrike. Besides Eertrike, it contains the towns of Schouwenhaven. Pop. (agricultural) 15,000.

SCHRAMBERG, a vil. Württemberg, circle Schwarzwald, in a deep valley 7 hank Schiltach, 11 m. N.W. Eott well. It contains a church, and a castle and has manufactures of straw-hats, obisery paper, and earthenware, a smelt-furnace and other iron-works. Pop. 1843

SCHREITENBERG a vil. Lower Austria, in a vine-district, 43 m. N.E. Vienna. It contains a handsome church, with fine spire. Pop. 1346.

SCHRECKHORN [Peak of Terror] a mountain, Switzerland, east, and about 40 m. S.E. Bern. It rises to the height of 18,386 ft., and is separated from other mountains of similar height by alpine valleys filled with glaciers.

SCHREIBERDORF [Moravian, Taborite] a vil. Austria, Moravia, circle Olmütz, 7 m. from Eisenberg, with a church. Pop. 1232.

SCHREIBERDORF [OBER MITTEL and NIEDER] a vil. Prussia, prov. Rhine, prov. Liège, circle and cant. Lauen with a church, telegraph, landing, and two mills. P. 1481

SCHREIBERSHAU a vil. Prussia, prov. Silesia, gov. and 36 m. S.W. Legnica, on a mountain slope near L. bank Zeckau. It consists of a number of separate hamlets, contains a Protestant and a R. Catholic church and has an extensive vitrol-work and three blast-furnaces. Pop. 2740

SCHRIEK, a vil. and com. Belgium, prov. and 19 m. S.E. Antwerp, on the Rhen. It has a brewery a flour-mill and a trade in agricultural produce. Pop. 1538

SCHREIBELM a market in Baden, circle Lower Rhine, on the Kemmel at the foot of the Odenwald, 11 m. E. Mannheim. It contains three churches, and has a vitrol-work, an extensive paper mill, and several other mills. At a short distance in the castle of Strahlenburg and in the vicinity Roman antiquities have been discovered particularly the remains of baths. Pop. 2349

SCHRIIMM or SAUZA, a tn. Prussia, gov. and 22 m. S.E. Posen, on an island of the Wartha. It has several courts and public offices, five churches, a synagogue, a Franciscan monastery and a tannery manufactures of linen, a distillery and a trade in cattle. Pop. 3663

SCHROENHAU, a tn. Upper Bavaria, on the Danube, 27 m. N.E. Augsburg. It consists of the town proper, surrounded by walls, and a suburb has a court of justice, three churches, a castle, two hospitals, manufactures of brassware, silks and potash works, oil, paper, bark, and flour mills and a trade in corn and cattle. Pop. 1605

SCHRODA, or SONDRA, a tn. Prussia, gov. and 19 m. S.E. Posen. It contains a parish church, a synagogue, and a Dominican monastery, and has several courts and public offices. Pop. 2219

SCHTCHIGRY a tn. Russia, gov. and 27 m. E.N.E. Koursk, on a river of the same name. It contains a church and has some trade. Pop. (1849) 3168

SCHULBN or SCHON, a tn. Prussia, prov. Posen gov. and 15 m. E.W. Bromberg, on the Gornawa. It has several courts and public offices, a Protestant and two R. Catholic churches, a synagogue and a castle. Pop. 2848.

SCHUJA a tn. Russia, gov. and 70 m. E.N.E. Vladimir, on the Tsen. It contains three churches, and has manufactures of linen cotton and particularly soap, which is in great demand throughout the country. Pop. (1849) 8408.

SCHULS or SCHUCCA, a vil. and par. Switzerland, cant. Grisons in the Upper Engadine valley, L. bank Inn, here crossed by a bridge, 37 m. E.S.E. Coire. It contains a handsome church on a lofty tongue of land formed by the river

There are mineral-springs here at an elevation of 4000 ft. above the sea. The Bible was first printed in Romansch at Schuls in 1776. Pop. 893.

SCHUMBURG, or SCHUMBERG, a vil. Bohemia, circle Bagnat, about 17 m. from Babelsthorf. It has a church, a school, and three mills. Pop. 1048.

SCHUPFHEIM, or SCHUPFA, a vil. and par. Switzerland, cant. and 15 m. S.W. Lesera on the Emme, here crossed by a covered bridge, and at the foot of the Hölzliberg. It contains a handsome modern church, a Capuchin monastery, placed on a height, and commanding a splendid view; and still higher, the church of the Holy Cross in which pilgrimages are made. An old tower, called Heimalohheit, is used partly for preserving the archives of the district, and partly as a prison. Schupfheim has a much-frequented annual fair.

SCHUSCH, a tn. Transcaucasian Russia, cap. Khanate of same name, sometimes also called Karabagh 180 m. S.E. Tiflis. It is advantageously situated on a steep and lofty height, between two streams, and strongly fortified and has an Armenian village at its foot. It contains a castle, in which the Khan resides, and to which the only approach is by a narrow path, scarcely admitting two riders abreast.

SCHUSSEN a river Germany, rises in S. of Wilttemberg near Schenstried, flows S. past Ravensburg, and falls into Lake Constance after a course of about 40 m.

SCHÜTT or CALLOCK, a tn. Hungary, called the Great and Little Schütt, formed by two branches of the Danube, and its main stream which flows between them. The former as its name implies the larger of the two is situated on the N. bank, and extends from the town of Presburg to that of Komorn, is about 25 m. long by 15 m. broad and belongs entirely to the Presburg, the latter on the S. bank, is 23 m. long, by 8 m. broad and belongs partly to the R. bank, and partly to the Komorn. They are low and subject to occasional inundations, but remarkably fertile, and well cultivated producing abundance of grain, and containing numerous gardens celebrated for their fruit.

SCHÜTTENHOFEN or SCHUMEN [Latin, Suttic], a tn. Bohemia, circle Pilsen, on the Wotawa, 14 m. S.E. Klattau. It contains two churches, a Capuchin monastery, and a poorhouse and has manufactures of woollen cloth and hosiery. Pop. 1684

SCHÜTTERWALD a vil. Baden circle Middle Rhine 3 m. from Offenberg, near the Schutter, with a church. Pop. 1165.

SCHÜTTORF a tn. Hanover gov. Osnabrück, 8 m. N.E. Benthelm on the Yeche. It has manufactures of parchment, tin-works and four mills. Pop. 1453

SCHÜTZEN [Gron], a market tn. Hungary on and 20 m. from Presburg, on the Nudava, near its confluence with the March, over which there is here a ferry. It has a church, tin-works, manufactures of cutlery and earthenware, a flour and a saw mill. Pop. 2309.

SCHUYLKILL, river U. States, Pennsylvania, rises on the W. side of the Blue Mountains, flows S.E., and after a course of about 140 m., enters the Delaware, 7 m. below Philadelphia. It receives several tributaries of which Tulphocken Creek and Farklem Creek are the most important. It is navigable for vessels of 300 tons or 400 tons to Philadelphia, and by means of canals it has been rendered navigable to Port-Carhon. It is also connected with the Susquehanna by a canal.

SCHUYLKILL-HAVEN a vil., U. States, Pennsylvania 69 m. N.W. Philadelphia, with which it is connected by railway, and near the Schuylkill River. Pop. 3051

SCHWAADORF or SCHWADDOERF, a vil. Lower Austria, L. bank Pilsa, 15 m. S.E. Vienna. It contains a church and handsome chateau, and has an extensive cotton-mill. Pop. 1690.

SCHWAAN, a tn. Mecklenburg-Schwerin, circle Wenden, L. bank Warnow, 11 m. S. Rostock. It is walled, has three gates, a church, manufactures of tallow and wax candles, leather, and soap, and several mills. Pop. 2300.

SCHWABACH, a tn. Bavaria, Middle Franconia, on a stream of same name, and on the Bavarian railway, 10 m. S.W. Nürnberg. It is surrounded by walls, with four gates; is well built, contains a R. Catholic and two Protestant churches, a synagogue, townhouse, a lunatic asylum, house of correction, a Latin, agricultural, and industrial school; and

has numerous needle-factories, manufactures of wax cloth, sailing-wax, sheet and mill, laundry, paper, playing-cards, Jews' bags, and articles in gold, silver and wire, several mills, and numerous breweries. Schwabach early took part in the Reformation, and articles, which may be regarded as the first Lutheran creed, were drawn up in it in 1523, and bear its name. On the revocation of the edict of Nantes numerous French emigrants found an asylum here and to them the town is indebted for the chief sources of its prosperity. A well-known type, much used in old German printing, takes its name from the town. Pop. 5061.

SCHWABEN See SWABIA.

SCHWABENITZ, a market in Austria, Moravia, circle Brün, about 5 m. from Wuchau; with a church, a hospital, and two mills. Pop. 1843.

SCHWABMÜNCHEN, a market in Bavaria, Swabia, 18 m. S W Augsburg, on the Binkelt, here crossed by a bridge. It contains a L. Catholic church, chapel, and hospital, and has manufactures of woollen and cotton goods, and a trade in yarn. Pop. of town, 2428.

SCHWACHAU, or **SUSWACHAU**, a market in Lower Austria, on a river of same name, 7 S.E. Vienna. It is a well built, contains a good market place, handsome church, and an obelisk, erected in honour of the Emperor Leopold I., and John Sobieski, king of Poland, who delivered Vienna from the Turks in 1683, and has an oil and a cotton mill, and several extensive breweries. Pop. 2290.

SCHWADERBACH, a vil. Bohemia, circle Elbogen, in a very mountainous district, about 80 m. from Zwickau. It is a large straggling place, and has a school manufactures of cotton, a mill, and a coppermine. Pop. 8078.

SCHWAIEREN, a in Württemberg circle Neckar, dist. and 27 m. N by W Stuttgart. It stands at the foot of the Heuchelberg, and contains a castle. Pop. 1901.

SCHWAIHILM, a vil. Württemberg, circle Neckar near Wailingen; with a church. Pop. 1468.

SCHWALBACH, or **LAMBER-SCHWALMACH**, a watering place, Nassau pleasantly situated between hills, 15 m. S.E. Nassau. It is a long straggling place, with a complete bathing establishment, and though said to have been known to the Romans, and to have been for nearly three centuries the most frequented watering-place of Germany, was scarcely visited by any English till the publication of Reiss's *Reise*. Many thousands of them now make it their summer-residence.

SCHWALM, a river Germany rises in the Vogelsberg Mountains in the N.E. of Hesse-Darmstadt, flows N N.W. past Elfeld, enters Hesse-Cassel then N N.E. and joins the Eder below Fritzlar after a course of about 60 m.

SCHWANDEN a vil and par Switzerland, cant. and 8 m. S. Glarus at the confluence of the Sarnt with the Lenz, which is here crossed by a covered bridge. It contains a great number of well-built houses, and a handsome church and on a height, at a short distance below, are the ruins of the castle of Bellingen, the residence of the old lords of Schwanden. The inhabitants early distinguished themselves in the cause of the Reformation. Pop. 2810.

SCHWANDORF a in Bavaria, Upper Palatinate, on the Naab, here crossed by a bridge, 14 m. S.E. Amberg. It has three churches, an hospital, and several mills. P. 1763.

SCHWANENBACH, a vil. in Prussian Saxony gov. and 29 m. S W Magdeburg on the Lahnbeck with two churches, an hospital, tile-works, gypsum kilns, and several mills. Pop. 3005.

SCHWANNENTADT a in Upper Austria circle Hausruck, 1 bank Agger, 80 m. S W Linz with a church, school, machine-factory and three mills. Pop. 1500.

SCHWARME, a vil Hanover Unterhoya, hall and near Westen with a church. Pop. 1000.

SCHWARTAU a in Germany, duchy Oldenburg at the confluence of the Schwartau with the Trave, 4 m. N Litz. Pop. 1669.

SCHWARZA or **SCHWARZ**, three rivers—1, Germany rises in the S. extremity of Schwarzwald Riedelsdorf, flows N.E., passing near Hohenburg, and after a course of about 55 m., joins 1 km. S. about 5 m. S. Riedelsdorf—2, rises among the mountains in the S. of Lower Austria, and descending nearly a semicircle, in a direction N W to E., and passing round the W foot of the Bohemian John I. bank Fritzen, after a course of nearly 60 m.—3, rises in the N W frontier

of Moravia, in the N. of circle Igau, flows S.E., past Reichenau, Betsau, and Selowitz, and joins or is joined by the Igau, a little above their common junction with the Thaya, after a course of nearly 80 m. Its chief affluents are the Ritzera and Litzava, which both join it on the left.

SCHWARZA, a market vil Prussia, gov. and 88 m. S.W. Erfurt, on a small river of same name, affluent of the Werra. It contains a Protestant church, a synagogue, and castle and has manufactures of linen and cotton. P. 1401.

SCHWARZACH—1, a vil Baden circle Middle Rhine, 4 m. N W Biele, with a church. Pop. 1875—2, a river, Bavaria, which descends from the W side of the Schmarwald flows W past Ritz and Salzburg; and a little below the latter, joins 1 bank Naab, after a course of about 50 m.

SCHWARZACH a vil Upper Austria, circle Salzburg 8 m. from St Johann. It is remarkable as the spot where the Protestant peasantry subjected to the bigoted and tyrannical sway of the Archbishop of Salza, met and bound themselves by solemn oath never to desert their principles. They were ultimately in 1781 to the number of 80,000 driven by persecution from their homes, carrying with them, by just retribution almost all the industry and prosperity of the country which still feels the loss.

SCHWARZAU, a vil Lower Austria, circle Manhartsberg 18 m. S.W. Krems. It contains one of the finest and most extensive glass-works in the country.

SCHWARZBACH, a vil Bohemia, circle and about 28 m. from Rudweis with a church. About 1 m. W is a celebrated mine of graphite, which is worked to some extent, and exported to Great Britain and other countries.

SCHWALZBURG, two independent principalities, Germany—

1, **SCHWABENBURG-RUDOLSTADT**, forming the 76th state of the Germanic Confederation, consists of several isolated portions, situated between the territories of Prussian Saxony the Saxon duchies and the principality of Reuss. It lies on the N side of the Thuringian Forest, and has an area of 249 sq. m. The surface is rugged, and the soil by no means fertile, for although it is generally cultivated with the greatest care the corn produced falls far short of the annual consumption. Perhaps the most important crop is flax, the culture of which is almost universal. A great part of the land is devoted to pasture, and great numbers of cattle are reared. The minerals include lead, iron, and salt, all of which are worked to a considerable extent. The principal manufactures are woollen stuffs ironware, glass, and porcelain. The chief export, in addition to the minerals and manufactures is wood. The inhabitants are almost all Lutherans. The government is a monarchy, in which the power of the sovereign is limited by that of the states or *Gemeinschaffscollegium*. As a member of the Germanic Confederation, Schwarzburg-Rudolstadt has a vote in the plenum and shares the 16th vote in the minor or representative council with Schwarzburg-Godeshausen and the three Anhalt duchies of Bernburg, Dessau, and Köthen. Its contingent of men to the Confederation is 539. For administrative purposes it is divided into the upper lordship of Rudolstadt, and the lower lordship of Frankenhansen, and subdivided into ten *bellivicks*—Rudolstadt (the capital), Blankenburg, Pöhlitzella, Im Königsee, Oberweißbach, Lautenberg, Frankenhansen, Braunberg, and Stadtschlotheim. Pop. 59,650.

2, **SCHWABENBURG-GODESHAUSEN**, forming the 25th state of the Germanic Confederation, lies, like the former principality on the N side of the Thuringian Forest, between the territories of Prussian Saxony and the Saxon duchies, and consists of several distinct portions, area, 247 sq. m. It is more fertile than Schwarzburg-Rudolstadt, producing corn, which after satisfying the home consumption, leaves a small surplus for export. One of the principal sources of revenue is derived from the forests, which furnish excellent timber. Flax also is extensively cultivated, and great numbers of cattle, sheep, and swine are reared. The minerals include iron, alum, cobalt and copper. The first supplies several smelting-furnaces and forges, and from the two last much alum and vitriol are made. After these, the only manufacture of any importance is porcelain. The principal exports are corn, wool, wood, ironware, iron, alum, vitriol, lamplight, rocks, and fat cattle. The powers of the sovereign are extensive, but exercised with the concurrence of a *Gemeinschaff*.

othings. As a member of the Germanic Confederation Schwarzenburg, however, has vote in the plenary, and shares the 15th vote of the minor council, as mentioned above in the case of Schwarzenburg-Rodekath. Its contingent to the confederation is 451 men. For administrative purposes it is divided into the upper lordship of Arnstadt, and the lower lordship of Sonderhausen and subdivided into seven bailiwicks—Sonderhausen (the capital), Klagen, Schönbürg, Ebeleben, Kohn, Arnstadt, and Gohaus. The inhabitants are almost all Lutherans. Pop. 60,002

SCHWARZENBACH [AN DER SAAL] a tn. Bavaria. Upper Franconia, dist. and 68 m. N. Haulsen on the Saale, here crossed by a handsome bridge. It contains a parish church and castle, and has manufactures of cloth, and flax and cotton spinning-mills. Pop. 1960

SCHWARZENBEK a vil. Denmark, duchy Lauenburg, cap. bail, 18 m. E. Hamburg, with a station on the railway to Berlin. Pop. 700

SCHWARZENBERG a tn. Saxony circle Zwickau, 53 m. S.W. Dresden, on the Schwarzrueher with several courts and public offices, two churches and a castle. Manufactures of gloves, a wire-work, the saw and other mills and a patch oven. Pop. 2100

SCHWARZENBECK a vil. and par. Switzerland cant. and 17 m. S.E. Bern. It lies in a high and somewhat wild country near the extremity of the Emmenthal and is chiefly composed of poor wooden huts. It has, however, a pleasantly situated church. The rearing of cattle is the chief employment. Pop. 2864

SCHWARZENFELD a vil. Bavaria. Upper Palatinat, dist. and near Ratisburg with two churches manufactures of looking-glasses and two iron mills. Pop. 3119

SCHWARZENFELTZ a tn. Bohemia circle Kautz, 20 m. S.E. Prague. It contains a castle townhouse, demerit church, school and hospital and has a potash and a tile work. Pop. 2292

SCHWARZWALD or **BLACK FOREST** [Latin, *Silva Nigra*].—1 A mountain range in S.W. of Germany. It commences near the S. of Baden and stretches through it and part of the kingdom of Württemberg in a N.N.E. direction, nearly parallel to the course of the Rhine and the chain of the Vosges, till it approaches the town of Rastatt and becomes subdued with the Taunus. Its greatest breadth is about 150 m. and its greatest breadth 45 m. It probably takes its name from the dark forests of pine which crown its ridges or clothe its sides. Its summits are for the most part slightly rounded but the highest of them are truncated or peaked. They attain their greatest height in the S. where the culminating point the Feldberg is 4800 ft. The Breitenberg in the same locality is only about 50 ft. lower. Towards the N. the chain subsides so rapidly, that some geographers conceive it to terminate near Gengenbach and Pfaffenberg and give no name to the hills which continue as far as Hildesberg. With more propriety however the S. portion is designated the Humber and the N. portion the Lower Schwarzwald. The W. slope is the more abrupt, and furnishes the grandest features of the scenery for which the right valley of the Rhine is here so celebrated. This valley, however is so narrow that no rivers of any consequence take their rise in it. The E. slope, which is much more gradual, gives rise to the Neckar, and is still more distinguished by furnishing the source of the Danube. The highest summits of the Schwarzwald are covered with snow at all times, except during the hottest summer-months and hence it is only during those that they have any appearance of verdure. The woody surface commences immediately below, and is occupied chiefly by pine. At the same elevation oaks are never seen. The mountains belong to three formations. In the S.W. the rocks are composed of granite and gneiss. Porphyry overlies the granite, but is confined within much narrower limits, though the loftiest peaks are sometimes formed of it. Some considerable heights in the N. and E. consist of red sandstone, which stretches in inclined beds from the Rhine, between Lautenbach and Waldshut, to the banks of the Main. The older rocks are rich in minerals, including silver, gold, lead and copper.—2 A tn. in Württemberg, east of the four lions which that kingdom is divided. Part of it is surrounded by the territory of Baden, and part by Heilbronn. Area. 1957 sq. m. Pop. (1862) 442,972

SCHWARZWASSEN—1, A river, Germany, rises in the Rhenish Massif, on the frontier of Bohemia, near Göttingen, flows W. N. W., entering Saxon at Gersdorf, then proceeds eirectionally N. N. W. passing near Schwarzenburg, and joins the Mulde of Zwicken on the right, after a course of about 26 m.—2 (or *Carminensis*) A river, France, issues from Lake Weygny, prov. W. Prusse, flows very circuitously, first S.E., then E., then S.E. and joins a bank Vistula at Schwet. Total course about 80 m.

SCHWARZWASSEN, two places, Austrian Silesia.—1, [Pohls, Strasse] A tn. circle and 16 m. N. N.E. Teschen, bank Vistula, near the Russian frontier. It consists of narrow streets, and contains a male. Pop. 1200.—3, A vil. circle Troppau, bail. Friedberg, with a church. Pop. 1294

SCHWATZ [Latin, *Sarcocolla*], a market in Austria, Tyrol, circle Unterenthal, r. bank has 16 m. E. N.E. Innsbruck. It is a poor place, but contains a handsome parish church, with good paintings, a Franciscan monastery casino, and hospital, and has manufactures of various articles in iron and wire, heavy tobacco, and earthenware. There are valuable mines of silver iron, and copper in the neighbourhood. Pop. 2518

SCHWADLÉH, a tn. Hungary, co. Zepa, on the Danube, among the Carpathians, 4 m. from Schodnitz. It has a Protestant and a R. Catholic church, a normal school and copper-mines. Pop. 2469

SCHWIDT a tn. Prussia, gov. Potsdam 1. bank Oder 24 m. S.W. Stettin. It consists of the town proper and three suburbs has well built houses, spacious streets partially lined with chestnut-trees, and a large market-place; contains a castle, originally the residence of a branch of the margraves of Brandenburg, two Protestant parish churches, a French Reformed church in which one of the margraves and his margraves are buried; a synagogue (theatre and hospital) and has manufactures of woolen and linen cloth, tobacco starch and gunpowder, harness, distilleries, and a trade in cattle. A considerable number of the inhabitants are descendants of French emigrants expelled from their homes by the revocation of the edict of Nantes. Pop. (1846) 7024

SCHWEGENHEIM a vil. Bavaria. Palatinat, cant. and near Gengenbach with a church. Pop. 1845

SCHWELBACH a vil. Hesse, Prussia circle, 17 m. N. N.E. Travem. 1. bank Moulde, over which there is a ferry. It contains a church, and has several mills, and a trade in cattle. Pop. 1466

SCHWELDITZ, a tn. Prussia, prov. Silesia, gov. and 29 m. S.W. Breslau, on the railway to Freiburg, reg. circle, on a height above 1. bank Weistritz. It consists of the town proper and six suburbs as a place of considerable strength, being both surrounded by walls with six gates, and defended by a fort, and is well built, having good houses, two squares, and wide well-furnished streets. It contains a Protestant church a garrison church, and two R. Catholic churches, an Ursuline monastery, a gymnasium, theatre, barracks, arsenal, hospital, and house of correction; is the seat of a superior court of law and several public offices, and has manufactures of woolen and linen cloth, hosiery and ribbons, starch-works, vinegar-works, dye-works, tanneries, breweries, and numerous mills and distilleries. Schwellditz was the residence of the first Pansie, was walled in 1225, additionally fortified in 1356, and repeatedly besieged during the Thirty Years war. It was made a regular fortress by Frederick II. in 1747 and afterwards stood several sieges, in the last of which, in 1810, after being beleaguered for 86 days, it was taken, and its entire works demolished. Pop. (1846) 12,055

SCHWELVA a tn. Saxony-Miningen, on a small stream of same name, affluent of the Werra, 27 m. N. Meiningen with an orphan asylum and hospital, two paper and four other mills. Pop. 1500

SCHWELINAU a vil. Bavaria circle Middle Franconia, about 2 m. S.W. Nürnberg with manufactures of gold-thread, boxes, toys, and other Nürnberg ware. Pop. 1374

SCHWEINARTEN [Havus and Grotte] two small ponds, on the *Leine* Austria, on the Mährisch frontier, near Nikolsburg, with a church and a castle. Pop. 3008

SCHWEINFURT [anc. *Fregesha Suenowica*], a tn. Bavaria, Lower Franconia, r. bank Main, which here forms an island each side of which communicates with the opposite

bank by a bridge, 34 m N N E. Wirsberg. It is surrounded by an old wall with four gates in the east of several courts and public offices contains a R. Catholic and two Protestant churches a handsome townhouse, a gymnasium, founded by Gustavus Adolphus; Latin, agricultural, industrial, and other schools a burgher hospital, poorhouse, orphan hospital and infirmary and has manufactures of starch and vinegar linen and woollen goods, hosiery, ribbons, machine white-lead, saltery and hardware, a super-fine salt-petre and potash works, dye-works, tile-works, tobacco-factories, distilleries numerous mills, and a considerable trade, both general and transit, favoured by the river, which is here navigable. Schweinfurt is of great antiquity, and was long a free imperial city. It is the native place of the physician Ruempfer, the historian Bunsen, and the poet Bückert. Pop. 7354.

SCHWEINHEIM a vil. Bavaria, Lower Franconia, 8 m S E. Aschaffenburg with a church. Pop. 1680.

SCHWEINITZ, a in Prussia Saxony gov. and 8 m. N E. Merseburg, on the Elbe river, with a church, a castle a factory and some trade in wine. Pop. 1213.

SCHWEINITZ, **SWANICER** or **TAUOER SWICER** a market in Bohemia, circle and 19 m. S E. Budweis. It contains two churches, a chapel townhouse, and hospital, and has manufactures of cloth, and a weekly market at which on an average, 500 head of cattle are sold. Pop. 2381.

SCHWENINWART or **SCHWENWART** a market in Lower Austria, 30 m. N E. Vienna, r. bank Wundenbach, in a wine district, with a castle and a church. Pop. 1323.

SCHWELM a town in Prussia, Westphalia, 32 and 32 m. W S W. Arnberg, on the Selwe. It has a court of law, three churches and a superior burgher school manufactures of woollen, cotton, and linen goods ribbons, bed ticking, iron, steel and metal wares a red leather factory, dye-works bleaching, a general trade, and trade in cattle. Pop. 4191.

SCHWENNIGEN, a in Württemberg circle Schwarzwalde, on the frontiers of Baden 10 m. W N W. Tuttlingen. Many of the inhabitants are employed in making the wooden casks for which the district has long been famous. Pop. 3771.

SCHWENITZ, a river, Elbe catch. duchy Holstein. It proceeds from the outlet of Lake Lütke Pilsa N. W. forms one considerable expansion, communicates with another at Pressa, and falls into the E. side of the Kiel-ford forming at its mouth a water-haven of the fourth class, which admits vessels drawing 5 ft. total course, 33 m.

SCHWERIN the cap. of Mecklenburg-Schwerin W. shore, lake of same name, 60 m. E. Hitzburg. It is pleasantly situated is surrounded by a ditch, and a wall with seven gates, and is well built, containing four public squares, and a great number of well-kept and well-lighted streets. It consists of the old town and suburbs, the new town or Schloß, and the Pfaffenstadt, and contains four churches of which the cathedral a colossal structure in the old Gothic style, has an excellent organ, a synagogue, a castle, three palaces, government offices, a townhouse, merchants hall, mint, theatre, gymnasium industrial veterinary military, and other schools, and numerous charitable establishments and endowments. The manufactures consist of woollen and linen cloth leaguer and carthen ware, sugar and bran and there are numerous mills. Pop. 17,336.—The lake formed by an expansion of the Elbe is about 15 m. long N to S, and 1 m. to 5 m. broad of very irregular shape, and divided into two distinct portions by a peninsula which projects from its E. shore. It discharges itself at its N W. end by a river which flows N to Wismar, and falls into a bay of the Baltic opposite to the island of Poel.

SCHWERIN or **SCHWERNER** a in Prussia, gov. and 60 m. W N W. Posen, at the entrance of the Odra with the Warta, here crossed by a bridge. It consists of the town proper and a suburb contains a parish church and synagogue, and has manufactures of woollen cloth, a dye-works, and several breweries. Pop. 5444.

SCHWENING or **SCHWENINGEN**, a in Prussia, gov. and 7 m. E. Posen, on a lake of same name with two R. Catholic churches and a synagogue, manufactures of woollen and linen cloth, and several breweries. Pop. 2331.

SCHWERTZ, a in Prussia, Westphalia gov. and 31 m. W N W. Arnberg, on the Ruhr. It contains a Protestant and a R. Catholic church, and has manufactures of woollen cloth, and a trade in cattle. Pop. 3174.

SCHWETZ, or **SWETSCA** a in Prussia, gov. and 80 m. S W. Marienwerder, cap. circle, l. bank Vistula, near the confluence of the Schwartwasser with several courts and public offices two churches, a Franciscan monastery, and two hospitals, and a trade in cattle. Pop. 3004.

SCHWETZINGEN a in Baden circle Lower Rhine, in a fertile district on the Leimbach 9 m. S E. Mainbach. It contains three churches, and a palace of the grand duke, with the garden and wicket-wicket. Pop. 2568.

SCHWETZKAU, or **SWETSCAUKAU** a in Prussia, gov. and 44 m. S S W. Posen, with a R. Catholic church and manufactures of linen. Pop. 1027.

SCHWIEBENDINGEN a vil. Württemberg circle Neckar, on the Glens, 9 m. N W. Stuttgart with a church and a royal castle. Pop. 1244.

SCHWIEBUS, a in Prussia, prov. Brandenburg gov. and 41 m. E. S. E. Frankfurt, on the Selwe. with a castle two churches manufactures of woollen cloth, a brewery and a trade in horses. Pop. 1244.

SCHWIELAGH, or **SCHWELAGH** a lake, Prussia, prov. Brandenburg, about 13 m. N E. Lubben greatest length, 10 to 8 m, greatest breadth 3 m. It receives several small streams, but is chiefly formed by an expansion of the Spre, which enters it on the N W, and quits it on the N.

SCHWILAU or **SWILAU** a in Bohemia circle and 6 m. N. Kiettau in the valley of the Angel, which is here crossed by a handsome bridge of six arches. It contains a parish church and a synagogue, and has manufactures of woollen cloth. At a short distance S. E. stands the old castle of Schwibau, now almost a ruin. Pop. 1419.

SCHWYZ, a central cant. Switzerland, from which the whole country is supposed to derive its name, bounded, N. by cant. Zürich and St. Gall, from which it is partly separated by Lake Zürich. W. Zag and Lucern S. Lake Lucern, separating it from Unterwalden and Uri and E. Glarus greatest length E. to W. 26 m. greatest breadth, 21 m. area 256 sq. m. It belongs to the so-called mountain cantons being traversed in all directions by lofty chains and minor ramifications. Near the centre is the Mythen, 6315 ft. above sea level in the W. the Mt. 6505 ft. in the N. the Rosenberg 6195 ft., and the Rhone, 4026 ft., in the S. the Pann, 3210 ft., and in the S. the Lützelberg 7413 ft. The whole canton belongs to the basin of the Rhine more than two-thirds of the surface being drained by the Aar and the Lake of Zürich a third by the Lake of Lucern, chiefly by means of the Moos, and the remainder forming only an unimportant portion by the Lake of Zug. Valleys of considerable extent are interspersed between the mountain chains but generally at such a height as makes their culture by the plough impracticable and hence the chief source of wealth is in the pastures, on which vast numbers of the finest cattle which Switzerland produces are grazed. In several places apples and pears are successfully raised, the cherry also thrives well, but not infrequently suffers from sudden returns of frost. In the lowest grounds the culture of the vine has been attempted, and wine of tolerable quality is produced on the S. shores of the Lake of Zürich. The canton is very poor in minerals. The washing of the sands for gold, once carried on to some extent, has ceased to be profitable and iron, though found of good quality lies in strata so much troubled and broken up that the working of it does not promise ever to become an object of economical importance. Neither trade nor manufactures can be said to have any existence, unless we include in the former cattle and dairy produce, to which reference has already been made. Schwyz being the most important of the cantons which first threw off the yoke of Austria, has had the honour of giving the name to the whole confederation. Its present government is an extreme democracy, the whole power, legislative and executive, being not only virtually but actually lodged in the male population of legal age, who assemble by holding a general assembly every two years, and appointing to all public offices of any importance. The great body of the inhabitants are R. Catholics. Pop. 40,650.

SCHWYZ, a in Switzerland, cap. above canton, picturesque situated at the foot of a double-peaked mountain, 16 m. E. Lucern. It consists of two principal streets, in which the houses are generally good, and seven minor streets, in which they are very indifferent. The principal buildings are the parish church, a handsome edifice, finished in 1774,

towering above all the other houses of the town, so as to form a most conspicuous object, and adorned within with a row of Ionian and Corinthian pillars, and several fine marbles, adjoining the church a small Gothic chapel, called Kerk, built when the pope had, by a ban of excommunication, denied access to the church, and in such haste, that the half of it is said to have been finished in thirty days. The Dominican convent, a spacious but old and mouldy building, the Capuchin convent, in the church of which is a fine altar-piece the counterpane, the snow, in which banners taken at Mort-garten, and others borne at several of the most celebrated Swiss battles, are shown and the Archiv or record-office Schwyz, inhabited almost entirely by C. Catholics, contains a Jesuit college, a monastery and a nunnery. Pop. 5225.

SCOTLAND, a river Europe, rises near the S. frontier of Transylvania flows S. by E. across the W. part of Walachia, passing near Argejova, and falls into the Danube, 50 m. E. by S. Within opposite to Rahova, total course, about 150 m. In chief districts are the Motru on the right, and the Siliotti on the left.

SCOTLAND, (anc. *Therma Solimanica*) a tn. and seaport, S. Italy, prov. and 80 m. W. N. W. Gurgente. It stands on the slope of a hill whose base touches the shore and presents a good appearance from the sea, being surrounded by walls flanked with bastions, and defended by a citadel in general, however it is poorly built, and has a very wretched look. It contains several convents and convents, two hospitals, an orphan asylum, and many depots. Its harbor is small but large vessels anchor about 1 m. off in deep water with a good bottom and export great quantities of corn. Owing to the want of shelter almost the whole of the trade is carried on in summer. There is also some export of oil, soda, honey, milled mardines and anchovies, refined nitre, and earthenware. The thermal springs, to which Scutaria owes its recent name, are to the E. a little beyond the walls, and the vapour-baths, on the summit of the isolated mountain of Colagere, contain, as in ancient times, to be much resorted to. In 1831 a volcanic island was formed in the sea, about 20 m. S. E. of the town. Archæologists tyrant of Syracuse was a native of Scutaria. Pop. 12,000.

SCUTEL, a m. S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

SCUTEL, a small town, S. Italy, prov. and 40 m. S. W. Syracuse, near a river of same name with a college.

low being composed of mud-banks deposited from the rivers of the delta, or of low hills of sand blown in from the beach, the whole shore being a dreary swamp, destitute of trees or shrubs, and submerged at spring-tides. For several miles inland, also, the delta is frequently overflowed by the tide, and covered with water during the summer-months. In the dry season, the soft clay-silt, which is strongly impregnated with nitre, bears an abundant crop of gigantic grass, with ferns, mimosa, and cast, and affords pasture to numerous herds of buffaloes. The alluvial tract further N. which skirts the Indus from 1 m. to 10 m. on either side, is, like the delta, intersected with canals and water-courses, but very superior to it in appearance, soil, and cultivation—possessing, indeed, a fertility exceeded by that of no tract of country anywhere known. E. stretches a region mostly alluvial, but which, from its having been deserted by the river has become a desert of indurated clay. It is chiefly level, but traversed by two low ranges of tertiary limestone and flinty chalk, and in some parts covered with shifting sand-hills, affording passages throughout its extent for camels, buffaloes, oxen, sheep, and other herbivorous animals. W. of the Indus, the Hala or Brahman Mountains approach the river at Sehwan, and come close to the sea at Cape Monas; and between the former place and Kurushah, on the N. W. mouth of the Indus, is a mass of hills, the highest of which reach an elevation of about 1800 ft., terminating sharply on the W. bank of the stream. W. of Sehwan, lat. 25° 51' N., which is considered to mark the division between the Lower, and Upper Indus, the country improves in its aspect, but with regard to climate, as a whole, Cape Postum well observes—'Its general appearance is that of a jungle wilderness and spontaneous vegetation takes the place of cultivation. Proceeding from E. to W. a few basaltic and sand ranges are the only heights met with till the valley of the Indus terminates in the mountains of Balochistan. Iron abundantly in the limestone-formation, slates and schists in the western hills and numerous fossil shells have been discovered, with some curious specimens of petrified timber.

Climate and Diseases.—The climate is remarkably dry and sunny the country is seldom visited by rain, and is not refreshed by the waters of the monsoons, which, though they approach, do not quite reach this territory. The mean temperature of summer at Sukkar, is about 102.4° F., and even the waters of the Indus at that season attain a warmth of 92°, farther N. it is supposed to be even hotter and the Afghans have a proverb which says—'The sun of Sindh will turn a white man black, and roast an egg whole, unless it is so ungenerous as the latter fact has been proved by experiment. In the upper districts frost is not unknown, and the heat often varies in the 24 hours from 40° to 84° F. The hot season lasts from March to September, the cold from October to March and the changes from the one to the other are so rapid, that spring and autumn are not experienced. The exhalations, caused by the evaporation during summer from the stagnant waters, and rank decayed vegetation, are extremely injurious to health, and the winds sweep from the surface smothering clouds of dust, impregnated with salt and nitre besides which, the unwholesomeness of the waters from the wells produces fatal disorders of the bowels, liver, and other organs. The chief diseases, which prevail most in autumn, are influenza, fever, ague, and spasmodic cholera.

Population and Agriculture.—The husbandry of the Baluchians is of the rudest kind, their implements are very few, and of simple construction, for a plough, a rough horse pole slightly pointed with iron, and drawn by a camel or two bullocks a rough beam of heavy wood for a harrow, a primitive kind of hoe or grubber, and an equally clumsy wooden rake these, with a cart and a few bullocks, are all the implements known to the Baluch farmer. The N. districts are irrigated by the Indus, are artificially irrigated either by the Persian wheel, worked by a camel or by simply opening dikes and canals leading to lowlands. These canals, indeed, give a name to the land connected therewith, and, as is common in some E. countries, the whole system of revenue, collection, and assessment, with respect to the land-roads under tillage, is regulated by the facilities for irrigation possessed by the soil in particular localities. The grain is trodden from the husk by bullocks, on a mud threshing-floor, and after the government-collector has taken the tax in kind, the remainder is

its sea-coast stretches in a direction generally W. N. W. from the Horn or E. mouth of the Indus to Cape Monas, a distance of 150 m. except at the W. extremity it is very

namely covered with mats, protected by a clay-coating in the open air, or stored in jars of sun-burnt clay within doors. Under proper cultivation, the alluvial districts would become very productive, but large tracts have been kept in a state of nature by the Amers, so long its rulers, either to form hunting-preserves or to avoid attracting the enmity of the surrounding tribes. In those parts that are under tillage, the land yields so abundantly that the grain-crop consisting of wheat, barley, millet, sesamum and other oil seeds, hemp, opium, and tobacco; the autumn-crop of rice, maize, cotton, sugar, and indigo. Rice, wheat, and maize form the principal staples, being both extensively used for food, and exported. Pulses, with pumpkins and other succulent plants are raised in either season. The date, mango plantain, pomegranate, lime, citron, tamarind fig mulberry, pistachio, melon grapes, &c., are amongst the principal fruits. Date-palms are planted in considerable numbers the produce being employed both for food and distillation. Floriculture also merits with attention. The shores of the delta and Lower Indus are overgrown with mango and tamarind trees, both of which supply solid for textile materials for the manufacture of mats and baskets, and wood for carpentry and fuel. The caper-tree and some others, furnish good timber for building. Bamboo and peepul trees are numerous. In moist situations gigantic grasses abound and rise to the height of 15 ft. or 18 ft., furnishing materials for thatch, ropes, &c.

Animals.—The native animals of Scindia include the tiger, panther, hyena, jackal, wolf, fox, antelope and other kinds of deer, wild ass, wild hog, &c. Porcupines, hares, and other game, are common in the open and uncultivated districts, and in the salt-marshes are bred vast herds of buffaloes. The oxen of the one-humped camel, are strong, hardy and valuable, both as beasts of burden and as furnishing a rich milk, and hair for shawls and cloths, the buffaloes are prized for their hides, flesh, and milk, of which last piles is made, which is an important article of traffic in Indian commerce. The horse, lion, camel, and porcupine, are well known, active, and capable, like the camel, of enduring great fatigue and long privations. Sheep and goats are numerous in Upper Scindia. Birds are in great variety they comprise the eagle, vulture and different species of hawks, flamingoes and peacocks of large size, and in great numbers, in the delta, water fowl in great plenty the jungle-fowl, partridge, quail, and several kinds of parrots. Porcupines and alligators are met with in the Indus and its tributaries. Fish form a chief part of the food of the humbler orders of people, and the taking of these affords employment to many persons. Venomous snakes, scorpions, and centipedes are common, and the pools are capable of supplying great numbers of leeches.

People, Customs and Language.—The Scindians a mixed race of Juns and Belooches, are partly of the Hindoo and partly of the Mahometan faith. They are described as well made, and handsome; tall, inclined to corpulence, and of dark complexion and the women are particularly noticeable in the East for their beauty. Regarding the character of the Scindians most authorities agree that they are distinguished by great ignorance, bigotry, deceit, mendacity, and avarice. Their warriors (exclusively Belooches by birth or descent) are renowned for being swaggering, boastful, not over brave, and given to predatory habits. The country swarms, also with an idle race of men, alternately soldiers, beggars, and thieves ready for service under any leader and there are, besides, vast numbers of *fabera*, lazy, worthless mendicants, who under the pretences of religious austerities on contributions exacted from the other inhabitants. The dress of the male Scindians consists of a loose shirt, a pair of Turkish trousers, both usually of blue cotton, a sash round the waist and a light cotton-cap, embroidered with silk or gold but the men of rank wear instead of the latter, turbans of enormous size, 30 to 80 inches in diameter. The women dress like the men, with exception of the cap, for which they substitute a long, loose cloth thrown over the head, and occasionally drawn over the face. The filth of both sexes is excessive. Indeed, says Capt. Panton, it is impossible to conceive anything so filthy as the interior of a Scindian town. Every *Salah* (mosque) is a common sewer at the front of the dwelling; the narrow passages are blacked up with dungheaps, in which rot the lazy *Pariahs* dogs and flies are so plentiful, that in the shops it is utterly impossible to discern a particle of what is

exposed for sale. Add to this, crowded streets of very filthy people, an intolerable stench, and a sun that would roast an egg and some faint idea may be formed of a Scindian town. The language is a branch of the Sanskrit, little differing in spelling from the pure Hindi of Upper India, though more regular and complete in the inflections of its nouns and verbs. It has a character peculiar amongst its cognate dialects, in being written from left to right. Belooches is also much spoken, especially in the districts W. of the Indus and Persian may be considered as the language of the higher orders.

Manufacturing Industry.—Manufactures are carried on at Hyderabad, Shikarpoor and some other towns but the products are chiefly consumed within the limits of the country. The natives are very ingenious as weavers, turners, and artisans, and are specially noted for their skill in the production of wooden lacquer-work, famed throughout India. The leading textile fabrics are coarse silk, cotton or mixed cloths, a species of the latter called *longer* is highly valued in all the courts of India. The coarse silk goods are woven from silk imported from China and Persia, and coloured with indigo, saffron, kermes, madder, &c. they are mostly used for saris and turbans. The manufacture of the many-coloured Belindian caps forms also an important branch of industry, and much taste is often displayed in their dyeing and arrangement of colours. The Scindians are likewise renowned for the preparation of very soft and durable leather, tanned chiefly with babul bark. It forms an important article of the export trade, and furnishes the material for a pretty extensive manufacture of shoes, sword belts, and water-bags. A paper also, is made to some extent, and of fair quality, at Shikarpoor and Kores. Earthenware is made in silk, and gunpowder in most of the towns the pottery of Hella is remarkable for its tasteful shape, and good bright colours. Swords, spears, and slumey and inefficient firearms were under the Amers, made at Hyderabad but this branch of industry is now on the decline.

Trade and Commerce.—Before its subjugation to British rule in 1844 Scindia had but little trade. Even yet its trade is insignificant. Its imports consist chiefly of British piece-goods, valises and woollens, sugar, groceries, and spices mostly from Bombay, cotton and silk fabrics from Narwar, Gujara, and Multan raw silks, drags, and dyestuffs dried fruits, gold and gold thread precious stones, and horses from Khorassan, Cabool and Bokhara and of ivory and wood from the Malabar coast. Its exports, principally its own productions, comprise rice and other grains, shoes, opium indigo potash, saffron, dried fish, shark fins, and hides seaweed from its ports in the delta with cotton, silk and other fabrics, indigo metals, sugar and spices to Khorassan and the Punjab. The transit trade between it and Khorassan and Cabool is active, and carried on principally by *Lahanna* Hindoos, through the Bolan Pass from Karsachee and Shikarpoor.

Weights and Measures.—The weights and measures in use are based on the Hindoo, equal to 843 lbs. The English and subdivided into *hazals* and *ganyas* of uncertain and varying value, it serves both for liquids and dry articles. Land is measured by the *cubit*, *gundia* and *yurk*, 5 cubits making a *gundia*, and 20 *gundias* a *yurk* = 150 ft. a square *yurk* being equal to 22,500 sq. ft. The money in circulation comprises the *shuklar* or 2 India Company's rupee = 2s. and the *hazam* rupee, worth about half that of the Company.

Dynasties.—Scindia is at present divided into three collections—Hyderabad (the capital) Karsachee (the chief port) and Khyrpore. Besides these places, its principal towns are Shikarpoor; its leading towns, Hala, Larhiana, and Tattal.

History.—Scindia was governed by Hindoo rajahs at the time of its invasion by Alexander the Great but subsequently, after many changes, it became an independent state. It was finally subdued by the Emperor Akbar in 1680, since which period it has always been either nominally or really tributary. In 1739 it fell under the power of Nadir-Shah but on his death it reverted to the imperial sway of Delhi. It was, in 1766, presented by the Mogul court as a dowry to Tipu Shah Durrani, king of Cabool, to whom country it was (given to its annexation to British India) showed subsequently. The country however was, during the whole of the last and the early part of the present century, a scene of

almost rampant civil dissension, caused by disputes between the two leading tribes of Baluchistan, which led at last to the elevation of the Talpūr dynasty of the Amēers. The Government under these Amēers was a wholly unshackled military despotism, upheld by a feudal soldiery, supported by their respective chieftains and sustained by large armed contingents of about 5000 men, just before the outbreak of the British. The hostility displayed by the Amēers of Baluch against the British during and after our operations against the Afghans led ultimately to *their* invasion by British troops, and final conquest by Sir G. Napier's army at Mervan, Fez, 17, 18, 19, Sir G. Napier's army of 1800 men, and a few guns, and was soon afterwards the prey of a predatory Peshawar. It was estimated at 1,273,000 — (Tropen, *Geogr. von Indien*).

BINDIA (or Gindia) was a district in the British state of Mysore, nearly in the centre of Hindostan Proper, which until lately was normally independent but is now subsidiary to the British It stretches very irregularly between lat. 21° and 28° 40' N., and lon. 78° 40' and 77 E., surrounded on the N and E by the territories of the new British presidency of Lahore, and of the Benaresid chiefdom and Bhopal & by the Nizam's Domains, Dhar Dewar, Indore (Holkars & Bhonsles), Nagpur, Malwa, Bundelkhand, and the dominions of the Marathas (the Garwaree), W. and N. by Banarra, Paragahur, Odeypoor Kotah, and other Rajput states, Farther N.E. to W. about 420 m. Area, 34,119 sq. m. Surface mostly undulating, with a general slope to the N. where it comprises a part of the great plain of the river James. In the S. portions of it are traversed by the Vindhyan and Satpura mountains. The Chambal flows out on the S.W. other rivers are the Ghaghara, Doodha, etc., tributaries to the James with their affluents. The soil is fertile, and the mountains the North India villages show W. The soil is generally of black ferrous and the valleys are numerous, especially as the opium-plant is an object of culture. The opium raised (as elsewhere in Malwa, in which province the greater part of the state is included) is delivered by treaty at a certain price to the British authorities, by whom it is exported from the ports of the Bombay presidency. (See **INDIA**) The principal occupations are sugar, cotton, wheat, rice, barley and peas on the dry land; in some districts, such as the hills, the forests are razed, the cotton etc. of short-staple, and exported like the opium from Baroda etc. the tobacco of Bilim and Kachchra is highly raised throughout Western India. The population are mostly Mahrattas, but include also Shoals, Miras, and Coolies, numerous Bramhmins, a few Rajputs, and a peculiar sect of Mahometans called *Sarna*, who are supposed to be of Jewish origin. At Boorhanpour in the E. there is a small village of Christians, who have been missionaries since 1615, cloth thread, grain, and paper are made. Other chief places are Gralkar (the cap.) Osjain Mandsoor, Hindu and Chenderoo. This state was founded after the successes obtained by the Mahrattas over the Mogul forces in 1728, by Seenda, a chief who raised himself from obscurity into eminence by his own merits. In 1781 Madajee Sindur negotiated a peace between the British and the Mahrattas, and about the same period he introduced European discipline and arms into the army, and gave the Mahratta army the name of the person of the Mogul emperor in whose name he subsequently acted, and was the most powerful member of the Mahratta confederacy. His successor Dowlat Rao Scinda, in conjunction with the rajah of Berar advanced with hostile force towards Poona; in 1803 he had troops defeated by those under the Duke of Wellington at Assaye and again at the battles of Delhi and Laswara; by those of Lord Wellesley, and in consequence, all his territories N. of the James, and a large tract of the country between the latter and the foot of Barwah etc. were added to the British, and he ceased to exercise control over the person of the Great Mogul. In 1815, Scinda sold Ajmer, Jodhpour, and other places to the British, in exchange for sums of equal value. Few changes of importance in the foreign relations of the state occurred from that period till 1849 when soon after the accession of an infant emperour, a turbulent army conspired to smother him. Nearly 50,000 men were collected at the capital, and the British Government sent a considerable force against the traitors. After six months the traitors were threatened with hostilities if they did not discontinue their proceedings. From June 29, 1849, in which the British troops were victorious, a new regency was appointed to act in accordance with the advice

of the British resident during the maharajah's minority, and the state, which had previously been nominally independent, was constituted subsidiary to the Anglo-Indian government. A debt of 98 lakhs of rupees (£280,000), due to the latter, was to be paid by the revenue of districts, yielding 475,000 annas annually and placed under the civil administration of British officers. Other districts in the E., S. and W., also placed under British rule, were to be administered by British officers. (£180,000) annually were suggested for the maintenance of an Anglo-Indian force of seven battalions of infantry, two regiments of cavalry, and four batteries of artillery. Any other troops maintained by the maharajah were limited to 500 men. The British resident at Gwalior is also the agent for the Government of India in the district of the Ganges river, and the British Resident at Lucknow is also the agent for the Government of India in the districts of the Ganges river. *See* *Barbadoes, territories*. *See* *§ 235, 513*. — (Macanudo, *Vie dans l'Inde*. *Troops, Survey of India*.)

the BGO or "Gözü" [see also *Chios*, *Turkish Isles*, *Andalus*] an island Asiatic Turkey in the Aegean Sea separated from the coast of Anatolia by a channel not more than 7 m wide where narrowest, and about 63 km W SW Smyrna. It is of a somewhat quadrangular form 82 km long N to S, with a mean breadth of about 12 m. Area, 296 sq km sq. The surface is generally covered with limestone ridges, separated from each other by verdant and fertile valleys, and presents much scenery of a very beautiful description. There are no perennial streams, and an abundant supply of water both for domestic and agricultural purposes, is obtained from numerous large wells. In this island, as in all the other islands of the Aegean group are raised. The principal products are wine, cotton silk and more especially mastic, which may be considered as the staple of the island. The quantity of cereals is very small. The metals is chiefly in dried fruit, preserves, oil, and salt. 1. op. of whom a large portion are Turks, about 32 000. The CAPITAL, of the same name, near the middle of the E. coast. consists of houses built for the most part of heavy stone or brick and generally with terraced roofs; is defended by a castle has manufactures of velvet and some lighter fabrics and at its harbour which is formed by two moles, and provided with two lightships, which its sufficiency of water, and the centre of the island. Pop. 14,560.—Before the war of Greek Independence, Scio was peopled almost entirely by Greeks who enjoyed greater privileges than were usually conferred on their countrymen, and were generally in comfortable circumstances. Their number at the time has been estimated at 150,000. The part which they took in the war appears to have exasperated the Turks beyond measure, and provoked them to retaliate by fearful atrocities. Having made themselves masters of the island in 1827, they are said to have put 40 000 persons to the sword, often under circumstances of horrid cruelty, and reduced the population to 15,000. Scio contends for the honour of being the birthplace of Homer, and a tradition in the rock is pointed out as the place where he is said to have taught. Notwithstanding its ancient celebrity it possesses few antiquities.

SCIOLZE, a vil Italy Piedmont, div and 9 m. NE.
 Turin, with a church, castle, and school. Pop. 1124.

SCIONZIER, a vil. and com. Sardinau States, div. Savoy prov. Fancigny 8 m. W Cluses, with the remains of three of 1 castles, a pottery tannery tile-works, and a trade in dairy produce. Pop. 2435.

SCIORIACI a tin Seely prov and 14 m. N W Byrne
 6000.

SCIOTO, a river U States, Ohio. It flows S. past Columbus about 200 m., and joins the Ohio at Alexandria. It is navigable for large keel-boats 180 m. and for oxcarts almost to its source.

SCIASCIANO, a vit Naples, prov Lavoura, W S W Noia,
in a plain: with six churches. Pop. 1100.

In ALBUQUERQUE, N. M., underlain by PAGE CLIFF.
In ALBUQUERQUE, N. M., at Alv. and township, U. States, near
Sacramento, 25 m. S.W. station on Machuchichas Bay; with a
number of churches and schools. Its harbour, at the mouth
of North River, is small and difficult of access, but convenient.
On the river many fine ships are built. It has some shipping
and fishing trade, and manufactures of leather, boots, and
shoes, hats, &c. Pop. 2,168.—S. A. Alv. and township, Ethel
Island, 13 m. W. Providence, on the Parment with three
churches, academy, and extensive cotton and woolen man-
ufactures. Pop. 1,693

SCILAVONIA [German, *Slavonia*], a territory or part of the Austrian Empire, formerly incorporated with Hungary, but now forming part of the kingdom of Croatia and Slavonia, bounded N by Hungary, E the Banat of Hungary, S Turkey, and W Croatia. Area, 5749 sq. m. It is of a very irregular and straggling form, stretching W to E. for 180 m. while its average breadth does not exceed 40 m. Its natural boundaries, however, are admirably defined by mighty rivers—the Drave on the N and the Sava on the S. and their junction with the Danube on the E. A branch of the Carian Alps, entering Slavonia from Croatia on the W, traverses it throughout its whole length, forming the watershed between the Drave on the N and the Sava on the S. sending down numerous small streams into each, and terminating somewhat abruptly on reaching the banks of the Danube. These mountains, which are almost entirely composed of limestone, intersected occasionally by serpentine and porphyry are neither very lofty nor rugged, though they frequently terminate in sharp-pointed peaks. They are generally covered up to their summits with magnificent wood. Mount Papuk, in the upper part of the Poage is the culminating point of the chain and is not more than 2700 ft. above the level of the Danube. On either side the mountains slope down rapidly and give place to a succession first of lower hills and valleys, presenting a beautifully undulating surface, clothed with verdure or covered with orchards, and then of plains which extend without interruption to the banks of the river, in some parts some dated twice and thrice a year. The tracts thus exposed form belts along the Sava and the Drave of several miles in width and being covered with verdure, form meadows on which large herds of horses, cattle, and swine are reared. The soil is almost throughout of remarkable fertility. Grain, fruit, flax, hemp, tobacco, liquors and madder are extensively raised. The minerals understood to be important, are worked only to a very limited extent. They include several mines of copper and argentiferous lead, abundance of iron and exhausted supplies of beautiful marble. Slavonia has hitherto owed much more to the bounty of nature than to the industry of its inhabitants, who are generally very ignorant, and if not indolent, restless, and of unsocial habits. This is owing in a great measure to the peculiar circumstances in which they are placed, the far greater part of their country and particularly the whole of it along the Sava, belonging to the Austrian military frontier, where every man capable of bearing arms is a soldier and the ordinary arts of life are of secondary importance. There are no manufactures deserving of the name, but the transit trade along the navigable rivers within which the country has enclosed is considerable. The principal exports are fat cattle and swine, some chiefly wheat and rye. Hides and skins, including those of foxes, wolves, and bears, tobacco, and madder, liquors, carver honey and wax. The principal imports are iron, salt, and oil. Slavonia is the only country which has preserved the name of the great Slavonian stock. The inhabitants call their country Slavonians and themselves Slavonians, and speak the so-called Illyrian tongue, which under a great variety of dialects prevails in many counties of Hungary in the E and S. parts of Croatia, in Dalmatia, Servia, Bosnia and Herzegovina. For administrative purposes Slavonia is divided into civil and military Slavonia—the former on the N subdivided into the three counties of Poage, Verocse, and Syrena and the latter on the S E and N E. subdivided into the two regimental districts (*Regimentsbezirke*) of Brod and J. S. and the battalion districts (*Battalionsbezirke*) of Csank. P. 336,000.

SCILAVONIA a vil and com. Belgium, prov and 10 m. E. Namur on the Meuse. It has manufactures of crucibles, glass, pipes, earthenware, and tobacco, a distillery and limekilns. Pop. 1492.

SCOGGIO-GRANDI an isl. Ambrise, in the Adriatic, belonging to the British group, off S.W. coast of Istria, about 5 m. S.W. Dugno. It is of very irregular shape, about 4 m. long, by 1 m. broad and has on its E. coast the village of Scoglio, which gives its name to the whole group.

SCOLE, or Osmundston, par. Eng. Norfolk 821 sq. Pop. 383.

SCOTCHBY a river, European Turkey, Albania, rises on the border of Macedonia, whence it flows N.W. and W. passes E. to the sea and enters the Adriatic, 15 m. S. Durazzo. Total course, about 125 m.

SCONE, a vil and par. Scotland, co. and 3 m. N.E. Perth, 1 bank Tay; with Established Free and U. Presbyterian churches. The village of New Scone consists of neatly built houses, and contains 1480 inhabitants, chiefly engaged in handloom weaving. Of Old Scone, the principal remains are a market-cross. Its ancient abbey in which the kings of Scotland were wont to be crowned on the stone of destiny now in Westminster Abbey, is only represented by inconsiderable ruins, and on the site of its ancient palace now stands the elegant modern mansion of the Earl of Mansfield. Area of par., 7000 ac. Pop. 2281.

SCOOTIE par. Scot. Fife. Pop. 8115.

SCOFIA a vil in Turkey in Europe, in S.W. of Bosnia 18 m. S.W. Travnik, on a steep height above a bank Vrbas. It is defended by a strong castle. Pop. about 1800.

SCOPWICH par. Eng. Lincoln 8190 ac. Pop. 419.

SCORBOROUGH par. Eng. York (b. Riding) 1329 ac. Pop. 90.

SCOREFF a river, France, rises in N. of dep. Morbihan flows S., and falls into Lorient harbour, total course, 40 m.

SCORRANO a vil in Naples, prov. Otranto E.N.E. Gai. pop. It stands on a hill, and has two convents. P. 1300.

SCOTHPRN par. Eng. Lincoln 2500 ac. Pop. 572.

SCOTLAND and *Scotia*, French, *Scotia* German *Schottland*, the N. division of the island of Great Britain between lat. 54° 58' and 56° 40' N. and lon. 1° 41' and 6° 50' W. It is separated from England on the S.E. by the Tweed S.W. by the Solway Firth and S. partly by the Cheviot Hills and partly by an indefinite moorland tract, known anciently by the name of the Debatable Land and bounded, E. by the North Sea, and N. and W. by the Atlantic Ocean. The greatest length from N. to S. is 287 m. The breadth varies considerably. Measured from N. to S. between Kilwarden and a Head on the Mull of Kintyre, it is 517 m. and on the parallel of 56° 51', and 56° respectively 130 m. 125 m. and 43 m. Between Alloa on the Forth and Dumfries on the Clyde the width is diminished to 23 m. and farther N. where a kind of peninsula is formed by the Dumfries Firth on the E. and Loch Broom on the W., it does not exceed 24 m. These measurements apply only to the mainland and therefore when the true area is to be ascertained it is necessary to add the numerous islands which singly or in groups lie to the coast and form one of their peculiar features. On the E. coast these islands are so few and small as not to require special notice but on the N. are the two large groups of the Orkneys and Shetlands of magnitude sufficient to form a separate county while on the W. a series of groups known by the names of the Hebrides and Western Isles, stretch almost uninterruptedly from N. to S., at a short distance from the coast, and though not formed into separate counties, form no insignificant portion of the whole area of the country. The largest of them are Lewis and Harris, E. Uist, S. Uist, Barra, Mull, Jura, and Islay. In the S.W. the islands of Arran and Bute have been deemed of sufficient importance to be formed into a separate county under the name of the latter. The name, area, and population of the different counties or shires, are exhibited in the following table. (See next page).

Coasts, Roadsteads, and Harbours.—Scotland in its general appearance contrasts strikingly with that of England, possessing few of the long open valleys and wide undulating plains for which the latter is distinguished. The coast-line, with the exception of a portion in the N.E. chiefly along the Moray Firth and another portion in the S.W. chiefly along the Solway Firth, where low and sandy beaches have been formed, presents an almost uninterrupted succession of deep indentations and bold rocky cliffs and headlands, and stretches out so much when its different windings are followed, as to have an aggregate length of at least 2500 m. Of these, the far larger part are traced on the W. coast, on which the waves of the Atlantic, breaking with tremendous force, have scooped out wide gulfs, and penetrated far inland, forming arms of the sea to which the name of lochs has been given perhaps improperly because they are apt to be confounded with inland lakes, to which in Scotland the same name of lochs is constantly applied. Of these sea-lochs which are entirely confined to the W. coast, the largest are Loch Lomond between the shires of Argyre and Dumbarton; Loch Fyne wholly, and Loch Lomond chiefly in Argyre shire, the former celebrated for its

other hand, on the Ayrshire coast, are the magnificent harbours of Troon and Ardrossan. Still further in, Greenock, with its excellent harbour capable of accommodating the largest vessels, appears; and at last, after a long interval, when the firth has contracted to a river, and the river to a narrow channel a whole forest of shipping comes suddenly into view and discloses one of the greatest ports of the British Empire. In a locality where nothing short of consummate skill and undomesticated perseverance could have formed or can continue to maintain it. From this hasty sketch of the coasts, roadsides, and harbours of Scotland, our attention is naturally turned to its interior, which for convenience of description has been divided into three distinct regions—a southern, a central, and a northern.

Southern Region.—The S. region commencing on the foot of Knapdale, stretches across the island, and then N. to the Lammermoor and the Pentland Hills, so as to include the whole counties of Wigton, Kirkcubright, Dumfriesshire, Roxburgh, Berwick, Selkirk, and Peebles, small parts of the East and Mid Lothians, and large parts of the S. of Lanarkshire and the S. of Ayrshire. Thus defined it is essentially a mountainous region, presenting both in isolated masses and continuous ranges a great number of summits which are more than 2000 ft. above the sea. The most conspicuous of these are situated near its centre, where Queensberry Hill the Lowther Hills, and Dalziel, rise, at respective heights of 2250 ft., 2836 ft., and 2790 ft. The most remarkable of the isolated hills are Culmoryrie 2598 ft., and Criffel 1930 ft., the one in the W. and the other in the E. of Kirkcubrightshire and Tinto, 2806 ft. in Lanarkshire. The most of the mountains have flat or rounded summits and slopes gradually without breaking into precipices. They are thus deficient in some of the grander features of mountain scenery but are in general clad with a richer verdure, and give origin to a great number of beautiful pastoral valleys. These usually borrow their waters from the streams which flow through them and form the dales of Nithdale, Annandale, Tyndale, and others, well known in border minstrelsy. In many parts, however, the S. region loses its mountainous character and spreads out into undulating and even level plains, celebrated both for their fertility and the skill displayed in cultivating them. The most extensive and celebrated of these is the Merse in Berwickshire, but they occur also in Roxburghshire, in the lower districts of Dumfriesshire, and in several parts of Wigtownshire. At least three-fourths of the surface of this region belongs in geological structure, to the Silurian system, and is composed of grey wacks and coarse slates. In this formation the valuable lead-mines which have so long been worked at Lead Hills and Wanlockhead, on the borders of Dumfriesshire and Lanarkshire, are situated. Eruptive rocks are found chiefly among the Cheviots, which are composed almost throughout of porphyry and three large outcrops of granite are seen in Kirkcubrightshire—one in the N.W. near Loch Doon on the borders of Ayrshire; another near the centre of the county, west of the Winton and largest in the S.E. where it commences on the Solway Firth, near Dry Water and stretches N.E., having the Criffel near its centre. Rocks belonging to the lower part of the secondary formation occur chiefly in the S. of Dumfriesshire and in parts of Roxburghshire and Berwickshire. They are composed mostly of old red sandstone, but occasionally rise higher in the series and become truly carboniferous. Coal accordingly is worked in a limited coal-field near Canobie, in the E. of Dumfriesshire, and in the N.W. of the same county both limestone and coal, the latter remarkable for the thickness of its main seam, are worked to some extent.

Central Region.—The central region commencing where the S. terminates, extends N. to the foot of the Grampians, and then has its boundary nearly defined by a straight line drawn in a N.E. direction from the mouth of the Clyde to Stonehaven on the E. coast. Though the least of the three regions, comprising not more than a sixth of the whole surface, it is by far the wealthiest, and contains probably three-fifths of the population. This superiority it owes partly to the fertility of its soil, and more to its salubrious temperature. It includes on the S. of the Forth and Clyde nearly the whole of the Lothians, the greater parts of Lanarkshire and Ayrshire, and the whole of Renfrew and on the N. of them the more

level parts of Dumbarrow, Stirling, and Perth, the whole of Clackmannan, Kinross, and Fifin, the greater part of Forfar, and rather more than the half of Kincardine. It thus contains the lower parts of the basins of the Clyde, Forth, and Tay, including the rich alluvial flats which line the banks of these rivers as well as the finely undulating slopes and straths which gradually rise from them and in its cities towns and numerous villages, its country seats and numerous groves, its orchards, gardens, and cultivated fields, provides itself to be one of the most distinguished abodes of industry, commerce, and agriculture. Though, considered as a whole, it is much less elevated than the general surface of Scotland, it has none of the monotonousness of flat countries. With the exception of what are called orce-lands, the diversities of hill and dale are never wanting, and several of the continuous ridges which stretch across its surface attain heights which in most other countries would be considered sufficient to entitle them to the name of mountains. The most conspicuous of these ridges are the Kilpatrick and Campsie Hills, which, commencing in Dumbarrow, stretch E.N.E. towards the town of Stirling the Ochil Hills, which, commencing to the N.E. of the same town, stretch between the lower part of Perth and Clackmannan and Kinross into Fife, and the Balvair Hills, which, commencing in the E. of Perthshire, pursue a direction nearly parallel to the two former ridges across the S. of Forfarshire. The eruptive rocks of the central region are found chiefly in the three ridges of hills just mentioned, but are also found widely diffused over its surface, in the forms of veins and patches. They are entirely composed of varieties of porphyry and trap. All the sedimentary rocks are of secondary formation. The old red sandstone situated at the bottom of the series is most largely developed in the N. part of the region and stretches continuously from Dumbarrow to Stonehaven in a broad belt, which widens out as it proceeds E. and finally covers the greater part both of Forfar and Kincardine. Almost the whole of the celebrated valley of Strathmore thus belongs to it. The same formation occurs to a less extent on the S. frontiers of this region in the S. of Haddington and Midlothian and in detached portions of Lanark and Ayr. The remainder of the surface belongs decidedly to the carboniferous system, containing all its usually accompanying rocks in regular series, from the mountain limestone upwards to the new red sandstone or Permian system. The part of the secondary formation higher in the series, and developed to a remarkable extent in England is here altogether wanting. Coal and ironstone, both in the greatest abundance and of the best quality form a number of separate fields, which extend with little interruption from the E. to the W. coast and are all included within the space bounded by two nearly parallel lines, the one drawn from the mouth of the Tay through Stirling to the Isle of Arran, and the other from the town of Dunbar in E. Lothian, to that of Chirnock on the coast of Ayrshire. The whole area thus defined cannot be less than 1500 sq. m. but when allowance is made for the large space occupied by igneous rocks, where the coal, if it ever existed, has been burnt up or otherwise destroyed, and the much larger space lying between the different coal-basins, after their seams have cropped out, probably a half will require to be deducted from the above area.

Northern Region.—The N. region, consisting of the whole of the island situated N. and W. of the line which we have supposed to be drawn from the mouth of the Clyde to Stonehaven, is by far the largest of the three and is remarkable for the number and elevation of the mountain ranges by which it is traversed. Immediately in the N. of the valley of Strathmore the Grampians rise in majesty, and present an apparently impenetrable barrier. Behind this barrier the ancient Caledonian rock refuge, and defied the Roman legions. The Grampians form not so much a chain, as a system of mountains, in which the loftiest summits are so irregularly grouped that it seems almost impossible to fix on any particular range as the principal axis. Assuming that it commences on the N.E. coast of Kincardine it stretches in a W.S.W. direction first across that county and then forms the boundary between Aberdeen on the N. and Forfar and Perth on the S. On reaching the S.W. extremity of Aberdeen it is joined by another range coming from the N.E., and commencing it with a remarkable cluster of summits occupying a kind of isolated corner common to the counties of Aberdeen, Dundee, and in

verges. On being joined by this range the principal chain takes its direction and stretches S.W. between Forth and Inverness, all its spurs reaching a point nearest to these coasts, and that of Argyll. Before reaching this point the Grampians widen out both on the N. and S. sending branches in the former direction into Inverness, and in the latter over the whole breadth of Perthshire, and even beyond it into Strathgairn, where they appear to find an appropriate termination in Benloneid. A middle branch, which from following the original direction, is perhaps entitled to be considered as the principal chain, enters Argyllshire, and is continued between Loch Awe and Edrie towards the coast. Even here it can scarcely be said to terminate, as its ramifications obviously extend into the adjacent islands of Mull on the right, and Jura and Islay on the left. Some hold Mullthorpe to be the N. limit of the Grampians, and of course consider the Monagh Lea Mountains, which rise immediately beyond the strath, and are parallel to it, as a distinct chain. A better arrangement considers the Monagh Lea as only one of the parallel terraces of the Grampians and finds a much better boundary in the valley of Glenmore and its remarkable chain of lakes. The Grampians, comprehended within these limits, is the loftiest mountain chain in Great Britain and consists of a number of summits exceeding 4000 ft. The culminating point, long supposed to be Ben Nevis 4370 ft., in the W. of Inverness-shire is now claimed by Ben Macduin, said to be 4280 ft. It forms one of the remarkable clusters of mountains already referred to as meeting on the borders of Aberdeen, Banff, and Inverness. The others connected with it are the celebrated Cairngorm, Cairn Toul, and Ben Avon respectively 4695 ft. 4320 ft., and 2967 ft. To these may be added Ben Cranach an Englishman 3567 ft. Benloneid, Strathgairn 3195 ft. Ben More, Ben Larnach, Scheuchallan, and Benavoulch, Perthshire, respectively 3819 ft. 3545 ft. 3513 ft. 3180 ft. 3551 ft. and Benacool on the N. frontier of Forfar 3377 ft. The Grampians in general have a very sterile and desolate aspect. The grass or heath which usually covers their lower declivities often disappears in the ascent, and long before the loftiest summits are reached vegetation appears to be all but extinct. Many of the mountains have a rounded form, but others of them terminate in fantastic peaks, and have their sides clothed by ravines, the sides of which present precipitous and sometimes very levelled feet. One of these on Ben Macduin has a height of 1000 ft., and another on Ben Nevis a height of 1500 ft. On the N. and W. slopes of the lakes of Glenmore another series of mountain chains begin to rise, and are continued with little interruption to the N. coast across the counties of Inverness, Ross, and Sutherland, their general level is much lower than that of the Grampians and their loftiest summits, rising generally from an elevated level, less considerably in their apparent height, and hence often fail to furnish specimens of the grand and sublime character to those for which the Grampians are celebrated. Many however who have visited them affirm that they are less admired merely because they are less known. The more remarkable of the summits are Ben Wyvis, Ross-shire 3730 ft. Ben Dearg, Ben More, and Ben Clibric, Sutherland, respectively 3551 ft. 3281 ft. and 3165 ft. and Morven Caidness, 2534 ft. The last-mentioned falls considerably short of the others, and calls attention to the fact that the country in which it is situated has not much of an alpine character and slopes gradually from the E. frontier of Sutherland, till it presents the appearance of an undulating plain sometimes fertile, but for the most part covered with stunted heath. The same lowering of the surface towards the E. coast is exhibited also on the E. of Sutherland, and still more along the shores of the Moray Firth and of Aberdeen, making these districts, though locally within the Highlands, truly part of the Lowlands of Scotland. The geological structure of the N. region is distinguished from the other two chiefly by the extent to which granite and the crystalline schists are developed within it. Chlorite and mica-schists form the whole of the E. frontier of this region, forming a very narrow belt in Ross-shire and the N. of Torris, but widening out in the N. of Perthshire and finally covering the large part of Argyllshire. Gneiss is developed on a still larger scale, covering considerable parts of Aberdeen, Elgin, and Nairn and nearly the whole of Inverness, Ross, and Sutherland. The largest development of granite is in Aber-

deen, where it intermingles strongly with the gneiss, and does not chance the country with it. Fossils of granite are also diffused over many other quarters. Trap is not often seen on the mainland, but the large islands of Skye and Mull are almost wholly composed of it. The only part of the secondary formation covering considerable tracts is the old red sandstone, which extends over nine-tenths of Caithness, and is continued S. by a belt along the coast. This belt is narrow on the E. coast of Sutherland but widens out greatly on reaching the Dornoch Firth, between which and the Moray Firth as far E. as Banff it not only lines the shore, but penetrates to some distance inland. The old red sandstone also occupies almost the whole group of the Orkneys, and appears in several large patches on the W. coasts of Sutherland and Ross, more especially the latter in the vicinity of Loch Broom, and S. along the coast as far as Loch Carron. Above the old red sandstone a large gap occurs in the secondary formation and the carboniferous system appears to be altogether wanting except at Brora, in Sutherland where a small unimportant coal-field has been worked. In the same vicinity a belt of lias and coals extends along the coast from Helmsdale to Gairloch.

Rivers and Lakes.—In proportion to the extent of the country, there are both numerous and of great magnitude, but in consequence of the configuration of the surface are not very equally diffused over it, the W. part containing almost all the lakes and the E. with a single exception, all the more important rivers. Beginning with the latter and proceeding from the S.E. extremity N. the first large river which presents itself is the Tweed, which, from rising in Scotland, and drawing its chief supplies from it, is usually considered a Scotch river though its lower and more valuable part of its course is shared by England. Its basin comprehends the whole counties of Peebles and Selkirk, a small part of Midlothian, the whole of Berwickshire, nearly the whole of Roxburgh, and a small part of the English county of Northumberland, and has an area of about 1870 sq. m. It wants the wide estuary which is common in Scotch rivers, and in consequence of this as well as the shallowness of its mouth, and the rapidity of its current, is of little navigable importance. It is celebrated, however, for its salmon-fisheries, its length, including numerous windings, exceeds 100 m. The head of the firth, where it enters the Forth, which is Benloneid and possesses comparatively little importance but it reaches Birling where it commences the beautiful windings for which it is celebrated, and begins to be navigable, at first only for small sloops favored by the tide, but at Alloa, and thence to its mouth, for vessels of the largest class. Its chief navigable importance, however is due to its magnificent estuary on which Leith and Granton, the two ports of the capital are situated and the communication opened up with the W. by means of the Forth and Clyde canal in length including windings, if conceived to terminate at Kilsyth, is about 100 m. but when its estuary is added is increased to at least 140 m. Its basin includes, on its N. bank a part of the W. and S. of Perthshire, the whole of Clackmannan and Kinross, and the far larger part of Fifehire and on its S. bank a long narrow belt of the W. and the whole of the E. of Perthshire, and the whole of the three Lothians with the exception of two small corners of Edinburgh and Haddington belonging to the basin of the Tweed. The area of the upper part of the Forth basin, terminating at Kilsyth, is only 645 m., but adding to it the basin of the firth, the whole area cannot be less than 1400 sq. m. The Tay owing not so much to the depth and width of its channel, as to the rapidity of its current, and the supplies which it is constantly receiving from closely mountainous regions and melting snow, surpasses all the rivers of Great Britain in respect of the quantity of water which it discharges into the sea. It has its source in the W. extremity of Perthshire, and pursues a very tortuous course S.E. till it reaches Perth where it becomes navigable, with the favour of the tide, for vessels of 100 tons, and begins to form the firth of its name. Owing partly to the sands which accumulate in its bed from their shifting nature greatly increase the difficulties of navigation, its navigable importance is almost confined to Dundee, where, notwithstanding all that has been done in providing piers and locks, large vessels must still anchor in the channel. Its salmon-fisheries are the most valuable in Great Britain. Its

whole length, from its source to the E. extremity of its firth at Bute Head, is about 110 m. and its basin, with the exception of two narrow strips of Forfar and Fife on either side of its firth, belongs wholly to Perthshire, has an area of above 2250 sq. m. To the N. of the Tay a number of small streams reach the sea directly and thus have independent basins; but the only one of any importance is the S. Esk which has the chief town of Montrose at its mouth. The next river of importance is the Don, which originates in a number of torrents sent down from the loftiest summits of the Grampians in the W. of Aberdeenshire, and, flowing almost due E. through the country along the N. foot of the ranges finally forms part of the boundary between it and Kincardineshire, and falls into the sea at the town of New Aberdeen. Almost at the same point, immediately to the N. the Don also has its mouth. The chief importance of both rivers is derived from their salmon-fisheries, the granite-quoires on their banks, and the traffic occasioned by these and the vicinity of Aberdeen. The length of the Don is about 80 m., and the area of its basin 765 sq. m. Those of the Don are respectively 60 m. and 530 sq. m. Hitherto all the rivers have had S. courses, but at Kinnaird's Head the coast makes a sudden turn and continuing almost due W. to the Moray Firth, gives the rivers which fall into it more or less of a N. direction. The first of these rivers is the Dorn, only deserving of notice from having the county town of Banff at its mouth. The next is the Spey, of more importance. It rises among the recesses of the Grampians, between Lochs Laggan and Lochy near the W. extremity of the Monagh Leas range, flows first E. N. E., and then E. through the celebrated stretch of same name, and falls into the sea without forming any estuary. Its stream, remarkable for its rapidity in which it surpasses all other British rivers, has a length of about 96 m., its basin which includes the whole of the N.E. part of Inverness-shire to the S. of the Monagh Leas, and the far larger part of Moray, Banff, and N. Aberdeenshire, is about 1100 sq. m. The salmon-fisheries of this river are valuable and the stretch through which it flows is one of the best wooded districts in Scotland. The Findhorn, which also rises in the Monagh Leas Mountains, and falls into the Moray Firth is the last of the rivers of the E. coast deserving of special notice. The length of its course is about 50 m. and the area of its basin about 400 sq. m. It is very subject to inundations, one of the most remarkable of which took place in 1839 and is well known in connection with what are called the Moray floods. The N. and W. coasts are equally destitute of rivers of importance, and therefore, without stopping to notice any of them, we proceed at once to the Clyde. The admirable position of this river has already been referred to, and to this, much more than either to the length of its course or the volume of its water is it indebted for a navigable importance far surpassing that of all the other Scottish rivers. It rises in the highest part of the S. region, in the same mountain range, and at a short distance from the points where the Annon and Tynd began their course, and after proceeding very circuitously in a W. direction, nearly across the centre of Lanarkshire, forms the boundary between the counties of Renfrew and Dumfriesshire and discharges itself into the broad firth which bears its name. In the upper part of its course it dashes along with the impetuosity of a mountain torrent, and in the vicinity of the town of Lanark forms a series of magnificent falls, but in the lower part winds along in a gradually widening valley, till it reaches Glasgow, and at the very point when it first becomes navigable, is crossed by the ships. Its length from its source to Dumfries, at which it is considered to terminate, is about 73 m., but when continued to Greenock, as it actually ought, is 80 m. The area of its basin within the same extended limits is 1080 sq. m. In the Solway Firth, which may be considered the S. coast of Scotland, are the mouths of the only three of its rivers in which a S. direction predominates, they are the Dee, Nith, and Annan. The first, rising among the mountains on the N. frontiers of Kincardineshire, flows across that county dividing it into two nearly equal parts, and, becoming navigable about 2 m. above the town of Kincardine, falls about 8 m. below it into the Solway, after forming a broad estuary. The Nith has both a longer course and a much larger volume of water. It is formed by several mountain torrents on the N. frontiers of Dumfriesshire, and flows S.E. past the

town of Dumfries, and has its mouth about 7 m. below. The channel is much obstructed by sandbanks, and when the tide begins to flow into it presents—more especially at springs, and during strong gales from the W.—the rather unusual phenomenon of a bore. The Annan whose source, near that of the Tweed and Clyde, has been already mentioned, has its direct course nearly due S. and falls into the Solway a little below the town of Annan. Both the rivers of the Solway and its coasts are much valued by salmon, and furnish a considerable revenue from their fisheries. The numerous lakes of Scotland, almost for the most part in Highland glens, are generally characterized by a length altogether disproportioned to their breadth abundant with fish and present scenery distinguished for grandeur and varied beauty. The most remarkable are Loch Lomond the largest and finest in Great Britain situated between the counties of Stirling and Dumfriesshire, but chiefly in the latter 45 m. in length 7 m. in maximum breadth 20 fathoms in average and 180 fathoms in maximum depth and 45 sq. m. in area. Loch Awe, in Argyllshire, 30 m. in length, 2½ m. in maximum breadth, and 30 sq. m. in area, Loch Ness Och and Lochy, in Inverness-shire forming the remarkable chain of which advantage has been taken to form the Caledonian canal, which connects the North Sea and the Atlantic, has a length of 80 m. of which 57½ m. are lochs and a minimum depth of nearly 20 ft., and though making a very small return for the million of pounds sterling expended on it, justly ranks as one of the greatest of modern works of engineering. Loch Shin in Sutherland, Moray, in Ross-shire, Argyll, Moray, and Laggan in Inverness-shire. Erioch, chiefly in Inverness-shire, though partly in Perth and Tayside, Earn, Rannoch, Katrine, Achna Veascher and Linnaluga all in Perthshire. Among Lowland lakes, the most celebrated in every respect is Loch Lomond, in Inverness-shire, which in the roundness of its form contrasts strikingly with all the other large lakes above mentioned. *Climate*.—In addition to the observations on the climate of the British Isles in the article BRITAIN, EASTERN, it may be sufficient here to state that though Scotland is by no means excluded from the general advantages there described its rugged and mountainous surface prevents it from enjoying them to the same extent as England and Ireland, and gives it at once more rigorous winters and more uncertain springs and harvests. There cannot be a doubt, however that the climate, as a whole, is eminently conducive both to bodily and mental vigour, and that the whole country does not can hardly at a single distance to which the name of unhealthy can with propriety be applied. *Agriculture*.—The cultivable land of England exceeds three-fourths the whole of Scotland is not more than one-third of the whole surface, and hence the agriculture of the latter is not so much distinguished for the extent of land which it occupies as for the skill and industry with which all its various processes are usually conducted. Considerable tracts in the Highlands derive their chief value from their shootings, and are found to remunerate their proprietors most liberally when converted into deer-forests. A very large proportion of the remainder of the surface and also of the more mountainous Lowland districts, is rented by small farmers who, conducting their agricultural operations to the cultivation of root-crops particularly turnips, wherever they can be successfully grown, and of patches of oats for the indispensable supplies of meal and fodder devote their chief attention to the rearing of cattle and sheep, and at all the great fairs of the country parties of the celebrated breeds of Fallow have long distinguished themselves by the numbers and excellence of their best stock which are there purchased chiefly by dealers from the S., for the purpose of being fattened on the rich pastures of England. In recent times, however, owing to the facilities afforded by steam and railway conveyance, the fattening of stock attracts much more attention than it was previously entitled to do, and many districts which formerly furnished lean stock only, are enabled, by an extension of the turnip-husbandry and occasional supplies of oil-cake, to feed off part of their stock and convey it at ease to its final destination. The most celebrated arable districts of Scotland are, in the S. region, the Mearns of Berwickshire, and the lower part of Roxburghshire, Dumfriesshire, and Galloway. In the central region, the Lothians, the cereal-lands along the banks of the Forth both in Edinburghshire and Clackmannanshire, the lower parts of Lanarkshire,

Irish and Ayr, the lower parts of the middle and western districts of Fifehire, Perthshire, and the Garioch of Galloway, in Perthshire, and the valley of Strathmore continued from the E. of Perthshire and across Forfarshire into the Mearns, and in the N. region, though on a more limited scale, in parts of the E. of Kincardine, and the lowlands which line the shores of the Moray Firth, including parts of Cromarty, Nairn, Moray, Banff, and Aberdeen. In all these quarters the art of farming may be seen to its high perfection as in any other portion of the globe. The dairy husbandry in general merits less praise, but has made considerable progress in Lanarkshire and Ayrshire. For other particulars relating to agriculture, see *BARRON'S KILMARNOCK*.

Manufactures.—While generally referring to the article *BARRON'S KILMARNOCK* for details concerning mineral wastes, and industrial production, we may add that the principal branches of manufactures are cotton, which have their central locality at Glasgow and Paisley, linen at Dundee and Dundee, woollens at Kilmarnock, Galloway, Striving, and various places at the foot of the Ochils and moor, besides occupying numerous spinning-works in almost every great Scottish coal-field has recently begun to be employed on a very extensive scale in ship-building, particularly on the Clyde.

Government.—In regard to general government, Scotland stands on the same footing as England and Ireland, but in the Articles of Union express stipulations, declared to be essential conditions of the union itself, were made in regard to law and law-courts, and the form of church government.

Law and Law-courts.—The law of Scotland strongly resembles, and is in a great measure borrowed from that of England, in regard to those branches which have either been created or greatly extended by the progress of modern civilization. Hence, trial by jury in civil causes and many of the most important parts of mercantile and maritime law though differing much in form are substantially English. The strong inclination of the legislature to extend this uniformity has been manifested in many recent enactments, and more especially in those relating to the law of criminal. In regard, however, to crimes, and what are called heritable rights, relating chiefly to lands, houses, and things which may be considered accessory thereto, the Scotch and English codes continue essentially different. In regard to crimes, the penalties have almost, as a matter of course, been nearly assimilated, but the forms of procedure exhibit striking contrasts, and while similarity is still required in English juries, those of Scotland decide by a simple majority—a mode perhaps more rational, but certainly far less favourable to the accused. In regard to heritable rights, the feudal law with its numerous and perplexing formalities long possessed, and though considerably modified by recent changes, still retains greater ascendancy in Scotland than in England. If in regard to these rights, Scotland has any title to boast of superiority it is chiefly in her admirable system of records, by which all business affecting land can be accurately ascertained, so as to make either the purchase of land or the lending of money upon it as secure as any other kind of investment. The Court of Session is the supreme civil court of Scotland, but within one of the essential characteristics of supreme strictly so called, inasmuch as its decisions may be carried by appeal to the House of Lords. In the Articles of Union the integrity of that court was stipulated, and when the growing wants of the country made it necessary that some modification should take place, legislators were greatly puzzled how to proceed without running counter to the stipulation. The judges, 15 in number, sit in one court, called the Inner House, whenever a final judgment was to be given and of course, each case was presented to be studied by the whole 15. It was justly deemed preposterous that so many minds should be thus employed, and, by a happy device, without changing the name of the court, or even supposing that of the Inner House, a kind of the 15th division was made, by which a certain number of the judges were removed to the Outer House, to sit there as permanent Lords Ordinary and the remainder, forming the Inner House, were arranged in two divisions, each to sit separately and decide finally on all cases brought before it before review. The removal of the judges has led to other important changes. The number of the whole judges has been reduced to 15 and in discussing other organic changes which are still proposed, the legislature is extremely

prepared to adopt or reject them on their own merits, without reference to the Articles of Union. The Court of Session, or criminal court, though composed only of judges of the Court of Session, is supreme in the highest sense, since its decisions in criminal cases are not subject to any review. The principal subordinate jurisdictions are Sheriff courts, established in each county or stewartry. Sheriff's authorities, or judges ordinary, are on most holding separate courts in different districts, decide, in the first instance, subject to the review of the principal sheriff or sheriff-depute, whose decisions, though final within the limits of his jurisdiction, are reviewable by the Court of Session with the exception of classes of cases provided for by special statutes. The most important of these classes are those which come before the Small-debt Court. In it the sum sued for must not exceed £12; and the sheriff's decision is final. Besides the sheriff, each county or district of a county has its Justice of Peace Courts, in which judges, not stipendiary, decide on principles of equity in minor crimes and small debts, and in every town of any importance are Justice, Dean of Guild, and Police Courts with limited jurisdictions.

Religion.—The Church of Scotland, as guaranteed by the Articles of Union, in its doctrine, government, and discipline, is the church established by law. Its form is Presbyterian and its doctrine Calvinistic. All its ministers hold the same ecclesiastical status of presbyter, and are on a footing of perfect equality. The whole country is parcelled out into 1010 parishes, in each of which there is at least one presbyter or parochial minister, who, in conducting the affairs of the parish is assisted by a body of laymen called elders. The elders, provided over by the minister as permanent moderators form the Kirk-session, which is the lowest court of the church, and decides, in the first instance, on matters of discipline, and various other parochial matters, chiefly of an ecclesiastical nature. Its decisions are subject to the review of the court next in order, which is the presbytery and is composed of all the ministers, and an elder from each of the parishes within its bounds. The next higher court is the synod, composed of a certain number of presbyteries, being usually all those contained in one county. The synod reviews the decisions of presbyteries both in cases which have originated in them, or been brought before them from Kirk-sessions. The highest, or supreme ecclesiastical court, is the General Assembly. Its constitution is very peculiar. A lord high commissioner sits in it as representative of the sovereign, but does not take part in its deliberations. The president or moderator is chosen annually by each assembly. The members consist of representative ministers and elders. The ministers are chosen only by presbyteries, each presbytery choosing one or more, according to its numbers; the elders are chosen chiefly by presbyteries, but each of the old 45 royal burghs may, and most of them do, send an elder. The General Assembly acts in two capacities—a judicial and a legislative. In the former it decides all cases that come before it by review and in the latter it makes laws for its own internal government. The extent of its powers in this respect were never well defined, and, a few years ago, became the subject of very earnest discussion. It has first brought the church and the sovereign civil courts into collision and in 1845, issued in the disruption of the church itself, no fewer than 474 ministers voluntarily severing their connection with it under protest, and asserting all their living souls should submit to what they regarded as a series of direct encroachments on their spiritual independence.

Previous to this disruption, the Established church was nominally adhered to by a majority of the population, but has, in consequence of it, been reduced to a decided minority. The protesting ministers and their adherents formed themselves into the Free church, which has advanced with such wonderful rapidity that it already (1865) numbers 750 congregations; and within the short period of 10 years, has extensively extended on the building of churches, colleges, schools, and manses, the maintenance of ministers and schoolmasters, and other ecclesiastical and educational purposes, the sum of not less than £3,912,489. The next greatest religious body not in connection with the Establishment, is the United Presbyterian church, composed of the union of three bodies formerly known under the names of Burghers, Anti-Burghers, and the Relief and numbering 545 congregations. Both the Free and the

U Presbyterian churches, and several minor bodies, agree with the Establishment in adopting the Presbyterian form of government, and adhering to the *Confession of Faith*, and differ with it chiefly in regard to the appointment of ministers—the Establishment submitting to patronage under a form somewhat modified by recent enactment, and the others totally rejecting it. The U Presbyterian church is, moreover, understood to be generally in favour of what is called the Voluntary, and opposed to what is called the Establishment principle, the Free church, on the contrary approves the latter principle, provided it is practically carried into effect in such a way as to be compatible at once with purity of doctrine and spiritual independence. To these three bodies belong at least four-fifths of the whole population, but in addition to them are Reformed Presbyterians, English and Scotch Episcopalians, Independents, Baptists, Methodists and R. Catholics.

Education.—When Scotland was first emancipated from the bondage of Popery, Knox and his fellow reformers, in a spirit of the most enlightened philanthropy proposed a distribution of the church-funds, which would have provided effectually for the education of all classes; and though baffled by the selfishness of those who had seized upon the funds, and were determined not to disengage them, proceeded resolutely with their plan, and did what in their lay to establish an endowed school in every Scotch parish. The foundation having thus been laid, the work was never abandoned, and the parochial school system proved so effectual that Scotchmen, wherever they went, distinguished themselves by shrewdness, intelligence, industry, and honesty and in regard at least to the lower and middle classes were generally admitted to be the best educated people in Europe. The means of education, however, were unfortunately allowed to remain almost stationary, while population was advancing with remarkable rapidity, and hence, though the parochial system continued to be tolerably effective in rural parishes it became almost powerless in large towns, and Scotland began to descend rapidly from her foremost place among civilized nations, to a much lower grade. In the general estimation which popular education has attracted, Scotland has not been overlooked, and a happy rivalry has been excited among the different religious bodies, urging them to strenuous exertion in erecting schools by means of voluntary subscriptions, supplemented by parliamentary grants. It were vain to assert that the exigencies of the case have been already met; but there is surely reason to think that the evil instead of continuing to make head, has received an important check and good ground therefore to hope that it will ultimately be extinguished.

People.—As far as can be gathered from the very imperfect records of early times, Scotland was originally peopled by Celts, who spread themselves over the whole country, and had such a numerical ascendancy in it, that even after they ceased to be the dominant race of the Lowlands, both natural and artificial objects mountains and valleys, rivers and lakes as well as towns, villages, and hamlets, retained the Celtic names which they had given them. The Tartan tribes, which had landed on the English coast, naturally spread themselves N., and, aided by new arrivals of their countrymen, drove the Celts before them into the Highlands, and made themselves masters of all the low country. The resemblance between the Scotch and the English language, a resemblance almost as close as is usually found between the spoken dialects of a common tongue, proves the common origin of the people who speak them. It is not probable, however, that the Celts were driven out by one sudden onset. Had this been the case, they could not have left so many memorials of their existence behind them, both in the objects already referred to, and in the language of their conquerors. But if their expulsion was gradual, a considerable commingling of races must have taken place, and the Scotchman, though Saxon in the main, must be presumed to have an infusion of Celtic blood in his veins. To this, doubtless, must in some measure be ascribed the peculiar qualities by which the Scotch and English are still distinguished. In both, there is the same love of kindred and country, the same indomitable courage and perseverance, which in pursuing any desired object, will either find a way or make one; but in the Scotch, there is less bluntness, downright honesty, less love of fair play, less warmth

of heart. His shrewdness is apt to degenerate into cunning, and his cold calculations into mere selfishness. On the other hand, he is far less dependent on mere bodily gratification, and will not grumble at any measure of discomfort which it may be necessary to endure, when the attainment of the object at which he aims promises to compensate for it. Many fine examples of this quality may be found in the history of Scottish individuals who, from a lowly station have gradually raised themselves to eminence in any of the great walks of life. In regard to intellectual qualities, there are very few branches of literature, science or art in which Scotchmen do not hold an honourable place. In works of imagination and poetry their only great names are Burns, Campbell and Beattie, and in more ordinary they have not much to boast of; after Jeffrey and Chalmers, but they are unsurpassed as historians and unequalled as metaphysicians. Their medical schools were long the most celebrated in Europe, and their inventive powers are sufficiently vouched for by the genius of a Watt. They have sometimes been upbraided, not without cause, with a want of solid learning, and a contrast very much to their disadvantage has been drawn between their theologians and those of England. Admitting the superiority of the latter a simple examination of the cause would show that it is truly to be ascribed to the former. Every Scotch clergyman has his cure of souls, and if he is faithful to his office, cannot find much leisure, even for those literary pursuits more immediately connected with his own profession. His task is to raise a more durable and valuable monument in a well instructed, moral and religious community and who that knows anything of Scotland can doubt that this task is in general admirably performed. In what part of the world is life and property more secure, where is government under less apprehension of popular outrage and where is the virtuous feeling of independence which will patiently submit to the greatest privation sooner than become a recipient of patronage? The last feeling unfortunately is somewhat on the wane. As human nature is constituted a compulsory provision for the poor rendered necessary partly by the rapid increase of a manufacturing population, and partly by the influx of strangers to whom from infamy beggary has been a common vocation necessarily makes sad havoc with the better feelings of the poor, but pauperism though more visibly manifested than before the emancipation of the negroes has not as yet found within very manageable limits, and does not threaten ever to become the gorgeous evil which at one time, in England threatened the good order and even the very existence of civil society.

History.—The early history of Scotland is full of fable, and even where deemed authentic, possesses little interest till about the end of the 9th century, when we find the Norwegians, who had previously taken possession of the Orkney and Western Isles endeavouring to establish themselves on the mainland, and overcoming the greater part of Galloway, Galloway, Ross, and Moray. The Scottish chieftains united to oppose their further progress, but were unsuccessful, and the Norwegians held almost uncontested dominion over the N. and W. of Scotland as far as the Firth of Clyde. A new combination of chieftains, headed by Malcolm, the Marquis or Lord of Moray, had better success, and in 938 the Norwegians were expelled from the mainland. Malcolm now laid claim to the Scottish crown and having defeated and slain the actual possessor Kenneth IV. succeeded Malcolm or Gram, began to reign under the title of Malcolm II. He must have been both a talented and a successful prince, as he was able in those turbulent times to retain the sovereignty for 26 years, till his death in 1023. His throne had been chiefly upheld by the Celts, for the Scotch continued attached to the race of Kenneth IV. and now succeeded in giving the crown to his son Malcolm Kenneth who assumed the title of Malcolm III. After a short reign of four years, he was succeeded in 1065 by his grandson Duncan, whose lineage afterwards furnished the legends on which Shakespeare has founded his immortal tragedy of Macbeth. History, however, does not confirm the legends, but, on the contrary, narrates that in 1040 Macbeth, Marquis of Moray at the head of his Celts, met Duncan at Elgin, and having slain him in flight, became in consequence king of Scotland. He had reigned several years, when Malcolm, son of Duncan, who had taken refuge at the English court, returned to Scotland with an English force, headed by

Boward, earl of Northumberland, and driving Malcolm toward the Forth, became king of the whole of Scotland to the S. of it, under the title of Malcolm, crowned Canmore, or Great King. In a second battle, which took place at Lumphanan, in Aberdeenshire, 1058, Malcolm was defeated and slain, and Malcolm Canmore became undisputed sovereign of the whole of the mainland of Scotland, with the exception of a portion in the N., which the Norwegians, who had been allies of Malcolm, managed to retain. The reign of Malcolm Canmore was long and prosperous. His great natural talents had been improved by his education at the court of Edward the Confessor and his court, which was crowded by Saxon nobles from the S. whom the Norman conquest had driven into exile, was much more refined than that of any of his predecessors. On his death in 1093, the succession was disputed by Duncan the son, and Donald Bane, the brother of Malcolm, the great body of the Saxons supporting the former and that of the Gaels, together with the Norwegians, the latter. Duncan lost his life in the struggle, but Donald Bane's success was short-lived, and Edgar a brother of Duncan, aided by the English, drove him from the throne. Edgar reigned 10 years, and was succeeded by two brothers, first by Alexander I. in 1107, and then by David I. in 1123. The latter reigned vigorously for 46 years, and was succeeded by his grandson Malcolm, succeeded the Maiden, then only in his 11th year. During the four last reigns, beginning with that of Edgar, the general institutions of the country underwent important changes, and were in a great measure assimilated to those of the Anglo-Saxons in England. Norman institutions appear to have been first introduced under Alexander I. The succeeding reigns of William, crowned the Lion, in 1126, Alexander II in 1214 and Alexander III in 1249, are not remarkable for great national events, but in 1290 the death of Margaret, summoned the Maiden of Norway who had succeeded her grandfather Alexander III, in 1266, having extinguished the direct line of the Scottish kings, led to a competition for the crown, from which important consequences followed. The competitors were John Balliol and Robert Bruce, both claiming through descent in the female line from David, earl of Fife, as a younger brother of William the Lion, the former as great-grandson by an elder and the latter as great-grand-son by a younger daughter. Both were supported by powerful parties and had prepared to decide their claims by an appeal to arms, when Edward I. of England, whose ambitious designs against the independence of Scotland had long been manifest, managed to have himself appointed umpire. His only object was to find a tool, and choosing Balliol the more subservient of the two, decided in his favour but on the express condition that he should hold the Scottish crown under the English sovereign as his vassal lord. The independence of Scotland was thus formally bartered away. The nation felt indignant, and for a time murmured in silence, but the parricide of Balliol and the tyrannical proceedings of Edward occurred in bringing matters to a crisis. The patriotic Wallace appeared and commenced the glorious struggle, and though many reverses were sustained, the cause of freedom continued to gain strength. Robert Bruce was at last able to meet the English armies in the field, and achieved the independence of his crown and kingdom in 1314, by the great victory of Bannockburn. His reign, the most glorious in Scottish annals, terminated in 1329 when he was succeeded by his son, David II., who neither possessed the talents nor enjoyed the good fortune of his father. He died without issue in 1371, and the dynasty of the Stuarts commenced in the person of Robert Stuart, crowned Henry, a grandson by a daughter of Robert Bruce. He was succeeded in 1507 by his son Robert III. and Robert III. in 1507 by his son James I. From the commencement of the Stuart dynasty the greater part of the kingdom had been surrendered to the hands of a few powerful families, who ruled in their own districts like sovereign princes, and were able, especially when they joined together to overthrow the crown. James I. in an able and accomplished sovereign, both felt the evil and pursued the true remedy. The great object was to find a middle class, on which the crown could fall back when the nobles proved rebellious. James accordingly created a great number of burghs with important privileges, and was steadily proceeding with reforms which must ultimately have brought society to a

better state, when he was basely assassinated. He was succeeded in regular descent by four other sovereigns of the same name, who all suffered more or less from the turbulence of the nobles, and shared in the misfortunes which seemed to have marked their family as a devoted race. James II. perished by the bursting of a cannon at the siege of Roxburgh castle. James III. while fleeing wounded from his pursuers was overthrown and murdered in a hovel; James IV. perished on the fatal field of Flodden, among such heaps of slaughter that his body was never recognized and James V. might almost have envied him for though he had literary tastes and accomplishments which would have distinguished him in any rank of life, and had reigned not unsuccessfully, disasters at last overtook him, and he retired to his palace of Falkland only to die of a broken heart. The misfortunes of his family survived him, and were all accumulated in the most cruel and ignominious form on the head of his unfortunate daughter Mary. During her father's reign the Reformation had begun to take deep root in the country, and when she arrived to assume the sceptre, had acquired a force which could no longer be withstood. Unhappily the prejudices of her early education threw her into the hands of blind, bigoted, and crafty priests, and there were things in her own conduct which not only evoked the suspicions, but alienated the affections of her best subjects. Her whole life was a tragedy, and on reading its details it is impossible to wonder they have provided so much food for numerous romances. Mary having fled to England, and claimed the protection of her cousin Elizabeth, was imprisoned, and ultimately consigned to the scaffold in 1567, by the English queen, and was succeeded by her son, James VI. probably the least meritorious of all the Stuarts, and yet, by a strange concurrence of circumstances, he not only gained his mother's crown, but that also of the kingdoms who deprived her of life. From the accession of James VI. to the English throne in 1603, the union of the two kingdoms becomes almost identified, though they both retained their independence, and continued to be ruled by separate titles till the Act of Union in 1707. The intervening period is remarkable chiefly for the cruel persecutions perpetrated by James VI. and the succeeding Stuarts, in their insane attempts to force Episcopacy on Scotland, and the fearful retribution which it brought upon them. Since the Union the most remarkable events are the two rebellions of 1715 and 1745, which vainly endeavored to bring back the Stuarts, and could not have succeeded without striking a fatal blow at the national property.

SCOTSWOOD a vil. England, on Northumberland, on the Tyne, here crossed by a magnificent suspension-bridge, about 8 m. W. Newcastle. It has a chapel of ease, a Wesleyan chapel, fine scenes of scenery, of which great quantities of firebricks, gas-retorts, crucibles, &c. are made lamp-black works, a coal-tar manufactory, and two extensive paper-mills.

SCURCULA, *SCURCULLA*, or *SCURCULLA* is a Naples prov. Abruzzo-Ultra II, 6 m. N W Avezzano, near 1 bank Isola with five churches, a royal abbey two convents, and an almshouse. Pop. 1970

SCURLOCKSTOWN, par Irel Meath 3590 sq. P. 892
SCUTHRI — *Scuthri* (see *Charybdis*, Turkish, *Tchakir*)
 A town in Asiatic Turkey, on the Bosphorus, opposite Constantinople, of which it is sometimes considered a suburb. It is built on several hills, and contains numerous mosques, fine houses and baths, and many taverns or kitchens for the poor mostly endowed by royal persons. It has also a palace and gardens belonging to the sultan, large grain-warehouses, manu- factories of silk and cotton fabrics and the most extensive and beautiful burying-grounds in or around the capital of the Ottoman empire. Pop. 80,000 — 2 in European Turkey
ATHALIA, at the S extremity of lake of same name. It is fortified; and has two castles, a large bazaar several mosques, and Greek and R. Catholic churches some ship-building yards, and manufactories of cotton goods and fireworks. It exports wool wax, hides, skins, tobacco, and dried fish to Trieste, Venice, and Avignon; and imports colonial produce, silk fabrics, and other manufactured goods for sale at the large fairs of Turkey. The fishery on the lake constitutes another branch of industry. Pop. estimated at 40,000
THE LAKE (see *Scuthri*, and *Lebanon*) on the frontier of Mon- bangiro, is about 16 m long N W to S E E and 6 m wide. It contains several small islands receives several streams, the largest of which is the Mornica, which joins it on the N W, and discharges itself by the Bojana into the N side of the Gulf of Drino, in the Adriatic

SCYLLA — 1 A celebrated promontory Naples prov. Calabria-Ultra, on the Strait of Messina lat. 38° 14' N lon. 16° 45' E (p). It is a bold rocky headland about 200 ft. high, and has the sea deeply exposed by the action of the waves. Standing in the narrowest part of the strait, and opposite to the rocks and shoals of Charybdis, where strong currents meet and make wild upsurges the navigation of it appeared so formidable to early navigators, as to have furnished ample materials for fable. Gypsum has been employed in removing some of the more formidable rocks and the action of the water may in course of time have somewhat widened the channel. Owing, probably in some measure, to these causes, modern navigators find it comparatively easy to avoid Scylla without falling into Charybdis — 2 (*Scylla*, or *Scythia*) A town, built partly on the shore and partly on the steep adjacent sides of the above promontory. It is defended by a fort, which, from its position, forms an important military station; contains two churches, and a convent and carries on a considerable trade, and an active fishery. It suffered dreadfully from the great earthquakes of 1783. A great portion of the inhabitants had rushed down to the beach for greater safety when, by the fall of an adjoining cliff, a huge wave was driven in and swept away 3475 persons. Pop. 4500
GULLA, or *Delion*, two islands, *Zegeon* Sea. See *Delion*.

SEA HORSE ISLANDS, a group of low sandy isles, lying at some distance from the mainland of Russian America in Bahrin's Sea. The outermost point of the chain formed by them is Point Franklin, about lat. 71° N and lon. 166° W. The surface of the beach at this cape, consisting of fine sand, was found on digging a few inches, to be mixed with coal.

SEA VIEW one of the highest mountains of New R. Wales, between the Macquarie and the New England district. It is 3000 ft. in height.

SEABOROUGH, par Eng. Somerset, 661 ac. I. 104
SEACOMBE, a vil and township, England, co. Chester, on the Mersey, within 1 m. of Liverpool, to which a steamboat is constantly plying. It has a great number of elegant residences and pleasant houses along the Mersey a handsome church, with a tower terminating in a spire a Wesleyan chapel, a dispensary, an infant-school, extensive copper and patent metal mills, smelt-works, and a foundry. Pop. 3044

SEACROFT, a vil and township, England, co. York (W Riding), 4 m. E N E Leeds; with a dissent church, and a Wesleyan chapel. During the Hastyarchy a battle was fought here on Win Moor, the Royalists also have defeated the Parliamentarians. Pop. 1598

SEAFORD, a market town, Cinque-port, and par., on Sussex, on the English Channel, 11 m. S E. Lewes. It is a very

ancient place, supposed to occupy the site of the Roman *Olritas Anderida*; and was of considerable importance till its prosperity was destroyed partly by invasions of the French, and still more seriously by encroachments of the sea, and a change in the course of the Ouse, which once formed the harbour of Seaford, but now falls into the sea at Newhaven, 5 m. W. It has an ancient church a townhall jail, and a school. Till disfranchised by the Reform Act, it returned two members to Parliament. Area of par. 2535 ac. P. 997
SPAGODA, par Irel Armagh 9746 ac. Pop. 10,503.
SPAGRAVE, par Eng. Leicester, 2470 ac. P. 428
SEAGRY, par Eng. Wilts, 1014 ac. Pop. 281
SEAHAM, par Eng. Durham 3079 ac. Pop. 929
SEAHAM Harbourn, a seaport and district England. co. Durham on the North Sea, 6 m. S. S. E. Sunderland. It has a handsome church an infirmary, an excellent harbour provided with spacious quays, wharfs, and jetties, for the shipping of coal and other produce and communicating by railway with various extensive collieries, a pottery and a large corn-mill. Pop. 729

SEATON a vil and par. England on Devon, on the English Channel 8 m. S. E. Colyton. — 1 It is an ancient place, supposed to occupy the site of the Roman *Mordunum* has been recently much improved, and is greatly frequented for bathing-quarters. It has a parish church, and a chapel of ease, Independent and Primitive Methodist chapels, and several schools. Area of par. 2821 ac. Pop. 2047

SEATON two pars. Eng. — 1 Rutland 2650 ac. Pop. 511. — 2 (*Seaton*) York (E. Riding) 8890 ac. 1 op. 608.

SEATON DELAVAN, a vil and township England co. Northumberland, 6 m. N by W North Shields. It is well and regularly built and has an ancient chapel, a fine specimen of Norman architecture, forming part of an ancient castle a place of worship for the Wesleyans, the ruins of one of the most magnificent manor-houses in the N of England, destroyed by fire in 1823 and extensive coal-mines. Pop. 1776

SEAVINGTON two pars. Eng. Somerset — 1 (See *Seaton*) 988 ac. Pop. 330. — 2 (See *Seaton*) 390 ac. P. 965

SEBANDU a town Tibet. See *CHANGTSE*

SEBASTE a town Palestine. See *ASBASTA*

SEBASTIAN (San) See *SAN-SEBASTIAN*

SEBASTIAN (San) Brazil. See *SAN-SEBASTIAO*

SEBASTIANO (San) a vil. and com. Italy Piedmont 15 m. N E Turin on a height near a bank Pop. with a church and an old castle, still in good preservation. Pop. 1829

SEBASTIANBERG, or *BARBERG*, a mining town Bohemia, circle and 18 m. N W Bozen, on a ridge of the Erzgebirge, with a church, townhouse, some manufactories of cloth, several mills, and a considerable trade in wool. Pop. 1568

SEBASTOPOL, a seaport in Russia. See *SEVASTOPOL*

SEBEN, or *SEBEN* a villet in Hungary co. Szeces, on the Tisza, 10 m. N W Eperies, with a Lutheran church a Pluriest college, a normal-school a paper-mill, and a trade in flax and wool. Pop. 1200

SEBENICO a town Austria, Dalmatia, circle and 42 m. S. E. S. Zara, on a creek of the Adriatic a little below the

mouth of the Karis. It rises on the side of a ridge, in the form of an amphitheatre, crowned by the fort of St. Anne, now partly in ruins; and defended by two other forts on an adjoining height. The most noteworthy object is the cathedral, rendered conspicuous by its lofty dome, with a truly grand interior, remarkable especially for the bold arches, springing from light and airy Gothic-Baroque columns and supporting a semi-cylindrical roof of flat flagstones, the arrangement of which is regarded as a masterpiece of technical ingenuity. The only other objects deserving of notice are the Loggia or old Venetian townhouse, now converted into a casino, and an excellent harbour defended by a fort which is regarded as Sedan's master-piece. The trade is chiefly in an excellent wine, grown in the district. The Karis, in the vicinity forms a beautiful cascade, 800 ft. wide, by 60 ft. high. The celebrated painter Andrea Schiavoni, of the Venetian school, and the physiologist Tozzanico, were natives of Sedan. Pop. about 6000.

SEBENGHAN, par. Kmg. Cambristadt; 5890 sq. P. 855. **SEBES**, several places, Hungary particularly—1 *Ides* and *Flies*, two nearly contiguous villages. Hither Thies, co. Meuse, about 4 m. from Epaves. They have a parish church, a Franciscan monastery, a fine old castle with gardens, manufactures of earthenware, and a trade in wood. Pop. 1844. —2 *Bred*, a vil. Thibier Thaus, co. and 35 m. from Arad, on the Balas, with two churches, and a trade in earthenware, silk, and timber. Pop. 1042.

SEBNITZ, two places, Germany—1 A tn. Saxony circle and 35 m. P. S.E. Dresden, in a deep valley with several public offices, manufactures of linen and silk goods, woollen hosiery, and shawl and paper mills. Pop. 3709. —2 A tn. Prussia, prov. Silesia, gov. and 14 m. N.W. Liegnitz, with a church, the works, and several mills. 1122.

SEBONCOURT, a vil. France, dep. Aube, 28 m. N.E. Lang. with manufactures of shawls and other stuffs, in the style of cashmere. Pop. 2007.

SEBODU or **SEBODU**, a river Morocco, which descends from a ramification of the Great Atlas in Fez, flows first N.W. then W. and after a course of about 160 m. falls into the Atlantic, a little N. of the town of Mahamora.

SECA, (Llan), or **SECA**, a river Spain, 16 m. S.W. Valladolid. It has a substantial and elegant townhouse, a handsome grange built of brick, and provided with colonnades on the ground-floor which serve as a promenade in wet weather. Two public endowed primary schools, an hospital, a park and a Franciscan church. Agriculture and preparing chocolate are the main employments. Pop. 8024.

SECLITA, a river, Italy rises in N. slope Apennines, in N. of Anagni, flows N. N.E. through the centre of that duchy and joins the Tiber 12 m. S.E. Anagni, total course about 50 m. It becomes navigable at Porto-Frasco, near Anagni.

SECHAUER, or **SECHAUER**, a vil. Lower Austria, near Vienna, of which it is almost a suburb. It is a busy manufacturing place, and has an important leather dye-work. Pop. 2530.

SECHUAN or **SECHUAN**, an inland prov. China, and the largest in the empire, bounded N. by Szechuen and Kansu, E. by Hooan and Hooan, S. by Kansu and Yunnan. W. Tibet lat. 25° 57' to 30° N. lon. 100° 35' to 110° 25' E., area, 165,000 sq. m. With the exception of a plain of considerable extent around Ching-to-fu, the provincial capital, the whole of this extensive territory may be described as rugged and full of defiles. The Yang-tze-kiang, the largest river in China, traverses the S.E. part of the province by a crooked channel, in a N.E. course, receiving some of its largest tributaries, of which the chief are the Yeh-tung in the W. the Min-kiang in the centre, and the Kiang in the N.W. The first, though about 500 m. long, is of very little service to navigation, but the Min-kiang affords passage to boats up to Ching-to-fu; while a wide region is drained by the Kiang, which extends its branches over all the E. part of Szechuan and into the adjoining provinces. The province is well watered, and produces grain, silk, tea, horses, mules, swine, and sheep; but its trade is far from being proportionate to its capabilities. The people are of a mixed race, and so imperfectly kept under subjection, that insurrections often occur. Pop. 21,435,578.

SECHURA, a tn. and bay, Peru, between Paucallanca and Paitan. Paitan about lat. 5° 35' 35" S., lon. 80° 40' W. The town stands at the head of the bay, 1 bank of Piura. It consists of one-house but has a church built of stone, with two high steeples. The inhabitants are all Indians, who carry on a considerable trade in salt, which they take to Piura on balsas, and sell to the shipping. The bay is 35 m. in width at the entrance, and stretches 10 m. inland; S. from the town is the desert of Sechura, a frightful waste of sand, extending 90 m. The extent and uniform aspect of this dreary region, together with the conical motion of the sand which quickly effaces all traces often bewilder the most experienced guides.

SECKENBEIM, a vil. Baden, circle Lower Rhine, 6 m. N. Schwetzingen, on the Neckar with a church. P. 1040. **SECKINGTON**, par. Eng. Warwick, 804 sq. P. 128. **SECLIN** (anc. *Seclinum*) a tn. France, dep. Nord, 5 m. S. Lille. It contains a large and well-endowed hospital and has oil works, cotton and flax mills, salt and saltpetre refineries, and breweries. Pop. 2574.

SECONDIGLIANO a tn. Naples, prov. and hard by Naples, in a plain. It contains a handsome church, and rears great numbers of swine for the Naples market. Pop. 5000.

SECONDO (Saxi)—1 A tn. Italy, Piedmont, 41 m. and 30 m. R.V. Turin, on a hill near 1 bank Chiavagna. It has a handsome church, a courthouse, a palace with fine gardens an elementary school and a charitable endowment. Pop. 3050. —2 A tn. and com. Italy and 11 m. N.W. Parma, in a low plain, subject to inundation. It has a handsome and richly decorated church, a castle, theatre, primary school and hospital and a trade in cotton, wine, rice, hemp, cattle, and salt provisions. Pop. 4758.

SECUNDERABAD, a tn. Hindustan, and the headquarters of the British subsidiary force in the Nizam's dominions, in a tract covered with granite and detached heights 6 m. N. Hyderabad; lat. 17° 26' N. lon. 77° 22' E. The cantonments extend from E. to W. for nearly 3 m. the dwellings of the officers within gardens, being ranged on either side of a winding main street, from which many other thoroughfares pass off. The native town on the S. side contains about 5000 houses of one or two stories, built of mud and tiled. At the E. extremity are the European infantry barracks and hospital, St. John's church, at the W. and are the horse-artillery and on the N. the foot-artillery barracks. The lines of their native regiments are on the S. and bordering the town on the S.W. is a large tank or lake, the embankment along which forms a favourite public promenade. The mean temperature of the year is 81½° Fahr., the daily range is very great in winter from 20° to 30°; a peculiarity at this station is that the wet and cool seasons are the most unhealthy to Europeans and Hindoostanis is very inferior in salubrity to Bahrman, a station 6 m. distant N.E. The barracks and other military structures, parade-grounds, &c., are good; and the bazaars are well supplied with all kinds of merchandise. Here are European subscription-rooms, public libraries, firms and racket courts, a race-ground, and a meadow lodge. The country adjacent is thickly interspersed with rice-fields, date and mango groves, gardens, villages, and ruins of tombs and mosques. Pop. native town by last census, 24,257; exclusive of about 10,500 troops and officers.—(Rep. on the N. dist. of the Madras Presid., Jour. Roy. Soc. Sec., &c.)

SEKUNDA, several places, Hindustan—1 A tn. prov. and 7 m. N. Agra. It was formerly a magnificent city an immediate dependency, or probably suburb of Agra, but is now a collection of ruins, consisting of noble gateways, a ruined palace, &c. The only entire structure is the magnificent mausoleum of the Emperor Akbar, a vast pyramidal pile of arched galleries, rising tier above tier, flanked at intervals by octagonal pavilions, and covered with elaborate marble-reliefs, varied in colour and fantastic in design. —2 A tn., prov. and 45 m. N.E. Agra. —3 A vil., prov. and 20 m. E.E. Delhi, in a wilderness of jungle, which here covers a large tract of the desert. It is surrounded by walls.

SELIAN (anc. *Seclinum*), a tn. France, dep. Ardennes, 6 bank Meuse on the frontiers of Luxembourg, 10 m. S.E. Metz. It is enclosed by stone and walls, and otherwise fortified, so as to rank as a fortress of the third class. It is well built, the streets are generally wide, and the houses are substantially built of stone, and roofed with slate. The

prehistoric edifices are the theatre, library, and several handsome fountains. In the Place Turanne is a statue in bronze to the celebrated marshal of that name, who was born in an old chateau to the S.E. of the town. The staple manufacture is broad-cloth and various other species of woollen goods, for which the town has long been famous. There are also manufactures of bootery, furniture, leather hardware, kitchen stores, &c.; numerous dye-works and worsted-mills. The trade is in corn, cattle, hemp, flax, medicinal plants, and particularly the cloths and saris of its own manufacture. Sedan possesses a court of first resort and commerce, a consular chamber of manufactures, an agricultural society and communal college. Pop. 18,180.

SEDERBERG, a market in and par England York (W Riding) 84 m. N.W. York. The town stands in a hollow, surrounded by hills, and occupies principally of one long street, lined with stone houses of indifferent appearance and has an ancient parish church, places of worship for the Independents, Wesleyans, and Friends, a free grammar a national, and a British school, a woollen and two cotton factories. The annuities of the American here, Washington, are said to have come from this neighbourhood. Area of par 62 888 ac. of which about 20,000 are unenclosed moorland. Pop. 4074.

SEDELLA, a in Spain, Asturias, prov. and 36 m. N.E. Madrid, with a church, a primary school a train wine and oil. Pop. 1464.

SEDEBERROW par Eng Worcester 1042 ac. Pop. 548.

SEDEBROOK, par Eng Lancs 1642 ac. P. 279.

SEDEFIELD, a market in and par England, co. Durham. The town occupies a commanding eminence, 11 m. S.E. by S. Durham and is remarkable for the salubrity of its atmosphere. It is neatly built, having a spacious square in the centre, where the market is held in a handsome church, a place of worship for the Wesleyan S. E. Catholic chapel, a grammar and several other schools, and some almshouses. Shoemaking is the principal trade of the place. Area of par 17,471 ac. Pop. 2192.

SEDEGFORD par Eng Norfolk 4180 ac. Pop. 765.

SEDEGHILL, par Eng Wills 1175 ac. 1 op. 179.

SEDEGMOROK, a distr. England, Somersetshire, stretching partly along the Carey, and in the angle formed by it and the Ferret. It is memorable as the scene of the battle between the troops of James II. and those of the Duke of Monmouth, in which the latter was defeated and made prisoner.

SEDEGER, SPANZA, or SAN-JUAN a river Patagonia falls into Fort Famine in the Strait of Magellan. It has great depth of water immediately opposite to its entrance but within is enumbered by a bar which can be entered by boats at half tide, and navigated for only 8 m. or 4 m. stumps of trees so filling up its channel as to make it difficult to penetrate farther.

SEDGLEY a vil and par England, co. Stafford on a steep declivity, 8 m. N. Dudley. The houses mostly of brick and well built, water abundant. Nails are made here to a considerable extent by women and girls but the most important manufactures are those of iron, carried on in the vicinity, where nearly every description of iron-work is done. Area of par. 7364 ac. Pop. 29,447.

SEDELLA, a vil and com. Ital. Sicilia, div. Cagliari prov. Sassari, on a slope, in a healthy district, 16 m. N.E. Oristano. It has a trade in corn and cattle. Pop. 1000.

SEDJOUR, or SEDJOUR, a river Asiatic Turkey which rises near Am-Tab in the N. of peak Aleppo flows E. and after a course of about 45 m. joins the bank Euphrates, 15 m. below Bir.

SEDELSOOM, par Eng Essex 2049 ac. Pop. 719.

SEDLITZ, or SEDLETZ, a in Bohemia, circle Prachau, 10 m. W.N.W. Plesch. It contains a parish church, castle, and school; and has a tile-work and some manufactures of linen. Pop. 1989.

SEDLNITZ, or SEDNICA, a vil Austria, Moravia, circle Posen, 4 m. from Fraburg, with a church, a castle, and a school. Pop. 1175.

SEDO, a in W Africa Fouta-Toro, lat. 15° 29' N. lon. 18° 45' W. is a beautiful fertile country. P. about 8000.

SEDERBERG, a vil and par Switzerland, cant. and 18 m. N.E. Bern, on a declivity, the highest part of which is occupied by the parish church and parsonage. The inhabit-

ants raise a good deal of fruit, but live chiefly by agriculture and the rearing of cattle. In the neighbourhood, on a lake of the same name, is an old castle. Pop. 1968.

SEEBURG a in Prussia gov. and 66 m. S. by E. Königsberg, between two lakes. It has an old castle, two churches and school manufactures of woollens, hosiery and hats, a bark saw mill, and other mills. Pop. 1164.

SEEDORF, a vil and par Switzerland, cant. and 8 m. N.W. Bern with a church and school house. Near it, on the Rabbalden, are a number of romantic dwellings hewn out of the precipices of the sandstone-rock. Pop. 2370.

SEEDOORA a in Hindoostan, prov. Delhi, dist. and 84 m. N.W. Baharumpoor in a fertile and populous country. It is a place of considerable extent, with houses built of brick.

SEELAUEN two places, Prussia, gov. Magdeburg—1. A in the Altland in the Altmark 7 m. N. Osterburg. It is walled, and has a Protestant church two chapels, a burgher school and hospital a tile-work, numerous mills, and a trade in horses and cattle. Pop. 8003—2. A in called also *Magdeburgische Seelauen*, or *Seel-Seelauen*, 6 m. W.N.W. Wenzleben with a church tile-work, lincolns and a trade in cattle. Pop. 2532.

SEELAND SEALAND SEILAND SEIFLAND, of SEALAND

[Denish, *Seeland* Latin, *Seelandia*] the largest and most important of the islands of Denmark, lying between the Kattegat and the Baltic Sea, lat. 54° 57' 58" to 56° 7' 40" N. lon. 10° 54' to 13° 40' E. bounded N. and N.W. by the Kattegat W. the Great Belt, separating it from the island of Funen, S. the Great Belt, and narrow channels, separating it from the islands of Lolland, Falster, and Møn S.E. the Belte and E. the sound, at its narrowest only 3 m. wide, separating it from Sweden its shape is very irregular and its shores are very much indented especially in the S.W. where it is washed by the Belte, and in the W. where an arm of the Kattegat has penetrated deeply into its interior. The N.W. and N.E. coasts are comparatively free from indentation and have so much parallelism that they may almost be regarded as the opposite sides of an extensive parallelogram. The greatest length of the island N. to S. is 81 m. greatest breadth, 66 m. area, 2181 geo sq m. The surface is for the most part flat, and especially on the S.W. and the middle of the E. coast, is very little raised above the level of the sea. The highest land is in the S., but its elevation seldom rises, and never exceeds, 300 ft. The oldest rocks on the island are comparatively recent, belonging to the Cretaceous system or upper part of the secondary formation. Above this tertiary formation also is considerably developed. The soil generally consists of deep beds of corallines and mussel shells and the soil is an alluvium of great natural fertility well adapted for the growth of corn particularly barley and rye, which form the principal crops. Horses, sheep, and cattle are of indifferent breeds, and not very numerous. Wood, which at one time stretched in extensive forests over almost the whole island has been much diminished, and except in particular localities, where the original forest is carefully preserved is becoming scarce. Enough still remains to give richness to the rural landscape but considered as the great source of fuel, the supply would be very inadequate were it not compensated to a considerable extent by tracts of turf or peat. The prevailing timbers are beech and birch, and to a more limited extent oak. The climate of Seeland owing to its low surface and insular position, is much milder than its latitude indicates. The temperature of Copenhagen, which may be taken as that of the whole island, is in spring 43° 10' summer 65° 28' harvest, 69° 86' and winter 31° or 1° below freezing. The mean temperature of the whole year is 46° 15'. The worst feature in the climate of Seeland is its humidity, and the consequent prevalence of rains and mists. Fish abound both along the coasts and in the lakes, of which a great number are scattered over the interior, though none of them individually is of much extent. The largest, Arresø, is about 24 m. in length, and about 11 geo sq m. The Suse-ø, which falls into the Nordfjord, is the most important stream, but though it follows a very circuitous course, its whole length does not exceed 60 m. The minerals are of no consequence, though amber is occasionally found. For administrative purposes Seeland is divided into five amts or bailiwicks—Copenhagen (con-

being the capital of the whole Danish dominions, Fredericksborg, Helsing, Scania, Sweden. This division comprehends not much of Sweden, but a number of small islands which line its coast. Of these the principal are Koen, Amager, and Seltshim. Pop. (1847) 498,400.

SELENTED-SEE, a lake, Denmark, in the N.E. of the Holstein straits, about 14 m. \times 6 m. sq. m. depth, at some places, 40 fathoms. It is well supplied with fish.

SEKLOW a tn. Prussia, gov. and 16 m. N.N.E. Frank fort, with two churches, and a trade in cattle and horses. Pop. 1915.

SEKNA, a river of S. Hindoostan, rises in a ramification of the Ghats, about 90 m. W.N.W. Ahmednagar flows N.E. past that town; and after a course of about 700 m., joins the bank of the Gomti, nearly doubling its volume.

SEKNEE, or **ASOONAA**, a river, Ashantee. It comes from a great distance inland, and pours out a considerable volume of water through an opening 900 yards wide, but as full of large stones and rocks, that masses cannot venture out except in the most tranquil state of the surf. Its mouth is close by the Dutch settlement of Axim lat. 4° 32' 18" N. lon. 1° 14' 42" E. (s.)

SEKQALA, a lake, and par. Newland, on Arguin at the S. extremity of Lake Hailow, where the As. issues from it, 8 m. S.E. Axam. It is well built, and has a church with a tower. Inhabitants chiefly employed in spinning and weaving cotton. Pop. 1435.

SEKREBUNA a tn. Hindoostan prov. and 47 m. N. \times V. Delhi lat. 29° 12' N. lon. 77° 31' E. esp. of a small principality. It is a populous and thriving place. Near it is an extensive mud fort, containing the Begum's arsenal.

SEES (anc. *Agrovisus*), a tn. France dep. Orne, 14 m. N. Alençon, on the Scheldt, 4 m. S. Ghent, with manufactures of cloth, brickwork, and manufactures of shoddy tannery. P. 3165.

SEEST a tn. Brunswick, on the Scheldt 33 m. S.W. Brunswick, with two churches, a castle, a Jewish educational establishment, an hospital and several mills. Pop. 2749.

SEEFAMOW or **SEETAMOW** a tn. Hindoostan prov. Malwah near the Little Sind, 120 m. S.E. Ooh ryoor, containing about 2000 houses.

SEETHING, par. Eng. Norfolk 1630 sq. Pop. 451.

SEYDLIGEM a vil. and com. Belgium, prov. E. Flen den, on the Scheldt, 4 m. S. Ghent, with manufactures of cloth, brickwork, and manufactures of shoddy tannery. P. 1468.

SEEWAN, a tn. in the W. of Hindoostan, prov. and 50 m. S.W. Jodhpore. It consists of the town and a fort, built on a precipitous rock in a valley surrounded by hills. The works of the latter are in bad repair though it is considered a place of importance, and generally garrisoned.

SEELA, a tn. France, dep. Savoy, prov. Tarentaise on the Isère, at the foot of Little St. Bernard, 16 m. N.E. Montan. Pop. about 1591.

SEFAN, **SEFAN**, or **BOONAN** the most E. portion of Tibet, bordering on the Chinese provs. of Szechuen and Kansoo, and extending from lat. 28° to 30° N. bordering on Koko-Nor (the chief rivers are the Yangtze, and the tributary the Yangtze-kang). In some parts it is mountainous, but along the banks of the streams are fertile plains, yielding wheat, pease, rye, hemp, &c. The horses are good, and excellent mules are exported. The yak is found in great perfection, the camel is seen in the N. and sheep are numerous, and have enormous tails. The mountains are rich in metals, and some iron, copper, silver, and gold are obtained from the mines. Seifan is inhabited by two races, a Tibetan and a Tartar, the former, and least numerous, inhabiting fixed dwellings, living in the central and E. parts, and the latter nomads, living on meat often raw, and dressed in sheep-skins, or woollen manufactures by the females. The men forge arms of good temper, and form graceful helmets.—(Gutslaff, in Jour. Roy. Soc. Sec., 1850.)

SEFICIFA or **SERINARA**, a tn. Algerian Sahara, 886 m. N.W. Algiers, with a mosque. Pop. about 1800.

SEFERIN a vil. Hungary, Banat, co. Temesvar, on the Temeş, 8 m. from Neandor. It has two Greek churches, and several mills. Pop. 1686.

SEGAAMI, or **MIKAT**, a state, Malay peninsula, about lat. 2° N. lon. 103° E. lying S. of the Malacca straits, from which it is divided towards the east by the Cansu river. It is thinly inhabited, and utterly impoverished by

the misgovernment and apathy of the feudal sovereign, the sultan of Johore. Under this misrule, thriving rice-grounds have degenerated into barren marshes, and extensive forests, inhabited by wild elephants, overshadow a soil naturally rich and prolific. The produce of the country consists of a little rice, sugar, ivory, ebony, gold-dust, tin, wax, cane, wood, gun, benzoin, camellia, resins, &c.

SEGENBERG, a tn. Denmark, duchy Holstein, cap. hall, between the Trave, which is here crossed by a large bridge, and the Meßburger-See, 26 m. N.N.E. Hamburg. It is a pretty little town; and has a very ancient Gothic church, several benevolent and industrial establishments, and an important normal seminary. Near it is the Gypsberg, an imposing mass of limestone-rock 700 ft. high, whence a magnificent view, embracing Hamburg and Lübeck is obtained, it is hollowed out beneath by extensive quarries of gypsum to a depth of at least 800 ft. Pop. 3500. — The Sallwitzer, forming part of the central ridge of the duchy and still in many parts covered with heath, has an area of 188 sq. m. divided into five parishes. Pop. 15,800.

SEGEDIN a tn. Hungary. See **SEBESDIN**.

SEGELEM a vil. and com. Belgium, prov. E. Flen den, 144 m. S. Ghent. Inhabitants engaged in weaving and lace-making. Pop. 2276.

SEGGIANO, a vil. and par. Tuscany 4 m. N. Castel del Piasco with a beautiful church and two chapels. P. 1868.

SEGNA a tn. Austrian Croatia. See **SENA**.

SEKNEE, a pass in the Alps, Switzerland, leading from Glen Glarus into the Grisons, and forming the best route from Glarus to Coire. It ascends 8 E. a mile or valley behind the village of Elm, and attains a height of 7600 ft. above sea-level.

SEONI (anc. *Sogani*) a tn. Italy delug and 17 m. W. N. Florence on a mountain of same name. It is the seat of a bishop, and contains a handsome cathedral. The invasion of the organ has been claimed for Segni. Pop. 3455.

SEGO a large tn. W. Africa, Bambarra, 1 bank Niger, lat. 13° 5' N. lon. 5° W. The houses are built of clay, of a square form with flat roofs, some of them have two stories, and many of them are white-washed. Besides these build ings, Moorish mosques are seen in every quarter. This town has been for many centuries a stronghold for the Mahometan faith. Mungo Park, speaking of Segi, says:—The view of this extensive city, the numerous houses upon the river, the crowded population, and the cultivated state of the surrounding country formed altogether a prospect of civilization and magnificence which I little expected to find in the bosom of Africa. Pop. when visited by Park, 30,000.

SEGO, or **SUCORRHO**, a lake, Russia, in N.W. of gov. Orenb., 80 m. long N.W. to S.E., by 24 m. broad. It discharges itself into Lake Viga, about 22 m. N.E.

SEGORRE (anc. *Segorrea* *Edesaronum*), an episcopal city Spain Valencia, prov. Castellón de la Plana, 39 m. N.W. Valencia, picturesquely situated on the skirt of two hills one of them sloping rapidly down to the Pisuerga, surrounded by gardens, and with its ancient walls still in tolerable preservation. On the summit of the hill on the N. which commands the town are remains of an ancient fort. The houses in the modern portion of the town are spacious, and often elegant in their architecture, and the streets straight, broad, and clean; while in the old town the streets are steep, crooked, and rather narrow. It has a spacious court-house, two prisons, a small theatre, a promenade, an episcopal palace, a large and handsome hospital, built from the ancient walls and castle, and containing a number of halls a flourishing hospital, several public and private schools, a handsome academy, six hospitals, four monasteries, and a nursery. Numerous public and private fountains, deriving their waters from the petrifying spring of La Caparrosa, near the Geronimo convent, which gushes at once a river from the rock, afford an ample supply of excellent water to the inhabitants, who, notwithstanding its peculiar property, do not suffer from malignant complaints. It has manufactures of earthenware, starch, brandy, paper, plate glass, cotton thread, twist, and tapers, varnish, gypsum, hair-sewer, and flour and oil mills. Reports were taken from the Moore by Don James in 1745 and in 1818 it was noted by Humboldt, although it made no entrance. Pop. 6000.

SEGOUAM, or **SEGA**, the most E. of the Andaman Islands, Andaman Archipelago, to the W. of Amchitka Is.

50° 24' N. lon. 17° 15' W. It is about 19 m. in diameter, and is intersected by a chain of mountains divided into three masses. From the central mass several ridges issue. In the N.E. the mountains rise almost perpendicularly from the water. In other parts hot springs and vapour orifices are frequent.

SEGOVIA a prov. Spain, Old Castile; bounded N. by provs. Valladolid and Burgos, E. by Burgos and Guadalajara, S. by Madrid and W. Avila, area, 1548 sq. m. Its climate is in general cold, and the winds dry and piercing, the snow remaining on the mountain-tops throughout the greater part of the year. Its surface is much varied, consisting of fertile and extensive plains and ranges of high hills including Pajarera, 8232 ft. above sea-level, and Pan-de-Azúcar (Sugar-loaf), 7900 ft. The centre of the province, as well as the W. and a portion of the N., are comparatively level. All the rivers of Segovia, the Pisuerga, Duraton, (cogn. Pisuerga, Eresma, &c.) have their origin within its boundaries, taking their rise in the rocky mountain chain which divides the two Castiles, and all discharge their waters into the affluents of the Duero. The pine-forests are a considerable source of wealth; but Segovia is for the most part an agricultural district, producing good wheat in abundance, rye, barley, the fruit of the cereals, and some (particulary) both of excellent quality some wine, flax, hemp, and madder as well as pasture for sheep, horses, mules, and horned cattle. Mines have been wrought in different parts, but not successfully. There are veins of rock-crystal quartz with grains of gold, and black and grey marbles; and also quarries of limestone, chalk, and granite. Besides agriculture, sheep-shearing and wool washing many of the inhabitants are employed in sawing timber and in making furniture for domestic use. Great quantities of cloths were formerly made, but this branch of industry has greatly declined and the other manufactures consist of crystal paper leather and earthenware. Pop. 155,000.

SEGOVIA a city Spain, Old Castile, esp. above prov. 46 m. N.W. Madrid, on a rock 800 paces in height, and 4000 paces in circumference at the top, and washed by the Eresma and the Clamores. This strong town is controlled by walls, with round towers, built by Alonso VI., and has an Alcazar the great keep of which is studded with angular turrets. It is entered by five gates, besides several smaller entrances. The streets are very narrow tortuous and ill paved, and the houses, many of which were once inhabited by nobles, have a quaint, old-fashioned appearance. Its most remarkable edifice is the Roman aqueduct, which is indeed the most important remnant of Roman architecture in Spain. As the

83 arches. It remained in ruins till 1485, when Isabella employed Juan Enzuerdo a monk belonging to the Aschens, who reconstructed in admirable style, what had been demolished. The aqueduct commences with single arches, which rise higher as the dip of the ground deepens, until they become double, those of the upper tier being uniform in height. This noble work is constructed of granite, without cement or mortar, and, like other similar erections of the Romans, unites simplicity, proportion, solidity and utility and its grandeur is rather the result of those qualities than the intention of the architect. On the Eresma near the Casa-de-Moneda or mint, where all the national coinage was formerly struck, as the river afforded water-power and the adjoining Alcazar was the treasury in 1730 the gold and silver coinage was transferred to Madrid, and now nothing is struck here but copper. The other principal buildings are the cathedral, one of the finest in Spain, consisting of three naves, numerous other churches, and suppressed convents, an episcopal palace, a school of artillery in which brass cannon are cast, and fireworks and projectiles manufactured, an institute for the higher branches of education with a library attached, a theological school with various other educational establishments, an academy of the fine arts, a picture-gallery which does not, however, contain any first-rate works, a foundling hospital, and numerous other charitable institutions, a theatre, and a strong prison. The former prosperity of Segovia depended on its staple, wool, and its cloth manufactures, with which it supplied the principal markets in Europe; but this, and indeed almost every other branch of industry is reduced almost to a nothing there being only three taxmasts, lincolns, and a very limited manufacture of paper silver-work &c. The wretched city has never recovered the fatal day of June 7, 1808, when the invaders first entered it under General Frere, who sacked it, although no resistance was made. The first notice of Segovia dates from 88 n. During the Moorish ascendancy it was a seat of government, and subsequently some of the monarchs of Castile resided here. In 1474 Isabella presided in state from the Alcazar, and was proclaimed Queen of Castile and Charles I. of England was hospitably entertained in it by the governor in 1523. In the same building, which Philip V. converted into a state prison, he confined the Dutch charlatan Ripparda, who had risen from nothing to be premier. Pop. once above 80,000 now reduced to 6635.

SEGRE a n. France, dep. Maine-et-Loire, on the Ordon 20 m. N.W. Angers. It has a remarkable parish church, in the Romanesque style and numerous fairs. Pop. 1748.

SEGRE (see above) a river Spain rises in France dep. Pyrénées-Orientales, on the summit of Mount Minutillas flows S.W. past Lerida, receives the Balles, Noguer-Pallares, the Ebro, Noguera-Bilargona, the Sol, the Cinca, and falls into the Ebro at Mequinenza, 58 m. W. Tarazona; total course, 180 m.

SEGUNDA a river Le Plata rises in the sierra of Cordoba, 27 m. W. S.W. the town of that name, flows E., and after a course of about 180 m. is lost in a marshy lake, 90 m. W. Santa Fé.

SEGURA, two vils. Spain:—1, Prov. Teruel and 42 m. S. Saragossa. Harps of ruins, in every direction, attest the havoc produced in this village by civil war. It was founded by Calixtus, who was very anxious to retain it as a stronghold of the Caroling troops. After a severe campaign, however, it surrendered to Espartaco, Feb. 1840. About 2 m. from the village are the mineral baths of Segura, once much frequented; but they also were involved in one common destruction with the town. The process of rebuilding is now going on. Pop. before the war, about 2000. present pop. 497.—2, Prov. Guipuzcoa, 11 m. S.W. Tolosa. It is greatly decayed, is of great antiquity and is well surrounded with walls; has a stonemason, prison, three magnificent palaces, two primary schools, a good hospital, two parish churches, a convent, and five hermitages; also an iron-work, several forges, and a nail-manufacture. Pop. 979.

THE TOWN AND AQUEDUCT OF SEGOVIA.—From Chancery L. & Co.

steep-banked streams below are difficult of access, and their waters not very wholesome, the pure waters of the Rio Pisuerga were thus brought from the Sierra de Guadalupe, distant 10 m. or 11 m. The aqueduct begins near the monastery of St. Gabriel, and has an entire length of 2321 ft. The number of arches is 170, some of which are 102 ft. in height. This aqueduct was respected by the Goths, but broken down in 1071 by the Moors of Toledo who sacked Segovia, and destroyed

SEGUERA, a river, Spain, Andalusia, stretching S. W. to N. E. through provs. Almería, Granada, and Jaén, for about 50 m., joining the *lujar* of Almería. It gives rise to the river of same name. The river, rises in prov. Jaén, 15 m. from Segura-de-la-Sierra; and traverses provs. Murcia and Almería in six very sinuous courses, first N. E., then N. E. then S. E., then E. E. and at length E., receiving the tributary waters of the *Taybilla*, *Mundo*, *Madera*, *Montaña*, *Qulpar*, *Mala*, and *Guadalupe*, and enters the Mediterranean Sea at Guadalupe 17 m. S. E. of Almería. Total course, about 180 m.

SEGUERA DE LA SIERRA, a *tu*, Spain, Andalusia, prov. and 62 m. N. E. Jaén, near the sources of the Segura and Guadalupe in the W. skirt of a high hill whose summit is crowned with a strong and ancient fort. The houses are small, and ill-built; and the streets, from the position of the town, are inconvenient, the only level portion being a square, in which there is a magnificent fountain. It has a townhouse and prison, two primary schools and a parish church. Agriculture and rearing cattle, woolen and linen weaving, fur tanning, and oil mills, employ the people. In 1810 it was almost entirely burned by the French. Pop. 2471.

SEGUERA DE LEÓN, a *tu*, Spain, Estramadura, prov. and 51 m. S. E. E. Burgos, on an eminence, skirted by two extensive valleys. It has a fine old castle, in good preservation, which belonged to the Infante Don Carlos a townhouse, prison, two schools, a monastery a church and manufactures coarse woollens three oil and four flour mills. Pop. 2700.

SEGUND (also and *Faleo*), two contiguous *vila* Hungary, co. Buzsach about 9 m. from Ilorcs-Berény with a Protestant church, a Franciscan monastery and a trade in corn, wine, and cattle. Pop. 1599.

SEHARUNPOOR, British India. See *RAMANUNPOOR*.

SEHRWAN, a *tu*, Persia, r. bank Arrat, and near its junction with the Indus, 80 m. N. W. Hyderabad lat. 26° 21' N. lon. 67° 55' E. on a rising ground at the verge of a swamp. It is surrounded by many ruined mosques and tombs. The houses are built of mud, often several stories high and arched, superior to those usually to be seen in the towns of Scinde, but the basar long crowded and narrow is ill supplied with goods and has little trade. The manufactures are inconsiderable consisting of caps, shoon, and petty cotton articles. There is some dervish and mendicancy from purchasing the tomb of a holy saint of Ahirwan, called *Khal Shah Bah*, who is supposed here about 600 years ago. The shrine, which is a place of pilgrimage from afar to Hindoo and Mussulman stands in the centre of the town, and rests under a lofty dome at one end of a quadrangular building, handsomely ornamented. But the most singular building at *Sehrwan* is the ruined castle, overlooking the town, consisting of a mound of earth of oval shape, 60 ft. high 750 ft. broad, and 1200 ft. long and surrounded by a brick wall. Pop. estimated at 2000.

SEIANI a *vil*, Naples, prov. Naples, at the foot of a mountain with a church and a chapel. It is famous for its oil, fruit, and wine. Pop. 1520.

SEIBUS (anc. *Zaburath*) a river Algeria, rises S. E. of Constantine, flows N. E., and falls into the Gulf of Bone a little E. of the town of that name. Total course, about 100 m.

SEIDAU, a *vil*, Saxony circle and 1 m. W. Hainichen. Pop. 2008.

SEIDENBERG a *tu*, Prussia, Sillesia, gov. and 47 m. W. S. W. Liegnitz, r. bank Katzhof, which separates it from Bohemia with a church on hospital, and manufactures of woollens and linen cloth and earthenware. Pop. 1804.

SEIFEN, or *HEIMANNSEIFEN*, a *vil* Bohemia, circle and about 25 m. N. E. Budweis, with two churches, a castle, school, and posthouse, two paper and several other mills, a bleachfield, dye-work, tile-work, linens, and some trade in linen. Pop. 1856.

SEIFERDORF —1, (or *Selsdorf*) A *vil* Bohemia, circle Buzian with a parish church and school. Pop. 1636.

—2, A *vil* Prussia Sillesia gov. Liegnitz, circle Buzian with two churches, blacksmiths, a saw, oil, and other mills. Pop. 1192.

SEIFENNERDORF a *tu*, Saxony circle and 19 m. S. E. Bautzen with a church, three schools, several bleachfields saw and other mills, and extensive dealings in yarn and flax. Pop. 6677.

SEIGIFORD par Eng. Bedford 4481 ac. Pop. 651.

SEIHOUN a river Asia Turkey See *Syracuse*.

SEIL, an *isl*, Scotland, co. Argyre, one of the Inner Hebrides, off the coast of Lorn and between it and the well known slate island, *Raasay*; about 8 m. long, and 2 m. broad in its greatest part, although not without some elevations.

SEILAND, an *isl*, N. coast, Norway; lat. 70° 30' N. lon. 38° 30' E. separated from the mainland by a narrow strait, and from the island of *Scotia* by the second of that name greatest length, N. N. E. to S. S. W., 83 m.; average breadth, 9 m. The coast is bold and rugged, and the interior is a vast mountain covered with snow and ice and nearly 4000 ft. in height. It has few inhabitants.

SEILLANS, a *tu*, France, dep. Var, 14 m. from Draguignan with manufactures of cotton thistles, a cotton-mill, glass-works, and a dye-work of Turkey red. Pop. 1049.

SEILLES, three rivers, France:—1 Elbe in Mount La Roche near Basse, dep. Jura flows S. S. W. enters dep. Saône, and joins l. bank Rhone a little below Tournay. Total course, about 50 m.—2, (*Groende*), Issues from Lake Lander near Digne, in N. of dep. Marais flows W. then easterly N. N. W. into dep. Meuse, and joins the Meuse at Metz. Total course, about 25 m. It is connected by a canal with the Sarre.—3, (*Pithe*), Rises in R. of dep. Meuse, about 2 m. from Meuse flows S. S. W. and joins bank Grande Meuse. Total course, about 30 m.

SEILLÉS, a *vil* and com. Belgium prov. and 23 m. S. W. Lidge, on the Meuse; with manufactures of pipes, a distillery an oil and two flour mills numerous lineries, and quarries both of building-stone and limestone. Pop. 1129.

SEIM or *Seu* a river Russia, formed by the junction of several small streams in gov. Kewsk, to the S. of the flows circumsolutely W., enters gov. Gouberg and after a course of about 800 m. joins l. bank Dniep, S. m. N. E. Scania. Its principal affluents are the Kara and Brara. The navigation of the Seim is greatly obstructed by the number of mudbars upon it. It abounds with fish.

SEINE (Lat) (anc. *Segnona*) a river, France rises about 20 m. N. W. Dijon flows N. N. W. through dep. Côte-d'Or and Aube, passing Châtillon and Troyes. After reaching the Aube, it proceeds almost due W. passing Nogent, and entering dep. Seine at Marne, where it receives first the *Yonne*, *Arman*, and *Marne*, and shortly after the *Loire*, and the *Loing* canal, all on the left. Here its course becomes N. W., and it proceeds through dep. Seine-et-Marne, joining Marne dep. Seine-et-Oise, passing Corbeil and dep. Seine, in which last, shortly before entering Paris, it receives the Marne on the right. Traversing Paris, it shortly after commences a long series of remarkable windings, receives the Oise on the right, traverses dep. Seine et Oise, passing Marles enters and traverses dep. Eure, passing Les Andelys and receiving the Eure enters dep. Seine-inférieure, where it traverses Rouen and terminating its series of windings across the R. part of that department, forms a long and wide embouchure, and finally joins the English Channel near Le Havre. Its direct course is 270 m. its indirect course, about 500 m. Of the latter 280 m., commencing at Méry below Troyes, in dep. Aube, are navigable but only by barges which require to be tracked against the current, if not moved by steam. The navigation properly commences at Rouen, from which, to the port of Havre, the river is usually distinguished by the name of the *Seine-Maritime*, and thence vessels of from 250 to 300 tons. Its embouchure is much unobscured by mudbanks. So French river is better supplied with fish. In respect of the scenery, though in particular parts it is surpassed by the Loire, Saône, and Garonne, yet, taken as a whole, with the hills and valleys, forests and meadows, superb mountains, numerous villages, populous towns, and famous cities which line its banks, it is the finest river in France.

SEINE, a *dep.* France, completely isolated by dep. Seine-et-Oise, and at once the smallest and most populous of the French départements. The latter property it owes to its possession of the marais-palis. It is of a conical and nearly elliptical form, length, N. to S., 18 m.; breadth, 16 m. wide, 180 sq. m. The surface is generally flat, but somewhat undulating, and occasionally diversified by low hills, the most elevated of which is Montmartre, only 946 ft. above sea-level. The soil, with exception of a few spots, is naturally fertile, and its fertility has been greatly increased by the rich manures obtained from Paris, and the strong inducement to apply them

Nearly from the vicinity of obtaining large remunerating returns. About two-thirds of the whole surface are arable, and only a comparatively few acres can be regarded as absolutely waste. In the total commune nearest the capital, the greater part of the ground is employed in raising vegetables and fruit. There are also fine meadows, chiefly along the banks of the Seine and Seine, which are allotted to the feeding of cows, for the purpose of supplying the capital with milk and dairy produce. At a greater distance all the ordinary cereals are grown in abundance, and some wine and older are made. There are fine quarries, both of building-stones and gypsum; the latter indeed, obtained from Montmartre in such abundance, and of such excellent quality, that it is less known in commerce by its proper name than by that of *plaster of Paris*. The manufactures necessarily embrace a vast variety of articles requisite to meet the demands of a populous and luxurious capital. (See PARIS.) The department is divided into three arrondissements—Paris, St. Denis, and Senneval, subdivided into 30 cantons, and 51 communes. Pop. (1859) 1,427,065.

SEINE-ET-MARNE, a dep. France, bounded, N by dep. Oise and Aisne, E. Marne and Aube, S. Yonne and Loire, and W Seine-et-Oise, greatest length, N to S. 65 m. average breadth, 40 m. area, 3154 sq. m. The surface consists of extensive plains occasionally diversified and broken by gentle hills. Barren and extensive forests cover the largest of which is that of Fontainebleau. Many of the slopes are covered with vineyards, but the wine produced is of very indifferent quality. About two-thirds of the surface are arable, and mostly devoted to the culture of the ordinary cereals, of which the quantity raised far more than suffices for the home consumption. Hemp is also grown to a considerable extent and in some districts pease and beans, haricots, potatoes, carrots and beet-root are grown on a large scale. In the part of the department nearest the capital a considerable extent of ground is occupied with vines and gardens. There are few natural pastures, but large artificial meadows have been formed in every quarter, and supply food to vast numbers of cattle and sheep, the latter yielding large quantities of excellent wool. Building-stones, pavement, and millstone alabaster gypsum and potter-clay are extensively worked. The principal manufactures are linen and cotton prints, iron and steel ware, wax, candles, leather, paper pottery and glass. The trade is important in corn, flour, fruit cheese, eggs wool, hemp, cattle, leather, wood, and charcoal. The department is divided into five arrondissements—Meaux (the capital) Commeny Fontainebleau, Meaux, and Provins subdivided into 39 cantons, and 527 communes. Pop. (1859), 840,076.

SEINE-ET-OISE, a dep. France, bounded, N by dep. Oise, E. Seine-et-Marne, S. Loire, S.W. Eure-et-Loir, and N.W. Eure, greatest length, N to S. 60 m. average breadth, 45 m. area, 3141 sq. m. The surface is finely diversified and in many parts is much broken by hills, which, however, do not attain any great elevation. Nothing can be more pleasing than its general aspect, presenting everywhere a succession of cultivated fields and scattered magnificent forests, noble parks, smiling villages, splendid chateaux, and innumerable villas. The department belongs entirely to the basin of the Seine, which traverses it in a very winding course S.E. to N.W., draining the greater part of it directly. The only other river deserving of notice is its tributary the Oise. The soil is, for the most part, fertile in all kinds of corn and fruit and is under good agricultural management. The banks of the rivers are covered with fine meadows and pastures. The grain raised leaves a surplus after satisfying the home consumption. About two-thirds of the surface are arable, but a small portion of it is appropriated by walled parks and other inclosures. More than one-eighth is under wood, the greater part of which grows in the extensive forests of St. Germain, Rambouillet, Trélasse, Dourdan, Secourt, &c. Gardens are cultivated extensively, to supply the wants of the metropolis, and all the ordinary, and even many of the finer fruits, as figs, apricots, and peaches, are successfully raised in the open air. The cows are generally of good breed, and the sheep yield much excellent wool. Poultry are reared on a large scale, game abounds, and fish are plentiful. The only mode of agriculture is not of much importance here, but there are fine quarries of gypsum, building-stones, mill-stones, and pavement, and extensive beds of porcelain and potter-clay.

Vol. II.

Manufactures of cotton and linen prints, hosiery, firearms, porcelain, paper cordage, and chemical products, &c., are carried on. The principal trade is connected with the supply of the metropolis, and consists in corn, wine, fruit, vegetables, hay, cattle, swine, poultry, &c. The department is divided into six arrondissements—Versailles (the capital) Meaux, Fontainebleau, Rambouillet, Evreux, and Corbeil; subdivided into 58 cantons, and 683 communes. Pop. (1859), 471,983.

SEISTAN, a dep. France, bounded, N and W by the English Channel, S. the embouchure of the Seine and dep. Eure, and E. Oise and Somme, greatest length, E to W, 66 m. average breadth, 57 m. area, 3296 sq. m. The coastline measures about 75 m. and no less than 18 harbours are counted in it but the only one of importance is that of Le Havre. A considerable part of the coast consists of bold chalky cliffs, varying in height from 150 ft. to 750 ft., and presenting a very striking appearance when approached from the sea. The department, taken as a whole is not remarkable for its fertility. Considerable tracts along the coast are covered with sand or occupied by swamps, and many parts of the interior are so intersected and broken by hills as to be much better adapted for pasture than for the plough. Accordingly there are few departments of France in which the rearing of cattle and management of the dairy are better understood. In the S. of the department a considerable extent of the surface is occupied by forests. The principal river is the Seine, which winds along the S. in a very sinuous course, and drains a considerable part of the surface, but there are numerous other streams, of which only the Lozère and the Breule are navigable, which proceed directly to the coast, and drain the N and W. The climate varies much in different localities. Along the sea-coast, and in many of the valleys, it is in general cold and moist, and the winters are usually long and rainy. The swampy districts along the shores, and particularly the lower banks of the Seine, are unhealthy and fever and ague are very common. Considerably more than one-half of the surface is wooded, and one-third is under wood. A good deal of hemp and flax is grown. Orchards also are very general and much excellent fruit is made. A great part of the land is farmed by the owners under the name of *cultivateurs-proprietaires*. Both they and the farmers who cultivate the lands of others are generally in good circumstances. Iron is found in small quantity and there are some indications of coal, but the only valuable mineral returns are obtained from the quarries of marble, building-stone and pavement. There is also good potter-clay. Manufactures have made considerable progress, and are actively and successfully carried on in almost every district of the department. Among others may be mentioned the cotton and linen fabrics of Rouen, the numerous tanneries, cotton-mills, sugar-refineries, and tanneries of Le Havre, the woollen, serge, and blondest of Nonchêtel and the lace, and delicate gold, bone and ivory articles of Dieppe. There are also numerous glassworks, dye-works, potteries, and chemical works. The fishing periodical of herring and mackerel, is actively carried on, and the trade is very extensive. The department is divided into five arrondissements—Rouen (the capital) Dieppe, Havre, Nonchêtel, and Yvetot; subdivided into 50 cantons, and 769 communes. Pop. (1859), 739,039.

SEISTAN, a prov. Afghanistan bordering on the Persian province Yezd lat. 30° 30' to 32° N, lon. 61° to 63° 30' E. about 100 m. long, N. to S. and 60 m. broad, E. to W. area, about 5000 sq. m. The whole territory consists of a basin or plain, having on every side higher grounds, and rising in its most depressed part the waters of a system of drainage extending over about 100,000 sq. m. The S. part of this plain is all but an utter desert, and on the N. it is little better. In a few places the soil is impregnated with salt. Nearly in the centre of the territory lies the great swamp or Lake Hamoon or Zarrak the recipient of several rivers, the largest of which is the Helmand. Of the climate of Seistan not much is known but it is considered to be unhealthy. A steady wind blows during the six hot months of the year from N. to S. so laden with saline dust that every fifth person suffers from diseases of the eyes. The soil of the S. desert is for the most part sandy, that of the N. is a hard, compact, light-coloured clay, both unfertile. In the few valuable spots that occur wheat, rice, and some coarse

grapes, cotton, tobacco, water-melon, pomegranates, hams, etc., and molasses trees are produced. There are few horses but camels, sheep, goats, swine, asses, and cattle are more numerous, and constitute the chief wealth of the inhabitants. The wild animals include leopards, wolves, otters, jackals, hyenas, foxes, porcupines, hedgehogs, kangaroos, and rats. Wild dogs lurk in the marshes in great numbers, and are said to destroy one-half of the crops. The majority of the inhabitants are Tajiks, but there are also various other tribes. Massive embankments and numerous ruins, the latter widely dispersed over the country afford evidence of Seleucia having been formerly much more densely peopled, and generally in a much more advanced state than it is now. The language used is broken Persian, and the country appears to be divided among a number of petty chiefs, who acknowledge the supremacy of the ruler of Herat.

SEITENDORF several places, Prussia, particularly—1. A vil. prov. Rhine, gov. Breslau, circles and near Waldenburg; with a church, a castle, an infirmary, and several mills. Pop. 1060.—2. (Mittel, Nieder and Ober) A vil., gov. Liegnitz, circle Schleissen; with two churches, a castle, lunekins, and three mills. Pop. 994.

SEITENDORF or **SARTENBURG** a tn. Saxony, circle and 27 m. S.E. Bautzen, with a church and manufactures of linen and wool. Pop. 3567.

SEITZ, or **KLOSTER-SITZ**, a vil. A. Austria, Styria, circle and about 30 m. from GMI. It has a castle, and a celebrated Carthusian abbey, one of the oldest in Germany. 1 up 2450. **SEL**, a vil. France, dep. Arrigo, l. bank Salet, 23 m. S.W. For. It contains the ruins of an old castle, and has several fine quarries of marble. Pop. 1689.

SEL, one of the Cape Verde Islands. See SAL.

SELANGOR, a vil. and com. l. of Saridum, div. and 5 m. N.E. Uaghar, in an unhealthy district. It has some trade in the rice which is grown in the vicinity. Pop. 2287.

SELAUTIN a vil. Prov. Selan, 6555 ad. Pop. 1671.

SELAYAT, a tn. Spain, prov. Santander, in a valley near Villacarrago. It has a handsome palace, a church, court-house, primary school and a trade in agricultural produce. Pop. about 1000.

SELZ, a tn. Bavaria, Upper Franconia, and on a small stream of same name, 25 m. E.N.E. Bamberg, with a castle, manufactures of cotton and woolen cloth cutlery and earthenware, cotton and several other mills. Pop. 3334.

SELWITZ, a market tn. Bavaria circle Upper Franconia, dist. and 2 m. S.E. Kall, with a church, two castles, one of them in ruins and manufacture of woolen and cotton goods. Pop. 1169.

SELBOE—1, An l. W. coast, Norway prov. Bergen linn, lat. 60° N., and lon. 2° 15' E., about 6 m. long, by 3 m. broad. A. side ford of same name.—3. A vil. and par. Norway, prov. and 27 m. S.E. Trondheim, on the Vaa, near its mouth in the Lake of Selboe. There are copper-mines in the vicinity. Pop. 8700.—THE LAKE, which receives the Naa, and discharges itself by the Vaa into the Trondheim-ford at the town of Trondheim, is a large, irregular and picturesque expanse, about 10 m. long, by 8 m. broad.

SELBOENE, a vil. Eng. Hants; 8508 ad. Pop. 1114.

SELBY, a market tn. and par. England, co. York (W. Riding). The town is 14 m. S. by E. York, with which and with Leeds and Hall it is connected by railway, on the Ouse, here navigable for vessels of 200 tons, and crossed by an excellent wooden bridge, which opens to allow shipping to pass. It consists of four principal streets, diverging from a central market-place adorned with an ancient Gothic cross, and several small streets, paved, and lighted with gas houses well but irregularly built. It has a magnificent parish church, in different styles, which was formed part of an abbey of Benedictine monks, founded in 1068 by William the Conqueror, and places of worship for Independents, Wesleyans and United Methodist, Unitarian, Friends, and E. Catholics, a plain townhall and lecture-room a custom-house, a mechanics institute, two libraries, and several schools a building-yard, and flax, shoe thread, oil mustard, and chisney mills, a ropewalk, three foundries, and two saw-yards; and a trade in agricultural produce and the articles of manufacture. The tithes of the abbey, in which the monks stored their grain, still survive. Henry I was born at Selby. Pop. 5109. Area of par., 5160 sq. Pop. 5340.

SELIS (anc. *Silarg*), a river, Naples, next to the Agropoli, S. frontier of prov. Principato Ultra, flows S. through Principato-Ultra, till it receives the Calore or Tempe, then turns W.S.W. and after receiving the Calore or Petru, falls into the Gulf. The soil about 18 m. S.E. Salerno; total course, 45 m.

SELISKEET (anc. *Siliskeet*), a tn. Arctic Turkey, prov. Unkili, r. bank Ghilik, about 10 m. above its mouth in the N.E. of the Levant, 55 m. S.W. Taurus. The ruins of the ancient town are still seen covering a large area, but the modern town, though the residence of an aga dependent on the governor of Cyprus, is a wretched place, composed chiefly of earthen and wooden huts.

SELENGA, a river Central Asia, formed in Mongolia by the junction of several head-streams, which unite about lat. 48° 30' N., lon. 103° E., whence it flows N.W. about 100 m., or to lat. 50° N., where it is joined by various considerable tributaries, thence it proceeds N. and N.E. to Udinsk in Siberia, gov. Irkutsk, when it suddenly bends to the N.W., and falls into Lake Baikal, S.E. side, after a course of probably 800 m.

SELENGHINSK, a tn. Asiatic Russia, gov. and 181 m. S.E. Irkutsk, on the Selenga, near the S.E. of Lake Gussone, in a bleak and arid district. It is poorly built, though it ranks as one of the best towns in Siberia, is surrounded by fortifications, and has three churches, some general trade with Kizilsin, and a trade in salt obtained from springs in the neighbourhood. Pop. 3579.

SELENA (Cava), a promontory, N.E. coast, Asia, Gulf of Anadir lat. 62° 43' 30" N.; lon. 177° 40' 45" E.

SELENNAK, a river Siberia, rises in gov. Yakutsk; lat. 62 N., flows S.W. and joins l. bank Indigirka, after a course of about 130 m.

SELHAM par. Eng. Sussex, 1042 ad. Pop. 120.

SELIGENSTADT a tn. Germany, Hesse-Darmstadt, 16 m. S.E.E. Frankfurt; with a church, an old abbey, manufacture of woollens and linens, and several taverns. West it is an old imperial palace called Chateau Rouge. Pop. 5334.

SELIGENTHAL, a vil. Hesse-Cassel, prov. Fulda, 4 m. N.W. Schmalkalden with manufacture of wire, and four mills. Pop. 1163.

SELIGHEE, a lake, Russia, in N.W. of gov. Tver, about 35 m. long, N. to S. 10 m. broad and in some places 16 fathoms deep. It is very irregular in shape, and so deeply indented as to have the appearance of several lakes connected by narrow channels. It discharges itself into the Volga. It is well supplied with fish. The town of Odozhovsk stands on a peninsula at its S.E. extremity.

SELIMNO, or **ISLAKUNT**, a tn. Turkey in Europe at S. foot of the Balkan, on a small affluent of the Toudja, 70 m. N. by W. Adrianople. It is walled, and has three mosques, baths, and manufactures of firearms, woolen stuffs, oil essence of roses, and one of the largest fairs in Turkey, attended by merchants from Russia, Germany &c. Pop. 30,000.

SELKIRK, or **SARACENUS** an island on Scotland, bounded N. by Midlothian, E. Roxburgh, N. Dundee, and W. Peebles. Area, 149,890 sq. m. of which but a small portion is arable land. It is generally high, the hills being for the most part ridge-shaped, and rounded on the tops. They vary in height from a few hundred ft. to 2000 ft., and are smooth and green to their summits. The mountains appear to have been originally one large, high bed of graywacke and clay slate, now cut and subdivided by streams. On the W. side of the county, extensive strata of porphyry are found alternating with slate and granite. What is raised to some extent in the lower districts, and oats, barley, barley, and clover-hay are cultivated in regular rotation, but the quantity of land under tillage is comparatively small, the dampness of the climate and other circumstances rendering the country altogether more appropriate for pasturage. The Cheviots are now the prevailing breed of sheep, having nearly superseded the black-faced, which are confined to exposed mossy lands. The cattle are chiefly of the Friesian breed. A considerable number of Highland cattle are also grazed on the hills. Principal rivers—the Tweed, and its tributaries Yarrow and Ettrick. A considerable number of the inhabitants are engaged in various branches of the textile manufacture, which have their chief seat in Selkirk the capital of the county, and in Galashiels. Selkirkshire returns one member to Parliament. Pop. 9809.

BELKIRK, an old royal burgh and market in Scotland, co. of Selkirk, 13 m. S.W. Edinburgh. It is well built, and contains some good streets, and many respectable and substantial houses. It is lighted with gas, and amply supplied with water, has a neat, plain Scotch-built church, Free and U. Free-church churches, and several excellent and well-constructed schools; a public subscription library; a mechanics institute, and a newsroom. Woollen manufactures are carried on here to a considerable extent, and also tanning and stocking-weaving. In former times Belkirk was celebrated for the manufacture of thorn or single-toed shoes. Hence the 'Shoers of Belkirk.' Area of par., 4847 ac. P (1851), 8314.

BELLA, -1, A. to. and com. Spain, Valencia, prov. and 19 m. N.N.E. Alcaniz, on the side of a hill. It consists of regularly built houses, arranged in steep, narrow, winding, and ill-paved streets. It has a large and spacious public square, containing the courthouse, a parish church, and two primary schools; manufactures of linen cloth, and some trade in wool and oil. Pop. 1670-5. A river which descends from a branch of the Cantabrian Mountains, near Orizuela flows first N. than E., then N.E., and after a course of about 86 m., falls into the Bay of Biscay forming the bay and port of Rihadesella.

BELLACK, par. Eng. Hereford, 1540 ac. Pop. 826. **BELLE**, or **GERA**, a river France, rises in S.W. of dep. Channel, flows W.N.W. into dep. Lot, past Figeac and Cahors, and a little below the latter joins r. bank Lot, total course, 60 m.

BELLES, or **BELLES-CHER**, a tn. France, dep. Loire-Cher, on the Cher, here crossed by a fine bridge, 26 m. S.E. Blois. It contains a handsome parish church and a magnificent chateau, built by Philip of Bethune, brother of the celebrated Belli and has manufactures of woollens, and a trade in corn, wine, and hay. Pop. 2038.

BELLING, par. Eng. Kent, 2403 ac. Pop. 697.

BELLINGHAM, par. Eng. Kent, 2885 ac. Pop. 530.

BELLINZ, or BELLAR, vii. Bohemia, circle Leitmeritz, l. bank Elbe, 6 m. from Brück with a church and several mills. Pop. 1898.

BELLYE, a market tn. Hungary Thither Danube, co. Buzsagy, 9 m. from Szeged, on the Drave with two churches. It suffers much from inundation. Pop. 1043.

BELLYE, a market tn. Hungary, co. and 14 m. S.W. Munkacs, r. bank Waag, with a castle, hospital, school, and extensive silk-works. Pop. 2173.

BELMA, a vil. U. States, Alabama, 45 m. W. Mont gomery, r. bank river Alabama, on the Alabama and Tennessee, and Alabama and Mississippi railroads. It has manufactures of iron, including steam-engines &c. and ships a large quantity of cotton annually. Pop. 1900.

BELMASI, a tn. Persia, prov. Azerbeijan within 15 m. of N.W. mouth of Lake Urmia. It contains about 1500 families, of whom 200 are Christian.

BELMESTON, par. Eng. Sussex, 1590 ac. Pop. 900.

BELMOIGNER, a vil. and com. Belgium, prov. Hainaut, on the Meuse and Oise, near the frontiers of France, 28 m. S.E. Mons. It has manufactures of iron a foundry two breweries, and a trade in wood. Pop. 1014.

BELNEY, a maritime vil. and par. England, co. Sussex, near the extremity of a somewhat remarkable headland, called Belling Hill lat 50° 45' 48" N., lon. 0° 45' 30" W. It is an old site principally of oak stores of newly built houses; with a handsome church, and a place of worship for Brethren; an extensive fishery is carried on here for prawns, lobsters, crabs, oysters, and cod. Area of par., 4814 ac. Pop. 384.

BELTON, par. Eng. North, 3880 ac. Pop. 2101.

BELTSCHEAN, or **BELTZCHART**, a tn. Bohemia, circle Hesseu, on the Caddice, with a deanery church. P. 1685.

BELTZ (anc. *Belates*), a tn. France, dep. Bas-Rhin, l. bank Rhine, 29 m. N.E. Strasbourg. It had a handsome Gothic church, a cotton-mill, oil-works, and some trade in hemp and flax. Pop. 2107.

BELVUE, a river, France, rises in S.W. frontier of dep. Orne, flows W.N.W. across the S. of dep. Manche, and after a course of 50 m., of which 9 m. when favoured by the tide are navigable, falls into Bay of Mont St. Michel, where it forms a spacious estuary with the Sea.

BELVA, several places, Spain, particularly, -1 A tn. Catalonia, prov. and 10 m. N.W. Tarragona. It has well-

formed and paved streets, two churches, a primary school, two supported convents, considerable manufactures of sericiculture, a distillery, and several oil-mills. Pop. 3673-5, (see *Mar*), A suspect in Catalonia, prov. and about 24 m. from Girona, on the Mediterranean; with a church, a primary school and a harbour at which some import and export trade is carried on. Pop. 728 -5, A tn. near the centre of id. Majorca, 18 m. N.E. Palma. It is well built and has a church a primary school, and a trade in wine, oil, fruit, and wax. Pop. 3913.

BELVE, an id. Austria, in the Adriatic, off the coast of Dalmatia, S.E. of id. Onco. It is of very irregular shape, and about 4 m. long. It forms a snug harbour, and has a village of same name, to which the greater part of the inhabitants reside. They are chiefly employed in fishing. Pop. 1835.

BELVI, a tn. European Turkey prov. Bulgaria, on the Riana, 90 m. W. by S. Shumen. Pop. 2600.

BELWORTHY, par. Eng. Somerset, 2219 ac. P. 489.

BEM, a river Russia, dep. Sam.

BEMAO or **BIMAO**, a small insular island in the Archipelago, off S.W. extremity of Timor, near Cooping Bay lat (N. point) 10° 20' S. lon. 125° 51' E. area 28 m. long by 10 m. broad moderately elevated and separated from Timor by a narrow strait. The principal articles of trade are wax, sandal wood, and edible birds' nests.

BEMD, a vil. Hesse-Darmstadt, prov. Starkenburg, circle Dieburg near Unstadt. Pop. 1145.

BEMENDRIA, a fortified town in Turkey in Europe, cap. of Servia, r. bank Danube, at the junction of the Jomava, 24 m. N.E. Belgrade. It is the residence of a bishop. It was taken by the Turks in 1483, and re-taken several times by the Hungarians and Turks, ultimately remaining in the hands of the latter. Pop. about 12 000.

BEMENOOD or **BANAWAN**, a tn. Egypt, l. bank Damietta branch of the Nile, 45 m. S.W. Damietta. It is a place of some extent, with the usual features of the large towns of Egypt, and is famous for its pottery, which is sent to Cairo. Here are the mounds of Sebennytus, the city of Senn, the Egyptian Hercules.

BEMELKOV, a tn. Russia, gov. and 36 m. N.N. P. Nijni-Novgorod with a church, manufactures of various articles in wood, and some general trade. Pop. 1000.

BEMER, par. Eng. Suffolk, 1248 ac. Pop. 566.

BEMIDL, a tn. and par. Portugal prov. Beira, 8 m. from Coimbra on the slope of a mountain of the same name, the crest of which is occupied by the sanctuary of Senhora-Berns, a noted place of pilgrimage for many countries. In the town is a celebrated convent of Benedictine friars. Pop. 2080.

BEMILI, **SCICOLA**, or **SCICOLLO**, a tn. Bohemia circle and 28 m. N. Buzsagy, on the river here crossed by a wooden bridge. It contains a castle church chapel and school and has manufactures of fine paper, and a distillery. P. 1715.

BEMIMARA, a tn. Naples, prov. Calabria Ultra, 1 1/2 m. S.E. Palmi. It has three churches. Pop. 4280.

BEMIPATLATINSK or **BEMIPATINSK**, a tn. and fort, Siberia, gov. and 400 m. S.E. Omsk, r. bank Irtysh. It forms part of the military line which has been formed on that river, and owing to its encroachments has changed its site four times since it was first erected in 1718. The inhabitants carry on a considerable trade with the Kirghises and the Khakases of Tashkent and Kashgar. Pop. 1860-7 698.

BEMISOPOCHINOI, or **ISLAND OF THE SEVEN MOUNTAINS**, belonging to the Aleutian Archipelago, and to the group known by the name of the Kriel or St. Islands, about lat. 51° 59' N. and lon. 179° 46' 57" W. It is of a circular form, about 80 m. in circuit, and has a mountainous surface, with summits 3001 ft. in height, on which in summer the snow lies in bands. One of the mountainous summits. The aspect of the S. and E. sides is wild and desolate, that of the S. and W. is more pleasing, presenting several green spots. The channel between this island and Geyow, about 65 m. broad, and not subject to ice-runs, is the best for crossing the Aleutian chain.

BEMJEN (Bel), a vil. Hungary, Thither Thelen, co. Zala, in a fertile district, about 9 m. from Kiblaty; with a Protestant church. Pop. 1615.

BEMLEY, par. Eng. Wilt. 2945 ac. Pop. 693.

BEMLANAK, a tn. Russia, gov. and 26 m. S.W. Yaroslavl, on the Semlanka, with some trade. P. 1861-3, 3698.

REMLIN, or **Remlin** (Remplin, Silesia), a frontier to Hungary, Silesia, regional dist. Pomerania, almost complete isolation of the town with the Danube. It stands on a tongue of land formed by the two rivers, is not fortified, but surrounded by a stockade, and quarters of the lower town and a suburb called Franzenthal. The former contains some good houses, and has some of its principal streets paved with rough stones, but the town as a whole has a very mean appearance, and even in its better part looks empty and melancholy. The quarter nearest the Danube, built on the slope of a hill, called Zinkberg, from having been strictly inhabited by gypsies, is a more charming of modern, shaded with roads and built along lanes, which from the deep runs made in them by torrents of rain, are rather ditches than streets. The Zinkberg is crowned with the ruins of the castle of John Hunyadi, to whose Christianism was mainly indebted on the 15th century for its deliverance from the Turks. The inhabitants carry on an important transit trade, receiving from Turkey chiefly cotton, linen-yarn cotton, honey, lamb-skins, and tobacco pipes; and sending into it cloths of different kind, porcelain glass, &c. Near it is the quarantaine station of Constantinople, the most important passage on the Turkish frontier. Pop. 10,200.

REMYOT, or **Remyot** (Lain, Silesia), a river rises in Belgium, prov. Luxembourg near Arlon, proceeds E. through the fl. of prov. Ardennes, and passes Chimy and Bouillon enters prov. Namur and proceeds into the French territory and joins r. bank Moselle, after a course of about 110 m., of which about 46 m. are navigable.

REMPACH, a tn. and par. Switzerland, can. and 8 m. N.W. Luzern, E. shore of Lake Sempach. It is well flanked with towers in a very ruinous condition, and is poorly built. Its only claim to notice is derived from being the scene of the second great battle which the Swiss gained over the Austrian emperor, who left on the field 9000 soldiers, including their leader Duke Leopold, and more than 2000 common soldiers, though the whole force opposed to them did not exceed 1400. Pop. 1007. — The **LAKE**, 1530 ft. above sea-level, and 160 ft. above that of the Lake of Luzern is about 6 m. long, by 2 m. broad and is embosomed by hills, and well supplied with fish.

REMPERINGHAM par. Eng. Lincoln 3480 m.

REMPST a vil. and com. Belgium, prov. Brabant, on the Sambre and the Brussels and Antwerp railway 11 m. N.E. Brussels with a brewery two mills, and a trade in corn, cattle, and flax. Pop. 2594.

REMPTE, or **REMPTEAU** a market in Hungary Hither Danube, co. and 16 m. N. Munkacs, on the Yang with a church, a strong castle, which figures in the Turkish wars and a trade in corn and wine. Pop. 1157.

REMUH, or **REMUH AUJON** (sic. Remurum) a tn. France, dep. Côte-d'Or, on a rock of granite, backed on three sides by the Annemasse, here crossed by two bridges, 37 m. N.W. Dijon. It is a general well built has a handsome Gothic church, a court of first resort, a public library, common college, and agricultural society, manufacture of common woollen cloth, serge, and drapery, several breweries, wheat, cotton, lace, silk, flax, and a trade in corn, wine, honey, hemp, wool, horses, and cattle. Pop. 4057.

REMA, or **REMA** a tn. E. coast, Africa, about lat. 17° 50' S.; lon. 25° 55' E.; in the Portuguese territory of Mozambique (noted as).

REMAO a vil. and com. Italy Lombardy prov. and 10 m. N.W. Milan with a church, and a summer residence of the archbishops of Milan. Pop. 2004.

REMI, par. Eng. Surrey, 1502 m.

REMIKHORST, a tn. Prussia, Westphalia, gov. and 15 m. E.E. Münster. It is well built; has six churches and schools, and a trade in cattle. Pop. 1468.

RENDRE, a river, France, rises in S.W. of dep. Cherbourg-Inférieure, flows N.N.W., and falls into the Atlantic, occupies the S.E. extremity of Isle of Oleron; total course, 50 m., of which about 15 m. are navigable.

RENECA, a vil. and township, Canada West, dist. Kingston, on the Ouse or Grand River, here crossed by a bridge, about 65 m. S.W. Toronto. The township contains the two distinct villages of Reness and Colborne. The latter, the more important of the two, situated 1 m. above the others, has

an Episcopal and a Free church, two academies and two private schools, a furnace, and several saw and flour mills. — The former has also several large mills, a carding-machine, and a cloth-factory. Pop. township (1855), 3690.

RENECA, a lake, U. States, New York, 198 m. W. Albany, 40 m. long, N. to S. by 3 m. to 4 m. broad; 426 ft. above sea-level; and in some parts 560 ft. deep. Steamers ply on it. It empties itself at its N.E. angle by the river Seneca, which, flowing N. and E., receives the waters of lakes Cayuga, Oneida, and Oswego, Seneca, Onondaga, and Ontario, then turns N.W. and joins the Oswego river, after a course of 60 m. At the village of Seneca Falls and Watkins, there are 2485 affording excellent water-power.

RENECA FALLS, a vil., U. States, New York, 123 m. W. by N. Albany on the Seneca, with manufacture of cotton goods, iron, and paper; a boat-building yard and numerous flour and saw mills. Near it gypsum abounds. Pop. 2045.

RENEFFE a tn. and com. Belgium, prov. Hainaut, 17 m. E.N.E. Mons with a large church, two schools, a glass-bottle manufactory a distillery, brewery sub-ironary tannery, and hat-factory. Pop. 3865.

RENEGALIA, a large river, W. Africa. See **SENEGAMBIA**. **RENEGALIA**, a French colony dependent on W. Africa, Senegambia, consisting of the island and town of St. Louis, at the mouth of the Senegal, and several forts along the banks of that river comprising also the island of Gorée, Albion on the bank of the Gambie, and the other stations S. of Cape Verd. The exports consist chiefly of gum, hides, wax, ivory, cabinet-woods, and gold-dust. Imports—mannu factured goods, wines, spirits and provisions. Senegal is governed by a superior naval officer who resides at St. Louis, the seat of the chief judicial court. A lieutenant-governor is stationed at Gorée. The French first settled here in 1687. It was taken by the English in 1758, recaptured by the French in 1779 and subsequently held by the English till the peace of 1814. Pop. (1849), 14,876.

RENEGALIA, a tn. Papal States. See **SENEGAMBIA**. **SENEGAMBIA** (French, *Senegambie*), an extensive region of W. Africa, lying between the rivers Senegal and Gambie. Such at least would be its extension if the application of the name were determined by its derivation. But the name Senegambia has been brought into use chiefly by French writers, who, affecting to have extensive national claims to territory in W. Africa, have gone on enlarging continually the application of the name, which is more properly given to their own settlements, and understood by Senegambia, the whole country from the Senegal S. to Sierra Leone, Cape St. Ann, or even to Cape Palmas. Such nomenclature, however founded neither on physical features nor on political divisions, serves no useful purpose. Convenience suggests that the name Senegambia should be confined rather to the region around the Gambie, and embraced by the Senegal on the N. and E., and by the sea on the W. as far S. as the 10th parallel of latitude, where the sources of the Senegal approach nearest to the sea. About this line begins the country dependent on or allied with the British colony of Sierra Leone; S. of which again is the independent state of Liberia, neither of which can be combined, on any sound principles of grouping, with the countries farther N.

Boundaries.—The course of the Badagry or Black River, which is considered as the main branch of the Senegal, is situated in lat. 10° 18' N. lon. 11° W.; or about 140 m. in a direct line from the sea-coast. Thence the river flows some distances E., turns N.E. and N., and at last, after running W. some hundreds of miles in a very winding course, it descends to the sea in a S.W. direction; the length of the stream, measured along all its windings, exceeding probably 3000 m. It is thus partly circled by a vast semi-circular system through which flows the Gambie, first from N. to N., and then to the W., in a tortuous course like the Senegal, but with narrower banks, though with more copious streams. S. of the Gambie again are the rivers Comouane, Juba, &c. In the Rio Grande, Rio Nunez, and Fouta, though this last may be considered as belonging to or forming the natural boundary of Sierra Leone. The region thus marked out, E. and W. of the Senegal, has a length from N. to S. of about 400 m., with an average width of 250 m., but to the upper course of the Badagry is known only at a few points, and to

the position assigned to it depends entirely on estimates of an important character, the E. limit of Senegambia is so far uncertain.

Mountains, Valleys, &c.—The physical features of a country so imperfectly explored as Senegambia, cannot be described with any accuracy of detail. The observations at once certain and instructive, relating to its nature and conformation, lie within a narrow compass. The W or maritime portion of the country is a low flat, and to a great extent, swampy plain, nearly 450 m. wide, above the 10th parallel, and increasing N towards the Senegal to a width of 800 m. E. of this is a hilly or mountainous country in which the principal valleys seem all to run from S. to N. The statements made respecting the height of these mountains are always vague, and often rest merely on hearsay. The mountain of Moutarra, lat. 11° 4' N., is reported to be covered with snow in winter, and M. Hocquard, a recent traveller (1851), undoubtedly meant to convey his belief of its great height, when he remarked that he found on it in June no snow but abundance of magnetic iron-ore. The same traveller seems to have believed that Timbo, the capital of Fouta-Jallon, stands at a great elevation. But this opinion receives no confirmation from the accounts given of the fall of the Bourde Boellea, and other rivers near Sierra Leone, which descend with a moderate course from the heights of Fouta-Jallon. Baidar Major Leng, in estimating the height of Mount Loma, the source of the Joliba, at 1800 ft., seems to render it improbable that the rivers flowing W with a comparatively short course, should spring from a much greater height. From Fialha, whence he saw Mount Loma, he could also survey the mountains of Fouta-Jallon, and he does not appear to have been struck by, nor even to have suspected, their superior elevation. It is natural to suppose that the inhabitants of an elevated region liable to winter snow would, under the tropics, differ totally in habits and constitution from the people dwelling in the plains. But it does not appear that in Senegambia nature marks out the definite limits of race, or offers any impediment whatever to occasional migration from the hills to the plain and back again. The plateau of Fouta-Jallon, Jallon-ké-ni Kouta-ii, and Bambook, may therefore be assumed with probability to have a moderate general elevation of 1500 ft. or 1600 ft., while the summits of the mountain-chains which are not numerous stand perhaps at the utmost an absolute height of 6000 ft.

Rivers.—The Senegal, the mouth of which is in lat. 12° 48' N., but which in its course through Fouta-Toro, at various a degree farther N, has its chief sources (those of the Ba-fing) in lat. 10° 10' N., while the sources of the other rivers E. of the Senegal on the coast, are situate N. of that parallel. The Ba-fing runs at first E. then N. by Timbo, and afterwards N.E. and N.W. From the opposite or W. side of the mountain in which it rises, springs also the Tond or Edoué, the second great branch of the Senegal, which runs N. in a more direct course till it joins the Ba-fing in Galam. The latter receives on its E. side the Kakora or Dangerous River and the Ba-Wallima or Red River, both large streams. The Senegal is navigable up to the entrance of Edoué in Kasso, about 700 m. from its mouth. Above those falls it again assumes the appearance of a great river, but its capabilities are not precisely known. The Senegal is much washed in the lower part of its course by the numerous mangrove or deltaic which every river issues through the adjacent plains and its mouth is consequently barred, so as to be at most accessible only for small vessels. The Gambia (lat. 13° 30' N.) is reported to have its source in the mountains of Badé, in lat. 11° 30' N. on 11° 15' W. It flows at first towards the interior, like the Ba-fing, but winds round quickly, and within 80 m. of its mouth flows W to the sea. It appears, in its lower course, a greater river than the Senegal, and is navigable 800 m. up for vessels drawing two fathoms. The falls at Senegambia may be ascended during the floods, and the Gambia has in fact been navigated in boats to a distance of 800 m. From its mouth, and till, from the wilderness and depopulation of the adjacent country its further exploration promised little advantage. The same mountains which give rise to the Dina in Gambia, also sends forth to the W the river Ombou or Kadi, which is supplied by some to form the Rio Grande, in lat. 11° 20' N., though the native accounts seem to identify it rather with the Joliba or Injiba, a few miles N. of the Rio Grande. These two rivers, however, are usually considered

by seamen as only deep inlets or arms of the sea, and as owing but little of their importance to fresh-water supplies. The river Ombou, which flows between the Gambia and the Joliba, is altogether a river of the plains, and highly elevated, the region, being fed wholly from marshes, inundated plains, or by the outpourings of the neighbouring rivers. It may be ascended in large boats 120 m. In general, it may be observed, that in Senegambia below the hills, where the rivers flow from E. to W., the country is perfectly level, and during the floods all the rivers quitting their channels flow over the plains, and become connected one with the other by means of canals or margins, some of which remain still navigable when the floods have subsided, and thus facilitate to the natives communication across the country. These margins are so numerous, that Senegambia, towards the sea, may be compared to a chain of islands separated by narrow channels.

Geology.—As the highland or E. portion of Senegambia has been visited at only a few points, its geological constitution is known but imperfectly. Yet it seems certain that granite in its various forms constitutes the base of the mountain-chains, and shows itself in all the small hills diversifying the banks of the Senegal, from Galam up to Bambook, while farther E. volcanic rocks frequently break through and cover the granite, the hill-tops being often crowned with basalt, and the loftier mountains owing their superior elevation to the mass of trachyte accumulated upon them. The valleys of the primitive rock seem to strike generally S.E. to N.N.W. The direction of the volcanic bands has not yet been clearly pointed out. In obvious connection with these is the formation of ferruginous rock, profusely strewn over the hills in Fouta-Jallon, and neighbouring districts. Lower down than the iron on the outer edge apparently of the volcanic influence, imbedded in a loose friable earth, lies the gold grain, for which in early times Guinea was so famous. Bambook, towards the N. between the Falcid and Ba-fing and Baid in the E. slope, are the districts most famed for their gold-mines. The level plains towards the coast are formed, as might be expected, from the detritus of the hills, mixed with sand.

Vegetation.—The vegetation of Senegambia is known accurately only on the coast. On the Lower Senegal, the soil so far as the inundation reaches, teems with abundance. Beyond that line extends a dry sandy desert in which the acacia, acacia, and various thorny plants of the Sahara overpread the plains, and thus impart an aspect menacing as it grows E. reaches nearly to the Gambia. Farther E. and wherever the coast, broken into islands is intersected by numerous margins, the mangrove and palm occupy the shores. Behind them may be seen the gigantic baobab (*Adansonia*) and baobab (*Eriodendron*) the African teak, and other large timber. But the dense forest of great trees commences at some distance from the coast at the foot of the hills. It is above the limits of these forests apparently that the shea or butter-tree is first met with. This, with the acacia-palm, characterizes the hilly regions. Farther E., perhaps beyond the limits here assigned to Senegambia, the cane-wind makes its appearance. The cultivation of the soil, throughout the whole region, varies much more from the civilization of the people than the gradation of climate. Fertile tracts well situated, often like the wilderness, while less favoured spots yield abundantly Rice, maize, and other grains, with bananas, melons, and yams are cultivated equally on the hills and plains. Trees may be found, particularly round the villages of the Mohammedan Mandingoes, exhibiting a state of cultivation which would be thought admirable even in Europe. The orange, citron, and other fruits introduced by the Portuguese in the 15th or 16th century, are now extensively cultivated in the hills. In some parts of Fouta-Jallon the oranges are not eaten by the natives, but reserved wholly for strangers.

Inhabitants.—As Senegambia is a region arbitrarily marked out by geographers only by a physical line, it presents no unity nor systematic arrangement of population. There exists little or no relation between its limits and those of the various nations which, wholly or in part, lie within it. These nations are of many races, which do not always admit of being accurately discriminated. We find, separate or mixed together, Yelofs, Serres, Foulas, Mandingoes under many denominations, Falcops, Fyalls, and Haussas. Much of these

again is often divided into several kingdoms or independent communities. This extraordinary mixture and complication of different races, or at least of different languages, is the most remarkable phenomenon of Western and Central Africa. In

NATIVES OF SENEGAMBIA.
From Lambert, Voyage dans l'Afrique Occidentale.

1. A man of the Fula, a Fula of Senegal, or of the
2. One of the Fula, a Fula of Senegal, or of the
3. One of the Fula, a Fula of Senegal, or of the
4. One of the Fula, a Fula of Senegal, or of the

attempting to describe the distribution of these races in Senegambia, the simplest course will be to proceed up the Senegal E. and S. and then turning W. to the coast, to consider the nations embraced in this circuit. The Senegal has on the E. or N. bank the desert tribes of the Moors as they are commonly called, namely the Terenas, Darmanke, Braknas, Dons, &c. who are all probably of Berber origin. To the W. of the river which here separates the black from the white race towards the sea are the Fula, negroes of the deepest black in several kinds. They enter the river between which divides them from the Mandingoes of the Gambia. Above them, 100 m. from the sea are the Fula, or Fula (Fula is probably the correct name of Fula) in Fouta Toro. Still higher up the river in Gambia or Kajaana are the Fula, in several different castes or families of widely different character and manners. These people are jet black and shaven like polished ebony. But their much longer hair is not negroes to brown complexion. They are remarkable for cleanliness, religious zeal (they are generally Mohammedan), equanimity habits, and attachment to pastoral life. Above (also known by the Mandingoes) is the Fula, W. of the Fula, and between this river and the Fula, Mandingoes. Beyond the Daing the mixed population of Fula and known bounding Senegambia is chiefly Mandingoes, but farther E. the Fula, where the Fula possess a large territory surrounded on all sides by Mandingoes. Proceeding up the Senegal from Mandingoes, we arrive at Jallon Ké-dé or Jallon Ké-dé, a Mandingoes name which seems to point to the Fula, or possibly to a branch of the Mandingoes themselves, who are not uniformly black and some-colored. And from this country near the sources of the Gambia, lat. 11° 25' N. the Mandingoes extend to the sea coast on the W. 400 m., while on the E. their domain is almost equally extensive for the Mandingoes are of Mandingoes race. Towards the E., and along the highland (Kong), it is not easy to assign their limits, but it is certain that branches of them (the Deyas and Vays) approach the coast in Liberia, while others occupy (in Jamma) the elevated interior of Ashantee. Above Jallon Ké-dé is Fouta-Jallon, where the Fula have established a comparatively powerful empire. Their capital Tambo near the sources of the Senegal and Fula is not above 180 m. from Sierra Leone. If we turn from Fouta W. to the coast passing through a belt of dense forest, we find the plains generally occupied by Mandingoes under a variety of names, among which that of Son, or Sand

predominates. Yet the W. ranges of mountains, in lat. 11° to 12°, are said to be occupied by a people called Tyabbe, completely wild and savage, and having a peculiar language. There is good reason nevertheless, for believing that the Tyabbe are of the same race as the Fula, and Sierra Leone. At the mouth of the Casamansa dwell the Fula, a barbarous race, around whom are several other nations (Fula, Fula, &c.), of kindred origin and language, all alike noted for turbulence, predatory habits and insatiable intemperance. The comparative barbarity and debasement of the coast tribes may be generally ascribed to the abundance of palm-wine. The plains of the interior, from the Fula and Fula in the N. to the 6th parallel probably in the S. are possessed by Mandingoes communities. The same people occupy the coast in Sierra at the mouth of the Gambia. The Fula, Mandingoes styled by the Mohammedan Senegals, that is, brandy men or drunkards, still form the majority. But Mohammedan settlements of Mandingoes and Fula are rapidly increasing near the coast and invariably bring with them superior industry, sobriety and instruction for every village has its school. All over Senegambia are to be found, the Fula, who appear to be a distinct people and the hereditary professional buffoons, minstrels and improvisers of the country.

Government.—The Fula are ruled by hereditary chiefs, who may be styled kings. Among the Fula, the Almamy (Al Imam) is at once sovereign and high priest, and, if well versed in the Koran, he can by means of it, exercise an almost despotic power. The Mandingoes chiefs are generally controlled by councils of elders and also by popular assemblies, but the aristocratic element seems to prevail over the democratic in most of their republics. The Fula and other barbarous tribes on the sea-board seem to have no further union than is absolutely required for defence or for plans of pillage. Each village is independent of its neighbours and sometimes even each house in a village is fortified and fenced off as securely as possible from those around it. The rule of succession among all these nations generally follows the female line, that is, the inheritance goes to the sister's son though in some communities the brother is allowed to have a prior title.

European Settlements.—In the middle of the 15th century (1482) the Portuguese reached the Senegal and opened a friendly communication with one of the Fula kings. But the comparatively humble trade of that part of Guinea does not seem to have satisfied them and without the making permanent settlements on it, they turned further S. in possession of their discoveries. With the voyage of Jobson in 1620, the English may be said to have begun the exploration of the Gambia, though their traders were on the coast 80 or 40 years earlier. The trade of the French in the Senegal may in like manner be dated from Brée's voyage in 1697. The French have at present factories not only on the Senegal, but also on the Gambia, Casamansa, and Rio Grande. They also, however at no colonization nor acquisition of territory beyond what is absolutely necessary for the security of their mercantile establishments. St. Mary's Island at the mouth of the Gambia, and Maury's Island, about 150 m. higher up, are the chief English factories in Senegambia. (See Gambia.) The Portuguese still retain small factories on the rivers Casamansa and Jola. But it is to the Gambia that the Mandingoes, the great traders of W. Africa, chiefly resort. Gold-dust, ivory, skins, fine woods and timber were formerly the chief productions, but it has been discovered of late years that the ground-nut (*Arachis hypogaea*) called by the French *pestaude-terre* yields abundance of fine oil, and the increasing cultivation of this article, chiefly by the Mandingoes now begins to support an important commerce, which will probably produce striking results on the civilization of W. Africa.—(Lloyd's Africa, Millin, Voy. dans l'Intérieur de l'Afrique Occidentale, Poy. dans l'Afrique Occidentale, Huet, Voy. sur la Côte et dans l'Intérieur de l'Afrique Occidentale, Paris, 1858; &c.)

SENTEMBERG, or Senteberg: a vil. and com., in Sardinia, div. Sassari prov. Aristanis, 9 m. S.E. Cagliari, with some of coal, copper, and iron. Pop. 1846.

SENTERCHIA, a tn. Naples, prov. Principato-Citra, N.N.E. Caserta, with a church and four chapels. P. 1450. SENTEMBERG, a tn. Prussia, gov. and 61 m. S.W. Frankfurt, on the Black River, with a castle, and a German and Wendish church. Pop. 1402.

Climate.—Though the limit of the tropical rains is marked in maps in lat. 17° 46' N., yet in truth, about the Nile these rains can hardly be said to reach beyond the 15th parallel. At Khartoum, in lat. 15° 57' N. rain falls only every second or third year and droughts of long continuance are not infrequent. Even higher up where the rain never wholly fails, it is still but scanty. But on the fertile plain of Sennar three or four heavy showers, such as fall only within the tropics are enough for the durra. The rains seem to be occasioned by E. winds, though winds from some S. point prevail during the wet season which ordinarily begins in July and continues for two months. The Nile swells fitfully in May, begins to rise steadily in June and attains its greatest height early in September. Immediately before and at times during the rains, the heat is insupportable; the thermometer is at times rising to 119° F. while the humid air resembles a steam-bath. Then come the deadly fevers and dysentery which are most fatal on the argillaceous plain. Sandy spots near the river and places on the verge of the rains as Khartoum are thought to be comparatively exempt from disease but in truth there is no safety in the neighbourhood of Sennar. The *ferret*, or guinea-worm another plague which comes with the rains, and is attributed to the use of raw water, is more frequent at Sennar. The plague of Egypt never penetrates into Nubia, but in the latter country the small pox is equally destructive. In winter the thermometer often falls to 60° and the atmosphere is so free from humidity that meat will dry without decomposition.

Zoology.—The horse and camel all suffer severely from the rainy season in Sennar. The cattle are small and ill-conditioned; the sheep tall and without wool. The dog of the country appears to be a degenerate pyrenean and is very weak to the hydropotheca. The wild animals are not many. The elephant and rhinoceros, the giraffe, zebra and antelope, keep to the woody mountains of the Abyssinian frontier or to the forests of the south and rarely approach the inhabited banks of the river. The hippopotamus, however, and crocodile, are very numerous as well as the large sand lizard which is often mistaken for a crocodile. The warwolf (*lycaon*) enters the villages by night and devours the dead. The *scorpio* is here as on the roof of every house. Apes and green parrots give life to the woods, and wherever rocks rise above the plain, they are pecked by *beccos*. The *cymophylus* (a fly) derived by the ancient Egyptians, is still found, though not frequent in the woods of Sennar. Here also dwells the *zab*, which migrates in summer. The same woods are visited in April by a small hunter like bird (*Zenar*) which comes in immense clouds darkening the air like locusts. They are caught in nets and sold 100 for a penny. The *swallow* or fly that attacks cattle does not come nearer than within two days' journey of Sennar; *macquinos*, however, are troublesome. The pastoral tribes of Sennar move N. with their herds in May and return in September.

Inhabitants.—The population of Sennar is of a very mixed character and as yet no traveller has succeeded in the attempt to point out distinctly the aboriginal race. According to Cailland there are six classes commonly and readily distinguished:—1. the Amari (yellow) of manifestly Arab origin; 2. Hamar (red) manifestly one remove from the preceding; 3. Amik (blue) darker than the Hamar and including the people called Fanga; 4. the Akhlar (green) and 5. Elkak (black) both very dark and little removed from, 6. the Sufai (black) or Nubian, unnamed negro slaves recently reported in this enumeration, the existence of a one dominant white race distinct from the Arabs, seems to be wholly lost sight of and yet it cannot be thought doubtful for the continuance of a separate independent state, under one name or another from the earliest ages supposes a stable uniform nationality which could not have been maintained merely with such fluctuating and foreign elements as nomadic or servile tribes. The descendants of the ancient masters of the land are now probably to be found among the darker and degraded classes, their mixture with the negro and slave populations being hastened by subjugation and oppression. The pastoral tribes of the island are the Adit and Maras (*gordas* or Kibezal). On the S. bank of the Nile are the Jellin, the Kawala (*between the Red and Dendera*) the Refo and Dobana.

Character.—It is better classes in Sennar have generally handsome features and well proportioned statue-like figures.

Their dark-brown complexions and rather thick lips, alone betray some distant consanguinity with the negroes. Graceful and dignified in carriage while young their bodily vigour is soon undermined by the climate and bad habits. The men grow decrepit rapidly in declining years, and the women on whom devolves all the drudgery of domestic life, become frightfully ugly almost as soon as the first bloom of youth has passed away. The *ferie* or toga generally worn, admits of being gracefully folded in a variety of ways. The elaborately frizzled hair and the elegantly made sandals of the people of Sennar exactly represent the fashion of ancient Egypt, as painted on the tombs. The houses of Sennar at the present day are built of sun-dried bricks, and roofed with *hafs* (a grass) durra-straw or reeds the material used varying with position in respect of the rains. Formerly there were many houses of two stories in Sennar but few of them now remain, still however in splendour of scale in the skilful construction of the doorways and in many other particulars, the architecture of Sennar is much superior to that of the surrounding countries. Scattered among these rectangular houses and far more numerous, are the clay and straw built huts of the black population of the various shapes and denominations belonging to the different races. The social condition of Sennar while it subsisted as an independent state, was very singular. Slavery as well as durra, seems attached to the soil. Every man of average condition was an abject slave—the slave either of a private master or of a despotic king. Nor did the despot himself enjoy the security of freedom but was always liable, in case of popular discontent, to arbitrary condemnation and though only intrigue or popular tumult could bring about his death, yet he always had the royal executioner at his side as an officer of his household. Of the kings of the Fanga who reigned in Sennar from 1604 till the Turkish invasion in 1822, 14 died in the scene of nature. 15 were formally executed, one perished in a popular commotion, and the last was killed by the Turks. More than half of the population of Sennar are negro slaves. The wants of life here are but few and these are supplied almost wholly by slave-labour. The work of the fields is all done by slaves. In the best days of Sennar the soldiers were all negro slaves—either Nubian from Kordofan or from the S. or else Galla (who seem to be a military caste) from Darfur. The upper classes of Sennar spend a life of utter indolence and idle dissipation. All classes have intoxication and drink either made by incubating beer made from durra or brandy distilled from it. In their food also they show varied appetite and taste. They eat with little scruple whatever offers up through Mahometans, do they refuse pork or the entrails of camels, sheep or cattle. But their favourite dish is liver which, as well as other intestines, they devour raw seasoned with gall, or with an acid sauce made from the lees of *nebes*. Yet though dissolute and idle, they do not want for ingenuity and have a large share of traditional art. They can singulate and perform some other more difficult surgical operations. They practise inoculation with the small pox, but esteem it lightly. Their own wants they can supply perfectly, and are eminently skilful as weavers goldsmiths, carvers, potters, &c. In short, Sennar is in Ethiopia as eminent for superior workmanship, as London and Paris are in Europe. The property of land is here absolute and not resumable by the sovereign as is generally the case throughout Africa. Though the state obeyed one sovereign, it admitted many systems of law, and still at the present day the great number and variety of local jurisdictions, laws, and usages prove the original mixture of the population. The people of Sennar though subdued by the Mahometans, can hardly be said to have been converted by them. They have indeed forgotten Christianity, but while professing the faith of the Koran, they observe hardly any of its precepts. They rear and eat pork, they neither wash nor pray and most of their villages are without mosques.

History.—The popular traditions of Sennar represent that country as the original seat of the Macrobis, whom Herodotus mentions as the most remote of the Ethiopians, and as a people whose gold provided the cupidity of Cambyses. The same historian also speaks elsewhere of the Aethiops (gold-grubs) or Egyptian soldiers who, deserting Psammetichus marched S. and settled in Ethiopia above Meroe. These immigrants were evidently the Sabirae or Hamarite (Jumi

gates in the language of the country) of later writers, and a careful comparison of the original testimonies will prove that the island of Sennar was the country occupied by the Egyptians. The Table of the Sun described by Herodotus as a Maehrobian singularity was in fact a festival of ancient Egypt which had grown obsolete in his day. The Egyptian settlement seems to have risen superior to Meroë and to its influence may be traced those imitations of ancient Egyptian art, all of comparatively recent date, which are now scattered over the plains of the latter country. As Christianity spread up the Nile carried by Egyptian or Jacobite priests, it was soon received by the descendants of the Egyptians and in the 10th century the most flourishing state in Ethiopia was the Christian kingdom of Alwa, on the Blue River with Soba for its capital. The ruins of Soba may be now recognized about 16 m above Khartoum, on both sides of the river, but chiefly on the E bank, and among them have been found, besides fragments of sculpture, some inscriptions also, in an unknown language, but in Greek, or rather Coptic, characters.

The Range.—It was about the middle probably of the 15th century that the Fung (Fung, Fonek, or Fumye) advancing from the S, interior of the island, made themselves masters of the Blue River. Their son of Adelen, having embraced Islam, (1604) is now recorded as the first of the dynasty, his four predecessors having emigrated from the last. Their capital at first was Dukin, which still exists (n about lat. 14° on the E bank of the Blue River), nor can we state precisely when Sennar was founded. From those who are now it may perhaps be inferred, that when the Mahommedans first got the better of the Christian population the Jahlis Arabs profiting by the revolution usurped the supreme power but that the national party relying its force in the A. returned after a little time, and under the name of Fung (commanders?) re-occupied the country. As to those a story of the descent of the Shilluks down the White River it may be easily shown to be on many accounts inadmissible.

The Turks in Sennar have fixed their head-quarters on the tongue of land between the mouth of the two great rivers where they have built Khartoum (which see). The force maintained by the Turks and stationed chiefly at Khartoum and at Omdin in Kordofan consists of 4000 infantry and 1200 cavalry. Their rapacity and oppression have extinguished native industry. The people have emigrated in great numbers, and the banks of the Blue River once so populous, now exhibit every where proofs of ruin and desolation.

Towns.—The town of Sennar (lat. 13 34 N lon 38 40 E) which, from the descriptions of 1600 (1609) lives (1772) and of Calland (1822) would appear to have been comparatively large and well built: now lies for the most part reduced to ruins. Its population has fallen from 30 000 to perhaps less than 4000. The king's palace of well built brick, has nearly all fallen to the ground and has contributed materials for the erection of the Turkish governor's house.

The situation of Sennar, in the midst of a vast monotonous plain which represents successively a parched desert, a quagmire, and a field of dunes, is dreary in the extreme. The only agreeable object near the place is the grave of Mohammed Ali mentioned. There is also a well built mosque in the town. The villages on the Nile below Sennar are still numerous, though generally of mean construction the most important of them are Dukin the ancient capital about 24 m below Sennar and Magdich (14 35) now nearly as large as Sennar, Masoudah 30 m lower down the chief market and place of trade on the river and Khartoum where some manufactures have been established under the protection of the Egyptian government.—(1) *On a Journey to Abyssinia* (Lettres des voyageurs, tom. ii.) Brueys Travels, Calland, Voy & Miroir, Broeckh *Oscoromum nell' Egitto, Nubia, etc., Laputa, dirge nel Sennar*, etc.)

SENNÉ, a river of Belgium, rises in prov Hainaut, 7 m N E Mons flows E across prov Brabant, past Brussels and Vilvoorde enters prov Antwerp and joins 1 bank Dyke, about 4 m N W Malines, total course, about 60 m a great part of which is canalized.

SEPIPO or **SURNO** a tn Naples, prov Samma, 20 m S.S.W. Campobasso. It has four churches, a handsome con-

text and linguistic manufactures of woolen cloth and paper, and near it are the ruins of the ancient Nepusa, which was one of the principal towns of the Samaites. Pop. 3400.

SLPITA, or **ZERRITA**, an Indian vil Bolivia, dep. and 4 m N W La Paz, near the S W shore of Lake Titicaca, at 13,500 ft. above the sea. It contains two churches, and with the surrounding district, a pop. of 8700. (Castellanos).

SLPOLCNO (SAN), or **HONOR SAN SEROLCNO** a tn Tucson 11 m N E Arizco 1 bank Tavera. It is walled and otherwise fortified by four gates and well built streets generally spacious, interesting each other at right angles. It is the see of a bishop, and has a court of justice and several public offices a cathedral and five other churches all handsome and richly decorated several monasteries, an elegant town hall a diocesan seminary a theatre, and two hospitals. It has repeatedly suffered from earthquakes. Pop. (1857) 3415.

SLPONT (Düster) a vil Austria Transylvania Maroschker stül 13 m N E Kronstadt with three churches and two acidulated springs. Pop. 23 45.

SLPITIA (Kas) or **SIGYR** islands a group of small islands in the Straits of the English Channel off W of the Cotentin. They are near each other and furnish very insecure anchorage. Les Minic the principal island is defended by seven batteries and has a revolving light 97 ft. above the sea, and visible at the distance of 7 m. There is also a battery at Boumeau.

SLITIL or **SLITIL** a vil Austria Transylvania co. Klausenburg about 9 m from Tekendorf is a mountainous district with a Greek Catholic church. Pop. 1000.

SLITIME a pass of the Alps in the S of France, rising leading from the valley of Oberhalbstein on the N into that of the Drava, is on the N. It is 6093 ft. high, was used in the time of the Romans and was long the principal pass through the Graubünden Italy, but is much less frequented since the opening of the passes over the St. Bernard at the Simplon.

SLITOMONCELI a vil and com France, dep. Jura, on a height among the mountains of the Jura, 18 m N W Geneva with manufactures of horse-tails, cutting and finishing of furs, and a considerable trade in dried timber. Pop. 17 80.

SLITIVILIA (Latin *Regium Indica*) a vil Bengal prov. Siveya, 6 m N Nadul at the confluence of the Duraton and Gaudia. The old town surrounded by walls considerably decayed, stands on the summit of a hill and outside there is nearly an equal number of houses scattered about without any order. Its ancient wall with its well preserved towers, is incorporated with the wall. It has a small courthouse, a prison, a building house, and an hospital for leprosy, granaries, a theatre, a postoffice, and two elementary schools and at one time had 15 parish churches, now reduced to three. Brides and in cloths are made and there are a tanning and five other mills, two banyans, and seven rivers. It was recovered from the Moors by the Count Fernan Gomez in 913 who granted it municipal rights. These *Plazas de España*, from their well-considered provisions and productions, in point of time, became the models of many of the earliest charters of Spanish cities. Pop. 1760.

SLQUACHIE a river U. States, rises in Tennessee flows N E past Nashville and on the frontier of Alabama joins the bank Tennessee, after a course of about 70 m.

SLQUILLIA a river Spain rises between provinces of Jaén and Léon flows first S W past Medina-de-Rosendo and after a course of 60 m joins the bank Valderaduey.

SLKAY Mien, two peaks, Hindustan. See *MENAY* and *SLKAY* a tn and dist. Hindoostan, Mysore the former 5 m N by E. Seringapatam lat. 13 44 N lon 76 58 E. The houses generally are no better than huts, composed of mud and roofed with tile. Adjoining the town is the fort of which the outer ditch and ramparts inclose a sort of park. The citadel contains the remains of the palace, and one of the most regular works in India of native construction. It is surrounded with a wet ditch, and remarkably fine place. To the N of the fort is a noble reservoir, for the irrigation of the adjacent lands.

SLKARAH a vil of Tibet dist. Khamar, on an open plain, of considerable extent, 44 m N E Simla. It is surrounded through a beautiful forest of oak and pine, and con-

tains the summer-residence of the British rajah, beautifully situated on the N slope of a mountain range, at the height of 7000 ft. above sea-level. The village, though small, has a good deal of cultivation in its vicinity.

SLKAL, or **SENARAYO** a city European Turkey See *BOSNA-SERAI*.

SLKAILVO, a tn. Bohme. See *BOSNA-SERAI*.

SLKAL, or **SENARAYO** a river France, rises in the mountain of Côte d'Or flows N N W into deep Yonne passes Chablis, and joins the bank Yonne, total course, about 60 m.

SLKALING a tn and com. Hindoostan prov. and S m S W Ladage, bank Meuse here crossed by a handsome suspension bridge communicating with Jansoppe. The very extensive iron and machine works of Cockrell employing above 2000 hands are established here in the old palace of the prince-bishop of Ladage, and there is also a magnificent glass and crystal work occupying the buildings of an old abbey. Near it several oil pits are in operation. Pop. 4687.

SLKALMPO or **SEKAMPPO** a tn Hindoostan, prov. Bengal, bank Hooghly 12 m above Calcutta. It extends about a mile along the banks of the river is built in the European style, and is in part remarkably clean. It formerly belonged to the Dutch who sold it to the British government in 1845. Serampore was the head-quarters of the first missionaries sent from Europe for converting the natives of Hindoostan to the Christian religion. The mission has since been removed to Calcutta. Pop. (town and vicinity) about 18 000.

SLKANG (properly *SEKANG*) a tn. lat. Java, prov. and m. N. Bantam, on the Tykandi, and at foot of Mount Goongang. Its celebrity has made it the capital of the Bantam residents. It has a bath, ry, barracks, hospital and prison and is adorned by a mosque and a fine market place.

SEKANGANI ISLANDS, two considerable islands of the Philippines, off S extremity Mindanao about lat. 5 30' N lon 125° 32' E. They lie E. N. E. and W. S. W. of each other and the most L. which is by much the lowest, has a hill on its N end. The largest, named Lummock, is about 60 m in circumference, and the next about 36 m there are other smaller islands belonging to the group. The larger islands produce most of the tropical fruits, but the principal article of export is bees wax.

SEKANGA ALLE a vil and par. Tucson, 25 m N W Florence with two churches an old castle, an hospital, and a trade in wine oil and chestnuts. Pop. 1687.

SEKAVAZ a tn and par. Tucson 50 m W N Florence with a beautiful church of three naves, surmounted by a dome another ancient church, belonging to a convent, a school and an hospital extensive marble works, manufactures of woolen and humpen cloth and dye-works and tan neries. Pop. 1671.

SEKAWAITY ISLANDS. See *SEKAWAITY*.

SEKAYE a river Java prov. Begien and Bengenen is flows W S W and falls into the Indian Ocean, N. from Fyda-jap. The mouth is encumbered by a bar on which a heavy sea is always breaking, but within the bar it is navigable for the boats of the country for about 30 m.

SEKILIO a river Italy rises on the frontiers of Modena flows S S E through the ducal of Lunce, and falls into the Mediterranean after a course of about 60 m. Its principal affluents, which it receives on the left, is the Lura.

SEKIDOB a river Russia, rises in the N W of gov. Saratov flows N W past the town of Borkobek, and after a course of about 70 m joins the bank Volga.

SEKIDOB, or *KOMOROVAT* a tn. Russia, princip. Finland at the N extremity of Lake Ladoga, 88 m N E Viborg. It is very poorly built; has a church and a considerable trade in grain, furs, deer skin, butter, sent to St. Petersburg and in linen, hemp, flax, and articles of manufacture obtained in return. Pop. 1180.

SEKIDOB a tn. Russia, gov. and 108 m N W Saratov, on the Berdobe in a very fertile district. It has a trade in agricultural produce. Pop. (1842) 8 06.

SEKIDOB a river Austria rises near Moskop, on the N. E. frontiers of Galizia. flows almost due S past Ternopol, and joins the bank Dniester about 30 m above Chotyn total course, about 100 m.

SEKIDOB a vil Hungary Thierst Dunabo, 50 m E S E Szekesfehely, with two churches and a castle. Pop. 2357.

SBRIGNO, a town and com. Italy Lombardy prov and 18 m N Milan with a handsome church several charitable endowments, and an important annual fair. Pop 4246.

BEREJA, a river Russia, rises near the centre of gov Nijni Novgorod flows W 8 W and after a course of about 90 m joins r bank Tzoka, on the frontiers of Vladimir.

BEREM, a small town in Portugal, prov Douro r bank Vouga, 10 m from Aveiro. It has an annual fair, and is famous for its grapes. Pop 1800.

BERENA (Luz), the Cogneco.

BRRENKEM or FORMOSA, a town Brazil. See FORMOSA.

BRRES, a town Turkey in Piro, 35 m. N. B. Salomies, on a ridge overlooking a large and fertile plain of same name, about 20 m from the Gulf of Constanza. It is surrounded by walled walls, flanked with towers, and enclosing a much larger space than is actually occupied with houses is well built is the residence of a pasha and the seat of a Greek archbishop and has 10 mosques several Greek churches, public baths and numerous houses, considerable manufactures of linen and cotton goods and an important fair is chiefly in the cotton and tobacco of Macedonia for which it is the greatemporium and in corn and fruit. Pop about 25,000.

BRUKTH or **BRUKTH** a town Austrian Galicia circle Bukowina, r bank Nerth, 25 m S E E Czernowitz. It is a very notable place, r habited chiefly by Moldavians, Germans, and Jews and has three Greek churches and a synagogue. P 4000.

BRUKTH (Latin, *Bruck*), a river, Europe, rises in a branch of the Carpathians, on the E. frontiers of Austrian Galicia flows S E and then S E through Bukowina passing the town of its own name, enters Moldavia flows S parallel to the Pruth forms part of the boundary between Moldavia and Walachia, and after a course of about 800 m joins r bank Danube between Brailow and Galatz. Its principal affluents are, on the right, the Suceava, Moldava, Ilanica, Trotus, Iama, with its affluent the Milkov the Raminik and the Basso, and on the left the Bistritza and Sogorlus.

BERGA (Soci), a town Russia, gov 79 m S P Nijni Novgorod, on a small affluent of the Volga. It contains two wooden churches and has some manufactures and general trade. Pop (1849) 3035.

BLUK-EVINK a town Russia gov and 219 m N W Oranburg r bank Sok, near its confluence with the Bourgot. It stands on a lofty height in a district abounding with thermal sulphur springs. P (1849) 145.

BERGINSKOI (Bergin) a town Russia gov Perm, on the Sogor, P Krusno-Ostmak. It has iron works, which have no difficulty in obtaining abundant supplies of ore, but cannot be carried to a great extent from want of fuel. Pop 2000.

BERGIPPE, or **SANCTI-PETRI**, a maritime prov Brazil lat. 10° 20' to 11° 30' S, bounded N by provs Alagoas and Pernambuco, from which it is separated by the São Francisco E. the Atlantic and S. and W Bahia area, 40,484 sq m. The coast-line, which stretches about 110 m. is low and sandy, but is occasionally broken by low hills covered with wood. At a considerable distance inland the ground rises into mountains, which traverse the prov E to W. The only rivers of any consequence, besides the São Francisco are the Yaxá, Paraíba, the Sergipe, and Columbia. In the N W there are various lakes, which communicate with the São Francisco, abound in fish, and are frequented by immense flocks of water-fowl. The province is subject to long and severe droughts, by which many districts are so completely parched that the animals die of thirst. As a whole it is by no means fertile. The leading crops are cotton, sugar-cane, manioc, tobacco, millet, rice, and flax and many mules, horses, and cattle are reared. The woods are of comparatively small extent, but furnish good timber and dye woods. The pop-

osomias and guineas are of the best quality. The higher grounds seem well adapted for coffee, but the cultivation of it is neglected. The minerals do not include any of the precious metals, and seem confined to rock-crystals, limestone, and saltpetre. For administrative purposes Sergipe is divided into five comarcas—Estancia, Laranjeiras, Santo-Amaro, São-Christovão and Villanova-de-Santo-Antonio, and divided into 17 districts. It sends two deputies to the general legislative assembly, and appoints one senator. The provincial assembly consisting of 90 members, holds its sittings in São-Christovão. Pop. 175,000.

SERGIPÉ, a river Brazil rises in the Serra Tabenga, prov Sergipe flows E. between the ridges in a direction parallel to that of the Cotiduba, enters the low grounds, and joins r bank Irapurim or Yaxá Barra about 8 m. from its mouth. Its chief affluent is the Parazomama, which joins it close to the town of São-Christovão. Up to this point the Sergipe is navigable by sloops. Canoes go up as far as the serras.

SERGIPÉ (see Rev in Brazil. See CHRISTOVÃO, São-).
SERJALP a vil and com Italy Lombardy prov and about 1 m E Serpiano; on the Adri. have crossed by a bridge with several auxiliary churches, and a trade in corn and silk. Pop. 2194.

SERUIDO, a river Brazil rises in the Serra das-Catral prov Pernambuco, enters prov Rio-Grande do-Norte proceeds N E, passes the town of Villanova-de-Principe, to which it is navigable by barges and 30 m. below joins r bank Piranhas after a course of 120 m.

SERUCAN, a town France dep Hérault, 6 m from Béziers, with several branch-churches. Pop. 2037.

SERUNA a vil and com Italy Lombardy prov Bergamo, about 10 m N Zogno with a church and manufacture of ironware, and particularly of common iron-ware which have an extensive sale in many parts of Italy. Many of the houses are employed in spinning, and worse. P 116.

SERINAUILL, **SIRNAUILL**, or **CANTREVE**, the cap of Cashmere, chiefly on r bank but partly also on l bank Jallien, here crossed by seven bridges upwards of 3000 ft above sea-level lat 34° 51' N lon 74° 41' E. It extends

SERINAGUR.—From the Hill O. R. Macdonald's Reconnaissance of India.

about 4 m. along the river which with its windings and the numerous vessels plying upon it, has a very picturesque appearance. It is surrounded by walls and ramparts of no great strength, and defended by an ill constructed fort, situated on a height so commanding that it might easily be made impregnable and occupies for the most part of a mere labyrinth of narrow dirty lanes and very indifferent houses of unhewn bricks and timber generally of two or three stories, but often dilapidated and almost ruinous. Some detached houses of a better class, surrounded by a wall and gardens communicate by a canal with a beautiful lake, immediately E. of the town. Few of the public buildings deserve much notice. One of the oldest is a tomb of an octagonal form built of brick, with walls from 4 ft. to 5 ft. thick and surrounded by a stone edifice in beauty but remarkable for strength and solidity. A

more decorated edifices in the Javan Majapahit or great mosques, of such extraordinary dimensions, that the natives represent it as capable of containing 60,000 persons. It is built of stone below and brick above, is surrounded and partly supported by massive wooden pillars, and terminates in a red dome and spire, also wooden. Another mosque, entirely of timber is in a very singular style of architecture, somewhat resembling the Chinese. Serirang was once celebrated for manufactures of shawls paper lantern frames and altar of roses. These and all its other sources of prosperity were destroyed during the domination of the Sikhs, but in consequence of its overthrow may be expected to revive. The population was estimated in the early part of the present century by Elphinstone at 150,000, and by Buchanan in 1822 at 153,000, and by Van Hogen (1845) at not more than 40,000. This great decrease has been caused by war, pestilence, and oppression.

SHEINAGUR, a tn. N Hindoostan former cap. prov
Carnwal 38 m. E N h. Hurdwar lat 30° 11' N lon. 78
44 E. in the centre of a valley. It was formerly of much
greater extent than it now is, having been encroached upon
by the river Alacnanda, besides being reduced by earth
quakes. It has long been in a ruinous condition.

KEERUNGAPEETAM, a celebrated town and fortress, Jhu doostan, prelate Madras pur Mysore, of which it was at one time the cap 245 m. W. by S. Madras lat. 12 29' N. long. 74 44' E. on an island formed by two branches of the Covery about 4 m. long and 1 1/2 m. broad—the town occupying about a mile at the S. end of it. It is generally ill built, and the streets narrow crooked and dirty (but the principal thoroughfare is a wide straight street) and the houses are the ramshackle encrusted the city. Jhu houses are whitewashed externally have tiled roofs, and generally a low second storey. The palace formerly extensive is now in a ruinous condition. The most striking of the other public buildings are the great mosque and the ponds of Sri Rang, the arsenal and the cannon-foundry. In the centre of the island, on an eminence stands what may be considered a temple, and is approached through a succession of small streets. Shunthi Oupaman, a land of well built, having wide streets, Jhu with trees and a river encircle each other.

at right angles. In a garden adjoining is the manse of Mr. Hyder himself his wife, and Tippoo Sultan. The fortress occupies the W extremity of the island and is an immense mass of building majestically constructed. It was the work of Tippoo Sultan, assisted by French engineers, and was three times besieged by the British first in 1791 and afterwards in 1792 and 1799. On the last occasion the fortress was carried by assault: Tippoo himself being slain while fighting desperately together with 8000 men.

BERINGHAM Island, Hindoo name *parv* Carnatic, appears to the town of Trichupoly where it is formed by two branches of the Cavery. At the W extremity of the island, and at a short distance from the bank of the Cavery, is a celebrated grove, composed of seven square inclosures, with walls 20 ft. high and 4 ft. thick. Each inclosure has four gates facing the cardinal points, and crowned by lofty towers, and the whole space enclosed by the outward wall is a garden, with a large tank in the center. The temple itself, a vast pile with a gilded gable, encloses several regular and handsome streets, containing choultrys, small temples, shops, and dwellings of the Brahmans. Europeans are not permitted to penetrate beyond the fourth inclosure, but the arch of the great choultry which they are allowed to ascend commands a good view of the whole. A boat half-a-mile from Beringham, and nearer the Cavery is a small island, called *Parv*, but somewhat smaller than the whole. The island is well walled, and carefully cultivated, but the Brahmans derive their chief revenue from the offerings of immense numbers of pilgrims.

BERK, one of the Channel Islands. See **BARK**.

SERIAL, a coral isle, S Pacific Ocean, the highest in the low Archipelago lat. (S.E. point) 18° 21' S; lon. 157° 5' W (alt.) about 7½ m long, and 2½ m broad. The lagoon (which it incloses) is very narrow, and apparently shallow within several islands in the middle, but is without the smallest opening. There are some clumps of trees on the island. Inhabitants few.

SERMATTA the largest of the Serwatty Islands, Indian Archipelago, off E end, (Simor lat. (E end) 8° 25' S. lon. 129° 37' E. It is about 6 m long, by 8 m broad lofty, mountainous, and precipitous towards the sea, and has only a few inhabitants, who cultivate roots and a little rice.

SERMIIDE a tin and own Italy prov and 26 m SE

SERRE, a river France, rises in N.W. of dep. Ardennes flows W.S.W. enters dep. Aisne, and joins 1 bank Oise, a little below Le Fère total course, about 40 m.

SERRE (La), a town, Naples, prov. Principato-Citra, S.E.E. Campagna, near r. bank Calore. Pop. 2460.

SERREJOY, a town Spain Estramadura, prov. and 33 m. N.E. Oceros, on a rugged height above r. bank Tago; with a church, a convent, an endowed school, several oil and flour mills, and a trade in oil and wheat. Pop. 1095.

SERREAGLER, or **SERREAGUER**, a town Hindostan prov. Gundwana, 180 m. N.N.E. Nagpore. The Nagpore rajah's troops were defeated here in 1818.

SERREVE, a vill and com., Isl. Sardinia div. and 17 m. N.W. Cagliari. Pop. 1516.

SERREY, a town Russian Poland, on the Peas, which issues from Lake Dnieper, and falls into the Niemen 40 m. N. Grodno. It has a Protestant and a B. Catholic church and a synagogue. Many of the inhabitants are Germans. Pop. 1034.

SERRIERES — 1. A town, France, dep. Ardèche, r. bank Rhone, 41 m. N. Privas with a considerable trade in timber. Pop. 2038 — 2. A vill and com. Karthman States prov. Savoy Proper 13 m. W. Annecy. Pop. 1118.

SERRITO or **SARUTO** a town Brazil prov. São-Pedro-Rio-Grande, 75 m. S.W. Rio-Grande with a church and a trade in cattle. Pop. (dist.) 2000.

SERRO or **SERRA** no. 1. A town Brazil prov. Minas Geraes situated partly on the E. acclivity and partly on the summit of a hill nearly 3000 ft. above sea-level 140 m. N.W. Ouro-Prato. It is built in the form of an amphitheatre; the principal streets, which are (1) being extended horizontally along the hill from E. to W. and crossed by a few minor streets which are short and steep. The houses being almost all white-washed, and provided with a garden behind, have a pleasing appearance when seen from a distance but they are in general poorly built. There are five churches none of them of much architectural merit. — 2. An old settlement, outside the town, which has been converted into an hospital. The soil of the district is fertile, and produces a great deal of cotton, sugar and millet. Gold of fine quality, and precious stones, including diamonds, are found within it. A great fall of meteoric stones, preceded by a loud noise, took place here in 1845 and broke almost all the tiling of the houses. The shower lasted about a quarter of an hour and some of the stones weighed from two to three pounds. Pop. (in 4000, (dist.) 28 678.

SERIT or **SARIT** a town Asiatic Turkey, pass and 30 m. P. Dardanelles in the midst of a large marshy plain, with out a single tree. It is about 2½ m. in extent, walled by a wall of stone and lime, with round and square bastions, but destroyed in many places, and without any ditch. A great part of the space inside the wall has no buildings, and the city is said not to contain more than 1000 houses of Kurds, Armenians, and Christians. There are three large mosques and several small ones, two churches five baths, and one extra vinery. In the vicinity of the town melons, cucumbers, &c. are extensively cultivated. Pop. about 5000.

SERVAN (St.) a resort, France. See MALO (St.)

SERVIA (Servavum, German, *Serben*, *Serben*, French *Serbie*), a principality Turkey in Europe, forming a considerable part of Moesia, lat. 43° to 45° N. lon. 19° 20' to 22° 50' E. bounded N.W. by the Save, separating it from Austria and N.E. the Danube separating it in the former direction from the Banat of Hungary and in the latter from Walachia, P. Belugra S. Mounts Argemaro or Regin, and Ghubotho, forming a continuation of the Balkan, and separating it from Macedonia, S.W. Albania and W. Bosnia, from which it is separated towards the S.W. by the Ibra, and towards the N.W. by the Drin greatest length, S.E. to N.W. 340 m., breadth, at the S. about 26 m. and in the N. about 160 m. an area, roughly estimated at 20,000 sq. m. The surface has a general slope towards the N., but is on the whole very mountainous, being traversed by ramifications of three great mountain-chains—the S.E. of the Carpathians in the N.E., of the Balkan in the S.E. and S., and of the Dnieper Alps in the W. The summits are often below 2000 ft., and seldom exceed 3000 ft. except on the frontiers,

where a height exceeding 4000 ft. is attained. Many narrow and several wide valleys stretch between the mountain ranges, and in the flatter parts of the principality particularly near the centre along the banks of the Morava, and in the N. along the banks of the Sava and Danube some considerable plains occur. In the S. the prevailing rocks are composed of gneiss and micaceous and chloritic schists, with occasional calcareous and metamorphic of granite, diorite, porphyry and serpentine. The cratonic system is very largely developed both in the E. and W. and comprises the larger part of the surface. Tertiary and alluvial formations occur partly in the S., and more extensively both in the centre, on the banks of the Morava and in the N.W. on those of the Sava. The minerals include argentiferous copper lead, and iron. The first occurs particularly in the N.E. and was long extensively worked at Maidanpek, where it at one time employed 25 furnaces; the second occurs also chiefly in the N.E., at Tama and Lonka, where are seen many ancient mines of galena worked in veins between the schists and mica-schist, and it has also been partially worked in the W. and S.W. Iron is pretty generally diffused but is not often workable. In ancient times silver was worked in the N.E. at Kotohau and there are still some gold-washings on the banks of the Timok and Pek. The climate of Serbia is somewhat rigorous in the more mountainous parts, and very mild in the valleys and plains, especially those open to the S., and sheltered by hills in the N. In spring the trees put on their leaves from the 15th to the 30th April. The winter temperature ranges from 6° to 14 F.Ah., and in extraordinary seasons has sunk to -2 and -8 F.Ah. Changes of temperature are both frequent and great. Vegetation is vigorous both in the mountainous districts and in the lower grounds the former being generally covered with forests of excellent timber trees among which, where the elevation is not very great the walnut is conspicuous and the latter being generally covered with a fertile soil, well adapted for the ordinary and several of the finer fruits for the vine for cotton in the warmest spots, and for tobacco, rice, maize, hemp, flax and the common cereals in almost every quarter. The whole service belongs to the basin of the Danube which requires the drainage partly directly and partly by the frontier river Sava, suggested by the Drin and the Timok, but most of all by the Morava, which, besides flowing in a main stream from the centre of the principality to the Danube, receives two large branches under the names of the P. and V. Morava, and is fed by numerous affluents in the whole line of its course. Many of these streams might be turned to valuable account both for agricultural and manufacturing purposes, but almost every branch of industry is in a backward state. Trade, which has the assistance of great navigable rivers ought to be extensive but the advantages offered by nature are too often frustrated by myriads of rapids and logs, and as yet the most important article of export as regulations which grow up in vast numbers, almost without care or expense, on the mast of the forest. A Serbia while acknowledging the supremacy of the Porte, and paying it an annual tribute of £200,000, is governed by its own prince, and virtually independent. In form the government is an hereditary monarchy in which the prince or kaiser, sets in conjunction with a senate or assembly. For administrative purposes it is divided into 19 districts or *okugs*, subdivided into lordships or *voivodines*, and communes or *ayastzes*. The inhabitants consist almost entirely of Serbs who are of Slavonic extraction, speak what is considered the softest of all the Slavonic dialects, have good physical forms, somewhat stouter but less elegant than those of the Greeks are less remarkable for intellect than for firmness, courage, benevolence, and generosity, and are in general ardently attached to the Greek church, which has three archbishops and numerous convents within the principality. Belgrade is nominally the capital, but the prince and leading authorities reside and hold their courts in Krachvat or Krachvat, otherwise called Alajfidhar, other principal towns are Boudanica, Nova, and Pristina.

Austria had gained possession of the N. part of Serbia by the peace of Passarowitz in 1718, but the whole returned to Turkey by the peace of Belgrade in 1739. In 1801, the severity and various phases of the Turkish governors caused an insurrection headed by George Petrovitch, better known as Kara or Terry George, Black George. Aided by Russia,

he obtained important concessions, and Serbia was placed under its own internal management, and a Russian protectorate in 1806. In 1808 George was formally recognized by both the Porte and Russia as *Isma* or prince, and the synod or assembly of the states, removed from Semendria to Belgrade, drew up a new constitution. In the war which broke out between Turkey and Russia in 1809 George and his Serbians strenuously supported the latter, but met with a rather ungrateful return. Napoleon's invasion in 1813 naturally made Russia desirous to be able to meet it with her whole force, and she therefore listened to emollient peace with Turkey on terms in which the interests of her Serbians ally were rather ungenerously sacrificed. The Turks were to treat the Serbians mildly and proclaim a general amnesty; but the Serbian fortresses erected during the war were to be dismantled, and the others given up. The Serbians, greatly irritated, endeavoured by negotiation to obtain some modifications of the treaty and in 1813 when this failed, resumed the war. The Turks proved victorious, but met their victory with a barbarism which provoked a new insurrection, headed by Milosh Obrenovitch, who, by a treaty in Dec 1815, secured a kind of independence for Serbia, only modified by a Turkish supremacy. Milosh governed the country with considerable vigour, not unmixt with severity, and in 1827 was declared by a general assembly hereditary prince. He also caused a new constitution to be drawn up but in 1835 when it was attempted to give practical effect to it Austria, Russia, and Turkey all united in opposing it, on the ground of its hereditary and succeeded in substituting for the popular a strong aristocratic element. The senate in which this element was embodied proved too strong even for Milosh who had incurred its displeasure. He was accordingly obliged to abdicate in 1839, and was succeeded by his son Milan, who dying a few days after made way for his brother Michael. In consequence of a new insurrection, which he endeavoured in vain to suppress, he was obliged to flee, and an assembly of the people in 1842 conferred the sovereignty on Alexander Petrovitch a grandson of the Black George mentioned above. He took the name of Alexander Georgevitch, and though he had many intrigues both foreign and domestic to contend against, more especially on the part of Russia, who found him a less obsequious tool than Milosh and his descendants he has (1854) managed to maintain his position, and distinguish himself by a prudent and enlightened administration. Pop. estimated at about 900,000.

SERBIAN a vi. France dep. Herault, 7 m from Beziers with an ancient castle, and a brandy distillery 1 1832.

SERWATTY, or SERWATTY LALATA, a chain of hills. 8 fms. between the N.E. extremity of Thess and the S.W. end of Tinar-Lent, they lie nearly in a straight line, on the parallel of 8 20' N. and between lon. 127 50 and 129 0' E. and are five in number, namely, Letice or 1 est, Mica, Lakor, Sgan, and Sermatia (about sea).

SHAKHEKE a tv. S. Africa, on river of its name, lat 17 26' S., lon 26 50' E. At the town the river flows S. by E. and has a breadth of 400 yds. to 500 yds. It overflows its banks annually, inundating the country to the extent of at least 15 m. from its usual channel. Above the town are a series of rapids and about 80 m. below there is said to be a waterfall. The natives are reported to have ascended the river for 400 m. above the town. (Livingston and Oswell's Journey in 1851, in *Four Voy. Voy. Soc.*)

SERIA a river Italy which descends from the S. side of Mount Rosa in the Pennine Alps flows first S.E. to Varallo then N.E., passing near Verocelli and John's bank Po by two branches about 8 m. below Casale total course nearly 100 m. A canal leaving the Poiss near Verocelli, and terminating at Ivrea, connects it with the Dora-Baltea. It is subject to frequent inundations.

SERKAT, or SERKAT, in Russia, Gulf of Finland about 50 m. W. Cronstadt. It consists chiefly of a limestone hill, partially covered with soil, but has good roads, where vessels of war can anchor in safety a large quarantine establishment, and a lighthouse erected on its N.W. extremity.

SERKINAV, par. Iral. Waterford, 16,983 ac. P. 2682.

SERMA, a tv. Spain, prov. Navarra, on the side of a hill, 37 m. S.W. Pamplona, with a handsome church with a lofty tower, a primary school, manufactures of articles in capricio, and several oil-mills. Pop. 1090.

SESSA a tn Naples prov Laverio, 17 m E Gaeta. It is poorly built, but as the seat of a bishop has a handsome cathedral, five parish churches, several convents, a seminary, hospital, orphan asylum, and several other beneficent establishments, and a very important weekly market. It was founded by the Anacost-Aurelian, and afterwards became a flourishing Roman colony, under the name of *Buena-Aurelia*. Numerous Roman remains still exist in the town. P 4000
SESSAT, par Eng York (N Riding); 6866 a. 1 478
SESTMO (Latin, *Sestum*) a vil and com. Tuscan comp. Arezzo, between the Foglia and the Semina, each of which is here crossed by a bridge, 51 m. E. Florence. It contains a church, a school, and a very ancient castle, and has a trade in sheeps and wool. Pop. 2374.

SESTO a vil and par Tuscan comp. and 6 m. N W Florence with a church, a school and a trade in corn, wine and oil. Pop. 8706.

SESTO several places, Italy Lombardy gov Milan particularly — 1 A vil and par prov and 6 m N W Cressona, with a castle and a church. The district is famous for its fax. Pop. 3052 — 2 (Celandi) A vil and com prov Milan, on S extremity of Lake Maggiore where the Ticino issues from it. It has two churches, manufactures of linen and glass, a weekly market, a small harbour, and a considerable trade. The situation is unhealthy. Pop. 2217 — 3, (*de Monca or San-Giovanni*) A vil and com prov and 6 m. N N Milan on the Lambro, and on the railway to Monza. It contains two churches. Pop. 8179

SESTIA a river Russia, gov Tver, an affluent of the Dniepr total course, 60 m. A canal between it and the latter, is intended to connect the Volga and Moskva.

SESTRABUL a market to Russia, gov and N W St. Petersburg on the Gulf of Finland. It has extensive iron and other government works, at which anthers, firearms, and various articles in iron copper and brass are extensively made.

SESTRI two places Italy, Piedmont, div Genoa — 1 (*de Levante*) A seaport in prov (Liguria) on the gulf and 28 m E.S.W. city of Genoa. It is beautifully situated on a peninsula, defended by two castles, which occupy its highest summits, and by two batteries almost on a level with the water. The N side of the peninsula forms a small and not very secure harbour, overlooked on one side by the ruins of an ancient castle and the other by a Capuchin convent. The principal edifices are eight parish churches, one of them large and handsome an old convent, now used as a school and an hospital. The coasting trade is considerable, and there are quarries of marble. Pop. 4846 — 2, (*de Ponente*) A seaport, on the Gulf of Genoa, near the mouth of the Chiavari, 6 m N W W Genoa, on a terrace, among gardens, which both rise behind it and slope down to the shore. It has five churches, two convents, and two handsome villas. Pop. 7377

SESTU, a vil and com. al Sardina, div and 6 m N Cagliari on a fertile but unhealthy plain. Pop. 1181

SEICHY, par Eng. Norfolk 780 a. Pop. 96

SETE-LAOSAS a collection of lakes, Brazil, and so called from their number—seven. They are situated on the N top of the Serra-da-Melgreda, prov Mato-Grosso in lat. 18° S, are of considerable depth, and are the sources of the Paraguary
SETEVIL *de las-Rozas*, a tn Spain, Andalucia, prov and 7 m. S. N E Cadix, on the Guadalete, here called the Guadaleven, and crossed by two bridges. It has a church, concourse, and primary school several oil and four mills, and a trade in agricultural produce. Pop. 1871

SETIF (*anc Settipa*) a tn Algeria, prov and 69 m E. N E Constantine, on elevated ground, in the midst of beautiful and highly cultivated plains, with a military chapel, several brick and tile works, and two corn mills. Pop. exclusive of the garrison 500

SETIGNANO a vil and par Tuscan 4 m. from Florence, with a large and handsome church. Pop. 1209

SETSKA a tn Bohemia circle and 11 m S. W Chrudim, with a castle, a very ancient church and school, and manufactures of muslin and cotton. Pop. 1085

SETTA, a tn, W Africa, Delamoy, about 80 m N N E Abomey. It is surrounded by a clay wall, about 7 ft. high and 3 ft. thick and has manufactures of earthenware. The soil of the surrounding district is a rich clay loam and various kinds of corn are grown in abundance, ginger is also cultivated. Pop. about 9000

SETTALA (*anc Setipora*) a tn and com. Italy, Lombardy prov and 9 m E Milan, in a large and fertile plain, between the Adda and the Lambro. It has a church, and the remains of an old castle. Pop. 1184

SETTEBELL a tn Naples, prov Laverio, 13 m E S. Sora, on a hill. It consists of two villages, situated close to each other and containing four churches. Pop. 3100.

SETTEVELA, a vil and com France, dep Haute-Savoie not far from Faverges. It has iron works, agricultural implements in the vicinity, and manufactures of sugar from the vine. Pop. 1040

SETTIMO a vil and com Italy Lombardy prov and 6 m N W Milan with a church. Pop. 1852

SETTIMO (*Pirva-ot-Sar-Giuliano*), a vil and par Tuscan, about 6 m W Florence, in the centre of a beautiful plain near I bank Arno. It has a large, and ancient church, and manufactures of refined wax. Pop. 1860

SETTIMO (*Ponente*), a vil and com Italy Piedmont, div and 6 m N W Turin on the Bangeal near I bank I. It is an ancient but well built place, and has a church and a public school. Pop. 3115

SETTIMO (*Torino*), a tn Italy Piedmont div Turin, prov and 6 m N W Ivrea, on a hill near I bank Dora Baltea. It has a court of justice a number of handsome houses lining the public road and five churches. Pop. 1651

SETTIMO a vil and com. al Sardina, div and 6 m N E Cagliari on an unhealthy plain. Pop. 1840

SETTIAGIANO, a tn Naples, prov Calabria-Ultra II, 5 m N W Calabrese on a little hill. The chief employment is the rearing of silk worms.

SETTLE a market in England and 49 m. W by N York, on the Ribbles at the foot of a limestone-precipice which rises immediately behind it to the height of 300 ft. and on the railway from Leeds to Lancaster. It consists of one principal and several minor streets substantially built, but not well kept and has a district church in the later English style a handsome townhall with north-west, assembly rooms subscription-library and newspaper attached. Friends Primitive and Wesleyan Methodist chapels, a classical and mathematical academy a national school several large cotton-factories a ropery and paper-mill a weekly market, and several important cattle-fair. Pop. (1851) 1978

SETTRINGTON, par Eng York (E Riding), 5549 a. Pop. 825

SETTUBAL a tn and seaport, Portugal prov Alemago, near r bank Badoa which here falls into a bay of same name and forms a capacious harbour, 20 m. S.E. Lisbon. It stands in a fine valley is surrounded with walls partly in a ruinous state, and of no use for defense, as they are completely commanded by adjoining heights. On some of these, however, a castle and two forts, constituting the real strength of the place, have been erected. The houses in general are well built, but the streets are narrow crooked and ill cleaned. The principal buildings are four churches, two superior schools for classics and sciences, and two hospitals. The harbour though large is difficult of access being much encumbered by sandbanks, but the trade is very considerable, and gives the town in respect of commercial importance, the first place after Lisbon and Oporto. The principal exports are corn, wine, oranges, citrons and salt; the last most extensively. Settubal is a place of very great antiquity, some Portuguese authors gravely ascribing its foundation to Tubal the fifth in descent from Noah. It suffered very much from the great earthquake in 1755. There are a number of ancient remains in its neighbourhood. Pop. 15,201

SETZDORF a vil Austrian Blesau, circle Troppan about 25 m from Zukmantel with manufactures of potash, several bleachfields, a saw and other mills, and numerous limekilns. Pop. 1510.

SETZINGEN a vil. Hesse prov Hildesheim, bail and near Duderstadt, with a church and a market. P. 1800.

SEURER (*anc Seurregnan*), a tn France, dep. Charente on a magnificent plain, I bank Gironde, here navigable, 24 m S Dijon. It has a handsome townhouse, an ancient church and a chateau, surrounded by a park which furnishes an excellent promenade, manufactures of shawls building-docks, at which numerous barges are constructed tanneries, oil-works, and mills, and a considerable trade in corn, hay wood, charcoal, and common wine. Pop. 3967

SEVAN is Lake Russian Armenia. See GOSSEMAN.
SEVANIA, a lake, Russian Armenia. See GOSSEMAN.
SEVASTOPOL, or **SEVASTOPOL**, the great naval station of Russia in the Black Sea, gov. Taurida, near S.W. extremity (times 190 m. S.E. Odessa, 940 m. N.E. Constantinople); lat. (church) 44° 37' 54" N. lon. 33° 29' 30" E. (a.) It occupies part of a considerable peninsula, S. side of the excellent roadstead of same name, rising from the shore in the form of an amphitheatre, and consisting of a number of tolerably well built streets, which either stretch E. in parallel rows, climbing a steep acclivity or transversely E. to W. The principal street, situated along the harbour which is immediately E. of the town, is lined with houses of two stories many of the others, though only of one story being white-washed have a clean and cheerful appearance. The principal buildings, not naval, are two churches, the one handsome, and the other in tatters, from having been ordered by Vladimir the first Christian czar, out of the remainder of the ancient cities of Chersonesus. The residential and harbour and the extensive establishments connected with them are by far the most important features of Sevastopol. The roadstead entered from the W. stretches E. for about 3½ m., forming a deep hollow between lofty limestone ridges, which completely shelter it both on the N. and S., from which the prevailing winds blow. Its breadth at the entrance is about 1800 yards, immediately widening out to about 1 m. and again diminishing till not more than 600 or 700 yards at its head. The average depth at the entrance and for some distance within, is 10 fathoms, but afterward shallows E. to not more than 4 fathoms. The harbour proper is a creek, which opens from the roadstead,

SEVELLAN, or **SEVILLAN**, a lofty mountain, Ferde, prov. Amerígia, 70 m. E. Tabarca, lat. 38° 15' N.; lon. 47° 57' E. estimated at nearly 18,000 ft., and apparently an extinct volcano, though no remains of a crater are now visible. The rocks close by are decidedly volcanic, and extensive beds of lava are to be seen on the S. side. The mountain terminates in four distinct peaks or summits, to closely resembling each other as easily to be mistaken at some distance. All round the base are hot springs, but not of a higher temperature than 104°.

SEVEN BROTHERS, or **SEVEN-FRANES**, a group of seven islets, off N. coast, Hayti, N.W. Monte Christi. They are low and covered with mangroves; one of them, called Monte Grande, is distinguished by having high trees upon it.

SEVEN N ISLANDS, various island groups—1 Indian Archipelago off N.W. coast, Celebes, about lat. 0° 58' N. lon. 118° 40' E. (a.); they are flat, low and woody, not easily distinguished unless when near them, except the outermost, called North Warber—2, (Tapeo), Indian Archipelago, off S.E. coast, Sumatra, between Banks and Langens, the most N.W., m. lat. 1° 8' S., lon. 105° 24' E.—3, Caroline's Archipelago about lat. 5° 40' N. lon. 157° 30' E. (a.)—4, France. N.W. coast, dep. Finistère lat. 48° 58' 48" N. lon. 8° 29' 15" W. (a.)—5, British V. America, Gulf of St. Lawrence, lat. 50° 9' N., lon. 68° 18' W. (a.)—6, Lapland N. coast lat. 65° 45' N.; lon. 57° 30' E. (a.)

SEVENFERN, or **SEVENFERN** a vil and com. Balgung, prov. B. Flanders, 8 m. N.E. Ghent, with manufactures of linen, woollen and cotton, starch, candles, tobacco, &c. a brewery, and several flour-mills. Pop. 3178.

SEVENHAMPTON, a par. Eng. Gloucester 2000 ac. P. 558.

SEVENOAKS, a market tn. and par. England, co. Kent, 21 m. S.E. London. The town lies on an eminence is tolerably well built, and lighted with gas, has a handsome and spacious church with a lofty square tower, two chapels one Wesleyan and two Baptist places of worship, an endowed grammar-school founded in 1418 a second endowed and several other schools a large range of almshouses and an old market-house. Pop. 1860. Arms of par. 6000 ac. 1 of 4578.

SEVER HILL, or **SEVU** HILL a tn. Andalusia, prov. Antioquia, on a rocky slope over looking an extensive plain 70 m. S.E. E. Kuitaya. It is defended by a castle perched on a rock, and has a small but very ancient Armenian church. From the fragments of marble columns and cornices seen in its vicinity, it is supposed to occupy the site of the ancient Archelaia or Alacatia.

SEVER HILL, a tn. France, dep. Landes, 1 hour Adour, 40 m. S.E. Bayonne. It is well built, has a court of first resort, a beautiful church which formerly belonged to a celebrated abbey a courthouse, a communal college, hospital, manufactures of stone-ware, oil-works, tanneries, and a trade in corn, wine, brandy, lithographic and other stones. P. 2187.

SEVERAL, or **SEVERAL-LE-CHAPEL**, a poorly-built tn. France, dep. Aveyron, on the side of a steep conical hill crowned with the ruins of an ancient castle, 37 m. E. Rodez. The castle long remained in the possession of the Albigeois and was one of their most important strongholds. Coal is worked in the neighborhood. Pop. 1068.

SEVERINA (SANTA) a tn. Naples, prov. Calabria-Ultra II, 15 m. W.N.W. Cotroneo, on a steep rock near r. bank Neto. It is defended by a strong castle, is the see of an archbishop, and has a cathedral and a seminary. Pop. 1000.

SEVERINO (San) two tns Italy—1, a tn. Italy, dep. and 14 m. W.S.W. Macerata, r. bank Potenza, the see of a bishop, with seven monasteries and three nunneries. Pop. 1860.—2, a tn. Naples, prov. Basilicata E.S.E. Lago Negro, with a church and two chapels. Pop. 2200.

and stretches S. along the E. side of the town. It is above 1½ m. long and at its entrance, 400 yards wide. In addition to its natural advantages, it has had all the improvements which art and unbounded expenditure could give to make it complete. The admiralty arsenal and public offices, are on the W. the hospitals, barracks and magazines, mostly on the E. side of the harbour. Toward the land side, no defences appear to have been thought necessary, but both the roadstead and harbour are protected by three batteries of the most formidable description. Two of these, called Constantine and Alexander, defend the entrance of the roadstead, one being situated on each side of it; the third, called Nicholas is situated in the haven itself, fronting the town. These batteries, which, according to some are of the most perfect, and according to others, of very indifferent construction, could bring 1400 guns to bear upon any fleet attempting to force a passage. The dry site of Constantine, and its fine chasms, tempered in summer by cooling breezes and in winter by sheltering hills make it extremely healthy. Its greatest disadvantage as a naval station is the abundance of the sea-worm *Teredo navalis*. Up to 1780, when the first stone of the new fortress and arsenal was laid, Sevastopol was a mere latter village named Akhtar. P. 40,000. (See Supplement.)

SEVERN after the Thames, the largest and most important river in England, formed by the union of two small streams, the Havren and Clevedon, which descend from the W side of Mount Pinatombon, and unite at Llandudno, in the S of Montgomeryshire. It flows N.E. through the S part of that county, past the towns of Newton and Welshpool to the W borders of Shropshire and then E to Shrewsbury, which it nearly enters. From Shrewsbury a little below which it receives the Tern on the left, it flows directionally S.E. through Coalbrookdale, past Brighthelm to the N.W. frontiers of Worcestershire, which it enters at Bewdley, and then proceeds nearly due S through that county, passing the town of Worcester, and receiving the Teme on the right a little below it. At Tewkesbury on the borders of Gloucestershire where the Upper Avon joins it on the left, it begins to flow S.W., passes that town of Gloucester, makes several remarkable windings, begins to become a great tidal river, and after forming a broad estuary, in which it receives the Wyre, a little below Chepstow on the right, and the Lower Avon, about 8 m. below Bristol on the left, falls into the Bristol Channel. Its whole length is about 210 m., and its basin has an area of 8580 sq m. It begins to be navigable at Welshpool, about 178 m. above its mouth, and 235 ft. above sea-level. Vessels of 80 tons can ascend to Coalbrookdale of 60 tons to Bewdley, vessels of 80 tons to Worcester and of 110 tons to Gloucester. Below the last its navigation was much impeded by shoals and windings, but the inconvenience has been removed and a great additional advantage gained by the construction of a canal from Gloucester to Berkeley (all from 70 ft. to 90 ft. wide, and 15 ft. to 18 ft. deep and fit, consequently for vessels of 850 tons). The other canals are the Thames and Severn, with a Stroudwater branch bringing these great rivers into direct communication; the Gloucester and Ladbroke, the Worcester and Birmingham, the Staffordshire and Worcestershire, opening into the Birmingham and Liverpool junction, the Birmingham, and the Shrewsbury. The traffic of the Severn, which has always been important, has in recent times been greatly developed by railroads, which have enabled it to command a large share of the commerce of Birmingham and other large towns in Warwickshire, Staffordshire, &c. The fish of the Severn include numerous varieties, but the fisheries are not of much importance. Salmon, once abundant, have become scarce. In the commencement of its course the valley of the Severn is narrow, but below Llandudno it gradually widens out, forming wide valleys celebrated for their beauty and fertility. Below Gloucester the banks become so low, that destructive inundations have not infrequently occurred. These have been partly caused by one of the most remarkable features of the river, its bore, which brings in the tidal wave with a loud noise, and a height of 4 ft. or 5 ft. Another very remarkable feature, closely connected with the former is the height of the Avon sometimes exceed 43 ft., and at Chepstow attain even 60 ft.

SEVERN, several rivers, N. America—1. U. States, Maryland, on an affluent of the Chesapeake, a little below Annapolis.—2. U. States, Virginia, falls into Chesapeake Bay lat. 37° 25' N. lon. 76° 37' W.—3. British N. America, falls into Hudson's Bay; lat. 55° N. lon. 85° W.—4. Upper Canada, runs from Lake Simcoe to Lake Huron.

SEVERN-STOKES, par Eng Worcester, 8369 ac. Pop. 728.

SEVERNDROOG.—1. A small rocky isl. Indian Ocean on the Cocon coast, Hindoostan lat. 70° 46' N.; lon. 73° 18' E. Being surrounded healthy, it has been selected as the site of a convalescent hospital for the European garrison of Bombay. It was formerly the stronghold of a celebrated Mahatta pirate, and was captured by the British in 1765.—2. A strong hill-fort in the Mysore territory 30 m. W by S. Bangalore, lat. 12° 55' N. lon. 77° 10' E. The base of the rock on which it stands is 8 m. or 10 m. in circumference. From this base a prodigious mass of granite descends perpendicularly to an immense height, and nearly precipitous on

which are the fortifications. This stupendous fort, however, is no less notorious for its pestilential atmosphere than for its great size and strength.

SEVERNOI DONTRE, a river, Russia. See DONTRE.
SEVERO (San) a m Naples, prov. Capitanata, 89 m E N.E. Campobasso. It is a large and tolerably well built town, and contains a cathedral, three parish churches, four monasteries, a summary seminary, and hospital. In 1563 Robert Guiscard gained a signal victory here over Pope St. Leo, who was taken prisoner. Pop. 16,640.

SEVERO a vill. and com. Italy Lombardy prov. Milan on a torrent of same name. It has a parish church and a diocesan seminary. Pop. 1689.

SEVILLE [Spanish, *Sevilla*] a prov. Spain, Andalucia which, together with those of Cadix and Huelva, constitute what was once the kingdom of Seville. It is bounded N by prov. Badajoz, E. Cordova, S. Malaga and Cadix, and W the Atlantic Ocean and Huelva area, 5800 sq m. In summer the climate is excessively warm, the thermometer ranging from 89° to 100° in the shade and in winter the cold very rarely descends to the freezing point even in the morning and at mid day it is in general not lower than 48° to 60°, so that frost and snow are almost unknown. The greater part of this province consists of plains of great fertility which produce all kinds of cereals, seeds, vegetables, oranges and other fruits, wine, oil, figs, pomegranates, hemp and flax, but it has also hills of considerable elevation, the highest peaks of the Sierra Morena being within its limits, as well as the Sierra de Ronda. Considerable numbers of sheep, whose wool is much esteemed, goats, swine, and horned cattle are also reared, but above all horses. The province is divided into two nearly equal portions by the Guadalquivir, and it is besides watered by the Genil, Corbones, Gualfina, and other streams. Among its mineral treasures are iron, silver, lead, and copper and coal is found in the Sierra Morena, limestone in that of Ronda, and plastic clay in the basin of the Guadalquivir. As this is essentially an agricultural province and the inhabitants in general obtain readily the necessaries of life, and even some of its luxuries, a manufacturing industry has not hitherto flourished here, being confined chiefly, with exception of the silk factories of its capital, to coarse woollens, ordinary linens, unspun earth, enamel, cast iron, soap, extract of liquorice, leather and brandy as well as oil and flour mills in considerable number. The chief articles of export are wheat, barley, oil, olives, wool, oranges, liquorice, wood, soap, and copper. Education is here in a state of abundant neglect, the number attending the primary schools being only 1 in 29. Pop. 430,000.

SEVILLE [Spanish *Sevilla*, Italian *Sevilla*, the *Hispalis* of the Romans] a city Spain, cap. above prov. and once

PLAZA DE LA CONSTITUCION SEVILLE.—From Chapel, S. E. aspect.

cap. of Spain. The chief city in Andalucia, and the see of an archbishop, 242 m. S.W. Madrid, and 63 m. N.N.E. Cadix, 1. bank Guadalquivir, which flows along the area of its irregular circumference. The city proper is about 5 m. round, but if the suburbs are included the circumference is more

than 10 m. The former is included in Moorish walls, which towards the side of Cordova are the most perfect in Spain, and they have 166 towers and 15 gates. The winter here being very wet, the lower part of the town is often flooded by the river but the streets are provided with macadam a sort of haiches which are then shut down and keep out the water. The houses are in general three stories and elegantly and substantially built of baked brick, with thick walls and good internal arrangement. The great secondary of the Moors in this part of Spain, is in great measure the reason why the squares are small, and many of the streets narrow and crooked. Wider streets, however, are gradually taking the place of these, and in some quarters, there are many that are both long and broad. Most of them are paved with pebbles, and a few with flags, a yard broad. The two parallel streets de la Riepe and Francoe are the Bond and the gent streets of Seville, and that of Genoa the Paternoster Row in the heart of the city is the great square. Plaza-de-la-Lon extension—this forum, the place of gossip and of execution. It is very Moorish and picturesque with its balconies and its arched, under which are the jewellers' shops; and at one corner a fountain, perhaps the best in the city. Altogether Seville contains about 80 public fountains, rather scantily supplied with water but there are besides, numberless others in public institutions, suppressed or existing, convents, and private houses, and all are supplied from two sources, the Calles-de-Carmoes, a Moorish aqueduct of 410 arches, constructed in 1172 and the Fuente-del-Arabeap, about 1 m. E. from the city to which it is brought in a subterranean conduit. In the street de la Luna was accidentally discovered a subterranean Roman aqueduct, which still flows full of fresh water. The following comprises the most interesting and important of the public edifices and institutions.

Religious Establishments. Seville always abounded in temples, first those erected to the heathen deities by the Romans, traces of some of which still remain, then the Christian churches, which continued during the Moorish ascendancy, when beside them rose not only the temples of Islamism, but Jewish synagogues. After the re-conquest these were converted into the Catholic churches. Other religious establishments were also multiplied to such an extent that, at no very distant date there were 78 monastic institutions, while at the same time, the whole city did not contain more than one free school. The cathedral a solemn and grandiose fabric, is the largest and finest in Spain. It occupies the site of the successive temples of Astor, Salomo, and Mahomet. The original mosque, on whose exact quadrilateral form, 398 ft. E. to W. by 291 ft. N. to S., it is built was pulled down at the beginning of the 16th century and the cathedral which rose in its stead was completed in 1619. Outside, as well as internally it is a museum of fine art, in spite of repeated spoliations—Campana, Merilla, Vargas, the Herreros, and other painters of the Seville school and Montañes, Lel dan Delgado and other eminent sculptors, having contributed to adorn this gorgeous structure. It consists of five naves the two at the sides raised off for chapels, the centre nave is magnificent, and of amazing height, being 145 ft. at the transept- dome. Altogether there are 93 windows in the building, of which the painted ones are among the finest in the kingdom. At the west end of the centre aisle lies buried Fernando son of Columbus. One of the most remarkable objects in Seville is the Giralda (from girar, to turn) or great Moorish tower attached to the cathedral, from which the muskies announced the faithful to prayers. This belfry unique in Europe, was built in 1190 by command of Abu Josef Yashu. The original tower was only 250 ft. high the additional 100 being the rich flagstone belfry was added, in 1605, by Fernando Ruiz, and is elegant beyond description. On grand festivals it is lighted up at night, and then seems to hang like a brilliant chandelier from the dark vault of heaven; the pinnacle is crowned with El Giralda, a female bronze figure holding the lantern or lantern of Constantine. Although it is 14 ft. high and weighs 2800 lbs it seems with the slightest breeze. Below the Giralda is the Patio-de-los-Naranjos, over of orange-trees, with the original fountain at which the Muslim once performed his ablutions. Of the 140 churches which existed in Seville before the French invasion, a considerable number were destroyed or converted into magazines during Seville's short rule. Among

the most interesting that survive, are the San Lorenzo, containing some fine works by Montañes; San Clemente, with splendid roof and a picturesque high-church, by Montañes; the magnificent church of San Pablo. San Pedro, with its Moorish tower San Juan-de-la-Palma formerly a mosque; San Isidro, which, among other fine pictures contains El Triunfo, the

LA GIRALDA SEVILLE.—From *Spain's Architecture* by Macmillan.

master-pieces of Seville. San Maria-Blanca, a synagogue prior to 1391. Santa-Isabel a collegiate church; San Vicente, founded in 800 &c. Of the numerous convents, some have been demolished and others converted into barracks, manufactories, hospitals, warehouses, theatres &c. about 20, however are still occupied, each by a small number of nuns, and a few of them possess some valuable paintings and sculptures.

Educational Establishments. **Museums, &c.**—The Jesuits having been expelled from their convent, built in 1650-74 by Charles III in 1767 it was assigned to the university. The university contains fine pictures and sculptures, and there have been recently added to it museums of chemistry, physics, mineralogy and zoology and a botanic garden, within the last few years also the library has been increased from 13,000 to 55,000 vols. The aggregate number of students who matriculated in 1847-8 in philosophy, jurisprudence, theology and medicine, was 1184. There are besides, several colleges, various free schools, a normal school 128 private schools, several seminaries or colleges for girls, one of them for young ladies of noble birth, an academy of mathematics, a medical college, academies of commerce, of medicine and surgery, of the fine arts, of jurisprudence and legislation. Beside the university library, there is the Columbian library, attached to the cathedral, and founded by Fernando, son of Christopher Columbus consisting of 30,000 vols., the most valuable collection of books in Seville, and one of the best in Spain. In addition to the numerous works of art distributed among the public institutions, especially the cathedral, the university, and the Caridad, a national museum has been formed, into which have been gathered the pictorial treasures of the suppressed convents, as well as some pictures from other towns in the province. It contains specimens of all the different schools, but it, of course, reposes in the masters of the great school of Seville. There are two theatres, and a handsome Plaza-de-Toros or bull-ring, outside the walls—the latter affording accommodation for 13,000 to 14,000 spectators. Bull-fights are the favourite amusement of the city, which furnishes the best masters of the art, as Andalusia supplies the

best animals, and the city is likewise well supplied with provisions.

Charitable Institutions.—Seville has always been famous for its benevolent institutions; in 1088 it contained 78 hospitals, but the number was much reduced afterwards, on account of their vicious administration, and other causes. Among those that survive are the Hospital-de-la-Sangre, founded in 1486, a magnificent edifice, the grand facade of which, combining the Doric style below with the Ionic above, is 200 yards in extent. Originally destined for women, it is now occupied by the sick poor of both sexes, with a division for the insane, in 1848 there were admitted 3482 patients, and the daily average of inmates is 800 to 800. The Hospital de-San-Hernando, a Gothic structure, founded in 1469 and intended chiefly for the cure of wounded persons, the Hospital-de-San-José, or foundling hospital founded in 1608; the number of children admitted yearly is about 600, and half that number die annually. The Hospital-de-la-Caridad founded in the 17th century by Don Miguel Matara in its elegant church are some of the finest creations of Murillo and Yaldes and in the courts are two exquisite marble-groups, representing Mercy and Charity surrounded with children an asylum for aged priests, and a house of refuge, besides various other benevolent institutions.

Military Establishments.—The cannon-foundry whose facade is adorned with a majestic portico, was founded in 1655. This establishment is unique in Spain, and was formerly one of the best in Europe. Indeed, it is said that the bronze guns made here are not surpassed anywhere. There is also a manufactory of saltpetre, one of muskets, another of fireworks an arsenal and an armoury several barracks, and a military hospital.

Prisons.—Until recently this city was wretchedly provided with prisons, but now it can boast of one which is perhaps the best in Spain, in the suppressed convent Del Pópulo. In 1849 it afforded ample accommodation to 683 prisoners, and the daily average number is 240. There is also a house of correction for young persons and a national prison for galley-slaves called *Presidio-Penalmar*, established in 1688 in the Augustinian convent outside the city containing about 1400 prisoners sentenced by the different tribunals in the Peninsula, as well as those of the Navas and Majorca. It is well managed, and altogether a model of establishments of this nature. Some of the prisoners are employed on the fortifications of Cadix and the Trocadero, the mines of Pedroso, and the highroads, and others in various trades and manufactures within the buildings.

Casa Sociedades de.—The Casino is a club, the members of which belong to the elite of the city. There is also a military casino, philharmonic society society of equitation, tribunal of commerce, board of commerce, college of advocates, academy of *bellas-lettres* two societies for the advancement of agriculture and the industrial arts, insurance companies, &c. The following buildings also are deserving of particular notice.—The Casa Loya or exchange, built by Philip II. at the suggestion of the Archbishop of Seville, to prevent the desecration of the cathedral, which was used by mercantile men as a place of rendezvous. In the upper story are the *Armerías de Indias*, that is of S. America, which were collected here by Charles IV. in 1764, from Simancas and other archives scattered through Spain. The Loya was scarcely begun before real commerce departed. The Casa-Capitular or town-house, a fine specimen of plateresque architecture, but unfinished and unequal. The Matadero or abattoir, a fine building of the kind, paved with large Algeciras flags and kept very clean. The Al-bouloger or public granary a sumptuous edifice, built by the Moors, with a large court, on the right side of which are ranges of piazzas, where the traffic in grain is carried on. The custom-house, built in 1792, with both façades of the Composite order. The Alcazar-de-Angulo or warehouse, where is stored the produce of the government quicksilver-mine at Almaden, as well as those wrought by private enterprise. The Casa-de-Moneda or mint where coining, however has ceased, the machinery having been transferred to Madrid. The Antehala or high court of Seville of which the statistical tables for 1844 give 4094 trials in a jurisdiction over 1 140 980 souls, or about one in 279. The archiepiscopal palace, commenced in 1604, whose façade

forms an angle nearly opposite the Giralda. Many of the paintings and sculptures in this palace were carried off by Boult, who resided in this palace during the French occupation of Seville. The Alcazar, built in the 10th and 11th centuries for Abderrahman and restored in 1824 by Don Pedro, with the aid of Moorish workmen; it occupies the site where stood the palace of the Roman prætor. Here Charles V. was married to Isabella of Portugal; and here Philip V. resided in marital seclusion for two years, amusing himself with fishing in the pond. The gardens, which were laid out by Charles, are perhaps the most curious in Europe.

The most remarkable public monument is the Tower of Gold 1 bank of the Guadalquivir a beautiful and solid structure attributed by some to the Romans, and by others to the Moors. The object for which it was erected is unknown, but it figures much in the history of Pedro I. of Castile. Here his treasures were placed under the custody of Samuel Levi, a Jew who died in consequence of the tortures to which he was put by Pedro's brothers. In order that he might disclose where the hoard was concealed.

There is a small and insignificant quay and a dock-yard where the first steam boats were built in Spain. A rude bridge of boats across the Guadalquivir. An iron bridge on the plan of the Pont-de-Carrroux at Paris, was commenced in 1845. There are few Roman but a great number of Moorish antiquities. Outside the walls is a square platform which marks the site of the Quemadero or burning place of the Inquisition. Seville contains 28 parishes and 10 suburbs one of the latter the Triana, on the opposite bank of the river, is the abode of gymnasts and jugglers. In the Jews quarter a labyrinth of lanes, stands the house of Moxillo, who was a native of Seville.

Manufactures.—The Fabrica-de-Tabacos where the tobacco is made into snuff and cigars, covers a quadrangle of 662 ft. by 524 ft. and has 28 internal courts. A most surrounds it in order to prevent vapors from being smugged out. In 1849 4543 persons nine-tenths of them women were employed in this establishment and in 1847 the produce in cigars and snuff amounted to 2 786 445 lbs. A good workman can make in a day from 10 to 14 bundles of 50 cigars each. There are also manufactures of earthenware, crystal, machinery, extract of liquorice, leather, soap, cotton-thread worsted linen and silk fabrics. The different trades dwell in streets appropriated to themselves. The circumference of Seville being situated about 70 m. from the mouth of the river, which it is difficult for vessels above 200 tons burden to ascend, as well as its proximity to Cadix, are unfavourable to the extension of commerce. Accordingly the great majority of vessels trading here are cisterns except in the months of October, November and December when oranges are shipped for Britain, France and Belgium. On the average of the years 1844 and 1845, 1886 vessels of 69 080 tons entered the port, and 1494 of 62 469 cleared out. The imports consist chiefly of yarn wrought and cast iron tin-plate, fine ironmongery delft, fine cloths and linens, some silk-stuffs, cotton mixtures, drings, &c., steel, crystal, dried cod, building-timber, Flanders cheese and butter, &c. and the principal articles of export are quicksilver, lead, copper, olive-oil, wool, oranges, liquorice root, and occasionally grain. Cadix—Seville was called Huelva by the Phoenicians, who settled there, and Huelva by the Romans, of which the Moors made Ishbullah, whence Seville, Seville. It was captured a.c. 45 by Julius Cæsar who made it his capital and gave it the title of Roman, or Little Rome. Seville was the capital of the Goths until the 6th century when Leovigild removed to Toledo, as being more central. It surrendered to the Moors at once, after the defeat of Don Rodrigo on the Gualdala, and it continued its allegiance to the caliph of Damascus until 756 when Abderrahman established at Cordova the western caliphate of the Beni Umayyad family to which Seville remained subject until 1081 when that dynasty was overthrown, and with it the real dominion of the Moors. Seville surrendered to Ferdinand of Leon and Castile, on November 23 1248, and he divided the houses and lands among his soldiers. It continued to be the capital of Spain until Charles V. removed the court to Valladolid. The discovery, however, of the New World raised Seville to more than its former splendour; it became the mart of the golden colonies and the residence of princely foreign merchants

But the French invasion, and the subsequent loss of the Tunesian provinces, have again greatly injured its prosperity. It is surrounded in 1810 to Sicily, who excoriated great areas and extinction. Tunesians estimate the French plunder at £2,000,000 sterling. In 1815 he was forced by the British to evacuate. In 1845 it was besieged by Espartaco for some days, when it capitulated. Pop. 1869, 468.

SEYNE (La), two rivers, France, which give name to dep. Doubs-Seyne. The one, called Seyne-Nantaise, rises about 4 m. N. of Doubs, dep. Doubs-Seyne, proceeds N.W. through the dep. enters dep. Doubs-Seyne, and joins the bank Loire at Kantes. The other, called Seyne-Nantaise, rises in the S.E. of dep. Doubs-Seyne, near Chassy takes a tortuous course, on the whole W., passes St. Maxent and Noet, and after forming the boundary between Vendée and Charente-Inférieure, falls a little below Marais into the Pertuis-de-Breton, in the Bay of Biscay, about 9 m. N. of La Rochelle. The course of the Seyne-Nantaise is about 80 m. of which 12 m. beginning at Charente, when favoured by the tide, are navigable. The Seyne-Nantaise is about 90 m. and is not only itself navigable for 40 m., though numerous banks and mudflats make the navigation difficult, but receives two navigable tributaries—the Antise and Vendée, both on the right.

SEYNE (anc. *Vitis Saronis*), a tn. France dep. Somme-Oise, 5 m. N.W. Verailles, a bank house, here crossed by a handsome bridge. It is chiefly remarkable for the manufacture of china, which bears its name, and in which the art in all that relates to fineness of ware of every shape and beauty of design, is carried to the utmost perfection. The building in which the manufacture is carried on is a huge regular pile of building without any decoration, but contains a complete and curious porcelain museum, in which specimens of the ware of all countries and periods are regularly arranged and exhibited. Seyne has also important manufactures of colour enamel and glass, both plain and painted. In the vicinity are vast subterranean cellars or caverns, in which the wine kept is said to acquire a very superior quality. Pop. 4891.

SEYNE (L'Isle), a dep. France bounded N. by Maine-et-Loire, E. by Vendée, S.E. Charente, S. and S.W. Charente-Inférieure and N. Vendée, greatest length N. to S., 68 m. average breadth 26 m., area 2317 sq. m. This dep. is traversed E. to W. by a chain of hills, forming a continuation of the Cevennes, which divides it into two principal basins, the one sloping S.W. and drained by the Seyne-Nantaise, and the other sloping N.E. and drained chiefly by the Thouet, which is a tributary of the Loire. The chain proceeds almost in a straight line till it reaches the centre of the department when it widens out, and on approaching the N. occupies nearly the whole surface, forming an extensive plateau, much broken by hills and ravines, down which almost innumerable streams descend. The principal rivers are the Seyne-Nantaise and Thouet, both navigable the Thouet, Argenton, Dive, Antise and Bontoume, and there are no fewer than seven navigable canals. There are no proper lakes. About two-thirds of the whole surface are arable, and the soil is generally fertile. All kinds of cereal and leguminous crops are grown in abundance also hops, and a little hemp. Apples, pears, and stone fruit are plentiful. A considerable extent of surface is occupied by the culture of the vine, but the wine produced is generally of second-rate quality. The forests, consisting chiefly of hard-wood, cover about 90,000 a. The minerals include iron, and a little coal, and there are good quarries of limestone, building stone, millstones, and pavement. Beautiful rock-crystals are frequently found. The principal manufactures are linen and cotton goods, serge, flannel, woollen hosiery gloves, chamois-leather hats, cutlery knives, paper bone-combs, turnery and confectionery. The trade is in corn, clover and lucerne seed, mustard wine, brandy, molasses, horses, fat and lean cattle, &c. The department is divided into four arrondissements—Niort (the capital), Boursoise, Melle, and Parthenay, subdivided into 21 cantons, and 313 communes. Pop. (1856) 325,515.

SEYNE, a tn. Highland, prov. Inverclyde, 66 m. N. Pitcairnat. 21° 9' N. lon. 75° 58' E. In this vicinity an inferior sort of crockery is made from a species of black petrous-marl.

SEYNE, a lake Russian Armenia. See **GOYKOWE**.
SEYNE, a prov. of S.E. Afghanistan lat. 29° 50' to 30° 50' N. lon. 67° 20' to 68° 45' E. It appears to be

a flat dry plain of hardened clay its natural defect being, in some places, corrected by streams from the hills. It is crossed, throughout its whole extent E. to W. by the route from Dura Ghazne Khan to Kandahar. The climate is extremely hot; Seyne or Sebea, one of the few towns, being proverbially compared, on this account, to the infernal regions. **SEYNE**, a vil. Holland, prov. Friesland, W. from Leeuwarden, with a church and school. Pop. (agr. cult.) 934.

SEYNE, a tn. Isl. Hayti, republic and 53 m. E. Santo Domingo, on a small river.

SEYNEBOH, or **SEYNEBOH**, a tn. Austria, Galicia, on the Sola, 41 m. S.W. Oranow. It is miserably built, and the houses are very much huddled together. It has manufactures of woollen and linen cloth, and an important annual fair mostly for yarn and cattle. Pop. 2952.

SEYCHELLES, an extensive group of islands Indian Ocean; lat. 3° 40' to 5° 50' S., lon. 55° 15' to 56° 0' E. They are 80 in number but little more than the half deserve the name of islands, the remainder being mere rocks. The principal island is called Mahé (which see). This archipelago consists of an extensive bank of sand and coral, which entirely surrounds it. All the islands, except two of coral, situated at the edge of the soundings, are of granite, huge blocks of which, generally piled up, as it were, in a confused mass, form their peaks, seldom cultivated, but always covered with verdure. The harbours among the Seychelles are numerous, and as they are never visited by tornadoes, they may be considered as perfectly safe at all times. The climate is warm, but equable and salubrious mean temperature, 70° to 72°. Not liable to abrupt changes of atmosphere, the Seychelles are exempt from those diseases so common to other tropical regions. The principal productions of these islands are coffee, cocoa, sugar, tobacco, maize, rice, and fruits and vegetables of every species found within the tropics. The timber is much esteemed for ship-building and fine woods for cabinet purposes are also abundant. Balloons, fish, turtles, and guinea-fowl are abundant. The manners and customs prevailing amongst the proprietors and better classes in these islands are essentially French. They are E. Catholics in name, but in reality profess no religion. Cards, billiards, and dancing are their amusements; of the former they are passionately fond, and the women are devoted to the latter. They are indolent, ignorant, and avaricious, their charges being invariably exorbitant.

The Seychelles were first partially explored by M. Lezard Picault in 1745 about which time a few settlers of French origin established themselves on the largest island, Mahé, with the view of taking cattle. To these, several families from Bourbon and Mauritius were soon added. In 1794, the British took possession of the islands, and as the peace of 1814, they became a dependency of Mauritius. Pop. 6283.

SEYDA, a tn. Prussian Saxony, gov. Merseburg, in the midst of a forest; with a church manufactures of linen several mills, and a trade in wool. Pop. 1089.

SEYDORE, a vil. Prussia, Sillesia, gov. Liegnitz, circle and near Hirschberg with two churches and two mills. Pop. 1098.

SEYLER ISLES, a cluster of small isles, 28 m. off W. coast, Malay Peninsula lat. 6° 41' N. lon. 97° 38' E. (2). The largest is about 5 m. long, by 1 m. broad. A variety of fruits, vegetables, and roots grow here spontaneously.

SEYMOUE, a vil. and township, U. States, Connecticut, on the Naugatuck river and railway 25 m. S.W. Hartford. It has four churches and a bank manufactures of cars, tools, and paper; a power-loom silk-factory, and one of the largest copper-rolling mills in the U. States. It owes its prosperity chiefly to the great water power furnished by the river. Pop. 1877.

SEYNE (anc. *Seduna*), a tn. France, dep. Basses-Alpes, 20 m. N. Digne, enclosed by ramparts, and defended by a citadel which, however, is not strong, being commanded by the surrounding heights. It has manufactures of linen, and a trade in horses, molasses, and cattle. Pop. 1184.

SEYNE (La) (anc. *Seyne*), a seaport tn. France, dep. Var 4 m. S.W. Toulon. It is agreeably situated, and generally well built has a small harbour which is much frequented by the neighbouring coasters builds coarse vessels, and has a considerable trade in fish. Pop. 4582.

SEYNY, a *tu. Russen Poland*, 86 m. N.W. Gredno, with a *Danubian delta*, the *confluence* of which is in *such rapids* as *annually* to *act* above 10,000 *percent*. P 518.

SEYSEL, a *tu. pr.* in France, and *partly* in the *Sardinian States*, on both sides of the *Rhone*, which here becomes navigable, and is *crossed* by a *stone bridge*. The *part* on the *Sardinian side* is in *div. heavy prov. Geneva* and has a *seam of red ochre*, which is *largely worked* and *exported*. Pop. 1817.—The *French part* is in *dep. Ain*, 15 m. N. N. E. *Belley*, and has a *considerable trade* in *wine and salt*.

SEZANNE (*see. France*), a *tu. France dep. Marne*, 85 m. S.W. *Châlons*. It has an *ancient parish church*, *manufactures* of *coarse woollen cloth*, *wool*, *leather*, *earthenware*, *wax-candles*, *vinegar* and *brandy*; and a *trade* in *honey* and *wax*. Pop. 4458.

SEZEMERIZ, or COSCENZIO, a *market* in *Bohemia*, *arbo* and 9 m. N. E. *Chrudim*, with a *church*, *townhouse*, *school*, and *several saw* and *other mills*. Pop. 1652.

SEZINCOOTE, *par Eng. Gloucester*, 1418 m. Pop. 111. **SEZUNJAB, or BESKAN**, a *small isl.* *Russia*, in the *Gulf of Finland*, about 50 m. W. *Landskrona*. It consists chiefly of a *limestone ridge* on which the *Russian government* has *established* a *quarantine* for *vessels* coming from the *Mediterranean*. A *lighthouse* has *also been erected* upon it.

SEZZA or SEZZA (*see. Seza or Sezzano*) a *tu. Italy* 18 m. S.W. *Frosinone*, on a *height* near the *Pontine Marshes*, and *consequently unhealthy*. It is the *see* of a *bishop*, but is an *ill built place*. Near it are *remains* of a *temple* of *Neptune*. The *wine* of the *district* once *celebrated*, is *now indifferent*, but it *still boasts* of its *fruit*, *particularly figs*. The *also* *also* is *common*. Pop. 6000.

SEZZE, a *tu. Italy Piedmont* *div* and 9 m. S.W. *Alessandria*; with a *court of justice* and a *church*. P 2585.

SEZITIA, or SEZITIA, a *ruined city* *Africa*, about 180 m. S.W. *Tunis*. It stood on a *vast plain*, surrounded by *lofty mountains*, and *appears* to have *been* a *place* of *consequence*. Its *streets*, which *can* still be *traced* covered an *area* of *about 5 m.* in *circumference*, and *among* the *ruins* stand a *large temple* and a *palace* *adorned* with *columns* and *plasters* of the *Corinthian order*.

SEZ, or SEZ, or SEZ, or SEZ, a *coast* in *Texas* on the *Gulf of Mexico*, lat. 24° 44' N. lon. 100° 40' E. (n.) Its *walls*, which *rise* *immediately* from the *sea*, *include* 1300 *large* and 2400 *smaller* *buildings*. The *streets* are *good*, but *silly* *sometimes* *paved*, and the *houses*, which *present* a *fine appearance*, are *kept* in *excellent repair*. It has *several mosques*, of which *one* is of *considerable size*. *None* but *native* *being* *permitted* to *reside* in the *town*, *all others* must *erect* their *dwellings* *outside* including *about 200 Jewish families*, *con* *sisting* of *about 2000 persons*, who *reside* in a *suburb* of *their own*, *separated* from the *other parts* of the *town* by a *wall* and *gate*. *Sez* has *extensive markets*, where *unlike* *pro* *ductions* and *European manufactures* are *so d* they are *particularly* *frequented* by *servants* from *Ghadames*. Near the *town* a *series* of *beautiful gardens* *commence* in the *form* of a *crescent*, the *longest diameter* of which *measures* 12 m.

SEZATZ, a tu. European Turkey, Servia; on the *Sava*, 44 m. W. *Belgrade*. It contains *several hamlets*.

SEZINGTON, par Eng. Bucks 2188 m. P 997.

SEZINGTON, par Eng. Leicester 2655 m. Pop. 468.

SEZADPOOR, a tu. Seide, 25 m. S.W. *Larkhana*, lat. 37° 44' N. lon. 68° 12' E., in a *barren tract*, *nearly destitute* of *population*.

SEZADFIELD *par Eng. Suffolk* 1369 m. P 214.

SEZADHURST, par Eng. Kent 1082 m. P 185.

SEZADINK, a tu. Russia, gov. Perm, 1 bank *feet*, 220 m. S.W. *Tobolsk*. It is *surrounded* by *palisades*, *de* *fended* by a *wooden fort*, and has a *church*, *manufactures* of *leather* and *wool*, and *some general trade*. Pop. 1800.

SEZADWELL, a suburb and *par* 13 m. E. by S. *London*, 1 bank *Thames*. It consists of *Upper* and *Lower* *Shadwell* the *latter* *along* the *banks* of the *river*, and *occupied* *chiefly* by *ship-chandlers*, *provision-mERCHANTS* *ma*st, *sail*, and *rope* *makers*, and *other persons* *connected* with the *shipping*-*interest*, and has a *handsome modern parish church*, *places* of *worship* for *Independents*, and *Primitive* and *Wesleyan* *Methodists*, a *large parochial school*, *now* *connected* on the *national system*, *almshouses*, &c. Pop. 11 793.

SHAPTESBURY a *town* and *parl. bor* and *market* in *England*, *so. Dorset*, on the *point* of a *high hill*, *commanding* *extensive views*, 28 m. N. N. E. *Dorchester*. It consists for the *most part* of *four principal streets*, *very irregular*, and *not well kept*, *houses* of *stone* and *brick*, *indifferently built*. The *town* is *lighted* with *gas*, but is *poorly supplied* with *water*. There are *four churches*, and *meeting-houses* for *Wesleyans*, *Independents*, and the *Society of Friends* a *townhall*, a *blue-coat* and *two national schools*, an *hospital* *some almshouses*, and *several other minor charities*. There are *no manufactures* here but *that* of *shirt-bussons*, which has *greatly declined* of *late years*. The *present trade* of the *town* *depends* *principally* on the *weekly market*, which is *well attended*. It *sends* a *member* to *Parliament* 1 op. (man. bor.) 2503 (parl bor.) 9404.

SHAH BANDRA, a tu. Persia, *par Kerman*, on the *Mizus* 14 m. from *its mouth* in the *Persian Gulf*. It has a *custom-house*. About 1 m. from the *town* is the *fort* of *Mizus*, on *elevated ground* 1 bank of the *river*. This *adjoining country* *yields* *large crops* of *wheat*, *fruits* and *vegetables*. **SHAH BANDA, a tu. Seide**, on the *delta* of the *Indus*, but *now deserted* by the *channel* of the *stream*; lat. 24° 19' N., lon. 67° 46' E.

SHAHABAD a *dist.* *Hindustan*, *provid Bengal*, lat. 24° 35' to 25° 43' N. lon. 82° 10' to 84° 50' E. bounded N. by the *Ganges*, which *separates* it from *dist.* *Ghalpoor* and *Seru*, E. and S. by the *river* *Bone*, which *divides* it from *Patna*, *Bohar* and *Palamow* and W. by the *Ganges* *passing* it from *Muzaffarpur* and *Banarus*, *length* N. E. to S. W. 117 m., *greatest breadth* 52 m., *area*, 8270 sq. m. Its N. *portion* is *plain* but *nowhere* a *dead level*, in the N. are *rugged hills*, *rising* *into* a *table land*, and *broken* by *passes* *easy* of *descent*. The *soil* is *generally* *fertile* *especially* *near* the *Ganges*. At *least* *half* of the *surface* is *under* *cultivation*, *producing* *rice*, *sugar cane*, *wheat*, *barley*, *oats*, *indigo*, *hemp*, *tobacco*, *fruits*, &c. In *some parts* *rice* *offences* on the *earth*. *Plantations* *suitable* for *building*, *millstones*, *slate*, *limestone*, *alum*, *iron pyrites*, and *pottery* *are* *plentiful*, and *near* the *river* *Koyel* is a *diamond-mine*. *Stap*, *paper*, *cotton* *cloths*, *dye*, *milk*, and *various* *are* *made*, and the *export* *comprizes* *jewellery*, *household utensils*, *timber*, *castles*, *indigo*, *some* of the *foregoing* *products*, and *raw silk*, *cloths* &c. sent S. into the *Mahratta* *country*. The *district* is *noted* for *good roads*, but *also* for *degradations*. *Principal towns*—Arrah (the cap.), Buxar and Banarus. *Pop.* chiefly *Hindoo*, 1,600,000.—(*Bengal and Agre Gas*, *Trigon. Sur. of India*).

SHAHABAD, a *deserted tu.* *Cashmere*, 6500 ft. above *sea-level*, in a *lung narrow valley* *bounded* N. E. by a *ridge* of *green hills* *several miles* in *length*. It was *formerly* a *favorite residence* of the *Mogul emperors*, but is *now ruinous* and *neglected* although it has *still* a *besar* and a *few shops*, at which *provisions*, *coarse cloth*, and *very fine honey* are *sold*. The *valley* in which it is *situated* has in *some places* a *width* *not exceeding* 1000 *yards*, and is *said* to be *very rich* in *iron* and *copper*. The *neighbourhood* is *celebrated* for its *fruits*, *especially* *apples* and for its *wheat*, *considered* the *finest* in *Cashmere*.

SHAHJAHANPOOR, a dist and *tu. Hindoostan*, the *district* *forming* a *part* of *Mohulid* *Bengal presidency*, lat. 27° 30' to 28° 30' N., lon. 79° to 80° 40' E.; bounded, E. by *Onid*, N. and W. by *dist.* *Bardly* and *Budana*, and S. *that* of *Farrukabad*. *Area*, 9438 sq. m. It is a *level plain*, *watered* by the *Doodah-Gurga* and *Kanganga*, *river* *flowing* S. to the *Ganges*, which *forms* its S. *limit*. About *four-fifths* of its *surface* are *cultivated*, or *capable* of *culture*.—The *rows*, lat. 27° 52' N., lon. 79° 48' E., 50 m. E. *Bardly*, has a *castle*, and *several mosques*. *Pop.* about 50 000.

SHAHNOOR, a deserted tu. *Hindustan*, *par Bagpoor* 40 m. S. E. *Darwar*, lat. 24° 58' N., lon. 76° 20' E. It is *surrounded* by a *wall* and *ditch*. No *buildings* of *any note* *now remain* except the *palaces*, and *these* are *in ruins*.

SHAHZADABAD a *large tu.* *Hindustan*, *provid Bengal*, *par* and *about* 84 m. N. N. W. *Alahabad*, with a *spacious area*, for the *accommodation* of *travellers*.

SHAKAPORE a *tu. Seide*, on the *great route* from *Cutch* to *Hydrabad*, lat. 24° 34' N., lon. 68° 26' E. About 1 m. N. E. the *town* are the *ruins* of a *large city*, *built* of *excellent burnt brick*, and *still* in *such* a *state* of *preservation* *that* the *walls* and *bastions* are *plainly discernible*.

SHAMACHI SHANAGHI, or SCHENACKI, a gov and
in Transcaucasian Russia. The GOVERNMENT is one of the
three into which Transcaucasian Russia is now divided. It
lies in the S.E. bordering on the Caspian, and comprehends
the independent lordships of Shurvan, Bakia, Talysh, Karabagh,
and Behkei. Area, 16,895-52 sq. m.—The river named New Shamachi is cap. of the government. It lies on
the Akhi, 210 m. E.S.E. Tiflis and was once a large and
flourishing place, but suffered so much in the wars between
the Russians and Persians, that it was almost deserted. It
has again begun to recover and has a population estimated
at about 7000. Old Shamachi situated to the N. of New
Shamachi, was once still more important, and was a great
emporium for the trade between Persia and the north. It
was sacked by Nadir Shah and has not now a house standing
among its heaps of ruins.

SHAMLEB, a in Hindooistan, preside Bengal, dist. and
53 m. N Delhi lat. 29° 27' N lon 77° 8' E. It is about
2 m. in circumference, and contains many handsome houses,
with a large bazaar and the remains of a mint.

SHAMO a desert, Asia. See GOST.

SHANG-YUEK, a in China prov. Che kwang, on the
Hwuychow about 63 m. W N W. Ningpo. It is a large and
important place, containing a pop. of at least 100,000.

SHANGHAI a large seaport in China, the most N. of
the five ports opened to foreign trade by the treaty of June 26,
1842. It is situated in prov. Kiangsoo, 1 bank Woosung
about 14 m. from its mouth, 150 m. N.E. Hankin lat. 31° 10'
N. lon. 121° 30' E. In a wide plain of great fertility. It
is reached by a high, thick wall about 4 m. in circuit with
five or six gates. But the area within is by no means densely
occupied with buildings. The streets are narrow and are

SHANGHAI—After Chinese Engraving.

traverse filthy, and the houses, mostly of brick, poorly built
(in penetrating into the interior, the number of warehouses
diminishes, activity disappears, and large gardens surround
the houses. In the outer and busier parts of the town, how-
ever, the scene is very different. Here the shops are nume-
rous and the bustle of trade and commerce is very great. The
merchandise which most attracts the notice of a stranger is
the silk and embroidery, cottons and cotton goods, porcelain,
ready-made clothes lined with beautiful skins and furs, han-
dkerchiefs 5 feet long, and numerous shops for selling handker-

chiefs, ornaments, pictures, bronzes, specimens of old porcelain, and
other curiosities. Large warehouses for storing goods, tea-
houses, granaries, and temples are numerous; but neither
these, nor the public buildings, present any remarkable fea-
tures. There is here, however, what is not known to exist
in any other Chinese city namely a public promenade, called
by Europeans the Tea Garden. It occupies a square of a
regular form planted with trees, and studded with kiosks in
rock-work. The sides of the garden are lined with splendid
shops, either eating-houses or tea-shops, filled with people.
The vast increase of importance and prosperity which Shang-
hai has derived from being opened to European commerce,
is made apparent by the number of foreign vessels, chiefly
British and American, which are now seen at anchor here,
mingled with the native junks, loading with tea and silk, in
exchange for the produce of the manufactures of their respec-
tive countries. Shanghai is connected by water-communica-
tions with one-third of China and there is, therefore, con-
siderable internal as well as external trade. In the inland
navigation alone there are 5500 vessels employed, in addi-
tion to those are 7000 that go to sea, besides innumerable
boats and barges employed in sailing and in conveying pas-
sengers and goods. The principal imports are sugar, sap-
wood, dyestuffs, opium, tea, and opium, and the exports
silk, tea, and opium. The aggregate value of imports in British ships for
1845 was £1,082,407 exports, £1,259,001. The inland
trade is represented as gentle and benevolent towards
strangers. The city was taken by the British on 19th June,
1845. The pop. has been variously estimated from 120,000
to 200,000 (Martin's China, Mullis's Kingdom, Nautical
Almanac, Athenaeum &c.) See Supp.

SHANNON, the largest river of Ireland if not of the
United Kingdom properly speaking only commences its
course when it begins to leave from the S. extremity of Lough
Allen, but is generally considered to rise at the foot of Mount
Enniskillen in the N. W. of Co. Cavan, and to perform the
first of its course as a tributary of the Liffey, by flowing S.W.
and joining it on its N.E. shore. On leaving from the lough
it flows tranquilly through its direct course is nearly in
passing the towns of Leitrim Carrick, and Lanes-
borough, and expanding in several lakes, of which
the largest is Lough Ree. On issuing from this
lough, a little above Athlone, it flows S.W. with
several large windings, receiving its most important
tributary the Suir, on the right, and a little farther
down the less important Brosna on the left, and then
expands into the long and irregularly-shaped
Lough Derg. On leaving this lough at Kilsnoo it
flows S.W. to Limerick, where, beginning to form
a large tidal river with several remarkable expan-
sions, it flows W. S.W. and falls into the Atlantic
by a broad estuary between Loop Head in Co. Clare
on the N., and Kerry Head in Co. Kerry on the S.
A little above Limerick it receives the Mulkarn
and considerably below the Maig and the Deal,
which all join it on the left, and the Fergus on the
right. The whole length of the Shannon, including
its upper part, and the length of its lakes, is 232 m.,
its whole fall is 845 ft. but of these more than
a half occur before it enters Lough Allen, though it
has then performed only 11 m. of its course. Its
navigation properly begins in the lough, and has

that a development of 114 m., but unfortunately meets with
numerous obstructions from tortuous windings, shallows, rocks,
and even rapids. Of the last the most serious occur between
Castle Connell and Castle Frey and have been obviated only
by cutting a canal. Below Limerick the navigation is practi-
cally for vessels of 400 tons. By means of improvements,
commenced at the close of the last century, the naviga-
tion is opened for traffic throughout the whole length, from
the upper extremity of Lough Allen to Limerick and the
commercial importance of the whole river has been materially

increased by the Grand and Royal canals, which give a direct communication to Dublin, and also a communication S. into the basins of the Barrow and Forth. The tide rises in springs 17 ft. or 18 ft., and in neaps about 14 ft. Near the mouth of the estuary, where it is broadest, the rate of the velocity does not exceed 1 m. per hour, but farther up becomes much more rapid and has almost the appearance of a bore. Partly in this respect, but much more in the direction of its course, the magnitude of its volume, and other general features, the Shannon presents some striking resemblances to the Severn. It contains several varieties of fish, but its most important fishery appears to be that of eels.

SHANNONVILLE, a flourishing vil. Canada West, on the Salmon River, co. Hastings, 1½ m. from the Bay of Quinte, and 81 m. from Kingston, with which it has communication by steam-boat and stage, it lies in a fine grain-district, and has several large flour, grist, and saw mills, and two Protestant churches. Pop. (1855) 500

SHANBAHAN, par. Irel. Tipperary, 24,923 ac. Pop. 2319

SHANSEE, an island prov. China, bounded, E. by Petcheloo and Honan S. Honan, W. Shensi, and N. Mengchia and the Great Wall, lat. 34° 40' to 40° 50' N. lon. 110° 5' to 114° 40' E. area, 55,988 sq. m. This province is the original seat of the Chinese people and many of the events recorded in their ancient annals occurred within its borders. Its rugged surface contrasts strikingly with the level tracts in some of the surrounding provinces, although the lowland parts of it are represented as being well cultivated and terraced. The rivers, which are almost all tributaries of the Yellow River, are numerous, but not large. The Tan-ho, the largest of these streams, is about 800 m. long, and falls into the Yellow River, near the S.W. corner of the province, after draining the central part. The N. contains some of the favourite imperial hunting-grounds, and the inhabitants find sources of wealth in the coal iron, clamber copper, marble, lapis-lazuli, jasper, salt, and other minerals, which it affords. The principal grains are wheat and millet, besides a great variety of vegetables with grapes and other fruits. Besides Tai yuen foo, the capital, there are several populous towns in the province. Pop. 14,004,910.

SHANTUNG a maritime prov. China, bounded, N. and W. by Petcheloo S.E. the gulf of Petcheloo and the Yellow Sea, and S. Kiangsi and the Yellow River, which divides it from Honan, lat. 34° 50' to 38° 30' N. lon. 114° 10' to 122° 35' E. area, 63,104 sq. m. The greater portion of this province is level, but the peculiar parts of it are hilly, some of the summits rising too high to admit of cultivation. The shores are generally bold, and full of indentations some of which are excellent harbours but there is no considerable seaport town along the entire coast, and though the province is intersected by several rivers none of any size within its limits discharge into the sea, and the waters are shallow on each side of the peninsula. The inland navigation, however, augmented by the grand canal which traverses the W. part of the province N.W. to S.E. affords great trading advantages, and the transit trade is extensive. Drugs, and vast quantities of vegetables, are exported and felt-caps, carpets, and some coarse hampden cloths are manufactured. The province is over-peopled, and the great proportion of the people are very poor, still they appear to be very contented and attach peculiar importance to this province, on account of its being the birth-place of Confucius, and his disciple Mencius, and also because it contains the Tai-shan or Great Mount, which forms a favourite resort of devotees from amazing distances. Its capital is Tse-nan-foo. Pop. 28,958,764.

SHAOU HING-POO a tn. in China prov. Che-king on an affluent of the Hsuey-show 20 m S.E. Hang-show lat. 35° 0' N. lon. 120° 30' E. It is walled and fortified, and encircled by a canal which forms a kind of moat. The space enclosed by the walls is from 3 m. to 4 m. in extent, but is not all occupied by buildings. The houses on the sides of the canal are mean, but within the town have a better appearance. The trade in all the common necessities of life is extensive, and is largely grown on the neighbouring hills. Pop. about 370,000

SHAP, a tn. and par. England co. Westmorland, near the summit-level of the Lancaster and Carlisle railway, 15 m. N. by E. Kendal. It acquires chiefly of one long street, on the

road between Furnith and Kendal and has a parish church and a much-frequented mineral-spring resembling that of Harrogate. Area of par, 37,770 ac. Pop. 1009

SHAPINSEAY, one of the Orkney isles. Situated, between Isla, Stronsay and Pomona. It is of irregular form, about 7 m. long, and 5 m. broad; area, 8270 ac. of which not more than 750 ac. are arable. The surface is in general level and comparatively even, but rises to a considerable elevation towards the centre. Along the shore the soil is fertile, producing excellent crops of grain, but inland it is sterile and unproductive. Pop. 899

SHAPWICK, two pars Eng. — 1, Dorset, 8870 ac. Pop. 444 — 2, Somerset 3781 ac. Pop. 416

SHARDLOW a vil. and township, England co. and 7 m. E.S.E. Derby on the Trent and Mersey canal, which, about ½ m. below joins the Trent here crossed by a bridge of five arches. It has a handsome Established church, places of worship for the Baptists and Methodists, a national school and several large malting establishments and warehouses for the trade of the canal. Pop. 1121

SHARSHILL, par. Eng. Stafford 1896 ac. Pop. 540. SHARK BAY, a large bay S.W. coast of Australia about 125 S.

SHARNBROOK par. Eng. Bedford 2890 ac. P. 898

SHARNFORD, par. Eng. Leicester 740 ac. Pop. 611

SHARON or DAVIDOWS a vil. Canada West, on York about 40 m. N. Toronto. It stands in a fertile tract, but is chiefly remarkable as the adopted residence of a peculiar sect who receded from the Friends and have erected two singular buildings, one of them said to be in imitation of the Jewish temple, and variously arranged and decorated.

SHARON HIRINGS, a vil. U. States, New York, 49 m. W. by N. Albany, on an eminence surrounded by numerous interesting caverns. It has two springs, the one impregnated with magnesia, the other with sulphur, they are both much used for their exhilarating and invigorating qualities

SHARRINGTON par. Eng. Norfolk 863 ac. P. 262

SHARY a considerable river, Central Africa, flowing from the S. and falling into Lake Tchad by several mouths. It forms an extensive delta, and at Shorway, where its different outlets diverge, is said to be 650 yards broad in the dry season, having previously drawn off three considerable branches. SHAYNE — 1, a tn. U. States California, cap. to Shasta, near bank Sacramento, 150 m. N.E. San Francisco. Near it are numerous gold mines and some salt-springs. Pop. 1000

— 2, A peak of the Cascade range in N. California lat. 41° 20' N. lon. 122° W. height about 1400 ft.

SHAT EL-ARAB, the lower course of the river Furphates from the junction of the Tigris to the Persian Gulf. See LITHRATES.

SHAUGH FARM, par. Eng. Devon 8707 ac. Pop. 654

SHAW-ONG DONKISKOT, par. Eng. Berks, 1089 ac. Pop. 652

SHAWANGLYNK a township and vil. U. States New York, 74 m. W. by S. Albany, on a branch of the Wallkill, with manufactures of cotton and woollen goods, and a trade in lumber and flour. Near it the remains of a number of mastodons have been found. Pop. 4036

SHAWHURY, par. Eng. Salop 7223 ac. Pop. 978.

SHAWHILL, par. Eng. Leicester 1407 ac. Pop. 207

SHAWL, a tn. and valley Beludokum. The river in lat. 30° 8' N. lon. 66° 56' E.; also called Queso, 30 m. N.W. the Bolan Pass, on the route into Afghanistan, and 5563 ft. above the sea, consists of 300 houses enclosed by a crested wall and clustered around the base of an acropolis or huge mound 70 ft. or 80 ft. in height on which is the citadel. It has a pretty well supplied bazaar and an active trade, being a centre of the traffic between Shikarpore Kandahar, and Kabul. It was repeatedly occupied as a military post by the British during the war in Afghanistan. Pop. 2000

— The valley in which it stands is a basin about 12 m. in length, by 8 m. or 4 m. in breadth, presenting in most parts luxuriant vegetation very similar to that of Europe, and bounded on all sides by rocky mountain ranges. Wild sheep, goats and hogs are plentiful on the hills. Inferior seal is in use with Carpets and blankets are made in considerable quantities. In winter, when the ground is covered with snow for two months, many of the inhabitants emigrate to Cutch.

Gundara. Pop. about 5000; chiefly Afghans and Baluchas, with some Hindoos.—(Bengal and Agri. Gaz. Mission, in *Monthly Gaz. Jour.* vi. 83; *Ann.*)

SHAWNEETOWN, a vill., U States, Illinois, r bank Ohio, 164 m. S.E. Springfield. It has a long paved levee, and exports large quantities of pork and a considerable quantity of tobacco. Coal and iron abound in the vicinity, and the manufacture of salt is extensively carried on. Pop. 1784
SHAYOOK, or **SHAYUT**, a river of W Tibet, rises near the Karakorum Pass, about lat. 30° 30' N.; lon. 77° 40' E. It flows S.E. for about 110 m., turns W N W., receives the Nebra on the right, and after a further course of 180 m. direct distance, falls into the Indus, about 15 m. E. Lakard
SHDOD, a vill. Palestine. See ARDOU
SHE-PA KY a to. China, prov. Fokien, in a fine and very

fertile valley on the main road between Tsong-gan-hien and Fouching-hien. It is a small but stirring place and has a considerable trade in iron and tobacco. The acclumbrum is also largely cultivated in the low irrigated lands, the underground stem when cut into small pieces and boiled, forming a common article of food. An excellent kind of arrow root is also made from it.

SHEBEEAH, par. Eng. Devon 6822 f. 1. 113

SHEBIAQ, a tn. and par on soil and near mouth, river of same name S.E. coast, New Brunswick. It has a tolerable harbour and some trade. Pop. 2000.

SHEELIN (Lough), a small lake Ireland co. Cavan, about 50 m. N.W. Dublin. It is a beautiful sheet of water, 4½ to long and on an average 2 m. broad. It abounds in fish.

SHEEN, par. Eng. Staf. ford 2790 ac. Pop. 385.

SHEEPSHED, par. Eng. Lancaster 5280 ac. P. 3759

SHEEPSHORN, par. Eng. Devon 2595 ac. Pop. 126

SHEEPWASH, a par. Eng. Devon 1971 ac. P. 525

SHEEPY, two pars. Eng. Lancashire—1 (*Norwich*) 2450 ac. P. 637—2 (*Magness*) 600 ac. P. 112

SHEERGOTTA a tn. Hindoostan, presidency Bengal, dist. Dabur, 80 m. S.W. Patna lat. 24° 55' N. lon. 84° 55' E., on a rising ground, surrounded by the Moorah. It has a jail and other public buildings.

SHEERING, par. Eng. Essex 1638 ac. Pop. 514

SHEERNESS, a seaport and market tn. England, co. Kent, at N.W. point, Isle of Sheppey, on the river Medway at the junction with the Thames 55 m. W by S London, lat. 51° 28' 45" N.; lon. 0° 44' 45" W. (n). The town consists of Sheerness proper and two divisions called respectively Blinworth and Miletown. It has been much enlarged of late years, and is paved and lighted with gas. There are here a spacious chapel attached to the dock yard a new church in the pointed style, and places of worship for various bodies of Dissenters and a synagogue covered with ing-cordials, and a mechanics institute. The harbour is safe and commodious, and often crowded with vessels. Sheerness is now a second-class naval establishment, dependent upon Chatham. The wharf fronts the Medway, and the dock yard which is surrounded by a brick wall, is one of the finest in Europe, covering an area of 60 ac. The docks are sufficiently spacious to receive men-of-war of the first class fully equipped. There is a basin 26 ft. deep, two smaller basins, storerooms,

reticulating storerooms, malthouses, rigging-houses, &c. There are also workhouses for the port-administrative commissaries, &c., and barracks, containing usually 500 men. Besides the dockyard business, there is a considerable trade in oyster-fishing, supplying shipping, the corn and seed trade, and in the manufacture of coppers. Pop. 8549

SHEFLEN, or **SHEPLEAN** an isl., S.E. coast, Africa, in Delagoa Bay. It is about 5 m. long very narrow low, and sandy.

SHEFFIELD a market tn., town and pari bor. England, co. York, pleasantly situated on several acclivities, in a natural amphitheatre, enclosed on all sides except towards the N.E. by wooded hills, at the junction of the Sheaf and Don on the Sheffield and Don canal and on the Sheffield and Manchester and the Sheffield and Rotherham railways, 141 m.

N K W London. The site of the town was originally enclosed to the angle formed by the two rivers, but has gradually extended to a considerable distance along the slopes which rise from them, and where not densely covered with houses, presents many villas and other detached residences, distinguished both by the elegance of their architecture and the pleasantness of their inmates. As a whole however, the town is both irregularly and indifferently built, consisting particularly in its older parts, of steep and narrow streets, and brick houses often of an antiquated and poor appearance. In the more modern parts the streets are both wide and straight, and many of the shops are remarkable for their elegance, though the clouds of smoke rising from the public works cause everything to assume a very dingy hue. Almost all the streets are well paved and well lighted with gas. The communication across the Don is maintained by four bridges, three of them of stone and one of iron, there are also several bridges over the Sheaf including a large span, forming a part of the Norfolk works.

The parish, which is co-extensive with the borough, contains 20 churches, and other places of worship in connection with the Establishment, and about 25 belonging to Dissenters of

various denominations, of which the most numerous are the Wesleyan Methodists, Independents, and Baptists. Among the churches the most deserving of notice are the original parish church, a spacious cruciform structure, erected in the reign of Henry I, surmounted by a central tower and spire, and containing, among other interesting monuments, a bust remarkable as the first production of Chaucer's chisel; St. Paul's a handsome Gothic edifice, with a dome and tower, St. James, with a well-arranged interior and an E. window containing a beautiful painting of the Crucifixion; St. George's, St. Philip's, and St. Mary's, covered externally with a profusion of grotesque heads and other ornaments but well arranged within, and consisting of a nave and aisles, separated by ranges of light clustered columns, which support a lofty and richly groined roof. Among the Dissenting places of worship, notice is due to the Wesleyan Brunswick chapel, which has a very imposing appearance, and the R. Catholic chapel, a cruciform building, in the Decorated style, with a tower terminating in an elegant crocketed spire, 200 ft. high. The other more important buildings are the townhall, a neat and substantial stone structure, with a cupola the Cutlers' hall a handsome Grecian edifice with a Corinthian portico, the Music-hall, with a library and literary society in the same building, the convalescent, a spacious building with a portico of 16 massive pillars, the market-hall, with a roof of iron and glass, the assembly rooms, theatre, barracks, public baths, and the Victoria railway-station with the viaduct immediately adjoining it. The educational and literary establishments are the free grammar-school the Wesleyan Proprietary grammar-school or Wesley college, occupying a very handsome structure the college, a proprietary school the people's college, the national British charity, infant, ragged and various other schools the school of design, the mechanics institution and lyceum for which complete and even elegant accommodations have been provided the ethnium, the literary and philosophical society, possessed of a good museum the medical hall the public subscription and the mechanics libraries. The principal benevolent institutions are the general infirmary the Shrewsbury and Hollis hospitals, the licensed convalescent asylum, Deakin's charity, recently founded and several valuable charities under the management of the cutlers company. To the other objects of interest already mentioned may be added the general cemetery situated on the slope of a hill about 1 m. from the town, and covering a well laid-out area of about 14 acres, and Brightside Brierley cemetery near Pitsmoor, of 27 acres, and four smaller ones the botanical gardens, finely situated near the general cemetery and the park, consisting of about 20 acres of pleasure-grounds.

The oldest staple manufactures are all kinds of cutlery including knives, scissors, razors, edge-tools files, and rasping instruments. In each of these branches great numbers of workmen are employed, and the articles produced are well known and esteemed in all the commercial emporiums of the world. Steel also is made in vast quantities, not only for the supply of the local demand, but of the general market. 3 or 4 per centum Swedish iron is mostly employed. Another celebrated branch of manufacture is the plating of articles of copper with silver, and in connection with it the process of electroplating has recently attracted considerable attention. A great number of hands are also employed on what is called Britannia-metal, which is made to form a cheap substitute for almost all the articles made more expensively from the precious metals and by the operation of what is termed pressing the horns and heads of animals are converted into many useful and elegant forms. Other leading articles are optical instruments, including especially the grinding of spectacle-glasses, and in the more numerous articles of stoves, grates, and fenders, Sheffield holds a decided pre-eminence both in cheapness of price and elegance of design. In connection with the staple manufactures of the town are numerous extensive iron and brass foundries, grinding, tilting, rolling, and slitting mills, &c. The social condition of the workmen is generally superior. They receive large wages, and live for the most part in separate tenements.

Sheffield is supposed to have been originally a Roman station, and is said to be of great antiquity. It existed as a town, under the Romans, and is mentioned in Domesday-book as a manor. In 1296 Edward I. granted it a charter to hold a

Vol. VI

weekly market and an annual fair, and in the 14th century the mention of the Sheffield 'thyrall' or whittle by the poet Chaucer, who flourished under Edward III. indicates that it had already become noted for its cutlery. In the early part of the 15th century the domain passed by marriage to the celebrated soldier John Talbot, Earl of Shrewsbury, who built in the vicinity of the town a manor-house, which possesses some historical interest as connected with the custody of Cardinal Wolsey and Mary Queen of Scots. A splendid castle erected in the reign of Henry VIII., was completely demolished by the Parliamentarians during the civil war. The history of the earliest manufacture of Sheffield is involved in considerable obscurity but there cannot be a doubt that, like many other English towns, it profited essentially by the bigotry of the Duke of Alva in the Netherlands and was abundantly compensated for the asylum which it afforded to the victims of his persecution by the industry and mechanical skill which they imported. From the date of their arrival its cutlery acquired new celebrity. Its progress as a town, however though steady was not very rapid and it is only since the middle of the 18th century and during the course of the present century that it has made its most important advances, and risen to a prominent place among the great manufacturing towns of the kingdom. Its privileges as a town and port borough were first conferred by the Reform act, according to which it is governed by a mayor, 18 aldermen, and 42 councillors and sends two members to the House of Commons. Pop. 130,810.

SHEFFIN, par Irel Kilkenny 2438 ad Pop 596.
SHELF (FORN) two pars. Ling Iberia —1, (Sear), 1041 ad Pop 68.—2, (Weed) 2196 ad 1 op. 625.

SHELFKATIL-SU, a small river, Asia, which forms the boundary between Russia and Turkey on the E. side of the Black Sea, into which it falls at lat. 41° 35' N., lon. 41° 45' E. As its embouchure is on its E. bank, is the small Russian fort St. Nikolai where is a quarantine station.

SHELL, several places, Arabia —1 The chief town of a district of same name, on the R. coast, extending 1 m. along shore the Sultan's residence, a fortified castle on an eminence near the centre being in lat. 14° 48' 40" N lon. 49° 49' E. The only other large buildings are a few mosques and a custom house. The town has a triangular shape and the dwellings are irregularly scattered but they are tolerably spacious and comfortable. It is a place of much trade. The main factories are chiefly coarse cotton cloths, gunpowder and implements of war. Provisions may be easily obtained here, but the water is bad. The anchorage is only an open roadstead with clean sand in 7 or 8 fathoms, 1 m. off shore. Pop. about 5000 —2 A to a few m. S.W. the town just described, lat. 14° 38' 30" N lon. 49° 27' 35" E. formerly an important place but now a village occupied by a few fishermen's families. The former population appears to have removed to SHELL near a town lying inland about 4 m. N.W. which is said to contain 4500 inhabitants. Its nucleus may be distinctly seen from the sea above the date-groves, and the valley appears extremely luxuriant plenty of vegetables dates, and good water may be obtained here.—3 A popular appellation, in the Maori dialect, of the lofty range of mountains, abounding with frankincense and other gums extending from the E. limits of Maori to Dhoof and Mitoh, which are named in the maps the Mountains of Sejer or Sejer.

SHEIK SHAIN, an Isl. Persian Gulf. See BUNTA.

SHELMARHAM, a vill. in Burnham, near r bank in wadi lat. 30° 50' N. lon. 94° 30' E. about 280 m. N. Mangoon. It was burnt to the ground in 1826 by the Burmese army while retreating.

SHEMARIWAH, a river U. States, Virginia after a N.E. course of 140 m. entering the Potomac a little above its passage through the Blue Mountains at Harper's Ferry. It is navigable for a considerable distance from its mouth.

SHEMAY, a Nubia, on the Nile lat. 16° 38' N. lon. 33° 15' E. remarkable as the modern capital of that tract between the Sahara and the Nile which was anciently celebrated as the Island of Meris. It revolves in the possession of these countries by the Yaro-Egyptians in 1821-3. She may be the residence of the Wad Agib (or Wad Ajib), the dy-

nary which had long divided with the rulers of Sennar the supreme control of the Ethiopian plain. For it is worthy of remark that the political divisions of Ethiopia which are traceable in the earliest histories, still subsist, though in ruins at the present day. We may now study in She may the circumstances which gave Meris its importance. It is on the road from Sennar and the gold-countries in the S. to Egypt, and also on that from Kordofan and Darfur to Sennar on the Red Sea. Nearly all the caravans of the country pass through it. Hence, before the Turkish conquest, it was a populous town with 1000 houses, but it is now in decay. The natural limits on the S. between the Wad Agib and Sennar are formed by the granite mountain chain of Ghirre or Gweri, below which is the passage from the desert of Bahi yada and the E. bank of the Nile. From these heights a lateral ridge of moderate elevation proceeds N.E. at a little distance from the river and ramifying incloses some spacious hollows, which, under the influence of the occasional rain, are extremely fertile. By means of water-wheels and artificial irrigation, they might be rendered very productive, and thus we see explained the existence of ancient cities, the ruins of which are now in the desert, at a considerable distance from the river. The chief of these are the ruins of Meris in lat. 17° 0' N. near the village of Degrawah, N.E. of which is an extensive plain covered with pyramids. Other ruins (temples, tombs, pyramids, &c.) are situated at Za Sofra and Naga, respectively 9 m. and 20 m. S.W. of She may. These remains are hardly anterior to the Christian era, and the chief structures seem all to have been erected by a queen named Kandaka.

The chief ruins in the Island of Meris, are the Blackish (who have some villages on the Atbara), the Talifa, and the Kowab (Hurdland's *Nubia*, Colcland, *Voy & Memoirs*, Hakem a *Tree in Ethiopia*, Lepsius *Drugs*).

SHEENLEY, — 1. A vill. and par England, on Hartford, 6 m. N.W. Barnet with an Established church, built of slates a chapel of ease, a place of worship for the Wesleyans, and manufacturers of straw-plait. Area of par, 4056 ac. P. 1397.

— 2. Par Bucks 290 ac. P. 483.

SHEENSE, an island prov China, bounded N. by the Great Wall, which divides it from Inner Mongolia E. Shanase and Honan; S.E. Hoang S. Szechuen and W. Kansu; lat. 32° to 36° 30' N.; lon. 108° 08' to 111° 10' E. area, 67 400 sq. m. It is a hilly region interspersed with many well watered tracts. The mountains form part of the Peking range running across the S. districts and dividing the two basins of the Yellow and Great rivers. In the N. parts of the province the country gradually declines to the E., and although hilly does not rise into high peaks. Several rivers, of which the Lo and Wei are more than 850 m. long, taking their rise in Kansu flow S.E. into the Yellow River but on account of rapids and falls their channels are in many places unfit for navigation. The Wei-bo, which has a course of about 400 m., is the most considerable of all the affluents of the Yellow River traverses the province W. to E. So-pai do, the provincial capital, was for many centuries the metropolis of the empire. Sheense possesses mines of iron copper gold, also paper, porphyry, &c. Wheat millet, and cotton are cultivated and horses, cattle, goats, and sheep are extensively reared. Khotan wax, red lead, coal and opium are exported. Pop. 10,207,366.

SHEESTON, par Eng Stafford, 8451 ac. P. 2043.

SHEEPHALL, or SHEPHERD, par Eng Herts 1142 ac. Pop. 547.

SHEPHERY (Sheep), an Isl. England, co. Kent, at the mouth of the Thames and entrance to the Medway having Sheerness at its N.W. extremity. It is between 8 m. and 9 m. long, and about 5 m. broad, and is separated from the mainland merely by a branch of the Medway. The soil is for the most part of good quality.

SHEPHERTON, par Eng Cambridgeshire, 1209 ac. P. 521.

SHEPHERTON, a vill. par Eng Somerset, (1. *Beauchamp*) 836 ac. Pop. 047.—2. (Montague), 2424 ac. Pop. 412.

SHEPHERTON, a market in par England, co. Somerset. The former situated on a slight acclivity at the foot of the E. range of the Mendips about 4 m. E. Wells, has tolerably straight, well paved, and clean streets and houses generally well built of stone. In the centre of the market-place stands a remarkably handsome cross, erected about 500 years ago. It is of an hexagonal form with a column or shaft 80 ft. high. The church is of mixed Norman and Gothic styles, and has a fine tower 120 ft. high. There are an endowed E. Catholic and Lutheran chapels, and chapels for Methodists, Primitive Methodists, and Independents an endowed grammar an infant, and day school two charity schools, and several private seminaries several almshouses, and a literary and scientific institution. The manufactures of the place comprise silk, velvet, crapes, fine waistcoat pieces, ribbons, &c. in all of which about 2000 hands are employed. The woollen trade, which was formerly very considerable, has ceased for many years. The corn-market is extensive. Pop. 5885. Area of par, 8372 ac. Pop. 5116.

SHEPHERY, a m. U. States, New York, 85 m. W. Albany, with four churches and an academy. Pop. 9235.

SHEKILL, par Eng. Devon 4702 ac. Pop. 725.

SHETLAND, or **SETLAND**, a group of islands in the Atlantic, to the N. E. of the mainland of Scotland between lat. 56° 51' 18" and 60° 51' 90" N. and lon. 0° 45' and 1° 45' W.; greatest length, S. E. to N. N. E., 70 m. greatest breadth, about 50 m. area, 880 sq. m. They unite with the Orkneys, from which they are separated on the S. by a channel about 46 m. wide in forming a Scotch county, and are 90 in number. Of these some are waste islands, only 25 are inhabited, the largest being the following.—**Bressay**, which is uninhabited, rising 1476 ft. but is extremely wild and rugged, and but for the almost total absence of wood, which is confined to a scanty supply of stunted birches, willows, and mountain-ash, would furnish scenery not merely of a varied, but a very picturesque description. The strata consist of a few secondary rocks, chiefly sandstone and conglomerate of the Devonian or old red sandstone formations, and large concretionary tracts of gneiss, which extend through the centre of Mainland from the whole of Yell and terminate in the N. end.

The grass often contains beds of blue limestone, which is even occasionally blended with it. Mica-slate is less abundant, but mica-slate forms the principal part of the cliffs on the W. side of the long and narrow promontory on the E. of Mainland. The principal igneous rocks are granite, serpentine, and granite, the last forming the great mass of Broom Hill already mentioned. The only mineral of any consequence is a stratum of iron, which occurs occasionally in veins, but more frequently in a detached and concretionary form, and is exported in a crude or partially pulverized and levigated state, to be converted into a pigment, dye and alloy. The soil, where the surface is flat enough to retain it, is generally mossy, but alluvium of good quality is not uncommon along some of the bays and in the small valleys, and a considerable quantity of tolerable land has been made by long culture. The principal crops are black oats here, and potatoes. Turnips thrive well and a good deal of hay is obtained from natural meadows. Its quality however owing to bad harvesting, for which the moisture of the climate is made an excuse, is very indifferent. The live-stock, including cattle, horses, and sheep, are of races almost peculiar to Shetland and are chiefly remarkable for their diminutive size and hardihood. The pony in particular, is well known, and is not surpassed by any of his own dimensions in any country, and both the milk of the cow and the hoof of the ox are of excellent quality. The fisheries are valuable, and include herrings, mackerel, cod ling and haddock. The last two have long formed Shetland's staple articles of export. The other articles are oil, butter, beef, cattle, ponies, and hawtry. The hawtry consists of various articles made by knitting, and since hawtry has ceased to be profitable, may be said to be the only native manufacture. For ecclesiastical purposes Shetland is divided into 12 parishes and education is so generally diffused that writing and arithmetic are generally acquired and the art of reading is nearly universal. The people are deficient in stature and strength, but are hardy and patient of fatigue. Their temperament is sanguine, and more versatile than persevering. Among their moral qualities, hospitality and sobriety hold an honorable place. Their language is English, but their Norse origin is unequivocally indicated by their accent and many of their words, idioms, customs, and superstitions. The antiquities confirmatory of the same origin consist of numerous so-called turpis or fortified posts, standing-stones, and tumuli. Lerwick is the only town and the two chief villages are Salloway and Hallowick, both on W. coast of Mainland. Pop. 81 078.

SHEPHERD (New South) a group of islands, situated to the S. of Cape Horn and forming with it the passage between the Atlantic and the Pacific Oceans between lat. 60° 22' and 67° 15' S. and lon. 44° 58' and 68° 15' W. The group forming an archipelago of numerous islands, without a vestige of vegetation except a species of moss found upon the rocks near the shore while the more remote parts, which are mountainous and apparently volcanic, are covered with perpetual ice and snow was first discovered in 1819, by Mr. Wm. Smith of the brig *Williams* of Mythic, and shortly after was much visited by whalers, who made a valuable harvest, till by their ravages the number of the animals was much reduced. Among the islands may be mentioned *Adelaide*, conspicuous by its range of snowy mountains, with a single peak shooting up into the clouds. *Brigance*, consisting chiefly of a volcanic cone, indicating its activity by the smoke issuing from it, Smith, so called in honour of the first discoverer. *Saddle*, with a peak 1645 ft. high. *Coronation* or *Mainland* the largest of the group; and *Desolation* nearly in the form of a horse-shoe, consisting of volcanic promontories, which are evidently the edges of an extinct crater. These islands, owing to fog and ice, are very dangerous to navigators, and hence Capt. Ross who visited them in 1849, gives to a small group the name of *Unhappy Isles*.

SHEPHERDSTON a vil and par Scotland so Lennox 3 m. E. Glasgow with an Established and a Free church, two schools, manufactures of cotton goods, and a large engineering establishment. Pop. (par), 6584.

SHEVAGUNGA, a tn. Hindooon S. Carnatic, 80 m. S. W. Tanjore. It is a large clean place, adorned with noble clumps of bamboo and other trees, but though long the capital of a Hindu principality, does not possess any ancient edifice deserving of note.

SHEVIOCK, par Eng Cornwall 1827 ac. Pop. 578.
SHASEKOTAN, an Isl Kurile group lat. 48° 52' N ;
 lon. 154° 8' E. It is 12 m long from N to S. S. W. and
 lies 8 m W & W of Chirashima.

SHIEL (Loos), a fresh-water lake, Scotland, which
 separates the co. Inverness from that of Argyll. It is about
 15 m. long, but is extremely narrow. It discharges itself by
 a small streamlet into the sea, near Loch Moidart.

SHIELDS (Yarm and Borty) two tns. England situated
 respectively on the N and S banks of the Tyne near
 its mouth in the German Ocean, and forming the common
 port of Shields—1 (North), A market tn and mun. and parli-
 bur co. Northumberland, 8 m E.N.E Newcastle. It ex-
 tends about 1 m. along the river and consists of an older
 and a more modern portion the former with narrow streets
 and lanes and the latter with spacious streets and squares in
 which many of the houses have a substantial and even elegant
 appearance. The principal buildings and establishments are
 the parish church a handsome modern chapel of ease, Baptist,
 Independent, Wesleyan and New Connexion Methodist
 Quaker, Scottish, and R Catholic chapels national British,
 infant and other schools an elegant courthouse in the Eliza-
 bethan style, a townhouse, subscription library mechanics
 institute, theatre, assembly rooms commodious baths and
 various benevolent institutions, among which the most con-
 spicuous is an asylum for demented master-manners, consisting
 of a small quadrangle of nine houses with a statue of the
 Duke of Northumberland in its centre. The chief industrial
 establishments are building yards, roperies sailcloth hat
 glove, starch and tobacco factories salt-works, a large work
 for earthenware and stained-glass numerous iron foundries,
 a manufactory for steam boat engines, and several forges, in
 which, beside other articles chain cables and anchors are
 manufactured. North Shields unites with Tynemouth in
 sending a member to Parliament. Pop 8682.—2 (South), A
 market tn, market town, opposite to North Shields,
 and communicating with it by a steam ferry. The older part
 consists of long narrow streets stretching along or parallel to
 the river, but the modern part, immediately behind occupies
 a higher site, possesses many handsome ranges of buildings
 and has on its E side a kind of suburb containing many
 pleasant villas. The public buildings and establishments in-
 clude three Established churches, one of them with a square
 embattled tower another with a spire and the third with a
 tower and some fine old mansions belonging to an ancient chapel
 whose site it occupies a U. Presbyterian (Scottish) an Inde-
 pendent, a Primitive Methodist, two New Connexion Metho-
 dist, two Baptist two Presbyterian, and three Wesleyan
 Methodist chapels, a neat and commodious townhall situated
 in a large square near the centre of the town, and partly em-
 ployed as an exchange and warehouse while a range of colon-
 nades beneath serves for a market place; a subscription-library
 a mechanics institute a theatre, national and other schools,
 and several benevolent endowments. The chief manufactory
 are glass earthenware, extensive alkali and chemical works,
 cotton, steam-engine boilers and chain-cables and anchors.
 Ship-building once carried on very extensively has declined
 and the branch of industry is now confined to the repairing
 of vessels. A stone pier of considerable length is being con-
 structed at the mouth of the harbour. South Shields was
 enfranchised by the Reform Act and sends one member to
 Parliament. Pop 28,974.—The port of Shields, includ-
 ing both the above towns and by an expansion of the river
 into a wide bay capable of containing 2000 merchant vessels,
 is of very different access, but admits ships of 300 tons to
 load at its quays, and carries on a very extensive trade,
 particularly in coal from the extensive collieries in the
 vicinity. It has also several vessels engaged in the whale
 fishery. Registered tonnage of the port in 1851, 723 vessels
 carrying 165,613 tons, in 1854 1082 vessels, of 268,748 tons.
 Number of vessels entered in 1844 1224 carrying 226,929
 tons cleared 1047 carrying 165,215 tons. The port commu-
 nicates by railway with all parts of the country.

SHIFFHALL, a market tn and par England, co. Salop.
 The town 16½ m E. by S. Shrewsbury, has an ancient
 church place of worship for Baptists and Independents, and
 a small charity school. Area of par, 11,441 ac. Pop. 6617.

SHIKAMPUR, a village in its N part, 18 m. from
 W bank India at Bokhar and on the high S route from

India into Afghanistan lat. 37° 55' N lon. 68° 45' E. It
 stands in a low plain flooded during inundations of the river
 and is surrounded by thriving orchards, date groves, and
 conge-plumations. Its buildings are very indifferent, and
 streets narrow and very filthy, it has not a single public ed-
 fice worthy of note and two or three mosques, the bazaar,
 which extends for ¼ m. through its centre, and is roofed with
 palm-leaves, with some massive residences of opulent Hindoos
 inclosed by high walls of brick or earth are the only struc-
 tures reaching mediocrity. Its trade is however very con-
 siderable; it is the great entrepot, particularly for banking
 transactions between Kandahar and Herat on one hand,
 Marwar and H. Hindoostan on the other, and Kurrahee, at
 the mouth of the Indus, which forms its port. It has ex-
 tended its dominion in this direction within the last 200 years.
 Some cotton goods and longones or scarfs, esteemed next in
 quality to those of Peshawar are made here, and the place
 has so thoroughly commercial a character that by far the
 greater number of dwellings have a shop attached to them.
 The Route usual from the Indus to Larkhah, passes about
 1 m. S. the town. Pop. 30,000, one third of whom are Ma-
 homedans, and the rest chiefly Seikims and Hindoos.—(Hue

SHIRAZ, s. in Persia, prov. Fars, on a large and beautiful plain, 320 m. S.W. Isfahan. It was almost entirely destroyed by an earthquake in May, 1853 but previous to that event, though much declined from the splendour which it possessed in early times, when it was the Persian capital was a place of considerable importance, with a pop. estimated at about 30,000. It was of an irregular form, surrounded by walls flanked with towers, and entered by six gates. One of these forming the principal entrance, opened upon the vast gallery of a very large bazaar, one of the most handsome in Persia, and several streets, though less spacious, had a very respectable appearance. In general however, the far greater part of them were narrow and winding. The houses, built of brick, seldom possessed any architectural merit. Among the principal buildings were 80 mosques, the only one of which deserving of particular notice was that of Shah Taherak one of the most ancient sanctuaries of Shiraz, and set apart as the residence of impoverished descendants of Malomet, several beautiful mansions including those of the celebrated poets Hafiz and Saadi both natives of the town, and the Ach, or governor's palace situated in the midst of a magnificent garden. Shiraz, advantageously situated on the route from the port of Basra to Kerman, Yazd, and Isfahan, was the centre of a very extensive trade. It had also considerable manufactures of silk and cotton goods, fireworks, sword-cutting glass, earthenware &c. Its lapidaries and enamellers were celebrated throughout all Persia. Its vicinity exhibits the remains of many magnificent buildings, and about 25 m. N. E. are the famous ruins of Persepolis.

SHILLINGTON a township, England co. York in the valley of the Calder 6 m. W.S.W. Wakefield, consisting chiefly of the three hamlets of Middle, Oser and Nether Shillington with two Wesleyan chapels, woollen manufactures, coke-furnaces, and quarries of good building-stone. P. 1968.
SHILLINGTON par. Eng. Bedford 6800 ac. P. 1598
SHIOA (Kinsanow) formerly a prov. of Abyssinia, now an independent state the E. portion of which is known by the name of Sida. It is situated in the S. part of Abyssinia, lat. 9° to 10° 50' N. lon. 38° to 41° E. but its S. and W. boundaries the former at one time marked by the Hawash are merely nominal being from time to time pushed further and further into the adjoining countries.

Shoa forms a series of plateaus at least 8000 ft. above sea-level. It is traversed by five mountain-chains, chiefly bearing N. and S. with spurs E. and W., with a nearly uniform rapid ascent. The loftiest summit is Mount Mitata in the vicinity of Ankobar, the capital. It attains an elevation of 10,738 ft. above sea-level, and overlooks a plain of nearly 5000 ft. of absolute height. The mountains are most abrupt and difficult of ascent, and between them are sometimes found chains of a depth that admits the sun but a few hours. Canyons are met with some of them 700 ft. high. The rivers, in some cases, descend 6000 ft. in the space of 500 m. In that part of the kingdom called Sida, the hills are more rounded, and their slopes are highly cultivated, yielding large crops of grain, chiefly wheat and barley of the former of which there are never than 34 different species in Shoa. In the lower and warmer districts, cotton is extensively cultivated. The table-lands of Shoa, are used chiefly as pasture-

grounds, though they have a deep black soil of great fertility. They are destitute of wood, and their climate is cool and healthy though often extremely cold. The valleys and more gentle acclivities throughout the whole kingdom are well cultivated, and productive to an extraordinary degree, every species of crop attaining the most gigantic dimensions. The soil generally consists of decomposed basalt, the large supplies of moisture which this kind of soil requires descending copiously from the mountain sides. The valleys of Shoa are generally exceedingly beautiful, being finely wooded, and filled with a luxuriant vegetation but in summer they are insufferably hot, close, and unhealthy, and at the termination of the rains a fatal fever sets in, compelling all who can to seek a purer atmosphere in the higher regions. Amongst the trees peculiar to this country is the gigantic *Jessera* acacia, which attains a height of 160 ft. and a diameter at the base of 4 ft. to 6 ft. in the course of a century. The other principal forest trees are the yew *Taxus* *alagoa* usually about 60 ft. in height and the *Olea spectabilis* 60 ft. to 80 ft. in height.

Since the reduction (about 1840) of the savage Galla hordes by which the kingdom of Shoa was frequently attacked, the trade of the country has greatly increased and a demand for European goods and manufactures has arisen. The resources of the kingdom are great, and its position favourable for opening an intercourse with the interior of N. E. Africa. The nearest port to the E. frontier is Zeyla or Zeila, on the Sea of Bab-el Mandeb distant in a straight line about 150 m., but by the usual route through Ess-Bonassil and Harree, about 200 m. Some traffic is carried on, also through Boreh likewise on the Sea of Bab-el Mandeb and distant about 300 m. The principal exports, being the production of the country are grain and a coarse but warm and durable cotton cloth manufactured in large quantities on every farm. To these might be added the productions of the countries around a few being those of Shoa also, namely cotton, gold-dust, very precious gums and spices, including ginseng, nutmeg, medicinal pultry civet sulphur coarse parchment, dye-woods, medicinal plants hides, sheep-skins &c. The imports most in demand are broad-cloth blue and scarlet, bright shayes of high colours long-cloth, white shawl-tarant, Muslin pique books, well bound woollen rugs, kumbe coloured silk-tissues, the deepest blue glassware gilt gillion buttons, black pepper and cloves amber and coral beads, spectacles and scissors knives of all sorts, sword blades and spear-heads, guns and pistols coloured leather crumens and green porter shoe and brass, coloured sheep-skins, crimson peacocks, iron cooking pots of all sizes, blue silk cord and of deepest blue razors and mirrors imitation jewellery ear-rings, &c. The king's duties are 10 per cent. on all exports and imports, while several of the former including gold dust, ivory and sulphur are royal monopolies. The royal revenues, independent of tribute in kind, are said to amount to about £18,000 or £13,000 accruing chiefly from import duties on slaves foreign merchandise, and salt. The annual expenses of the state are estimated at about £1600. The few tribes of Shoa include working in iron brass, and silver tanning weaving and making rude earthenware. Weekly markets are held at several places in Shoa, where goods of every description are exposed for sale. The principal of these is Ali Ambel, near Ankobar the capital the only other important town is Anguella.

Christianity appears to have been introduced into Shoa in the third century and continues still to be pursued though in a distant form—mixed up with Judaism, Mahometanism, and paganism—by a large number of the inhabitants. The head of the Shoa hierarchy is entitled Abome, in whom alone is vested the power of ordination he is appointed by the Patriarch of Cairo, who receives about £1000 at each appointment—a large sum of money in such a country, and rendering the life of the Abome especially precious. The clergy are very numerous, and form the most enlightened class of the community. They comprise priests, monks, and the corporation of *deferas*, the last of whom supply the services, the singers, the masters of ceremony and the directors of the temporal goods of the church. The priests may marry once, but the monks are tied down by very strict vows. A layman may marry four times, but not a fifth. Churches are numerous, for whoever builds one believes he has pur-

chased pardon for all his sins; but they are buildings of no architectural pretensions, being, like the ordinary houses, circular edifices surrounded by a conical roof. Morality is at a low ebb, and filth and dirt prevail in every dwelling. The bulk of the nation is agricultural, but every Christian subject is compelled, under a penalty to follow his governor to the field whenever summoned. From the king to the peasant, the costume of the men consists of a large loose web of coarse cotton cloth enveloping the entire person in graceful folds, but well-nigh insulating the wearer from external

SHOODIC, a series of lakes, U States, in N of St Washington, state Maine. The most E. of them, called the Big Lake, is about 9 m. long, and discharges itself by a very rapid stream into Grand Lake, which is a beautiful expanse, 15 m. long, very deep and clear, and well stocked with fish. The other more considerable lakes are the Black-dub-as-Po, Hovee Shon, and Pleasant. Between and through these lakes there is a navigation of nearly 100 m., interrupted only between the Big and Grand Lakes.

town, port, part bar and par England,

on Sussex, 6 m W by N Brighton, near

the mouth of the Adur, here crossed

by a suspension-bridge, and on the

London and South-coast railway. It

consists for the most part of irregular

streets and old houses, but has recently

been much improved and is paved and

lighted with gas. The principal build-

ings and establishments are an ancient

parish church, presenting an interest-

ing specimen of Norman architecture.

Independent and Wesleyan chapels,

two endowed grammar national, and

infantschools, an elegant custom-house

in the Grecian style, a museum, con-

servatory and theatre. The harbour

is encumbered by a bar with 14 ft. to

17 ft. water and was used for some

time by the steamers in connection

with the above railway. The steamers

have been removed to Newhaven, but

Shoreham still continues to carry on

CHRISTIAN WARRIORS OF SHOA.—From Harter's Illustrations of the Highlands of Shoa.

ton. The sword, the spear and the buckler are the national weapons. The first, barely 2 ft. long and rather resembling a sickle than an implement of war is firmly grided to the hilt of every male, and protrudes inconspicuously behind. A cloak of prepared lion tawny, or camel skin is added by the better classes on the journey, or on the foray, but shoes or sandals are unknown. Meals are taken twice a-day and new flesh forms the grand aliment of life, the most sovereign comfort being entertained for all who employ a culinary process. The bull is thrown down at the door of the eating-house, its head nearly severed from its body, and no sooner is the brain out of the carcass than the raw and quivering flesh is heaped round to the banquet. Sour bread made of tef, barley and wheat, is eaten with a stimulating potage of onions, red pepper and salt. Various intoxicating beverages are partaken of, till intoxication, brawling and fighting ensue. The Christian population of Shoa and Effat are situated at 1,000,000 souls, and that of the Mahomedan and Pagan population of the numerous dependencies at 1,500,000.—Harris, *Highlands of Ethiopia*. *Moctet d'Hercourt, Voy dans le Royaume de Choa*.

SHOAL BAY a bay New S. Wales 845 m N W Port Jackson lat. 29° 25' S. It receives the waters of the Clarence. Steamers ply between this bay and Sydney.

SHOALHAVEN a river, New S. Wales, which flows N E then E and falls by a broad estuary into the Pacific, 10 m S.S.W. Sydney. In the upper part of its course it is nearly on a level with the surface of the surrounding country, but afterwards flows through a rocky ravine, about 1500 ft. deep. It is navigable for about 20 m. for vessels of 70 tons to 80 tons.

SHREWSBURY a market tn. and mun and parl bor England, cap. Shropshire, pleasantly situated on two eminences of a peninsula formed by the windings of the Severn on the Shrewsbury canal and on the Shrewsbury and Birmingham railway 128 m. N N W London. It is very fertile, and consists of several handsome modern houses, intermingled with a much larger number of inferior description, generally of wood, and often of very picturesque appearance. Part of the ancient walls still remains, and the communication across the Severn is maintained by two bridges, one of them a handsome structure of seven semi-circular arches. The other structures and objects deserving of notice are the remains of the castle, which figured much in the wars between the English and Welsh, and is still conspicuous by its keep, though modernised; the abbey church, so called because originally attached to a magnificent Benedictine abbey and still though deprived of its original character by alterations, presenting several features of ancient grandeur; St. Chad's church, a handsome circular edifice in the Greek style, with a rustic tower, St. Mary's, of ancient date with a lofty and finely proportioned spire, two other parish churches, Baptist, two Independent, Wesleyan, Primitive, New Connection, and Welsh Methodist. Sandemanian Unitarian, and B. Catholic chapels; a royal free and richly endowed grammar-school, British national, and other schools; a spacious and handsome town and shire hall elegant public rooms, an ancient council house with richly ornamented wooden gateway a white-hall equally ancient, a column in honour of Lord Hill barracks, assembly rooms, a theatre, a mechanics institute, a natural history and antiquarian society, with a museum and library an agricultural society a public library an ancient market house, a lunatic asylum and a jail and house of correction. The chief manufactures are thread, linen yarn, canvas large castings and white important works in iron, brass, tin, brass and steel. As the principal depot for Welsh cloth and blankets the town commands a considerable trade, and the salmon fishery of the Severn is valuable. Beside two weekly markets, one of them for corn there are monthly fairs. Shrewsbury appears to have become a place of importance shortly after the departure of the Romans, and in the time of Alfred ranked as one of the chief cities of England. In the reign of Canute it suffered severely in 1016, for having espoused his cause in preference to that of Edmund Ironside. At the time of the Conquest, William bestowed it with most of the shire on Roger de Montgomery who was created Earl of Shrewsbury and built his strong castle, as well as a wall across the isthmus of its peninsula. Standing on the Welsh frontier it was often exposed to the incursions of the natives, and became so important as a military station that Edward I made it his temporary residence in 1277 removing the courts of king's bench and exchequer to it, and in 1288 assembled a parliament in it. Another parliament met in it under Richard II in 1397, and in 1403, the famous battle, which ended in the defeat of Hotspur and the Scotch sort of Douglas, his ally by Henry IV. was fought in its vicinity. During the wars of the Roses, Shrewsbury took part with the house of York, and was the asylum of the queen of Edward IV. when she gave birth to the prince Richard and George the former of whom, with his elder brother was afterwards ignominiously murdered by his uncle, Richard III. During the parliamentary war it was zealously advocated the cause of Charles I, and suffered severely in consequence having been taken by storm. Still its loyalty was unshaken and it afterwards made repeated attempts in the royal favour. Shrewsbury is a bor by prescription and sends two members to Parliament. P 10,661

SHROPSHIRE, or Shropshire an island co. England, bounded N. by Cheshire, the detached part of Flintshire, and a corner of Denbighshire W. the latter county, and the co. Montgomery and Radnor E. Hereford and Worcester and M. Stafford Area, 859,650 ac. of which nearly 750,000 ac. are supposed to be arable, meadow, and pasture. The surface is extremely varied—in some parts rugged and mountainous, in others comparatively level. The highest summits attain elevations of from 1000 ft. to 1728 ft. above sea-level. The new red sandstone occupies the whole N. portion of the county, and the old red sandstone a considerable part of the S. division. Another portion comprising about one-fourth of its surface is composed of the stratified rocks of the Silurian and Cambrian systems. The principal mineral products are iron coal lead limestone, and freestone. Some of the coal-fields are very extensive, and very productive. The soil is various, but generally fertile, and is on the whole well cultivated although there are extensive tracts of waste-land, and considerable portions of the elevated districts too barren or rugged to admit of cultivation. The principal crops are wheat, barley oats, peas, vetches, turnips, potatoes, and beans. In the S. and W. breeding and dairying are carried on to a considerable extent. A good deal of cheese is made, and large flocks of turkeys are raised. The manufactures include that of iron to a very great extent chains, wire, carriages, gloves, and flannel. Shropton returns 11 members to Parliament—four for the county, and two for each of the boroughs of Shrewsbury Dringden and Winkles and one for Ludlow Pop. 229,941

SHIJABAD a to. Punjab & bank Chenab 80 m. E. by W Multan. It is large, and its lofty and irregular fortifications give it externally a very unusual appearance. It has a good harbor, and manufactures of cottons, and turn-d. wares of a superior kind. It was taken by Lieut. Edwards in his advance to Multan in June 1849. Pop. 4500.—(Dunlop Gen. Jour. ix. 69 &c.)

SHIJANTOOL, a small tn. Punjab of about 500 houses, 8 m. E. Attock lat. 33° 53' N. lon. 72° 26' E. It is remarkable for a spring of mineral water, and a place of accommodation for travellers built near it by one of the Mogul emperors.

SHILAH a tn. European Turkey, Bulgaria in an extensive basin enclosed by lofty hills of the Balkan range, 133 m. N N W Constantinople. These hills, which present steep faces, particularly on the S. side of the town and also on the N. being the valley immediately beyond them form a kind of natural ramparts, to which much additional strength has been given by a series of outworks, particularly on the E. where the hills though lower, are from their steepness and position well adapted for this purpose. In this way the heights around Shilah form an entrenched camp which if at all defended, cannot easily be forced but which at the same time, from its extent requires a very numerous force to defend it. In addition to the fortifications on the heights, the nearer approaches to the town are protected by several strong redoubts and batteries, and also by a citadel, which occupies a very commanding position and is in excellent repair. Owing to the strength of these works, a regular war appears to have been considered unnecessary, and the only thing of the kind which Shilah possesses is an earthen rampart and fosses, confined to its E. side. There is little in the town itself to attract much attention. It is for the most part indifferently built; but has a large square, really the scene of much activity several handsome mosques, beautiful baths, and the magnificent mansions of the grand vizier Djemal-Hassan-Pasha. The most conspicuous modern build-

between lat. 11 and 14° N., and the mines in the island of *Raiang*, off the W. coast, are perhaps scarcely less productive than those of Benom. Gold not less extensively, though far less abundantly diffused than tin, is obtained in tolerable purity, but the amount obtained is insufficient for the home supply, owing to the great quantities employed in gilding temples and images, and it is accordingly imported from the Malay countries. The most abundant of all the metals in Siam is iron, which is extensively wrought in the lower districts, on and near the upper waters of the Menam. Cast-iron has been sold at Bangkok for a dollar and a half (½ Ba.) the pond of 133 lb. Copper and lead are wrought to some extent chiefly by the mountain-tribes, and both zinc and antimony are found to the E. of the Menam. The last-named metal is raised for the use of the Chinese in smelting iron. The sapphirine, oriental ruby, and oriental topaz, are found in the hills of Chantim, (lat 18 40') on the E. side of the gulf, where they are obtained by digging up and washing the alluvial soil. The mines yielding these are a monopoly of the king.

Population.—Rice (called *iso-ann*) and maize are the grains most extensively cultivated. The former, sold at less than 2s. per cwt. is exported in large quantities, principally to China, but none of the latter is exported. Of the tropical frumaceous roots, the Siamese raise the usual varieties, and among others the sweet potato. Coconuts and areca-palms are numerous, especially the former in the lower districts, and the oil is extensively exported. No part of the East is more celebrated for the abundance and quality of its fruits. The mango, mangelstein, leeches, durian, rambutan, pomegranate, papaya, guava, pine-apple, and, in short, all the fruits of S. China and Hindoostan, the Indian islands, and tropical America, are luxuriously abundant, and of exquisite quality. The cultivation of the sugar-cane (a product known here in its natural state from time immemorial) was introduced by the Chinese in 1812, and ever since an important article of export to China, British India, &c. Blackpepper of good quality to the extent of about 7000 cwt. annually is raised in the province of Chantimban, and mostly exported to China. Tobacco, formerly imported from Java is now raised throughout the country and exported to Cochina-China and several of the Malay countries. Cotton of several sorts is grown and largely exported to the island of Hainan in the China Sea. Gardamoms are plentifully obtained in royal preserves strictly guarded, and the produce is sent principally to China. A gum, resembling benzoin, grows spontaneously in the forests of Laos, and is cheap and abundant. Camboja is yielded by a species of *Garcinia* in the forests on the E. coast of the Gulf of Siam, and in the Siamese portion of Cambodia (whence its name). In the same districts also are procured large quantities of scented agila or aloes wood which is both much used by the natives, and sent to the Chinese who employ it for sacred purposes, and use it in their private and public temples. Sappan-wood is procured extensively from the forests between lat 10° and 15° and in point of quantity it forms the most considerable of all the Siamese exports. It is sent principally to China, but also to Bengal and Europe. Excellent teak-timber abounds in the forests of Upper Siam, and is much used in the construction of junks and temples, but very little is exported. Crawford also mentions a forest-tree, producing a valuable wood of a red colour fine-grained, admitting a good polish and called *pa-roon* by the Portuguese, which is exported and largely employed by the Chinese in cabinet-work.

Animals.—Among quadrupeds animals are the tiger and leopard, the bear, otter, musk-deer, the cat and the dog, both wild and domestic. Porcupines, squirrels, rats, and mice are common. The pangolin is found in the forests and its scaly skin is sold to the Chinese, who esteem it for its medicinal qualities. The orang-outang and other species of apes are pretty abundant. Among the ruminating quadrupeds are found seven species of deer, the sheep, goat, ox, and buffalo. The horses are of small size (under 15 hands), and are not much reared by the natives, those in use being principally procured from Kuran in China. The hog exists abundantly in the forests, and is domesticated by the Chinese residents. The single-horned rhinoceros is met with in unusual numbers, and is hunted for its hide and horn, both of which are exported to China. The principal beast of the Siamese, however, is in the high perfection of their elephants,

which here attain a size and beauty elsewhere unknown, and are held in high esteem throughout India. They are freely used both for riding and as beasts of burden, except at Bangkok, where their use is expressly limited to persons of high rank. A very great additional value is set on white elephants, evidently albinos, which when captured become the property of the king. Alligators, deer, monkeys, and even tortoises, are by no means uncommon in Siam. Among the birds, the water-birds and vaders are by far the most numerous; geese, ducks, boobies, cormorants, king-fishers, storks, and pelicans are frequent in the forests abound with psonates, pheasants and pigeons, and in the islands are large flocks of moths and sea-swallows, the latter producing the famed edible birds nests. Crocodiles, crocodiles, and other kinds of lizards, tortoises, and green-turtles are numerous, the last of which, as well as their eggs, are in great request among the Siamese as an article of food, and from their sale add not unconsiderably to the royal revenue. The bee-honey of Siam attains an immense size, and there are many species of snakes. The fish of the Menam are abundant, but of inferior quality. The only insect in Siam worthy of notice is the *Coccus lacca*, which produces the valuable dye and gum, the lac of commerce.

Population.—The population includes, besides the native aboriginal Siamese, who comprise the *Tha-na-so*, or lesser, inhabiting the low country, and the *Tha-na-so*, or greater, a tribe of mountaineers, vast numbers of emigrants from other countries, Laos, Cambanga, Malaya, and several half-civilized mountain-tribes with numerous foreign settlers, Chinese, Mahomedans and Hindoos from W. India, Peguans and Portuguese. Crawford in 1822, and Mr Roberts, American ambassador, ten years later, estimate their numbers as follows—

CRAWFORD 1822.		ROBERTS, 1830.	
Siamese	1,320,000	Siamese	1,000,000
Laos	640,000	Laos	1,000,000
Leguans	8,000	Malay	200,000
Cambodia	45,000	Chinese	500,000
Malaya	195,000		
Chinese	440,000		
Hindoo, &c.	5,000		
Portuguese	2,000		
Total	2,790,000	Total	2,500,000

By both authorities, however the numbers of the Chinese settlers are perhaps considerably underrated for besides 800,000 resident at Bangkok, they are dispersed all over the country, forming almost exclusively the miners, sugar-mill factors, artisans and merchants of the entire kingdom. In 1850 Mgr J. Baptiste Pallegoux, Evêque de Malles (*Hall Soc Geo* 1852), estimates the total population of Siam at 6,005,600 of which he claims 50,000 as belonging to the R. Catholic faith.

Physical Character.—The Siamese, in common with the Laos, Cambodians, and Malays, are members of the great Mongolian family and of the same race as the people of Burmah and Assam in stature they do not average more than 5 ft. 8 inches in height, and in personal appearance *legis Malacca*, i. e. 1450 they come behind any nation I have yet seen especially the women, among whom—and thousands more under my notice—I never saw one who was comely. They have a lighter-coloured skin than the W. Asiatics, but darker than the Chinese, and all classes delight in heightening their complexion by the use of turmeric. Owing also to frequent bathing their skin is remarkably smooth soft and shining. They are inclined to obesity have large lower limbs, and stout long arms, yet they are by no means a strong or robust people. Their faces are broad and flat, with round prominent cheek bones, a small nose obtusely pointed, and rather hollow at the bridge, a large mouth with rather thick lips, the lower jaw long and square at the back, small black eyes a low forehead, and very sandy hair. Their hair is always black, thick, coarse, and lank, worn close by both sexes except from the forehead to the crown, where it is about 3 inches long and made to stand erect. Both sexes wear the hair alike, and would scarcely be distinguishable, but that the men are better-looking than the women, who are generally very fat, with stout legs and arms and enormously large mouths.

Habits and Manners, &c.—The costume of the Siamese is very simple, consisting in both sexes of a cotton or silk cloth of dark colour wrapped around the body, with the end passed between the thighs tucked in at both ends, and descending below the knees. They reject ornaments in the nose or ears, and

wear no jewels, but are fond of bangles, bracelets, and necklaces, and they almost cover their children with gold and silver chains, armlets, and anklets. They use no turbans but in the sun wear a light hat made of palm-leaves. They universally stain the teeth with an indelible black dye, and the better classes, like the Chinese, permit the finger-nails to grow to an enormous length. Malacca describes the Siamese as chiefly mean, ignorant, conceited, slothful, servile, mendacious, and deceitful added to which, though very quarrelsome, they are cowardly, and exhibit a national vanity more repulsive even than that of the Chinese. They are, however, temperate and abstemious by no means revengeful obedient to the laws and strongly attached by their domestic ties. The women are not ill treated nor confined, as in some other countries, where polygamy is common but still they perform most of the labour of the field, work the looms on the river as weavers, &c., and are extensively employed as retail traders. Those of the higher class spend their time in idleness and sleep. Slavery prevails throughout, many of the chiefs having hundreds and some thousands of slaves. A slave trade is regularly carried on along the Burmese frontier and the Cambodian provinces are periodically invaded by large bodies of Siamese kidnappers. Slaves are sold by their creditors, wives by their husbands children by their parents and some even sell themselves but of the aggregate number of slaves in Siam it is impossible to form an approximate idea. With regard to food, rice is universally the staple article, mixed sometimes with balachong and dried shrimp or other small fish. The natives also freely partake of a meat-diet as beef, poultry, &c. The principal amusements of the Siamese are dramatic representations, singing, playing on rude musical instruments and looking at the feats of dancers and tumblers. Playing chess is a favourite pastime as are all kinds of gambling, firing kites, shuttlecock, and cock-fighting. **Literature, Literature, and Education.**—The Siamese language is exceedingly simple in its construction, and forms a connecting link between the Chinese and Malay, and is easily acquired by foreigners. The alphabet consists of thirty-six consonants and twelve vowels and the written characters, like the Burmese and Legman resemble the Pali and Sanscrit. The roots are few in number—all monosyllabic and there are no terminations to indicate gender number person, mood, or tense. The literature is meagre uninteresting and in point of imagination and force of expression, much below the Arabic, Persian, or Hindoostanee style is simple and literal, but by no means perspicuous and the compositions except epigrams are wholly trivial consisting of songs, romances, and a few characters but the Siamese have no written dramas, nor any history beyond the dry chronologies of their kings. Education is confined to a very limited extent few can do more than read and write awkwardly and perhaps cast accounts.

Arts, Manufactures, &c.—The Siamese have made but little progress in the useful arts. House-carpentry canoe and junk building manufacturing pottery and coarse cutlery, leather dressing, and the construction of musical instruments, are their chief mechanical employments. A few rude hand-loom are in operation, chiefly by women, but the fabrics, whether of silk or cotton, are of very coarse quality. Their domestic architecture is in an equally rude and backward state—the houses of the lower orders being formed wholly of wood or bamboo, roofed with palm-leaves, and mostly raised on piles, as in the rest of ultra-Ganges India. A few only in the capital are built with brick and mortar. Many of their houses, too are constructed on boats which abound on the river near Bangkok, of the arch they are wholly ignorant. Roads they are ignorant and wheel-carriages are all but unknown. On their religious edifices, however, the Siamese bestow abundant labour and expense these are constructed of solid masonry and covered with tiles, having all the wood-work laboriously carved and gilded, and filled with carved and stately gilded images of Buddha.

Trade and Navigation.—Siam has a most extensive trade both inland and overseas, as well as foreign. Every province of the kingdom produces some article in foreign demand, and Bangkok, from its situation on the Menam, has become the great centre of all its commerce. The principal articles brought down from the higher provinces are rice and paddy cotton, teak-wood, and sappan-wood, lac, benzoin,

ivory, and bees-wax, while the districts E. and W. of the Menam furnish gamboge, cardamoms and sugar the Malay provinces the rice, cotton &c. The foreign trade is conducted chiefly with the 8 ports of Annam, Java, Singapore, Palembang, &c., and occasionally with British India, the U. States, and Britain. Of these however, the most important is China, the trade with which employs 300 to 350 junks annually, having an aggregate burden of about 25,000 tons—mostly built in Siam by Chinese, who also are their exclusive navigators. The junks make one voyage annually, leaving the Menam in June, and returning in December. Their outward cargoes comprise sugar pepper and cotton, spices, tin, cardamoms, agilis, and sappan wood, sandal and other woods for cabinet-work, ivory and horn, lac, wax, betel-nuts, salt-fish hides and skins, feathers, and edible birds nests, for which they bring back in return pottery and porcelain, quinquina, tea, lac, dried fruits, vermicelli, raw and manufactured silks, bankens umbrellas, fans, and many minor articles. The exports to Europe and the U. States comprise sugar and pepper lac benzoin, and gamboge, tin, cardamoms, ivory, horns and hides, and with other minor articles—the imports, all kinds of textile fabrics, shawls, cotton-umbrellas, iron and steel goods, steel bars, lead and spelter, earthen and glass ware all kinds of hardware and cutlery, with firearms, muskets, &c.—the trade being carried on, of course, in foreign vessels. In 1855 a commercial treaty was concluded with Siam by Great Britain, and since then a considerable import and export trade has sprung up, chiefly through the port of Bangkok, rice forms an important item of the exports.

Money.—The only coin of the Siamese are silver—severely small bars of silver rounded at the ends, and stamped with a die on one side to represent the value, cowries are used for small change, and are the ordinary medium of traffic—400 cowries make a phea, 4 pheas a fuang, and 8 fuangs a taal or lot, which is equal to about 2s. 6d. English money. For weights they use the *phai* and *sat*—the former = 133 lbs., and the latter = 22 lbs. British.

Government, Army, Navy and Revenue, Laws, &c.—The government of Siam is a thorough despotism, subject to no restraint, except the apprehension of popular tumult or foreign invasion. The king, therefore, is considered almost, if not altogether in the light of a deity, and addressed as such, his most common designations being 'Sacred lord of lives' 'Owner of all' 'Most exalted and infallible lord, &c.' The sovereign, however appears to admit some share of dependence on the Emperor of China, to whom a periodical tribute is sent. Next in rank to the king, but immediately below him, is the *prince* or *vicerey*, one of the most exalted princes, chosen by the king at his accession, to assist him in his duties, and under this officer is a supreme council of ministers undertaking the different departments of government. There is neither hereditary rank nor aristocracy in Siam and the people generally seem to be more slaves, subservient in all things to the pride and caprices of the sovereign. Indeed every adult male Siamese is compelled continually to give a third of his time in the king's service, though he usually pays him an exemption-tax, or *phai*, in substitution. There is no standing army but every able-bodied male is liable to be called into the field by the mere will of his chief. Good brass-cannons some of them very large, but seldom with proper carriages are made, and mortars are imported. At Bangkok there is the semblance of a respectable navy consisting of scores of war-junks, galleys, and other vessels of various sizes, built on the Cochinchinese model, and mounting heavy guns. But the Siamese are no sailors, and when brought into service, these vessels are manned by the Portuguese population, and officered by Chinese or other foreigners. The government revenue is derived from several sources—1, a poll-tax, 2, a tax on spirits distilled from rice, 3, license-duties on fishing and gambling (both offences against the religion); 4, a shop-tax, 5, monopoly trade-rights from the sale of tin, ivory cardamoms, agilis wood, sappan-wood, gamboge, edible swallows-nests, and turtles-eggs it, imports on external trade, both import and export, 7, a land-tax; 8 tribute from dependent states—the whole amounting in 1855 to about \$2,145,000. The military and civil governments are also judges and magistrates, and decide cases subject to appeal to the provincial vicerey. There are written laws, which are made, altered, or amended at the sovereign's

will, but apparently generally formed on the Chinese model. Offenses are punished, as in China, by a very liberal and indiscriminate application of the bamboo. No distinction is made between offenders, even should they be priests, nor are pecuniary compositions for crimes allowable.

Religion.—The Siamese profess Buddhism of a very degraded kind, introduced into the country about the middle of the 7th century. The priests are called *talapossas*, and it is compulsory on every man to devote the early part of his life to the sacred office. The regular priests live together in large monasteries called *ayoutas*, near the temples, divided into six grades and acknowledging the direction of a superior above them all is the *San-krai*, or high-priest, who is appointed by the king, and ranks next to him in spiritual authority. The priests, unlike the laity are always fully and respectably dressed in yellow robes, like those of Ceylon and other Buddhist countries. The moral code of the religion is comprised in five negative precepts—1. not to kill (which extends to animals, plants, and even seeds); 2. not to steal; 3, to commit no impurity; 4, not to tell falsehoods; 5, to drink no intoxicating liquors. Little attention, however, is paid to any of these, except by the priests, it being the business of the laity to am, and of the *talapossas* not only to be holy themselves but by their holiness to expiate the sins of the people. Their ordinary religious services are carefully performed and with little attention to decorum, but they have many occasional ceremonies of an impressive character among which are their funerals or burnings of the dead, whose ashes the survivors usually form into little gilded statues of Gaudama. A Protestant mission from America was established in 1853 and a printing-press, under the superintendence of these missionaries is in operation.

History.—Siam appears to have no place in history prior to A.D. 638 and the credible records go back only to 1350 the date of the foundation of Ayuthea or Yuthea, the old capital. In the same century the country became for a considerable period tributary to Cambodia. The first notice of the Siamese by European writers is an account of an overland expedition against Malacca in 1502. In 1612 an English ship ascended the river as far as Yuthea, eight years after which, the Portuguese went further than first missionaries. In 1683 Constantine Phaulkon, an enterprising Greek, became prime-minister, and like Shing Antran in Cochin China subsequently introduced a respect for European customs and notions. Mutual embassies were at this period sent between Siam and the court of France, with which Phaulkon intrigued to bring about a revolution. The discovery of this, however, led to his downfall and death as well as the expulsion of the French. Contests for the throne distracted the country from 1690 till 1759, during which interval Alompra, the victor and founder of the present Burman dynasty seized Merga Tavoy, and Martaban, and overran the whole valley of the Mekong. During the war some of the principal cities moved to Chantabun province, on the E. side of the Gulf of Siam, and thus escaped the presence and exactions of the Burman armies. Among these was Pyo-pa-tak the son of a wealthy Chinaman, by a native woman, who gradually gathered followers, and made successful resistance to the new dynasty till at length he drove the Burmans from the country and assumed the throne. With a view to commerce he made Bangkok the metropolis, instead of Yuthea. The kingdom is stated to be now larger and in a better state than ever. The Tenasserim provinces are indeed lost; but his dynasty has also recently become possessed of one of the most rich and fertile sections of Cambodia, embracing the rich province of Battambang, conquered and retained in 1809 and recently also it has acquired dominion over the N. Malay states of Kedah, Patani, Ligor &c.—(Crawford's *Embassy to Siam and Cochin-China*, Roberts' *Embassy to Cochin-China, Siam, and Malacca*, Malcolm's *S. E. Asia*, Finlayson's *Mission to Yuthea*, Milne's *Mission*, Gifford's *in Roy Geo. Journal*, Moor's *Asiatic Archipelago*, Chantabun Repository, Berghaus's *Ritter's Redlands*, Richardson's *Mission to the Court of Siam*, *Four Asiat. Soc. Serail*, Anderson's *Trade of the Peninsula*.)

SIAMPA, or Chantabun, a country. See AYUTHEA.

SIANO, a Naples, prov. Principato-Citra, 7 sq. M. N. W. Salerno. Pop. 8000.

SIANU, a vil and com. ad. Sardinia, div. Sassari, on a slope near Sora. Pop. 1340.

SIAS, an Indian Archipelago. See SAUW.

SIAS, a river, Russia, issues from a lake in gov. Novgorod; flows N. N. W., and falls into the S. shore of Lake Ladoga, 9 m. S. E. N. E. Nova-Ladoga; total course, about 180 m.

SIATUV, SAUW, or SAU, one of the Sangre Is. Indian Archipelago about 50 m. off S. E. point of Ilo, Cebu, Is. (S. E. point) 2° 25' N. lon. 123° 27' E. (a). It is about 34 m. in circuit and at its N. end is an active volcano. On its E. coast, at the village of Ooloo, is good anchorage, protected by a number of small islands. SAUW is fertile, but uncultivated by its indolent inhabitants, and consequently yields only coconuts, oil, and a kind of indifferent earth nut. Pop. 8000.

SIATWSK, or SIATWAS, a ta. Russia, gov. and 75 m. S. W. Orel, on the Bera and the Lake Marsha. It contains three stone and two wooden churches, and two monasteries, in one of which the Bishop of Orel once had his palace and his manufactures of earthen and stone ware, paint and verdigris and a considerable trade in corn and hemp. Pop. 5000.

SIBBERTOFT, prov. Eng. Northampton, 2048 ac. P. 876.

SIBBERTSWOLD, or SIBBERTSWOLD, prov. Eng. Kent, 1838 ac. Pop. 428.

SIBDON, LANWORTH, prov. Eng. Salop, 1090 ac. P. 80.

SIBERIA, a large section of the Russian Empire occupying the whole of N. Asia between lat. 45° and 78° N. and lon. 60° and 180° E. It is bounded, N. by the Arctic Ocean, E. the Sea of Kamisharka and the N. Pacific Ocean, S. the Sea of Okhotsk, China, and Independent Tartary and W. Russia in Europe greatest length from W. to E. about 4800 m. greatest breadth, about 2000 m. estimated area, about 5,517,666 English sq. m. Its administrative divisions, with their separate population are exhibited in the following table—

DIVISIONS AND POPULATION OF SIBERIA

GOVERNMENTS—	Population 1864
Tobolsk	1,221,906
Tomsk	984,511
Jambsuk	394,280
Irkutsk	21,936
FRONTIERS—	
Trans-Baikal	11,000
Yakutsk	11,360
Amur	41,000
Verkh	38,476
Chita	17,411
Blagovest	800,100
Orenburg	4,770,928
Total	4,770,928

This immense territory has much less diversity of surface than might be presumed from its extent. Assuming the meridian of 103° as a line of demarcation, two regions will be formed—a W. and an E., exhibiting a very marked difference in the configuration of their surface. Both regions have their greatest altitude in the S. and may be considered as a vast inclined plane, sloping gradually N. to the Arctic Ocean, but the E. region is traversed in different directions by several mountain-ranges, whereas the W. region with the exception of the chain of the Ural on the W., and that of the Altai on the S. frontiers, forms a vast plain almost unbroken by any greater heights than a few hills and the banks of the rivers which wind across it. This plain towards the S., has a height of about 3000 ft. above the sea, but towards the N. or as near its level as often to become almost inundated. For convenience of description, it has been arranged, according to its productive powers in four divisions—the steppe or pastoral, the agricultural, the woody and the moorland or tundra. The steppe, occupying the most elevated part of the plain extends from the S. frontiers N. to lat. 55° and from the W. frontiers, within these limits E. to the banks of the Irutsk. The greater part of it consists of what is called the steppe of Irutsk, and has a bare and almost sterile surface, often incultivated with salt, but also occasionally covered with a scanty vegetation and sometimes even enriched by means of green pasture, over which the nomadic tribes roam with their flocks and herds. The agricultural division extends N. to lat. 60° though its exact limits cannot be more properly defined by a parallel of latitude, since they more properly form a waving line encroaching or encroached upon by the

other divisions, according as the configuration of the surface and properties of the soil are favourable or unfavourable to agricultural operations. In many parts, where it borders on the steppes, it has much of the same character, and has only occasional tracts which have been or can be advantageously brought under the plough and in many other parts, as the same vegetative power which may be employed in growing corn naturally grows trees, and several forests are often found, but still the term agricultural is properly applied to it, as it is only within its limits that agriculture is successfully prosecuted on an extensive scale, and occupies a considerable proportion of the inhabitants. The division thus named has an extent more than double that of the British Islands, and under favourable circumstances, might furnish subsistence to a very large population, but, as yet, it is only the more fertile alluvial tracts adjacent to the rivers that have been brought under anything like regular culture. Within this division, though not properly belonging to it, is the steppe of Baraba, situated between the Irkutsk and the Ob. The S. portion greatly resembles the steppes of Latvia, though on the whole it is not so arid and has a more abundant vegetation. The N. portion, though flat and swampy is covered with nearly continuous forests of birch and fir, barmed by numerous wild animals, including the beaver. This portion of the Baraba or Baraninsk steppes may therefore be considered as the commencement of the wooded division which extends N. to lat. 64 and in parts to 66° though in the higher latitude the trees are seldom of very vigorous growth. The whole of the division is covered with vast forests of birch and different species of fir and pine. It is not at all adapted to agriculture, but barley and rye are occasionally cultivated particularly in the vicinity of Baraba near lat. 64 where also tannins of great size are grown. The population, few in numbers, are settled chiefly on the banks of the Ob and Yenisei and live chiefly on game and fish, the latter, including salmon sturgeon and herrings ascending from the sea as far as the confluence of the Tom. Wild animals also are very numerous, and many valuable furs are obtained. The last division is that of the moorland or tundra, consisting of a low monotonous flat covered with moss and nearly destitute of trees. It extends along the shores of the Arctic Ocean, and has no rigorous a climate that even in summer ice is found a few inches below the surface. Here the reindeer exists in vast herds, both wild and domesticated, while bears and foxes are also numerous and furnish valuable furs and the coasts and mouths of the rivers are frequented by immense shoals of fish and flocks of fowl. One remarkable feature in the W. part of the tundra is an isolated mountain mass which runs with steep sides to the N. of Obedinsk, about lat. 66°, and forms a kind of range divided into five summits, the highest of which attains the height of 4993 ft.

Siberia to the E. of lat. 105° forming nearly one-half of the whole territory has a much more diversified surface than the W. region, and owing partly to its general ruggedness and elevation and partly to the greater severity of its climate has much less land adapted for agricultural purposes. The Sea of Okhotsk has a bold and rocky shore, and the country behind rises with a steep ascent till a mountain-range is formed, with a general altitude of nearly 8000 ft. above sea-level. This range, under the name of the Stanovoi Mountains runs nearly parallel with the coast, till it reaches the frontiers of China, where it takes the name of the Fabelovsk Mountains, and proceeding W. continues for a long distance to form the boundary between the two superiors. It then takes the name of the Mountains of Dauria, and throws out numerous ramifications, which continuing W., throw their arms round Lake Baikal, and cover almost all the S. part of gov. Irkutsk. Other ramifications proceeding N. form the water-sheds of the numerous affluents of the S. bank of the Lena. On both sides of the river the surface continues elevated, and forms a tableland, the interior of which is still very imperfectly known. The best portions of E. Siberia occur in the S. of gov. Irkutsk, where, in the lower and more open valleys, the vicinity of Lake Baikal, cultivation has been attempted with success, and the oak and hazel unknown in other parts of Siberia, are found growing freely. In almost the whole of the same government, where the configuration of the surface does not present insurmountable obstacles, all the grains of Europe are grown, and even the mountains and hills are covered during the greater part of

the year with good pasture. Still farther N. in gov. Yakutsk, as far as the town of same name, corn is cultivated in patches in the upper vale of the Lena, though the far greater part of it is covered with fir and pine, with so much intervening space between the trees that a good deal of herbage sprouts up, and helps to nourish the numerous herds of cattle which are kept by the Yakuts and grazed chiefly on an immense tract of low land which extends from the Lena E. to the Aldan. The N. part of E. Siberia consists of two distinct portions, the one extending from lat. 105° E. to the lower valley of the Lena, and the other from that valley F. to Behring's Sea. The former portion is very imperfectly known, but, from the modes of life pursued by the Yakuts, who have taken possession of it, it is presumed that it consists chiefly of pasture-ground well adapted for the rearing of cattle, or of moorland wastes, on which no other animal than the reindeer is able to subsist in numerous herds. The latter portion, as far as the Kolyvan, is traversed from N. to S. by chains of low hills, separated from each other by wide valleys or open plains, and generally overgrown with stunted larch and birch. In these valleys and plains are numerous lakes, generally well supplied with fish, and bordered by low banks, on which a rich grassy sward is often seen. Another remarkable feature in this locality is the number of *altays* or dry lakes, consisting of a kind of wide basins, so far below the general level of the surface as to have become filled with water when the rivers overflowed their banks, and yet so shallow that the alga produced by the winter-frost form natural drains, through which the water escapes and leaves the lakes almost dry. The alluvial bottom, owing to the richness of the soil, immediately on the arrival of summer becomes clothed with the finest turf. When the drainage is less complete extensive morasses are formed covered only with moss or stunted larches, and so destitute of proper pasture that the districts in which they prevail are almost uninhabited. To the E. of the Kolyvan, branches from the Stanovoi Mountains stretch N., and form a series of ranges which frequently rise from 2000 ft. to 8000 ft. Some of these penetrate to the V. coast, and are seen forming precipitous cliffs at Shalakhin Nos, Cape North, and other headlands. Other ramifications from the Stanovoi pursue an easterly course, and traverse the remarkable peninsula of Kamchatka almost centrally to its S. extremity.

Rivers.—There are both numerous and of great magnitude. From the configuration of the country they almost all flow in a N. direction, and belong to the basin of the Arctic Ocean. The only exceptions are in the E. where the Anadyr flows E. into Behring's Sea, and a great number of small streams, following the same direction, fall either into the same sea or into the Sea of Okhotsk and in the S. where part of gov. Irkutsk is drained by affluents of the Amur and consequently belongs to the basin of the N. Pacific. The great rivers belonging to the basin of the Arctic flow for the most part through immense tracts of level country and hence are remarkable at once for the length of their course, the volume of water which they accumulate from numerous and important affluents, and the few obstacles which they present to a continuous navigation. The advantages which they offer in the latter respect are diminished by the long period during which they are frozen over; but even then they do not cease to be available for traffic and become, in fact, the great highways of the country. The Ob is one of the largest rivers of the Old World, the length of its course is 2400 m., and the area of its basin is 924,890 sq. m. Among its important affluents, many of them so large as to be entitled to rank as magnificent rivers, are the Irtysh, Ishim, and Tobol, which by uniting their streams, more than double the volume of the Ob, Tobol, and Ket. The estuary of the Ob forms a gulf from 70 m. to 80 m. wide and above 400 m. long. The quantities of fish taken in it, and along the whole course of the river, and in its tributaries, are almost incredible. According to Erman, the quantity consumed in gov. Tobolsk alone, and wholly taken from it, cannot be less than 60,000 tons annually. The Yenisei, the second river in importance, draws its waters from an area of not less than 1,000,000 sq. m. The length of its course if measured from the commencement of the Selenge, its remotest tributary, exceeds that of the Ob by 100 m. Its most important affluents are the Selenge, which, before entering Lake Baikal, drains an area

of more than 140,000 sq. m. the Angara, which reserves the debris of the lake, and in the lower part of its course, takes the name of Upper Tunguska; the Middle Tunguska, and the Lower Tunguska. The estuary of the Yenisei is about 20 m. wide, and 300 m. long. The Lena has a course of about 2000 m., and drains an area of about 800,000 sq. m. It rises hardly 30 m. to the W of Lake Baikal, and becomes navigable at 50 m. from its source. Its principal affluent is the Vitim, which has a course of 700 m., of which a considerable part is navigable; the Olekma, which flows 500 m. through interminable forests, the Aldan, which drains an extensive tract of table-land between lon 125 and 140° E. and the Vitim, which rises in a mountainous district not far from the Lower Tunguska, and flows W for about 800 m. The three large rivers above mentioned, which far surpass in magnitude all the other rivers of Siberia, and form its main trunk, are remarkable not merely for their common N. direction, but for the parallelism of their courses, which, particularly in the first two, the Ob and Yenisei, is not confined to the main streams, but is very apparent even in their tributaries. The most important of the minor rivers which send their waters directly to the Arctic Ocean are the Ixa, between the Ob and Yenisei, the Khatanga, the united Anzars and Olenok, and the Olenok, between the Yenisei and Lena, and to the E. of the latter, the Yana, Indigirka, and Kolyva. The course of the first is 500 m., that of each of the two last, 700 m. These minor rivers, like the larger, abound with fish, and at their mouths are frequented by such immense flocks of water-fowl as often to darken the air for miles around. The only important lakes are those of Baikal in gov Irkutsk, and Balkash Nor or Tangut, chiefly in the N. of gov Omsk, but partly within the Chinese frontiers. Numerous other lakes are scattered over the surface, and more especially in the tundra, where whole chains of them, covering extensive tracts, not infrequently occur.

Geology and Mines.—The geology of Siberia is very imperfectly known and hence in the best maps it only has been published, considerable tracts are left absolutely blank. Granite and crystalline schists are found chiefly on the E. slopes of the Ural Mountains, in the S. among the mountain-ranges of the Altai as far N. as lat. 57° N., and between lon 85 and 120° E., chiefly in gov Zemsk and Irkutsk on both sides of the Upper Tunguska and E. of the Yenisei. In the upper part of the basin of the Middle Tunguska and in the very E. extremity of the country, from lon. 115 to the shores of Bahrang's bay. The volcanic rocks belong mostly to the tertiary period, and are found chiefly in the S., in connection with the granite and crystalline schists above described. They compose the great mass of the mountain range which skirts the W. shores of Lake Baikal, and are seen in a still more magnificent and interesting form in the mountains which proceed from N. to S. nearly through the centre of the peninsula of Kamchatka, where several active volcanoes were seen and have been well described by Erman. Palaeozoic rocks, including under the designation rocks belonging partly to the Silurian, partly to the Devonian and partly to the carboniferous systems are developed chiefly in the N., where they occupy a large space in the form of a triangle, the apex of which is at the town of Irkutsk, and the base on the parallel of 60°, between lon 85° and 120° E. Another large development of the same rocks is seen on the N. W. and N. of the R. of Obkhotok and to a considerable distance inland. Secondary rocks higher in the series than the carboniferous system commence near the S. shores of Lake Tangut, and stretch N., occupying a considerable tract on both sides of the upper valley of the Irkutsk, including the districts around lakes Tobolsky and Kozmy. A more partial development of the same rocks is seen on the N. of the Ob, commencing near the confluence of the Ket, and extending N. in a comparatively narrow belt to the sources of the Tax. But by far the most extensive formation in Siberia is the tertiary, which stretches almost continuously from the last slopes of the Ural Mountains E., across the Ob to the valley of the Yenisei; and in other quarters though more intermingled with earlier formations, covers no inconsiderable portion of the surface. The shores of the Arctic Ocean, almost throughout their whole extent, and to a considerable distance inland, have a deep alluvial covering, remarkable for containing deposits of fossil elephants and other animals in such quan-

ties, that the ivory obtained from them forms an important article of commerce. The minerals of Siberia are evidently of immense value, and though the real extent of surface on which they are found is as yet only roughly guessed at, there cannot be a doubt that the most precious of all the metals exists there in greater abundance than in any other part of the Old World. Till recently the auriferous deposits were supposed to be almost confined to the E. slopes of the Ural Mountains, and to occupy a space extending over from 5° to 6° of latitude to the N. and S. of Ekaterinburg. The gold obtained from this zone never exceeded \$200,000 sterling in any one year and had even begun to decrease in consequence of the exhaustion of the alluvia of certain tracts, when it was discovered that some of the E. regions, particularly in gov. Tomsk and Yenisei, are highly auriferous, and that a tract larger in area than the whole of France contains gold, not in its alluvia, but in the very matrix of its rocks of palaeozoic schists and limestones, which when powdered and analyzed, are found to be more or less impregnated with gold. These regions alone, in 1843, raised £3,250,000 sterling being more than two-thirds of the whole produce of the Russian Empire, which did not during the same year raise in all more than £3,000,000. The principal mining districts are those of the Altai already mentioned, the Altai and Nerchinsk, in the basin of the Anzars. In the first, besides gold, a good deal of copper and iron and some silver and platinum, are obtained. The second district extends over great part of the Altai range but has its central locality at Bessaul. Its produce in gold, which used to be small, has lately been much increased. It has also extensive veins of copper, though the ore in general is not very rich, and hence, unless very easily smelted, is scarcely worth working. Argentiferous lead also is found but in less abundance. Iron remarkable for its natural malleable properties, arsenic, and antimony exist in the same district.

In the district of Nerchinsk the most which are obtained are about 150 m. are portions of run in lead, which is the more valuable because little of it is found anywhere else of the Russian Empire tin, zinc, and iron. The lateral alluvia of the Jablonov Mountains running from them into the longitudinal valley of the Shilka, have also been found to be highly auriferous, and are now as already mentioned, yielding large quantities of gold. In the same district of Nerchinsk, are also celebrated mines of arsenic and copper, found generally in connection with iron lodes. The other minerals of Siberia deserving of notice are salts found in natural crystals on the banks of lakes, chiefly in the steppes of Irtys and Baraba; Jasper and porphyry of great beauty quarried especially in the valley of the Charysh among the Altai Mountains; lapidularia found among the mountains in the vicinity of Lake Baikal; diamonds found occasionally on the E. slopes of the Ural Mountains; malachite obtained in greater or less quantity from all the mining districts, sometimes copper and iron, in the form of large plates, extensively used as a substitute for glass and found in greatest abundance on the banks of the Vitim.

Climate.—This country is remarkable for its rigor. The isothermal line which skirts the E. coast of Iceland in proceeding E. descends rapidly till it reaches St. Petersburg, and then more gradually till it reaches lon 100° E. where it is found in lat 53°. From this it proceeds nearly due E. passing through the S. part of Lake Baikal the town of Nerchinsk, and the S. extremity of Kamchatka. It thus appears that the E. coast of Iceland, in lat. 63° has the same mean temperature as E. Siberia in lat. 53°, in other words, that in proceeding from W. to E. the cold increases so much as to make places in the same latitude as Berlin to have a climate nearly as cold as Iceland. In the same manner the line of permanent ground-frost descends in parts of Siberia as far E. as lat 56° nearly the same as that of Edinburgh and over the whole country to the E. of the Ural Mountains is as low as lat. 60°. Erman found in Yakutsk, in a well which had been sunk to the depth of 42 ft. in the vain hope of finding water, that the fine sand and clay forming the sides of the shaft, were so frozen that the spade was useless, and the miner's pickaxe alone could pierce them, and proceeding in the assumption that the heat of the earth increases in a certain ratio from the surface to the centre, calculates that in this locality the melting point of ice or snow and consequently the depth to which the well must have been sunk to

obtain water was not less than 630 ft. He found that annually between 17th Dec. and 16th Feb. and most frequently in the first three weeks of January cold is experienced as cooling 40° Reaumur or 68° Fah.; in other words, a cold 30° Fah. below the freezing point, and that for two entire months, or one-sixth part of the whole year mercury is a solid body. This extreme winter is succeeded by an exceedingly warm summer. They usually commence on the 1st of April and the temperature increases rapidly till it attains its maximum in July. In this month the average height of the thermometer is about 68° Fah. but is not infrequently raised in the shade above 77°. The climate of Yakutsk, however, is admitted to be extreme even in Siberia, for in the W. part of it mercury does not freeze every year except in very high latitudes, and even on the shores of the Sea of Okhotsk owing probably to the influence of the sea, Kerman did not find the ground frozen. In Yakutsk, notwithstanding its long and extreme winter, there are 128 days in the year without frost and within that period several kinds of grain not excluding wheat, have time to attain maturity and in rich alluvial soils often produce a return of fifteenfold.

Manufactures Trade and Towns.—The manufactures are very limited, and are confined for the most part to a few of the larger towns where government factories have been established. The most important articles which are exported are porcelain, glass, and hardware. In some places, as at Tulun, large woolen and linen factories employ a considerable number of hands, chiefly exiles, in weaving woollen and linen cloth and in conducting all the previous processes of preparing the wool, flax, &c. These towns are generally of a coarse description, and are not in great demand, as almost all the articles of ordinary dress are provided at home and formed with comparatively little trouble out of the skins of reindeer sheep, and various other animals. Among the articles a clothing made of reindeer very supple and cold is very commonly worn. The trade is of considerable extent, and is so far as confined to the produce of the country, consists chiefly of cattle, fish, carver furs, skins, and metals. A very important transit trade is also carried on across the country between Russia in Europe and China. From the latter country by far the most important article is tea, both in the dried leaf and in the form of cakes or bricks. The greater part of the latter is disposed of to the nomadic tribes, and a very large proportion of the former never passes beyond the limits of Siberia, but is retained for home consumption. Other articles of importance from China are coarse cotton stuffs, rhubarb, silk, satin, &c. The great mart for the trade is the town of Kjachta, where it is carried on in a regular and recognized form under the superintendence of both governments, and to such an extent that the value of the imports into Siberia is estimated at not less than £3,000,000 sterling. The greater part of this important traffic is transported by the Belanga to Lake Baikal, and thence by large vessels to Irkutsk, from which a continuous communication line opens by the Angara and Upper Tunguska to Yenisei, on the Yenisei. A little below Irtouk the Kam for makes a water-communication westward, to a point within 40 m. of the navigable Ket. These 40 m. are only to be accomplished by land-carriage, but thence the Ket gives immediate access to the Ob, and the Ob, partly by its main stream and partly by its affluent Irkut and Tobol gives a continuous conveyance to Tobolsk from which a highway across the Ural Mountains leads directly to Perm. Besides this main line of thoroughfare from China, a considerable trade is carried on both with that country and with several independent khanates, by means of caravans which depart from Petropavlovsk on the Ishim, or Samalinsk on the Irkutsk, and proceed northwards across the mountains to Kaiduk, Tashkent, Kokan, &c. For the interior traffic the rivers naturally furnish the most important conveyances, but when these become clogged with ice, other means of conveyance must be resorted to, among which the most characteristic is that of sledges drawn by reindeer or dogs. In carrying on the trade of a country so vast in extent, and so thinly peopled it is obviously necessary to select certain central localities and fix certain stated seasons, for the transaction of business between buyers and sellers and accordingly the fairs of Siberia are remarkable both for the value and quantity of the goods brought forward, and the vast crowds of dealers

whom they attract from the remotest quarters. The most extensive of these fairs are those of Odoorsk, on the Ob, Turukansk, on the Yenisei, Irtouk, on the Yenisei and Orenburg, on the adjacent of the Kolyma. The principal towns are Tobolsk, Odoorsk, Tomsk, Omsk, Krasnoyarsk, Irkutsk, and Yakutsk.

People.—The races and tribes scattered over the different parts of Siberia are as numerous, that little more can be done here than to give the names of the more important. At least two-thirds of the whole population is Russian and consists either of voluntary emigrants who have found it their interest to settle in the country or of exiles and their descendants. In regard to the exiles Siberia is merely a penal settlement, and hence that portion of the population, which, as coming from Europe, ought to be the most civilized, is not likely to be the most unsuited. In those cases where the exile has been awarded for political causes merely the individuals may be more unfortunate than vicious, but when it is the penalty of ordinary crimes, the individuals being convicted in the usual sense of the term must talent society in the same way as in Van Diemen's Land and Australia. A more unphilosophical and far more interesting population is furnished by the indigenous tribes. Beginning at the Ural Mountains and proceeding E., we find the Samoyedes in the N. W. immediately S. of these the Ostiaks occupy both sides of Ob, up to the confluence of the Irkutsk the N. part of the steppes of Bashka, and the whole of the woody region E. to the banks of the Yenisei. They live by fishing and hunting and though their physical structure is by no means robust, they display both great dexterity and courage in attacking the larger and fiercer animals, both of the land and water. Some of them have embraced Christianity but the great majority continue addicted to Shamanism. In the S. among the Altai Mountains, the Calmucks predominate but have laid aside a number of the usual peculiarities of their race. They subsist chiefly on the produce of their herds, cattle, and sheep and cultivate a little grain and tobacco. They have some skill in mechanical arts, particularly in the working of iron and make their own gunpowder though not Buddhists, they are generally addicted to other forms of superstition. Among the E. slopes of the Altai are several Turkish tribes known by the names of Berasas, Buldies, Sogas, and Katchinases. The last extend E. to the banks of the Yenisei. The Kirgises, the most numerous of all the Siberian tribes, dwell chiefly on both sides of Lake Baikal and E. as far as the Ocean. They are of Mongol origin, and closely allied to the natives of the N. provinces of China, both in language and customs. The Tunguses or Tongouses are the most widely dispersed of all the native tribes. They are found along the shores of the Arctic Ocean, from lon. 110° to 170° E. along the banks of the Yenisei as far S. as the mouth of the Upper Tunguska, and along the Sea of Okhotsk as far as the town of that name, and thence S. W. to the frontiers of China, in Daouria, and to the N. of Lake Baikal. Parts of these extensive tracts they occupy exclusively but others they hold in common with the Yakuts and some nomadic tribes. They are considered the least civilized of the natives of Siberia, are very expert horsemen, live chiefly by hunting, possess some skill in the working of iron as enables them to prepare their own firearms, and are generally addicted to Shamanism. Among their great amusements are cards and chess. For the latter they carve chess-men very elaborately out of the mammoth's teeth. The Yakuts, as already mentioned, live intermingled with the Tunguses, and confine themselves almost entirely to the rearing of horses and cattle, and the preparation of dairy produce from them. The herds of many of them amount to several thousand head. They have made considerable progress in civilization, and pay some attention to the education of their children. They are of Tartar origin, and not a few of them are nominal converts to Christianity though the majority still adhere to Shamanism. The Tschukches occupy the peninsula formed in the N. E. of Siberia, by the Arctic Ocean on the N. and the Sea of Okhotsk on the E. They are very jealous of their independence, and are scarcely to be said to be nominally subject to Russia. Their language proves them to have a common origin with the Esquimaux. They possess of two distinct tribes, the one sedentary and the other nomadic. The former, inhabiting the sea-shore, live by fishing, in which they show great courage and dexterity,

Climate.—The climate is excellent, and except in some spots where the air becomes tainted by the effluvia of mornings and stagnant pools very healthy. The thermometer in the hottest days rises to 90° or 93°, and even in the depth of winter very seldom falls below 36°; the medium temperature is 63°. The sky in summer is for the most part beautifully clear and serene, but after the autumnal equinox dews and fogs increase, and the rain falls in frequent and heavy showers. The prevailing winds, the N. and W., are dry and salutary; those of an E. direction make the atmosphere heavy and dense, and are often accompanied with rain and thunder, the most annoying wind is the H. E. or sirocco, which, blowing from the deserts of Africa, not only is almost intolerable from its stifling heat, but produces oppressive debility and lassitude, and is considered so noxious that during its continuance, generally from three to four days, the natives confine themselves to their houses, carefully closing every door and window and the streets become silent and deserted. The quantity of rain which falls is 52 inches, which is equally distributed over the year whole, without being in excess amply suffice for the wants of vegetation and all economical purposes. Unfortunately however the winter receives a very disproportionate share, the regular rains usually commencing in November and continuing to fall at intervals often in very heavy torrents, with vivid lightning and occasional snow storms till March which not unfrequently particularly in the interior, long droughts prevail from April to November to the serious injury of the harvest and vintage. Another evil from which Sicily suffers is the frequency of shocking earthquakes. These have repeatedly spread fearful devastation over whole tracts of country and even when unaccompanied with actual damage, keep the minds of men in a state of anxiety and alarm.

Geology.—Kitsa itself and the large circular space of which it forms the centre, extending W. to Bronte, and E. to the coast over the whole tract that lies between Catania and Taormina, is covered completely with volcanic products. Another tract of less extent and more irregular shape extending S. from Canice to Chiantrone, is similarly composed. Granite with gneiss and mica schist has its only large development in the N. E. where it forms the mass of Mount San Filippo, and trends along the coast, when it stretches N. from Scausa, and then leaving a narrow belt of tertiary for formation along the straits, skirts the town of Messina and terminates on the N. coast at Cape Rosicchio. It also forms an irregular belt around the town and along the W. side of the Gulf of Patti, and thence W. past Cape Calava to Cape Orlando. The Jura-limestones occupies only two small patches, the larger on the N. E. coast from Taormina to Scausa, and the less still farther N. to the S. of Melazzo but the series of rocks immediately above the limestone, and belonging to the cretaceous system, are so largely developed as to cover at least a half of the whole surface of the island. They extend without interruption along the N. coast from Cape Orlando to Cape Zafferano, occupy the far greater part of the peninsula between the gulfs of Palermo and Castell-a-Mare and between the latter gulf and the town of Trapani, form the great mass of the Neptunian and Madonian ranges, and fill up the whole of central part of the island stretching across it unbroken from its N. to its S. shores. The rocks of the tertiary formation occur chiefly in the H. E. and the W. In the former direction they line the whole coast from Cape Santa Croce E. past Syracuse to Cape Passaro, and then with a slight interruption continue along the S. E. coast past Cape Scalabrara to the mouth of the Drillo in the latter direction they commence at the mouth of the Platani and occupy the coast continuously from that point to the town of Trapani. The only alluvial tract of any extent is in the E., where it stretches along the S. part of the Gulf of Catania, and thence inland along the bank of the Giaretta. Similar patches of alluvium occur on the S. coast at the mouths of the Terranova and the Salso. The minerals of Sicily are more numerous than valuable. They include argilliferous lead, quicksilver, iron, copper, and antimony, in quantities so limited that few of them are worked; lignite, bitumen, petroleum, and asphalt, asbestos, pyrites, smoky stone, rock-salt, nitre sulphur, and a great variety of marbles, agates, chalcedonies, and jaspers. The most important of all these is sulphur, which has been worked in mines for more than three centuries, and is extensively exported.

Vegetation, &c.—Both the climate and rich soil of the island procure for it both a very large amount and great variety of vegetable products. The hilly regions presenting alternately bold crags and undulating slopes, are generally clothed with forests of fine timber, among which the prevailing trees are oak, ash, pine, elm and chestnuts or covered with pastures, on which numerous flocks and herds are reared. In the lower grounds cultivation is general and the crops are often remarkable for their luxuriance, though the mode of culture is for the most part unskillful and careless in the extreme. The implements in use have remained unimproved for centuries and the grain is still thrashed out by being trodden under the feet of cattle. The most important crops are wheat, maize, barley and lentils or other pulses. Artificial grasses, partly sown down with grain crops, and partly in the form of permanent meadow occupy a considerable extent of surface, but are far less productive than they might easily become by the introduction of proper modes of irrigation. Many of the deeper and lower grounds are devoted to the growth of hemp. Next to grain the most important objects of culture are the vine and the olive, often planted intermixed. The produce of the vine is partly dried into raisins, but is much more frequently converted into wines of various kinds, and generally of rich flavour. The produce of the olive is abundant but from subsequent mismanagement often fails to yield oil of the first quality much of it becoming pungent, rancid, and feid. Other vegetable products deserving of notice are the mulberry, extensively used in rearing silk-worms; radium, sunshin and berilla, all of which in the localities best adapted for them are regularly cultivated on a large scale cotton, which has its chief locality near Mazzara, mainly obtained by means of the bark of a species of ash (*Fraxinus*) and in such quantities in the neighbourhood of Castell-a-Maro, Carini, Cefalù, and Caronia, as to yield an annual revenue of above £40,000 various species of fruit, more especially the Lulian fig or prickly pear (*Cactus opuntia*) on which when in season great numbers of the lower orders subsist the almond of which numerous groves are scattered over the island, the common fig extremely delicious when fresh, but not dried with sufficient skill to create a foreign demand, the date, very common under the Saracens, but now much neglected the liquorice plant, growing spontaneously on the plains, especially of Melazzo and Catania, and furnishing a considerable quantity of liquorice for export and the sugar-cane, which thrives well, and continued to be extensively cultivated till its produce was driven out of the market by that of Brazil. To these might be added a great number of trees and plants valuable for fruit, fibre, medicinal properties or the manures extracted from them. The domestic animals of Sicily, with the exception of cattle, of which there is a good breed, and of mules, to the proper rearing of which a great degree of attention is paid, are of an inferior description. The horses, though descended from those of Barbary have lost traces of the good qualities for which the parent race are distinguished, and the sheep, with exception of a few improved merinoes, rank low in respect both of carcass and wool. Oxen especially those used for draught, are strong and tolerably well formed, but the cows are ill adapted for the dairy. Swine are numerous, and where tracts of forest extend thrive vigorously. In general, however, the breed is weakened in the extreme.

Manufactures, Trade, Money, &c.—The manufactures are of very limited extent, and when not entirely domestic are confined to a few of the larger towns. They include the ordinary silk, woolen linen, and cotton tissues, for the most part of a coarser description, oil-cloth, leather, cordage, glass, earthenware, &c. Trade suffers much from want of inland communication, but considering the vast extent of sea-coast, and the many valuable products indigenous to the island, would soon become far more important than it is, were either government more enlightened or its subjects more industrious and enterprising. The only branch of trade for which the island seems to show any particular predilection is that of fishing, for which they possess numerous advantages, the fisheries along the coast being the finest in the Mediterranean. By far the most productive is that of the tunny for the capture of which at the proper season whole fleets of boats are fitted out. The mulllet and anchovy fisheries are also of great value, and numerous varieties of testaceous and crustaceous, affording delicate food, are

taken throughout the year. The most important articles of export are grain, fruit, wines and spirits, sulphur, oil, tannin, basins, silk, liquors, and arsenic of arsenic of arsenic, medicinal products, cottons and woolen yarn, silk, linen, cotton, and woolen goods, hides, hardware, &c. Accounts are kept in denari, each equal to about 4 s. 2 d. Sicily has its own mint, but its coinage is in common with those of Naples. Spanish gold and silver coins are also current. The principal measure are the palm or foot for length = 10 inches 3 lines, the solera for wine = 5½ acres, the solera for wine = 86½ gallons, the solera for oil = 4½ gallons, and the solera-general for wheat and other grain = 20 bushels, or 2½ qrs Imperial. Government, People, &c.—Sicily, though an integral part of the Kingdom of Naples, continued till within recent times to possess its own parliament or representative assembly composed of the three estates of clergy nobility and representatives of free towns. The last formed a very small minority, and consequently were completely outnumbered and overpowered by the two former, who united together and secured to themselves the most odious and oppressive privileges. The parliament thus proved far more an instrument of tyranny than of freedom. In 1818 an improved constitution under the auspices of the model of that of Great Britain, was established, but the people generally being altogether unprepared for it, regarded it with little favour and expressed little regret when after a short-lived existence of four years it was formally abolished by the crown, and a virtual despotism was substituted in its stead. The R. Catholicism is the established religion, and the great body of the people nominally belong to it, though a considerable number of Greeks, who profess the worship of their own church, live in different parts of the island, and more especially in the vicinity of Palermo. The greatest dignity, accompanied with the greatest humbleness, is very prevalent among the higher and has also spread widely among the lower orders. Education is very much neglected, and even when received is not of a kind fitted to enlarge the mind. In all quarters a general lawlessness prevails. The nobility instead of devoting themselves to the duties of their station, or engaging in manly pursuits, spend most of their time in paying and receiving ceremonious visits, or in dissipation and gambling, the common people are effeminate and indolent, and take every means of escaping from hard labour and peasant industry. The best specimens of Sicilian manners are met among the peasantry, who, notwithstanding the loss of the towns, are sober and tolerably observant of the duties of domestic life. For intellectual pursuits the Sicilians, though not deficient in natural capacity, show little inclination. Science, literature, and art have numerous professors, who are keen for the honours or emoluments which proficiency in them confers, but fail to prove their title to them by the excellences of their productions.

History.—According to early tradition, the first inhabitants of Sicily were Cyclopes and Laestrygonians a kind of fabulous beings who long furnished the poets with ample materials, of which, among others, Virgil has largely availed himself. Niemanns from Iberia afterwards gained such a footing in the island, as to change its name from Trinacria, which it had hitherto borne, to that of Sicania. Sicily, driven from Italy crossed the straits, and having vanquished the Sicaniens, gave the island the name which it still bears. After a considerable interval the Greeks began to plant colonies on the coast, and founded a number of towns, of which Syracuse, Agrigento, and Messina, became the most celebrated. They were not, however, allowed to remain in undisturbed possession. The island was conquered first by the Carthaginians, and next by the Romans, and in the decline of their empire it was overrun by the Goths, who retained possession till Belisarius expelled them. In the beginning of the 9th century the Saracens became masters, and continued so till their expulsion by the Normans, who remained long enough in possession to establish the feudal system in all its rigour. In 1184, the Emperor Henry VI. established the Swabian dynasty, which in its turn made way for that of the French under Charles I. Duke of Anjou, whose government, established in 1266, was suddenly terminated in 1282 by the massacre known by the name of the Sicilian Vespers. Princes of Aragon now became its sovereigns, and reigned till 1516, when by the succession of Ferdinand the Catholic, Sicily was annexed to the crown of Spain whose viceroy governed it till 1706, when a successful popular insurrection banished it on Austria. The peace of Utrecht in 1713 gave it to the Victor-Amadeus, Duke of Savoy, who retained it only for four years, and restored it to Austria, receiving Sicily in exchange. In 1734 the Austrians were driven out by the Spaniards, and in 1788 a peace was concluded, confirming the possession to the infant Don Carlos, who united Naples and Sicily into one kingdom, under the name of the Two Sicilies, though in common parlance that of Naples alone is still commonly used to include both. Since then the history of Sicily though necessarily linked with that of Naples, has not ceased to be without interest. When Napoleon in the prosecution of his restless and ambitious schemes invaded Naples, the reigning sovereign Ferdinand IV. withdrew to Sicily and there, partly by the protection of his Sicilian subjects though still more by the efficient aid of Great Britain, was enabled to preserve his throne. The moment was, however deemed favourable for the reformation of gross abuses which pervaded every part of the government, and accordingly, under British auspices a liberal constitution, modelled on that of Britain, and dividing the parliament, which had previously met in one chamber, giving the nobles and clergy a complete ascendancy into two chambers in one of which the representatives of the people meeting alone obtained their proper share of influence. The constitution to which the king had given a reluctant consent in 1812 was not permitted to remain in force beyond 1816 when the king availing himself of the downfall of Napoleon, and the political changes consequent upon it, resumed his former powers, or rather stretched them far beyond their former limits, by abolishing the peculiar privileges of Sicily and converting it into a mere province of Naples. The heart-burnings thus produced manifested themselves in 1820 by a popular insurrection which was only suppressed by Austrian bayonets. Another outbreak took place in 1848 the chief acts of which Messina and Palermo, suffered severely before the insurrection was quelled.

SICOMARIO (Sax. Mithras) a vi and com, Italy Piedmont, div. Aversa prov. Lomellina, 3 m N W Vavia with a court of justice and a parish church. Pop. 1470
SICULIANA (anc. Cusale) a vi Sicily prov and 9 m W N W Gurgund. Corn and sulphur are exported in considerable quantities
SICUVI a celebrated city of ancient Greece, the site of which is partly occupied by the modern village Vasilio about 12 m W N W Corinth. It was built on a lofty plateau of a triangular form surrounded by walls of great strength and rose to be the capital of a kingdom. The pavement of the road and the lines of the streets may still be traced, but the ruins are neither numerous nor very interesting
SIDBURY.—1, A vi and par England co Devon nearly 8 m N N E Sidmouth with a parish church and an independent chapel. Area of par. 5327 ac. 1 op. 1872 —2, Par Eng. Salop 1777 ac. Pop. 61

SIDDI KHALID, a vi Algerian Sahara, oasis of Zabab, 39 m W by S. Biskra. It is surrounded by a walled enclosure, and by palm-trees, and outside the walls is a mosque. Powder is manufactured here, and sold at Targui. Pop. about 1100
SIDLAW HILLS, a low mountain-range, Bedfordshire which commencing with the rock of Kinnell about 8 m N E Perth, stretches E N E into co. Forfar in which are their loftest summits—SIDLAW proper 1408 ft. and Craig Ovi, nearly 1700 ft. The average height is below 1000 ft. These hills are covered with corn-fields and rich pastures.
SIDLEHAM, par Eng Sussex 4109 ac. Pop. 941
SIDMONTON, par Eng Hants 4470 ac. Pop. 143
SIDMOUTH, a seaport, market-t and par England, co. Devon. The town, 12 m E S E Exeter, is situated in a

valley between two high hills, near the mouth of the Sed it is irregularly built, but is neat and clean. It has an ancient church with a well-built tower and places of worship for Independents, Wesleyans, and Unitarians. Sidmouth was formerly a seaport of some importance; but no craft except pleasure-boats and fishing-smacks can now approach the town in consequence of the harbour being choked up with sand and pebbles. It has now however become a favourite watering place, and has every accommodation and all the sources of amusement usually found at such resorts—taverns, boarding-houses, baths, public rooms, library with assemblies and concerts. The climate is salubrious, and remarkably mild—the mean annual temperature being 51.97° while the summer averages 62°, and the winter 42.44 the surrounding scenery is exceedingly picturesque. Pop. 2516. Area of par. 3600 ac. Pop. 8441.

SIDON or **SAYON**, a seaport in Asiatic Turkey Syria par. Area, 15 m. S. Beyrut, on a tongue of land, the isthmus of which is protected by walls flanked with towers, while a bridge of seven arches leads to an island on which the castle of Malat-el-Bahar together with a ruinous fort, are situated. Viewed from the sea it has rather an imposing appearance and though very indifferently built of stone-houses, which stretch straggling along the shore, is large, and not without signs of prosperity. The principal buildings besides some mosques, a Christian church, and a synagogue, are the bazars, and an ancient building, now forming the French khân. The harbour once famous, has been choked up, so as to admit only small vessels; and the trade chiefly confined to silk, fruit, oil and sea-gulls, has declined from inability to compete with Beyrut. Ancient Sidon, called in Joshua Great Zidon, and repeatedly mentioned in other parts of Scripture, and by the earliest profane writers, including Homer is supposed from some vestiges which have been traced, to have stood about 2 m. inland. Pop. about 6000.

SIDRA or **RENT** (Gulf of) [see Syria Major] an extensive inlet of the Mediterranean E. part of the Gulf of Tripoli, extending from Cape Mesurata to Bengazi or from lon. 15° 30' to 20° E. In the interior are extensive quinquinae celebrated in antiquity under the appellation of Syria, from a corruption of which the modern name is derived.

SIEBEL
DIAGEN a vi. Bavaria, Palatinate near Landau with a church and a mill. P. 1023.

SIEBEN
BURG a pruv. Austria. See TRANSYLVANIA.

SIEBEN-GEIRGE
a small mountain-range, Germany, Rhenish.

SIEBEN It breaks off from the Westerwald, and stretches E. W. along the right bank of the Rhine, and between that river and the Wied and the Sieg, from the village of Bousen dorf to a little beyond Kiedigwinter. It takes its name from seven remarkable basaltic heights, crowned with the ruins of ancient castles. The loftiest of these heights is the Lidenberg, 2080 ft.

SIEBENLEIN a tn. Saxony circle and 47 m. S.E. Leipzig. It has manufactures of shoes, stone-ware, and refined wax; a distillery, several tanneries, and a trade in cattle. 19 p. 1489.

SIECHANOWICE, a tn. Russia. See CIECHANOWICE.

SIEDLECE, a tn. Russian Poland, 58 m. E. Warsaw. It has a castle, several churches, a gymnasium and other schools; and the produce of its bakeries is in much repute.

SIEG, a river, Rhinish Prussia, rises in E. of gov. Arnberg. Flows S. E. past Siegen, Widen, and Blakenburg, and joins the bank of the Rhine, 4 m. below Bonn; total course, 90 m.

SIEGBURG, a tn. Prussia, gov. and 14 m. S.E. Cologne, on bank Sieg. It is walled entered by four gates and has four churches and chapel, a superior burgher school and the buildings of an old Benedictine abbey beautifully situated on a rock which overhangs the town, and now used as a lunatic asylum. Manufactures of earthenware, leather and tobacco, some shipping, a fishery and several mills. Pop. 2384.

SIEGEN a tn. Prussia, Westphalia gov. and 40 m. S.W. Arnberg, on the Sieg. It is walled has six gates; three churches, an orphan hospital and poorhouse, manufactures of cotton and woollen goods, leather and various articles in iron and steel, particularly files. Pop. 6481.

SIEGHARTS (Grove), a market in Lower Austria, in a valley 28 m. N.W. Krems. It has a parish church, a castle and important manufactures of ribbons. Pop. 2400.

SIEGLAHN, a vi. Rhinish Prussia, gov. Cologne, circle and near Sieg, with a church, tanneries, and a mill. P. 1126.

SIEHEM, a tn. and com. Holstein pruv. Braubon, on the Demer 14 m. N.E. Lohme with a large church. P. 1097.

SIFNA [ann. Sans Jule] a tn. Tuscany, cap. comp. of same name on the spurs of two hills which rise from the borders of a barren and dreary tract on the S. frontier of Tuscany 29 m. S.E. Florence. Its lofty site, and the fine avenue of trees by which it is approached give it at a distance a very pleasing appearance but the streets are irregular and narrow, many of them being mere lanes often so steep as to be almost inaccessible by carriages and the houses which line them though often bearing the name of palaces have little in their aspect and architecture to entitle them to such an appellation. It is nearly of a triangular shape, is surrounded by walls with gates, of which several are well deserving of notice, and is defended by a strong citadel, situated at its N.W. side. The most remarkable buildings and establishments

are the cathedral one of the most characteristic specimens of Italian Gothic, with a curious facade, inlaid with black red, and white marble, and covered over with sculptures and decorations several other churches, many of them imposing structures, and almost all rich in works of art the Palazzo Publico, an extensive pile with a lofty tower now occupied as

PALAZZO PUBBLICO, SIENA.—From Gally Knight's Architecture of Italy

public offices, courts of law, and prisons, and finely situated in the Piazza del Campo, a large open space shaped like an ancient theatre for public games; palaces in great variety and in almost every variety of simple and compound Gothic among others, the Palazzo del Magnifico, with fine bronze ornaments and rings; the Palazzo Rucellai, with a terra-cotta front; and the Palazzo Piccolomini, remarkable for its elegant balcony and considered one of the finest in the city, the university of very early date, once celebrated, but now greatly decayed; the public library, containing 50,000 vols and above 5000 MSS., many of them of great rarity and value; the hospital of Santa Maria della Scala, one of the most

SIGNY two places France, dep. Ardennes—1 (F. d. Aug.), A. v. 15 m. N. Marbais, with manufactures of fine shawls, a blast-furnace, and other iron-works. Pop. 3447.—2 (F. d. Aug.) A. v. 14 m. N. W. Marbais, with an old castle. Iron is mined and smelted and slates are quarried in the neighbourhood. Pop. 1284.

SIGNEVILLÉ, a vil. and par. Switzerland, can. and 20 m. N.E. Bern, near Lake Thun. A coal-mine has been opened in the neighbourhood. Pop. 2548.

SIGSTON-KENNY par. Eng. York (N. Riding) 3369 ac. Pop. 382.

SIGTUNA a tn. Sweden, Mn and 24 m. N. W. Stockholm, on a tongue of land which projects into the Stockholm, one of the N. creeks of Lake Mälaren. It is regarded as the most ancient place in Sweden, and was once its capital, Odin, whose original name of Sigge was now borne by the town, having first fixed his residence here. The old town has almost disappeared and the new town is about $\frac{1}{2}$ m. distant from the original site. It contains a church with three towers and has manufactures of coarse pottery and a fishery. P. 1200.

SIGUENZA a city Spain, New Castile, prov. Guadalajara, 72 m. N. W. Madrid, on the foot of an amphitheatre, on the side of a hill which slopes down the valley of the Henares. The upper town, therefore, is steep and it is surmounted by the episcopal palace or Alcazar which crowns the hill, for the bishop was once lord of Sigüenza. It has a fine substantial Gothic cathedral, three parish churches, two deserted and two completed Franciscan convents, barracks, a civil and military hospital, several colleges and schools, and a courthouse situated in the great square, which is very large, and provided with a beautiful fountain and colonnade. There are also flour and fluting mills, dye-works, potteries, tanneries, and manufactures of linen-clothes, balis, hair-scrubs, &c. Pop. 4717.

SIGÜEYA a vil. Spain prov. Leon, dist. Astorga with a church school and manufactures of linen. Pop. 1732.

SIGVA, a river, Asiatic Russia, rises on the E. slope of the Ural Mountains gov. Tobolsk flows S. S. E. and joins the bank Soeva, after a course of about 130 m.

SIGIN a river Asiatic Turkey. See BYZONS.

SIGT a seaport in S. coast, Arabia, N. W. the promontory of Ras Farak. lat. 15° 15' 30" N. lon. 51° 15' E. The length of the stretch along the shore makes it look large when viewed from the sea, but on inspection it is found to be a comparatively insignificant place, in a very dilapidated state, and containing from 300 to 400 to 2000 inhabitants, according to the trade and season. The anchorage is merely an open roadstead. About 30 vessels belonging to it are employed in catching sharks, sea-fish &c., in exporting these products to Muscat, Zanzibar, &c. or in carrying on a lucrative trade in grain along the coast.

SIGYAN or **SIGYAN** [anc. *Sigyn*] a tn. France, dep. Aude, on a lagune of the sea, near 34 m. S. E. E. Carcassonne. It is surrounded by salt marshes, from which much salt is made; and has a trade in salt, wine, brandy, honey and wool. Pop. 2018.

SIKINO [anc. *Sikino*], an Isl. Grecian Archipelago, one of the Cyclades, between Isla. Nio and Polycandros, lon. 26° 40' N. lon. 25° 10' E. greatest length N. E. to S. W. about 10 m. breadth about 8 m. Its surface is elevated and even mountainous but the soil is generally fertile and produces wheat, fruit, particularly figs, a little cotton, and much wine. Owing to the abundance and excellence of the fish, Sikino is sometimes called the Wine Island. Its chief place is a town of some name, situated on a height near a tremendous precipice which overhangs the sea. There is no proper harbour, but the landing-place is at San Bourgnias.

SIKKIM a kingdom, N. Hindustan, under British protection lat. 26° 40' to 28° N., lon. 85° to 89° E. bounded, N. by Tibet, E. by Bootan, from which it is separated chiefly by the Chola range, and partly on the S. E. by the river Teesta. S. the plains of the presidency of Bengal and W. Nepal from which it is separated by the Singalese range greatest length N. to S. 90 m. breadth, 60 m. It forms a S. section of the Himalaya, and consists of a series of mountain-ranges, which on the S. rise steeply from the plains in steps from 6000 ft. to 10,000 ft. and continuing to increase in height as they proceed N. finally on the N. W. rise in Kanchenjunga to 28,178 ft., the loftiest height that has yet been measured on the surface of the globe. A range stretching

from this mountain N. E. to that of Donkhi has a mean elevation of 18,000 ft. to 19,000 ft. while several individual summits are higher and that of Chomomo, in particular, is 22,000 ft. The whole surface is thus a mere mass of mountains, separated by precipitous ravines, and nowhere so far distant as to leave room for flat valleys or plains. The whole country belongs to the basin of the Ganges, which receives its drainage chiefly by the Teesta. This river rising in Tibet, at the height of 19,000 ft. pursues a winding course E. through Sikkim, and is augmented within it by numerous tributaries, of which the most important is the Great Rangpo, which joins it on the right shortly before it quits the kingdom. The strata are composed chiefly of granite strangely colored gneiss, mica and chlorite slate, porphyry, and sandstone. Limestone occurs rarely in detached portions, and never in continuous seams. In many places the decomposition of granite, in which feldspar abundance, has produced beds of fine porcelain-clay. The latter assumes being far beyond the snow limit, of course retain their snowy covering at all seasons but bare black mountains are never seen, and up to the height of 15,000 ft. the loftiest and steepest precipices are covered with vegetation and the mountains present an uninterrupted succession of magnificent forests. In the narrow valleys watered by mountain streams, the rhododendrons are particularly luxuriant, and often give to the scenery one of its characteristic and not least pleasing features. This luxuriance of vegetation is evidently owing to the excessive humidity of the atmosphere. The S. and N. E. of Sikkim are indeed beyond the region of much rain, but with this exception it is the dampest territory within the whole range of the Himalaya. S. winds, blowing almost constantly from the Bay of Bengal whose nearest shores are about 400 m. distant, pass over the low plains without parting with any of the moisture with which they are overloaded, but on reaching the mountain-tarriers of Sikkim, discharge it either in heavy torrents of rain, or send it down more gradually in dense mists, which hang perpetually over the lower valleys, and make them so unhealthy that the villages are always placed above them, on lateral spurs, at least 4000 ft. above sea-level. Above this height the climate is generally salubrious and Darjiling, the station of a British resident, on the S. frontier at the height of 7155 ft. is considerably adapted to the health of European constitutions after they have been shattered by residence in other parts of India. At this station the mean temperature is about 50°, or 2° higher than that of London, and 28° higher than that of Calcutta. The range of the thermometer, or the mean difference of temperature between the hottest and coldest months, is only 22° while that of London is 27°. The following table furnishes an approximate estimate both of the temperature and humidity at different altitudes:—

Altitude.	Mean Month.	Mean Wettest Month.	Mean Driest Month.	Mean Daily Range.	Mean Fall in London.
11,000 ft.	49° 6	59° 0	36° 8	22° 8	1° = 330 ft.
15,000 ft.	39° 6	49° 0	26° 8	22° 8	1° = 310 ft.
19,000 ft.	29° 6	39° 0	16° 8	22° 8	1° = 400 ft.

The soil of Sikkim consists for the most part of a rich black vegetable mould, resting on a bed of clay so tenacious as to be well adapted for making bricks. The principal crops are varieties of millet, maize, and rice. The last has been cultivated at the height of 8000 ft. though the crop then becomes uncertain. Other crops more partially cultivated are wheat, barley, peas, mashes, and turnips but the husbandry is very indifferent. The aboriginal inhabitants of Sikkim are Lepchas, who have markedly Mongolian features, speak a language radically Tibetan and though not professing of any religion, acknowledge the existence of good and bad spirits, and appear to have a leaning to Buddhism. They are delicate in courage, but frank, generous, and polite, remarkably honest and, in respect to domestic relations, contrast favourably with their Chinese and Tibetan neighbours, polygamy being rare among them, and polyandry unknown. They live chiefly on rice, but are coarse feeders, and delight in pork, elephant, and all kinds of animal food. Next to the Lepchas the most numerous tribes in Sikkim are the Limboos, professed Buddhists, and equally remarkable for bravery and

crueky and the Moormis, a scattered people, of whom little is known.—(Hooker's *Himalayan Journals* London 1854.)

SILKLO, a market in Hungary, 60 and 34 m. N. Arad with suburbs, and the remains of old fortifications. P. 2224.
SILKLOS (Pecseny), *Székely-ország*, or *Székelyország*, a market in Hungary. Thidley Daulbe, co. Banat, 47 m. N. E. Poega; with three churches a celebrated old castle, situated on a precipitous height, a Franciscan monastery, with thermal springs immediately adjoining it a silk mill and marble quarries. Pop. 2247.

SILKOFF, the smallest of the four principal isles of Japan lat. 35° 49' to 34° 38' N. lon 131° 50' to 134° 40' E. it has 8 of Nippon, and E. of Kiusiu from both of which it is only separated by narrow channels, thickly straddled with small islands. It is about 140 m long, and 70 m broad at its greatest breadth. Its interior appears to be mountainous and barren. The coast is exposed to a wild and tempestuous sea, and, although undulated with many deep bays, has scarcely a harbour that could be entered with safety. It is divided into four provinces—Awa, Iyo, Sanuki, and Ise.

SILKULA, a vil. Hungary Thidley Daulbe, co. and 14 m. N. E. Arad on a tongue of land in an island formed by the White Kőrös. It contains two churches, and is remarkable for the excellence of its fruit, particularly apples. Pop. 1418.

SIL, a river Spain, rises in the mountains of Asturias, in the N. W. extremity of Juncos flows S. W. and 7 m. N. W. Ornes joins it back Munio nearly doubling its volume, after a course of about 100 m. Its chief affluents are the Valcarlos, Selmo, Bocca, Cabrera, and Silvan.

SILANO, or *Silvano*, a vil. and com. duchy of Modena, about 5 m. N. Camperiano with a church, and the remains of an old castle. Pop. 1001.

SILANUS, a vil. and com. in Sardina, div. Sassari 68 m. N. by E. Cagliari. It has marble-quarries. Pop. 1502.
SILAO, a town Mexico, 60 and 10 m. N. W. Guacamato. It is well built.

SILBERBACH, a vil. Bohemia, circle Eibegon, with a school, manufactures of linen lace, printed calicoes, and Prussian blue and several mills. Pop. 2045.

SILBERBING, a town Prussia, gov. and 40 m. S. R. V. Breslau. It is a place of great strength formed by Frederick the Great to guard the pass from Bohemia, at the cost of nearly £1,000,000 sterling. Its works have almost entirely cut of the rock, and their formidable nature, have procured it the name of the *Silberberg*. It contains two churches and an hospital. Pop. 1760.

SILCHESTER, par. Eng. Hants 1881 ac. Pop. 456.

SILE, a river Italy Venetia, rises in prov. Treviso flows E., divides into two branches, one of which, proceeding E., joins the Piave-Venetia, while the other flows S. and falls into the Adriatic about 4 m. E. Venice total course, 40 m., becomes navigable 8 m. above its bifurcation.

SILEBY, a vil. and par. England, co. Leicester on the Midland railway, which has here a station, above 3 m. E. Mountsorrel. It has a parish church, Baptist and Wesleyan chapels, and a free school, inhabitants chiefly employed in agriculture. Area of par. 2190 ac. Pop. 1660.

SILEE, a walled vil. Spain Andalusia prov. and 70 m. N. E. Jaen with a church, hospital townhouse, school, and hermitage, manufactures of dyed for wool, a tanning and several oil flour and saw mills. Pop. (agricultural), 2202.

SILESLIA (Austrian). See *MORAVIA*.

SILESLIA (Prussian) [German, *Silesien*] a prov. in the S. E. of Prussia, bounded N. by prov. Brandenburg and Posen E. Posen and Poland S. Moravia and Bohemia, and W. Bohemia, and the kingdom, and prov. Saxony area 11,868 geo. sq. m. The Oder which traverses the province S. E. to N. W. divides it into two nearly equal portions. That on the S. bank is generally mountainous being covered in the S. by the Sudetes, and in the S. W. by branches of the Riesengebirge. Between the ridges, however, are numerous valleys, some of them of considerable extent, and generally both fertile and well cultivated. The division on the right bank is flat but sandy extensively covered by leath and stagnant pools, and far from fertile. The whole province belongs to the basin of the Baltic, and with exception of a small portion in the S. E. which sends its waters to the Vistula is drained by the Oder, and its affluents the Bober, Kainbach, Weichsel, Lobe, Ohlau, and Neisse on the left; and the

Burthe, Weide, Malapane and Kłodzka on the right. The system of agriculture pursued is very imperfect, and the grain raised in ordinary years is not more than sufficient for the home consumption. There is not much ground adapted for wheat and the principal crops are rye, oats, and barley. Potatoes and flax, also, both of which thrive well, are extensively cultivated, and in some districts hops, tobacco and madder yield valuable returns. The vine is only cultivated in small patches, and the wine produced is very indifferent. Sheep are reared in vast numbers, and are celebrated both for the abundance and the fineness of their wool, and bee-culture forms an important branch of rural economy. The minerals are of great importance and include iron, copper lead calcareous, arsenic, alum pyrites, and coal. They are worked extensively and employ numerous smelting-furnaces. Other manufactures also, particularly woollen and linen tissues, have made great progress, and few provinces of Prussia can boast of an equally undisturbed population. Silesia is divided into three governments—Breslau (its capital), Legnica, and Oppeln. Pop. (1840), 8,061,695.

SILHET, or *Silhet*, a town Hindoostan prov. Bengal cap. dist. of same name, 6 m. N. E. Soanah, 270 m. N. E. Calcutta. It is a large Mahometan town pleasantly situated on a slightly raised part of the fields, but still so low that during the rains it is surrounded by water, and becomes accessible only by boats. The houses of the Europeans are built on mounds or hillocks one of which 150 ft. high is crowned by the residence of the district judge, and surrounded by fine spreading oaks. The climate, though hot and damp, is remarkably healthy and the two most important branches of trade are lime, and a long sedge used for thatching, both of which are sent in large quantities to Calcutta.—The mirror area, 2861 sq. m. consists chiefly of broad flat valleys, annually submerged, broken by low hills, which on the N. frontier, rise into the Coorgs. Mountains; it is a luxuriant vegetation, and is often beautifully clothed with a bright green jungle of small palms and many kinds of ferns. Trees, on the slopes of the narrower parts of the valleys, often raise their slender brown trunks 40 ft. high and terminate in feathery crowns of foliage. Among the hills many remarkable fossils have been found, and in the Soanah which receives most of the drainage porpoises and alligators, both long and short nosed, abound. On the low swampy grounds very heavy crops of rice are raised. On the higher grounds cotton and sugar are produced, but not in sufficient quantities to supply the wants of the district, there too oranges and lemons grow in whole forests, and form one of the most important articles of export.

Other articles of commerce are opium, found in inexhaustible beds, wax, ivory and elephants. Coal also has been discovered. The principal articles of manufacture are a cloth made from wild silk, and shelds, remarkable for the lustre and durability of their black varnish. Boat-building is carried on to a large extent.—(Hooker's *Himalayan Journals*, &c.)

SILAN, par. Wales, Cardigan 2122 ac. Pop. 836.

SILAU, a vil. and com. vil. Sardina, div. Sassari on a slope in a rather unhealthy district. Pop. 2643.

SILINTY (anc. *Thymopontus*) a maritime vil. Asia Turkey, peak Iliya, E. side, entrance to the Gulf of Adala 25 m. S. S. W. Alaya.

SILILQA, a vil. and com. in Sardina. 12 m. W. N. W. Cagliari, near the entrance of the valley of Florida. 1. 1446.

SILIBTRI or *Silistria*, a fortified town in Turkey in Europe, Bulgaria, at the foot of a hill, 6 m. N. E. Danube, 66 m. N. by E. Silistria. It is of considerable size in general poorly built, consisting of narrow winding, ill paved and dirty streets lined by low and gloomy-looking houses, built of wood, and has five mosques, a large Greek church and convent, capacious barracks, public baths a custom-house with extensive magazines attached for warehousing flour and grain, a few insignificant manufactures and a considerable trade, chiefly in wood and cattle. Its fortifications are strongly built of solid masonry, and strengthened by several detached forts of admirable construction and of the most formidable description. The principal of these forts, Abd el Malik, occupies the hill above, which commands the town, and is esteemed one of the most remarkable military works of the age. Silistria successfully withstood the Russians in 1773 and in 1809 but after a long siege was taken by them in 1829, since which time the fortifications have been immensely strengthened. Pop. 26,000.

SILVRI or **SLAVRI** (Jude, *delmiria*) a m. Turkey in Europe, N shore S. of Marmora, 40 m. W Constantinople. It rises in the form of an amphitheatre on the side of a hill, covered by a ruined fortress and consists of an upper and a lower town the former occupied chiefly by Greeks and Jews, and the lower by the Turks. It has a hamlet several mosques, a harbor and some trade. Pop. about 5000

SILJA or **SILJAT** a lake, Sweden, 114 and 28 m. N W Fölen It is of very irregular shape about 20 m. long, by 9 m. broad area, 48 geo. sq. m. and is remarkable for its beautiful and finely wooded scenery along its banks. Its shores is covered by a lofty and almost inaccessible mountain range. Near its W shore is the island of Soller

SILWILLACONBY par Eng. Lincoln 1505 ac. P 258.

SILWILTON, a vil and par England, York (W. York) 4 m. N W Barnby The village, situated in a picturesque valley has an ancient but handsome and commodious parish church, said to have been erected soon after the Norman conquest. The inhabitants are chiefly employed in the coal-works of the neighborhood, but partly also as handloom-weavers and maulers. Area of par. 14,931 ac. Pop. 21,296.

SILLA, a tu. *Speru*, prov and 9 m. S Valencia, on the Albufera lagoon with a townhouse granary two primary schools, a church and a hermitage oil, rice, and flour mills. Pop. (agricultural) 3070

SILLA a m. of W Africa Danbarra r bank Joliba, between Jussa and Gorgo lat. 13 17' N lon. 5 50' W Park a first expedition terminated here.

SILLAH Maw a m. in Burmah. See CHALAH Maw

SILIAW a large and populous m. Hindustan, prov Bihar about 40 m. S E Patna.

SILLE-LE-FILLAUNE, a m. France dep. Sarthe 21 m. N W Le Mans It has an ancient parish church with a fine W porch and a castle of very early date, but still in good preservation and manufacture of fine linen and leather and a trade in hemp thread, wool fabrics wax, &c. P 2210

SILLEIN or **SILLIN** a walled market in the S. of Treestach, 1 bank W. 42 m. N N W Nouchi It is an old but well built place. The houses are lined with arcades and it has a gymnasium a high school, several breweries and some trade in linen and wine. Pop. 2240

SILLEJÖRD a vil and par Norway prov Agderhus, half Sredberg, on the N W extremity of a lake of same name where it receives the Flodal. Pop. 2400.

SILLINGY a vi and com France, dep Haute Saône prov Gervans mand Auvain in an elevated plain P 1193

SILLY a vil and com. Belgium prov Namur 13 m. N by V. Mons with manufacture of soap, leather oil bricks, and some woollen stuff. Pop. 2609

SILLOS, a vil Canaries, at Teneriffe, at the S foot of the *Montaña de Arguine* about 1 m. from the sea. It is poorly built but has a church and a primary school a flour mill and some trade in silk. Pop. 1063.

SILS, two vils. and par Switzerland can Grisons. The one, in an angle formed by the confluences of the Albula with the Renter Rhoda, 12 m. S S W Corra, has two churches, and a modern castle finely situated, and the ruins of two ancient castles. P 291 The other, on the S.E. of the eastern N E side lake of same name 5264 ft. abo. sea-level is the highest village in the Engadine. Pop. 225.

SILSDEN a vil and claypiery, Eng and co York (W. York) in a romantic and beautifully varied district on the Aire, 4 m. N by W Knaithly with a neat parish church, Primitive and Wesleyan Methodist chapels, manufactures of nails and woollen and cotton goods, and quarries of excellent building-stone. Pop. 2848.

SILT, or **SILT** an isl. Denmark, in the North Sea, off coast Redoway; greatest length, N to S. about 20 m. breadth, varying from 3 m. to 6 m. 1 area, 58 geo. sq. m. It is surrounded with scrublands, and affords a valuable protection to the marsh-lands of Schleswig from the incursions of the ocean. It is by no means fertile, the arable land not exceeding 9 geo. sq. m. and sand and heath occupying almost all the rest. The inhabitants are Frieslanders, generally distinguished by fine, mainly and beautiful forms. They make excellent sailors, and live chiefly by fishing and seafaring. Pop. 3600

SILTON two pars. Eng. — 1 Dorset, 1257 ac. P 388 — 2 (Oxfr) York (N. Riding), 8694 ac. Pop. 265.

SILVANO a vil. and com Italy, Piedmont dep Genova prov Novi, near the confluence of the Gornato with the Orba. It is on an elevated place, and has two churches. Pop. 1952.

SILVER ISLAND, China. See KIWATO.

SILVERTONE, par Eng. Northampton, 2110 ac. P 1184

SILVERTON a vil and par England Devon, near the Great Western railway 7 m. S N E Exeter The village, situated on a commanding height, contains a handsome parish church, a Wesleyan chapel a free school, and two animal fairs. The inhabitants are chiefly agricultural. Area of par. 4714 ac. Pop. 1378.

SILVES, a m. Portugal prov Algarve, 17 m. S N E. Lagos, on the Portimão, here crossed by a stone-bridge. It has a handsome church, a convent, Latin school, hospital, and almshouse was taken from the Moors in 1348. Pop. 2400

SILVES, or **SILVA AXA**, a vil and par Brazilian Guiana, on the Lake Saraca, 20 m. from 1 bank Amazon, above Obidos. The inhabitants, Indians and Moriscos, cultivate cotton and excellent tobacco, and gather cacao and sarsaparilla, which grow here spontaneously.

SILVINGTON par Eng. Salop 498 ac. Pop. 27

SILZ, a vil Tyrol, circle Inns, r bank Inn, with a court of justice and a church. Pop. 1116

SIM or **KMA** a river Russia, rises in gov Orenburg flows easterly N then S E and joins r bank Ismer, about 18 m. S E Omsk focal course, 100

SIMABARA, a vast isl. Japan, W coast 1. Kus u, stretching far inland, and forming the basin in which are the peninsula of Simabara and the islands of Amakusa, Kumi Fogi Sumo-Togi, Oho-Jano, Nagasuma, and a number of other islands and rocks. The peninsula of Simabara is remarkable for the lofty volcano of Wuzendake.

SIMANCAE, a m. Spain Leon prov and 8 m. S W Valladolid, r bank Pisuerga, here crossed by a bridge with 17 arches. It has a courteous, primary school, and church, but its chief public building is a spacious and strongly fortified edifice rising above the river which formerly belonged to the Henricians, the admirals of Castile, but was taken from them by Ferdinand and Isabella, and destined by them for the national archives. Most of the earlier papers were destroyed by the Comuneros in 1520 but those dating from 1478 were very complete. When quartered at Simancae in 1809 the French seized all the papers relating to their diplomacy with Spain and before leaving they destroyed immense quantities of records, and set fire to the building the last wing of which was burned down. The castle has since been repaired and the monuments which escaped destruction and spoliation have been rearranged. Simancae figures in the Roman itinerary under the name of *Sapientiana*. The celebrated Irish rebel Hugh Roe O'Donnell, died here in 1603. 1 up 608.

SIMAND, a market in Hungary, Thither flows, so, and 21 m. N N E Arad with two churches, a synagogue, the remains of a fort built by the Emperor Trajan, and some trade in corn and cattle. Pop. 4808.

SIMBIRSK a gov Russia, bounded, N by Kasan, E. Orenburg, S. Kazan, W. Penza and N. Novgorod. lat. 52° 40' to 55° 40' N lon. 45° 30' to 51° E. greatest length, N W to S E. 260 m. greatest breadth, 140 m., area 22 400 geo. sq. m. It contains generally of an arid are plain broken by low hills, which rise to the height of 400 ft. on r bank Volga. This river traverses the government circuitously N to S and towards the S makes a very remarkable sweep, including a large tract, which has much the appearance of a steppe. The only other river of importance is the Kuma, an affluent of the Volga. The lakes are individually small, but so numerous that 666 have been counted. The climate is considered mild, though for five months in the year the Volga is covered with ice. The air is clear and healthy. The soil consists of a mixture of chalk, marl, clay, and vegetable mould, and is of the greatest fertility, producing abundant crops of all kinds of grain, hemp, flax, hay and tobacco. The domestic animals are of very inferior breeds, and the fruit is generally of indifferent quality. The N part of the government is well wooded but considerable security is felt in the S. The principal trees are birch, alder, and oak. Fish abound both in the rivers and lakes. The minerals consist chiefly of gypsum, saltpetre, limestone, sulphur, and naphtha. The manufactures, not carried on to any great extent, consist chiefly of woollen and linen

cloth, leather, glass, soap, and candles. The trade by the Volga is important. The chief exports are grain, hemp, cattle, raw and prepared hides, soap, fish, &c. The government is divided into 10 okrugs, of which Simbirsk is the cap. Pop. (1857), 1,345,000.

SIMBIRSK, a tn. Russia, esp. above gov. on a lofty bank of the Volga, 448 m E S. E. Moscow. It is very irregularly built, and consists principally of wooden houses and narrow streets. It contains 16 churches, most of these massive structures, two convents, a gymnasium, and a central school, and has an extensive trade, particularly in corn and fish; and an annual fair, which lasts three days. P. 15,500.

SIMCOE (LAKES), a lake, Canada West, between Lakes Ontario and Georgian Bay, Lake Huron, nearly 80 m long and about 18 m broad at its widest part, and said to be about 170 ft. above Lake Huron, into which it discharges itself through Lake Georgian the Severn, and Georgian Bay. The water in some parts of the lake is of considerable depth, and it is generally frozen completely over in the winter, so as to be passable with safety for sleighs. It contains numerous islands, some of them of large size, but only one of them, Hawks Island, inhabited, and that by Indians. The banks are generally clothed with wood down to the water's edge. A steamer has plied on the lake for many years past, and very fine white-fish are taken in it.

SIMCOE, a tn. Canada West, esp. oo. Norfolk, on Patterson's Creek about 8 m N of Lake Erie and 70 m S. W. Toronto. It is the seat of the government and county offices, and has a courthouse and jail, an Episcopal, Presbyterian, Congregational, Methodist, and two Baptist places of worship, a grammar and several other schools, a soap and umilite factory, a brewery, three distilleries, two canneries, two foundries, an ashery, a saw and two flour mills. It publishes three newspapers. Pop. (1852), 1452; (1854) 1700.

SIMETO, a river Sicily, S. S. GIARRETTA.

SIMEONOPOL, a tn. Russia, cap. gov. Taurida, on a dry unsheltered plateau at the foot of lofty hills, on the left bank here crossed by a bridge 192 m N. E. Odessa, and 40 m N. E. Sevastopol. It consists of an old and a new town, the former very poorly built, and composed of crooked narrow streets, inhabited chiefly by Tartars, and the latter very regularly built in straight and spacious streets, and a very broad square, and has three Greek churches, five mosques, a R. Catholic chapel, a gymnasium, large civil and military hospitals, and several important courts and public offices. Pop. 8000.—(Desmoulin *Voy. dans le Ruissie Merid.*)

SIMI AH, a military station Hindoostan in the protected Sikh territory 60 m N. N. E. Umballa, and 7300 ft. above the sea. Besides a bazaar which may almost be called a

belong chiefly to the more opulent ranks. It was founded in 1818, and for several years past it has been the most frequent residence of the governor-general of India.

SIMMEN, a river Switzerland, rises in the S. of San Bern on the N. slope of the Bernese Alps; flows first N. N. W. through the romantic valley of same name, then E. N. E. and joins the Rhine, 3 m above Lake Thun; total course 85 m.

SIMMERING, a vil. Lower Austria, near r. Danube, about 15 m S. E. Vienna, of which it may be considered a suburb. It has a very extensive brewery, and manufactures of leather and chemical products. A great quantity of vegetable stuffs are raised in the neighbourhood for the Vienna market. Pop. 2080.

SIMMERN, a tn. Rhenish Prussia, gov. and 86 m S. W. Coblenz, with three churches, a synagogue, and borough-school manufactures of woollen and linen cloth, bootery and leather, an iron and several other mills. Pop. 8100.

SIMMOZHEIM, a vil. Wurtemberg circle Schwetzingen, bail and near Calw, with a parish church. Pop. 1020.

SIMNITZA, or *Thunau*, a market in Walachia, on the Danube, opposite Kustova, 77 m S. W. Bessarabia.

SINOAGA, a fortified town Hindoostan Mysore, 1300 m N. W. Seringapatam, lat. 15° 56' N. lon. 75° 41' E. destroyed by the Mahattas in 1790.

SIMONVURN, par. Eng. Northumb. 18 872 ac. P. 1080.

SIMONOSEKI, a small tn. and harbor Japan lat. Nippon on the Strait of Kiusiu with an active coaling-trade, some quarries of serpentine, and a celebrated temple.

SIMONSTOWN, a tn. Cape of Good Hope, on Simon's Bay an indentation on W. side of False Bay. It is 25 m. S. Cape Town and consists of little more than a single row of houses between the sea and the foot of a steep mountain. A large proportion of the houses are places for the sale of strong drink, and many are also stores. There are here a Wesleyan chapel and an Episcopal place of worship.

SIMONTOURNA, or *SIMONTOURNA*, a market in Hungary, co. Tolna, on the Sio 56 m S. S. W. Buda. It contains a church, a handsome chateau, and the ruins of an old castle and has several mills. Pop. 1861.

SIMONY, a vil. Hungary, Thuring Danube, co. Tinn, burg 10 m from Stein-am-Engel with two churches. P. 1414.

SIMPANG, a vil. Java, close by Sorabaya, of which it forms a kind of suburb, containing many elegant seats, and the magnificent residence-house of the provincial governor.

SIMPANG, a tn. Borneo 18 m. from S. W. coast, 21 m N. E. Succadana near the confluence of the Mattan with the Simpang, a short stream which rises in two branches in Mount Spondin, is called the Semendang in its upper part, and has a S. W. course of 4 m.

SIMPLON (German, *Simplen*, Italian *Simplone*) a mountain of the Lepontine Alps Switzerland in the P. of San Vaila, and celebrated for the road which passes over it, and is justly regarded as one of the most celebrated engineering works of modern times. It commences near Brig on the Swiss side, and terminates at the town of Domodossola, in Piedmont. (See Alps, vol. i. p. 108.)

SIMPSON, par. Eng. Bucks. 1380 ac. Pop. 540.

SIMUSIR, one of Kurile Is. N. of Urup lat. 47° 50' N. lon. 151° 55' 50' E. It has a circuit of about 75 m. but has no good anchorage; and consists almost entirely of a mass of mountains many of them peaked, and extremely volcanic. It does not appear to be inhabited.

SIN, or *Sin-sin-kong*, a tn. France dep. Nord, 2 m E. Douai. It has some trade in flax. Pop. 1840.

SINACANTAN (SAN DOMINGO) a tn. Mexico dep. Chiapas, on the borders of Tabasco in the territory of the Zaque, with considerable manufactures of shawls, and other articles of silk. Pop. 2500.

SINAI is properly the general name of a mountain-range, Arabia Petraea, occupying the E. extremity of the peninsula of same name which projects between the two forks of the Red Sea, the Bay of Suez separating it from Egypt on the W. and

SIMBIRSK.—From a Russian by Hippo Land.

natives town, it contains above 400 houses, built of wood and stone, in European style, and dispersed amongst forests of oaks, along the crest of different mountain-ranges. At the observatory, the summer-heat has been found seldom to rise above 72°, and the mean temperature of the year is about 63°. Fish Simbirsk is accordingly resorted to by British invalids, who

the Bay of Amah separating it from another portion of Arica or the E. Mountains, however, the name Sinal, or rather Jobolot-Sinal is used in a more restricted sense, and confined to the culminating mountain of the mass, which is situated north from its N edge and presents a number of magnificent peaks, the loftiest of which rises 9274 ft. above sea-level. The whole mass is of a triangular shape, about 70 m. long from N to S, terminating nearly in a point in the latter direction but gradually widening out till its N base has a breadth of about 80 m. It consists of a series of mountains, composed for the most part of granite, marble, and porphyry, with occasional strata of sandstone and limestone, and intersected by numerous scoldes or valleys. These are generally more ravines, deep and narrow, and bounded in by walls of granite, which in some instances rise almost perpendicularly, as to form precipices 1000 ft. in height but a few of them attain a considerable width, and one of them in particular, called Waddi Mema, as believed, both from its extent and its locality to be that on which the Incasites encamped during the giving of the Law. Mount Sinal proper is situated considerably N W of this valley, and not being visible from the supposed encampment, cannot claim to be the sacred spot where the Law was promulgated; but immediately S. and E. of the Waddi another mountain rises more than 2000 ft. above it and has been almost universally recognized as the scene of the wonders with which that ever-memorable event was accompanied. This mountain, 7565 ft. above sea-level still bears the name of Horob, and immediately at its base overlooking the Waddi Mema, stands the celebrated monastery of St. Catherine. Its buildings form a quadrangle, inclosed by walls, on an average 30 ft. and at some points 50 ft. high, and strengthened by bastions, which give it all the appearance of a fortress. The interior contains, in addition to cloisters for the monks and extensive office a principal church, overladen with tasteless ornaments, 33 more churches or chapels each dedicated to a particular saint and a library supposed to have been once of great value but now deprived of its treasures through the carelessness or mercenary spirit of the monks. In the loftier valleys of the Sinal peninsula the moisture is tolerably abundant, and suffices not only to furnish a spontaneous covering of grass, but to rear shrubs of mosses and ferns; but in the lower valleys the vegetation is much more scanty and the general appearance of the surface is very desolate.

SINALOA a dep and to Mexico. See CHALOA.

SINALUNGA a m. Tereacy. See ANTRALUNGA.

SINARUCA, a river Venezuela rises in prov Aoba-guas about lat. 8° 30' N lon 69° 12' W flows nearly due N., and falls into the Orinoco, about lat. 6° 32' N lon. 67° 30' W having been previously joined by the Sinaguila. Entire course about 120 m.

SINAY a vil. and com. Belgium, prov E Flanders 15 m. N E by E Ghent with manufactures of linen and cotton, distilleries, breweries a tannery dye-work vinegar-factory and several coars and oil mills. Pop 4110.

SIND, or SINDU, a river Hindoostan which rises in a small mountain-range in Malwah, 13 m. S W Baroda flows easterly N N W., and joins bank Chambal total course, 200 m. Its current is too rapid for navigation.

SINDE See SETHON.

SINDLFFINGEN, a m. Württemberg, circle Neckar, 2 m. N N W Böblingen, with a handsome church, a grammar-school, and manufactures of linen and woollen cloth. There was once a Benedictine monastery here. Pop 8869.

SINJIA, a vil. and com., lat. Haridon, div Sassen, 7 m. E N E. Ross. Pop. 1061.

SINDIM, or SINDUR, a m. and par Portugal, prov Beira-Alta, 13 m. S.E. Lamego, near bank Tavora. P 1185.

SINDORSKOE, a lake, Russia, in N of gov Vologda, 80 m. N N E. Ist-thoak great length, E. to W, 12 m. mean breadth, about 3 m.

SINEJA a river Russia, rises near Lukow gov Vittebsk flows N through gov Pskov and turning E joins L bank Volga, 15 m. above Ozerov; total course, 100 m.

SIN-EL, a m. and esparg, Portugal, prov Algarve, on a small creek of the Atlantic, 47 m. S. by E. Setúbal. It is walled, has tolerably well-built houses, and straight spacious streets. Its port is small, and the inhabitants are chiefly engaged in fishing. Vasco-da-Gama was born here. P 1660.

SINEU a m. Spain, lat Majorca, 21 m. E Palma; with an ex-convent, the church belonging to which is open for worship; a manum, formerly a palace of the kings of Majorca, a parish church and a school of primary instruction near it; a fine quarry On May 1, there is a well-frequented fair for cattle, fruits and general merchandises. Pop 3818.

SINKEW a river, Brit. America, rises E. side of the Rocky Mountains, about lat. 66° N flows N.E., and joins the Peace River, after a course of about 100 m.

SING SING, a m. U. States, New York, pleasantly situated on a commanding height above 1 bank Hudson, 30 m. N New York. Among its public edifices are Episcopal, Presbyterian, Methodist, and Baptist churches, an academy, occupying a marble structure three stories high; a female seminary, remarkable for the beauty of its site; and a large state-prison or penitentiary. The last, situated in an inclosure of 120 ac., consists of a range of buildings in the form of a hollow square, five stories high and containing cells for 1000 prisoners. The main prison has a front of 484 ft. Joining the Hudson, and the female prison stands on a height apart from it. The whole buildings are constructed of a fine white marble, abundant in the vicinity, and are tastefully and handsomely quarried, chiefly by the convicts, who, in 1850 numbered 721 of whom only 80 were females. Another magnificent structure recently erected here, is the Croton aqueduct-bridge, which spans the Sing Sing creek by a single arch 88 ft. wide, and 100 ft. high. Pop. (1850) 4899.

SINGAPORE, a British settlement, India beyond-the-Ganges, subordinate to presid. Bengal and consisting of a small island, lat. 1° 17' N lon. 103° 50' E., and its cap., of some extent, with numerous surrounding islets off S. extremity of Malay Peninsula, between Cape Mersa and Cape Sumatra, and separated from the mainland by a narrow strait, 2 m. to 4 m. in breadth, called Selat Tabora [old strait] through which ships between India and China used to pass in the earlier periods of European navigation. The principal island is of rhomboidal shape about 20 m. long E to W, and 11 m. average breadth, about 275 sq. m. Like the adjacent islets, it is mostly covered with a very thick jungle down to the water's edge. Its surface is generally undulating rising in some parts into round jungle-covered hills, the highest of which (called Bukit-Tima or the Tin-hill) rises 530 ft. above the sea. Near the coast are some low tracts of a very character, flooded daily by the tides. The soil of the hills is chiefly of coralline resting on sandstone that of the low ground is generally blackish, from containing a great proportion of decayed vegetable matter. A stiff clay is found in some parts, well suited for the manufacture of kaolin-pottery but it is little employed for burning. Fragments of granite and trap are scattered along the beach, and these formations seem to underlie the sandstone on the higher parts of the island. Iron is the only metal produced though tin probably exists here, as in the neighbouring countries. The island has no rivers, but has several rivulets, one of which stands Singapore, the capital. The climate resembles that of Malacca in its equability, but from the absence of regular alternations of land and sea breeze, it is considerably hotter. The thermometer annually ranges between 71° and 89° Fah., the average summer-heat (May and June) being 84° the temperature of the colder months (December and January) 76°. Though only 76 m. from the equator, the island is remarkable for salubrity. Its proximity to the line secures frequent refreshing showers its fallow is, in consequence, always in the full bloom of summer. The greatest quantity of rain falls in December and January, and the total annual fall averages about 108 inches, nearly a half less than that at Rangoon. The soil where of sufficient depth, is well adapted for the growth of spices, and all kinds of these products grow readily, but nutmegs, cloves, ginger and pepper are the only sorts raised for commerce, the last named is dependent on the cultivation of gambier an abundant crop, the leaves of which, after being boiled, are used as manure for the pepper-vines. The sugar-cane and coconuts have also been cultivated with considerable success. Rice, coffee, and cotton do not thrive. Numerous vegetables are raised by the Chinese settlers, including pumpkins, various kinds of melons, cucumbers, pumpkins, potatoes, onions, garlic, and others familiar to the country. Singapore possesses all the fruit-bearing trees of the Indian Archipelago. Agar-agar is delicate tree-like sta-

wood) is plentifully found on the neighbouring coral reefs and shoals, and is an important article of commerce for the China and eastern markets. Tigers swarm in the jungles occasionally committing great havoc and, indeed, according to a recent authority carry off from 200 to 300 persons annually. The wild-cat otter, flying-squirrel ferret porcupine, pangolin, sloth, wild-bag several kinds of monkeys bats, especially the flying-fox or pteropus several varieties of rats, two peculiar species of deer and two small varieties of the ox tribe,

are native the dugong abounds on the shores. The birds comprise falcons, owls, various species of peacocks, pheasants, and partridges, penguins, herons woodpeckers, paroquets, Java sparrows, &c. with many varieties of vading birds but web-footed birds are rare. Amongst reptiles, are turtles (both plentiful and cheap) tortoises, crocodiles, the black cobra and other varieties of serpents. The coast and rivers abound with fish—scorps, molluscs, rays sharks, &c. with crabs and prawns and other crustaceans are abundant.

Land, Towns, and Agriculture.—Not more than one-fifth of the island has hitherto been cultivated the expense of clearing the land and, till recently, the government regulations respecting territorial grants, presenting serious obstacles to agriculture. Since 1840, however the government land has been let, under a new regulation at the rate of five rupees (10s) per acre yearly, in perpetuity.

The lands under cultivation are stated to be—gambier bushes 24,220 ac. pepper-vines 2814 ac. coconut trees, 2648 ac. pine-apple, 1460 ac. nutmeg and mace, 1190 ac. fruit 1038 ac. cloves ginger &c. 1780 ac. making a total of 34,800 ac. Of the coco-nuts 1 080 000 are produced annually and of the pine-apples about 3 000 000. The field-labour is performed mostly by Chinese, but also by Javaneses, Boyas, and Malays.

The government of the colony is vested in a governor (who holds that office also in Malacca and Penang) assisted by three resident councillors, a police-magistrate, &c. The high court of justice has civil, criminal, and admiralty jurisdiction, and is presided over by a recorder appointed by the British crown or, in his absence (for he is generally resident at Penang), by the governor and councillors. The military force of Singapore consists of three companies of Madras native infantry, and a small corps of artillery—in all about 700 men.

THE TOWN OF SINGAPORE is situated on the S side of the island, on both banks of a creek or rivulet of some name, and stretches E for about 1½ m. to another small creek, called the Rongko river. By these rivulets it is separated into three distinct divisions—the W. inhabited by Chinese the central and best part, by the Europeans, and the E., by the Malays,

&c. The central part of the town is laid out in regular streets, lined with substantial brick houses and towards the shore is ample space for parks and carriage-drives. Here are the principal public offices, official residences, hotels, exchange and churches. The English church, erected in 1838 is a handsome building and the American chapel is also a neat little edifice. On a hill N of the town is the government-house and on the shore is the Singapore Institution, founded

SINGAPORE. From Government. M.S. — From sketch by William P. H. Esq.

by Sir Stamford Raffles, in 1823, for the cultivation of the Chinese and Malay languages, &c. but now ill supported and falling into decay. The W. division comprises the warehouses of the English merchants, as well as the dwellings and shops of the Chinese, who have also here a splendid pagoda of grotesque exterior. The E. part of the town (designated the Kampong-glan) comprises the shops of the Chinese and Malays, and is remarkable for its filth and squalor. Many of the dwellings there are raised on posts. Bridges, chiefly of wood,

over the rivulets, unite the three divisions. The higher classes of the European merchants, &c., generally live in bungalows or garden-houses in the suburbs, and along the beach S. of the town, which commands fine views of the harbour and both its entrances. The retail trades of the town chiefly engaged by the Chinese are for the most part carried on in the streets, and carpenters, blacksmiths, shoemakers, butchers, bakers, tailors, barbers, crockery and oilmen, and coffin makers, are to be met in succession. Money-changers are to be found here and there sitting cross-legged on their tables with coins and cowrie-shells before them and large well-supplied shops are not wanting. All the mechanics and house-builders, some of the boatmen and fishermen and many of the commercial clerks and over-seers, are Chinese, a considerable number of whom are born on the island; but the canlars and those connected with shipping are generally Hindoos. The Malays are the filial of all the population, yet they make good palm-leaf weavers, and form the body of the sumpian-men, who, with their light canoes, maintain a communication between the ships and the shore.

The manufactures of Singapore are few the principal being that of preparing sugar, which is imported for this purpose from Sumatra, and sundry other islands. The process, which is called pressing, and fits the sugar for being pressed for years, is carried on wholly by Chinese. Some of the Chinese also who are pretty good blacksmiths, employ themselves actively in the manufacture of agricultural implements, tools, arms, &c. Several handies are also employed in the manufacture of pure-alloy fibres and twines, which is exported to China for fabrication into pane-cloth. Singapore enjoys so high a commercial reputation and carries on much extensive transactions as a trading colony that it has been termed the Liverpool of the East. It has, in fact, become the great entrepot of S. Asia and the Indian Archipelago, to which the merchants of all parts of the Indian Ocean resort with the produce of their farming and manufacturing industry and in which they find a ready market abundantly stocked with every variety of European goods. The port also has the advantage of being perfectly free to vessels of all kinds and nations, without charges on exports and imports, or storage, harbour, and light dues. The imports from Great Britain comprise woollens, piece-goods, cotton-twill, iron ware, gunpowder, wines, and various manufactures; the exports hitherto consisting of tin, nutmegs, cardamom, coffee, sugar, cassia, benzoin, betel nut, raw silk, hides, ivory, tortoise-shell, mother of pearl, gutta-serena, and very numerous sundries. The imports from continental Europe consist of wine, spirits, and liquors, beer, British and French piece-goods, fire arms, iron and steel articles, glass-ware, salt provisions, &c. for which it stands in return numerous articles of Asiatic produce. The imports from the U. States comprise manufactured goods, provisions, tobacco, and sundries, with large consignments of Spanish dollars, in exchange for coffee, sugar, pepper, cassia, tin, tortoise-shell, rice, &c. Singapore also carries on a most extensive trade with Labuan, Madras and Bombay and vessels come throughout the year bringing large supplies of raw cotton, India cotton-goods, opium, rice, &c. in return for which they take black gold-dust, tin, pepper, sugar, catkins, sapwood, and treasure. From China upwards of 200 junks yearly ranging from 50 tons to 500 tons burden, come with the monsoon and enter the port early in spring with cargoes of tea, camphor, blue and yellow sandalwood, coarse earthenware, and various Chinese sundries for which they take back in return raw and manufactured cotton, opium, trepang, pepper, tin, nutmegs, pine-apple skins, edible birds-nest, beeswax, shark-fin, pepper, &c. and the value of the cotton and opium only has been estimated at £450,000 yearly. The Siamen and Cebu-Chinese come in the N.E. monsoon partly in junks of about 30 tons burden, but also in square-rigged vessels, commanded by Europeans and manned by natives. The Javanese come in vessels ranging from 150 tons to 500 tons burden with coffee, rice, &c. and the Bagin from Celebes send 200 laden ragoon boats or pambas in summer laden with coffee, rice, gold-dust, tortoise-shells, trepang, the Balleins bring large supplies of rice, coarse native cloths, and a few stout ponies; and the Borneans bring nutmegs in autumn, with black pepper, gold-dust, &c. Singapore has also a pretty extensive trade with the sister settlements of Penang and Malacca, as well as the Malay Peninsula.

COMPARATIVE ABSTRACT STATEMENT of the TRADE of SINGAPORE with the surrounding PLACES for the YEARS 1861 and 1862.

Names of Places.	Imports.		Exports.	
	1861.	1862.	1861.	1862.

Tea	1,008	8,14	1,40	1,40	1,40	1,40
Antimony	572	4,430	5,865	18,673	4,256	540

Ships lie in the roads or open harbour in 10 or 15 fathoms water, 1 m. to 2 m. from the town. The river or creek is accessible to the lighters and the goods are taken in and discharged at the docks of the principal warehouses. The arrivals and departures of vessels from 1849 to 1853 were as follows:

Years.	ARRIVALS.				DEPARTURES.			
	Square-Rigged.		Native.	Others.	Square-Rigged.		Native.	Others.
1849-50	70	340 178	1,408	58,520	68	328 60	2,188	60 776
1850-51	578	1,804 432	2,114	69,520	111	390 345	2,126	70 705
1851-52	823	330,231	2,098	39,508	190	719 2,947	83,565	83 565
1852-53	885	345,184	2,107	70,194	875	287 704	2,949	73,670

In 1865 there entered 3737 vessels (including 502 steamers) with a tonnage of 853,666 the departures were 3795 (including 297 steamers), tonnage 940,090. Among the vessels there were in 1864 of long voyage 3443 against 2838 in 1864.

Currency and Weights.—Merchants accounts are kept in Spanish dollars = 48 cts. Almost everything is sold by weight, and the weights in use are the Chinese pint of 100 catties, or 133½ lbs. avoirdupois. Rice from Batavia and the archipelago, and salt, are sold by the cocon of 40 piculs. Bengal rice, wheat, and pulses of the same country, are sold by the bag, containing two Bengal mounds, or 164½ lbs. avoirdupois. Free-goods &c. are sold by the cocon or score. English weights and measures, however, are frequently used in reference to European commodities. The language of commercial intercourse is universally Malay.

History.—The island of Singapore is celebrated in Malayan history as having been the first place of settlement of the early Malay colonists from Sumatra. Their location there took place towards the middle of the 13th century, and the line of the present town Singapore were still traceable in 1819. Nearly a century afterwards the island was invaded and the city taken by the Javanese, who, however, did not

make any permanent settlement, though the Malays were driven N to Malacca, where they founded a new kingdom. After this event, the town seems to have fallen into decay, and the country to have been abandoned, for when the British (after having restored Malacca to the Dutch at the conclusion of the last continental war) wished to form a settlement in this neighbourhood, in order to preserve their trade with the Indian Archipelago, they found, on their arrival at Singapore, that they belonged to the kingdom of Johore, in Malacca, that the whole island had only 150 inhabitants. It was by the suggestion of Sir Stamford Raffles that the happy choice was made of Singapore for the site of the present flourishing commercial emporium. From the then resident officer or chief, called the *Rampong*, the British, in 1819, obtained permission to build a factory on the N shore of the island, and by treaty in 1824 purchased for 60,000 Spanish dollars (£18,000), and a life annuity to the Sultan of Johore, and his resident officer, of 24,000 dollars (£6,400) the sovereignty and fee-simple of the island, as well as of all the coast, straits, and islands to the extent of 10 gae m around. On the cession of Benocool to the Dutch, in exchange for Malacca, in 1826, Singapore was placed under the provincial government of the Straits settlement, which is fixed at Penang, where the governor usually resides.

The population in 1823 amounted to about 10,000 persons; in 1836 it had increased to 80,000, and, in 1850, the island of Singapore and its dependencies contained a population of 62,891, besides 1548 convicts from India, and 670 troops. Pop in (1860), 25,918. The census of 1860 showed the total population of the island to be 81,784 of which number about 60,000 belong to the town. Among these the Europeans and their descendants counted 2368, 1008 males and 882 females; Malays 11,686, Chinese 50,048 (46,785 males, and 3248 females), Indians 373, other Asiatics 4445. In the whole island there were 70,122 males, and only 13,616 females. —(*Jour Ind. Archip. Belcher, Voy Samarang Singapore Free Press Davidson: Trade and Travel in the Far East, &c*)

SINGBOOM, a N Hindoostan, prov Orissa, 180 m W Calcutta lat. 21° 31' N lon. 85° 40' E.

SINGEN a market in Baden, Lake Uri, 7 m W N W Radolfzell near L bank Aach. It has a church manufacture of tobacco, and a bleachfield. Pop. 1174.

SINGHAI, a N Hindoostan, prov Bahar, 17 m N Patna lat. 25° 32' N lon. 85° 15' E.

SINGILILEW, a N Russia, gov and 27 m S S E Simbirsk, on the Volga, at the confluence of the Singileika It has a stone church, and a haven on the Volga, at which a considerable trade in corn is carried on. Pop. 3482.

SINGKEL, a N Sumatra, W coast, mouth of the Singkil 8 m N W Cape Singkil lat. 2° 15' N. It has a good harbour, some boat-building and a trade in benzoin, camphor, pepper, gold, trepang, wax, resins, &c. Near it are pearl-banks.

SINGLETOWN, par Eng Essex, 8010 m. Pop. 603.

SINGLETON, a N New S Wales, co. Northernland, r bank Hunter 120 m from Sydney.

SINGO-SANZ, a vil Java, prov Paseroom, dist Malang with remains of one of the finest heathen temples in Java.

SINGAGLIA (anc. *Sena Gallia*) a N Italy, dept. L'Rhône-Puaro, at the mouth of the Misa 17 m W N W Ancona. It is surrounded with ramparts and bastions and defended by a citadel, and is in general well supplied with artillery. Its principal edifices are the cathedral, the churches of St. Maria and Santa Croce, and the church attached to the Franciscan convent beyond the walls, the mint, theatre, several synagogues and convents, and a Jewish synagogue. Its port is small, and admits only small vessels, but from its advantageous position, enables the inhabitants to carry on a considerable trade. Its fair one of the largest in Italy has existed annually for about 600 years; it lasts 20 days, from July 20 to August 8, and is attended by dealers from all parts of Italy from beyond the Alps, and from the Levant. The celebrated singer Madonna Catalani was born here. Singaglia was the scene of an infamous and perfidious massacre, which Count Sforza, son of Pope Alexander VI., perpetrated on his allies in 1502. Pop. 8000.

SINTOUKHA a sluggish muddy river Russia rises in gov Kiev; flows S S E, and joins L bank Dniep at Olvopol; total course, about 150 m. Before the peace of 1791, this river formed the boundary between Russia and Turkey.

SINIBCOLA a maritime vil and com. Isl Sardina, div Sassari, prov and 30 m N E Nuoro. It has a handsome church and a trade in corn fruit, honey and cheese. It has an unhealthy site, but the number of Genoese and Neapolitan fishermen, which visit the bay on which it stands, for trade, have made it wealthy and thriving. Pop. 2400.

SINJAR, or **SUNGALI** small decayed town Anadol Turkey, prov. and 70 m W Mosul 1 bank Al Khab, on a small hill at the base of the Sirjir Mountains, and edge of the desert of Sygar. It occupied a much greater space in former times than it does at present, as appears from the extensive ruins in the plain below. It contains now of not more than 80 houses. —The **SUZAR MOUNTAINS** extend about 60 m N W from the town and have a breadth of 7 m to 9 m. In some parts they are covered with oak, and in others with the fig-tree and the vine. —The **NEZAR** extends between the Euphrates and the Tigris, from Kakuia to Mosul and is traversed by the Hamran Hills.

SIN, or **SIN** (anc. *Cune*) a N Asiatic Turkey, prov. and 90 m S S E Mosul, in a well-cultivated valley r bank Tigris, opposite to the confluence of the Little Zab. It is a flourishing place, enabled for its prosperity to an active trade with Mosul, Bagdad, and Ispahan. Pop. about 8000.

SINMA, **SAWA**, or **SANMANA** a N Persia, prov Irak Ajem, dist. Arbilan, 286 m W S W Tuluza. A castellated palace on a height with some good looking buildings round its base give to this town a somewhat imposing appearance. It contains about 4000 or 5000 families of which 300 families are Jews and 50 houses of the Chaldean Catholic rite, dependent on the Patriarch of Durebar.

SINNAI a N lardina, div and 10 m N E Cagliari in a fertile district with a trade in corn, wine, cattle, and dairy produce. Pop. 2628.

SINNALEARI, a river S America, French Guiana, which descends from a mountain-chain traversing the centre of the interior flows N and falls into the Atlantic at a town of same name after a course of about 130 m.

SINNIATION par Fug York (N Hiding) 3890 ac. Pop. 879.

SINAO a river Naples rises in prov Basilicata flows N N E, and falls into the W shore of the Gulf of Taranto, after a course of about 65 m.

SINOPE (Turkish, *Sinop*) a seaport, Anatolia Turkey, prov. Anadol on the Black Sea, 850 m N N E Constantinople; lat. 40° 12' N lon. 35° 13' 30" E (n.) It is beautifully situated on an isthmus which connects the high rocky penin-

sula, called Cape Sinope with the mainland. It is defended by a wall, strengthened by several towers while the harbor or roadstead which is on the S side of the isthmus is surrounded by several bastions, and the castle, a massive building, erected in the time of the Greek emperors. The town to a considerable extent is built of the ruins of an old Greek city and in many of the walls Greek and Paphlagonian coins, statues, and inscriptions are to be seen. It is a naval arsenal, and has a building-yard. The oak of the neighbourhood being well suited for ship-building many of the Turkish war-vessels are built here. Commerce there is almost none but it is a con-

depot for the steamers between Constantinople and Trebizond. Its chief importance arises from the facility with which it might be strongly fortified, and from the secure anchorage

the two are the ruins of a castle, called Tourbillon built in 1894, and long the residence of the bishop; on the other height is a castle, called Valeria, which, with its lofty walls and towers, has a very imposing appearance. Below these castles, but still higher than the town, is a third, called Majors, which was made uninhabitable by a fire in 1788. Non has repeatedly suffered much from war fire, and inundation. Pop. (1850), 3016.

SIPOUTUBA.—From the South by Dr. G. F. Mason.

presented by the bay and harbour the best indeed on the S. shore of the Black Sea. On November 30, 1853, a Turkish fleet of six frigates, three corvettes and two steamers, lying at anchor in the bay was suddenly attacked by 18 Russian ships, three deckers, two dockers, corvettes, and steamers which had approached unperceived by favour of a fog. A fierce seven hours' battle fighting the whole of the Turkish fleet, with exception of one steamer which escaped was destroyed, and along with it about 4000 men. The batteries and forts on shore were silenced by the Russian guns. Sinope was the birth place of Diogenes, and the capital of Mithridates by whom it was embellished and who formed a line here on either side of the isthmus. Pop. about 4000.

SINOPOLI (SINOPOLIS and SINOPOLIS) two adjoining places Naples, prov. Calabria-Ultra II about 8 m. S.S.E. Polio. The former has pop. 590 the latter contains a collegiate church and has near it a spring of nitro. Pop. 1500.

SINSE a vil. and par. Switzerland, cant. Graubünden, on a hill in Lower Engadine valley. It is very well built and contains a combined town-hall and schoolhouse. L. pop. 1427.

SINSHIPIM a tn. Baden, prov. Lower Rhine, on the Rhine, 23 m. S.S.E. Mannheim with a church and a superior burgher school; manufactures of woollen and linen cloth, tanneries, oil and saw mills. Pop. 2869.

SINU or ZINU a river New Granada, rises in the central branch of the Andes, dep. Cauca about lat. 7° S. flows first N.E., then N.W. and after a course of about 100 m. falls into the Gulf of Morrosquillo in the Caribbean Sea.

SINZIG (anc. Sinzium) a walled tn. Rhene, Prussia, gov. and 19 m. N.W. Coblenz, near 1 bank Rhine. It is poorly built, and has an old parish church and a synagogue. According to tradition it was near this place that Constantine, on his march from Britain to Rome, saw the appearance of a cross in the sky and was in consequence led first to embrace and then to establish Christianity. Pop. 1856.

SION (German, *Sion*; anc. *Sion*) a tn. Switzerland, cant. valais, pleasantly situated near 1 bank Rhone, in the widest part of its valley 56 m. E. Geneva. It is surrounded with walls and ancient towers; and consists of a principal street, planted on either side, while the torrent Rhone runs in a deep bed along its centre, and several narrow streets which open into it. The houses in the principal street are good, the others very indifferent. The principal buildings are the cathedral a Gothic structure; the church of the Jesuits, the townhouse a fine specimen of pure Gothic, the arsenal, and the hospital. Close to the town rises a steep rock, divided into two parts by a deep ravine. On the higher of

casations. It has several basins, baths, and some handsome mosques, one of which is remarkable for its lofty minaret but the generality of the houses are mere hovels, and the streets are narrow and unpaved. Pipe-bowls of a superior kind are manufactured here, and sent in great numbers to Cairo. Sion is the resort of the caravans from Darfur which come through the Great Oasis. Pop. estimated at 30,000.

SIOUX or Big Sioux a river U. States, rises in an elevated prairie near the centre of the Minnesota territory and not far from the sources of the Minnesota or St. Peter flows S.E. for about 200 m. and joins 1 bank Missouri! In the lower part of its course it forms part of the boundary between Minnesota and Iowa.

SIPHANTO (anc. *Siphanto*) an isl. Grecian Archipelago, one of the Cyclades lat. 37° N. lon. 24° 40' E. about 12 m. W. Paros greatest length N. to S., 10 m. breadth about 6 m. circuit, 40 m. It has a somewhat elevated but finely diversified surface a good climate, and a fertile soil, producing much corn fruit, particularly figs, olives, honey, wax, sesamum, and silk, in all of which a considerable trade is carried on. The principal town a decayed place, bears the same name. It has manufactures of cotton and straw-hats. St.

SION.—From Geneva, looking over 1 Rhine.

phanto was once celebrated for its mines of gold and silver and is said to be still rich in lead.

SIPOTUBA, an antiferrous river, Brazil. It rises in the plains of Parana, prov. Mato-Grosso; lat. 18° 50' S.; between the towns of Mato-Grosso and the Paraguary follows the E.

slope of the Sierra Tapapont throughout its whole length receiving the Tapapont, Juva, and Jarunabaha. The Siponts, after the junction of these streams becomes navigable, and proceeding S for about 300 m, in a course nearly parallel to that of the Tapapont, joins the E bank of that river about 30 m above Yila-Mara.

SIR CHARLES HARDY'S ISLANDS. See **HARDY'S ISLANDS**. **SIR-DARIA** **JAKARTAS**, or **SIRON** a river, Central Asia which rises in Mustang Mountains, on the E. frontiers of Kokean, flows nearly due W past the capital of that name to Khojend, lat. 40° 30' N, where it turns suddenly N and flows first in that direction past Tashkend to Tunkat, then N W to Otrar and finally W N W to its mouth in the N. E. shore of Lake Aral. Its direct course N W is about 750 m and its indirect at least 1000 m. In the beginning of its course it flows through a country covered with lofty wooded mountains, from which numerous torrents and small rivers descend into it but after reaching Khojend it begins to skirt the sandy desert of Kizil Kum on the left, and beyond Otrar where it divides into two arms, skirts the desert of Kara-Kum on the right. After reaching these deserts it is not augmented by any tributaries of the least consequence, and pursuing its course along flat banks covered with reeds and brushwood, divides into several branches which form islands. After the union of the streams which form its sources, it acquires considerable breadth, and might be used for transport, though it is only employed for irrigation. In July it reaches its greatest height by the melting of the snows and besides overflowing its banks extensively brings down immense quantities of debris, which have produced at its mouth several sandbanks and even islands. On the largest of these islands called Koz-Aral as well as on the oases on both sides of it, many of the nomadic Kirghiz have winter stations. The other arm into which the river divides beyond Otrar takes the name of Kizil Dera; experts also to have formed a regular channel and continued its course W N W to Lake Aral, but is now lost in the sand without reaching it.

SIR EVERARD HOMES ISLANDS, a cluster of islands off N. E. coast, Australia, extending about 4 m. from Cape Grenville lat. 11° 57' 40" S lon 140° 11' E.

SIRA KOS, a lake, Asia, Hindukush on the table-land of Pamir at the height of 16,600 ft above sea-level lat. 37° 27' N lon 78° 40' E. It is in the form of a crescent, about 14 m. long E. to W. with an average breadth of 1 m., it is surrounded on three sides by swelling hills, and on the S. by mountains which tower 3600 ft. above it and belong to ranges which give rise to some of the principal rivers of Asia. This lake is the source of the Oxus or Amoo-Daria.

SIR JAMES SMITH'S ISLANDS, part of the Cum barland group, off N. E. coast, Australia. The principal island called Lums Peak is lat. 20° 40' 30" S lon 140° 9' 10" E.

SIR JOSEPH BANKS'S ISLANDS. See **BANKS'S ISLANDS**.

SIRANG lat. Indian Archipelago. See **CERAM**. **SIRAU**, a vil. and com. Belgium, prov. Hai namt, 9 m. W. Mons with manufactures of linen cloth, earthenware, glass and tile-pavement, an extensive salt refinery, brewery, luncheon, and two flour-mills. Pop. 2337.

SIREN, **CHIMERO**, or **GOSCHIK**, a vil. Hungary on road near Oedenburg, with a church and mineral-springs. Pop. 1168.

SIRIND, a vil. in Hindostan prov. and 155 m. N N W Delhi, cap. dist. of same name. It was long a famous city but is now almost a shapeless mass of ruins, having never recovered from the dreadful ravages of the Sikh Bannagie Banda, who, about 1707, destroyed the mosques and levelled the palaces and public buildings with the ground. In its vicinity are numerous mango groves, and some tanks of excellent water. The extensive plains between Sirind and Karnal have been the scene of many celebrated battles, both in ancient and modern times. The district, the N. W. of prov. Delhi, between the Satlej on the N and the head branches of the Jumna on the E., consists of extensive plains, generally fertile, well covered with mango-trees, and productive of wheat, barley, and other grains, though the crops occasionally suffer from a deficient supply of water.

SIRI POOL, a tn. on the N. frontiers of Afghanistan, where the Mountains of Hussak slope towards the Mountains of Koondoo lat. 36° 11' N, lon 65° 44' E. It belongs to an Uzbek chieftain, who masters 1000 horsemen, and maintains a precarious independence.

SIRNAGUR, a tn. in Cashmere. See **BANAGUR**.

SIRMORE, or **SOMANOR**, a principality N Hindostan bounded N by Bussahar from which it is separated by the Pabur, W by Hindoor and the Barah Fodrah, S. prov. Delhi and E. Gurhwal and the Jumna. It is entirely covered by ramifications of the Himalaya, radiating from the peak of Char which is situated within the principality, and has a height of 10,538 ft. It has long been governed by a race of Rajput princes, said to have come originally from Jandahra.

SIRNACHI, a vil. and par. Switzerland, cant. Thurgau, 17 m. S. W. Gossau. It contains a great number of well-built houses, and a church used in common by Protestants and Catholics, who are nearly equal in number. Pop. 7743.

SIRONK a vil. Hungary. Hilder Theam co. Heren about 5 m. from Kelenföld with a church and an old castle. 11164.

SIRONKA a vil. Hungary. Hilder Theam co. Baros 6 m. from Berthot with a trade in wool and cattle. Pop. 1139.

SIRUKA KULA a vil. Austrian Croatia about 8 m. from Gospić, with a church and the ruins of two old Turkish castles. Pop. 1991.

SIRULLA a tn. Spain, Extremadura prov. and 95 m. L. Badajoz. It has a townhouse, prison, public granary palace of the counts of Sirena, an endowed and two private schools, an hospital, a convent occupied by Franciscan nuns, and a church manufactures of linen by handloom and of soap, brick tile and pottery. Pop. 9240.

SIRWAN a ruined city, Iran, prov. Luristan 65 m. S. W. Kermanshah lat. 35° 30' N lon 48° 25' E. The ruins are composed of massive stone walls, a foundation of arches and minarets, a vaulted apse, and above which the usual construction seems to have been a single arched passage divided into a number of apartments surrounding a quadrangular court. Some of the houses are in a state of perfect preservation, the flowers and rude patterns upon the cement-coating of the interior of the vaults appearing as fresh as if star-pud but a few years ago.

SISAL, a seaport in Yucatan on the Gulf of Mexico, 100 m. N. E. Campeche with a fort lat. 21° 10' 6" N lon 90° 2' 40" W. (n.) At its entrance is a large anchorage.

SISAL FL. a tn. in Spain New Castile, prov. Cuenca 98 m. S. E. Madrid. It has two primary schools, a church several hermitages and a convent of Franciscan nuns. Pop. (agricultural), 3229.

SISARGA, a group of three barren uninhabited islands Atlantic, off N. W. coast, Spain about 24 m. W. Coruña. The largest which is about 8 m. long is of a spherical figure.

RUINS AT SIRIND — From a Sketch by Major Levent.

SISEBOLI a tn. Turkey in Europe. See **SISEBOLI**.

SISLAND a par. England, co. Norfolk, area, 466 ac. Pop. 77.

SISLAVICH, or **SISLAWITZ**, a vil. Austrian Croatia, on the Kuipa, 9 m. from Karstak; with a church and a castle. Pop. 1026.

SIRSA, a to. and some duny and 14 m. N W Parma, near I. bank Taro. It has a primary school, and a trade in hemp and cattle. Pop. 4855.

SIRSAIGH, a vil and par. Switzerland. area. and 18 m. S.E. Basel; with a handsome church, a fine chateau with gardens, the ruins of an old castle, a school manufactures of silk ribbons and a trade in corn, wine, and fruit. Pop. 1284.

SISLERON (anc. *Castro*) a to. France dep. Hautes-Alpes, at the confluence of the Isère with the Durance, here crossed by a handsome bridge, 17 m. N N W Digne. It is picturesque situated at the foot of a rock crowned by a citadel, is surrounded by ancient walls flanked by dismantled towers, ranks as a fortress of the third class but is a poor dirty place. It has a considerable trade in wine. Pop. 3765.

SISPAKES—1 Two small adjacent is. Indian Ocean. Andaman group lat. 11° 10' N, lon. 92° 46' E. (x.)—2 Two is. Tung-shan ying Bay, S.E. coast China prov. Guangdong; about lat. 23° 25' N lon. 117° 47' E.—3 Two low woody is. Philippines, off the W coast, Luzon lat. 15° 30' N lon. 119° 49' E (x) with a conspicuous sandy beach, and distant about 2½ m. from each other.

SISTON par Eng Gloucester 1827 ac. Pop. 926.

SISTOVA or *SISTOVA* a to. Turkey in Europe, Bul. garia, 35 m. S.W. Rustchuk, on a boggy bank of the Danube, here capable of floating vessels of 800 tons. It is surrounded by a palisaded fence, and defended by a castle is poorly built, but has several mosques, a Greek church, and an active trade chiefly in leather and cotton. It was taken and dismantled by the Russians in 1810. Pop. 12 000.

SIT a river Russia, rises in gov. Iver flows E. into gov. Jaroslavl then N and joins r. bank Mologa, after a course of about 80 m. It is famous for a signal victory gained upon its banks in 1237 by the Tartars over the Russians.

SITGES, a to. Spain, Catalonia, prov. and 18 m. S.W. Barcelona, on the Mediterranean lat. 41° 15' N lon. 1° 54' E. It is divided into two groups of houses, called the Old and the New towns each surrounded with walls, the former with irregular and the latter with regular streets. It has a courthouse, a large semicircular clock-tower built by the Moors, an ancient feudal castle, on an eminence in the centre of the Old town, and now used as the prison. Several schools a college, and a male school an hospital placed on the very cliffs, with two churches, one of them on a rock which serves as a bastion, and overlooks the sea. The vineyards which cover the amphitheatrical hills behind the town produce the famed Malvey wine. Trade important. Anchorage of port as good as any on the coast of Catalonia. Pop. 8508.

SITHNEY par Eng Cornwall 5898 ac. Pop. 2773.

SITIA, or *SITIA* (anc. *Othryne*) a to. on a bay N W coast, lat. 36° 50' N E. by S. Candia. It is fortified, and has some trade, but its harbour and roads are very imperfectly sheltered from the N. and N.E. Pop. about 5000.

SITIZANO, a to. Naples, prov. Calabria-Ultra 1.5 m. S.E. Palmi, nearly destroyed by the earthquake of 1783.

SITKA, or *SITKA* (anc. *Aschumash*) a group of is. N Pacific off W coast, Russian America, between lat. 56° and 58° N. It consists of four principal islands, Baranof, about 85 m. long, by 20 m. broad, and having on its W side Sitka, or Norfolk Sound, on New Archangel defended by two batteries, lat. (magnetic light) 57° 2' 45" N lon. 135° 17' 10" W the principal place of resort in this quarter, the headquarters of the Imperial Russian Company and containing a handsome governor's residence, and a Greek church. Crozno, also called Pitt Island is seen early charts, about 21 m. long; Chishagof, the most N. of the group, and Jacobi situated at the N.W. extremity. The Sitka islands are well wooded with wood, and both on the coast and in the rivers fish are very abundant, the climate is thought capable of raising barley, oats, and some European fruits and vegetables. The natives are brave but cruel.

SITKIN one of the Aleutian is. lat. 52° 4' N lon. 176° 2' W about 25 m. in extent, with a volcano in its centre, 5023 ft. high and covered with perpetual snow.

SITLAND, or *SITLAND*, a to. Holland, prov. Friesland, 15 m. N.E. Middelicht. It is an old town, and though once fortified is now open. It has a townhouse, prison, four churches, a synagogue, and several schools, some towers and fortifications, breweries, and distilleries corn and water mills, and a great trade in eggs. Pop. 2450.

SITTEN, a to. Switzerland. See Sion.

SITTINGBOURN, a market to. and par. England, co. Kent. The town 88 m. E.S.E. London, occupies chiefly of one wide street, which stretches along the high road. It has a spacious church, and a place of worship for Wesleyans. Area of par. 1008 ac. Pop. 2897.

SITZENDORF a vil. Lower Austria, on the Schmelz, 8 m. S. Schremsdorf with a church. Pop. about 1000.

SIVA, a river. Russia, rises in gov. Perm; flows S., and joins r. bank Kama, 34 m. N N.W. Sarapul total course, 100 m.

SIVACH GULF—MOON or PUTIN Bay, Russia, an arm of the Sea of Azov on the N.E. side of the Crimea, commencing with the sea by a narrow entrance on the N., and separated from it by a long and narrow belt of land. It has a length about 110 m., with a breadth varying from 9 m. to 15 m. is indented by numerous small bays, and contains several small islands, with precipitous cliffs.

SIVANA, or *SARADUMA*, an isl. Hindoostan, prom. Madras dist. Coimbatore, formed by the Cavery 10 m. long and 9 m. broad. It was the site of the ancient Hindoo city of Ganga Para. The place is now enveloped in the thickest forests, and the interior an impenetrable jungle; but the principal street may still be traced, extending N. to S. about 1½ m. There are here the ruins of many Hindoo temples, great and small and much sculptures of various kinds. Near it the Cavery forms two magnificent cataracts.

SIVAN or *ROUW* a par. Assin Parley in the N.E. of Assin Minor bounded N. by the Black Sea E. par. Trebizond and Erzeroum S.E. the Euphrates, separating it from par. Diarbekir, S. par. Marash and Karamania and W. the Kizil Irnak, separating it from Anatolia greatest length, E to W 810 m. central breadth, 175 m. The surface is in general finely diversified, being covered by several mountain-ranges of which the Anti Taurus in the E. and the Taurus Daghi in the N.W. are most conspicuous. The mountains are for the most part well wooded, and between them are extensive valleys and plains, often of great beauty and fertility. A small portion of the S.E. drained by the Euphrates, belongs to the basin of the Persian Gulf, but the whole of the remainder constituting by far the larger portion, belongs to the basin of the Black Sea, which receives its drainage chiefly by the Kizil Irnak, and more partially by the Yeail Irnak and other small streams. The soil is usually of great fertility and though only cultivated to a small extent, raises in abundance, in addition to the ordinary cereals, maize, sugarcane, flax, hemp tobacco, silk, wine, and excellent fruit. The pastures, extending not merely over the mountainous districts but over many of the valleys and plains, well adapted for arable husbandry are chiefly occupied by the flocks and herds of the Kurds and Turcomans. There are mines of iron, lead, and copper and quarries of marble, alabaster and slate. Salt also is abundant. The most important place of traffic in the interior is Tokat, and the best frequented port is Samsoun, but the capital is Sivas. Pop. roughly estimated at 800 000.

SIVAS (anc. *Sebaste*) a to. Asiatic Turkey, sep. above par. on an affluent of the Kizil Irnak, near the centre of a large and fertile plain, 410 m. E.S.E. Constantinople. It covers a space much of which is occupied by ruins consists of about 5000 Turkish and 1000 Armenian houses, partly tiled and partly flat-roofed, and arranged for the most part in very narrow, winding, and ill-paved streets is defended by two castles, each situated on a hill and has among its edifices numerous mosques, many of them with elegant porches and minarets, in the best style of Arabian or Persian architecture and some of them well-ornamented, commodious houses, baths, &c. Its manufactures are unimportant, but its central situation on the best road from Bagdad through Diarbekir and Malatya and its easy access to the Black Sea, enables it to command a considerable trade. Its vicinity is celebrated for a great victory gained by Lucullus over Mithridates, and a series of battles between Bajazet and Tamerlane towards the end of the 14th century, when Bajazet was taken prisoner and the town laid in ruins. Pop. about 37,000.

SIVEREM, or *BOUMER*, a to. Asiatic Turkey, par. and 56 m. W. S.W. Diarbekir. It consists of about 5000 houses, and has three mosques and three public baths.

SIVRY a vil and com. Belgium, prov. Hainaut, 33 m. S.S.E. Mons, with two churches, a chapel-house, three

primary schools; manufacture of woollen stuffs; charcoal, glass, bricks, &c.; and an active export trade in butter, cheese and timber. Pop. 8078.

SIWAH, or **AMMON** an oasis, Egypt, 220 m. W S W Cairo lat. 24° N lon. 28° E. 6 m long by 5 m broad. It consists of an E and a W district; the former abounding in date-trees, yielding fruit of very superior quality. The inhabitants are hospitable, but suspicious and savage. The principal town **Siwah** is divided into an upper and lower district. It is defended by a Citadel, and surrounded by strong walls. Marauding people alone are allowed to inhabit the upper town, and there no strangers are admitted. Rebels are compelled to live in the lower town. The principal commerce and source of revenue is derived from dates. The people have few manufactures beyond those things required for their own use which their skill however in making wicker-baskets is remarkable. About 8 m. W the town of **Siwah** are the ruins of the temple of Jupiter Ammon now called **On Dayeh** [another name], near which is supposed to be the fountain of the Sun. The ruins are not very extensive. Many of the sculptures, including figures of Ammon with the attributes of the ram headed god, and of other divinities, still remain.

SIX **ISLANDS**, **Chagos Archipelago**. See **KOMOR**.

SIX **MICA** **BANDS**, a tn. Ireland co. Clara, 8 m N W by W Limerick with a church, two R. Catholic chapels a national school, and a dispensary. It is altogether in a most miserable and ruinous condition. Pop. 767.

SIXHILLS, par Eng Lincoln, 1622 ac. Pop. 175.

SIXT a vil and cow farmstead dep. Haute Savoie, prov. Tanngney 8 m E.S.E. Bannock, on a steep rock in the valley of **Blax**. It has no works, supplied from mines in the vicinity. Pop. 1659.

SIZERÖL [anc. *Sargolis*] a tn. Turkey in Europe on a low promontory Gulf of Bursas in the Black Sea, 120 m. N W Constantinople. It is well built and has a commodious and well-sheltered harbour at which a considerable trade is carried on in wine and timber. The inhabitants are mostly Greeks. Near it are the ruins of the ancient **Apollonia**.

SKAGEN [Latin *Scagnum*] a vil Denmark, prov. N. Jutland, bail. Hjørring, on the remarkable tongue of land which forms the N. extremity of the province, and terminates in Cape Skaw or Skagen. It consists of three miserable groups of houses, the inhabitants of which are obliged to carry on an incessant and too often unsuccessful war with the sands, which threaten to engulf them. The church is already buried but little remains, and is an important landmark for mariners. A little to the N. is an important lighthouse, 67 ft. high, built of stone, in 1854, by Frederick II. The inhabitants are industrious, and export a good deal of fish. Pop. 1400.

SKAGGÖR-HACK, or **SKAGGÖR** a broad arm of the North Sea, or German Ocean, which penetrates between Norway on the N., and the peninsula of Jutland on the S., eastwards to the coast of Sweden, and then communicates with the Kattegat, of which it is sometimes considered as the N. portion length, W. S. W. to E. E. about 160 m., breadth about 60 m. area, about 11,300 sq. m. in N. of the Danish coast the depth varies from 69 to 100 fathoms; the coast from 89 to the 100 and off the Norwegian coast in some places exceeds 200 fathoms. The stream which not interrupted by its course by violent storms, sets in E. along the coast of Jutland and W. along that of Norway. On the former coast there is neither haven nor secure anchorage, but along the coasts both of Sweden and Norway in the numerous indentations which they present, good natural harbours are abundant.

SKALHÖFT, a vil Ireland, once the cap. of 42 m P. by R. Reekrivik, on the Haul-own, with a finely situated harbour.

SKALITZ, or **SKALITSA** a royal free tn. Hungary co. Neutra, 1 bank March near the confines of Moravia, 47 m N. Pressburg, on a lofty height, surrounded by walls, and nearly in the form of a square. It has a Protestant and four R. Catholic churches, a school, an elegant townhouse, a gymnasium attached to a Franciscan monastery and considerable manufactures of cloth. The district is famous for its fruit and produces good wine. Pop. 8700.

SKALMIRZ, a tn. Russian Poland, 26 m N E Cracow, on the Biala, with manufactures of coarse woollens. Pop. 1069.

SKANDERBORG, a tn. Denmark prov. N. Jutland, sep. bail., on a tongue of land between the Skanderborg-Sø

and the Little Hunning-Sø, 14 m S W Aarhus. The small church situated on a height was once the chapel of the old castle of Skanderborg. On a height in the vicinity is a statue of Frederick VI. by Thorvaldsen, Pop. 1000.

SKANEATELES, or **SKANEATELUS**, a vil and township, 1 States, New York. The village, pleasantly situated at the outlet of lake of same name, 137 m W Albany, contains four churches, two carriage-factories, woollen factories, a tannery, an iron-foundry and a machine-shop. Pop. 4030. The LAKE, greatest length N W to S.E. 15 m; greatest breadth, scarcely 1 m. discharges itself at its N. extremity by a stream of same name into Lake Seneca.

SKARA, a tn. Sweden, 18 m and 27 m S W Marstrand. It is an ancient place, of considerable historical interest. It is the see of a bishop, and contains a cathedral, built of sandstone, and completed in 1150 originally crowned with numerous towers, of which only two now remain in a complete state, but still adorned externally with fine facades, and internally with lofty pillars—a gymnasium with a library of 10,000 vols. particularly rich in theology, several other collections, and an observatory. Near it are a mineral-spring, and Brockskärs, a celebrated veterinary institute with valuable anatomical preparations a library botanical garden, &c. Pop. 1491.

SKARABORG a tn. Sweden See **MARIEBÄCK**.

SKARO a tn. on a remarkable promontory of same name projecting from the precipices which form the W. side of the island of Samsö, in the Gresten Archipelago. It was till recently the seat of government, and in the middle ages was occupied by the Viscounts, who built its castle, of which only some remains now exist. The houses, mostly ruined by the effects of volcanic agency form an extraordinary group around a red and black crag, 1000 ft. above the gulf, perched one over another in a crevice in the sides of the precipice, and in the most frightful positions the outer wall of the buildings forming a continuation of lofty perpendicular rocks.

SKEN or **SKEN** a tn. Norway prov. Agderhus cap. bail. Bredberg on a river of same name which issues from the Lake of Nord and a little below, falls into a bay of the *«Lager Bark»* 66 m S W Christiansia. It is an ancient place, and has a church, several saw-mills, and a considerable export of timber, deals, pitch tar iron and millstones. 1 up 1800 **SKEFFINGTON** par Eng Lincoln, 2123 ac. P. 705 **SKEFFLING**, par Eng 1 wrk 1600 46.3 ac. Pop. 212.

SKEGBY par Eng North 14.6 ac. Pop. 865.

SKELN 1285, par Eng Lincoln 2474 ac. P. 866.

SKELU, a vil Hungary Thutur House, co. Krassó in a hilly but fertile district, 9 m from Leger. It has a Greek church and a trade in corn and wine. 1 up 1870 **SKELLEFIELA** a vil and par Sweden 18 m and 70 m N N E. Umeå, on a river of same name, near its mouth in the Gulf of Bothnia. It contains a large and elegant church.—The RIVER (or *Sildus*) issues from S.E. extremity of the Stor Alvan the largest lake of Lappland flows S.W., and falls into the Gulf of Bothnia, 45 m S W Piteå total course 140 m.

SKELLIGS (Irish, three hills S.W. coast, Ireland co. Kerry 3 m W Dohis Head lat. (right) 51° 45' N, lon. 10° 52' W (a) The largest, called the Great Skellig, is an enormous precipitous rock of slate 710 ft. high. Two light-houses have been erected upon it: the one 650 ft., and the other 871 ft. above the sea. Their lights are the first seen by vessels coming across the Atlantic.

SKENNINGE, a tn. Sweden, lon. and 20 m W Lönköping. It is an ancient place and was once considered the capital of Gothland, but is now best known by its large annual cattle-fair. Pop. 1000.

SKERRE, par Eng York (N. Riding), 2723 ac. P. 194.

SKERRIES (Irish, a sea-grt rock)—1 A sea-grt rock and fishing tn. Ireland, co. Dublin 17 m. N. E. Dublin lat. 56° 28' 18" N lon. 4° 56' 30" W (a) It stands on a little

headland, and has a clean and cheerful appearance. The main street, which is wide and irregularly built, is nearly 1 m. long. It contains a church, small Methodist meeting-house, R. Catholic chapel, parish school and a dispensary. A large proportion of the female population is employed in unbleaching. Pop. 2377—2 (or Skerry). A small village, England, St. George's Channel, 3 m. off W point Anglesey with a lighthouse 117 ft. high lat 53° 35' 16" N, lon 4° 46' 30" W (N)—S. Three lake. Shetland group, 7 m. off W coast, Mainland lat 60° 30' N. Inhabitants engaged in fishing. P 105

SKERRY, per Irish Antrim 24,176 ac. Pop. 6382

SKERTON a vil. England on Lancaster on an eminence, 1 bank Lane nearly opposite to Lancaster with which it is connected by a good stone-bridge of five arches. Its houses are mostly antique, but there are a few good modern stone houses among them. The church is a small but neat edifice, and has a school attached to it. Pop. 1586

SKERTON per Eng Norfolk 1264 ac. Pop. 864

SKIATHO [anc. Skiathos], an Isl. Grecian Archipelago, between the S.E. coast, Thessaly and Mt Skopelos lat 39° 12' N lon 23° 56' E., greatest length N to S. 5 m. greatest breadth 4 m. It attains its highest elevation in the N where the surface is mountainous but it is finely diversified by hill and plain the former well wooded, and often laid out in vineyards and oliveyards. The pastures are good, and feed great numbers of sheep and goats. The chief place, called also Skiathos is strongly situated on a steep and lofty rock, to which the only access is by a wooden bridge

SKIBBEREEN a market in Ireland co. and 42 m. N.W. Cork 1 bank line. The houses are well built of stone of which abundance is obtained in the vicinity. There is a small court-house, a prison, a large grammar and national school, a custom house, a church and a R. Catholic chapel both large and commodious and two Methodist chapels, a dispensary and a library for the poor classes. The linen is navigable for lighters and large boats up to the town. The only manufactures are some domestic weaving of coarse cloth called frieze. The business of the town is all but wholly confined to a retail trade. Near it, however are several corn mills. Skibbereen suffered terribly during the famine of 1846-7. Pop. 6440 including 2584 paupers

SKIDDEBROOK, with NANTLEY HAYES, per Eng Lancs 3425 ac. Pop. 419

SKIDBY with WADBY, par. Ling. York (1. 1814) 1821. 1750 ac. Pop. 361

SKIDDAW a mountain England near the centre of co. Cumberland having the lake of Bassenthwaite Water on the W and the mountain of Waddebeck on the E. Its height is 3022 ft. and though surpassed in altitude by several of the Cumberland mountains, surpasses all of them in imposing appearance, from standing in a manner isolated, so as to be seen at once in the full magnitude from its base to its summit

SKIEL-KÖLT a tn. Denmark, mt. Sweden, on a small bay of the Great Belt, 57 m. N.W. Copenhagen. A bridge in the lower connection of the bay with the inner Skjelsköt-bro forms a small winter-haven of the fifth class, and in the Skiel sköt roads larger vessels find good anchorage. A good many of the inhabitants are employed in fishing. P. 1000.

SKILNIEWICK, a tn. Russian Poland, volozhd Ma-sovia, on the Kowna. It has a church and a castle with a garden and manufactures of linen. Pop. 1000.

SKIPPNESS, per Scot. Argyle. Pop. 791

SKIPPERA per Eng. York (E. Riding), 5974 ac. P. 841

*SKIPTON, a market in and par. England on York (W. Riding). The town, beautifully situated in a valley near the river Aire, 38 m. W York on the Leeds and Bradford railway is well built, chiefly of stone; has an ancient church, places of worship for various Dissenting bodies, a well-endowed grammar-school several minor charities, a subscription-library and news-rooms. Cotton and woollen articles are manufactured, and there is an ale and porter brewery. A considerable market for corn and cattle is held weekly and there is a brisk

general trade, which is much facilitated by the Leeds and Liverpool canal. Near it is a mineral spring, with a spa-room and convenient baths. The ancient and still tenanted castle of Skipton is a curious quadrangular structure, the greater part of which was erected in the reign of Edward I. The rule of Skipton is exceedingly fertile, and contains some of the best meadows in England. Pop. 4903 Area of par. 25,725 ac. Pop. 7146

SKIVE, a tn. Denmark, prov. Jutland, bail and 17 m. N.W. Viborg 1 bank Skive ana, near its mouth in the Skive-ford, an arm of the Lumbord. It stands on a commanding height and has a church and a little trade in corn. P. 1900.

SKLAVY a tn. Russia gov. and 20 m. N.W. Mohilev, on the Dnieper. It is built of wood; and has a castle, several churches a synagogue and some general trade. Pop. 2500

SKÖFDE, a tn. Sweden, lks and 22 m. S.E. W. Markstad, at the foot of the Village. It is a small but ancient place with a church and a townhouse. The mineral spring of Sköfde is in the vicinity. Pop. 680

SKOLE, a market in Austria, Galicia circle and 54 m. S.W. Ry on the Upper with a Greek church a castle manufactures of nails, and various articles of hardware, glass-works, two iron-furnaces, foundries, and other iron-works

SKOPELO or Scopetza [anc. Skopelos] an Isl. Grecian Archipelago one of the N. Sporades in the centre between Skantz on the W. and Aghionori on the E. greatest length N.W. to S.E., 11 m. greatest breadth 5 m. It is not much indented and attains its greatest height in Mount Delphi, near its centre. Though not naturally fertile, it is cultivated with considerable care, and produces a good deal of wine, oil, and fruit. Its principal town, of same name, lies on the S.E. shore. It is the see of a Greek bishop, and has a number of churches and convents. Pop. (ad) 12,000, (nl), 5000

SKOPIV, a tn. Russian gov. and 53 m. N. from the Verda. It has five churches, a chapel two almshouses manufactures of Russian leather and a trade in corn and cattle. A fine breeding-land from which the horses of the army are partly supplied is kept in the vicinity. Pop. 5650

SKOTSLIAW, a tn. Austria, Moravia, circle and 8 m. N.E. Teichen on the Valtia here crossed by a long wooden bridge. The houses are generally built of wood but the large market-place, in the form of a regular square, is lined by substantial stone-buildings among others, by a handsome townhouse. It has also a parish church, and a castle. P. 1900

SKOWILLEGAN a vil. and township, U. States, Maine. The village, on the Kennebec, 22 m. N. Augusta, is well built has several mills, propelled by Skowhegan Falls a woollen factory tannery and a considerable trade. Pop. 1765.

SKREEN three par. Irish — 1. West 4522 ac. P. 878

— 2. Sigo 13,235 ac. P. 2963 — 3. Westfield 1566 ac. P. 489

SKULL, par. and vil. Ireland on Cork 87,923 ac. Pop. 11,000 — The village, 81 m. W.S.W. Cork, on Bear-zug Water Bay is a coast-guard station. Pop. 535.

SKULSKH or Skusa, a tn. Bohemia, circle Chrudim, 4 m. from Hlisenburg. It has an ancient church, an hospital, manufactures of linen and a trade in corn. Pop. 8408

SKWIRA a tn. Russia, gov. and 60 m. S.W. Kazan inhabited chiefly by Jews. Pop. 1185.

SKYE [anc. Skinnor], an Isl. Grecian Archipelago or Western Isles of Scotland, situated on the W. of co. Inverness, of which it forms a dependency, and from which at the narrowest points in the S.E., it is separated by Kyle Aken and the Sound of Sleat greatest length, N.W. to S.E., about 45 m. extreme breadth, 24 m. mean breadth 15 m., area, about 565 sq. m. It is very irregular in shape and so deeply penetrated by bays and creeks, that it is difficult to find a spot in it 5 m. distant from the sea. The coast is rocky and elevated, and generally rises with bold and picturesque cliffs, some of them of very great height; in many localities but more especially on the N.E., composed of columnar trap presenting masses of basaltic pillars, not surpassed by Skye or Glencorseway. The interior may be

regarded as one great mountainous moorland, the only exceptions are two tolerably level tracts one called the Plain of Kilmuir, and another of more limited extent near Loch Breandale. The principal districts into which the island is divided, are Sleat in the S., Mingieish in the centre, and three large peninsulas in the N. and N.W. called respectively Trotternish, Watermach, and Kilmuir. The mountains form three distinct groups, separated by intervening tracts of high and moorland land. That of Sleat has an average height of above 1800 ft. and extends along the coast in a continuous ridge, till it suddenly subsides on the N. into a comparatively low tract. It is the best wooded part of the island—the ash as well as the birch and alder flourishing on both its declivities, wherever any water-course, ravine, or small valley afford them shelter. Immediately beyond the flat tract into which the hills of Sleat subside, a more elevated ridge, consisting of five united mountains suddenly rises, and attains the height of 2000 ft. These mountains on the W. side subside gently but on the E. descend rapidly towards the sea, and become

PARATIT CLIFFS ON THE N.E. COAST OF SKYE.—From Col. Murray's Sketches.

conspicuous among the hills of Skye, both from their actual elevation, and the comparative lowness of their base. Both of these ridges belong to the district of Sleat, and are composed chiefly of red sandstone, argillaceous schist, quartz, and gneiss. Beyond the latter ridge, a lower irregular tract, forming a kind of valley parallel to it, occurs, and is succeeded, first by a low ridge, and then by another parallel valley called the Strath, which stretches across the island to the opposite coast, and is not much raised above them. These valleys are almost entirely composed of limestone and shale, occasionally interrupted by masses of granite. To the N. the Strath is succeeded by the loftiest part of the island, consisting of a confused assemblage of mountains, forming two distinct groups, the one called the Red and the other the Cuolullin Hills, varying in height from 2000 ft. to 3000 ft. composed almost entirely of granite. The Red Hills are for the most part tame, rounded, and covered with streaks of red rubbish to which they owe their name. The Cuolullin Hills strikingly contrast with them in the darkness of their colouring and their rugged and serrated outline, and the wildness and gradient of their whole aspect. They partly form a circular chain round Loch Coruisk, enclosing it by an insurmountable barrier, and indenting the sky by their pinnacles and projecting crags, but the loftier portions of them rise with a rapid and rocky ascent from the W. shore, opposite to Loch Brittle and the Head of Sea, and form a curved ridge of six summits obscurely divided and terminating on the E. in a precipitous face, deeply furrowed by torrents. Still farther E. a long, conical ridge, called Blaven, overtops the whole, and contains the culminating point of the island. To the N. of this mountain-group the surface descends rapidly, particularly on the W., into an undulating tract, from 800 ft. to 1000 ft. in

height, and of dreary appearance, presenting no objects of interest except two conspicuous fluted-topped heights called Macdonald's Tables, and covered with brown heath, except in the vicinity of Loch Brittle and Eynort, where the eye is relieved by green pastures and the low tract of Breandale, which is generally under cultivation. The district of Trotternish, in the N.E. is less monotonous and rises towards its centre into a mountain-ridge, the culminating point of which, called the Barr, about 2000 ft. in height, has a very picturesque appearance. Its summit descending almost vertically for at least 400 ft., while the steep declivity below is covered with huge masses of detached rocks. The whole of the island situated N. of the narrow isthmus lying between Loch Brittle and Sligachan, on the opposite side of the coast, and constituting at least two-thirds of the entire surface, is composed of trap rocks in immense beds or tabular masses overlying or inclosing portions of secondary sandstone. At various places, and generally in trap, coal is found, but in such small quantities, and so much disturbed, as to be of no economical value. The only mineral of Skye

which is profitably worked is the crystalline limestone of the Strath which furnishes good blocks of marble both pure white and variegated. In this limestone are numerous caves one of which, on the N. side of Loch Sleipin, called the Spar Cave, is celebrated for its beautiful stalactites. In others of them the Freestones found temporary refuge after the battle of Culloden. The worst feature in the climate of Skye is its humidity and variability. On several of the loftier heights the snow remains in masses till the season is advanced, and when the melting takes place, it is most frequently accompanied with deluges of rain. Mists also, are so frequent, that extensive views from the most commanding heights are seldom to be obtained. The chief spots under culture are Breandale, parts of Trotternish and Sleat, and patches of more or less extent at Broadford, Balnass, Irtree, &c. The land is not skilfully managed, and the crops are very scanty. The far greater part of the surface consisting of moorland, interspersed with tracts of green herbage is devoted to the rearing of cattle and sheep. The breeds of both have been much improved, the latter are chiefly Cheviots. In addition to agriculture and pasture, the fisheries give employment and furnish subsistence to a large number of the population. The manufacture of kelp, once a most important resource, has been all but extinguished. For the disposal of produce the only markets of any consequence are held at Portree which has the advantage of an excellent harbour and has regular steam communication with Glasgow. The people are remarkably peaceable and moral but extremely indolent, and not cleanly in their habits. Most of them are in indifferent circumstances hence many have recently emigrated. Skye forms a separate presbytery composed of six parishes. Pop. 21,931.

SKYHU [see Skye] an Isl. Grecian Archipelago, lat. 33° 45' N., lon. 24° 40' E., about 25 m. E. of Negropont, greatest length, N.N.W. to S.S.E. about 18 m. breadth, 7 m. It is very much indented, particularly on the W. side, where a bay, with an island in front of it, forms a large natural harbour. The surface is very rugged and has numerous steep precipices, forming the sides of valleys, in which corn and wine are grown in considerable abundance, and great numbers of cattle, particularly sheep and goats are reared. Many of the higher grounds are densely wooded. The chief place, which bears the same name, stands on the W. bay already mentioned, at the foot of a conical hill. The greater part of it consists of a Greek monastery. The inhabitants are deficient in industry and seem to be generally in wretched circumstances. Pop. about 2000.

SLA, a town Morocco. See SALER.

SLAGELSE [Latin, *Slagoele*] a town Denmark, in Zealand 49 m. W. S. W. Copenhagen with two churches, a grammar-school, and post-office, and an active trade. It had once a celebrated cloister which was for some time used as a royal palace. Pop. 8000.

SLAIDBURN a vil and par Englad co. York (W Riding) on the Humber 8 m. N by W Githeroes with an ancient parish church, Presbyterian, Methodist, and Quaker chapels, a grammar-school, and three large cattle-fairs. Pop. (1911) 768. Area of par 40,321 ac. Pop. 2017

SLAINS and **Forsyth**, par Scot. Aberdeen 5 m. S by S m. Pop. 1332

SLAITHWAITE, a vil and chapelry Englad co. York (W Riding) in the valley of the Colne 5 m. W S.W. Huddersfield. It has a plain but spacious chapel with a tower, a free and national school, manufactories of woollen and silk goods, cotton and silk mills, and freestone-quarries. Near it are chalybeate-springs, which closely resemble those of Harrogate, and in connection with which baths and lodging-houses have been erected and gardens and pleasure grounds tastefully laid out. Pop. 2862

SLAILEY par Eng. Northumberland 7430 ac. Pop. 851

SLAMANNAN par Scot. Sirling, 5 m. by S m. P. 1553.

SLANE, a tn. and par, Ireland, co. Meath, 63 m. W S.W. Droghda, 1 bank Byrne, within 4 m. of the spot where the battle of that name was fought. It has a Protestant church and a R. Catholic chapel, a workhouse and police-barracks, three schools and a dispensary, but no manufactures, and little trade. Area of par 5947 ac. Pop. 2050

SLANE par Ireland, Down 946 ac. Pop. 461

SLANEY a river Ireland, rises in the Wicklow Mountains flows S.E. through co. Wicklow Carlow and Wexford passing the towns of Ballinacorney, Ballyville, Newberry, and Kinsbury; and after a course of about 50 m. falls into Wexford haven, a little above the town of Wexford. It is navigable by barges to Kinsbury a distance of about 14 m.

SLANAMONEY (Horr and Brann) two nearly contiguous vils Austrian dominions Salzwasser opposite to the confluence of the Danube with the Danube, about 6 m. from Batska. Batty Blankenstein, the larger and more important of the two was once fortified. They contain a R. Catholic and two Greek churches. Pop. about 1300

SLATION three pars. Eng. —1 Bucks, 840 ac. P. 256 —2 Devon 2450 ac. P. 705.—3 Northamp. 950 ac. P. 217

SLAUNICE (Ossa and Urtze) a vil Bohemia circle Chudum, 6 m. from Jamboucl with two churches. P. 2335.

SLAVE COAST W Africa, extending between the Volta and Akanga, a distance of about 240 m. It is unbroken by any marked mountains. The principal towns on the coast are Badagry and Whydah. The King of Dahomey's dominions extend over a great part of the inland territory.

SLAVE LAKE (Uzary) a large lake, British N. America. Hudson's Bay Company's territory, centre, about lat. 62° N. lon. 112° W.; about 500 feet above sea-level. It is of extremely irregular form. Length, N.E. to S.W., upwards of 350 m. breadth, generally under and rarely exceeding, 50 m. Area, estimated at 19,000 sq m. Its N. shores are precipitous and rugged, and it contains many rocky and wooded islands. Its largest tributary is Slave River which falls into it from the S. It empties itself by the Mackenzie River, which flows from its S.W. extremity. Slave River is the stream by which Lake Athabasca empties itself into the Great Slave Lake. It receives the Peace River on the left immediately after leaving Lake Athabasca, E. of Fort Resolution. The banks are in many parts well wooded, but numerous rapids and falls occur in its upper course.

SLAVONIA a territory, Austria. See **SCHLAVONIA**.

SLAWENGERK, a tn. Russia, gov. and 180 m. E.W. E. Ekaterinodar on an affluent of the Donets. It is a straggling place, and has an annual fair. Pop. (1881), 2396.

SLAWIANSK, a tn. Russia, gov. and 90 m. S.E. Khar'kov. It has two churches and near it are four mal-lades. Pop. (1847) 6205.

SLAWIBZYTA, a tn. Russian Poland, N. Kalisz, on a small affluent of the Prosna. It is walled, and has manufactories of linen and linen. Pop. 1600.

SLAWKOW, a tn. Russian Poland, N.W. Cresoow; with mines of lead and cadmium. Pop. 1520

SLAWSTON, par Eng. Leicester, 1510 ac. Pop. 231

SLAFOARD (Horr) a market tn. and par Englad co. Lincoln. The town, 17 m. S. by E. Lincoln, is well paved, lighted with gas, and amply supplied with water has a hand some and spacious church of the 13th century, several dis-senting places of worship, a handsome townhall, a neat free school another endowed school and six hospitals. Pop. 3729

Area of par 3180 ac. Pop. 3539.

SLAFORD (Oss), par Eng. Lincoln, 1150 ac. P. 257

SLAFT, par Scot. Inverness 25 m. by S m. Pop. 2581

SLAFTY par. Ire. Queen's co. 671 ac. Pop. 300

SLABECH, par Wales, Pembrokeshire 4586 ac. Pop. 853

SLADMERK, par Eng. York (E. Riding) 6650 ac. Pop. 457

SLAMNO, a tn. Prussia. See **GADZEWIE**.

SLERWICK Denmark. See **SILTZEWIE**.

SLERDYNGE, a vil and com. Belgium prov. H. Flandres, 7 m. N. by V. Ghent; with manufactories of linen and cotton fabrics, leather, candles, mustard, vinegar and oil, two breweries, seven flour-mills, a dye-works and some trade in grain, cattle and manufactured goods. Pop. 5785

SLIDRE a vil and par Norway prov. Agderhus, lat. and 97 m. N.W. Christiania, on a lake of same name, forming an expansion of the Belva. Pop. 8100

SLIEDRECHT a vil Holland, prov. S. Holland, 5 m. E. by N. Dordrecht, on the high Merwede dila. It has a Reformed church three schools and some trade in fire-wood, hoops, and barrel staves and chairs. Some fishing is carried on in the river. Pop. 4648

SLILVE, or **SLILAR** Bassoos a mountain-range, Ireland stretching nearly 15 m. between King's and Queen's cos. It attains in Arden-ken a height of 1889 ft. and furnishes the chief sources both of the Nore and the Suir

SLIGO a maritime co. N.W. coast, Ireland, prov. Con-naught, bounded, N. by the Atlantic, E. co. Leitrim, S. Ros-common and Mayo, and W. Mayo. Greatest length E. and W., 41 m., breadth, 38 m. area, 721 sq m. or 461,758 ac. of which 250,000 ac. are arable. The coast-line, in some places very rugged, is deeply indented by Kilala and Sligo bays. A large portion of the county is rough, mountainous and boggy, but it contains a considerable extent of very good land, though a good deal of the arable soil is very indifferent, being a light sandy loam. The summits of the mountains have a mean height of 1500 ft. above sea-level. The principal range is composed of the Ox Mountains, consisting chiefly of micaceous, with occasionally granite, hornblende gneiss and quartz-rock. A great portion of the county is occupied by the formations of the carboniferous limestone-group. Copper and lead mines were formerly wrought, but are not now worked on. The principal rivers are the Sligo, Arroy, Avonmore, Eskay, Moy &c. There are also several lakes having an aggregate area of 20 sq m., and including the beautiful Lough Ull (which see). The number of acres under crop in 1851 was 94,791, chiefly occupied by oats and potatoes, with a small breadth of wheat, barley, beans, &c. The grazing-farmers in this county are generally men of more capital than the tillage-farmers, but the pasture-land is commonly poor. In 1851 the horse and cattle numbered 81,774; the sheep, 85,000 the pigs, 17,797—a considerable increase in cattle and pigs over 1841 when they numbered respectively 45,889 and 13,505, but a decrease of sheep from 82,708. The sligo district of Sligo comprises 193 m. of maritime coastline, and had in 1850 575 registered vessels, employing 3853 men and boys. The county is divided into six baronies and 41 parishes. It returns three members to Parliament, two for the county and one for the borough of Sligo. Principal towns.—Sligo (the capital) Drogheda, and Tabbearry. Pop. (1851), 138,510.

SLIGO, a seaport tn. and pari bor., N.W. coast, Ireland, esp. above co., 181 m. N.W. Dublin, lat. 54° 18' N.; lon. 8° 28' W. (a.), near the mouth of the Garraun in Sligo Bay. The streets in the older parts of the town are narrow, dirty and ill-paved. It contains, however, convenient markets and large stores and considerable improvements have been made on the streets. It is lighted with gas, and well supplied with water. The public buildings are the county courthouse, prison, infirmary, fever hospital, union workhouse, new assembly hall, barracks, and a lunatic asylum and it has two Protestant churches, a Presbyterian and Independent; two Metho-

the meeting-houses a E Catholic chapel, and one friary or abbey church. The manufactures are linen, flour, soap, candles, ropes, whisky, and beer. The harbour admits vessels of 18 ft draught of water to moor at the quays, which have recently been considerably extended and improved. That called the bullock quay is 224 ft long. Vessels of large draught have to anchor in the pool, which is safe and secure, but inconvenient for discharging or taking in cargo. The num-

ber and tonnage of vessels registered as belonging to the port in 1850 was 35, tonn. 4789, in 1865, 30 vessels of 4391 tons. In 1850 there entered the port 289 vessels, tonn. 48169 and departed 159 vessels, tonn. 53757. In 1864 4 vessels of 1097 tons entered and 88 vessels of 10,994 tons cleared from and to foreign countries. The exports consist chiefly of provisions, grain, flour, linen-yarns, &c. and the imports colonial produce, timber, wool, iron and steel. It sends a member to Parliament. Pop. 11,200.—The bay about 6 m across at its opening penetrates the land by various arms at the head of the two chief ones are Sligo and Bellinakeel, both about 12 m. from the mouth of the bay. It has 8 to 20 fathoms water and a sandy shore.

SLIGUFF, par Eng. Carlisle 6756 ac. Pop. 1275.
SLIMBRIDGE, par Eng. Gloucester 4480 ac. P. 659.
SLINDON, par Eng. Sussex, 2504 ac. Pop. 619.
SLINFOLD, par Eng. Sussex 4520 ac. Pop. 702.
SLINGSBY, par Eng. York (N. Riding) 2363 ac. Pop. 683.

SLIPTON, par Eng. Northampton 720 ac. Pop. 105.
SLOBODSK, or **SLOBODSKO**, in Russia, gov. and 18 m. N. E. Yalta, r. bank Yalta. It contains nine churches and a convent, and has manufactures of soap and leather, an important trade in corn, linseed, wool, and tallow with Arab, angel, and five annual fairs. Pop. (1850), 6032.

SLOCHTEREN, a vil. Holland, prov. and 10 m. E. Groningen, with a church, school, some breweries, and corn mills, but inhabitants chiefly engaged in agriculture, cattle-rearing, and turf-cutting. Pop. 1266.

SLOE (Hart), that part of the W. Scheldt river which separates the island of B. Beveland from that of Walcheren.

SLOLEY, par Eng. Norfolk 719 ac. Pop. 294.

SLONIM, a tn. Russia, gov. and 67 m. S. E. Grodno. It is walled, has several Greek and R. Catholic churches, an old castle, and extensive manufactures of woollen and linen cloth. Pop. (1850), 6639.

SLOVEN, or **SLOVENSKO**—1 A tn. Holland, prov. Friesland, 22 m. S. by W. Leeuwarden, with a church, inhabitants employed in agriculture and handicrafts. Pop. 886.—2 A vil., prov. N. Holland 4 m. S. W. Amsterdam. Pop. 825.

SLOUGH, a vil. England, co. Bucks, 70 m. W. London on the Great Western railway, which has an important station here and handsome hotel. Slough is memorable for the astronomical labours of Sir William Herschel, whose enormous telescope was constructed here. Pop. (1841), 1189.

SLUIS, a tn. Holland, prov. Zealand, on the frontier of Belgium, 12 m. S. W. Flushing. It was formerly fortified, but was dismantled in 1839, and the harbour, once well frequented, and the first in Flanders, is now nearly sanded up. It has several considerable market-places, in one of which, the Groote-markt, are the town-houses and the watch-house, and it also has two churches, a town-school, a library, and several benevolent and religious societies, several mills, a soap-work, a brewery, some shipping trade and fishing. Pop. 1493.

SLUTSCH, two rivers, Russia.—1, Runs on the frontier of Poland, in gov. Volhynia. Flows E. then arcuately N. across Volhynia, and near its N. mouth, joins r. bank Gorin amidst the moraines of Pinak. Total course, above 250 m.—2 Runs in gov. Minsk, not far from Slutsk, flows E. past that town and after a course of about 100 m., joins 1 bank Pripiet, 62 m. E. Pinak.

SLUTSK, a tn. Russia, gov. and 60 m. S. Minsk, on the Slutsk. It is a large and well built place, though almost all the private houses are of wood, and contains three castles, a Lutheran a Reformed two R. Catholic, and two Greek churches, a gymnasium or central school in which a very complete course of education is given, and a gymnasium. Pop. (agricultural) (1842), 6859.

SLYPT, a vil. and c. m. Belgium, prov. W. Flanders, 17 m. W. S. W. Brugge. It has three breweries, an oil and two flour mills, and a trade in agricultural produce. Pop. 1178.

SMALLHOI, m. par Scot. Roxburgh; 4 m. by 8 m. P. 617.
SMALL ISLES, par Scot. Inverness including isle. Rum, Eng. Mack, and Gannet. Pop. 816.

SMALLBURGH, par Eng. Norfolk, 1247 ac. Pop. 601.
SMALLEY, a vil. and chapelry, England, co. and 7 m. N. E. Derby. The village is well built, and has recently been much improved. Besides the chapel, which is a modern structure with nave and transepts, there are a Baptist chapel and an endowed school. The inhabitants are chiefly employed on the extensive collieries in the vicinity. Pop. 804.

SMARDEN, par Eng. Kent 5330 ac. Pop. 1206.

SMARMORE, par Irel. Louth 1598 ac. Pop. 843.

SMERDON, two par. Eng. York.—1 (Gravel), N. Rid. ing 1192 ac. P. 974.—2 (Rush), W. Riding 1770 ac. 1 372.

SMETTH, par Eng. Kent 1811 ac. Pop. 453.

SMETTHOFT, par Eng. Selsey 2705 ac. Pop. 458.

SMETHWICK, a large vil. England, co. Stafford, 3 m. W. by N. Birmingham on the Birmingham Wolverhampton and Stour Valley railway. It has two principal streets straight and pretty well kept, two churches Independent, Wesleyan and Primitive Methodist, several two national an infant, a Scotch Presbyterian, and several other schools and extensive iron and cotton and plate glass works. Pop. 3879.

SMETSCHNA, or **SMETSCHNA**, a vil. Bohemia, circle Rakonitz, about 5 m. from Schlan, with a church, castle, school, and chalybeate springs. Pop. 1040.

SMICHEW, or **SMICHOW**, a vil. Bohemia, circle Rakonitz, so near 1 region as to be almost its suburb. It has a church, and several manufacturing establishments. Pop. 2500.

SMIDAE, or **SMIDAY**, a market tn. Bohemia, circle Radechow on the Zydina, 4 m. from Königsdorf, with two churches, a castle, manufactures of potash, a distillery, the works, and a saw mill. Pop. 1160.

SMIJEW, a tn. Russia, gov. and 20 m. S. Khar'kov on the Southern Donetz. It has a considerable trade in silk cotton and woollen goods. Pop. (1842), 3906.

SMIRZIG, or **SMIRZIKOW**, a tn. Bohemia, circle and 10 m. from Königsdorf, on three little arms of the Elbe, which are here crossed by bridges. It has an elegant castle, town-house, and school, manufactures of leather and roscogin, a brewery, a saw and other mills. Pop. 1164.

SMISBY, or **SMISBY**, par Eng. Derby, 990 ac. P. 339.

SMITH, an isl. Antarctic Ocean, being the most W. isl. of New South Greenland lat. 63° 2' S. lon. 64° 47' W. It has a very wild and desolate aspect, and has a summit about 6800 ft. above the sea, and visible at the distance of 85 m.

SMITH'S FALLS, a tn. Canada West, on the Rideau canal, co. of Leeds, 22 m. from Rockville, with manufactures of coarse woollens, iron, and leather, several grist and saw mills; three Protestant churches, a R. Catholic chapel, and a public and two private schools. Pop. 1009.

SMITHVILLE, a vil. Canada West, co. Lincoln, pleasantly situated on the Jordan or Twenty Mile Creek, about

35 m. S.W. Toronto, with Wesleyan and Episcopal Methodist churches, a foundry, a tannery, a woolen factory, and a saw and a flour mill. Near it is a mine, said to be rich in argentiferous lead. Pop. about 450.

SMOLÉN *an lat 61° N W coast, Norway lat 66 30' N lon 8 5' E. 3 m W S.W. Hittera.* It is tolerably compact, length E.R. to W.S.W. 15 m. central breadth, 10 m. **SMOLÉNSEK**, a town, bounded, N by Tron, E. Moscow and Kalaga, S. Orel and Cherdyn, and W. Mozhay, Vishak, and Fakov lat. 55° 11' to 56° 25' N. lon. 51° 50' to 36° 40' E. greatest length, N to S, 235 m. central breadth 180 m. area, 16,800 sq. m. It consists generally of extensive plains, in part covered with extensive meadows, but is traversed partly by the water-shed which divides Europe into two great basins. Within the government, however, that water-shed is formed only by a chain of low hills. The waters on its N.W. side are sent to the Baltic by the Drina and several affluents, those on the S.E. side, forming the larger proportion are carried chiefly to the Black Sea, by the Danube, which has its source in this government, and partly also to the Caspian by the Volga, which has here some small tributaries. The climate is cold, but the air generally clear and healthy. The soil is fertile, and on the whole well cultivated, though the produce barely suffices to meet the local consumption. The principal crops are rye, hemp and flax, and are extensively cultivated, and, in particular districts, tobacco and hops. The pastures are both extensive and rich, and rear great numbers of cattle. The rivers are only scantily supplied with fish. One chief source of wealth in the government is its forests, which cover a large extent of surface, furnish excellent timber and fuel and abound with large and small game. Great attention is paid to the rearing of bees, and honey and wax are largely exported. The minerals include, in considerable quantities copper, iron and salt. Manufactures have not made much progress, but the trade is considerable and consists chiefly in timber, hemp, flax, wax, pitch, honey, wax, hides, and tobacco. The government is divided into 11 districts of which Smolensk is the capital. Other towns are Bielol, Lyask, and Roskavl. P (1850) 1194000.

SMOLÉNSEK, a town, Russia, cap. above gov. on both sides of the Dniester here crossed by a wooden bridge 233 m. W S.W. Moscow. It has a picturesque site and occupies a large area. The part on the L. bank of the river is surrounded by a strong and lofty wall flanked by towers. The part on the R. bank is also fortified, but the wall is only of earth. The interior of the town contains a large extent of open ground, partly occupied as gardens, and presents in general a very poor appearance, most of the houses being of wood and a single story. The only exception is in the centre of the town where there is a large and handsome square. The principal buildings are two cathedrals, which date from the 12th century and one of which is regarded as among the most celebrated ecclesiastical edifices of the N. of Europe. 16 other churches, including a Lutheran and a R. Catholic, an episcopal palace, two monasteries, and a university, a shoemakers' gymnasium, military and commercial schools, a foundling hospital, and houses of correction. The manufactures consist of linen, leather, hats, and soap, and the trade is chiefly in corn and hemp. Smolensk is the seat of an archbishop, the residence of a governor, and the seat of several important courts and public offices. The date of its foundation is unknown, but it had become a place of great importance in the 9th century. It has been twice severely ravaged by the plague, once in the 13th century, when it lost 43,000 inhabitants, and again in the 14th, when almost the whole population was destroyed. It again acquired importance, was surrounded by walls in 1599 and afterwards more regularly and strongly fortified by Peter the Great. It has often suffered much from war. Its last great disaster of this description was in 1812 when,

after the great battle which bears its name, it was taken by the French, and a great part of it burnt down; a disaster from which it has only partially recovered. Pop (1850), 10,702.

SMOLIANI a town, Russia, gov. and 50 m. N.W. Moscow. It has three Greek united churches, a synagogue and several large annual fairs. Near it are the ruins of a castle and convent. In 1708 the Swedish general Kanitz, and the corps he commanded were made prisoners here.

SMOLGONII a town, Russia, gov. and 47 m. E.S.E. Wilna. It is a handsome well built place and is inhabited chiefly by Jews. It was here that Napoleon on his disastrous retreat, abandoned his army to return to France.

SMOTRITZA a town, Russia, gov. Podolsk on a stream of same name, N. Kamenez. Pop. 1700.

SMYRNA, an ancient city and important export, Asiatic Turkey, pash. Anatolia, on a narrow flat at the head of the gulf of the same name lat 38° 26' 30' N. lon. 27° 9' 45' E. (a). The appearance of the city from the sea is extremely attractive.

It is much heightened by the picturesque scenery around it, but a closer inspection dissipates the illusion, although the variety of costume and feature presented by Turks, Greeks, Armenians, Jews, and Franks thronging the narrow streets, is sufficiently entertaining and amusing. The houses, nearly all constructed of wood, are mean and fragile-looking, the streets close and filthy and filled with a hot, unwholesome, and oppressive atmosphere, poisoned, during the summer months particularly by intolerable stenches proceeding from the sewers and drains which run through the streets and court-yards of the best houses, only a few inches under the pavement, which is frequently loose and full of granules. To these evils have to be added the vermin infested by mosquitoes, fleas and 'other vermin' says Macartney, 'larger and more pestiferous than any I had ever yet seen.' The city is divided into four quarters—Frank, Turk, Jew, and Armenian. The houses are also constructed of wood, are winding dark, and dirty but have a somewhat striking appearance from the variety and brilliancy of the colours of the silk, woollen and cotton goods exposed to sale. The air here, too, is generally impregnated with the mingled odours of otto of roses, musk, and tobacco-smoke. There is an English hospital and burying-ground. The other public buildings are the Visier-Khan, the palace of the governor, a large barracks, a mosque, and several Greek, Armenian, R. Catholic, and Protestant places of worship.

Smyrna has been for centuries the most important place of trade in the Levant. This trade has been carried on as well by shipping as by the caravans of Asia Minor, Syria, Bagdad,

and Persia; and hence, as well as at Constantinople, and most of the Turkish towns, the Jews have managed to become the principal agents in the purchase and sale of commodities. The chief imports are cotton manufactures, woollen clothes, colonial goods, mostly coffee and sugar, iron steel lead, tin, hardware goods, &c. The principal exports are dried fruits, cotton, silk, goats hair, sheep and goats wool rabbit and

THE GALLEY AND PORT OF SMYRNA. — From London: Voyageur's Guide.

hare skins, valonia, madder-root, yellow berries, and opium. In 1852 the total exports amounted to £1 765 653, of which £282 980 were to Great Britain and £90,843 to Russia, and the imports to £1 557 559 of which £482 981 were from Britain, £115,859 from the U. States, £283 222 from America, and the Zollverein £289 930 from France and £70 232 from Russia. In 1850 1851, and 1853 the vessels that entered and cleared were as follows—

YEARS.	R. B. IND.		CLEARING	
	Vessels.	Tons.	Vessels.	Tons.
1850	977	1,758,860	940	1,119,541
1851	966	1,874,641	840	1,252,100
1853	1,028	4,014,652	1,125	3,867,958

The cargoes entered in 1853 were of the value of £3 533 228, and those cleared, of the value of £3 843,285.

Smyrna is subject to destructive earthquakes and exterminating plagues. The last calamity of the former kind occurred in 1846, when the city was much damaged, and several persons killed. The Smyrniote ladies, according to Macfarlane, fully maintain their reputation for grace, elegance, and beauty, while they remain at their windows at which they generally spend nearly the whole day, and are content to be contemplated from a distance, but a stranger approaching disturbs the charm, by discovering how much they are indebted to the ingenious use of cosmetics, dyes, and paints, for their most captivating attractions, while their really fine heads and necks are generally badly set off on a clumsy lumpy body supported by enormous legs and large vulgar feet, all of which is useless while they remain in their frame—the windows. Pop. estimated at 160,000 of which more than one-half are Turks, the remainder Greeks, Jews, Armenians, and Franks.

SMYRNA, a gulf, Asiatic Turkey W coast, Anatolia, in the archipelago, opposite to the isle of Mytilene or Lesbos. It is formed by capes Rod and Kara-burnu and has a length, W E W to E E E, of about 40 m. with a maximum breadth of about 20 m., gradually narrowing as it proceeds inland. It contains several islands and receives several streams, of which the largest is the Sarabat.

SNAILWELL, par Eng Cambridge 2014 ac. P. 223. **SNATH**, a market in par England co York (W Riding). The town, situated on a gentle declivity on the Aire, 23 m S. by E. York, is small, and irregularly built with a spacious church, in the latter English style a free grammar-school, several sets of almshouses, and various minor charities. Area of par., 23 435 ac. Pop. 11,263.

SLAKE, or **LEWIS RIVER**, Oregon territory *See* Lewis.

SNUG, a river Russia, rises in gov Caucasus flows S. S. W., and joins r. bank Derna, 10 m. above the town of Carnigov; total course, 140 m.

SNOWDON a mountain range, N. Wales, stretching N. N. E. to S. S. W. across Carnarvonshire, from the mouth of the Conway to Tremadoc, near the N. extremity of Ordnery Bay; length, about 24 m., average breadth 6 m. It attains its greatest height in Snowdon proper whose loftiest summit, Wyddfa 2571 ft., is the culminating point of S. Britain. The descent of the range is gentle on the E. and precipitous on the W. and its nucleus, composed of primitive rocks, is flanked by immense banks of *slates overlain by strata of limestone*. Copper is found in many places.

SNOWHILL, par. Eng. Gloucestershire 2294 ac. P. 504. **SNYATIN**, a tn. Andria, Galicia, 122 m. S. E. Lemberg, in a beautiful plain on the Pruth with a castle, a Greek united and an Armenian church extensive manures, and a considerable trade in horses and cattle. Pop. 6469.

SOAJO a tn and par Portugal, prov. Minho, 12 m. S. E. Mosão, in a district covered by the mountains of Gaviões. The inhabitants have many peculiar customs and have been called the Lapedeiras of Portugal. Pop. 1190.

SOAN, a river England which rises on the frontiers of Lancashire flows N. E. to Leicester, then N. N. W. forms part of the boundary between co. Leicester and Nottingham, and joins r. bank Trent at Cavendish Bridge, about 7 m. below Loughborough to which it is navigable. Its chief tributary is the Fye or Wreck, which joins it on the right. Its course is for the most part traversed by a rich grazing-country.

SOAY or Soa two islets, Scotland. The one, belonging to co. Inverness, par. Broadale separated from the is. of Skye by the sound of its name, and opposite to Loch Skavang has a deeply indented creek which nearly divides it into two parts the other, belonging to co. Sutherland and situated on its W. coast at the entrance of Loch Inver forms a narrow belt about 1 m. long, and though healthy has some good pasture.

SOEHNEIM a tn. Roushyn Prov. gov. and 43 m. N. Coblenz, L. bank Rhine with four churches a chapel, and a *progrymnasium* a paper and several other mills, and a tile-works. Pop. 2573.

SOBETON par. Eng. Hants 5914 ac. Pop. 1147. **SORIESE** a tn. Bohemia, on the Lamehriz, 53 m. S. by E. Prague. It is walled and has a church, townhouse castle and hospital important manufactures of woollen cloth, and several saw mills and other mills. Pop. 2465.

SOHOTJE, or *SOHOTJA*, a vil. Astrakhan, Muraia, circle Otmits, with a church. Pop. 1128.

SOHOTKA, a tn. Bohemia, circle Bunsau between Mtschegrita and Gatsch with a church and near it the fine old castle of Humprechtberg, picturesquely situated on a precipitous height. Pop. 1500.

SOBRADILLA a tn. Spain Leon, prov. and 45 m. W. S. W. Salamanca with a church a primary school and some general trade. Pop. 1114.

SOBRADO two places, Spain, Galicia —1 A tn. and com., prov. and about 25 m. S. S. E. Coruña, r. bank Tambo has crossed by two bridges. It has a church, courthouse, prison, and primary school and a trade in maize and other agricultural produce. Near it is a lake with the largest oia in Galicia. Pop. 2803. —2 (de Trübs) A tn. and par., prov. and about 80 m. from Orense with an ancient and massive church, manufactures of woollen and linen cloth, and a trade in wine, flax, cloths, and hams. Pop. 1055.

SOBRAN or *SOBRAN* a tn. and par. Spain Galicia, prov. and 12 m. from Pontevedra, on an elevated plain above the E. shore, Bay of Aroux, where it has a harbour. It has a church townhouse prison primary school several fountains, and a trade in hams. Pop. 2273.

SOBRARBE, a dist. Spain in the Aragonian Pyrenees, extending about 45 m. in length, and 40 m. in breadth bounded E. by the ancient county of Ribagorça, N. the Hoyedo-Burastro, from which it is separated by the Sierra of Arbo, whence its name is derived. W. the ancient county of Aragon and N. France. This was the cradle of the brave Aragoneses who first held the Saracens invaders in check and laid the foundations of the liberties of Spain. They assembled as early as 818 in the fastnesses of Sobrarbe, where their primitive laws were drawn up. These were called *Fueros de Sobrarbe*, and became the model of those of many other places.

SOBREIRA-FONSECA a tn. and par. Portugal, prov. Beira Baixa, 22 m. W. S. W. Castello-Branco, r. bank Foz de Coa. Pop. 2461.

SOCANDAGO or *SACANDAGO*, a river, U. States issues from a small lake in the N. of New York; flows first E. then N. E., then suddenly turns N. E. and after a course of about 75 m., joins r. bank Hudson.

SOCATTOO, a tn. Russia Poland r. bank Bure, 30 m. W. Warsaw, with two churches, a synagogue, the remains of an old castle, and a considerable general trade. Pop. (1841) 5378.

SOCIETY ISLANDS, in some respects the principal group of the S. Pacific; between lat. 16° 11' and 17° 53' S. and lon. 148° 5' and 151° 48' W. and between the Low Islands, which almost join them on the E., and the Friendly Islands, situated at a greater distance on the W. The group consists of the principal island of Tahiti or Otaheite, which is about 32 m. long N. W. to S. E., and is divided into two peninsulas by an isthmus about 5 m. broad and a great number of comparatively small islands, of which the most deserving of notice are Eimeo, Omea, or Matia, Tauroa, Tapuana, or Sanden's Island, Huahine, Raiatea, or Uieia, Tahi, or Otahe, Huahine, Raiatea, or Uieia, or Matia, and Tahi, or Otahe. All the islands are elevated, and more or less mountainous. In Tahiti, which consists of an elongated ridge, the loftiest summit, Orohena, is 8500 ft. above the sea, and two other summits near it are respectively 7000 ft. and 6979 ft. Among the mountains, remarkable for their magnificent scenery are many deep valleys and romantic gorges in which a delightful climate and fertile soil maintain a luxuriant vegetation but it is towards the sea-side and along the foot of the mountains that the land is both most densely wooded and carefully cultivated. Close along the shore an excellent broad road, overshadowed with trees, affords an agreeable access to the different settlements which have been made around it. A coral reef, enclosing the island at the distance of 2 m. or 3 m., presents an effectual barrier against the violence of the waves, and at the same time, having several openings in it, forms a number of harbours, where the sea is occasionally tranquil, and the largest vessels can ride in safety. The best of these harbours, and the only one much used, is Matia Bay on the N. Point Vaua, which contributes to form it, and is the N. extremity of Tahiti is the most easily determined island in the Pacific Ocean, and is marked by Lieutenant Raper as a secondary meridian. According to him, the flagstaff on it is in lat. 17° 25' 10' S. and lon. 149° 28' W. One of the most remarkable features in the vegetation of Tahiti is the extent of ground occupied by the guava shrub. It was introduced from Norfolk Island about 40 years ago, and it now forms miles of woodland and bush entirely composed of it, and bearing a profusion of large and delicious fruit. The scenery of Eimeo is, if possible still more attractive than that of Tahiti and almost every island of the group has been described by navigators in rayurous terms as realising their ideas of an earthly paradise. The Society Islands appear to have been first discovered, in 1696, by the Spanish navigator Pedro Fernandez de Quirós, who gave to Tahiti the name of La Sagittaria. It remained unknown to the rest of the world till 1767, when Captain Wallis sent by George III. to make discoveries in the Pacific, reached Tahiti, and believing himself the first discoverer, gave it the name of King George Island. The year after it was touched at by Bougainville, but by far the most important visit was that of 1769 made by Captain Cook, in company with Sir Joseph Banks, and an illustrious scientific staff, namely for the purpose of observing the rare occurrence of the transit of Venus across the sun's disk. On this occasion, Captain Cook, besides surveying the chief island discovered several of the W. group, and gave to the whole the name of Society Islands. These discoveries excited the deepest interest in Great Britain and one of its most important fruits was the formation of the London Missionary Society which fitted out a vessel called the *Duff* to carry out missionaries and the blessings of Christian civilization. The result was successful beyond expectation. The great body of the natives abandoned their abominable practices threw away their idols, and had been formed into regular Christian communities, when the English propagandists, envying the Protestant success, sent two French priests for the avowed purpose of sharing in the evangelizing harvest. The unwillingness of the natives to receive them easily furnished a colour for a complaint of ill

usage, and the French government, either willing to become the tools of Russia, or anxious to turn their complaints to good political account, have robbed the natives of their independence, by establishing a protectorate under which there is reason to fear that all the labour and expense bestowed in civilizing these beautiful islands and their people will be lost. The population of the Society Islands has, like many of the other groups of the Pacific, remarkably decreased (Cook, in 1774, probably very much over-rated it at 300,000. The missionaries in 1797 made it only 10,000. A census taken about 1840 reduced it to 10,000 of which 1000 belonged to Emoo. In the earlier periods the main causes of decrease were, undoubtedly indolence and the licentious sensuality of the Aroel.

SOCKBURN par Eng Durham and York (N. Riding) 2638 ac. Pop. 218

SOCKNA, **SOENA**, or **SUENA**, a tn. Fuzun, half way between Tripoli and Mourouk lat. 29° N., lon. 16° E. It is walled, about 1 m. in circumference, has eight gates, and is clean and neat. The dates of Sockna are abundant and excellent, and the inhabitants hospitable and good tempered (New sometimes false hearsay). Pop. 8000

SOCCOCK, a tn. Silesia, Murau, prov., and 87 m. from Altschott, near the Sagra, with a parish church, courthouse, primary school and the ruins of an ancient castle. oil and flour mills, and a trade in honey and silk. Pop. 1473

SOCONUNCO, a tn. Mexico, dep. Olinapua, cap. prov. or dist. of same name, 213 m. W N W Guatemala. The district stretches along the Pacific about 43 m. with a width of about 33 m. and is mountainous and hot. Prior to 1843 it formed part of Central America, but in that year it was taken possession of by Mexico without any treaty.

SOCCORRO, a tn. New Granada, cap. prov. of same name, 160 m. N N E Bogota, in an excessively hot and unhealthy district. It contains a number of commodious houses but is for the most part ill built, ill paved and dirty. It has manufactures of cotton goods and straw-hats, dyeworks, a spinning-mill, and a considerable trade with the surrounding districts. Pop. 12,000 — The province is of great extent and has many fertile tracts. In the valley of Socorro both iron and copper are found.

SOCCORRO, an isl. Pacific Ocean lat. 18° 48' 14" N. lon. 110° 54' 10" W. about 24 m. long, and 9 m. broad. It may be said to consist of one mountain the summit of which is about 2000 ft. above sea level, and may be seen at the distance of 60 m. It is mostly covered with brushwood, intermixed with the prickly pear. Some vegetables are obtained here and both land and sea birds abound. Fish are also plentiful. The E. coast is very dreary and forbidding.

SOCCOLRA or **SOCCRA**, an isl. Indian Ocean, about 150 m. E N E Cape Guarifun in Africa, and 220 m. S S E. Ras Farak in Arabia, greatest length E to W, 7 1/2 m., greatest breadth, 23 m. area, about 1800 sq. m. The shores are generally bold, and, with exception of a few headlands with projecting reefs, have considerable depth of water near them furnishing tolerable anchorage. The surface is generally elevated, consisting of a table-land about 800 ft. above the level of the sea, which occupies nearly four-fifths of its area, and from which several mountain-ridges rise, presenting numerous granite peaks, some of them 6000 ft. high. On the more level parts of the table-land several wide depressions occur, and form valleys in which the moisture being very abundant then elsewhere, vegetation is more vigorous, and the best pasture of the island is found. The N. district is the most fertile. There date-trees skirt the water-coasts, and Sukium (*Sorghum ochrochaerum*) and cotton are cultivated to some extent. The N. district is also similarly though more partially cultivated, but the W and E. districts are for the most part very sterile. The principal natural productions are dates, which when properly gathered and packed, are the finest in the world, the gum of the dragon-blood tree (*Pterocarpus draco*), also of excellent quality. The common date, and the tamarind, or Indian date, from the fruit of which the natives obtain a cooling and refreshing drink. The domestic animals are, chiefly camels, oxen, sheep, asses, and goats. Soocra is a dependency of the Sultan of Kuaan, on the Arabian coast. The capital is Tamarid. The inhabitants, apparently a mongrel race formed by a mixture of aboriginals and Bedouin Arabs, are estimated at 4000, being only four to the square mile.

SOCUELLAMOS, a vil. Spain, New Castile, prov. Ciudad-Real 107 m. S S E. Madrid with a courthouse, prison, two primary schools, a church, an ex-convent, two hermitages, and three windmills. Pop. 9310

SODAH an isl. R E coast, Arabia, the second largest of the Curia-Murra group 3 m. long, by 3 m. broad, highest peak composed of stratified granites, 1310 ft. high. On the S. side is a bay 1500 yards deep with good anchorage decreasing from 10 fathoms at the centre of the bay to 10 fathoms.

SODBURY two pars. Eng. Gloucester—1 (*Little*) 1071 ac. Pop. 188 — 2 (*Old*) 3637 ac. Pop. 830

SÖDERBY (Garrpina) Eng. Sca. Carping-Scouny **SÖDERBY**, a vil. Sweden, lita and 40 m. N N W Upland, on ist. Jurmo, in an expansion of the Dal-Ell. It is beautifully situated in the vicinity of a fine garden and park finely covered with large oaks and other hardwood trees, and has one of the most celebrated and extensive tree-works in Sweden. The establishment is on a magnificent scale, many of the buildings are handsome and there are a church and several good collections belonging to the work.

SÖDERHAMN a seaport to Sweden lita and 42 m. N Götta, between two bays on a bay of the Baltic connected by a canal with the Lake of Vättna. It is built with great regularity, and has manufactures of linen, some fishing, a fishery, and general trade. Pop. 1500

SÖDERKÖPING a tn. Sweden lita and 28 m. E N E Linköping, on the Stur Å, near its mouth in the Bisthrik, a bay of the Baltic. It consists of wooden houses, coloured with dark red ochre has two churches, a townhouse, and schools, and manufactures of linen. The Gotha canal passes near the town. In the immediate vicinity is the much-requested thermal-spring of St. Nagulvi. Pop. 956

SÖDERMANLAND or **SÖDERMANIA**, an ancient prov. Sweden now forming the greater part of lita N. E. and a small portion of that of Stockholm

SÖDERNÄS, an isl. Sweden in the N of N Stockholm, opposite to Osthansen, from which it is separated by a narrow channel

SÖDERRIE JI a tn. Sweden lita and 18 m. W S W Stockholm on the Lilla canal which unites Lake Mälar with the Baltic, and is here crossed by an ingenious swing bridge. It contains a large post-office and is situated on a height, an hospital and is celebrated for its fisheries. Pop. 1000

SOLPA or **SORING** a native state, on Oclioas, about the middle of the W coast of the Gulf of Ben. one of the most important in the island. It is fertile and well cultivated. Pop. 18,000

SOERABAYA or **SOERABAYA** an E prov. Java bounded, N by the Java Sea, E the Strait of Madura, S. by the Pasuruan and Kediri and W. by Pamekasan, length, N to S, 60 m. breadth about 40 m. exclusive of the island of Madura (which is also included in the province). Towards the coast the country is low and flat, but rises inland to wooded hills of considerable height, culminating in the volcano of Andjono or Walirang 11,483 ft. high and is watered by several streams, of which the chief are the Brantas or Kediri and the Solo. It is very fertile, yielding rice, coffee, sugar, cotton and indigo. buffaloes and horses are numerous; rice and river fish are abundant and on the coast salt is plentifully obtained. The chief places are Soerabaya and Gresik. Pop. (1845) 970,000

SOERABAYA **SOERABAYA**, **SOERABAYA**, or **SOERABAYA**, an important seaport in Java, cap. above prov. in a low situation on the Strait of Madura, and intersected by a small stream of its own name, crossed by a draw bridge lat. (Kali-ras) 7° 14' 40" S. lon. 112° 44' 45" E. (a.) It is surrounded by an earthen rampart and wet ditches and other wise defended by several forts and a strong citadel. It has a large, roomy and secure harbour somewhat distant of seacoast from the rising up of its approaches. It contains above 8000 private houses of which above 1000 are stone-edifices and has a townhouse, various government offices, a Reformed and a R. Catholic church, an orphan hospital a town and several other schools a ship-foundry and powder magazine, a graving-dock, a ship-building yard, in which an extensive business is done in repairing as well as in building vessels, and an extensive shipping trade, exporting the produce of the island, rice, sugar, coffee, indigo, hides, raisins, birds nests &c., and importing European manufactures. It has several

towns suffered severely from fire. Pop. (1845) 50,000.—(Foy of *the* *Vindobona*.)

SOERAKANTA, a central prov Java, bounded N by prov Semarang, E. Madelon, W. Kadon and Djokjarta, and S the Indian Ocean; length, N to S, about 77 m. breadth, about 40 m. It is traversed in the N by a mountain-range, but is chiefly composed of an extensive valley, the extreme E. and W. points of which are formed by the volcanic Lawoe, 10,900 ft., and Marep, 9186 ft. It is watered by several streams, the principal of which, the Solo, flows E. N. E. to the Java Sea. Only a small strip, S. of a low mountain-range near the coast, sends its waters directly to the Indian Ocean. Rice, coffee, tea, tobacco sugar, and a variety of fruits are grown, and buffaloes, horses, and other domestic animals are numerous. Besides agriculture, the inhabitants pursue successfully many handicrafts, and are workers in iron gold silver copper, and leather cabinet-makers, carpenters, &c. The climate is favourable for Europeans. This province also forms a kingdom subject to Holland. Pop. (1845) 400,000.

SOERAKANTA, or *Soto*, a tn. Java, cap. above prov, 140 m. W. S.W. Soerabaya. It is a large important place, the residence of the emperor or Soesoehenna, many princes, and other important personages, and has a strong Dutch castle occupied by the resident a. Protestant churches and schools, including the Javanese institute, founded in 1837 for the instruction of the children of European parents in the customs, language, laws, &c. of Java, and fitting them for public offices. The inhabitants are very industrious they are excellent workers in leather making good saddles and horse-furniture, and the products of their looms and their dyeing are much esteemed. Pop. 100,000.

SOERASSO, a vil., ul. Sumatra, in the uplands, 48 m. N. E. Padang, in a small deep valley near the Kato. It is one of the four old capitals of the kingdom of Menangkabau.

SOEROK, *See* *SOEROK*.

SOEST a tn. Prussia, Westphalia, gov. and 15 m. N. Arnberg cap. circle, on a beautiful vale by the Soesterbach. It is surrounded by lofty walls flanked with towers, is entered by five gates and has a singular antiquated appearance. The streets are generally dark, narrow and winding, but several of the churches, which are no fewer than 10 in number, are very curious. Among others may be mentioned the Dom or cathedral, and the *Pfort Kircle*, both Byzanine and the *Waisen Kirche*, a splendid specimen of German pointed Gothic. The manufactures consist of woolen and linen cloth, hair, hosiery paper, and leather. There are also several oil-mills, breweries and distilleries. The trade is in cattle, corn, fruit and vegetables. About 1 m. from the town are the salt-works and *bathe of Sauerdorf*. *Soest* is the seat of several courts and offices for the circle, and has a normal school, orphan hospital and register-office for the crown. It was a place of great importance during the middle ages being situated on the line of traffic from the Netherlands across Germany. In the 15th century it stood a memorable siege by Dietrich, Archbishop of Cologne, who aimed at the subjugation of all Westphalia. He had an army of 50,000 men but the citizens ultimately compelled him to retire in disgrace. The painter *St. Peter Lezy* was born here. Pop. 8698.

SOEST or *Soez*, a vil. Holland, prov. and 11 m. N. E. Utrecht, in a well-cultivated district with a Reformed and a Catholic church, and several schools. Inhabitants chiefly engaged in agriculture, cattle-rearing, and in the turf and wood trade. Pop. 1886.

SOYALIA, a small tn., S.E. coast, Africa, Mozambique Channel, at the mouth of a river of the same name lat. 20° S., lon. 25° E. It is built on an unhealthy marsh and contains merely of a small collection of white-washed mud-cottages. It has an excellent basin for small vessels, but on account of the shallow bar at their mouth, it can be entered only at high water. It exports some gold-dust, and according to some old authors, is the *Ophir* of the ancients.

SOFIA SARRA, a tn. Naples, prov. Calabrie-Citta, 20 m. W. Rossano with three churches. Pop. 1280.

SOFIGNANO, or *Soerignano*, a vil. and par. Tuscany, comp. Florence, 7 m. from Prato with a church, and the remains of several ancient towers. Pop. 1016.

SOLINGEN, a vil. Wurttemberg, circle Dussau, about 2 m. W. W. Ulm, on the Elbe with a church, a textile and manufactures of linen, ribbons, and earthenware. Pop. 1667

SOFORO, or *SARRO*, a tn. Morocco, prov. and 24 m. S.E. Fez, in a large and steep but yet fertile plain, which is the evidence of the town is laid out in gardens, orchards, and vineyards. It is surrounded with walls, and consists of houses built mostly of brick, of only one story, and huddled together in narrow dirty streets. The only building deserving of notice is a handsome mosque.

SOGAMOZA, a tn. New Granada, 90 m. N.E. Bogota, on a river of same name also called *Galmazo*, which flows first N. and subsequently N.W. and falls into the Magdalena at Bojoceros, 180 m. N. Bogota.

SOGNEFELD, a mountain-group Norway, considered as belonging to the Thulim or Langfeld Mountains, and covering part of provs Bergendhus and Christiana, between lat. 61 and 62° N. It consists on the S. with the Fillefild and on the N. with the Langfeld proper and contains some of the loftiest summits in the kingdom; among others, the Skagafellstind, 8890 ft. The great mass of the Sognefeld forms an elevated plateau, from which the loftiest summits rise, often in peaks of the most fantastic form, and present scenery of the grandest alpine character. They are almost entirely composed of granite and mica-schist. They do not seem to contain any minerals of value.

SOGNEFJORD, a very long and comparatively narrow creek, Norway stretching E. from the sea, where the *Ralen* islands nearly run to its mouth up to the foot of the Sognefeld Mountains a distance of about 95 m. It forms numerous branches, in which, as well as in the main fiord many fine cascades and much noble but grand scenery occurs.

SOHAM, a market tn. and par. England, co. Cambridge The town, r. bank Cam, 16 m. N. N. Cambridge, is irregularly built, and many of the houses have a mean appearance. It has a spacious cruciform church, places of worship for Baptists, Independents Wesleyans and Unitarians a large charity school and free almshouse. The chief employment of the inhabitants is with dairy-and dairy. Excellent cheese and butter are made here. P. 2755. Area of par. 12,706 ac. Pop. 4760.

SOHAR, a tn. Arabic coast of Oman, 120 m. W. N. W. Muscat lat. 24° 24' N. In former ages it was the chief port or commercial capital of Oman, and it still has a population of 9000 souls, and a considerable trade. The town of Sohar, in the interior appertains to it, and increases the richness of its alkali. The adjoining country is well watered, and is usually populous. Sohar exports great quantities of dried fruits particularly citrons, to Persia.

SOHL, or *SOLZ* VON *YAMBOVITZ*, a co. Hungary bounded N. by co. Leptan, E. Glimb S.E. Neograd, S. Honth, and W. Honth, Bars, and Thoresen area, 808 geo. sq. m. It is covered by ramifications of the Carpathians, and watered by the Gran, which traverses it in a S.W. direction. There is little arable land but the pastures are excellent and are chiefly employed in feeding sheep. The forests are extensive, and abound with game and the minerals are both numerous and valuable, including silver, quicksilver, iron, and sulphur. The county is divided into two districts, *Sohar* and *Nessel* (the capital) and Lower or *Altschl*. Pop. 91,469.

SOHEAUN, a villet in Prussia, Silesia, gov. and 51 m. S.E. Oppeln, on a height, in a well-wooded but marshy district, with a church and synagogues, manufactures of woollen cloth, ordinary linen, and damask. Pop. 4094.

SOIGNIES, a tn. and co. Belgium, prov. Hainaut, 10 m. N.E. by N. Mons, with old and decayed ramparts. Most of the houses are well built and spacious, and form regular, well-laid streets. It has an ancient church, rebuilt in 155 by St. Francis Archbishop of Cologne a townhall, in the Spanish style, erected in 1639, an hospital, an orphan-asylum, almshouse, village, and numerous schools and manufactures of soap, silk, brandy, beer, and leather. Pop. 6588.

BOISSONS [anc. *Boissodunum*], a tn. France, dep. Aisne in a beautiful and fertile valley, 1 m. bank Aisne. It is well and otherwise fortified and though a very ancient place, has recently been so much improved that it has all the appearance of a handsome modern town. The principal buildings are the cathedral, an edifice of the 15th century, in a very dilapidated state, the abbey of St. Jean des Vignes, once a magnificent edifice, dismantled and decayed, but now a manufactory, the college, castle, and public library of 24,000 vols. and several rare MSS. The manufactures consist of coarse linen, hosiery,

stained paper earthenware, cordage and leather and the trade is in wool, corn, flour, flax, hemp, cattle, wood, and charcoal. Solesmes is the seat of a bishop, the seat of a court of first resort and commerce, and possesses a diocesan seminary and commercial college. It is mentioned by Caesar, under the name of Noviodunum, as the capital of the Suessones. At a later period, under the Romans, it took the name of Augusta. In 466, after the defeat of Syagrus by Clovis, it became the capital of the Franks and continued so till the seat of government was removed to Paris. Pop. 7900.

SOLJ or **SOJA** a river, Russia, rises in S W of gov Smolensk, flows S W into gov Mohilev, turns almost due S and reaching the frontiers of Garmyng joins L bank Dnieper, after a course of about 250 m. principal affluents, the Oster, Bessil, and Iput, all on the left. The stream is very rapid, but for a long distance navigable.

SOLK, a river, Russia, rises in N W of gov Orenburg near Novara, flows S W into gov Simbirsk, and joins L bank Volga, 15 m above Samara total course, 140 m. Some naphtha-springs are found near its banks.

SOLKAL, a tn. Austrian Galicia, 50 m. N. E. Lemberg, r bank Bug with three churches, a Bernardine monastery and manufactures of silk ribbons. Pop. 3100.

SOLNA a tn. Sweden. See SOCKNA.

SOKOLEKA a tn. Russia, prov and 23 m. N. E. Duly stok, near a small lake, in a fertile district. It is poorly built but has a spacious market place. Pop. (1840) 4008.

SOKOLOV, a tn. Russian Poland 18 m. N. Siedlec, in a sandy district, near r bank Cetynska. Pop. 1200.

SOKOTA a market in Abyssinia, 97 m. W. S. W. Gondar. It is a place of considerable size, but scattered and straggling. It is much frequented by the merchants of the S and W and is the great centre of the salt trade.

SOKUT a vil. Hungary, co. Stuhlweisensburg, 6 m. N. Marosvasar. With trade in corn and wine, and an excellent stone-quarry. Pop. 1891.

SOL-GALDOKAIA, or **SOL-GALTEKON** a tn. Russia, gov and 100 m. N. N. E. Kastrova. With six churches, manufactures of salt, limestone-quarries, and some general trade. Pop. (1861) 2988.

SOLANA, a tn. Spain New Castle prov and 28 m. E. Ciudad-Real, with a courthouse prison, several schools, two suppressed convents, a parish church and in the vicinity seven hermitages. Markets of gypsum and paper. It has manufactures of linen, serge, hats, and coarse cloths coarse earthenware, oil, tiles, and bricks. Pop. 7635.

SOLARO a vil. and com. Italy Lombardy prov Milan, 6 m. S. W. Barlesina, with three churches. Pop. 1123.

SOLAROI O several places Italy but the only one deserving of notice is *Solarolo-Rusaro* a vil. and com. prov Cremona, 9 m. N. Casal Magnona. Pop. 1833.

SOLARUSSA, a vil. and com., tel. Bardina, div Cagliari, prov and 16 m. W. S. W. Busachi, near the Tora. P. 1641.

SOLDKO, or **SALDO** a river Portugal rises in prov Alentejo flows almost due N then N. W. past Alexander-do-Sal, and falls into the Atlantic by a broad estuary, forming the Bay of Setúbal total course about 110 m. of which 40 m. are navigable. Its principal affluents are the Charrama, Odaga, and Maraboa the Romão, Campalhas and Davina.

SOLDAL, a river, L. Prussia, issues from a lake near a town of same name near Nendenburg flows first S. W. then W. enters Russian Poland, flows S. E. and E., and unites with the Mlawa in forming the Wkra. Total course 60 m. **SOLDAL**, or **DZALDOVO**, a tn. Prussia, gov and 100 m. S. W. Königsberg with two churches, and manufactures of woollen cloth, hosiery, and hats, several mills, and five general horse, and cattle markets. Pop. 1851.

SOLDIN, a tn. E. Prussia, gov and 42 m. N. N. E. Frankfurt, cap. circle, and near the S. shore lake of same name. It is walled has three gates, two churches, and two hospitals and manufactures of woollen and linen cloth, ribbons, hosiery, hats, leather, gloves, starch, and gunpowder. Pop. 5698.

SOLEC, a tn. Russian Poland, near L bank Vistula, 81 m. S. E. Radom. It has a considerable transit trade, the hardware and other articles from Silesia being landed here, and then forwarded. Pop. 1374.

SOLENT, or **SOLAT** Sna, that part of the British Channel separating the N. W. shore of the Isle of Wight from the

mainland of Hampshire, and extending between the Needles and W. Cowes. It has a width varying from 2 m. to 5 m., and, though its navigation is rather intricate, it affords a safe and well-sheltered roadstead to numerous vessels when either wind-bound, or in time of war waiting for convoy.

SOLLEKO a vil. and com. Italy, Piedmont, div and 8 m. W. N. W. Alessandria, on a small affluent of the Tanaro, with four churches. Pop. 2312.

SOLESINO, a vil. Italy gov Venice, prov and 17 m. S. S. W. Padua, with a church and two oratories. P. 2100.

SOLLEMER, a tn. France, dep. Nord 20 m. E. Cambrai on the Sella, with an ancient abbey and a large and handsome parish church, having a lofty tower and four remarkable groups of statues, called the Saints of Solesmes, considerable manufactures of linen, plain and printed cotton muscades, mercuries, soap, and leather. Flax and cotton mills, and numerous breweries. Pop. 4868.

SOLETO a tn. Naples, prov. Otranto, S. S. E. Lecce, with a church and two convents. Pop. 1850.

SOLETERE, can. and tn. Switzerland. See SOLOTEREN.

SOLFATARA, (anc. *Lacus Aethiops*), a lake, Papal States, 14 m. E. N. E. Rome. It is of small extent, and owing to the deposits made by its strongly petrifying waters, is constantly diminishing. Its greatest diameter is little more than 500 ft. Its surface is almost completely covered by floating masses of vegetable matter and hence it sometimes takes the name of *Isola Flottante*. Its water which is of a milky color, temperature 80° contains more than its own bulk of carbonic-acid gas, with a small quantity of sulphuretted hydrogen, it emits a strong smell of sulphur and is discharged into the Tevere by an artificial channel, called the Solfatara canal. It was in high repute among the Romans, who used it medicinally for various malades.

SOLFERINO a vil. and com. Italy, Lombardy prov and 18 m. N. W. Mantua, with a church and two chapels. In 1796 the Austrians were here defeated by the French and again in 1859 by the French and Sardinians. P. 1093.

SOLIGNANO (Latin *Solignanus*), a vil. and com. duchy and 23 m. S. W. Parma, L. bank Arco. It has a large and beautiful church, in the form of a Latin cross, an old castle in ruins, a primary school, a trade in corn wine, chestnuts and wood, sundries and limestone quarries, and a sulphur springs. Pop. 2341.

SOLLIL, a tn. and par. England co. Warwick. The town 18 m. N. W. Warwick, has two principal streets, clean and well kept, a handsome parish church with a beautiful spire, an Independent and a R. Catholic chapel seven schools including a free grammar school a reading-room and a library. Area of par. 11 236 ac. Pop. 3277.

SOLIKAMSK a tn. Russia, gov and 117 m. N. Perm on the Ussolka at its confluence with the Kama. It is an ancient place has five churches, two monasteries and two hospitals and manufactures of soap, embroidery lace and articles in gold, copper and the several tanneries and a trade in agricultural produce, furs, and salt. Pop. (1841) 2985.

SOLIMAN MOUNTAINS, Afghanistan. See SOULIMAN.

SOLIMONES, a name of the river Amazon (Solé).

SOLINGEN a tn. Rheland Prussia, gov and 18 m. S. E. E. Düsseldorf on a height above the Wipper. It contains a Protestant and two R. Catholic churches, a synagogue, and a commercial school and is the principal seat in the kingdom for the manufacture of hardware and cutlery. The staple article used to be sword blades, admired for their hardness, temper and elasticity and manufactured annually to the number of 800 000. The article next in importance is scissors of which 200 000 dozen are annually made Solingen knives also are disposed of in large numbers at all the fairs of Germany. Articles in copper and brass though of less importance, command a large sale. The celebrity which Solingen enjoys, in its particular branch of trade, reaches back to the 15th century (1477) when the manufacture of Damascus blades is said to have been introduced from the East by Count Adolphus of Berg. Pop. 6618.

SOLIPACA a tn. Naples, prov. Lavoro, dist. and 18 m. N. E. Caserta, near L. bank Calore with two churches. It is celebrated for its wine. Pop. 8400.

SOLK, or **SOLOS-SOLK**, a vil. Austria, Styria, circle Jelenburg about 15 m. from Steinach; with two churches, an old castle, and near it copper-mines. Pop. 1180.

SOLLER a maritime tn. Spain, in Majorca, 14 m. N Palma; lat. 39° 48' N. lon. 3° 47' E.; in a pleasant valley. It has paved but narrow streets, a townhouse, prison, three primary schools, a suppressed Franciscan convent, parish church and a hospital. linen and cotton thread are manufactured. As a heavy sea sets into the harbor with the W and N.W. winds, there is no safe anchorage. Oranges, oil and the lemons of the country are exported. Pop. 7024.

SOLLERS-HORN, par. Eng. Harford 1152 sq. P. 147. **SOLLERS-FORT**, a tn. France, dep. Var 9 m. N.E. Toulon on the Gapeau, with a handsome church, silk-mills, tan-neries, and a trade in figs, oranges citrons &c. Pop. 2485.

SOLLINGEN a vil. Baden, circle Middle Rhine, 3 m. S.E. Durlach near I. bank Rhine with a church a forge, and brick works. Pop. 1125.

SOLLIGHOLMBEG, par. Incl. Tipperary 2201 sq. P. 634. (Solligholmbeg) par. Incl. Tipperary 2201 sq. P. 2176.

SOLMAR a vil. Hungary. Hither Dunab. co. and 8 m. from Pesth with a church and a flour-mill. Pop. 1232.

SOLNITZ, or **SOLNITZ**, a tn. Bohemia, circle Königgrätz, 5 m. from Melitz. It is poorly built, has an ancient townhouse, a handsome church a poorhouse, and many *Solnitzer* of linen cloth and shoes. Pop. 1444.

SOLO, **BERKAWAN** or **BERKATA**, the largest and most important river of Java. It rises in the prov. of Boerakarta, passes the town of that name flows S.E. in a very zigzag course through great Malacca Semanggi lowlands and falls into the Java Sea, opposite W. end, of Malacca. Its total course with windings about 356 m. Excepting in the months of August, September, and October it is navigable for native boats till far above Boerakarta. — **SOLO** in Java. See **BOERKARTA**.

SOLUPURA, a tn. Naples prov. Principato-Ultra 7 m. S.E.E. Avellino, at the source of the Sarno. It is well built and contains a handsome collegiate, five parish, and several other churches three monasteries, two numeraries and two almshouses and has manufactures of woven cloth, leather, parchment, and jewellery. Pop. 6301.

SULOGE [Latin, *Cornutus Sulogetus*] a small district, France, which formed part of prov. Orleansais, and had Rouennais for its capital now included in dep. Loue et Cher.

SULOLA a corregimiento, Central America, Guatemala, bounded N.W. and W. by Quetzaltenango and Totomocapan E. Sacatepequez and Guatemala, and N.E. Vera Paz, area, about 8600 sq. m. The surface, though mountainous, is fertile, well watered, especially in the valleys and well cultivated, yielding good crops of wheat, maize, barley and various kinds of fruit, and rearing great numbers of cattle and sheep. Manufactures have made considerable progress and much of the wool grown is employed on the spot in the manufacture of jerseys and other coarse textures. Nearly three-fourths of the inhabitants are Indians of the Quiché and Kachiquel tribes.

SULOMBO (**GREAT** and **LITTLE**), two small isls. Java Sea. Great Sulombo lat. 5° 28' S. lon. 114° 28' E. is visible 24 m. off. Little Sulombo, about 9 m. N. from the latter, and nearly of the same extent, is low and woody.

SULOMON ISLANDS, S. Pacific. See **SAMOA**.

SULOW, an Isl. Indian Archipelago, S. entrance to the Strait of Flores. Lat. 8° 47' S. lon. 125° 38' E. (a) 80 m. long, by 10 m. broad. It is hilly, partly stony and little cultivated. The people consist of the mountaineers or aborigines, and the maritime inhabitants who are Malays. The chief exports are wax and fish-oil, which last is procured from a species of black whale.

SULOTHLEN (French, *Soloth*) a cao. Switzerland, bounded N. by Basel-Landschaft, W. by and S.E. Bern and B. Argau. It is the most irregularly shaped of all the Swiss cantons, its contour presenting merely a succession of protuberances and indentations greatest length N.E. to S.W. 30 m. greatest width, 18 m. area, 223 sq. m. It is traversed throughout by the Jura, which here assumes the form of seven distinct and nearly parallel terraces, highest at the S. and gradually lowering as they proceed N. from 3000 ft. to 1000 ft. Corresponding with these terraces are a series of parallel valleys. The whole canton belongs to the basin of the Rhine, which receives the far greater part of its drainage through the Aar which traverses the canton in an E.W. direction, and receives within it the Dornen and Emmen. The climate is on the whole remarkably temperate.

The strata belong to the Jura limestone-formation, and nowhere are the blocks of gneiss and granite which cover the surface of the slopes of the Jura more numerous and of larger size than in Solothurn. Among minerals the first place is due to iron, of which extensive beds, in the form chiefly of bog-iron, are found both on the N. and S. foot of the Jura chain. Both gold and silver were at one time worked, but the operations are now discontinued. The Unions is extensively quarried, partly for burning and partly for building. When susceptible of a high polish or variegated, it takes the name of Solothurn marble, and is much used for ornamental purposes. In some spots brown coal or lignite occurs. In respect of soil this canton is one of the most highly favoured in Switzerland. Not only in the lower grounds but in many of the mountain-slopes, almost all the ordinary cereals and large quantities of fruit are raised. After satisfying the home consumption grain is extensively exported. A large proportion of the surface is occupied by meadows and pastures. On these immense numbers of cattle, both for feeding and dairy purposes, are kept, and the produce forms one of the most important sources of revenue. The woods also are extensive. They are chiefly of hardwood, but are partially intermixed with pine. Manufactures, instead of making progress appear rather to have recently declined but trade, favoured much by locality continues to increase. The inhabitants are mostly R. Catholics and speak German. Numerous schools are provided, and every child save young of age must be at school. The canton is divided into two districts or bailiwicks. The government, once aristocratic, was considerably modified in 1831 and 1841 by a strong infusion of the democratic principle. Of the 105 members, of whom the great council or legislative body consists, 65 are chosen directly by the people, 40 by electoral delegates, and none are named by the council itself. P. (1860) 69,268 of whom 69,284 are R. Catholics and 3645 Protestants.

SULOTHURN (French *Soloth* and *Solothurn*) a tn. in Switzerland cap. above can. finely situated on the S. side of one of the most beautiful parts of the Jura chain, on both sides of the Aar, here crossed by two bridges, 18 m. N. Bern. The town was once regularly fortified but in 1855 the demolition of the fortifications was decreed by the grand council, and has since been accomplished. It is well built, has wide, well-paved streets, several good squares, of which that of the market-place, adorned with a fine fountain, is the best. The principal edifices are the minister or cathedral, the clock tower of Burgundian origin a massive square of solid masonry rising for 80 ft. without window or other opening, the town house, an old irregular building, surmounted by several towers, the museum, containing a rich collection of Jura fossils the barracks, the arsenal, with a very curious and extensive collection of ancient armour the theatre, public library and gymnasium. The manufactures are of little consequence, and consist chiefly of cotton stuffs leather, ironware, paper, beer and vinegar. Trade also is very limited. Koenigke the Polish patriot, spent the last two years of his life, and died here in 1817. Pop. (1860) 5916.

SULOTWINA, a tn. America, Galicia, 90 m. S.E. Lemberg in a richly-wooded district on the Bystrzyca. It has a Polish and Russian parish church, and a four-mill. P. 2500.

SULOYETZKOI **ORZOWO**, or **SOLZKOI** a group of isls. Russia, Gulf of Omega, 140 m. W.W. Archangel. The largest of them is 18 m. long by 8, by 12 m. broad and abounds with talc, obtained in large plates, often more than a foot square, and extensively used for glazing, particularly in sea-lanterns. It has a celebrated monastery to which numerous pilgrimages are made, and a large beautiful church, with a library containing many ancient books and MSS.

SOLRE, two places, Belgium — 1, (*sur-Sambre*), A vil. and wine prov. Hainaut, on the Sambre, 18 m. S.E. Mons, with manufactures of refined salt, a foundry, a brewery, marble, iron-works, a four-mill, and quarries of marble. P. 1778. — 2, (*sur-Goy*) A vil. and com. prov. Hainaut, 21 m. S.E. Mons, with a blast-furnace and other iron-works, brick-works, chalk-works, a brewery, and a four-mill. Pop. 870.

SOLRE-LE-CHATEAU a tn. France, dep. Nord, on the Soire, 51 m. S.E. Valenciennes. It has manufactures of lace, serge, and woolen wares, several worsted and filling mills, miteries, tanneries, marble and glass works; a trade in wool, flax, wood, &c. Pop. 2270.

SOLSONA [Latin, *Solonica*, or *Colona*] an episcopal city, Spain, Catalonia, prov Lerdia, 54 m NW Barcelona, on the Rio Noya. A strong wall with nine towers, three gates, fountains, and redoubts, surrounds the city, and on an eminence which commands the town, stands the square old castle with its round tower at the angles. It has two aqueducts, one with a fountain in the centre, and the other surrounded with colonnades; a townhouse, with prison attached, two endowed schools, several convents, an hospital, an episcopal palace, and a Gothic cathedral; manufactures of knives, locks, lamps, nails, &c., and two flour-mills. Pop. 2066.

SOLTA [anc. *Olynthus*, or *Solothurn*] an incl. Austria, in the Adriatic, on the coast of Dalmatia, nearly opposite to Spalato and separated by a narrow channel from the Isle of Bracon. greatest length W N W to E S E, 10 m. mean breadth, about 3 m. It is well wooded and fertile, and is famous for its honey, which owes its flavor to the rosemary which abounds. It has also a trade in wine and oil and supplies Spalato and Trau with firewood. Pop. 1743.

SOLTH, a market to. Hungary. Hither Danube, co. and 49 m. S. Feth in a marshy district on a branch of the Danube. It contains a Protestant church. Pop. 6949.

SÖLVESBORG or **SÖLVESBORG**, a seaport to. Sweden on a bay of the Baltic, lin and 38 m W S W Carlskrona. It is old, but tolerably well built, has a handsome market place, and a considerable trade with the interior. The harbor is good, the environs are covered with orchards, and in the vicinity are the ruins of an old castle. Pop. 1284.

SOLWAY FIEETH, an arm of the Irish Sea forming part of the boundary between England and Scotland and extending inland in a N E direction for above 41 m with a breadth diminishing from 20 m at its entrance between St Bees Head in Cumberland and Hayberry Head in Kirkcudbrightshire, to 7 m, and finally only to 3 m. On the Scottish side it receives the Urr and Annan, and on the English side the Darwent, Ehen, Waver, Wanspoo, and Eden. All these rivers owing to the rapidity with which the tide advances, are liable to a bore at high springs. A large portion of the Solway is left dry at ebb-tide, and the water from the quantity of sand is of a whitish colour. It abounds with fish, and has several valuable salmon fisheries. On its E shore are Whitelaven, Maryport, and Allonby, and on its W Annan and Kirkcudbright.

SOLVYCHINSKOYE, a town in Russia, gov and 267 m N P. Volodga. It bank Vychegda, with 16 churches, a monastery; manufactures of leather, tallow-molding establishments, and extensive salt-works. Pop. (1849), 1106.

SOLYMOS, several places, Hungary, particularly —1, A vil Thuter Thaum, co. Arad with a Greek church, and the ruins of an old castle occupied by Isabella queen of John Zaphys, as a place of refuge at the time when Duda fell into the hands of the Ottomans. P. 1215 —2, A vil Hither Thaum, co. Herve, near Gyöngyös, with a handsome church. P. 1604.

SOMAGLIA a vil and com. Italy Lombardy prov. Lodi, 3 m S W Codogno, with a church and manufacture of tiles and earthenware. Pop. 2047.

SOMAIN a m. France, dep Nord 10 m S. Douai, with manufactures of cambric and mills in which fine thread lace is spun. Pop. 2458.

SOMANITA a vil exco a vil and com. Italy Piedmont div Comi, prov Alba with a splendid palace, and several churches. Pop. 1895.

SOMALI a country of P Africa, occupying the most N E portion of that continent. It is of a peninsular form having the Sea of Bahal Mandab as far as Zeyla, on the Indian Ocean as far as Ras-el Khyle, lat 7° 45' N., on the E., and terminating N F in Cape Guardafui. Its limits S W are unknown. Two ranges of mountains traverse the peninsula S E to N W between which lies the Wadi Nogal, or Happy Valley, extending in almost a straight line throughout the whole length of the double range. The natives speak of this valley in the most glowing terms, which apparently forms their great road for trade. It is extremely fertile and beautiful, is rich in gum, and abounds in game and water. The greater part of the N coast, and a portion of the S E of Cape Guardafui, is lined with hills of considerable elevation, in some parts attaining a height of between 6000 ft. and 7000 ft. On some of the mountain-ranges many large blocks of pure white marble are found, with abundance

of obsidian, gypsum, and large masses of basalt. It is not a little remarkable that the majority of the streams flowing from the mountains on the coast are bitter and in quality highly astringent. There are, however, others that afford most delicious and pure water. Several varieties of gum-trees cover the mountains, and the mimosa, acacia, wild fig, and several species of the casah and also are abundant. Wild beasts are numerous; they include elephants, lions, leopards, hyenas, wolves, and jackals. Several varieties of deer, *Jerboa* squirrels, and a species of mongoose are common. White vultures of enormous size are frequently seen also the common osprey. The *Scorpius* are represented as peridious, bigoted and quarrelsome. The principal articles of trade or produce are gum, myrrh, ivory, ostrich-feathers, and gum-arabic some orchill-wood, and a kind of saffron. The only port is Berbera, on the N coast.

SOMBREFK a vil Hungary, Thuter Danube, co. Banya, about 3 m. from Mohacs, in a fertile wheat-district with a church, two handsome chateaux and some trade in cattle and horses. Pop. 2173.

SOMBOR, in Hungary. See Zombor.

SOMBORN formerly **BONACORUM**, a market in Hesse-Cassel prov and 7 m. E. Hanau with a church, tile-works, and four mills. Pop. 1544.

SOMBOURN two para. Eng. Hants —1 (Kings), 7425 ac. Pop. 1742 —2, Little, 1231 ac. Pop. 101.

SOMBRÉE a vil and com. Belgium, prov and 13 m W W Namur, inhabitants chiefly employed in agriculture, and partly in linen weaving. Pop. 2120.

SOMBRPHE a small town in Mexico, dep. and about 80 m. N W Zacatecas, remarkable only for the rich mines of silver in its neighbourhood.

SOMBRERO, an unincorporated vil in Ill., the most N of the Caribbean Islands, lat. center 18° 33' 40" N., 81° 27' 45" W., about 8 m long, N P to S W, breadth 100 yards. It is flat, rugged and without soil as occupying a small patch near the coast, on which grow a little grass, some weeds, and a kind of asphodel. Multitudes of sea-fowl frequent the island during the breeding season.

SOMERSET [anc. *Somerset*] an ancient county in Assate Turkey, peah. Marah on the Ephraim 50 m. N E. It is the remains of this celebrated place, the birth-place of Lucretius are just recognizable. The modern town is small and miserable.

SOMERBY three para. Eng. —1, Jester, 1000 ac. Pop. 503 —2, Lincoln, 2990 ac. Pop. 297 —3, Lincoln 1940 ac. Pop. 270.

SOMERCOTES, two para. Lanc. Lincoln —1 (North), 8222 ac. Pop. 1033 —2 (South), 2597 ac. Pop. 400.

SOMERFORD three para. Eng. Wilt. —1 (Great), 1770 ac. Pop. 650 —2 (Keynes), 1640 ac. Pop. 373 —3, (Little), 1892 ac. Pop. 457.

SOMERSET a m. and com. Belgium prov. R. Flan. dep. 8 m. N W Ghent with a church, chapel, communal house, orphan asylum, hospital, and two chateaux. Linen and cotton manufactures, a dye-works, two breweries, and numerous mills. Pop. 7138.

SOMERSET a vil and com. Eng. Suffolk 1410 ac. P. 527.

SOMERSET a vil and com. Eng. Derby. 697 ac. Pop. 111.

SOMERSET, par. Eng. Lincoln 600 ac. Pop. 64.

SOMERSET a co. England bounded N by the Bristol Channel, A. E. Gloucestershire, B. Wiltshire, S Dorsetshire, 8 W and S Devonshire, greatest length E to W, 68 m, greatest breadth 43 m., area, 1607 sq. m., or 1,078,090 ac. The coast in which the only two harbours of any importance are formed by the mouths of the Avon and Parrot, is in the E., with the occasional interruption of a few limestone-cliffs, low and marshy but in the W is generally lined with lofty cliffs, composed of slate. The interior consists of ranges of hills separated sometimes by valleys, but more frequently by extensive low marshy flats or fens. In the N E these hills are irregularly grouped, and form a number of picturesque eminences the loftiest of which, Lansdown and Dundry hills attain the respective heights of 818 ft. and 790 ft. E. of these groups, and extending in a W N W direction from near Frome to the Bristol Channel, are the Mendips Hills, which form a marked and continuous range nearly 30 m. long, and

In some parts exceed 1000 ft. in height. The Quantock Hills, occupying the W. part of the county are still more elevated, and in their culminating point, called Bagborough Station, or Wolf's Neck, attain the height of 1270 ft. In the N.E. the prevailing strata belong to oolite formation, and contains the quarries which furnish the famous Bath stone. In the E. and S.E. magnesian limestone is largely developed. On the N.E. side of the Mendips Hills, extending from the neighbourhood of Frome towards Keynsham, are three small isolated coal fields, the last of which is nearly connected with the large field of Gloucester. These fields are situated, particularly on the E. by mountainous limestone, interrupted by occasional patches of old red sandstone. In the W. of the county the latter forms the prevailing formation, and consists chiefly of slaty rocks, forming the wild moorlands of Exmoor Forest. Besides the Avon and Parret already mentioned, the former bounding the county on the N.E. and the other traversing it nearly centrally in a N.W. direction, numerous other streams descend from the hills, and afterwards wind circuitously among the marshes. Among others are the Yeo, Axe, Brue, another Yeo or Tral and the Tone. By a number of cuts and canals, and more especially by the Glastonbury canal and the Yeo and Parret Navigation an important chain of internal communication has been formed, and to this the advantages of the railway system have recently been added by the Great Western railway which, after skirting the county from Bath to Bristol, pursues a somewhat circuitous course S. to Taunton and is joined by several important branches. Both the soil and climate of Somerset are well adapted for agriculture, and particularly on the rich alluvial lands, and in the vale of Taunton heavy crops of the finest wheat are raised. The meadows and pastures too are remarkably luxuriant and rear large numbers of excellent cattle both for the butcher and the dairy. The hilly grounds are chiefly pastured with Leicester or Southdown sheep. After cereals the most important crop is potatoes. Flax and hemp are grown to some extent, and wood and tannin form important objects of culture in particular districts. The manufactures, mostly woollen and worsted goods, gloves silk and lace, have their principal seats at Frome, Taunton, Wellington, Clarendon, and Shipham-Mallet. The salmon fisheries and other fisheries are carried on to some extent in the Bristol Channel. P. 448, 816.

SOMERSETSHIRE—1 A rd and par Langdon, co. Somers. E.N.E. Hemington in a fertile district with a parish church a Baptist chapel, and a free school. Area of par, 4121 ac. Pop. 1853—2 Par Leg Suffolk, 1027 ac. Pop. 492.

SOMERTON a market tn. and par England co. Somerset. The town nearly in the centre of the county not far from L. bank Cary over which is a stone bridge, 23 m S.W. Bath consists chiefly of five narrow streets and has an ancient church a free school, a well-endowed almshouse; and places of worship for Independents and Wesleyans. Glove making is carried on to some extent. Area of par 6926 ac. P. 2140.

SOMLITON four pars Eng.—1 Oxford 2140 ac. P. 342—2 Suffolk; 1040 ac. P. 186—3 (East) Norfolk, 708 ac. P. 62—4 (West) Norfolk 1189 ac. P. 262.

SOMERVILLE a vil. and township L. States Massachusetts on the Shawheent and several lines of railway and 8 m N.W. Boston. It has among its establishments the Mass. asylum for the insane, and Tufts college established by the Universite in 1852. The only extensive public works are those of the New Bedford Company. Pop. 1850 3540.

SOMIDOURO a vil. and par Brazil prov. Minas Geraes, 12 m. S.E.E. Mariana, with a parish and five auxiliary churches most of the inhabitants are miners. Pop. 3000.

SOMLYO or **SOMLYO-SOMLYO** a market to Austria, Transylvania co. Krassna, on the Krassna, 52 m N.W. Klausenburg with a Protestant and a Greek church a Minorite cloister courthouse, and mineral springs near it is the old castle of Bathory. Pop. 717.

SOMMA, a tn. Naples, prov. and 9 m E. Naples, at the foot of Mount Vesuvius with a castle, three churches, three monasteries, and a university. Pop. 7120.

SOMMA or **SOMA**, a tn. and com. Italy Lombardy prov. and 37 m. N.W. Milan, on the Ticino at the point where it issues from Lake Maggiore. It is a well-built place, of considerable antiquity; has a court of justice, a magnificent palace, two parish churches, and a trade in wine and silk. Two great battles have been fought in the vicinity—one be-

tween Caesar Marcellus and the Insubri, and the other between Hannibal and Scipio. The Romans gained the former, but lost the latter. Pop. 3880.

SOMMARIVA **nu-Bosco** a tn. Italy, Piedmont, div. Cune, prov. and 14 m N.W. Alba, with a court of justice, a parish church, finely seated on a height near the side of the cliff, of which some ruins still exist as a hospital, three schools and a charitable endowment. Pop. 533.

SOMME (Latin, *Somua*) a river France, rises in dep. Aisne, 7 m. N.E. St. Quentin flows S.W. enters department Somme, flows N.W., past Peronne, Amiens, and Albertville, beyond which, about 16 m., it falls into the English Channel. Its only affluent of the least importance are the Avre and Cella, both on the left. Its whole course is about 155 m., of which 30 m. commencing at Amiens, are navigable. By the canal of Somme and that of St. Quentin, it communicates with the Oise and the Scheldt.

SOMME a dep. France bounded N. by dep. Pas-de-Calais, N.E. Nord, S.E. Aisne, S. Oise, S.W. Seine-Inférieure, and N.W. the English Channel, greatest length E. to W. 71 m., average breadth, 38 m., area, 2545 sq. m. The coastline which has an extent of about 25 m., is divided into two nearly equal portions by the mouth of the Somme that to the N. consisting of low sandhills, little raised above the sea-level and that to the S. of steep cliffs, composed of clay, sand, and chalk, which are of a mouldering nature, and incessantly giving way before the action of the waves. The interior consists for the most part of extensive naked plains, which have a dull monotonous appearance, but are occasionally diversified by small valleys, cultivated by strands, and often covered with verdant turf. The principal river is the Somme, which gives its name to the department, and traverses it centrally E. to W. receiving the Authie and the Selle both on the left bank. The water-communication is extended and greatly improved by the canal of the Somme. The soil is for the most part a mixture of chalk sand and clay, and is not possessed of much natural fertility but has been greatly improved by careful cultivation. About three-quarters of the whole surface are arable and one-twelfth is in wood which is much scattered over the department. The cereals produced more than suffice for the consumption. Obnoxious crops beet, hops, dye and medicinal plants are also extensively grown. There are many large and thriving orchards, from the produce of which an excellent cider forming the common beverage of the country is made. There are no minerals of any importance. Most of the inhabitants are engaged in agriculture but manufactures have made considerable progress, and consist chiefly of woollen cloths, velvet, furniture prints, hampers, cotton and linen goods, hosiery, iron wares, beetroots sugar, leather, paper, soap, oil, glass, mineral acids, and chemical products. The trade is chiefly in corn, flour, clover, linens, and oleaginous seeds, cattle, salt provisions coal wool cotton and linen thread, rack-abeating, cordage, and colonial produce. Somme is divided into five arrondissements—Amiens (the capital), Abbeville, Doullens, Montdidier and Peronne subdivided into 41 cantons, and 881 communes. Pop. (1855), 570,841.

SOMMEP a tn. Hindostan, prov. Gajerat, 30 m S.E. Rajahmupoor, in a swamp, and during the rainy season almost under water. It contains about 4000 houses.

SOMMELSDIJK, a vil. Holland, prov. S. Holland, dist. Overijssel, 19 m S.W. Rotterdam, with a convenient harbour connecting with the Hartingh. It has a church and a chapel, a townhouse, a school a general and an orphan hospital, and some trade in fish and agricultural produce, particularly grain. Pop. 2454.

SOMMEN a lake, Sweden, in S.W. of the Lunköping. It is of very irregular shape, and stands about 450 ft. above the sea-level, in the midst of wild and mountainous scenery, greatest length, N.W. to S.E. 25 m.; greatest breadth, 8 m. It contains a large island, receives several small streams, and discharges itself at the N. extremity by a stream which joins the Rönne, and by means of a canal communicates through it with the Baltic.

SOMMERDA, or **GROVE SCHENCK** a tn. Prussia, gov. and 15 m. N.N.E. Erfurt, on the Unstrut. It is walled has two churches, and manufactures of iron wares. Pop. 3380.

SOMMERREIN, or **BOUCINA**, a market in Hungary, co. and 11 m. S.E. Presburg, in the greater island Schütt,

near l bank Danube. It has a Lutheran a Calvinistic, and a R. Catholic church and a handsome townhouse, with a tower and several mills. Pop. 8590

SOMMERFELD a tn. Prussia, prov Brandenburg gov and 45 m S.S.E. Frankfurt, on the Labai. It is walled and has a castle, manufactures of woollen and linen cloth, and a trade in horses and cattle. Pop. 8448

SOMMERHAUSEN, a vil. Bavaria, Lower Franconia, r bank Main, 8 W Würzburg, with a church, castle, poor-house, and orphan hospital manufactures of tobacco, muslin, lace, and wicker-work, and a trade in wine and fruit. P 1929

SOMMILIKES [anc. *Shamir*] a tn. France, dep. Gard, 15 m. S.W. Nîmes on a height above l bank Vidourle. It was once fortified, and formed an important Protestant stronghold during the religious wars. The fortifications have been razed, with exception of the castle. The manufactures, which are of considerable importance, consist of woollen cloth, woollen covers, and molasses. There are also several distilleries, tanneries and fuling-mills. The trade is in agricultural produce, wine, brandy, combed wool sheepskins woollens &c. Pop. 8623

SOMNATH, or **PUTTAN SOMNATH** a tn. Hindoostan at the junction of three streams near S.W. shore Gujrat 29 m. N.W. Diu Head; lat 20° 58' N lon. 70° 25' E. It is celebrated for its temple which stands on the site of an ancient edifice razed by the Sultan of Gujrat and subsequently razed by the Mahometans. It is annually visited by multitudes of pilgrims. The gates of the original temple carried off by Sultan Mahomed, and erected on his tomb at Ghuznee, were restored to Somnath in 1842 after an absence of 800 years, by Lord Ellenborough, after Ghuznee had been taken by the British. The whole district is celebrated in the tales of Hindu mythology

SOMNO (Sao no) two rivers Brazil —J, Rises on the confines of prov Pernambuco, in the Serra-da-Figueras prov Goias and proceeding N.W. through this prov, joins r bank Tocantins —S, Rises in the Serra-da-Sandade, prov Minas-Geraes, on the frontiers of prov Goias flows N.E. receiving the Alimta on the right, and joins r bank Paracatu whose volume it doubles.

SOMODY, or **Somoevi** a vil Hungary Nether Thesus, co. Abauyvar, about 25 m. from Kuchau. It is a cavalry station and has a church and a mineral spring. Pop. 1189

SOMOGYVÁR, a vil Hungary Thutler Danube, co. Fumegh about 2 m. from Urag Lake, in a fertile district it has a church, the extensive ruins of a strong castle, several mills and a trade in corn, cattle, and wine. Pop. 1042

SOMOLYA, a vil Hungary, co. Iara, about 6 m. from Mero Kfveed, with a trade in corn, wine, and timber, and a stone-quarry. Pop. 1149

SOMORROBIRO a vil Spain prov Biscay, in a valley and l bank river of same name near its mouth in the Bay of Hiscay, 18 m. N.W. Bilbao. It has a small port, defended by several batteries and near it a turreted palace. In the valley rich seams of iron which is extensively mined and manufactured. Pop. (valley) 3040

SOMOT, a market town Hungary Nether Thesus, co. Barcs, 6 m. from Egriar, in a fertile district with a church a castle with fine gardens a mill and fine oak timber. Pop. 1068.

SOMOSKEZS, or **Somos-Köt** a vil Hungary, Thutler Thesus, co. Arad in a well-wooded but not fertile district, 15 m. from Zeredo it has a Greek church. Pop. 1142

SOMPTING par Eng Sussex 2930 ac. Pop. 569

SOMU Somu a tn. B. Pacific, N.W. side, lat 14° 46' S lon. 119° 58' W consisting of about 300 houses.

SOM-SAVARA, a vil Spain, E. extremity of Isl. Majorca, near the sea. It has a square, which serves as a market-place a parish church, endowed primary school 12 flour and 14 oil mills, and a tile-work. Pop. 1296.

SOMALI a tn. Hindoostan, prov Malwah, 145 m. E. by S Odeypoor; a flourishing place, with about 4000 inhabitants.

SOMCINO a market tn. Austria Italy, gov Milan, prov and 20 m. N.W. Cremona, r bank Oglio. P. 4228

SOMERBURG, a tn. Denmark, esp. bar. of same name, on S.W. of Isl. Alsen duchy and 37 m. N.W. E. Schleswig on an activity near the Alsen the whole of which may be regarded as a continued harbor. It has a collegiate church an old turreted eagle of its name on the strait, and the well

endowed hospital of St. Jorgen good building-yards, and some shipping and general trade. Sonderburg was fortified in 1348. Pop. 3806

SONDERSHAUSEN, the cap. of Schwarzburg-Sondershausen, 34 m. N.W. Weimar. It is walled has four gates, a palace, with gardens, and a rich cabinet of natural history, two churches, a gymnasium, normal school, savings bank, and theatre. Pop. 3500

SONDURIO a tn. Italy Lombardy, gov and 57 m. N.E. Milan esp. prov of same name at the S. foot of the Rhetian Alps, on the Malloso near its junction with r bank Adda. It has eight churches, a gymnasium, hospital, theatre, and house of correction, a civil and criminal court of first resort, several schools, and several industrial establishments. It is extremely liable to inundation by the Malloso, which almost destroyed it in 1854. Pop. 4767 (prov) 56144.

SONE, or **SONA**, a river Hindoostan, which rises in a plateau on the N. frontiers of Gundwana, not far from the sources of the Nerbudda flows first N.W., then E.N.E., and joins r bank Ganges, 23 m. above Patna after a course of about 450 m. Its principal affluents, all on the right, are the Coput Hantoo Kumbur and Coyle. In the upper part of its course it flows through a narrow valley hemmed in, particularly on its l bank by lofty mountains, separating its basin from that of the Jumna, during its middle course, the same mountains separate it from the Ganges to which for many miles its direction is almost parallel. In its lower course the valley widens out into alluvial plains while its bed, nearly dry, except in the rainy season, is marked by a desert of mud resembling a vast arm of the sea when the tide is out. At Baroon about 60 m. above its mouth this bed is 8 m. wide and the banks, unprovided with trees have a very barren and desolate appearance. In February, 1848 when Dr. Hooker crossed the river at this point, the body of water was not above 30 yards wide, but in the rains the whole S. m. become one rapid flood, 10 ft. or 12 ft. deep, and colored with yellow sand. Above Baroon the country becomes rich and highly cultivated and is covered with indigo cotton sugar-cane, &c., while the date or toddy palm and the fan-palm become very abundant and tall. Still higher up the mountains approach the river, and send out spurs forming lofty precipices of limestone and sandstone. At Kola, considerably farther up the strata become carboniferous, and coal is reported to exist. Along the banks of the river, shivered and undulating strata of metamorphic quartz, hornstone, &c., occur in many places, and appear to furnish the beautiful agates and carnelians known in commerce by the name of Sonae pebbles. Alligators, chiefly of the short nosed or mugger kind are numerous in the stream. Fish also, particularly several varieties of carp, abound and are said to be superior to those of the Ganges. The Sone claims to be a clesio river having been satisfactorily identified with the ancient Erabooos an apparent corruption of the Sanskrit *Hieromys* Sain, or Golden-headed Gold fish, however, no longer found — (Hooker's *Himalayas Journals*)

SONEJA a vil. Spain Valencia, prov Castellon do la Plana, 37 m. N. Valencia, r bank Valencia, with a townhouse, built in 1845, of good architecture two primary schools, a parish church, and a hermitage off and flour mills, and manufactures of which lead. In 1838 the Carlists burned Soneja, but were overtaken by General Gues and defeated. P. 1640

SONG oa, a large river Annam, formed by the junction of the Lo-tien and Song-thai the former rising in China, and the latter in Laos. It flows S.E. passes Kambo and Hiep, and falls by several mouths into the Gulf of Tonquin. The natives on its banks wash gold from its sands.

SONGARI, or **SONGARI**, a river, China, Manchouria, rises in the N. slope of the Anlu Chanyan Alin Mountains, on the N. frontiers of Corea. flows first N.W. past the towns of Kirm Oula and I stomes to the frontiers of Mongolia, then E.N.E. past the town of Ooculun, and joins r bank Amoor, after a course estimated at above 700 m. It has a deep channel well adapted for navigation, and receives numerous tributaries, of which the most important are the Hoochoa on the right, and the Tonken and Tamlie on the left.

SONICO a vil and com. Italy Lombardy prov Bergamo 3 m. S.E. Edolo l bank Ollo, with several churches, and a saw-mill tile-works and lime-kilns. Near it are slate-quarries and iron-mines. Pop. 1454

SONINO [see *Sonoma*] a in Italy 17 m S.E.W. from Rome. Pop. 1000

SONNEANEE, or **SONNEAKER**, a tn. Delocheban, N. extremity bay of same name, lat. 28° 25' N. lon. 66° 25' E. It is small and dirty and has about 500 houses built of mud, and each surrounded by a small turret or fire, open on one side to the sea-breeze, which it sends downward into the interior of the building, for the purpose of mitigating the excessive heat. The inhabitants live principally by fishing and are extremely poor, except a few Hladons who have the whole trade of the place in their hands. The imports from Bombay are silk, aloes, iron, tin, steel copper pepper sugar, and opium; from the Persian Gulf, dates and slaves from Somal, coarse cotton cloths. The exports are horses, butter, wool, hides, oil, grain, dried fruits, and gum. — The bay is said to be free from rocks or shoals, and is capable of affording anchorage to the largest fleet. The harbor on which the town is situated, is a large irregular inlet, spreading out in numerous swamps, and choked with shoals. It is difficult of access, and has many other disadvantages, including a bar at the entrance. Sea-going vessels in general anchor outside the bar at the distance of about 3 m from the town.

SONNEBERG a tn. Germany, Saxe-Meiningen capital, in a narrow valley on the Rhine 34 m E.S.E. Muehlhausen. It contains a handsome church and workshop, but is chiefly remarkable for the extent to which it carries on the manufacture of all kinds of toys, which, under the name of *Sonneberg* and *Nürnberg* wares, are known over Europe. A quarry in the neighborhood produces excellent stone, and vast numbers of slate-pencils. Pop. 3782

SONNEBERG or **SUNBERG**, a mining tn. Bohemia circle and K.W. Sax on the Erzgebirge It is regularly built, has a church, townhouse, school and numerous mills, here it silver and iron are worked. Pop. 1743

SONNEBERG a tn. Prussia, prov. Brandenburg, gov. and 17 m N.E. Frankfurt, at the confluence of the Lahn with the Lohr It has a church and a castle manufactures of woollen cloth a tile-work, and several mills. A great number of eels and gray fish are taken here. Pop. 3186

SONNEWALDE, a tn. Prussia, prov. Brandenburg, gov. Frankfurt, circle and 11 m S.W. Luckau. It has a church a town-school, an hospital manufactures of linen, warts, and a trade in cattle, flax, and yarn. Pop. 1005.

SONNING, par. Eng. Berks and Oxford 2615 ac. Pop. 3095.

SONOMA a post in and port of entry U. States, California, cap. co. of its name. W. side Sonoma Creek, on N. shore of Bay of San Pablo, 50 m from San Francisco, in a rich agricultural district. Pop. (1853), 1200.

SONORA a tn. U. States, California, on the Woods, a tributary of Tulare, 120 m. E. San Francisco. Pop. (1853), 4000.

SONORA a Mex Mexican Confederation, bounded N. by New Mexico, belonging to the U. States E. Chihuahua and Durango, N. Coahuila, and W. the Gulf of California area, 123,406 sq. m. The surface in the W. and E. is generally flat, and to the latter direction contains a considerable extent of fruitful land watered by the rivers Mayo and Yaqui, and a number of small lakes which are formed on the flats during the rainy season, and are carefully used for irrigation towards the E. the cordillera of the Andes begins to rise, and ultimately attains great height in the Sierra Madre and other massive mountain-chains. In this mountainous district many fine and fertile valleys intervene, and rich mineral deposits have been discovered. The climate is warm throughout the year the thermometer ranging between 75° and 84° from April to September but in early spring rapid changes of temperature are common. The chief rivers, beside the Mayo and Yaqui or Hualqui, already mentioned, are the Rio-Grande-de-San-Pedro, the Opavara, Sonora, and tributary Indio, Guaymas San Ignacio Gila, and Colorado, the last forming part of the N. boundary. A large portion of the department is occupied by Indian tribes, some of whom have been converted to Catholicism, and submit partly by agriculture but the greater part are wild and nomadic, and generally hostile to the whites, on whom they often commit great ravages. The trade of Sonora is chiefly carried on at Guaymas which has one of the best harbours in W. of Mexico, and at Pico, a great depot for the goods imported at Guaymas. For administrative purposes

it is divided into the two depts. Arispe and Sonora, each with three cantons. Its capital is Ures. P. (1850) 139,374

SONORA a river, Mexican Confederation rises in N. of dep. Sonora, near lat. 25° N. flows S.W. S.W., skirting the E. side of a cordillera, then nearly due W., past the town of Pico, and a few miles below disappears in an extensive lake. total course, 230 m. chief affluent, the Dolores.

SONSBECK, a tn. Rheinland Prussia, gov. and 81 m N.N.W. Düsseldorf, on the Sonsbeck with a castle, and a Protestant and E. Catholic church; manufactures of woollen cloth, and articles in brass. Pop. 1336.

SONSBECK a tn. Spain New Castle, prov. and 11 m. S. Toledo. It has a townhouse, and prison a primary endowed school for boys, three private schools for girls, a parish church, a hospital, and a penitentiary. Coarse cloths are manufactured and there are a chocolate mill, and several laundry-districts. Pop. 4067

SONSONALE in Central America. See SANTA ANA

SONTHEIM — 1 a tn. Württemberg circle Neckar near Heilbronn with a church and manufactures of saw-logs. Pop. 1014 — 2 a tn. Württemberg, circle Jast, near Heidenheim; with a church and a market. Pop. 1167

SON THOUEN a market tn. Bavaria, circle Swabia, at the confluence of the Ostereich with the Iller 99 m. S. Lindau. It has two churches, a castle, hospital and a primary a blast-furnace, and other iron-works, several and cranes, numerous mills, and a trade in linen. Pop. 1863

SON TIRA a tn. Mexico-Casas Nuevas, on a small river of same name, 24 m S.E. Casas. It is entered by four gates contains a church and a castle, and has manufactures of woollen and linen cloth a paper and a powder mill. P. 1746.

SON TOW iron, a tn. China, prov. Kiangsoo, on a lake in the line of the Imperial canal and in the forest valleys, and most populous district of China, 12 m S.E. Nankin. It consists of the town proper surrounded by walls about 10 m in circuit, and of four suburbs of great extent together with an immense floating population and is completely inter-acted by canals crossed by numerous bridges, several of which are substantially built of granite. It is celebrated throughout China for the splendour of its buildings, the beauty of its terraces and gardens, the luxury and refinement of its inhabitants, and the excellence of its manufactures including silk goods, said to be superior in variety and richness to those of any other town in the empire. Iron and cotton fabric, glass, lacquered ware, paper, and numerous articles in ivory wood, born &c. The trade, both in these articles and in the general produce of the country is very extensive, and the signs of prosperity are everywhere visible, the whole road to Shanghai about 40 m. S.W. presenting a continuous range of towns and villages while the environs are covered with orchards, gardens, mulberry plantations, and highly cultivated fields of cotton, rice, wheat, &c. Pop. said to exceed that of Nankin and not unestimated to be as far short of 2,000,000

SOUDAN, **SOUDAN**, or **SUDAN** more correctly *Harr* or *Bilad* or *Sudan* the Land of the Blacks is the general name given by Arab writers to Negroland, where it confines on the desert, or to the countries along the N. frontier of the Sahara. The application of the name however, is often special, and appears to vary in different authors, not so much owing, perhaps, to the political fluctuations of the African interior, as to different degrees of intimacy with the several commercial routes across the desert, though the relative importance of those routes must, doubtless, have risen or fallen with the power of the tribes who used them, and the prosperity of the trade to which they ministered.

Herodotus estimated, we are told, from the Nile in the E. to the Atlantic Ocean in the W. that this is to say, nearly across the African continent. But when the Arab writers proceed to details and attempt to describe the several nations occupying this long line, it is obvious that they omit altogether the Yolofs, Serenagons, Foulahs, and other nations dwelling on the Senegal. Towards the Atlantic their knowledge was bounded by the Magharwa, a Berber tribe, who occupied the coast near Arguin and the districts of the gum forests. The most N. kingdom of the blacks (Boodan), as they faintly state, was that of Ghana, and Ghana was unquestionably near the N. head of the great river (the Joliba, Loue or Quorra) and not far from the site of the modern Timbuctoo. Yet El Bekri in one of the earliest accounts of Ghana ex-

tant (of the 11th century), mentions Silla, which lies much higher up the river above Jend (or Ghenné), whence (Ghinnawa and Guinea) S W from Timbuctoo. The name Silla belongs to the language of the Mandingoes, who are thus recognized among the Soodan of this age. But early in the 13th century the Boma, a people of Mandingo race, conquered Ghinnawa and founded Timbuctoo. They gave way, however, in a few years to the Mali, a people of the same race, whose original seat appears to have been Bambarra, on the Joliba. How long the Mandingoes remained masters of the chief commercial frontier of the Berre-Sudan we know not as Arab writers enable us to trace the empire of Mali during only a century and a half, but the title of Mali was still very eminent in the 16th century and is not yet quite forgotten. The people immediately S. of Ghinnah were the Inkas (Nikar), the Kigoor (Telchada). The Kigoor or Nikar language is that known to the tribes of the desert as the Songhay or Songay which extends from Jendé or Ghinnah, on the Joliba, E. to Bati where the same great river, flowing S. takes the name of Quorra. It is, in short, the language of the country embraced by the great winding of the river, which flows N from Jendé to the borders of the desert (near Timbuctoo) then running E a few days turns S or S E. to Ghurma and Nafi. The chief place of the country was Kago or Kagha, on the river above Bati, of which little is known at the present day though it will probably be found to exist still under the name of Gogoma. The river of Ghinnah flowed, according to the Arabs, into the lake or sea of Quorra, and the river at Nafi, or from Babba downwards, is still called the sea. They added that a branch (the Telchada, went E., which was supposed to join the Nile near this branch they placed the Yomyem or Lemlem the wild people reputed to be cannibals, who though they seem to retreat before close inquiry are still connected by tradition with the hills of the inland (Joo or peasan) in the House country. While the Mali ruled this part of Negroland they pushed their conquests E. beyond the river from Kago to Tekadda in the desert, where there were copper-mines. There can be no doubt that the name usually read Tekadda is the Tekadda of Mr Barth a little way N. of Agades. This movement of the Mali shows the early connection which subsisted between Kago and that part of the desert a connection proved also by the prevalence of the Songay language at Agades a remarkable fact pointed out by Dr Barth, who was materially however in his explanation of it, for he seems to regard Timbuctoo as the first source of that language, which was in reality diffused along the frontier of the desert from Timbuctoo to Agades, by the commercial activity of the natives of Inkas, between Jendé and Kago. From this prevalence of one language at the chief markets on the S. borders of the desert, we are justified in drawing the important conclusion, that wherever the names Soodan, or Sudan, and Berre or Sudan, are used specially and not in a general sense they apply to the country and people embraced within the limits of the Songay language, that is to say, from Jendé in the W to Agades in the E. or the whole frontier of Negroland lying between the terminations of two great routes across the desert, namely that from Tadilat or Wad Nafi and that from Tripoli.

The most E. nation of the Berre-Sudan mentioned by early writers, is the Hamar which seems to have enjoyed an unimpeded superiority before Borna rose into notice. Darfur and Kordofan, connected with Egypt from the earliest times were never expressly mentioned as parts of the Berre-Sudan though with Barga, Wady Senaar &c. they are often now designated under the name of Eastern Soodan. Mention is made of Gubar, Zagaba, Kadi, Kwar, Nafi, &c. but the general name Hamar, under which these provinces are now included, never once occurs. Makris appears to have known Adzawa, on the Boma or Telchada, and Umbarra, S. of that river. The country S. and S E. of Inkas or beyond Dohmay and Assinie, was called Wangara—the name still given to it by the people of Hamar.

The recent explorations of Dr Barth show that the sources of the Boma (Telchada) and Fara (its chief affluent) are in the heights which send their waters in the opposite direction to the Gubbar and Gubbar, and that the country, as far at least as the sixth and seventh N. plains, diversified only at wide distances by isolated mountains of no great elevation nor do the accounts of the natives which reach some distance S.E., indicate anywhere the existence of chains of high mountains

With the champagne character of the country may perhaps be connected the wide diffusion of the Fallata, whose equatorial habits would exclude them from rugged and mountainous districts. These remarkable people are now known to extend in an almost uninterrupted chain of independent states, from the banks of the Senegal to those of the Benue in Adzawa, and report adds that they are not very distant from the White Nile in lat. 5 N.—(Jomard's *Asie, la Nigritland of the Arabs* 1841.)

SOODEN, two small places, Hesse-Cassel—1. A tin-prov. Hana, circle and 9 m. W S W Schlichtern with a church, castle, and a mineral-spring. Pop. 1905—2. A vil. Niederhessen, circle Wittenhausen. It has salt-springs, with works which produce about 8000 tons of salt yearly. Pop. 1905.

SOODEN, a watering place, Nassau dist. and 8 m. N W Hahel, in the vicinity of Frankfurt-on-the-Main. The springs, seven in number are of a chalybeate and saline nature and are said to have great efficacy in many disorders. The bathing establishment is complete and much frequented.

SOOKERTAL, a fortified town Hindostan prov. Delhi, 55 m. S. by W Hurdwar. lat. 29° 29' N. lon. 78° 3' E.

SOOKULTERUT, a town Hindostan prov. Gujerat, 10 m. N. of Nadiad. lat. 21° 48' N. lon. 73° 18' E.

SOOLOO [Spanish *Jolo*] an archipelago Indian Ocean, between the Mindoro or Bonoe Sea on the N., the Calabar Sea on the S., the island of Borneo on the E. W. and that of Mindanao on the N. E., and between lat. 4° 44' and 6° 56' N. and lon. 119° 30' and 123° 20' E. length, S.W. to N.E., about 300 m. It consists of nearly 150 islands, most of them very small and divided into three groups named respectively after the three principal islands, Basilan in the N.E. Soooloo in the centre, and Tawee Tawee in the S.W. Basilan situated S. of the fortress of Zamboanga, on the S.W. extremity of Mindanao from which it is separated by a strait about 10 m. wide is of an elongated form about 42 m. long, by 6 m. broad, low towards the coast, but mountainous toward the centre; low wooded, abounding in picturesque scenery, and very fertile. The only other island of this group deserving of notice is Pias situated W. of Basilan, about 6 m. long N. to S. low and narrow in the S. but widening out and rising into mountains in the N. Soooloo of an elongated form stretching 30 m. from E. to W. with a breadth of 5 m. to 10 m. has an elevated surface rising occasionally into mountains of remarkable appearance, abounds in magnificent scenery and is both well wooded and fertile. Among the valuable timber-trees are teak and sandal wood and among the fruit trees coconuts and areca nuts, bananas, mangoes, and oranges. Wild birds and deer are common, and oxen, swine, goats, and poultry are very abundant. The fishing along the coast is very productive, and employs a large number of the inhabitants. The principal town of same name also called Soong situated on the N.W. coast has a good roadstead, with anchorage in 18 to 20 fathoms on a loose sandy bottom is defended by several forts mounted with very defective cannon and though generally composed of huts, has a few houses of more substantial appearance among which are the sultan's palace, a small mosque, a tomb called that of Shah-Bajali, and the residences of several datus or chiefs. The crews of the whole island centres here and is carried on to some extent with Manila, but one of its most important items is the produce of piratical expeditions to which the inhabitants are much addicted. Pop. of town, 6000. The other chief islands of this group are Pala on the S. and a small group called the Tapul Isles on the S. S. W. Tawee-Tawee, the last of the three principal islands is situated near the peninsula of Usong, forming the N.E. extremity of Borneo, is about 35 m. long N.E. to S.W.; has a very elevated and mountainous surface, making it visible at the distance of above 30 m.; is densely wooded, and has a large lake, called Boe-dato situated near its centre. Another lake, or rather arm of the sea, situated in the S.E., and called Dongon, forms an admirable natural harbour and its only port. Very little is known of this island, but the systems on its coasts and those of several other of its islands, are said to contain excellent pearls. The whole of the Soooloo archipelago is under the sway of a despotic sultan, and the inhabitants, evidently of Malay origin, of the kind to which the Spaniards of the Philippines apply the common name of Moros, are generally represented as cruel and treacherous. Their aggregate pop. is estimated at 200,000.

SOOLOO SEA. See MONSIEUR SEA.

SOONDA, a ruined in Hindoostan, prov. Bajaspor lat. 14° 43' N; lon. 74° 58' E. According to native authorities this town was 3 m. each way within the walls and fully occupied with houses. The outermost wall was estimated by the natives to have been 43 m. in circumference and there were formerly three lines of fortifications around this city. It is supposed now to be less than 100 houses.

SOONDA, a town in Hindoostan, prov. Malabar, 80 m. N. Oculia lat. 24° 25' N; lon. 75° 58' E. It is a place of considerable extent, and of a square form, having two broad streets that cross each other at right angles.

SOONERONG a decayed city Hindoostan, on an arm of the Brahmaputra, 13 m. S.E. Dacca, lat. 23° 39' N; lon. 90° 43' E. now reduced to a mere village. It was formerly celebrated for the manufacture of a beautiful cloth, called *soona*.

SOONGARIA, **SHONGARIA**, or **TSCHONGARIA** (Chinese: *Shong-ka*) a country Central Asia, forming part of the Chinese Empire, between lat. 41° 30' and 48° 40' N; and lon. 75° and 90° E. and bounded N. by the Russian govs. Omsk and Tomsk; W. by the Bourtou and Kirghiz of the Great Horde, S. several ranges of mountains, of which little is known. It is divided into three military divisions—III in the S. W. Kour-kara-Omsk in the centre, and Tarbagatay in the N. E. The surface consists chiefly of an elevated and almost desert plateau surrounded and partly intersected by lofty mountain-chains. Numerous rivers descend from the mountains, but many of them before attaining much magnitude disappear in the sands of the desert or empty themselves into the lake. Of these the largest, though only a minor portion of it belongs to this territory is Balkash Nor or Tonga. The largest of the others are Ili-Kul or Temoukour Nor in the S. W. Kour-kara-Nor Kaler-oh-Nor and Avar-Nor towards the centre, Kaul Bacha Nor in the E. and Zamas in the N. E. Large tracts are altogether or nearly unfit for human habitation, but some of the plains and many of the valleys, are covered with good pasture, on which numerous nomadic tribes feed their herds. In all the three divisions considerable tracts are under cultivation, and produce grain of different descriptions, chiefly millet and barley. N. of the Ili, which is the general error of the direction of its name, and flows W. N. to the S. extremity of Lake Tengis, extensive forests occur towards the E. are many marshy tracts covered with reeds, and furnishing shelter to numerous wild beasts. The domestic animals are principally camels and buffaloes. Among the minerals are gold, copper, iron and it is said also coal. Salt is obtained in abundance, both from salt-lakes and from mines. Soongaria was originally inhabited by the Os, who appear to have been completely extinguished from the neighbouring nations by having been driven out and expelled by the Turks, who, after remaining masters for several centuries, were obliged to yield to the victorious arms of Genghis Khan and his Mongols. The Mongols became divided into two great divisions—Mongols proper and Eleuths or Calmucks. The latter long were held in subjection by the former but at last the Calmucks threw off the yoke and one of these tribes, called Soongars or Soongarians, having greatly distinguished themselves, gave their name to the country. About the end of the 17th century the Emperor of China, after a long and bloody war effected the subjugation of Soongaria, and, in 1754, riveted his authority more firmly by sending down an expedition in which 100,000 Eleuths are said to have perished. Since that period Soongaria has been treated as a Chinese province.

SOONTH a town and fort, Hindoostan, prov. Gujarat, 80 m. E. by N. Ahmedabad, lat. 23° 13' N; lon. 73° 55' E. The fort is built on the W. face of a high rocky hill, and contains a carefully-constructed palace.

SOONWALD an elevated plateau Germany, which belongs to the Hunsrück, a ramification of the Vosges, and terminates abruptly on the N. bank of the Rhine, near Elberfeld.

SOUTTY, a town in Hindoostan, prov. Bengal, 80 m. N. W. Moorshedabad, lat. 24° 25' N; lon. 88° E. In 1768 the British troops here defeated those of Meer Cassim.

SOVARY, **SALVARS**, or **SLAVA** a market N. Hungary. Higher Thelae, on Savoy, 3 m. from Eprie; with two churches and a castle. It is famous for its salt-mines. F. 1233.

SOPHIA, or **THYATIRA**, a town Turkey in Europe, Bulgaria, esp. market of some name, in a plain on the Bugeia, an

affluent of the Ister, near the foot of the N. side of the Balkan Mountains, 810 m. W. N. Constantinople. It is a large but very indifferently built place, consisting for the most part of mean houses, and narrow unweaved, dirty streets; in the sea of a Greek archbishop, and a Catholic bishop, and has several mosques, elegant public baths, very extensive bazars, and a considerable trade, chiefly in the hands of the Greeks and Armenians. There are thermal springs in the vicinity. Sophia was built by the Emperor Justinian, on the ruins of the ancient Sardica. Pop. about 50,000. — **THE AKAZAR**, about 270 m. long N. W. to S. E. with a maximum breadth of 100 m. has a mountainous surface, covered by ramifications of the Balkan, one of which here forms a water-shed between the basins of the Black Sea and the archipelago. In the valleys the climate is mild, and the soil fertile, producing much wine, corn, rice, tobacco and flax; the pastures feed great numbers of cattle and sheep, and the mountains are clothed with forests of excellent timber.

SOPHIA (Ss) a town Russia, gov. and 17 m. S. St. Petersburg, with which it communicates by railway. It contains a remarkable church, built in imitation of St. Sophia at Constantinople, has manufactures of linen and near it is the imperial palace of Tsar Nicholas. Pop. 700.

SOPLEY par. Eng. Hants; 4400 ac. Pop. 890.

SOPONYA a vil. Hungary Thaur Danube, on a sand 8 m. from Buda-Pest, in a fertile district. It has a Protestant church, and a trade in sheep. Pop. 1600.

SOPORNYA a vil. Hungary Higher Danube, on and about 12 m. from Nator, on the Tisza, with a church, and a trade in corn and timber. Pop. 1178.

SOPOTNICE, or **SOPOTNICK**, a vil. Bohemia, circle Kladsko, 20 m. from Hohenems. It has a church, a mill and a trade in corn cattle, and denim. In 1884 a remarkable landslide took place here. Pop. 1125.

SOPWORTH, par. Eng. Wilt; 1011 ac. Pop. 220.

SORA a town Naples, prov. Lavore, in a fertile plain on bank Lari, which bends round the town, and is here crossed by two bridges, 15 m. E. N. E. Frontino. It is walled, defended by a castle, and tolerably well built. The principal edifices are the cathedral, which is a noble structure; three collegiate and two parish churches, two monasteries, and a numerous two seminaries, and a school for *belli-lettre* an hospital and two almshouses. The manufactures consist of woollen cloth and paper. Sora is the seat of a bishop and seat of a court of justice. Cardinal Hieronymus, author of the annals which bear his name, was born here. Pop. 8000.

SORAGNA (Latin *Soracae*), a town and com. duchy and 18 m. N. W. Parma, with a parish church, a large and magnificent palace, with marble sculptures, fine gardens, a primary school, an almshouse, and an orphan hospital. F. 6819.

SORANO a vil. and par. Tuscan, com. Grosseto, 6 m. N. E. Poggiano. It is walled and has a collegiate church, a school and manufactures of salt-petre. Pop. 1063.

SORATA, a town Bolivia, in the Andes, dep. and 57 m. N. W. La Paz, prov. Laracaña, 8850 ft. above sea-level, with an agreeable temperate climate, reputed healthy. Pop. 1300 or including canton 8000. A few miles S. are the two peaks of Sorata, the one 21,433 ft. and the other 21,386 ft. high.

SORBAU a town Prussia, prov. Brandenburg, gov. and 50 m. S. E. Frankfurt. It is walled, flanked with towers, well built, and has two castles, two Protestant parish churches, three chapels, a gymnasium, insane asylum, orphan asylum, and two hospitals and manufactures of woollen and linen cloth, hosiery, leather tobacco, and carriage a sugar-refinery dye-work, and worsted-mill. Pop. 7801.

SORBIANO-DE-ROMAGNA, a vil. and com. Tuscan, comp. Florence, on bank Savio. It has a church, a castle, and a trade in chestnuts and cattle. Pop. 1014.

SORBAR, a town Spain, Andalusia, prov. and 28 m. S. E. E. Almeria, on an eminence rising perpendicularly from the centre of the natural fosse to the height of about 50 yards. It is ill built and has a square containing the parish church, the conthouse the granary, the prisons, and the palace of the Duke of Velazquez and Alva. There are also a poorhouse, three primary schools, a bowling-green, the ruins of a Moorish fort; and manufactures of coloured pottery-ware, of which great quantities are sent to Jaen, Murcia, and Granada, as well as shipped at Almeria, also weaving of linens and serges. F. 5920.

SORBIK, par. Scot. Wigton; 6 m. by 6 m. Pop. 1396.

SORBOLO, a vil. and com. duchy and 7 m N E Parma, on the Reno, with a large church, two primary schools, and a trade in corn, wine, hemp, rice, and cattle. P 3397

SORDEVOLLO, a vil. and com Italy, Piedmont, div Turin, prov and 6 m W N W Biella, near I. bank Ingauna. It has two small squares and a church. Pop. 2137

SORDI, a small isl. off W end, Crete, lat 35° 54' 15" N, lon. 23° 37' 15" E.

SOREL, or **WILLIAM HECKY**, a in Lower Canada, co. Richelieu, at the confluence of the rivers Richelieu and St. Lawrence, 45 m. from Montreal. It is well laid out, and is the principal market of one of the most productive districts of Lower Canada. Ship and steam-boat building are extensively carried on, and most of the steamers which ply between Montreal and Quebec and the intermediate ports are laid up here during the winter it being the safest port, and least unprotected by ice, which exists between Kingston and Quebec. During the last war the U. States, Sorrel was the headquarters of a considerable military force, and the imperial government are still possessed of extensive barracks here, but no military are now resident in them. There are two R. Catholic churches and a convent, an Episcopal church, and several good schools. Pop. (1868) 8434.

SORELLI CAPE, Van Diemen's Land, W side of the entrance into Macquarie harbour, lat. 42° 10' S. lon. 115° 11' E.

SORELLO, a in and com Italy, Lombardy, prov and 14 m. N W Cremona, beautifully situated at the foot of Monte Carlo, among vineyards. It is well built, has a court of justice, four churches, a nunnery, an hospital, two schools, and a trade in corn, mustard, and excellent flax. P 7749

SOREZE a in France, dep Tarn on the Sor 85 m. S. Alby. It long formed an important stronghold of the Protestants, but its fortifications were razed in 1629. It contains an old abbey of Benedictines, the buildings of which have been converted into a college, which has acquired considerable celebrity, and possesses an observatory, chemical laboratory, cabinet of natural history, and botanical garden. The manufactures consist of woollen and cotton hosiery, and there are several tanneries and cotton-mills. In the neighbourhood is the vast reservoir of St. Ferrel constructed as a feeder to the canal du Midi. Pop. 1559.

SORONÓ a vil. and com. isl. Martinica div Cagayal, prov and 7 m. E. S. E. Bouchon, on a hill, in a healthy but somewhat mountainous district. Pop. 1186

SOROGOROH a vil. Philippines, isl. Luzon, prov and 30 m. S. by S. Albay lat. 12° 53' 12" N lon. 123° 52' E. (s.) on a large landlocked bay of some name, presenting secure anchorage for large vessels. Some boat-building and rope-making are carried on.

SORGUES two small rivers France. The one rises in dep. Aveyron flows N W., passes St. Afreque, and joins R. bank Dourdou, after a course of above 30 m. of which 18 m. are used for floating. The other, formed by the celebrated fountain of Vaucluse, in the dep. of that name, flows first W then N W., and about 4 m. N Avignon, joins an arm of the Rhone, after a course of 24 m. It is much used for irrigation.

SORGUES, a vil. France, dep. Vaucluse, on the Sorgues here crossed by a remarkable bridge, 5 m. N Avignon. It is walled, contains the remains of an old castle, built by the popes in the 14th century; and has manufactures of madder, silk, and a paper mill, and some trade in wine. Pop. 2238.

SORI, a vil. and com Italy, Piedmont, div Genoa, near Recco, on the Gulf of Genoa. It has a small but richly decorated parish church, with some good paintings. The inhabitants are almost all fishermen or sailors. Pop. 1969

SORLA a prov Spain, Old Castile, bounded, N by provs. Burgos and Logroño, E. by Burgos, S. by Guadalupe, and W. by Burgos and Burgos area, 5779 sq. m. This is the most cold, arid, and rugged district in the whole peninsula for the prolongation of the central line of the Pyrenees, which forms the N and N E boundary, sends out innumerable branches, which alternate with valleys, glens, and mountains of the second and third order, presenting altogether scenery of a grand but not very pleasing character. In some places are forests of pine, beech, and oak, as well as an infinity of aromatic and medicinal herbs; while in others are abundances of fine pastures, which maintain a considerable number of sheep and horned cattle, and some swine but the most striking

ing objects are barren hills, quite devoid of vegetation, where the snow remains the greater part of the year. In general the soil is not fruitful, neither producing grain nor vegetables of a good quality, nor in sufficient quantity for the consumption of the inhabitants, although there are tracts of rather fertile land in the neighbourhood of Soria, the capital of the province, Almazan, Orense, and Madrigal. The Duero, Godesa, Quilich, San Pedro, Cornago, Alhama, Arlan, and other streams take their rise in this province, and it is also watered by the Tago, the Tago, &c. Agriculture employs the greater part of the population, but the labours of the field in many places are left to the women while the men employ themselves in preparing charcoal, cutting and sawing timber, and making furniture and implements of pine. Rearing cattle forms another branch of industry but there is a great falling off in the production of fine wools. For want of roads, Soria has little communication with the other districts of Spain, and accordingly there is scarcely any commerce, the only article of consequence exported being timber for Madrid and Aragon. As regards crime, Soria possesses an unsavoury distinction, when compared with most of the other provinces of Spain. P. 140,000

SORIA, a city Spain, cap. above prov., 118 m. N E Madrid, on an irregular eminence, R. bank Duero, over which there is here a fine bridge. The houses are generally two and three stories high, streets commodious, well paved, clean, and generally provided with sewers, the principal ones have arcades, and the town is well lighted. There are six squares, in one of which stands the town-hall, with prisons attached, and in another the grand palace of the counts of Gomara, a substantial edifice in the Gothic order, which among other remarkable things, has a stable large enough to accommodate a squadron of horse. Soria has also seven parish churches, a founding and a civil and military hospital, a very handsome theatre, various educational establishments among other a normal school and a college, a Jesuit college, which now serves as barracks, several convents, also converted to secular uses and two seminaries. Agriculture, and the preparation of excellent butter-oil are the chief occupations; and there are flour-mills, tanneries, dye-works, potteries, a brewery, &c. and a trade in fruits, shoes, wool work, &c. This city is still surrounded with its walls, which were razed in 1290 and are well preserved. It was sacked by the Moors in 1608. The famous Numantia is said to have been 6 m. from Soria. Pop. 5400

SORIAÑO a in Naples, prov. Calabria-Ultra II, dist. and 8 m. S. E. Monteleone, with a convent. Pop. 2500

SORIASCO a vil. and com Italy, Piedmont, div and 54 m. N N E Alessandria with a court of justice, a parish and an auxiliary church, and two palaces, one of them in a ruinous state. Pop. 1632

SORISOLE, a vil. and com Italy, Lombardy, prov and 3 m. N W Bergamo, at the foot of Monte Carlo with a large and handsome church, tile-works, and lime-kilns. Rock salt and coal are mined in the neighbourhood. Pop. 1617

SORN, par. Sect. Arv. 64 m. sq. Pop. 4174.

SORØE (Latin, Sora), a in Denmark, isl. Zealand, cap. Kiel and on a lake of same name, 44 m. W S. W. Copenhagen. It has an excellent fishery school academy in a flourishing condition. Pop. 850

SORØE an isl. Norway prov. Finnmark; lat. (W point) 70° 29' N lon. 21° 20' E. (s.) a few miles from Hammerfest, and separated from isl. Svalbard by Soreo Sound. Its coast is very much indented, length, 18 m., breadth, 6 m.

SOROKA two places, Russia. — 1. A in gov. and 185 m. W Archangel, on an isl. of the White Sea, in the mouth of the Vag, which here forms several picturesque cascades. It is a clean, well-kept place, has a small harbour, and serves as an active minimum and bartering depot. Pop. 800. — 2. A in prov. Bessarabia, cap. circle, R. bank Dolnaya, 86 m. N N W Kishinev with three churches, a synagogue, a monastery, and an active textile trade. Near it much sulphur is obtained.

SOROKSAR, a market in Hungary, Hübner Danubius, co. and 8 m. from Pesth. It has a R. Catholic church, and a trade in corn and cattle. Pop. 8518.

SOROTCHINEKALA, a Russian fort gov. Orenburg, I. bank Benara, 190 m. S. S. W. Ufa. It is the most important of the forts which line the river; is fortified by a fine artificial rampart, and a wooden wall, flanked with towers, and has church, barracks, and extensive magazines. The number of houses is about 200

SORRENTO [anc. *Stavromen*], a tn. and seaport, Naples, prov. and 17 m. S.S.E. Naples, S. shore, Gulf of Naples. It has about walls, flanked with towers; and besides occupying a beautiful site, and possessing a fine climate, is clean and well built. It is the seat of an archbishop and contains a cathedral and six other churches, seven monasteries, three nunneries, a college, seminary, and hospital, and has considerable manufactures of silk. In ancient times it was famous for its wine, but its present produce is very indifferent. It carries on an active trade with the capital, supplying it with oil, milk, cheese, and veal of all which, but particularly the last, are excellent. It is the birth-place of Torquato Tasso. P. 8000.

SORSO, a tn., Isl. Sardinia, div. and 7 m. N.N.E. Sassari, near lake Pissanone, a large sheet of water abounding with eels and mullet. It has a large baronial palace, in a dilapidated state, a fine fountain, with pilasters and sculptures, and a trade in corn, wine, and tobacco. Pop. 4000.

SORTELLA, a tn. and par. Portugal, prov. Beira-Baixa, com. and 19 m. S. by E. Guarda, on a lofty height near the source of the Coa. It is walled, and defended by a castle and contains a Latin school, and an hospital. Pop. 850.

SORVILLAN a vil. Spain, Andalusia, prov. and about 40 m. from Granada, 4 m. from the Mediterranean, with a church, courtyards, a primary school, several distilleries, and a trade in bread. Pop. 1640.

SOS, a tn. Spain, Aragon, prov. and 55 m. N.W. Saragossa, on two eminences at the foot of a lofty hill. It possesses much importance in a military point of view from its lofty position, its strong old walls, its very ancient citadel, planted on a rock in the centre of the town and a magnificent tower of the most solid construction towards the W., once regarded as impregnable. The houses are of moderate height, streets are narrow and steep, but well paved. It has a town-house, college with about 300 pupils, a school for girls, an hospital, a church, a convent without the walls, and various monasteries and hermitages. On the S. stands a fine Gothic palace, belonging to the Marquis of Campo Real which served as a residence to the governors and in which Ferdinand the Catholic was born March 10, 1452. Agriculture, weaving, pottery, wax-chandlery, pressing oil, and grinding corn are the main occupations. Pop. 2475.

SOSA a vil. Saxony circle Zwickau, 6 m. W.S.W. Schwarzenburg with manufactures of articles in iron and tin, two steam works, several saw and other mills, and a trade in wax. Pop. 1725.

SORDIA, a vil. Hungary, Titcher Thaleis co. Temeswar, 12 m. from Delta, with a Greek church. Pop. 1167.

SORSIO (Sas) a tn. Naples, prov. Principato-Ultra, dist. and 7 m. S.E. Arzano. Pop. 1950.

SOSNA two rivers, Russia—1 (*Dnestro*, or *Prut*) flows E. from near Malo-Archangelsk, gov. Orel flows N.E. and after a course of about 140 m., joins r. bank Don—2 (*Zhukova*, or *Quetz Sosna*), flows in the W. of gov. Voronezh and flowing N.E., joins r. bank Don; total course, 110 m.

SOSNOLLA, a tn. Russia, gov. and 59 m. E. Casanogor at the confluence of the Uda with the Dnepr. It has 10 churches, and a trade in corn and cattle. P. 1849. 4895.

SOPPELLA a tn. France, dep. Alpes Maritimes, 17 m. N.E. Nice, on the Berre. It possesses several public walks, is the seat of a superior court and has a handsome church, a college and gymnasium, several schools, a convent, and an hospital. Pop. 4394.

SOSTE, a tn. Naples, prov. Calabria-Ultra li. S.S.W. Catanzaro, with manufactures of common woollen stuffs cotton and silk are raised in the neighbourhood. Pop. 1650.

SOSTE (Sas) a tn. Naples, prov. Calabria-Ultra, S.W. Casertovulturno, with two churches. Pop. 1899.

SOSTLONO a vil. and com. Italy Piedmont, div. Turin, prov. and about 12 m. E.N.E. Biella, on the side of a fertile hill. It has two churches. Pop. 1421.

SOTA, two rivers, Russia. The one rises in the N. of gov. Perm on the E. slope of the Ural Mountains; flows first easterly S.E., then E.N.E. into gov. Tobolsk, and after a course of about 180 m., unites at Polmak with the Polm in forming the Tardis. The other rises in the circle of Perm, on the frontiers of Perm and Tobolsk, flows first N., then E. then N.E., and after a course of about 360 m., joins L. bank Ufa, at the town of Burcov. Its chief affluents are the Mula, Nerva, Nogulka, and Bogulka.

SUT DE-FRANCA, a vil. Spain, Valencia, prov. and about 30 m. from Castellon-de-le-Piana. It is regularly built, has a church, a very indifferent courthouse, a primary school, and a prison, occupying part of the buildings of an old castle of old four mills, and a trade in corn, wine, and fruit. P. 1891.

SUTBY, par. Eng. Lincoln, 1500 ac. Pop. 153.

SUTHERN, a vil. Oldenburg, princip. Birkensfeld, near Esheliden; with a church and two mills. Pop. 1083.

SUTHERTON, par. Eng. Suffolk; 1980 ac. Pop. 253.

SUTILLO DE LA ANDRADA, a tn. Spain, Old Castile, prov. and 8 Avila, with a church, courthouse, and primary school; oil and flour mills, and a trade in silk. Pop. 1049.

SUTO, numerous places, Spain, particularly—1 (*S. de Guesoro*), a vil. Old Castile, prov. and 17 m. S. Logroño, on the Lena, here crossed by a bridge. It has two squares, a church, a good hospital, two endowed primary schools, and several hermitages, manufactures of cloth, chiefly black and brown, seven works for spinning wool, 13 fulling-mills and dye works, and three flour-mills. Pop. 2581—2, (*de Leñilla*), a vil. and par. Asturias, prov. and about 38 m. from Oviedo, on the Bay of Boney, near the Nequeiro, here crossed by a bridge. It has a church and a primary school, a fishery, and several flour-mills. Pop. 1800—3, (*de Leñilla*) a vil. prov. and about 25 m. from Leon, prov. and 10 m. S. a pri. many schools, a dist. oil, and two flour mills and a trade in corn and flax. Pop. 1485—4 (*de Amio*), a vil., prov. Leon, near Murias-de-Paradise. Pop. 994.

SUTO-LA MARUA a small seaport, Mexico dep. Tames lapa, 30 m. N.E. Sanpedro, a bank river of that name, near its mouth, where there is a harbour frequented by a bar. It is composed chiefly of Indian huts. Pop. about 8000.

SUTOANNE a group of the Caroline Islands, near lat. 8° 30' N. lon. 158° 30' E. It consists of more than 60 islets connected by reefs, including a lagoon with openings into it all the sides covered with wood and appear to be inhabited. They extend over an area about 17 m. long, by 12 m. broad.

SOTOMAYOR (SAN SALVADOR) a vil. and par. Spain, Gahona, prov. and 7 m. S.E. E. Pineda, with a church, townhouse, old castle, and primary school. Pop. 1780.

SOTTEGEM a tn. and com. Belgium, prov. E. Flanders, 183 m. S. by E. Ghent; with a good market-place, a church, chapel, townhall, prison, musical society several schools, and manufactures of iron, woolen, and cotton fabrics; leather, soap, candles, tobacco distillery, and oil. Pop. 2186.

SOTTERLEY par. Eng. Suffolk. 1500 ac. Pop. 237.

SOTTEVILLE-LES-MOINES a vil. France, near Rouen as to be properly one of its suburbs with manufactures of soap, glass, chemical products and several spinning-mills. P. 3877.

SOTTO MANNA, an Isl. Italy Venetia. It is one of the low, long, and narrow islands which separate the lagoons of Venice from the Adriatic Sea. Its greatest length, 5 m., breadth, little more than 1 m. The town of Chioggia stands on its N. extremity and a long stone-wall 22 ft. thick, but now much dilapidated projects it imperfectly against the waves.

SOTWELL, par. Eng. Berks, 701 ac. Pop. 153.

SOUADAN see SOUDAN.

SOUADJA, or SOUDJA, a tn. Russia, gov. and 54 m. S.W. Koenigs, in a low and unhealthy situation. It contains eight wooden churches, and several charitable endowments and has a saltpetre-work, and an annual fair. It is surrounded by numerous orchards and kitchen gardens, in which the inhabitants find their chief employment. Pop. 1849, 3776.

SOUFFLENHEIM or NUTENAU, a tn. France, dep. Bas-Rhin, about 30 m. N.N.E. Strasbourg; with manufactures of fire-brick. Pop. 3085.

SOUILLAC [anc. *Sallacum*] a tn. France, dep. Lot, in a fertile valley, r. bank Dordogne here crossed by a bridge of seven arches, 22 m. N. Cahors. It is generally well built, has a court of commerce, the remains of a Benedictine abbey; manufactures of coarse woollens, agricultural implements, and iron-ware, and a trade in wine, tobacco, leather, silk, cattle, and ship-timber. Pop. 2248.

SOUKOUUM KAZI, or SOUKOUKAZI, a tn. and fort, Russia, in Abkhaz, on the Black Sea, S.E. Anapa. It was a place of some importance, and is supposed by some to be the ancient Sebastopolis. It was sacked and garrisoned by the Russians, but was evacuated in the war of 1854-5. The trade is chiefly in salt and arsenic.

SOULBURY, par. Eng. Bucks; 4460 ac. Pop. 528.

SOULDERN, par Eng. Oxford, 1451 sa. Pop 619
SOULDEROP, par Eng. Bedford, 1790 sa. Pop 267
SOULTZ, or **SOULTZ-LA-VILLE**, a tn. France, dep. Haut-Rhin, 13 m. S.E. Colmar. It is entered by three gales, is tolerably well built, has a handsome town-hall, and a church with an elegant spire; manufactures of woollen cloth, hosiery, silk-ribbons, and black-cloth, a glassfield, paper-mill, and several tanneries. Pop. 5000

SOULTZMATT a tn. France, dep. Haut-Rhin 10 m. S.W. Colmar, with some mineral-springs, manufactures of molasses, and several cotton-mills. Pop. 2475

SOUMAGNE, a tn. and com. Belgium, prov. and 7 m. E. Liège; with a church, and two primary schools, inhabitants chiefly sailors and soldiers. Pop. 2468

SOLMBOU, one of the Karlema, about 10 m. S.W. Cape Lopatka, the S. extremity of the peninsula of Kamchatka. It is about 10 m. long N to S, and from the number of shoals between it and Cape Lopatka, is supposed to have been once united to it. Its centre is in lat. 50° 48' N lon. 155° 38' E.

SOLMY or **SOMY** a tn. Russia, gov. and 83 m. N.W. Kharkov, r. bank Poul at the confluence of the Somy and Soudki. It is surrounded by earthen ramparts and a fosse, and defended by a citadel; contains two stores and eight wooden churches, and several almshouses, and has numerous distilleries, a trade in brandy, corn, and other agricultural produce, and four large annual fairs, which attract great numbers of dealers from distant quarters. P (1422 11 712).
SOLMY a lake, Siberia, in the W. part of gov. Tomsk, near r. bank Irtysh, length N to S, about 55 m., breadth, about 55 m. It communicates on the E. with Lake Tschary.
BOUND (Fr.) or **OSSEBUND**, a strait which connects the Kattegat and Baltic Seas, and separates the Danish island

great breadth, measured from Copenhagen seaward, is 17 m. The name of Bound however, is properly confined to the comparatively narrow part of the passage which, between Elsinore and Helsingborg, has a width of only 3 m. Though the Great Belt affords a much wider and deeper communication between the Kattegat and Baltic, the Sound is that almost universally selected by vessels, partly because it is the shortest, and partly because there is a greater probability of meeting with favourable winds. The depth of water varies from 4 to 20 fathoms, but the channel, to which the name of *deeps* or *rums* is given, is bounded on both sides by shelves and quicksands, which make the navigation dangerous. The clearest passage is on the Danish side, and by almost immemorial custom, sanctioned by treaties and finally confirmed and regulated by the Congress of Vienna in 1815, all merchant vessels passing the Sound must anchor at Elsinore and pay duty. The sum paid is not so serious as the delay which often occasions the loss of a favourable wind. About 18 000 vessels, aggregate burden about 8,000 000 tons, pass the Sound annually.
SOONG a seaport, Indian Archipelago. See SOOTOO.
SOULET (Str.) a tn. France, dep. Nord, 15 m. S.E. Cambrai with manufactures of molins, shawls and marionettes. Pop. 3187

SOURABAYA, Java. See SOERABAYA
SOURAJ a tn. Russia, gov. and 25 m. N.E. Vilna, with a Greek united church, a synagogue, and some transit trade. Pop. 3000

SOUBOURG a vil. France, dep. Bas-Rhin, 11 m. S. Wissembourg, with manufactures of woollen cloth. 1 2081
SOULDEVAL, or **SOULDEVAL-LA-BARRE**, a tn. France, dep. Manche, 30 m. S.E. St. Lo, with a beautiful granite fountain, manufactures of cutlery and hardware, and numerous paper-mills. Pop. 1146

SOLRE, a tn. and par. Portugal, prov. Trasmadura, r. bank river of same name, 17 m. S.W. Coimbra; with two churches, a Latin school, and an hospital. Pop. 1670

SOULH, two places Brazil.—1 A tn. prov. Bahia, 40 m. W. Itapouru, with a church and a primary school.—2 A tn. prov. and 16 m. from Coara, r. bank Coara. It was originally founded by the Jesuits, with Indian converts and has a church, and town-houses with prison. Pop. under 1200

SOLDA, par Eng. Devon; 5018 sa. Pop 515
SOLDA, or **SUNA**, a seaport, regency and 2 m. S. S. Tunis, lat. 36° 47' N lon. 10° 57' E. It admits vessels of the largest size, but is exposed to the violence of E. winds. Pop. 10 000

SOUTHERAINE (Is.) [anc. *Suldermaine*] a tn. France, dep. Creuse 24 m. N.N.W. Gueret, on the Bedelle. It has an ancient parish church, manufactures of linen, and a trade in thread and hemp. Pop. 1066

SOUTH AUSTRALIA. See AUSTRALIA (SOUTH)

SOUTH BEND a tn. U. States, Indiana, and so called from its situation on the S. bend of the St. Joseph, 120 m. N. Indianapolis. It is improving rapidly and has a court-house, jail, four churches, and a county assembly, all built of brick; manufactures of woollen cloth, tools, and agricultural implements; an oil and two large flour mills. The Michigan Southern, and the Northern Indiana railways connect it with Chicago. Pop. 1600

SOUTH CAPE, the most S. point of Van Diemen's Land; lat. 48° 40' S

SOUTH CAROLINA. See CAROLINA

SOUTH EAST ISLAND 17 m. lat. Louisville Archipelago, lat. S.E. point 11 28 S., lon. 163 43 E. 41 m. long, and 10½ m. broad at its greatest width. Its N. coast is little indented, but there are several marked bays and promontories on the S. coast. Near the centre of the island, on this coast, occurs an isolated peak, 2889 ft. high. The *Sparganium filiforme* or pithus-plant, and tree-ferns (*Elaphoglossum*) 15 ft. high, with a diameter at the base of 8 inches are abundant. Wild pigs are numerous and birds plentiful, including a very handsome scarlet lory, small green-coloured paroquets, and pigeons. The natives of this island and of those adjacent point their bodies, using as pigments powdered charcoal mixed up with coconut oil and lime obtained from burnt shells. The most common fashion of painting is with a broad streak down the forehead, and a circle round each eye. Occasionally the entire body is blackened, but often the face only with dashes of paint on the temples, cheek, and round the

of Seeland from Sweden. Taken in its largest sense, as including the whole range of the Swedish coast from Kalten to Zeltzbo, its length, nearly due N and S., is 66 m., and its

south, and one of both eyes, giving them a hideous appearance. The warts are represented as very unfavourable specimens of their kind. They wear a short petticoat of green stuff worked into a narrow band, which ties round the waist. They are reserved in their behaviour.—(Vop. of Antiquaries.)

SOUTH HILL, par Eng. Cornwall; 3459 sq. P. 730.
SOUTHACRE, par Eng. Norfolk; 2492 sq. Pop. 94.
SOUTHAM, a market tn. and par England, co. Warwick. The town, 10 m. E.S.E. Warwick, r bank Watergall, across which there is a neat stone-bridge of two arches, has a stately church, with a fine tower and spire and a chapel for Independents, an eye and ear infirmary a handsome building, and the national school-house, a large and tasteful Gothic edifice. Area of par, 2770 ac. Pop. 1771.

SOUTHAMPTON, HAMPSHIRE, or HANTS, a maritime co. England including the Isle of Wight (which see) bounded, E. by Surrey and Sussex, W. by Wilts and Dorset, N. Berkshire, and S. the English Channel area, 1,040,000 ac., of which about 900,000 ac. are supposed to be arable, meadow, and pasture. The surface is beautifully varied by hill and dale, adorned with numerous seats and villages. The valleys are for the most part fertile but the soil generally is indurated, the greater part being sandy or gravelly with chalky hills, and extensive tracts of heath. The N. part of the county from the borders of Berkshire to Southampton, is particularly unproductive, being covered with a brown heath, some parts of which, however, have been brought into cultivation. The S.W. part of the county again is occupied chiefly by the New Forest, and by extensive heaths. The really good lands are thus confined almost wholly to the central parts where the soil is rich, and heavy crops are obtained. The climate is remarkably mild, and in the highest degree favourable to vegetation. The principal crops are wheat, barley, oats, beans, and a few pease. Turnips also are extensively cultivated on the lighter soils. Along the coast the smaller breeds of Norman cattle predominate in other parts of the county, Devon, or a cross between them, and the Alderney are most common. The sheep are of various breeds, including the common small forest-bred, or beath-sheep, which yields a fine-flavoured mutton, formerly known by the name of Bagshot mutton. The dairy is not much attended to, little more butter being made than the consumption of the county demands. Harems have been long famous for its hams, the excellence of which is chiefly owing to the manner in which it is cured, as the native hogs are of very indifferent quality being coarse and raw-boned, though an improved breed, crosses of the Berkshire, Suffolk, Essex, and Chinese, now predominates. The New Forest occupies the whole country between Southampton Water on the E., the English Channel on the S., and the Aven on the W. comprising a space of about 12 sq m. The trees are mostly oak and beech, raised for the use of the navy, about 50,000 acres of the forest being the property of the crown. The hares and hogs of the New Forest are peculiar to that locality the former having a crimson tail and mane, the latter a light and active form, with much of the fawn spirit, and something of the colour of the wild boar

The manufactures of the county are unimportant. Shalloons and serge were formerly made at various places, but the business is now much declined. There are all-mills at Overton; and sailing is carried on to a great extent. Straw-hats, lace, and paper are also made in different parts. The principal rivers are the Aven, Arden, and Itchen. Principal towns—Furtonmouth, Southampton, Winchester, and Lymington; the three former having communication with the metropolis by railway. The county is divided into 29 hundreds, and 298 parishes. It sends 17 members to the House of Commons. Pop. 405,870.

SOUTHAMPTON, a bor and seaport in England, co. Hants, beautifully situated on a peninsula at the mouth of the Itchen near the head of Southampton Water, and on the South-Western railway 71 m. S.W. London. It occupies an alluvial rising gradually from the water, and when ap-

proached by the London road through an avenue of stately elms, has a very striking appearance. It consists of an old and a new town, the former at an early period surrounded by walls flanked with round-towers, of which considerable portions still remain, particularly on the W. side, and entered by several gates, of which three are still standing, and bear the names of West-gate, South-gate, and East-gate. The last, a remarkable structure, unaltered and unobscured, and large enough to contain the townhall in the upper part of it, is now, in consequence of the extension of the town, nearly in its centre, and being placed across the principal street, running nearly N. and S., divides it into two parts, the part to the N. taking the name of Above-bar, and that to the S. the name of

Below-bar The latter part contains 8 for about 2 m and terminates near the pier, which was erected in the year 1833 and having been opened by her Majesty (then Princess Victoria), is named the Royal Pier. The principal street is crowded at right angles by several others, which in the older quarters are very irregular though generally substantial while those in the more modern portions above-bar present many fine ranges of building. Among these the terrace built along the W shore, and commanding fine views of the surrounding scenery, is conspicuous. The environs are studded with handsome villas.

The ecclesiastical edifices include five parish churches nine chapels of ease, various dissenting chapels, of which four are Independent four Baptist, English Presbyterian, two Wesleyan Methodist, Primitive Methodist, Unitarian, Friends, and B. Catholics. St. Michael's, of the churches the oldest, situated in the W part of the town and occupying the E side of a square formerly used as a fish market, is a specimen Norman structure, with a roof supported by light octagonal columns and sharply pointed arches, a large

and objects deserving of notice are the guildhall, custom house, audit house, jail, theatre, philharmonic-rooms, assembly-rooms, ordinance map office, baths, and public parks. About 6 m. from Southampton and 3 m. from Netley abbey is the Royal Victoria Hospital for sick soldiers, the foundation-stone was laid by the Queen in 1856. The hospital stands on about 100 acres of grounds, and beautiful scenery and has a frontage facing west of 1400 ft. It is three stories high, and consists of a square block and two wings, and has accommodation for 1000 men. There are also quarters distinct from the hospital arranged to receive 1000 convalescents. A well-organised lunatic asylum forms part of the establishment, but is detached from the main building. There are chapels for Protestants and Roman Catholics a museum and anatomical theatre. In the grounds is a fine monument to the memory of the medical-officers who fell in the Crimean war. The hospital is connected by rail way with Southampton, Portsmouth, and Aldershot.

The docks present a very bustling appearance, filled as they generally are with shipping of every class from the noble vessels of the Peninsular and Oriental Co. West India Co. and other large companies down to the small steam-tugs. The dock company was incorporated in 1836 and the first tidal dock (which is paved with granite and surrounded with extensive warehouses) was opened for business in 1842 the cost of it being £140,000. Since that time a second large tidal-dock has been added as well as three large graving-docks. The accommodation thus provided has made Southampton the most important mail packet station in the kingdom steamers leaving every fortnight for the West Indies and China, monthly for the Cape of Good Hope and Mauritius weekly for Gibraltar, Malta, Alexandria, and most parts of India, and daily for France, Jersey and Guernsey and several times daily for Portsmouth and the Isle of Wight. There is also a monthly communication with Australia and Alexandria and also via India. Some idea of the large trade done in the docks may be formed from the unpolished list of the steam packets belonging to the several companies sailing from this port in 1896 since which time several new boats have been launched and fitted out —

ABOVE-BAR STREET, SOUTHAMPTON.—From a Print by P. Branson

W window with beautiful tracery and upper compartments of richly stained glass, and a tower terminating in a lofty octagonal spire. Holy Rood, situated in the principal street, is also ancient, and is surmounted by a tower and spire. St. Lawrence also stands in the High-street. St. Mary's is also an ancient edifice but has been modernized in its internal arrangements, and by the addition of two wings it stands in the centre of a large grave-yard for many years, prior to the opening of the cemetery the only repository for the dead for the whole town. All Saints is a handsome Grecian structure, with a turret at its W end and surrounded by six Corinthian columns and covered by a dome. St. Paul's chapel belonging to this parish is built in the later English style, possesses considerable architectural merit and has a window of stained glass. The chief educational establishments are the free grammar school the Southampton college, the national British, parochial, and infant schools and the literary and scientific wants of the town are supplied by the Polytechnic and Athenæum Institutions, which have a large number of members, and are yearly increasing in importance. In the High-street close to the Post Office is the Hartley Institution, the foundation-stone of which was laid by Lord Palmerston in 1861, and the completed building opened by him in 1862. The funds for the erection of it were devised by a Mr. Hartley formerly a resident in the town, who left £60,000 for the purpose; but by lawless this sum was decreased to £40,000, of which one-fourth was expended on the building. It is in the Italian style, and contains a magnificent reading-room, library laboratory, a museum well filled by various contributors, and a noble lecture-hall. The charitable endowments include an infirmary, a dispensary, a female reformatory, several almshouses, and an hospital, originally founded as a monastery and occupying an ancient mass of buildings, with a chapel, long appropriated to the use of French Protestant refugees. Other buildings

American North German Lloyd	6	14, 50	4,000

In addition to the above, there is a new company running to New York from Germany sailing at this port, and a new line to New Orleans. The imports consist chiefly of stone from the W and coal from the N.E. maritime countries, corn and provisions from Ireland timber from the Baltic and America and wine and brandy from France, Portugal and Spain. The declared value of exports was £1,850,647 in 1850 and £4,728,613 in 1864. In the former year the number of vessels entered from foreign ports was 636 (132,117 tons) and there cleared for foreign ports 403 (147,519 tons); in 1864 the numbers were 911 (264,637 tons) entered and 819 (283,878 tons) cleared. The tonnage employed in the coasting trade was at least equally large. The local trade includes a vast amount of retail chiefly for the use of shipping and has also a daily market for fish three general weekly markets, and two annual fairs one of which, chiefly for cattle, is very important. The manufacturers of Southampton are chiefly confined to brewing, coach-building, iron-casting, sugar-refining, and ship-building. The extent of the last is very considerable, and many very large steam-vessels have been built of late years.

Southampton is governed by a town-council, or corporation, consisting of 80 councillors and 10 aldermen (from whom the mayor is annually elected).

One of the greatest attractions connected with this town is the Southampton Common a beautiful tract of land, richly wooded, 855 ac in extent, left to the town for public purposes many centuries ago. On the common is situated the race-course, one of the most picturesque in England. Ten acres of the common in the S.E. corner, are now appropriated as a cemetery for the town, with three chapels for the use, respectively, of the Established Church, Dissenters, and Jews. The public parks in the centre of the town are well laid out, and contain several monuments of men of local and general note.

Southampton stands about 1 m. S.W. of the Roman Castra then, the site of which is still indicated by a fosse and vallum. The modern town is attributed to the Anglo-Saxons and was first called *Hastanora* from which the present name is obviously derived. In the 10th century it was repeatedly pillaged by the Danes, and afterwards, when their sovereign had gained the throne, became the occasional residence of Canute, who is said here to have administered the memorable reproof which his courtiers had provoked, by the goodness of their factory in declaring that the very waves could obey him. In 1289 during the reign of Edward I., it was sacked by a united French, Spanish, and Genoese fleet, but soon recovered and receiving additions to its castle and other fortifications, acquired new importance. It claims to be a borough by prescription, but its earliest known charter was granted by Henry II. Since the time of Edward I. it has returned two members to Parliament. Among its natives the only one particularly entitled to notice is Isaac Watts. P. 1867 about 50,000

SOUTHAMPTON, or *Sutton*, a rapidly rising town, in Canada West, in a fertile district on Lake Huron, at the mouth of the Saguenay river 60 m. from Goderich. Pop. (1844) about 600. The river Saguenay, which is now being improved, so as to render it a safe harbour will afford one of the best ports on the E. side of Lake Huron.

SOUTHEND a hamlet and watering-place, England, co. Essex, at the mouth of the Thames, opposite to that of the Medway 40 m. E. London. It has recently made rapid progress; has a fine promenade, a district church, an independent chapel, an assembly-room library theatre, baths, some beautiful walks, and a pier above 1/2 m. long. Pop. 1184

SOUFGEATH, a vil and chapel, England, co. Middlesex 8 m. N.W. London on the New River, in a well wooded district. It has a number of handsome houses, a chapel of ease, an independent chapel, and a national school.

SOUTHILL, par Eng Bedford 6180 ac. Pop. 1400

SOUTHMINSTER, par Eng Essex 7701 ac. P. 1482

SOUTHPORT a fashionable bathing-place, England, co. Lancaster 20 m. Liverpool. It has grown very rapidly of late years, and contains many long and wide streets, with handsome houses and shops, the former with gardens in front, an assembly-room, newspaper, libraries, large markets and several large and handsome hotels. Pop. 12,515.

SOUTHPOR, par Eng Gloucester; 1455 ac. Pop. 425

SOUTHTOWN, a hamlet England, co. Suffolk, on the Yare, opposite to Yarmouth with which it is connected by a bridge, and of which it may almost be considered a suburb. It has a number of handsome houses, an ancient church fallen into decay; building-yards docks, and timber-wharfe. P. 1412

SOUTHWARK a pari bor England co. Surrey, forming one of the great divisions of the metropolis, and shaped nearly like a parallelogram, which is bounded on the S. by Lambeth and on its other three sides by the Thames, along the S. bank of which it extends nearly 4 m. directly opposite to the city of London; while that part of the river called Lambeth Reach separates it from Westminster on the W. and the other part of it, called Lambeth Reach separates it from the Isle of Dogs on the E. It is for various purposes within the city jurisdiction, and under the name of the Borough of Southwark or Bridge-without, is presided over by one of its aldermen; but, as one of the metropolitan boroughs, it possesses an independent franchise, and sends two members to the House of Commons. Pop. 171,869

SOUTHWELL, a market tn, and par England, co. Nottingham. The town 14 m. N.E. Nottingham, is agreeably situated on an eminence has four principal streets, straight, and kept clean; a collegiate and parochial church, a district church, a Baptist and a Wesleyan chapel an assembly and coffee room adjoining, a house of correction, work-house, and national school room. There are 12 schools, including board-

ing, day, girls', national, and infant schools, and a therry institution. Cotton stockings are manufactured extensively in the vicinity, as are also brick and tiles; and there is a pretty large mill for spinning silk. Area of par, 4550 ac. Pop. 2514.

SOUTHWICK, a vil and par England, co. Durham, nearly 1 m. W.N.W. Sunderland, on the heights above the Wear. It is well built and has a wooden castle with a square tower. Primitive and Wesleyan Methodist chapels, a national school; manufactures of glass and earthenware, building yard and limekiln. Pop. 3791

SOUTHWICK, a vil and township U States Massachusetts. The village, 10 m. W.S.W. Springfield, contains two churches and an academy. In the township are several mills and manufactures. Pop. 1214.

SOUTHWOLD a seaport tn and par England, co. Suffolk. The town, on a hill, 11 m. S. Lowestoft, near the mouth of the Blyth, is mostly well built, and has a fine church a guildhall, and places of worship for Baptists, Independents, and Wesleyans. The principal occupation of the inhabitants is the fishery: some are employed also in the preparation of salt, which is exported in considerable quantities. The chief imports are coal, rock-salt, tins and deals, iron &c. and the exports, wheat, barley malt, &c. The haven is formed by the Blyth. Area of par 586 ac. Pop. 2109

SOUTHOKE a vil W Africa, Woolf lat. 15° 28' N lon 13° 55' W consisting of well-constructed cottages. It has an elegant fortress, and excellent gardens with bamboo plantations. It is inhabited by Mandingo merchants, and is an export for British merchandise.

SOUVIGNY [anc. *Silvanecum*], a tn, France dep. Allier 6 m. S.W. Moulins. It has a handsome Gothic church manufactures of soda and glass-bottles, and a trade in corn wine and cattle. There are blast furnaces and other iron works in the neighbourhood. Pop. 1758.

SOUVILLIER, a vil Switzerland can and 27 m. N.W. Bern on the Rhine. It contains a church and a parish courthouse. Near it are the ruins of the castle of Ergol, and several remarkable natural caverns. Pop. 1904, chiefly employed in making clocks and watches and other instruments.

SOUVREY, a vil and com. Belgium, prov. Hainaut, 21 m. E. Mons, with a brewery several distilleries, and two flour-mills but the chief employment is agriculture. Pop. 1144.

SOUZA, a river Portugal rises in the Serra Alva, 3 m. E.E. E. Guimarães flows first S.W. then N. and after a course of 38 m. joins the bank Douro, 12 m. E.S.E. Oporto

SOUZAL, or *Souval*, a tn, Russia, gov. and 22 m. N. Vladimir in a fertile plain on the Karamanka. It is a very ancient place, and consists of three quarters, one of which, called the Kremlin, is surrounded by crenell walls and a deep fosse in a very dilapidated state. It contains a hand some episcopal palace, now used as courthouse, six churches several of them large and richly decorated structures three monasteries and two nunneries, a diocesan seminary, and almshouses; and has manufactures of woollen and linen cloth, and some trade. Pop. 8000.

SOUZEL, a tn Brazil, prov. Para, at the foot of a mountain which overhangs the bank Amazon, above 100 m. from its mouth is the Amazon with a church and a school. The inhabitants, who are all Indians, live chiefly by fishing and hunting, but also make bricks and earthenware for exportation.

SOUZEL, a tn and par Portugal, prov. Alentejo, 8 m. N. by W. Estremoz. A sanguinary battle was fought here in 1483 between the Portuguese and Spaniards. Pop. 1630

SOVEL, an isl about 10 m. off E. coast Anam, lat 16° 5' N lon 106° 34' E. (n.)

SOVERIA, a tn, Naples, prov. Calabria-Ultra 11 N.E. Catanzaro, on a hill near 1/2 m. from Soverato. Pop. 1050

SOVICILLE, or *SOVICILLA*, a vil and com. Tuscany, about 8 m. from Siena, on a slope above the Tevere. It is the seat of a court of justice, contains a parish church, and an old castle and has a trade in corn, oil and wine. P. 6504.

SOWAUBA, a group of isls. *See* Kermadec-Islands.

SOWERBY two places, England, co. York. — 1. A vil and chapelry (N. Riding) 1 m. S. Thirsk, near the York and Newcastle railway, with a manufactory of varnish. Pop. 1072. — 2. (N. Riding) A vil and township (W. Riding) 13 m. W.N.W. Leeds, on the Boothdale canal, and the Manchester and Leeds railway. It has a large chapel with a finely

Coast.—The coast-line, forming about two-thirds of the whole perimeter, has a length of about 1870 m., of which about 600 m. belong to the Bay of Biscay and the Atlantic, and 1770 m. to the Mediterranean. It is not much broken, but except toward the gulfers, presenting few remarkable headlands or indentations, except on the W. coast of Galicia, where it is fully exposed to the billows of the Atlantic. The whole of the coast, from Pasaberrria on the frontier of France, W. to Cape Orreaga, and thence round by Cape Faleiro to the mouth of the Minho, is rocky, but not very elevated, the height never exceeding 800 ft. and often not rising to 40 ft. On the N., though the water is deep up to the shore, there is little sheltered anchorage, but on the N. W. and W. a succession of excellent harbours are found, among which those of Ferrol and Vigo are conspicuous. In the S. W. at the mouth of the Guadalquivir, a low, sandy and even swampy shore occurs, skirted in many parts by islands of a similar description, and so shallow that even small coasting-vessels find a difficulty in approaching it; but beyond the mouth of the Guadalquivir the shore rises gradually and becoming well defined, presents the admirable Bay of Cadiz, with its almost unassailable harbour. The same kind of coast continues till the celebrated Cape of Trafalgar is reached when the appearance of cliffs is seen. Thence on proceeding E. between more and more elevated, and turning round into the Bay of Algeciras, rise suddenly up into the magnificent rock of Gibraltar where Spain has the modification of seeing her strongest fortress in the hands of strangers. The rocky shore, though at a much lower elevation is continued almost without interruption along the remainder of the S. coast, to its termination at Cape Palos and with the exception of the ports of Malaga and Cartagena, the latter particularly excellent, presents scarcely a single spot where the anchorage is not more or less exposed to prevailing winds. At Cape Palos a change takes place, and a low sandy beach, partly lined with lagoons, stretches N. to within a short distance of Alhucete, where there is a good roadstead, but a very ill-favoured harbour. Here the coast again rises, and bold rocky cliffs, terminating the lofty ridges of the interior are seen as far N. as Duna, beyond Cape St. Antonio. Here a long curve commences, and sweeps round to the mouth of the Elbro, presenting throughout, with the exception of a few ridges in the vicinity of Castellon-de-la Plana, a low, sandy, shallow shore, lined with lagoons, along which numerous salt-works are established but unprovided with a single harbour deserving of notice. Beyond the Elbro low and rocky shores alternate in considerable stretches to the French frontier. The only ports of consequence are those of Barcelona and Roses, the latter particularly excellent, though the former is by far the more frequented.

Mountains.—The interior of Spain is as much diversified as that of any other country of the same extent in Europe but its characteristic feature is its central table-land, which occupies more than a half of the whole surface, and is from 2000 ft. to 8000 ft. above sea-level. It is nearly surrounded by mountains. W. by those of the Asturias, an obvious continuation of the Pyrenees; E. by a branch of the same mountains stretching S. through Galicia, and along the frontiers of Portugal to the banks of the Douro, and thence continued through the S. of Leon and Extremadura by a series of cordilleras which finally become linked with a branch of the Sierra Morena; E. by the Sierra Morena; S. E. and E. by the mountains of Murcia and Aragon, among which the Sierra Albarcin and Molina are the most conspicuous, and N. E. by a range which, commencing in the Sierra Mooneya, stretches N. W. through Old Castile, and thence forms the S. boundary of the basin of the Elbro. On the surface of the table-land itself there is no monotony. It is not only very rugged in many of its parts, but is traversed throughout its whole breadth, E. to W., by two mountain-ranges. The latter of the two, commencing near the Sierra Mooneya, already mentioned, on the E. frontiers of Old Castile, stretches first between it and New Castile, then between Leon and Extremadura, and finally entering Portugal, becomes linked with the Sierra de Estrela. It may then be considered as dividing the table-land into two distinct portions; 1. comprehending the kingdom of Old Castile and Leon, and covering an area of about 44,000 sq. m., and a S. comprehending the kingdoms of New Castile and Extremadura, and covering

an area of about 46,000 sq. m. The second great range of the table-land lies wholly within the latter and commencing in the Sierra Albarcin, on the S. W. confines of Aragon, stretches under various names, among which those of the Sierras of Guadalupe, Toledo, and Manana, are most conspicuous, nearly across the centre of New Castile and Extremadura, till it is met by the Sierra Alpedraza, from Portugal. Besides these mountain-ranges which thus bound or traverse the table-land, there are others which, though without its limits, are equally deserving of notice. One of these is the magnificent chain of the Pyrenees, which, though partly belonging to France, presents its boldest front to Spain, and has its loftiest summits within it. Another is the Sierra Nevada, which, with its ramifications, covers the greater part of the S. of Andalusia. Its general direction is from E. to W., and is preserved, with more or less distinctness, by its three principal ranges, one to the centre forming the Sierra Nevada, properly so called, running E. and W. and attaining in the Pico de Mulhacen 11,666 ft. the embouching point of Spain, another on the N. which, commencing in the Sierra de Aguderos on the S. frontiers of Murcia, is continued W. by the Sierra de Estremadura and the mountains of Granada and a third on the S. skirting the shores of the Mediterranean, commencing in the Sierra Gador and continued first under the name of the Alpujarras, Jolinar, Lujar, and Tejeda, and then S. W. under that of Tolox. After Mulhacen, the most elevated mountain-summits are Maladeta, Mont Perdu, Posio, and Vignemale in the Pyrenees; Valia, W. of Mulhacen, Penaranda, and Penanaranda, in the mountains of Asturias; Penagolom, on the frontiers of Aragon and Valencia; Pavalara, in the range between the two Castiles; Mooneya, Gador &c.

Rivers.—There are numerous, and several of them pursue courses of several hundred miles, draining large tracts of country. In general however, rising in the table-land, where the atmosphere is dry, and rain is neither frequent nor copious, their supply of water is comparatively small, and their navigable importance limited. Their basins, lying chiefly in the intervals between the mountain-ranges, are usually bounded by them on the N. and S. and hence all the large rivers flowing through valleys which are open only on the E. or W. necessarily follow one or other of these directions. Those which flow E. belong to the basin of the Mediterranean, and those which flow W. to that of the Atlantic. The most important of the former basins are the Elbro, which, rising in the mountains of Asturias, has a course of more than 400 m. to the Bague, which rises in the most W. part of Murcia. In the course of some name, and has an E. course of at least 300 m., the Júcar which, rising between the sierras Molina and Albarcin, flows for the most part through a wide and fertile valley upwards of 200 m., and the Guadalquivir which has a course of about 180 m. The most important rivers of the latter basin are the Douro and Tago, which however, are more Portuguese than Spanish rivers, because, though they both rise and run the longer part of their course in Spain, the latter, and consequently more valuable part of it, is in Portugal, the Minho and Guadiana, also partly shared by Portugal and the Guadalquivir which, flowing between the great ranges of the Sierra Morena and Sierra Nevada, has a more regular and constant supply of water than most Spanish rivers, but notwithstanding its course of above 400 m., is not navigable by sloops beyond Seville. Considering the number and height of the mountain-ranges, it is remarkable that Spain does not possess a single mountain-lake deserving of notice its only expanse of standing water are the lagoons which line part of its S. and W. coasts, and are not only devoid of beauty, but often poison the air with pestiferous vapours.

Geology and Minerals.—Almost all the mountain ranges have a nucleus of granite, overlain by crystalline schists. This is particularly the case in the Pyrenees, the mountains which separate the two Castiles, and the basins of the Douro and Tago, the Sierra Morena, and the Sierra Nevada. In the last the granite and schists often give place to immense masses of serpentine. The mountains of Asturias, however, form an exception to the general rule, and though evidently a continuation of the Pyrenees, differ from them essentially in geological structure, exhibiting no traces of granite or other igneous rocks, and consisting almost entirely of carboniferous limestones, and sandstone. The latter formation is largely developed in the Sierra de Gador, and in the deep valleys of the

Alpargatas. Secondary rocks, still higher in the series, consisting of chert and the accompanying strata, often overlie those of the carboniferous limestone and have their largest development in the districts which border the E. coast. They also form great part of the ridges which intervene between the plains of La Mancha and the Mediterranean. Tertiary formations are found partly on the higher table-land in Old Castile, where they consist chiefly of marls and gypsum, and partly on the plains of Valencia, Almería, Murcia, Cartagena, Aguilera and Granada. They also fill several valleys, among others, those of the Segura, Júcar, Lower Ebro and Guadalquivir. The minerals are numerous and valuable and though, owing to the general decay into which almost all the industrial resources of the kingdom have fallen, they are less extensively worked than they formerly were, there cannot be a doubt that the more valuable of them are by no means exhausted. They include gold, which was at one time found in considerable quantities in the Asturias and Galicia, though no mine is now worked; silver, found in numerous quarters, particularly in the Alpargatas, the Sierra de Luján, and the Sierra de Gador, in all of which the lead, found in the greatest abundance, is highly argentiferous; quicksilver, particularly at Almadén, where the mines, still in operation, are among the richest in the world; copper in the Sierra Morena, the Alpargatas, and Teruel, in Aragón, but at present almost abandoned; iron in almost every quarter, and more especially in the Baena province, where it is worked to a considerable extent, and has long been famous for some of the articles produced from it; zinc in more limited quantities; coal in several places, particularly in the Asturias and the Sierra Morena, though the extent of the fields is imperfectly known, and the workings are extremely limited; salina, cobalt, and blende, in La Mancha, Aragón and Granada, and antimony, tin, graphite, alum, sulphur, and saltpetre. Salt is only very partially worked in mines, but great quantities are manufactured from the lagoons. Several quarries yield excellent marble, alabaster and Jasper, and many precious stones, as rubies, topazes, amethysts, and garnets, are found.

Climate.—This, owing to the physical configuration of the surface, varies much in different localities. On the elevated table-land it is both colder in winter and hotter in summer, than usual under the same latitude. In Madrid, which is situated upon it, the mean temperature of winter is about 47°, of spring 58°, of summer 68°, and of harvest about 66°. In the hottest month the mean temperature sometimes rises above 80°, and in the coldest, falls below 40°. The mean annual temperature is between 56° and 58°. On the table-land, in summer the sky is generally clear and cloudless, and rain seldom falls, but in winter it both rains and snows frequently. On the N coast the climate is damp, and injury is often suffered from a superabundance of moisture. In the N.W., in Galicia, a piercing wind, which the Castilians call *pelajeo*, often blows. In these quarters, in severe and rainy winters, the cold is occasionally extreme, and the olive and other southern fruits cannot be successfully grown. In the S.E. districts, particularly in Murcia and Valencia, a kind of perpetual spring prevails; on the contrary in the S. and S.W. in Granada, and other parts of Andalusia the climate is almost African, and a wind called *solano*, which withers up vegetation, unleashes the animal frona, spreads epidemic diseases, of which the yellow fever is one, and is usually accompanied with numerous swarms of mosquitoes, often blows for two weeks in succession. In the W. the climate is mild but variable; the summer, however, is often very hot, and in Extremadura, in particular, withering draughts of nearly six months duration are not uncommon. In the E. the climate resembles that of Asia Minor and Syria. Snow is confined chiefly to the more mountainous districts. Storms are not frequent, but shocks of earthquakes are often felt and many attended with fearful disasters are on record.

Vegetation, Agriculture, &c.—Few of the mountains are so high as to be beyond the limits of forest vegetation; but both they and many tracts of the table-land are in general very luxuriantly supplied with trees, and a want of timber, both for fuel and economic purposes, is severely felt in many quarters. The finest forests are on the W. slopes of the Pyrenees, and in the mountains of Asturias, from which the oak which need to supply the docks of Ferrol was obtained. The more

remarkable trees are the Spanish chestnut, and several varieties of oak, more particularly the *Quercus ballota*, the acorns of which are edible, the *Quercus robur*, or cork-tree, and the *Quercus coccinea*, from which a crimson dye, resembling the genuine cochineal, is obtained. Orchard and dwarf fruit are extremely abundant, and include, in addition to apples, pears, cherries, plums, peaches, and apricots, the almond, date, fig, orange citron and pomegranate and in the lower districts of the E., the fig, the fig, the fig, and the fig. This culture of the vine is general, and great quantities of wine are made, both for home consumption and exportation. The demand for the latter is chiefly confined to sherry and the sweet wines of Málaga and Almería, a considerable part of the grapes grown are dried, and furnish one of the principal exports from the port of Málaga. Nuts, common and plentiful, walnuts, and chestnuts, grow in such abundance as to form important articles of trade. In the warmer districts the olive, sugar-cane and cotton-plant are partially cultivated. The extent of land under regular agricultural crops is somewhat limited. Much of the higher part of the central table-land presents a very sterile appearance, having a thin stony soil and a covering of heath and scrubby pasture; and even extensive tracts, which might be advantageously cultivated, are left almost in a state of nature, to be ranned over by cattle, sheep, goats, and swine. The finest agricultural district is Valencia, where both rice and corn are grown far beyond the wants of the actual population, and furnish large supplies to those parts of the interior which are less favourably situated. After Valencia, Catalonia, Murcia, and some of the N provinces, raise the largest quantities of grain. The quality is in general so excellent, that the bread of Spain is said to be the finest in Europe, but the system of agriculture is very defective, and the amount of produce is far less than a better system might easily obtain. Considerable improvements, however, is said to have been recently made, and Spain which used regularly to import grain, has now a small surplus for export. The more important crops are wheat, rice, maize, barley, and legumes. Hemp and flax are extensively grown in Aragón and Galicia and asparagus grows in abundance, more especially in Valencia and Murcia, where it is in extensive demand for making ropes, mats, baskets, &c. The mulberry thrives well, and is largely cultivated, for rearing silk worms, in Valencia, Murcia, and Granada. Buffon and other dyers-plants grow chiefly in the interior, the capsaic grows and on some of the Mediterranean shores, and there also, particularly on the E. large quantities of barilla are manufactured. The liquorice-plant is cultivated chiefly near Seville, and at the mouth of the Ebro, and the juice prepared from it is so demanded in all parts of Europe. The zoology of Spain includes a vast number of species. Of these, however, the only large animals in a wild state are the wolf, common in all the mountainous districts, and the bear and chamois, found chiefly in the Pyrenees. In luxury the system is frequently met with, and lynxes, foxes, wild cats, weasels, &c., are numerous in many quarters. The chameleon is found in the vicinity of Cadix, and numerous monkeys haunt the rock of Gibraltar. The feathered tribes are very numerous, particularly on the coast and at the mouths of rivers eagles are not uncommon, and among rarer visitors may be mentioned the flamingo, which is sometimes seen near Valencia. The number of rivers and great extent of sea-coast give great scope to the inhabitants of the water and some important fisheries are carried on, particularly those of sardines on the coast of Galicia and of tunnies and anchovies on the S.W. coast, between Cadix and Gibraltar. Nothing, however, more strongly indicates a general want of industry and enterprise in Spaniards than the fact, that instead of preying by the treasures which their own sea spontaneously offer their main supplies of fish are derived from foreigners. Among domestic animals the horse, descended from breeds which the Moors had introduced, was long celebrated throughout Europe but has in recent times declined in reputation though Andalusian stallions of many fine animals. One great cause of the comparative scarcity of good breeds of horses, was the rapacity of the French, who, during the ungrudging invasion, never allowed a superior animal to escape their hands. The mule is generally preferred to the horse, both for carriage and draught, and is extensively reared in New Castile. Both it and the ass are generally of a very superior description. Horned cattle are generally in-

Andalus and not numerous; only in a few districts are cows kept for dairy purposes; bulls, in great demand for the national amusement of bull-fights, are reared in greatest perfection in Andalus. The favorite stock is the sheep, of which about 15,000,000 are kept. A considerable proportion of these belong to the celebrated Merino breed, in which almost all the other breeds of Europe are more or less indebted for improvement. Goats also are very numerous, and in their flesh, milk, and cheese, furnish the favorite food of the inhabitants. Swine are kept in large herds in some parts of Extremadura, and in some of the N. provinces, both near the coast and among the mountains of Asturias, where they roam at large in the forests.

Manufactures and Trade.—In the middle ages, the manu- factories of Spain, particularly along the coasts of the Medi- terranean, were in a flourishing condition, and found an ex- tensive demand particularly in the Levant and other parts of the East. With the expulsion of the Moors, the branches which they had specially fostered sunk rapidly into decay and have never been revived. New demands however arose in the W. and Spain, as the mother country, reserving to her- self the sole supply of the colonies, was able for that purpose alone, to carry on a number of lucrative manufactures. The loss of these colonies putting a sudden stop to the demand, was followed by their almost as sudden extinction. The circum- stances of the country since have been the most unfavorable that can be conceived to the progress of any branch of regular industry, and hence, the only manufactures deserving of notice are to be found in a few of the larger towns. Cotton goods are made to some extent in Catalonia, particularly Bar- celona, woollens in Murcia, Tarragona, Guadalajara, and dif- ferent towns of Valencia and Aragon. Leather in Valladolid and several towns of Andalusia, wax clubs in Barcelona, linen, both ordinary and damask, in Galscia, silk-stuffs at Cordova and Carthagena, stained paper, jewellery, and porce- lain at Madrid, iron-ware, chiefly in the larger and coarser descriptions, in the Basque provinces, Mondragon, Toledo, Alhambra, Gualda, &c. for common and sword cutting com- mon earthen and delft ware in Andalus, Alcora, Caceres, &c. paper in Valencia and Catalonia and tobacco in various towns, but more especially in Malaga and Seville. The trade laborers under great disadvantages from the want of proper means of communication. The roads, except the royal roads (camino reales) are generally wretched, the rivers, though numerous, are ill fitted for navigation and little has been done for their improvement, either by removing obstructions from their channels, or canoeing the more important basins with each other by means of canals. Of those six, which promised important advantages, have been commenced, five of them within the last century, but, as Melledo expresses it, from that species of fatality which has always persecuted Spain, not one of them is finished. Recently some little has been done in building railways, but their extent is yet (1854) too limited to have much effect on the general trade of the country. In such circumstances, the foreign trade is almost necessarily confined to such articles of raw produce as are produced in greatest abundance, and can be most easily conveyed to a por- t. The chief articles of export are wine, salt, fruits, lead, oil, soap, and agricultural produce. The following table exhibits a general view of the commerce of the whole Spanish monarchy European, African, American, and Asiatic—

	1851		1850	
	Imports.	Exports.	Imports.	Exports.
Europe and Africa	64,462,714	63,300,179	1,614,411,831	68,388,649
American	2,948,262	3,618,403	4,613,700	5,826,278
Asia	716,595	41,469	159,467	52,680
	7,044,569	5,959,079	1,664,188	12,166,719

Weights and Measures.—These vary so much in different provinces, that it is almost impossible to specify them. Those of Castile, however, are the most generally adopted, and here are only seven. Acentos are kept in maravedis, of which 34 = real de vellón = about 2½ sterling. The principal coin is, in gold, the *double-ecudo* = 320 reales the *double-ecudo* = 160, the *double-ecudo*, or *plata* = 80, the *ecudo* = 40 and the *ecudo* = 20, in silver, the *peso* = the *ecudo* or 20 reales, the *half-peso* or *ecudo-de-vellón*, the *fourth-peso* or *peseta*, &c., in copper, the *double-cuarta* of 8, the

single-cuarta of 4 and the *half-cuarta* of 2 maravedis, or 10 Castilian dineros. The principal measure of length are the *vara* = 36 = 11 1/2 in. imp., the *estada* or *fathom* = 6 *varas* = 14 paces. Of these *varas* or paces, the *posting vara* or *leuga* has 4000, the common *vara* 4000, and the *statute vara* 3000. The *cabin*, or principal corn-measure, contains 12 *fanegas*, of which 8 = a *quarta imperial*. The *cañero* or *arrobe-major*, and the *arrobe-menor*, are the principal liquid measures, the former being used generally for all liquids, and the latter only for oil. The *arrobe-menor* contains about 4½, and the *arrobe-major* about 8½ *galones imperial*.

Government, &c.—This is an hereditary constitutional monarchy, regulated by a constitution adopted in 1807, and subsequently modified in 1845. The legislative power is vested in the crown and cortes jointly. The cortes consist of two equally independent bodies—a senate and a house of deputies. The senate has no limit as to numbers, and is appointed solely by the crown, each senator holding his office for life. The deputies are nominated directly by electoral juries, at the rate of one deputy for every 50,000 of the population. Each jury is elected for five years, and has full liberty of speech and vote, but the crown may at any time dissolve the house of deputies, subject to the condition that a new house must be elected and summoned to meet within three months. Either of the three powers, the crown, senate, or deputies, may originate bills, with the exception of money-bills, which belong exclusively to the last, but no law can be passed before the consent of each has been obtained. The crown is responsible only by its ministers, composed of a council of six principal secretaries of state, finance, war, justice, marine, and government. Justice is administered by a supreme court, composed of a president and 16 judges, divided into three halls or courts—a first and second court of justice, and a third court of the Indies. Next in order to this court are the audiencias, or courts of second resort. The whole number of these within the peninsula and the adjacent islands, is 15 each having its seat at some principal town and exercising jurisdiction over two or more provinces. Judges of the first resort (*procuradores*) are found in all the more important districts. The revenue, raised chiefly by direct and indirect taxation, the latter often on the most objectionable principle, the proceeds of suppression of monasteries, salt, mines, lotteries, monopolies of the manufacturers of tobacco and salt, &c. amounted in 1844 to £27,493,602 and the expenditure to £27,478,323. The public debt amounted in 1851 to the sum of £110,107,072 and in 1854 the short space of thirteen years, it had increased to £183,927,471.

Army and Navy.—The army consists of regulars and reserve, or of regiments of the line and militia. The whole force is about 136,787 men, of whom about 90,000 are regulars. They are in general ill-disciplined and ill-paid, and though once the best troops in Europe, are now among the worst. The only kind of service in which they still possess considerable reputation is guerilla warfare. The navy which long contained the finest ships in the world and almost ruled the seas, was almost annihilated by the wars carried on with Great Britain and now numbers no more than four ships of the line, five frigates, six corvettes, eleven brigs and 29 steamers and some small vessels, carrying in all 1206 cannon and manned by 9028 sailors.

Religion.—The only religion which the state recognizes, and declares itself bound to support is the R. Catholic. It is governed by 10 archbishops and 59 bishops, but two of the former and five of the latter have their jurisdiction beyond sea. The number of parishes is about 21,000. In 1857 all the convents of monks, with a few exceptions, were suppressed, and their revenues subject to a provision for saluting members, conformed to the state. At the period of extinction the number of convents was 1940 with 30,905 monks, the numerics still amount to 880 with 13,000 nuns, for the most part aged. In no country has the dominant religion manifested a more intolerant spirit, or been guilty of so many atrocious deeds. The same spirit still exists, but its powers of mischief are considerably curbed. The monks of the clergy have long been notorious for luxury and the latter are said to have very generally yielded inferior priorities.

People.—The inhabitants of Spain ancient chiefly of Spaniards proper composed of a mixture of ancient Iberians, Romans, Visigoths, Vandals, and Suevi, but partly also of three

other districts—Baeza, occupying the provinces to which they give their name, and forming about one-twenty-fourth of the whole population.—Mojaca, a remnant of the Moors who, in the general expulsion of their countrymen, found refuge in several valleys in the kingdom of Granada and the Castiles, and whose descendants, mingled with the other inhabitants, are still living there in the number of about 60,000,—and Ziguens, Gitanos, or gipsies, who are found diffused over all parts of the peninsula, but do not number above 45,000. The Spaniards proper, to whom only it is necessary here to advert, are of middle stature, well-formed, of a sallow hue, sharp features, dark hair, and keen black eyes. Their language, a dialect of Latin, with a considerable number of Teutonic and Arabic words, is soft and soothing, and peculiarly adapted for the lighter kinds of poetry but is deficient in force, and has not been enriched by many works in the higher departments of literature. With the exception of Cervantes, there is not a Spanish writer who can be said to have earned for himself an European reputation. In diet the Spaniards are frugal and temperate. Their wants being time comparatively few, are easily satisfied, and furnish no strong stimulus to excessive industry or industry in a prevailing vice, and the highest ambition generally fails to be able to live without doing anything. In their intercourse with strangers they are reserved, taciturn, and stand much upon their dignity, afraid apparently of its being encroached upon by undue familiarity; but on finding what they conceive to be their true place properly recognised they lay aside their restraint, form strong attachments, and become the most agreeable of companions. With their natural indolence there is a strange mixture of enthusiasm, and when their passions are once roused, there are few extravagances or excesses of which they are not capable. In favourable circumstances this part of their character has often manifested itself in admirable exploits but when accompanied, as it too often is, by ignorance and bigotry, has led to the perpetration of numberless atrocities. In no country has fire and sword been more mercilessly employed in the extirpation of what was called heresy and even now, under a constitution which professes to guarantee freedom of thought, and freedom of the press, no form of dissent from Popery is tolerated. The national character is well preserved in the great sport of bull fighting, cultivated eagerly in every part of the country, and, like horse-racing among the English established wherever the Spaniard is located.

History.—Spain was first colonized by Phoenicians and Carthaginians, who, after serious opposition from the natives, succeeded in making themselves masters of the greater part of the peninsula. After the disasters of Hannibal in Italy, the Romans, having subdued the native tribes, gained a complete ascendancy, and Spain became a Roman province, and in the time of Augustus was subdivided into three parts—Bætica, Lusitania, nearly equivalent to Portugal, and Tarraconensis, and regarded as among the most valuable possessions of the empire. To such an extent was civilisation carried, that 860 cities were counted within its limits, and all the arts of civilised life were known and practised almost as familiarly as in Italy itself. In the beginning of the 5th century when Rome was tottering to its fall innumerable hordes of Goths, Suevi, Vandals, and Alans entered Spain, and spread themselves over nearly the whole of Old Castile, Asturias, Galicia, and Andalusia. They committed fearful havoc, and war, hunger, and pestilence, concerned in covering many of the finer parts of Spain into a desert. Their hordes, about the end of the 6th century were vanquished by the Visigoths, headed by Leovigild, who established a dynasty which lasted above 120 years. In 672 the Saracens first made their appearance from Africa, and attempted to land at Gibraltar. Notwithstanding several repulses they persevered, and having obtained a permanent footing in the country, gained a signal victory on the banks of the Guadalquivir, and entered the capital Toledo in 711. Tarik Ibn. Zayad, the first Saracen conqueror, was succeeded by his son Musa Ibn. Nusayr, who, presenting his conquests, subdued the whole country, with the exception of the mountainous districts of the Asturias, which defied his power, and remained as an impenetrable stronghold with its former possessors. These not contented to be cooped up within such narrow limits, not only continued to harass the Moors, but, taking advantage of their dissensions, made several happy conquests, and under a valiant leader named Pelayo, of

royal Gothic extraction founded the kingdom of Asturias in 757. About the same time another sovereignty was established in the N. part of the peninsula, by Garcia Kimerio, a Cantabrian noble, and gradually led to the foundation of the kingdoms of Navarre and Aragon. The kingdoms of Castile and Leon were in like manner established and in 1073 Alfonso VI. of Leon, held the united sovereignty of Asturias, Leon, Galicia, and Castile. Too often, however, internal dissensions arose in the different kingdoms, and prevented a united effort from being made against the Moors. In 1095 Alfonso III., of Castile, aided by the celebrated warrior Rodrigo Di Viver better known in history by the name of El Cid, reduced Toledo and the neighbouring districts and shortly after, under his grandson and successor, the frontiers of Castile were extended as far as the Sierra Morana. Ferdinand III., whose achievements against the Moors procured him the surnames of El Santo took Badajoz and Merida in 1230, Cordova in 1236 and Jasso Seville, and Murcia, in 1243. The kings of Aragon were equally successful. As early as the middle of the 11th century Ramiro I had made the Moorish kings of Tudela, Segorve, and Lerida pay him tribute. Between 1068 and 1094, his successor, Ramiro I. renewed the feud between the Pyrenees and the Rhone, and in 1118 Alfonso I, successor of Ramiro, having taken Saragossa, made it the capital of his kingdom, and continuing his conquests, became master of a large tract of country N. of the Ebro. Don Jaime I one of the most celebrated kings of Aragon, followed up those conquests by wresting Valencia and the Balearic Isles from the Moors, who thus pressed on all sides, retired into the mountains of Granada, and there founded a new kingdom in 1248. By calling in the aid of his countrymen beyond the sea, they made several vigorous efforts to regain their lost position, but with very indifferent success. Meanwhile, various important changes had taken place in the possessions of the Christian kings. Pedro IV of Castile, surnamed the Cruel having rendered himself odious by his atrocities, was driven from the throne, and fled to Bordeaux. There he managed to ingratiate himself with Edward of Wales, the celebrated Black Prince, who entered Spain defeated an army of 100,000 men that marched to oppose him and restored Pedro to his dominions. Pedro reigned immediately to his cruelty and the Black Prince disgusted, left him to his fate. Accordingly, in 1369 he lost both his crown and his life. Troubles thus succeeded, and in 1465 Henry IV an imbecile prince was brought to trial by his insurgent nobility, headed by the Archbishop of Toledo, and formally deposed. His son Alfonso only 11 years of age was seated on the throne, but died three years after. His father Henry IV, who had been deposed, reascended the throne, and on his death in 1474 was succeeded by his daughter Isabella, who had married Prince Ferdinand eldest son of John II of Aragon. John died in 1479 and the two kingdoms of Castile and Aragon with fully included, became united in the persons of Ferdinand and Isabella. Their reign is one of the most glorious in Spanish annals, and in one year, 1492 was signalled by the final extinction of the Moorish dominion in Spain through the conquest of Granada, and the discovery of America by Columbus. Isabella died in 1504, and Ferdinand in 1516, leaving their united crown to their grandson, who, under the name of Charles I of Spain, and Charles V. Emperor of Germany, became the most powerful monarch of Europe by adding to the already overgrown dominions of Spain those of the House of Austria. The reign of Charles is more European than Spanish, and from its intimate connexion with the rise and progress of the Reformation, is full of interest. In 1556, Charles, while in the zenith of his power and the full vigour of his faculties, voluntarily resigned both his hereditary throne and the imperial purple, and retired to end his days in the monastery of Yuste near Plasencia. He was succeeded by his son Philip II., better known to English readers as the husband of the Bloody Mary, and projector of the conquest of England by the Armada. Philip proved a remorseless bigot, and though Spain had now acquired by her possessions, not merely in Europe, but in the East and in the New World, a most magnificent empire, it soon became apparent that her decline had commenced. Philip II. died in 1598, and was succeeded by his son Philip III., whose reign is only memorable for the final expulsion of the Moors, who carried away

with them no considerable portion of the wealth, industry, and trade of the kingdom. The next reign is that of Philip III., during which Portugal resumed her independence, and the United Provinces of Holland nobly asserted their freedom. He was succeeded, in 1665, by his son Charles II. a mere child.

His long reign was only a series of disasters, and several treaties were made, in all of which Spain was obliged to submit to humiliating terms. He died on the 17th of May 1700; but as he had no issue, he had appointed Philip of Anjou, grandson of Louis XIV., his successor, a competition for the crown took place, and led to the war of the succession, which was not terminated till 1707, when Philip, by the defeat of his opponents at Almansa, made good his claims; while, at the same time, by the peace of Utrecht, Spain was stripped of all her European dominions beyond the peninsula, and, even within it, was obliged formally to cede Minorca and Gibraltar to the British.

Ferdinand VI succeeded his father Philip in 1746 and by observing a strict neutrality in the European wars, gained some important advantages for his country which began to show symptoms of recovering from its degradation. The same was policy was pursued for a time by his successor Charles III. till what is called the Bourbon family compact led to a war with Great Britain. It was at this time France and Spain united were severely defeated in their celebrated attempt to take Gibraltar. On his death, in 1788, he was succeeded by his son Charles IV., whose reign under the administration of the queen's favourite, Godoy, proved most inglorious. An ill-conducted war against the French revolutionists was suddenly concluded by a most disadvantageous peace and an alliance with France, which necessarily brought Spain into collision with Great Britain. The result was the loss of many of her colonies, and the almost total annihilation of her fleet. The numerous attempts of Bonaparte to secure the crown of Spain and place it on the head of his brother Joseph, led to the celebrated war of independence, in which the patriotic spirit manifested by the Spanish people contrasts strongly with the pusillanimity both of Charles IV and his son Ferdinand VII. Promptly by the valor of British troops, and the unrivalled talents of the Duke of Wellington, the French were not only expelled, but saw the war boldly and successfully carried within their own territories. Ferdinand, who had been treacherously kidnapped by Bonaparte, regained his liberty, and returned to Spain amid the acclamations of his people; but his misfortune had not taught him wisdom, and he was soon seen angrily persecuting those to whom he was mainly indebted for his throne. Repeated insurrections and civil wars have since ensued, and Spain has been stripped of the whole of her possessions on the continent of America. Ferdinand, however, was obliged to renounce his title of absolute for that of a constitutional monarch and his daughter Isabella II., now (1867) reigns under a constitution which fairly administered, gives the subject all the essentials of freedom.

SPALATRO, or SPALATZ (Latin, Spalathus, Slavonic, Spal), a seaport in Austria, Dalmatia, upon a small, beautifully situated on a bay of the Adriatic formed by the islands which here line the coast, about 100 m. S.E. Zara Ist. (Phaonin tower) 42° 30' 24" N., lon. 16° 26' 45" E. It consists of the town proper and four suburbs, and was once surrounded by walls, of which only portions now remain, in a very dilapidated state. It is not well built. The houses are generally small, and devoid of architectural beauty and the streets narrow, winding, dirty, and badly paved with small, flat stones. The building most deserving of notice is the vast palace, built by the Emperor Maximilian, during his residence here after he had subdued the empire, and still in very tolerable preservation. It is merely in the form of a square, with a quadrangular tower at each angle. The S. side, which faces the harbour is 595 ft., including its two terminating towers; and the E. and W. sides are each 703 ft., the whole space thus enclosed being rather more than 5 ac. It was interrupted nearly centrally by two streets at right angles, and had its main entrance on the N. by the Porta Aurea, or Golden Gate, which is still nearly perfect. The interior of the palace con-

sisted of two principal sections, that on the S. containing two temples and the emperor's private apartments. The whole town of Spalatro was at one time confined within the precincts of the palace, and accordingly the greater part of its buildings have been converted into private dwellings or public offices. Among the latter, the first place is due to the Duomo or cathedral, formerly the temple of Jupiter. Opposite to the cathedral is the temple of Esculapian, now converted into a hospital. Among the other buildings and establishments of the town are three parish churches, an archbishop's palace, a museum an episcopal seminary, a

SPALATRO.—FROM CANAL, VIEW TOWARDS THE PALACE AND PALATIA.

gymnasium normal and other schools. The manufactures consist chiefly of tallow and wax candles, rosoglio, and brandy. The harbour is both commodious and secure. A large trade is carried on, particularly with Turkey, chiefly in wool and salt provisions; oil, wax, silk and woollen stuffs, and leather. Spalatro is the seat of an archbishop and the seat of a court of first resort, and several important public offices. It was long in the possession of the Venetians, was taken by the French during the wars subsequent to the revolution, and passed to Austria by act of the Congress of Vienna, P. 18,000.

SPALDING, a market to. and par. England, co. Lincoln. The town is situated in a marshy or sunny district, on the bank of the Welland, 34 m. S.E.E. Lincoln, has an old and spacious church, with a fine tower and spire several places of worship for Dissenters, a free grammar-school, of which the learned Dr. Bentley was for a time head-master a blue-coat school, and a set of almshouses; a theatre, jail, and spacious market-place, in the centre of which is the townhall. The river has been made navigable to the town for vessels of from 50 to 70 tons burden. A considerable trade is carried on with London, Hull, Lynn, and other places. A large business is done in wool, corn, coal, and timber. Pop. 7627. Area of par., 12,070 sq. Pop. 8829.

SPALDWICK par. Eng. Huntingdon; 1890 ac. P. 444. SPALMADORE ISLANDS, a group of islands, Australia Minor, between the island of Sale and the mainland of New Minn. lat. 33° 32' N. lon. 36° 12' E. The largest is about 5 m. long and 3 m. broad the others are mere rocks.

SPALT, a walled in Bavaria, Kreis Middle Franconia, r. bank Rhine 20 m. S.E. Ansbach with three churches, a mill and a trade in hops. Pop. 1765.

SPANBY, par. Eng. Lincoln, 1019 ac. Pop. 74.

SPANDAU, a to. Prussia, prov. Brandenburg; gov. and 12 m. N. Potsdam, at the confluence of the Spree and Havel. It is a place of considerable strength, being surrounded by walls, and defended by four forts and by a citadel, which is situated on an island in the Havel. It contains four churches and an old castle, fitted up as a penitentiary, and capable of receiving 500 prisoners; and has manufactures of woollen and linen cloth, leather, and earthenware, breweries and distilleries, building-yards, some shipping, and general trade. Spandau was long the residence of the electors of Brandenburg. P. 9497.

SPANGENBERG, a to. Hesse Cassel, Hesse-Hanau, 15 m. S.E.E. Cassel. It is walled, and has a castle and a state-prison, manufactures of linen, and four-mills. P. 3409.

SPANISH, a river, British America; flows W S.W. along the N base of N. C. C. Mountains, and falls into Lake Huron, nearly opposite the central part of the Great Manitowish.

SPANISH-TOWNE, or **SPANISH-DE-LEA VIDA**, the capcity of St. James, about 10 m. N.W. Kingston. It is the seat of government and contains the governor's residence, the public offices, the superior law-courts and many institutions. It is ill built and unsightly and although the capital of the island, is in every other respect inferior to Kingston. Pop. 3000

SPANENBERG or **SPANENBERG** a market in Lower Austria on the Danube, 8 m. from Gmünd with a church which once belonged to the Teutonic knights. Pop. 1140.

SPANOPOLIS, a vil. Hungary. See **SPANOPOLIS**.

SPARINIBI, a vil. Naples, prov. Lavoro, E. Costa with three churches. Pop. 1580.

SPARHAM, par. Eng. Norfolk, 1770 ac. Pop. 378.

SPARKFORD, par. Eng. Somerset 800 ac. Pop. 280.

SPARONE, a vil. and com. Italy Piedmont, div. Turin, prov. and 18 m. W. S.W. Ivrea with a church. Pop. 2478.

SPARSHOUT, par. Eng. 1-1 Berks, 6340 ac. Pop. 908-2. Herts. 1840 ac. Pop. 419.

SPARTA, see **MARTIA**.

SPARTEL (Cape), the N.W. extremity of Africa, nearly opposite Gibraltor and a little W. Costa, lat. 35° 47' N. lon. 0° 43' W. It rises to the height of 1045 ft. above sea-level, the summit composed of large blocks of sandstone, from this height it slopes gradually to the water.

SPARTIVENTO -1, [anc. *Hercules Promentorium*], A cape to the S. extremity of Italy, prov. Calabria Ultra 1; lat. 37° 55' N.; lon. 16° 4' E. lon. It forms the termination of a peninsula of the Apennines -2, The S. point of St. Sardinia lat. 38° 58' N.; lon. 6° 55' 30' W.

SPASEK, three places, Russia -1, A. to. gov. and 110 m. N.N.E. Tambov, on the Stepanovka with two wooden churches, and near it extensive iron-works, and manufactures of ironware. Pop. (1851) 8980 -2, A. to. gov. and 30 m. E.S.E. Riazan, 1 bank Oka, with two churches, and a trade in corn and salt. Many of the inhabitants are bargemen on the Oka. Pop. (1849), 3545 -3, A. to. gov. and 52 m. S. Kasan on the Volga, near its confluence with the Volga. P. (1851), 9152.

SPATZA, or **SPATZ**, a market in Hungary co. Ypresburg, 4 m. from Tyrnau. It has a handsome church, and a trade in cattle. Pop. 1089.

SPAXTON, par. Eng. Somerset 8887 ac. Pop. 1080.

SPECHIA-DE-PARTI at Naples, prov. Otranto, E.S.E. Gallipoli with two convents, an hospital, and almshouses. Pop. 1500.

SPEPRN a vil. and par. England co. Berks, on the Kennet, and the Kennet and Avon canal, 1 m. W. Newbury with a parish and a district church and an old castle. Spens was the Spens of the Romans, and traces of their fortifications are still visible. What is called the second battle of Newbury was fought here in 1844. Area of par. 8760 ac. P. 1296.

SPICHERLIS, a vil. and par. Switzerland, can. and 6 m. N.E. Appenzell at the foot of the Thurgau. It has a great number of well built houses and contains a handsome octagonal church, an orphan hospital, and poorhouse. Pop. 2500.

SPICHERLIS, a vil. Rhensish Prussia, prov. Treves, near Bittburg; with a church, and manufactures of tobacco-pipes and pottery. Pop. 1678.

SPEIGENSTOWN a tn. N.W. coast, ul. Barbadoes. It is a place of considerable importance, and is defended by three forts. Pop. about 5000.

SPELDHURST par. Eng. Kent; 8947 ac. Pop. 3889.

SPELLA (anc. *Hyphallos*) a tn. Italy doing and 18 m. S.E. Perugia. It has a very steep street, and contains a number of Roman antiquities among others the tomb of the poet Propertius. Pop. 3000.

SPELSBURY, par. Eng. Oxford, 8300 ac. Pop. 578.

SPENCER GULF, S. Australia entrance between Cape Spencer and Cape Catastrophos, where it is 55 m. in width, running inland 300 m., where it terminates in a narrow point. It is supposed to be the Gulf of St. Vincent by York Peninsula. The entrance is in lat. 35° S.

SPENGE, a vil. Rhensish Prussia, prov. Minden, circles and near Harford; with a church. Pop. 1860.

SPENNITHORNE, par. Eng. York (N. Riding), 4890 ac. Pop. 796.

SPERLONGA, a tn. Naples, prov. Lavoro, 8 m. W.N.W. Gaeta, near the sea, with four churches. Pop. 1290.

SPIERHART, par. Eng. Warwick; 1000 ac. Pop. 106.

SPIESHAEDT Bismarck, or *Spiesshaed*, a mountain-range, Germany, which commences in the N.W. of Bavaria, r. bank Main opposite Mittelsheim, where the Odanwald is conceived to terminate, and stretches N.E. till it becomes joined with the W. extremity of the Rhenishmass. Its S. portion lies nearly due N. and S. its N. portion between E.W. and N.E. The former is the loftier and in the vicinity of Rottbrunnen and Altenbach attains in each of the three summits of Rottberg, Gelsenberg and Hockenschiebe, the height of about 8000 ft. Its prevailing rocks are granite, gneiss, and mica-schist, the last occupying a large portion of its sides. Limestone and sandstone occur in occasional spots. The Spieshaed contains several valleys remarkable for their narrowness and depth. It is well wooded, and furnishes considerable quantities of fine oak-timber. Salt is worked to a considerable extent at Orb. The drainage belongs wholly to the Main.

SPIESHAEDT par. Eng. Worcester 779 ac. P. 166.

SPIESHAEDT par. Eng. Dorset 2146 ac. Pop. 660.

SPIESHAEDT, par. Eng. Suffolk; 1494 ac. Pop. 190.

SPIEY, a river Scotland, issues from a lake of same name in Inverness-shire, between Loch Laggan and Loch Loech, flows N.E. through the beautiful valley of Strathpey, forming in the lower part of its course, part of the boundary between coo. Elgin and Banff and falls into the Moray Firth a little below Garmouth after a course of about 96 m. Its current at first is somewhat sluggish, but afterwards becomes so rapid, as to interfere with its navigation. It is chiefly used for floating down timber and is noted for its salmon fisheries. It receives numerous small streams, but its only important tributaries are the Dinkon on the right, and the Avon on the left.

SPIEYER, a tn. Bavaria. See **SPYER**.

SPIEYMOUTH, par. Scot. Elgin 7 m. by 2 m. P. 1898.

SPEZIA a seaport in Italy Piedmont, div. and 60 m. S.E.E. Genoa, on an alluvial flat, at the N.W. extremity of the gulf of same name, which here forms an admirable harbour. It is walled, has six gates and is defended by a castle. It is well and regularly built, and has a large and handsome square, several churches, an elegant town-hall, superior schools, a Capuchin convent, beautifully situated on a rock which projects into the sea, extensive barracks, and an hospital. Pop. 9798.

SPEZZANO, two places, Naples -1, (A. to. gov. and 10 m. S.W. Caserta), a tn. prov. Calabria-Citra, 10 m. S.E.E. Casertavillari with three churches. Pop. 1600 -2, (A. to. gov. and 10 m. S.W. Caserta), a tn. prov. Calabria-Citra, E.N.E. Caserta with three churches and a convent. The most of the inhabitants are of Albanian origin. Pop. 1640.

SPEZZIA (anc. *Typerus*) an ul. Grecian Archipelago, at E. entrance of the Gulf of Napoli, about 8 m. S.W. of the coast of Argolis, greatest length N.W. to S.E.E. 4 m., greatest breadth, about 3 m. Though very rocky it has many patches of soil, which are carefully cultivated. It discharges a few herds of goats. The chief town, bearing the same name, stands on the E. shore, and has a very respectable appearance. The harbour is good and the greater part of the inhabitants are employed in commercial pursuits. Pop. (alt.) about 6000, (tn.) 8000.

SPIAGIA (anc. *Sphacteria*) an isl. Greece, W. coast, Morea, stretching for above 5 m. N. to S., in a long and narrow belt across the entrance of the Bay of Navarino. The sea has broken it up and divided it into three or four smaller islands. Spigalia is famous for the defeat of the Spartans in a naval battle by the Athenians. It is also the scene of Lord Byron's Corsair, and has long been a noted resort of pirates. It is included in the Ionian Islands under the protectorate of Great Britain.

SPIANALE a vil. and par. Tuscany, comp. Florence, 4 m. from Monte Carlo with a church. Pop. 1465.

SPIER ISLANDS, see **MONROZOS**.

SPIERHED, an isl. Norway, in the Ringer-Bank, at the entrance of the Bay of Christiania, belonging to the group of the Hvalroset. lat. 59° 10' N.; lon. 10° 55' E.

SPIERZ a vil. and par. Switzerland, can. and 14 m. S.E. Bern, near E.W. shore, Lake Thun; with a handsome church and the ruins of an old castle. Pop. 1610.

SPIGNO -1, A. tn. Naples, prov. Lavoro N.E. Costa; with manufactures of earthenware and paper. Pop. 1840.

2, 4 in. Piedmont, div. and 28 m. S.S.W. Alexandria, near the Horns, with a court of justice, and a handsome church and school. Pop. 3667.

SPIKE ISLAND, a small isl. Ireland, co. Cork, in the middle of Cork harbor, on which are extensive artillery-batteries, a large and handsome military hospital, and bomb-proof forts to defend the entrance of the harbor.

SPIKERÖG an isl. in the N. Sea, belonging to Hano-ver, and forming one of the group of low sandy islands which line the N. coasts of that kingdom and the duchy of Olden-burg, between the mouths of the Weser and the Ems. P. 180.

SPILIMBERGO a m. kingd. of Italy gov. Varese, prov. Frail, 15 m. W. Ullas-sa, bank Tagliamento, with several provincial courts, two churches, a chapel, an old castle, manufactures of silk, and numerous mills. Pop. 3500.

SPILSBY a market in and par. Eng-land, co. and 51 m. E. Lincoln with an Estab-lished church, Independent and Methodist chapels, a courthouse, and house of correction, a free grammar and two national schools. Acres of par. 2340 and 100. Pop. 1401.

SPINAZZOLO a m. kingd. of Italy gov. Naples, prov. and 48 m. W.S.W. Bari, near the sources of the Lucca. It has two churches, two convents, an hospital and almshouse. Pop. 4600.

SPINETO, a m. Naples, prov. Savona with two churches, eight chapels, and an hos-pital. Pop. 2250.

SPINGES, a vill. Tyrol circle Pusterthal about 12 m. from Brizeu. It is a straggling place, with a church. Near it the French troops were defeated, in 1797, by the Tyrolese peasants.

SPINOSO a m. Naples, prov. Benevento, N.E. Lagoagno, near a bank Agri with a church and four chapels. Near it is a magnificent Roman bridge. Pop. 2620.

SPIRANO a vil. and com. Italy Lombardy gov. Milan, prov. and 9 m. E. Bergamasco. It was in the middle ages de-fended by a strong castle, which makes a considerable figure in history and of which towers, drawbridges, towers, and other parts still remain, containing a church, and has a blast furnace, a saw and several silk mills. Pop. 1268.

SPIRE, or **SPRECKMACH** a river Rhinisch Bavaria, formed by several torrents which descend from the E. slope of the Vosges, and after a course of about 40 m. joins I. bank Rhine. It is much used for floating.

SPIRE [German, *Speyer*, Latin, *Christus Novembris, or Novempagus*], a m. Bavaria, in the Palatinate, at the confluence of the Spire with I. bank Rhine, 10 m. S.S.W. Mannheim. It is surrounded by walls, with five gates, which have a very extensive circuit, but enclose a large quantity of ground either open or occupied with gardens, once covered with buildings. In early times Spire was a fortified outpost of the Romans, intended to guard against the attacks of the Alemanni.

In more modern times, especially under and after Charlemagne, it was long the residence of the emperors of Germany and the seat of the German diet and enjoying the privileges of a free city of the empire, with a monopoly of the carrying trade on the Rhine, rose to great importance, acquired great wealth and possessed a population of at least 27,000.

The imperial chamber *Reichs-Kammergericht*, the supreme appeal court of Germany, had its seat here for 500 years. The prosperity of Spire began to decline in the 17th century by a change in the channels of trade and other causes; but the great blow, from which it never has recovered, was inflicted by Louis XIV. who, having made himself master of it in 1689 issued a tyrannical edict, ordering the inhabitants, under pain of death to emigrate within six days. Immediately after the town was committed to the flames and continued burning for three days. The more solid buildings were thrown down by gunpowder. For many years after Spire was a mere heap of rubbish. It came into the possession of Bavaria in 1816, and much has since been done for its improvement, by the repair of old and the erection of new buildings, but as yet it does not possess many objects of much interest. The principal edifice is the cathedral, which happily retained the ancient mode of build-ing, and remained unaltered. It is in the Romanesque style,

and is perhaps the most stupendous structure in that style now existing. It was founded in 1023 on the site of a Roman temple of Vana, and is flanked by two tall pointed towers.

The interior, by its vast dimensions, strikes the beholder with a kind of awe, but is chaotic and severe in its architecture, and devoid of ornament. It, however, contains several remarkable monuments, and the ashes of no fewer than eight German emperors. It is now (1854) in course of being re-stored, and numerous paintings have already been executed on the walls of the interior. Spire contains 14 other R. Catholic and two Protestant churches, a Dominican monas-

THE CATHEDRAL OF SPIER.—From Allgemeine Monatshefte in Posen.

tary an ecclesiastical seminary (seminary, gymnasium, Latin agricultural, and industrial schools) is the see of a bishop the seat of several public courts and offices possesses a botanical garden, a hall of antiquities, and several hospitals, and has manufactures of wax-candles and tobacco some ship-ping and general trade, and several important corn and cattle markets. Of the numerous data held at Spire, the most memorable is that of 1529, when the Reformers gave in the famous protest which originally conferred upon them the name of Protestants. Pop. 9340.

SPITAL, a m. Austria, Carinthia, 23 m. N.W. Villach with a church and castle and an extensive manufacture of peas, which have a large sale in Italy. Pop. 1700.

SPITALFELDE, a par. England co. Middlesex, bor. Tower Hamlets, forming one of the E. suburbs of London, and situated on the line of the Eastern Counties railway. It early became celebrated for its silk manufactures, which were established by French refugees after the revocation of the edict of Nantes, and is still chiefly occupied by silk-weavers. Pop. 37,848.

SPITHEAD, a well known and excellent roadstead formed by the channel between the Isle of Wight and Portsmouth. The depth of water at low tide is from 10 to 18 fathoms.

SPITAL, par. Wales, Pembrokeshire, 2674 m. Pop. 680.

SPITTLE, or **SPITTAL**, a vil. England on Northumber-land, at the mouth of the Tweed, 1 m. S.E. Berwick. It is much frequented for bathing-quarries; and has a Presbyterian chapel, and several houses for curing leprosy. There is an extensive alluvium in the vicinity. Pop. 1746.

SPITZ, a market in. Lower Austria, I. bank Danube, W.S.W. Krems with a castle, church and hospital; several vinegar-factories, saw and other mills and a trade in vinegar, wine, and wood. It is a steam-boat station. Pop. 1651.

SPITZBERGEN, a group of islands, Arctic Ocean between lat. 76° 30' and 80° 40' N.; lon. 9° and 22° E. nearly equidistant from the North Cape and the E. coast of Greenland. It consists of three large and a vast number of small islands, containing altogether an area roughly estimated at 22,000 sq. m. The large islands are *Seisøyen*, *prøye*, *North-East Land*, and *South-East Land* or *New Frickland*, the two last taking their names from their position in regard to the first, from which the one is separated on the N.E. by *Wegden Fjeld*, and the other on the S.E. by *Water Tyrone's Fjeld*. Next

is also to the large islands is that of *Charley*, opposite to that of *W coast of Spitzbergen*. Very little is known of the interior, but the coasts have been repeatedly explored, and several immense glaciers and mountain-chains breasting with granite peaks, many of which exceed 4000 ft. in height. Between the mountains and the shore a narrow belt of level land often intervenes, but frequently the ridges reach down to the coast, and form precipitous cliffs, which seem to overhang the coast. The climate is intensely cold. Even during the three warmest months the mean temperature on the *W coast* is only 34.50 and vegetation is confined to a few low-lying sedge-herb, which does not run above three or four feet in height. The spring, summer, and autumn months, indeed, and, at least, the spring, summer, and autumn months or six weeks, produce a season in which human beings could manage to subsist. During winter, which sets in at the end of September, the sun remains for four months below the horizon, but at so short a distance from it that in every 24 hours the darkness is relieved for about six hours by a faint twilight. A similar effect is produced by the unusual brightness of the moon and stars, and still more by the remarkable brilliancy of the aurora borealis. The larger forms of animal life are foxes, bears, and reindeer, in pursuit of which, as well as the walrus and seals abounding along the coast, the Eskimos are frequently visited by the Norwegians and Russians. Several small islands that they have lately discovered, and which they have named, are situated on the *W coast* of the rocks and darken the sea. The mountains are clothed in beautiful marble and gneiss etc. The group appears to have been first discovered [1553] by Willoughby, the celebrated English navigator. They were again discovered, in 1596, by the Dutch navigator Barents in endeavouring to effect a *N E* passage to India. They have since been repeatedly visited, both by whalers and discovery ships. One of the most remarkable incidents in the history of Spitzbergen is the remembrance of four Russian sailors upon it for six

successive years, without injury to their health

 60 m., breadth, 56 m. area about 654 sq. m. It is
 inside is occupied by the chain of the Central Andes, where
 the culminating point of the district occurs in Mount
 Yruco, 8153 ft. Reminiscences of this chain traverses the
 delgado, and make the surface generally mountainous. It belongs
 generally to the basin of the Tyrrhenian Sea, but a small
 part of it is in the basin of the Atlantic Ocean. It is
 watered to the Atlantic. The most fertile valley is that
 of the Uspatze, which yields considerable crops of maize,
 wheat, beans, and peas and produces wine, olives, melons,
 almonds, and chestnuts. Here too there is abundance of
 fine timber. The more mountainous districts are pastures,
 and rear numbers of cattle. In some quarters the rearing
 both of all-worms and bees form important branches of in-
 dustry. A great deal of silk is spun, and excellent cheese
 made, but manufactured goods so called, are scarcely be-
 lieved to be made here.

[illegible]

originally built by Theodoris, king of the Goths, repaired by Narpa, the successor of Belisarius, subsequently rebuilt, and now chiefly used as a prison. The only manufactures, and that not of much importance, is hats. Pop. 6115.

SPOLTORE, a tn. Naples, prov. Abruzzo-Ulteriore I., E. Civita-di-Penna. It is composed of three villages; and contains a church and a convent. Pop. 3194.

SPONDON a vil. and par England, co. and 2½ m. N. Derby on an acclivity, and well built. It has a church a Wesleyan and a Primitive Methodist chapel, three national schools, and two or three friendly and benevolent societies. Stocking-making is carried on to some extent. Area of par., 4800 ac. Pop. 2059.

SPONTIN, a vil and com. Belgium, prov and 19 st.
E.S.E. Namur, on the Boog. It has an ancient Gothic castle,
a flour-mill, and a trade in agricultural produce. Pop. 605.

SPORADES, the name given to a number of isls in the Grecian Archipelago out of which the Greeks have formed the two divisions of the W and the N Sporades. (See GARCSON.) The name of E. Sporades is given to a Turkish group in which the chief islands are Samos, Nicaria, Patmos, Leros, and Calyma.

SPOT par Scot. Haddington, 10 m. by 5 m P 695.

SPOTLAND a township, England, co. Lancaster, near Rochdale, of which part it may be considered a suburb. It has a church, Wesleyan, Unitarian and other Dissenting chapels, an endowed school; manufactures of cotton goods, and extensive quarries of slate, pavement, and other stone. Pop 28,476.

SPOTORNO a vil. and com. Italy Piedmont, 8 1/2 m. N. Aols. 1 bank Poee, where it falls into the Gulf of Genoa. It has a church, a Capuchin convent, a school, hospital and charitable endowment. Pop. 1278

SPRAYNG a vil. Holland, prov. N. Brabant, 11 m. W.S.W. Hertogenbosch, plentifully adorned with trees; and having a church and school; inhabitants chiefly engaged in shoe-making. Pop. 1626.

SPRATION a vil and par England, co. and 6 m N N W Northampton. It has an ancient church, with a beautiful porch and highly-ornamented spire, Independant and Baptiste chapels, an infant and two other schools, and a chalybeate-spring, once in high repute for the cure of several affections. Area of par. 2810 ac. Pop 981

BIPELE, a river Germany, rises in the E. of Saxony circle Bautzen N side Baumgutzberg, near Nau Sals. flows very circuitously N N W passing the towns of Lobau, autumn the Prussian port Brandenburg passes the towns of Spremberg, Cottbus, Lübben where two branches, by which it has been previously formed an island, called the Bipre-Wald, again unite. Beyond Lübben it describes a semicircle which terminates in the Lake of Behmendorf then proceeds N past Bieskow and Miroslaw, where a small tributary it is called the Bipre-See. It then flows N past Christiana and Kopenick, traverses Berlin, and a little below Charlottenburg, joins 1 hank Havre at Spandau, after a course of nearly 200 m. It has no affluents of any consequence.

SPEKBERG a town in Prussia, prov. Brandenburg, gov. and 55 m. S. Frankfurt, on an island of the Spree. It has a court of law, a castle, church, courthouse, and manufactures of woolen and linen cloth and hats. Tobacco is largely grown in the vicinity. Pop. 4673.

SPREM BERG (Oxer, Nieder, and Neu) a vil. Saxony circle Bautzen, near Stolpen with a castle, manufactures of linen, tile-works, bleachfields, breweries, and several saw and flour mills. Pop. 1489

SPREIDLINGEN two vils. Hesse-Darmstadt:—1, A vil Rhambsen circle Bingen with a junction of peace court and a church. Pop. 2021.—2, A vil Starkenburg circle Offenbach: with a church. Pop. 1695

SPREYTON, near Exe Devon 2806 ac. Pop. 834.

SPRIDLINGTON par King Lincoln 2180 ao P \$18

SPRIMONT, a vil. and com. Belgium, prov. and 9 mi. S.E. Liège, r bank Ambleve; with breweries and several mills. Near it are smelting-works, glass-works and several quarries of fine building-stone. Pop. 2274.

SPRINGE, a tn Hanover princip. Calenberg, near the source of the Haller. It has a trade in iron and wood. P 1866

SPRINGFIELD, a vil. and par. England, co. Essex pleasantly situated on a commanding height on the Chelmerford and Maldon Navigation, 7 m. N.E. Chelmerford. It has an ancient parish church, with an embowered tower; a district church, and a Wesleyan chapel. It is said that Goldsmith here composed his *Deserted Village*. Area of par., 3675 ac. Pop. 2653.

SPRINGFIELD, several places U. States.—1, A city, Massachusetts, beautifully situated among rich alluvial meadows, 1 hour Connecticut, here navigable and crossed by a bridge, and on the Western railway, about 80 m. N. Hartford, and nearly equidistant from Boston and Albany. It consists chiefly of a spacious street, called Main Street, which stretches nearly 3 m. parallel to the river though at some distance from it, and contains many elegant buildings. The street is intersected at right angles by several narrow streets, and has also hallded it, where the ground rises so as to command a view of the valley several ranges of handsome residences. Among the public edifices are about seven churches, of which the First Congregational is conspicuous for its fine situation in the centre of the town. a courthouse and jail, three academies, several splendid hotels, and the U. States armory or arsenal, finely situated on a height about $\frac{1}{2}$ m. E. of Main Street, and consisting of an imposing pile of brick-buildings arranged round a square. Here from 150,000 to 200,000 stand of arms are stored and from 12,000 to 15,000 are usually manufactured. The mills, foundries, and workshops connected with the armory are the most important industrial establishments of the town, but the extensive water-power furnished by Mill river which here joins the Connecticut, is also employed for various other purposes as iron-works, machine-shops, paper, cotton, and other mills. In the vicinity of the railway-station is a large manufactory of cars and other requisites of railways. Pop. (1850) 11,765.—2 The cap. of Illinois, on the edge of a large and beautiful prairie on the Illinois and on the railway to Naples, about 100 m. N. by E. St. Louis. It was laid out on a regular plan, with a central square and wide streets, and at first it was intended to be a permanent city, but did not make decided progress till 1840, when, owing chiefly to its position near the centre of the state, it supplanted Vandalia as the capital. Its public edifices include six churches, several of them handsome structures, a state-house, well situated in the centre of the square, three academies and a beautiful courthouse, state-bank, jail, market-house, &c. Among the manufacturing establishments are four carding-machines and a foundry the trade also is extensive. Pop. 4658.—3, A city, Ohio, on the E. fork of Mud river, and at the junction of several important lines of railway, 48 m. W. by S. Columbus. It has seven churches, the Western college and theological seminary, a handsome courthouse and other public buildings, numerous mills and manufacturing establishments. Pop. 5106.

SPRINGTHORPE, par. Eng. Lincoln 1073 ac. P 300
SPROUTLEY par. Eng. York (E. Riding) 1280 ac. Pop. 463

SPRÖCKHOVEL (Nixdorf) a vil. Rhinland Prussia, gov. Arnsberg near Hagen with a church. Pop. 1904.

SPOGGE, a small isl. Denmark, in the Great Belt, about 7 m. E.N.E. Nyborg, in Fæstø. It has a lighthouse on a hill 64 ft. high; lat. 55° 20' N. lon. 10° 57' E. (L.), and a telegraph in correspondence with that of Korsø, near Nyborg. There is only one dwelling-house upon it. It lies in the line of the subit. winter-passes over the Great Belt.

SPROUTBOUGH a vil and par. England, York (W. Riding), 2 m. W. Doncaster with an ancient church and near is a modern stone-bridge of seven arches, across an arm of the Don. Area of par., 3265 ac. Pop. 538.

SPROUTTAU a m. Prussia, prov. Sillesia, gov. and 37 m. N.W. Lagnitz, r. bank Beber and 1 hour Sprouttau, which here joins it. It is walled, has three gates, two suburbs, a court of law, and several public offices, a Protestant and two R. Catholic churches; in hospitals, manufactures of woollen and linen cloth, glass-works, and several mills. Pop. 4196.

SPROUTTOWN, par. Eng. Suffolk 3385 ac. P 555.
SPROUTTOWN, par. Scot. Roxburgh 4 m. sq. P 1424.
SPROUTTOWN, par. Eng. Norfolk 2576 ac. P 1806

SPROUTTOWN, par. Eng. Lancashire 2560 ac. P 426.

SPUI (Hav), a stream, Holland, prov. S. Holland. It is a branch of the Old-Man, separates islands Rotterdam and Voorn, and falls into the Haringvliet.

SPURN HEAD, a promontory, England, forming the most S. extremity of the coast of Yorkshire. It is a long narrow headland resembling a stable, with its convexity outwards, towards the German Ocean, and its concavity inwards, towards the Humber. It consists of a long shingly and sandy beach, on which this sea is constantly making inroads, and from are understood that the waves may ultimately cut it across, convert it into an island, and, rushing without obstacle into the Humber, cause great devastation. Two lighthouses have been erected upon it; lat. 55° 54' 45" N.; lon. 0° 11' 15" E. (L.).

SPY, a vil. and com. Belgium, prov. and about 7 m. N.W. Namur. Coal and limestone are worked in the neighbourhood and there are two breweries, a flour and an oil mill. The trade is in wool and butter. Pop. 3177.

SPYRIZ, par. Scot. Elgin 8 sq. m. Pop. 1844.

SQUAM, a lake, U. States New Hampshire, 36 m. N. Concord, 6 m. long, by 6 m. broad with numerous islands, and well-stocked with fish.

SQUILLACE (San. Spilaceon) a m. Naples, prov. Calabria-Ultra II., 10 m. S.S.W. Catanzaro, is an unhealthy situation, about 3 m. from the gulf of its name. It contains a handsome cathedral, three other churches, and a seminary, and has manufactures of earthen vases, which are much admired. Near it are mines of iron and plumbago. Pop. 8000.

SQUINZANO, a m. in Naples, prov. Otranto, 7 m. N.W. Lecce with a church five chapels, and a convent. Cotton is cultivated in the vicinity. Pop. 2741.

SRAVANA BELGOLA, a wall built by Hindoos, Mysore dominions, 33 m. N.W. by W. Srirangapatam, lat. 13° 21' N., lon. 76° 42' E. celebrated as being the principal seat of the Jain worship. There is here a colossal statue, 78 ft. high, of Gomata-Raya, set out of the solid rock.

SREBERNIK, or **SAGHMERKON**—1 A m. in Turkey prov. Bouda, 30 m. N.W. Ezerick. Pop. 1600.—2, A vil. 26 m. S. Ezerick. There are silver-mines in the vicinity of both.

STAAJT, or **STOMA**, a market in Bohemia, about 12 m. S.W. Pilsen, on the Raibitz, with a church, school, and two hospitals; a townhouse and barracks, a best-wood sugar factory and three mills. Pop. 1093.

STAATSBOYGDEN a vil and par. Norway, prov. and 15 m. W.N.W. Trondhjem, N. side of the Trondhjem-fjord. Pop. 3200.

STABANNAN, par. Ire. Louth; 4577 ac. Pop. 1991.
STABIO, or **STABIO** (San. Stabio), a vil and par. Switzerland, on Ticino, about 10 m. S.E. Lugano. Near it is a sulphurous spring. Pop. 1651.

STABROECK, a vil and com. Belgium prov. and 8 m. N. by W. Antwerp, with a brewery, tannery, flour and barley mills, a considerable trade in wool, butter, honey, wax, and grain. Pop. 2222.

STABROEK city British Guiana. See GROSSORON.

STACHELBERG, a mountain, Alps, can. Glarus at the foot of which there is a much-frequented bathing-establishment. The situation is very beautiful, and the waters, of a sulphurous alkaline nature, are in high repute.

STACKALLAN par. Ire. Meath; 3261 ac. Pop. 648.

STACKFOLLE-ELDMO, par. Wales, Pembrokeshire, 2845 ac. Pop. 321.

STADUMNY par. Ire. Kildare; 509 ac. Pop. 184.

STADUMNY or **HANNOVER**, a m. in Holland, prov. S. Holland, lat. Overflakke, 12 m. S.E.E. Breda, on the Haringvliet; with a church, a school, a harbour, and a little trade. Pop. 368.

STADE, a m. Hanover, cap. landroost, on the Schwinge, here crossed by a bridge, about 4 m. above its confluence with the Elbe, 21 m. W. Hamburg. It is a place of some strength, being surrounded by walls with four gates, and otherwise fortified. It is divided into four quarters; contains three churches, a granary, a normal seminary, and a house of correction, and has some shipping and general trade. P. 1814.

—THE LANDROOST area, 169 ges. ac. on bordering on the Hamburg territory the Elbe, gov. Lüneburg, the Aller and Weser, and the N. Sea, is monotonously flat, and lies so low as to require the aid of strong embankments to protect it from the tides. Much of it is so marshy as to be unfit for arable culture, but much of it also is a rich alluvium, on which heavy crops are raised. Its inhabitants are almost all Protestants. Pop. 263,916.

STADHAMPTON a vil. and par. England, co. Oxford, 5 m. N. Henington; the birthplace of John Owen, the celebrated Nonconformist divine, and vice-chancellor of the university of Oxford during the commonwealth. Area of par., 639 ac. Pop. 401.

STADT ILK, a to Germany. See ILK.

STADT-SOZZA, a to. Saxo-Wuimar, 15 m. N. N. Wuimar; with a castle, salt-spings, and two mills. Pop. 1289.

STADTAMHOF [Latin *Riparia*] a to. Rararia, Upper Palatinat, r. bank Danube, which here receives the Regen, forms an island, and is crossed by a bridge communicating with Ratisbon, of which Stadlamhof may be considered a suburb. It has a church on Augustine monastery, two hospitals; numerous breweries, two mills and some shipping trade. Pop. 2039.

STADTHAGEN a to. Germany, principally Lippe-Schumburg, 9 m. N. E. Bieleburg. It is walled; has three gates, two churches, one of which contains the tombs of the princes of Schaumburg, a Latin school, and a mineral-spring. Coal is worked in the vicinity. Pop. 1915.

STADTLI, or **STADTLECHEN**, a vil. Bohemia, circle Rakonitz, 12 m. from Beraun. It has a church, a school, tile-works, and a mill. P. 968.

STADTLOHN, or **STADT LOKA**, a to. Rhineland Prussia, gov. and 80 m. W. Münster, with a church, manufactures of linen, earthenware and tobacco-pipes, numerous bleachfields, and an extensive trade in linen and cattle. P. 2270.

STADTOLDENDORF a to. Brunswick, on a hill, S. E. Brunswick. It is walled; has three gates, a church, and manufactures of linen. Pop. 2149.

STADTSELNACH a to. Bavaria, Upper Franconia, on the Steinach, 15 m. N. Bamberg, with a church, a chapel porchouse, and the ruins of an old strong castle, blast-furnaces, and other iron-works, and several mills. Near it are quarries of marble and serpentine with polishing and cutting machines. Pop. 1300.

STADSEN, a vil. and com. Belgium, prov. W. Flanders, 18 m. S. E. W. Bruges, with manufactures of linen, a tobacco-factory, a rope-works, and several breweries, tanneries, and corn-mills. Pop. 4695.

STAFFA a vil. and par. Switzerland, can. and 18 m. S. E. Zürich, N. shore of Lake Zürich; with a church, and manufactures of silk and cotton. Pop. (agricultural), 8508.

STAFFA a small but celebrated isl. Scotland, co. Argyll, one of the Inner Hebrides, 6 m. to 8 m. W. Mull, lat. 56° 29' N. lon. 6° 21' W. It is of an irregular oval shape, about 1½ m. in circumference, presenting an uneven table-

land, the arches and floorings of the caves, strongly resemble architectural designs, and have been described by terms taken from the works of art. The coast is indented with numerous romantic caverns, of which the most remarkable is Fingal's

ENTRANCE TO FINGAL'S CAVE, STAFFA.

Cave the opening into which is a magnificent archway, 66 ft. high at mean tide, supporting a massive entablature of 30 ft. additional and receding for 237 ft. inwards, the entire front, as well as the great cavernous sides being composed of countless complicated ranges of gigantic columns, beautifully jointed, and of most symmetrical though somewhat varied forms. A deeply channelled fissure, parallel to the sides, extends along the whole length of the ceiling, which is ornamented by pendant clusters of columns, whitened with calcareous stalagmites. As the sea is so entirely able from this cave, it forms its constant flooring, along which in calm weather a boat may be pushed. The water at the entrance is 18 ft. deep at the inner extremity about 9 ft. The average diameter of the basaltic columns throughout the island is about 2 ft., but they often extend to 8 ft. and even 4 ft. Their general forms are pentagonal and hexagonal, but the number of sides is sometimes increased to seven and nine, and they are rarely found rhomboidal or triangular. In position they are sometimes erect, sometimes oblique, and not infrequently horizontal, while they are often curved, and variously jointed and complicated. There are several other caves along the coast of the island of which the most noteworthy is called Clam-shell Cave, from the peculiar curve in which the basaltic columns recline, giving it somewhat the appearance of a pocket-shell. It is 80 ft. in height, 16 ft. to 18 ft. broad and 130 ft. long; its lateral dimensions gradually contracting as it recedes from the opening.

STAFFELSTEIN, a to. Bavaria, Upper Franconia, on the Laster 12 m. N. Bamberg. It has a church, three chapels, and an hospital, manufactures of woollen cloth, and several mills. Pop. 1181.

STAFFORD, a co. England, bounded N. by Cheshire, N. E. and E. by Derbyshire, S. E. by Warwickshire, S. by Worcestershire, and W. by Shropshire, greatest length, N. to S. 65 m. central breadth, 35 m., area, 750,800 acres, or 1220 sq. m. The surface in the N. consists chiefly of wild moorlands rising in several parts more than 1000 ft. above sea-level, and formed of several long ridges, which terminate what has been called the Pennine chain of England, and are separated from each other by deep valleys sloping more or less gradually towards the Trent. The midland and S. parts of the county are much less elevated, and generally of a much more pleasing description, consisting for the most part of level lands, diversified by gentle undulations, though occasionally rising into loftier heights, as in Tenter's Hill, one of whose peaks exceeds 900 ft. By far the finest part of the county is the valley of the Trent, which traverses it N. W. to S. E. and both by its main stream and its nume-

THE CLAM-SHELL CAVE AND ISLAND OF BOUGAINVILLE, STAFFA

rated resting on cliffs of variable height. Greatest elevation, 144 ft. It is composed of a fundamental ledge of rocks of conglomerated trap or tuff, to which succeeds a grayish-black, hard, and compact columnar basalt, which is covered by a mass of shapless basalt of the same description, with small columns interspersed through it. The whole facade of the

rons tributaries, has been made available for a chain of canals, which give the county the benefit of direct water-communication with the Mersey, Humber, Severn, and Thames. The geological formation most largely developed is the new red sandstone, which occupies the whole of the central part of the county, but in the N and S. gives place to two valuable coal-fields—the one in the N. called the Pottery coal-field, from the number of potteries which have been established upon it, and the other in the S. usually known as the Dudley coal-field, and celebrated also for the extraordinary thickness of one of its seams, the excellence of the coal for iron-making, and the number and richness of its iron-ores. From beneath the N. coal-field the coarse sandstone, called millstone-grit, crops out and covers a considerable district of the S. coal-field, particularly in the neighbourhood of Dudley crags on mountain-timons. The climate is characterized by great coldness and humidity making too harvest both late and precarious. About three-fourths of the whole surface is arable but much of the soil is of a cold, clayey nature, fit only for the hardiest crops which, according to a very successful system of agriculture, are often sown three years in succession, the land being then, while full of weeds, laid down to grass. In other parts a much better system is pursued and proper rotations are observed. This is particularly the case in the S. where the best land occurs, and fertile loams, of a gravelly sandy or calcareous nature, admit the adoption of the Norfolk husbandry. Along the banks of the streams are many rich meadows, natural or artificial, but neither grazing nor the dairy forms a very important branch of rural economy. The manufactures, chiefly of china and earthenware in the N. and of iron in the S., are so important as to form among the greatest assets of their respective branches in the kingdom. The former occupying the extensive and populous district of the Pottery, owes much of its prosperity to the enterprise and ingenuity of the late Josiah Wedgwood, the latter includes the iron manufactures, in all its branches, from the mining and smelting of the ore to its conversion into malleable iron and steel, and then into various kinds of ironmongery. In carrying on this important trade, Staffordshire has the benefit not only of the chain of canals already mentioned, but of a large railway development, the London and Northern traversing it in a N. W. direction from Dalton, and sending out the Shrewsbury and Birmingham, the Trent Valley and other branches, which connect it with the N. Staffordshire and Midland lines. The principal towns are Stafford (the capital), Lichfield, Walsall, Wolverhampton, Dudley, Tamworth, Burton upon Trent, Uttoxeter, Chesley, Hanley, Burslem, and Newcastle-under-Lyme. The political division of the county is into N. and S. Staffordshire, each of which sends two members to the House of Commons. Pop. 608,716.

STAFFORD a town and port bar and market tn. esp. above so, pleasantly situated 1. bank S.W. near the junction of the North-Western railway with the Trent Valley branch 123 m. N. W. London. It was surrounded by walls which existed till the last civil war when they were completely demolished by the parliamentarians, is entered from the London road by a handsome bridge, and is in general well built, consisting of two principal and several minor streets, well paved, lighted with gas, and lined with brick-houses, covered with slate. The supply of water is abundant. The environs are pleasant, and studded with handsome mansions and villas. The principal buildings and objects of interest are these: Elizabethan churches, two of them parished, and one of them a large and the old eastward structure, recently repaired, with an octagonal tower several richly-decorated windows, and many ancient and modern monuments; Freshwater, Quaker, Independent, Old and New Congregational Methodist, Baptist, and E. Catholic chapels; a well-endowed free grammar, and British, national, and ragged schools; a mechanics' institute the castle, situated about 1½ m. S.W. of the town, and recently rebuilt on its ancient site a handsome modern county-hall a county jail and house of correction, an infirmary, lunatic asylum, and theatre. The principal manufactures are leather for which there are several large tanneries, and boots and shoes made to some extent, both for the London market and for exportation. The breweries, like many others in the county are famous for their ale. Races are held in October, on Marston Common. The borough is governed by six

aldermen and 16 councillors; and has sent two members to Parliament since the time of Edward I. Pop. 11,839

STAFFORD, a tn., U. States, Connecticut, 25 m. N.E. Hartford, at the junction of the Farmington and Willimantic rivers, and on the New London, Willimantic, and Palmer railways. It has a large square in its centre, and contains several churches; has manufactures of cotton and woollen goods, machinery, carpenter tools, and other cutlery, leather, and pistols. The hog-worm, abundantly obtained in the neighbourhood, supplies several factories; and the chalybeate-springs, considered among the most efficacious in the U. States, attract many invalids and other visitors. Pop. of township, 3941

STAFFORDSTOWN, par. Incl. Month, 617 ac. P. 51 STAGLIENO a vil. and com. Italy Piedmont, dt. and about 3 m. S. Genoa, r. bank Bioglio with two churches and a handsome palace. Pop. 1984.

STAGNO-GRANDI, or STAGNO, a tn. Dalmatia, Croatia and 25 m. N.W. Ragusa, on the peninsula of Raboncello. It was formerly surrounded by strong fortifications, but is now only defended by a castle in good condition. It has a court of justice, and several public offices, a church, a sail-dock, and an excellent harbour at which a considerable trade is carried on. Near it are extensive salt-works. Pop. 5490.

STAGNONE, a group of lakes in the Mediterranean W. coast Sicily, from which they are separated by a narrow channel, 19 m. S.S.W. Trapani. The principal are Buono, Favilla, and Cardillo. The last, which is the largest, is about 2 m. long, by rather less than 1 m. broad, and both it and Favilla are each defended by a tower.

Pop. 616.

STALLUPÖHNNEN a tn. Prussia, prov. E. Prussia, gov. and 16 m. E.N.E. Grauballen, with a court of law a church, manufactures of linen, and several mills. Pop. 8076.

STALYBRIDGE, a market tn. England, co. Lancaster and Chester, 7 m. E. Manchester, on gentle declivities on both

banks of the Tamsa with three principal streets, one of which the oldest, is very irregular; the other two straight and well kept, houses mostly built of brick, and two stories in height; well supplied with water, and is lighted with gas. There are three churches and nine chapels, the latter belonging to Wesleyans, Primitive, Baptist, R. Catholics, &c. None of the buildings are deserving of particular notice; the oldest and most remarkable is the chapel of ease, an octagonal structure, built upon a rock rising perpendicular from the Tamsa. The only other public building is the market-house, erected 1881, at a cost of £2500. All the different religious denominations have Sunday-schools in connection with them, besides which, there are 18 day-schools, a British and several dame schools, a mechanics institute, with library and reading-room; and some sick and burial societies. Spinning cotton yarns and weaving calicoes are the principal manufactures carried on here. There are 19 of these establishments giving employment to 9500 hands. Some of them are very extensive, employing from 1000 to 1400 persons each. There are also two calico print-works, six iron-forges and machine and millwright shops. Stalybridge is particularly well supplied with railway communication. On Manchester, Sheffield, and Lincolnshire, and the Lancaster and Yorkshire, have each a branch to the town, while the Manchester and Leeds division of the London and North-Western passes through it. Pop. (census of 1851) 30,780 but including that portion of the town which is in the parish of Dukinfield, 25,000 to 26,000.

STAMBOUL, cap. Turkey. See CONSTANTINOPLE.

STAMBOURN, par. Eng. Essex 1842 ac. Pop. 564. STAMBRIDGE, two pars. Eng. Essex —1, 1, (Green), 1870 ac. Pop. 809 —2, (Lodge), 600 ac. Pop. 158.

STAMBRUGER, cap. Belgium a vil and com. Belgium, prov. Hainaut, 11 m. W. N. W. Mons with manufactures of woollen stuffs and tobacco two breweries, several large stone-quarries, and four limekilns. Pop. 2063.

STAMFORD, a market to. and par. bor. England, co. and 39 m. S. Lincoln, pleasantly situated on a slope above the Welland, here crossed by an ancient and a handsome new bridge, and on a branch of the Great Northern railway. It is an ancient and irregularly built, consisting of substantial houses of freestone, roofed with slate is well paved, well lighted and amply supplied with water, and has among its buildings five parish churches one of them All Saints, an ancient and handsome structure, with a lofty embattled tower and octagonal crocketed spire another, St. Mary's, also ancient, with fine specimens of early English architecture and a third St. John's, with a fine wooden roof and screen; Independent, Wesleyan, and Reformed Methodist, and R. Catholic chapels, well endowed grammar and blue-coat, and various other schools, a large town-hall and house of correction, a theatre, general and other hospitals, a literary and scientific institute, with a museum, public baths, and numerous charities. There are no manufactures of any consequence, but a large maling business is carried on the two weekly markets, particularly one for corn are very important, and numerous cattle-fairs yearly for fat stock, are well attended. Besides the railway, which gives communication with all the great lines of the kingdom, the Welland affords a good outlet, being navigable for boats and barges. The bor. sends two members to Parliament. Pop. 18,680.

STAMFORD —1 A vil and township, Canada West co. Welland, about 8 m. N. W. of the Falls of Niagara; with Episcopal, Presbyterian, and Wesleyan Methodist churches. Hops are successfully cultivated in the vicinity. Pop. (1882) 3113. —2, A vil and township, U. States, Connecticut, near the mouth of the Mill, on the New York and New Haven railway 34 m. E. by N. New York. It has several churches, a wire-factory, lumber-yard, foundries, and mills, a harbour admitting vessels drawing 6 ft. water, and an active trade. Pop. 5004.

STAMFORD-BARON ST. MARTIN, par. Eng. Northampton, 2170 ac. Pop. 1778.

STAMFORDHAM, a vil and par. England, co. Northampton, 13 m. N. W. Newcastle with an ancient church in the early English style, a Presbyterian and a Wesleyan chapel, and two schools. Area of par., 18,066 ac. Pop. 1781.

STAMMERHEIM, a vil. Württemberg circle Schwäbisch, on the Neckar; with a church and a mill. Pop. 1156.

STAMPALIA, or STAMPALLA [anc. *Aspeltis*] an isl. Grecian Archipelago, in the S. Cyclades, nearly equidistant from Naxos and Rhodus; lat. 36° 30' N.; lon. 26° 30' E.; greatest length 4 E. to E. W. 12 m.; mean breadth, 2 m. It is very irregular in shape, indented into bays, several of which form good harbours and surrounded by a great number of rocky islets. The surface is mountainous, but the soil is generally fertile. One of the greatest drawbacks on the island is the want of good water. There are several villages, of which those of St. Andrew and Livorno, both with good ports, are the largest. Many of the inhabitants live by fishing. STAMPFEN SPRING, or STAMPFEN, a market in Hungary, co. and 10 m. N. W. Pressburg with a castle, surmounted with towers and surrounded by gardens, a church and synagogue, a copper and iron mill and both marble and slate quarries. Fine crystals are found and polished here, chiefly by Jews. Pop. 3874.

STAMHALL, or STAMVALL, a group of islets in the Ioulen Sea, nearly equidistant from the W. coast of the Morea and the E. extremity of Zante lat. 37° 15' N.; lon. 21° E. The largest are the Harys and the Convent, the latter so called from containing a Greek monastery. The soil produces are olives and other fruits. The group is included among the Ionian Islands.

STAMULLIN par. and to. Ire. Meath 5144 ac. 1 1038.

STANGEODORF or WAXDULA a vil. Austria, Moravia about 2 m. from Zwettl with a church. Pop. 1272.

STANHOE par. Eng. Norfolk 1469 ac. Pop. 617.

STANHOPE a to. and par. England, co. Durham, on the Wear, near the terminus of the Pontop and South Shields railway 8 m. N. W. Wolsingham. It has a parish church, on a high above the town with a massive tower, probably used in early times as a fastness, a chapel of ease, and various Dissenting chapels, extensive limekilns, valuable lead-mines, and a little coal. Bishop Butler was rector of Stanhope, which is one of the most valuable livings of the church of England, and is said to have here composed his celebrated *Analogy of Religion*. Area of par., 54,870 ac. Pop. 8882.

STANION par. Eng. Northampton 1860 ac. Pop. 965.

STANISLAU —1 A river L. States, California, formed by three forks from the Sierra Nevada, flows W. and falls into the San Joaquin at the town of that name. It has numerous affluents. —2 A vil or t. bor. above strike, 21 m. S. by E. Stockton, an important station for the distribution of passengers and merchandise destined for the mines of Stanislaus, Tuolumne, &c.

STANISLAUWOW, a to. Austria, Galicia, between two arms of the Rustrin, which unite at a short distance below

71 m. S.E. E. Lough. It has a civil and criminal court, a R. Catholic, Anglican, and several Greek churches, a gymnastic, gymnasium, and head school for the clergy; and has an important general trade. Pop. 9200

STANLEY, a vil and ecclesiastical dist. England, co. York (W. Riding) par and about 2 m. N.E. Wakefield, of which it may be considered as the N. suburb. The village stands on the W. bank of the Calder, among scattered hamlets and agreeable villas. The church is a handsome structure in the Decorated style, with two towers; and simple means of conveyance are afforded by the Aire and Calder canal, which here crosses the river by a magnificent aqueduct. The pauper female system of the W. Riding, with accommodation for 500 paupers, is in the district. Pop. 7257

STANLEY, a manufacturing vil. Scotland, co. and about 8 m. N. Perth, a bank Try. neatly built, inhabitants chiefly employed in the extensive cotton-works adjoining

STANLEY (Kiln) a vil. and par. England, co. Gloucester and Bristol railway 3 m. W. by 8 Strand. It has an ancient and handsome church, a Baptist chapel, two national schools, extensive mills for the manufacture of woollen cloth, and an annual fair. Area of par., 1679 ac. Pop. 3005

STANLEY FORTRESS par. Eng. Gloucester 960 ac. Pop. 445

STANLEY (PORT) see FAIRFAX LEADS

STANLEY (PORT OF) a town and port of entry Canada West at the mouth of Kettle Creek, N. shore, Lake Erie, co. Elgin 110 m. from Hamilton. It possesses one of the best harbours on Lake Erie, and is the port through which an extensive and fertile district receives its principal supplies of forage, and exports its surplus of domestic produce. The Bank of Montreal has an agency here and there are two Protestant churches, and three schools. Pop. about 1000

STANLEY-SPR-LEWAND a vil and par. formerly a market in England, co. Gloucester near the Severn Navigation and the Gloucester and Bristol railway about 4 m. W. E. W. Strand. It has an interesting ancient church, in the form of a cross, with a low tower rising from its centre the remains of a Benedictine priory and manufacture of woollen cloth. Area of par., 1079 ac. Pop. 861

STANMER par. Eng. Sussex 1346 ac. Pop. 120

STANMORE (GRAY AND LITTLE) two nearly contiguous vils. and par. England, co. Middlesex about 10 m. N. W. London. In Great Stanmore there are, besides the parish church an independent chapel, and a house built on the site of a school, in which the celebrated classical scholar Dr Parr was at one time teacher. At a short distance from Little Stanmore there is a splendid chapel, with paintings by Laguerre, built by the Duke of Chandos whose splendid mansion of Canons was within the parish. In this mansion Handel resided as chapel-master and is said to have composed his Esther for the consecration of Stanmore church. Area of Great Stanmore, 1441 ac. Pop. 1190. Area of Little Stanmore, 1552 ac. Pop. 611

STANNERN or STONARNOW, a market tn. Austria, Moravia, circle and 9 m. S. E. of the N. extremity of a small lake. It contains a parish church and is remarkable for the red-stones which fall near it in 1807. Pop. 1040

STANNINGFIELD par. Eng. Suffolk 1455 ac. P. 950 **STANNINGFIELD** a hamlet, England co. York (W. Riding) 5 m. W. by N. Leeds, with a handsome modern church, in the Norman style manufacture of woollen and worsted goods iron-works, and stone-quarries.

STANWINGTON, a vil. and par. England, co. Northumberland, 5 m. S. by E. Morpeth with a church which possesses some fine specimens of stained glass, a Wesleyan chapel, an endowed school, seams of coal and freestone-quarries. Area of par., 10,093 ac. Pop. 1000

STANVOY, or JAMVOY, a mountain-chain in N. E. of Asia, which breaks off from the ranges in the N. of Mongolia, proceeds first E. N. E., forming the boundary between Nubia and Manchuria, then N. N. E., almost skirting the Sea of Okhotsk, and is continued, though with gradually diminishing height and partial interruption, to the desert of Behring's Strait. The whole length of the chain has been estimated at not less than 3000 m. The most important branches are the range which is particularly developed near the shores of Lake Baikal and then proceeds N. between the lakes of the

Tanai and Lena; another which detaches itself much further N., and stretches between the basins of the Lena and Indigirka; and a third, but still more remarkable range, which proceeds S. through the centre of the peninsula of Kamtschatka, and may be considered as forming one of the links of a vast chain of volcanoes. The chain however, taken as a whole, is more remarkable for its length than for its height. Below the parallel of 60° the summits are covered with snow only during part of the year, and up to the parallel of 55° are generally clothed with dense forests. Between 55° and 68° trees begin to become rare, and are seldom met with except in very sheltered forms in higher latitudes. The Stanvoiy gives rise to a great number of important streams. Of these few of great magnitude descend from the S. and N. side of the chain, except the Amoor and the Amurid the N. and W. side furnish either the sources or the principal feeders of the Yenisei, Lena, Indigirka, and Kolima. The whole chain appears to be rich in metallic deposits, including gold, copper, and iron, &c. The most valuable yet found is in the district of Nerchinsk, forming the E. part of the Russian gov. of Irkutsk, where, in addition to large quantities of gold, many precious gems also are obtained

STANNFIELD par. Eng. Suffolk; 1089 ac. Pop. 506. **STANNFIELD** three pars. Eng. — 1 Kent 1956 ac. Pop. 440 — 2, Suffolk, 1163 ac. Pop. 412 — 3, (St. Margaret) Herts. 360 ac. Pop. 37

STANSTEAD, a vil. in Canada East, cap. co. of same name, 100 m. from Montreal, within a few miles of the U. States frontier. It is a port of entry, and has a large and increasing business. Pop. about 800

STANSTEAD (AMORZ) a vil and par. England, co. Hertford about 3 m. E. N. E. Hoddeston, with a parish church of the 16th century, a free grammar-school, almshouses, and the remains of Rye House, famous as the scene of the plot which bears its name, and was held in 1683 against Charles II. and the Duke of York. Area of par., 5594 ac. Pop. 914

STANSTEAD Mottramshire a vil and par. England, co. Essex, on the railway from London to Cambridge. It has a number of well-built houses, a small ancient church with a brick-tower and some interesting monuments; and an independent chapel. Area of par., 4198 ac. Pop. 1719

STAROBOW, a small port, England, on Devon, r bank Exe, at its mouth in the English Channel, and on the S. Devon railway which has been a station, rather more than 1 m. W. by N. Barnstaple. It is well built, and has a district church, a beautiful ancient chapel, and a commodious quay, at which

court of law and several public offices; and has manufactures of woollen and linen cloth, hosiery, leather, hats, and soap, and six annual fairs. Pop. 13 425 —2, A tn. Prussia, prov E. Prussia gov and 28 m. S. Danzig r bank Perva. It has a court of law several public offices, a Protestant and a R. Catholic church a burgher-school and hospital tanneries, distilleries, and breweries. A battle was fought here in 1807 Pop. 4176 —3, A tn. Mählenburg-Schlesien, on a small lake 14 m. N.E. Riga with a castle, situated on a beach, a parish church, a synagogue burgher-school, aquatic asylum, and workshops and manufactures of leather, straw hats, wax tapers and polacco. 1 op. 1410

STARITZA a tn. Bussia, gov and 42 m. W.S.W. Tver, on the Volga, here crossed by a flying-bridge, at the confluence of the Staritsa. It contains six churches and a convent, and has a considerable trade in corn and hemp the latter with St. Petersburg and a large annual fair. Pop. (1843) 8308.

STAROKHNAIA, a tn. Botsen, Austria and 27 m. N. Budechov near 1 bank here in a valley of the same name, with a church a castle, manufactures of linen, and a considerable trade in thread. Pop. 2056.

STARKEBURG a prov. Hesse-Darmstadt, bounded, N. by territory of Frankfurt-on-the-Main and Hesse-Cassel, E. Bavaria S. Baden W. prov. Rheinhessen, from which it is separated by the Rhine, and N.W. Nassau, from which it is separated by the Main, area, 877 sq. eq. in. The surface on the E. and S. is covered by the Odenwald but in the W. and N. particularly towards the river which bounds it, consists of extensive plains. The principal streams of the province are the Weesbach, Modan, and Schwab, affluents of the Rhine, and the Mümling and Gersprenz, affluents of the Main. The soil, though often light is generally fertile, and raises large crops of barley, millet, and potatoes, both satisfying the home consumption and leaving a large surplus for export. Flax of superior quality is raised, and unions of other vegetables are grown on an extensive scale. Chestnuts and walnuts also are abundant, and form a considerable article of trade. It is divided into 14 *Landrichters*, of which Darmstadt is the capital. About two-thirds of the inhabitants are Protestants. P. 233,707

STARO-CZERWONOW, a tn. Russia, gov Volynia, 72 m. W. B. W. Jitomir. Many of the inhabitants are Jews, who carry on a considerable trade. Pop. (1843) 15,007

STAROBIELEK a tn. Russia, gov and 170 m. S. Voronej, on the Aider. It has an active trade. P. (1842), 1823.

STARODOL, a tn. Russia, gov and 109 m. N.E. Gerasimov, on the Babitsa, with several churches and a monastery, manufactures of leather and copper-ware, a bell foundry; and an active trade with St. Petersburg and Riga in hemp, hemp-seed, flaxseed, mastic, resin, brandy honey, and wax. STATEN ISLAND—1 An Isl.
 U. States, New York, separated from
 Long Island by the narrows which
 form the entrance to New York har-
 bour and from New Jersey by Staten Island Sound, about
 1/2 m. broad. It is 14 m. long, and 4 m. to 8 m. broad;
 contains numerous villages, and many elegant country-seats,
 and has constant communication with New York by steam
 ferry-boats. At its N.E. point is the quarantine station for
 the port of New York. The fisheries on its coasts are pro-
 ductive.—2 An isl. S. America, off E.E. coast of Terri-
 del-Puego extending 23 m. N. F. to W. S.W. between
 Cape St. John and Cape St. Bartholomew, and separated
 from the mainland by the Strait of La Motre. lat. (E. point)
 54° 42' 45" S. lon. 65° 45' 30" W. (a) Its surface is ex-
 tremely mountainous and rugged, some of the summits rising
 to the height of 3000 ft., and usually retaining a covering of
 snow. It is densely covered with evergreen bushes, and other
 shrubs and plants, the vegetation of which is greatly promoted
 by the humidity of the climate. Few days pass without rain
 and the low ground is in many places so swampy and boggy
 as to form a perfect morass. The temperature, though
 usually low, varies little throughout the year and thunder
 and lightning are scarcely known. It contains several good har-
 bours, the best of which, Port Cook is on its E. coast.—3 Isl.

 formerly fortified. It is bounded N. and E. by two little
 streams and has a neat townhouse, two churches and a Latin
 and other schools. Stavem is the oldest and was once the
 most important town in Friesland, a pre-eminence due to the
 energy of its inhabitants in prosecuting maritime trade, and
 especially to the boldness with which they showed the other
 western nations the practicability of entering the Baltic by
 way of the Sound, and the privileges thus obtained and
 to her position at the entrance to the Zelder-Zee, across which
 as late as A.D. 1230 a boat might be pulled to Eshausen. It
 was also one of the oldest Hanse towns. The sea, breaking a
 deep passage into the Zelder-Zee, and thus rendering her
 position less advantageous—the silt up of her harbour, and the
 disasters of inundation—repeated fires, one of which de-
 stroyed 339, and another 500 houses—and ravages by war
 and by pirates, have reduced her to her present insignificant
 state. P. 533

STAVROPOL, two places, Russia.—1 A tr. cap. gov.
 Caucasus, 410 m. E. by N. Sevastopol, 1 m. back Anzlia,
 an affluent of the Kuban, in a fertile district. It consists of wide
 and well-formed streets contains three churches, and has
 manufactures of soap and leather and a considerable trade.

STETTEN (am Kitten Markt) a market tn. Baden Lake circle, about 6 m N.W. Sigmaringen with a church. Pop. 1017

STETTIN, a g. Prussia prov Pomerania, bounded N. by the Baltic, E. by Kistlin 8 Frankfurt and Potsdam, and W. Stralsund and grand duchy of Mecklenburg area, 2819 geo. sq. to The surface consists almost through out of a low flat, broken occasionally by hills of gentle elevation, and protected on the N. from the encroachment of the sea by a range of sand hills or dunes. More than one-third of the

whole is arable land of tolerable fertility about one-fifth is in wood, and nearly another fifth in heath and meadowy pasture. One remarkable feature of the government is the number and magnitude of its lakes, consisting chiefly of a series of expansive arms of the Oder as it approaches its termination in the Baltic. That river traverses the government in a N.E. direction, and either directly or by its tributaries and the expansive or high already referred to, receives the greater part of its drainage. In the N.E. a number of small streams send their waters directly to the sea. The principal crops are rye, barley, oats, pulse, and buckwheat. The average return does not exceed one in four. Flax and tobacco are extensively sown and here only occasionally grown. The produce of fruit is considerable; and the forests furnish ample supplies of wood both for timber and fuel, though for fuel more dependance is placed on the innumerable fields of peat spread over the government. Domestic animals are numerous and the rearing of horses, cattle, sheep, goats, swine, and poultry particularly common, forms an important occupation. Fish abound both on the coast and in the rivers and lakes. The only mineral of any importance is iron which supplies a few blast-furnaces. The principal manufactures are woollen and linen goods, hosiery hats, leather boots and shoes. Ship-building, also, is carried on to some extent. For administrative purposes the government is divided into 12 districts, of which that of Randow, at containing the town of Stettin, may be considered the capital. The inhabitants are almost all Protestants. Pop. (1849), 562,197

Vol. II

STETTIN (Latin, *Stettin*) a tn. and port, Prussia, cap. prov Pomerania, and gov. Stettin, on the Berlin and Stettin railway and 1 bank Oder have crossed by two wooden bridges, connecting the town with its large suburb Lastadie, 78 m N.E. Berlin. It is a place of great strength, being both surrounded by walls and defended by a citadel and several forts and outworks. It is entered by five gates, and possesses five large squares, the principal one adorned with a marble bust of Frederick II. and a great number of well built and well-

paved streets. It is the see of a Protestant bishop, and the seat of a superior provincial court and a number of important public offices and contains a royal castle, in which the old dukes of Pomerania resided, with a chapel, in which their remains are deposited. Five Protestant churches, a E. Catholic chapel a townhouse of the 18th century a gymnasium with a library, observatory and museum attached, a courthouse, amuseur theatre, normal, industrial, bourgeois, navigation and other schools a workhouse, orphan asylum several hospitals, and other benevolent endowments. The manufactures consist of woollen, linen, and cotton tissues, serge, ribbons, hats, cartrivans, and common leather. There are also a great number of famous breweries, sugar-refineries, vinegar-works, and building-yards, in which a great number of vessels are built. The shipping and trade are of very great importance, Stettin ranking, in this respect, as the first port of Prussia. The following table exhibits the arrivals and departures of vessels (exclusive of steamers), with their tonnage, at Swinemünde the port of Stettin in the years 1845-50, 52-58 and 1865—

Years	Arrived		Departed	
	Vessels	Tons	Vessels	Tons
1845	1190	140,090	1090	100,337
1850	1381	254,467	1408	379,866
1852	1462	280,72	1645	396,680
1854	2027	361,616	2016	397,572
1865	2679	561,333	2634	680,174

The value of the imports in 1849, was £1,657,984 of the exports £291,478, in 1864, £2,388,810, and £1,957,408 respectively. The principal articles of import were iron and copper dye-woods, harrings, salt coal train and other oils, sugar, cotton and other colonial produce. The principal exports were grain, wood, stiches, size and brandy. Characterize the Great and Maria Fedorovna, wife of the Emperor Paul) were born here. Stettin is a place of great antiquity. It originally belonged to the Slidini, a heathen tribe. In 1121 Boleslas, Duke of Poland gained possession and introduced Christianity. The peace of Westphalia gave it to the Swedes. From then it passed to the Prussians with whom though not without some interruptions, it has since remained. In 1171 it was besieged by the Danes, in 1677 by the Elector of Brandenburg. In 1713, by the Russians and from 1808 to 1813 it was occupied by the French. Pop. (1816) 25,081 (1849) 47,302 (1865) 70,759.

STETTIN a lagoon Friesland. See Hare.

STETTIN (Nev.) a co. Francis, prov. Pennsylvania, gov. and 39 sq. m. S.E. Klein, pop. circle, between lakes Stearns and Vilas. It has a court of law and several public offices, a church, castle, gymnasium, hospital, and poorhouse. Manufactures of woolen and linen cloth, serge, hats and leather, a trade in cloth, meat, and cattle. U. S. Station, Ohio 31 m. W. by S. PITTSBURGH, on the Ohio river, here about 1/2 m. wide, in an elevated plain with county buildings, 12 churches, an academy, five wool and two cotton factories, a paper-mill, two glass-works, several machine-shops and foundries and large manufactures of copperware. It has an extensive trade and in the vicinity are inexhaustible supplies of coal. P. (1850), 6139. STEUBOWITZ (Gauze and Klein) two nearly contiguous vils, Austria, Moravia, circle Brunn, near Zograbb, with a church. Pop. 1552.

STEVENAGE, a tn. and par. England, co. and 12 m. N. W. Hertford. It has a church, finely situated on a height. Wesleyan and Independent chapels, a grammar and a national school, manufactures of straw-plait, and a trade in slaughtered cattle, chiefly for the London market. Area of par., 4434 ac. Pop. 2118.

STEVENSTON a market tn. and par. Scotland, Ayrshire, dist. Cunningham, 52 m. S. W. Glasgow. It is well built, and has a handsome parish church, finely situated on a height above the town. Free and U. Presbyterians churches, a public library, a parochial and other schools. Many of the inhabitants are handloom weavers, and others are employed in the collieries and stone-quarries of the vicinity. The sawing of shivered wood employs a considerable number of females. Pop. in 2005. Area of par., 5 m. by 5 m. Pop. 8611.

STEVENTON a vil and par. England, co. Berks, on the Berks and White canal, and the Great Western railway which has here a station, 5 m. S. W. Abingdon with a church, a Baptist chapel, an endowed school and an ancient cross. Area of par., 5338 ac. Pop. 978.

STEVENTON, par. Eng. Hants 2100 ac. Pop. 187. STEVENINGTON, or STEVENTON, par. Eng. Bedford; 1960 ac. Pop. 668.

STEWART, island See New Zealand.

STEWARTON a bor. and par. Scotland, Ayrshire, dist. Cunningham. It bank Annot, here crossed by a good stone-bridge, and on the Scottish South-Western railway, 10 m. S. W. Glasgow. It consists of a main street nearly 1 m. long, and several narrow streets, lighted with gas, and of houses mostly well-built, and many of them with gardens attached; and has a handsome parish handloom Free, U. Presbyterian, and Independent churches, a parochial and other schools, a public library, townhouse, and jail. The chief manufactures are Highland homes and carpets, both made to some extent here, ordinary and damask cottons and silk goods, and steel clock-work, and there are also several mills for spinning and carding wool, hank and the works. Pop. in, 8164. Area of par. 10 m. by 4 m. Pop. 4523.

STEWKEY par. Eng. Bucks, 4880 ac. Pop. 1492.

STEWTON, par. Eng. Lincoln; 973 ac. Pop. 79.

STYRIA, a river, Austria, rises on the N. foot of the Styria, in a mountainous district of Upper Austria. It flows very accurately N. W. E., as the river of same name, joins 1 bank Enns, after a course of about 45 m. Great quantities of timber are floated down its stream.

STEYER a tn. Upper Austria, at the confluence of the Steyer with the Enns, 18 m. S. E. Linz. It consists of the town proper, which stands between the two rivers, surrounded by crumpled walls flanked with towers; and of two suburbs, with each of which it is connected by a bridge. Many of the houses are handsomely built in the Italian style; and of the three squares, the principal one is both large and elegant and adorned with fountains. The principal edifices are the town church, built after the model of St. Stephen's, Vienna, the church and monastery of the Dominicans, the latter now converted into a factory of Manchester goods; the old and new townhouses, with a collection of antiquities and other curiosities; the old castle, seated on a rocky height behind the town; the old Jewish college, barracks, theatre and three hospitals. The principal manufactures are cutlery, and various articles of steel and hardware, Steyer being the Austrian Sheffield. The only other manufactures of any note are calicoes, needlework, hosiery, and wax. As capital of the circle of Traun, Steyer is the seat of several provincial courts and offices. Pop. (1846), 10,198.

STYERMARK, prov. Austria. See STYRIA.

STYENING a market tn. and par. England, co. Sussex, at the foot of a lofty height above the Adur, here crossed by a bridge. It has a Congregational Methodist chapel, a free grammar and a national school, a mechanics institute, manufactures of parchment, two breweries, and corn-mills. Till disfranchised, Styening returned two members to Parliament. Area of par. 8883 ac. Pop. 1464.

STEYNTON, par. Wales, Pembrokeshire 7275 ac. P. 8616. STEZZANO (anc. Stetisum) a vil. and com. Italy Lombardy, 5 m. S. Bergamo with a handsome church, adorned with some good paintings. Pop. 2065.

STIA (Latin, Stagnel) a vil. and com. Tuscany comp. Ancona, at the confluence of the Stagno with the Arno, which is here crossed by a bridge, 25 m. S. Florence. It contains an ancient church and the remains of an old castle and has manufactures of woolen cloth and hats, and a trade in corn, chestnuts, and wine. Pop. 3824.

STIBBARD par. Eng. Norfolk, 1468 ac. Pop. 388. STIBBINGTON par. Eng. Huntingdon 1530 ac. P. 790. STIBNICZ (Gauze) a vil. Bohemia, circle Brunn, and about 16 m. from Konegspitz, on the Ebohmits with a church and numerous manufactures. Pop. 1205.

STICKFORD, par. Eng. Lincoln; 670 ac. Pop. 427.

STICKILLIN par. Ire. Louth, 1822 ac. Pop. 375.

STICKNEY par. Eng. Lincoln 4220 ac. Pop. 917.

STIECHOWITZ, a market tn. Bohemia, circle Brunn, 1 bank Moldau, 16 m. S. Prague at the confluence of the Kothaba with extensive powder-mills.

STIEGE a vil. Brunswick, dist. Blankenburg, on the Havel about 2 m. N. Haselbünde with a church, breweries, and a trade in wood and charcoal. Pop. 1255.

STIENS a vil. Holland, prov. Friesland 5 m. N. Leeuwarden with a church, two schools, and a poorhouse. Pop. (agricultural) 1617.

STIEPANOW, a market tn. Bohemia, circle Karczin, S. E. Prague with an old church, school, and townhouse, and a saw and several other mills. Pop. 1318.

STILRNE-OSANCE, a group of small isles Norway in the Fretke-Dord, bell and N. Stavanger in lat. 59° 10' N., lon. 5° 30' E.

STIFFKEY, par. Eng. Norfolk 3912 ac. Pop. 520. STIFFORD, par. Eng. Essex, 1603 ac. Pop. 810.

STIGLIANO a tn. Naples, prov. Basilicata, 30 m. S. W. Matera, with a church, two chapels, and two convents, and a considerable trade in wine, oil, and cattle. Pop. 4300.

STIKADA a vil. Austria, Croatia, about 85 m. from Goplich. It is inhabited chiefly by frontier soldiers. There is a silver-mine in the vicinity. Pop. 1065.

STILLINGFLEET, par. Eng. York (E. Riding); 6023 ac. Pop. 1694.

STILLINGTON, par. Eng. York (N. Riding), 2012 ac. Pop. 788.

STILLORGAN, par. Ire. Dublin, 690 ac. Pop. 1658. STILLWATER, a vil. and com. U. S. township, U. S. State, New York in the Champlain canal, and near 1 bank Hudson 23 m. N. Albany. It has good water-power and several manufactures; and to the N. of it are Bussie Heights, the scene of the action which led, in 1777 to the surrender of

the British under General Burgoyne. Pop. 2988.—2 A vii, cap. Washington county, territory of Minnesota, U. S. dist. Lake St. Croix, 31 m. N. N. R. Paul. It contains Presbyterian, Baptist, and Episcopal churches, the territorial penitentiary, two mills; and a population of about 800, chiefly employed in the lumber trade.

STILO [anc. *Conchinnus*] a tn Naples, prov. Calabria-Ultra I 30 m. N.E. Gerace. It has two churches, and near it are the principal iron, lead, and copper mines of Calabria. It was almost destroyed by the Saracens, and had again become prosperous, when the great earthquake of 1783 suddenly made it almost a heap of ruins. Pop. 1800.

STILTON, a vil and par. England, co. and 13 m. N. W. Huntingdon, on the Romsey Ermin Street with a parish church, a Wesleyan chapel and a considerable trade in the famous cheese which bears its name, but is made 30 m. off, in Leicestershire. Area of par. 1630 ac. Pop. 801.

STINSFORD par. Eng. Dorset, 1929 ac. Pop. 873.

STIRCHLEY, par. Eng. Salop, 835 ac. Pop. 802.

STIRLING, or *Strathclyde*, a co. Scotland, bounded N. chiefly by the Forth, which separates it from the greater part of Perth and on whole of Clackmannanshire. E. Linlithgowshire, from which it is separated chiefly by the Edinburgh and Glasgow, and W. Loth. Loamond, greatest length, E. to W., 25 m., central breadth, N. to S., about 17 m., area, 499 sq. m. or 213,960 ac. It is of very irregular shape, and has also a greatly diversified surface, rising in the N. W. on the shores of Loch Lomond into the lofty Ben Lomond and traversed towards its centre by the Garraunock, Fintry and Campsie hills, while it slopes down towards the banks of the Forth, and spread out into two of the largest and deepest alluvial plains in the kingdom, known by the name of the carres of Stirling and Falkirk. The principal rivers are the Forth with its tributaries Carron and Avon, and the Kelvin a tributary of the Clyde. The lakes in addition to Loch Lomond, which it shares with Dumbartonshire are numerous, but for the most part insignificant. In the mountainous district of the W., the prevailing rocks are mica and chlorite slates, often fit for roofing but not very extensively quarried, owing to the difficulty of land-carriage. Immediately E. and S. of the slates, the old red sandstone becomes the prevailing formation, extending E. along the banks of the Forth nearly to the town of Stirling, and S. to the range of the Campsie Fells. That range consists almost entirely of porphyry and trap, but on some of its S. slopes, and still more in the carres E. of it, the carboniferous formation becomes largely developed, and several valuable coal-fields are extensively worked both for domestic use the supply of iron works, of which those of Carron are most important, and for exportation, chiefly by the shipping port of Grangemouth. The more elevated and rugged parts of the county are necessarily devoted to pasture, and where not too lofty or sterile, in general well wooded; the valleys and undulating slopes, and more especially the alluvial plains are fertile, the last, more especially, in the highest degree, and are under a system of agriculture as improved as any of which Scotland can boast. These plains also are admirably adapted for the growth of fruit-trees, and almost every farm has an orchard which often adds no inconsiderable item to the value of its produce. The chief branches of industry are mining, the smelting, casting, and working of iron and the manufacture of woollens and leather. The means of communication are, except in the mountainous districts, very ample, both by land and water, the former by the Edinburgh and Glasgow Central and the Glasgow Central, and the Glasgow railway, and the latter by the Forth and its tributary Carron, and by the Forth and Clyde canal. The most important towns are Stirling (the capital) Falkirk, and Grangemouth. Pop. 86,237.

STIRLING, a royal, mun. and par. bor. and river-port, Scotland, esp. above on a beautifully situated on a commanding height overlooking the windings of the Forth, where it first ceases to be navigable, and is crossed by an ancient and a handsome masonry bridge, and on the Scottish Central and the Stirling and Dunfermline railways, 31 m. W. W. Edinburgh. It consists of an ancient portion, which is very irregularly laid out, and formed of steep winding streets, climbing the height towards the castle; and of a modern portion, situated on lower ground to the N.E., and composed for the most part of handsome modern houses. Among the public build-

ings, many of which derive much interest from their antiquity and the historical associations connected with them, the first place is due to the castle which, with the rock on which it stands, forms a conspicuous object, not only to the country immediately around, but to several adjoining, and even to some distant counties. It crowns a rocky eminence, which rises 220 ft. above the plain and terminates precipitously on the N. W. side of the town. It is of such ancient date that its earliest fortifications are attributed to the Roman general Agricola, and its importance as a military station is proved by the Roman road which passes immediately beneath it. As early as the 10th century, it began to hold a prominent place in Scottish history, and few important events took place while Scotland formed a separate kingdom, in which it did not share. Almost every apartment in it has some tale of thrilling interest or horror. The principal buildings, as they now stand are the governor's house, formerly the royal palace, to a chamber of which, still known as the Douglas-room, an earl of that name was mortally stabbed by James II, and in another apartment of which the same James as well as James V. were born the parliament house, once a noble fabric, and still of imposing exterior, though completely defaced within by having been converted into men's rooms and other accommodations, the chapel-royal, partly occupied for religious service and partly as an armory, and another place begun by James V. but finished by his unhappy daughter Mary and more remarkable for the grotesqueness than for the regularity of its architecture. The buildings and other objects within the town, particularly deserving of notice, are the old church, a large and handsome structure with a massive and lofty tower originally the church of a Franciscan convent, but now entirely defaced as to its external appearance by a partition dividing it into two parish churches, the New North also a parish church, a Baptist, Independent, Reformed Presbyterian Episcopalian B. Catholic two Free, and two U. Presbyterian churches, a high school of some celebrity, and various other schools, an ancient townhouse with a spire, a curious old residence of the earls of Mar, called Mar's Work an Athenaeum for which a handsome building has been erected an extensive agricultural museum formed by the enterprise of a private gentleman, commodious markets, a very extensive new rail and several hospitals. The principal manufactures are woollens consisting chiefly of tartans, tartan shawls, and carpets leather ropes carriages, soap, and candles. The weekly market is well supplied with cere and provisions, and there are numerous inns, chiefly for horses and cattle. The trade, carried on at a good quay with not much depth of water is considerable, and the salmon-fishings of the Forth have long formed an important source of revenue. Stirling was first incorporated as a royal burgh by Alexander I., and now under the Reform Act, unites with Dunfermline, Collieston, Inverkeithing and South Queensferry in sending a member to Parliament. Pop. 12,837.

STIRLING a maritime co. W. Australia, 50 m. long by 40 m. broad. It is hilly heavily timbered, and swamps are numerous. The coast is much indented with bays and inlets.

STISTED par. Eng. Essex, 2967 ac. Pop. 688.

STITCHELL and Huxar, par. Scot. Roxburgh, 6 m. by 4 m. Pop. 893.

STITCHMAN S (St.), par. Eng. Cornwall 4291 ac. P. 3280.

STIVICHALL, tn. and township, Hungary, 47 sq. leagues.

STIVINA, or *Storva*, a vil. America, Moravia, 60 m. N. W. near Bradach with a church and a refinery of potash P. 1045.

STIVICHALL par. Eng. Warwick, 860 ac. Pop. 91.

STIXWOLD par. Eng. Lincoln, 2250 ac. Pop. 256.

STOBO, par. Scot. Peebles, 7 m. by 6 m. Pop. 478.

STOCK, two pars. Eng. —1 Eng. 1849 ac. 1 op. 702.

2 (Glostershire) 2849 ac. Pop. 98.

STOCKACH, a tn. Baden, Lake Aare, on the Aare, 15 m. N. W. W. Constance. It is walled and has two gates, a church, a school, and manufactures of woollen and linen cloth and hosiery. Pop. 1655.

STOCKBRIDGE, a bor., market tn., and par. England, co. Southampton, 1 bank Aston, about 9 m. N. W. W. Winchester. It has little or no trade, its prosperity chiefly depending on the traffic occasioned by its being a considerable thoroughfare. Area of par., 1115 ac. Pop. 1066.

STOCKBURY par. Eng. Kent, 2940 ac. Pop. 589.

STOCKEN or **SPACKER**, a market in Bohemia, circled and 29 m. S.E. of Cassau; with an old church, school, and considerable manufactures of glass, and a distillery. P. 1869. **STOCKERAU** is in Lower Austria, on an arm of the Danube, at the confluence of the Gyller and Romy, 7 m. W. W. Korneuburg. It contains a number of handsome buildings, and on its loftiest site stands the parish church of St. Stephen, an elegant structure, with a lofty and richly-decorated tower. Other buildings of note are the castle of Freiseck, now the townhouse; the military commission-house, the high-school, poorhouse, Franciscan monastery hospital, and infirmary. The manufactures consist of woollens and coarse slates, leather, vinegar, and refined sugar, and there is a trade in corn. Pop. 8659.

STOCKERSTON per Eng. Leicester; 973 ac. 1 89. **STOCKHEIM**, a vil. and com. Belgium, prov. Limburg; 1. bank Meuse, 18 m. N.E. Hasselt. It has manufactures of wicker-work, two breweries, a distillery, a flour-mill, and dye-works. The village was almost entirely destroyed by fire in 1899. Pop. 1185.

STOKHOD a river, Russia, rises in the W. of gov. Volhynia, flows N.N.E. into gov. Minsk, and joins the bank Pripiet, near the confluence of gov. Udoinsk. total course, 110 m.

STOCKHOLM [Swedish *Stokholm*, Spanish *Estocolmo*, Italian *Stoccolma*] a city of N. Europe, cap. of the Swedish monarchy, beautifully and picturesquely situated between

Lake Malar and the Baltic; lat. (observatory) 59° 20' 38" N. lon. 18° 57' 43" E. (m.); 880 m. N.E. Copenhagen, and 440 m. W. & W. St. Petersburg. It stands partly on the N. and S. sides of the strait, which communicates between the lake and the sea, and partly on several islands, which are connected with the mainland and with each other by a number of bridges. The finest of these bridges is the Nyabron or New Bridge, which joins the largest of the islands, called the Stadon or City with the N. side of the strait. When approached from the Baltic, the appearance presented by the city is very grand and imposing, but a still better view is obtained from the Mosebacke, a rugged hill on the S. side of the mainland from a platform on the summit of which the eye takes in the whole city and its environs, and beholds a panorama which in many respects resembles that of Venice, but surpasses it in natural beauty. The whole site covers an area of nearly 5 sq. m., and has a circuit of about 9 m. Till lately Stockholm was unprovided with defences of any kind, but a strong cliford has recently been erected on the small island of Kastellholmen, while the works of Waxholm have been so much strengthened as effectually to command the only channel by which a hostile approach by sea could be attempted. The principal part of Stockholm, or the city proper, is situated on the three islands of Gamla Stockholm, Nya Stockholm, and Helgeandsholmen. It is the smallest and oldest part but at the same time the closest built and most densely-peopled. It consists

for the most part of narrow and crooked streets and lanes, though, from its antiquity, many of the most interesting objects which the town possesses are situated within it. Norraden on the N., separated from the city proper by the Moreström, and Söderman on the S., separated from it by the

Söderström, though considered only as its suburbs, far surpasses it both in extent and regularity of structures. The houses in the city are generally of stone, but in the suburbs more frequently of brick, stuccoed over, and coloured white, yellow, or light blue.

The public buildings are numerous, but not very remarkable. By far the finest is the palace, which, situated on the highest part of Gustavsholm, is seen towering with its vast and massive walls above all the neighbouring houses. It was commenced by the oldest Xenia, in 1597, on the site of a much older structure, which had recently been burnt down, and was completed on his designs by his son in 1753. It is built in the form of a quadrangle, with two wings, and inclosed a large court. The basement story is of granite, the rest brick and stucco. The finest front is the S.E. which is adorned with six Corinthian pillars, the N.W. entrance rising from the quay at the foot of the new bridge, leads to a spacious platform. The whole structure is chaotic, simple, massive, and finely proportioned. Besides the apartments of the royal family, and the chapel, it contains a royal library of 50,000 vols., and some rare and curious MSS., and a museum possessing many valuable northern, Tuscan, and Egyptian antiquities, a cabinet of 50,000 coins and medals considered one of the finest collections of the kind in Europe, and a picture-gallery with fine specimens of almost all the great masters.

THE ROYAL PALACE, STOCKHOLM.

The churches are 70 in number, including, in addition to those of the national establishment a French Reformed, a Dutch Reformed, an English, a Greek Russian and a R. Catholic. There is also a synagogue. Few of the churches possess much architectural merit. The oldest is St. Nicolas, in which the sovereigns are crowned. It was founded in 1260 but has undergone so many changes that the original building has disappeared. It is surmounted by a lofty tower, and contains the tombs of King Magnus Bonck, and his queen Blonka. The Riddarholm Kyrka, or church, was originally attached to a monastery and possesses considerable historical interest, both from the scenes which have taken place in it and from containing the ashes of a long line of Swedish monarchs. Its style was originally Gothic, but has been much defaced by modern alterations. Service is performed in this church only once a-year. The church of Adolphus Frederick, in the Norrmalm, is built in the form of a cross and is rendered conspicuous by its elegant tower crowned by a copper dome. The only other public edifice deserving of notice are the Över-Sjukhusethus (governor's house), a handsome structure, by Tensin facing the quay on which a granite obelisk, in honor of Gustavus III. has been erected the Riddarhus, where the states and also the academy of sciences hold their meetings, and the shields of about 8000 Swedish nobles are hung up the exchange the mint, of little merit as a building but with a good collection of minerals the townhouse, a large pile, in which the principal courts of justice are accommodated the post-office, bank, merchants' house royal theatre, and opera-house, the arsenal, and barracks. Among the educational establishments are a medical college, with a general superintendence of all the medical establishments of the kingdom a technological institute, a navigation-school, and school of design. The principal benevolent institutions are a blind and deaf and dumb asylum, a lunatic asylum, the

Ceraphim infirmary occupying a handsome edifice, with lofty and spacious apartments, and 800 beds Drottik's hospital, the burgher widow's hospital, and the garrison infirmary. The associations, literary societies, artistic, &c., are very numerous, and include, among others the academy of sciences in which the celebrated chemist Berzelius long held a distinguished place the Swedish academy, the academy of history and antiquities, the musical academy, and medical, agricultural and horticultural societies. Few cities can boast of finer promenades. Of these the most frequented are the Djurgården, or Deer-park, remarkable for its picturesque beauties, its magnificent trees and drives, the Ladugårds Gården, or review ground the Haga park, the beautiful cemetery adjoining and the park of Carlberg finely planted, and connected with the city by a long and beautiful avenue.

The manufactures consist chiefly of woollen, flax, cotton, and silk goods porcelain and stoneware, glass, tallow, refined sugar ironware, including large castings and machinery. The trade has the advantage of a harbour which, though somewhat difficult of access, from the length and intricacy of the channels which lead to it, is capacious, and has depth of water sufficient for the largest vessels at its quays. The principal exports are iron copper tar and timber the imports, colonial produce, wine, fruit silk &c. The inland trade is also of no inconsiderable extent.

Stockholm was founded about 1260 by Burger Jari. It was fortified at an early period, and stood several sieges. One of the most memorable of these was in 1561 when it was defended against the Swedes for the crown of Denmark by the Danish queen Christina another still more memorable was in 1520, when an equally heroic female Christina Gyllensterna, widow of Sten Sture, held it for the Swedes against the perfidious and sanguinary Christian II. The capitulation made was shamefully violated by the king who after pleading himself to respect the rights of the inhabitants was guilty of the most atrocious massacres. The indignation which was thus produced in all quarters of the country paved the way for the war of liberation which conducted by Gustavus Vasa, at length terminated gloriously by the expulsion of the Danes, and the establishment of Sweden as an independent kingdom. Pop. (1851) 98,070, (1865) 143,361.

STOCKLAND two para. Eng.—1 Dorset 5849 ac. Pop. 1184.—2, (Bristol) Somerset 1850 ac. Pop. 181.

STOCKLEIGH two para. Eng. Devon.—1 (Exgliff), 1110 ac. Pop. 120.—2 (Tamer), 1339 ac. Pop. 231.

STOCKLIMF two para. Eng. Somerset.—1, (Mogdale), 199 ac. Pop. 110.—2 (Ottens), 230 ac. Pop. 129.

STOCKORN a mountain, Switzerland, sea and 18 m. S. Bern, W. of Lake Thun. It is composed of limestone, attains the height of nearly 7000 ft. and terminates in a remarkable conical peak commanding a most extensive view.

STOCKPORT a market in and par. and man bor. Eng. Lanc., Cheshire, 5 m. S.E. Manchester on the Mersey joined here by the Tame, and crossed by four bridges one of them a handsome modern structure of 11 arches and on the London and North-Western railway which here has two stations. It occupies an elevated uneven and rugged area, so that the houses rise in irregular tiers, giving it at all times a picturesque and at night, when its various factories are lighted up, a very striking appearance. The streets, though generally steep and narrow are well paved and lighted with gas the supply of water is both ample and abundant and the market place, situated on a tolerably level summit, is spacious. Beside the town proper there are several extensive suburbs, as Heaton Norris (which see) Edgley, Farnworth, &c. The principal buildings and establishments are the parish church of St. Mary, a handsome modern structure in the later English style, with an ancient chancel, a lofty pinnacled tower with a peal of eight bells, containing also some interesting monuments St. Thomas church, an elegant building in the Grecian style, with a tower crowned by a spire. St. Peter's of arch a neat brick building, with a square tower; Christ

church (Horton-Norfolk), with a fine spire; St Paul's church, Portwood, a church in the Gothic style, recently erected, a new church, to be called St. Mathew's, is now (1854) in course of erection in Eghley also various dissenting chapels, including four Independent, five Wesleyan Methodists, five each, New Connexion Methodists, Primitive Methodists, Baptist, and E. Catholic, Wesleyan Association, Unitarian, and New Jerusalem, one each and a Friends' meeting-house, the barracks, courthouses, and union house the grammar, British, national, and other schools, among which is the Stockport Sunday-school attended by upwards of 3800 children every Lord's day and occupying a large brick building of four stories, erected by subscription at an expense of above £10 000; attached to it are three district schools, with an average attendance of 1100 children, the mechanics institute, the infirmary occupying a handsome stone-building, whose site renders it one of the most conspicuous objects in passing through the town, the new cemetery, covering a large and well-laid out plot of ground, with a small but handsome chapel, and the railway- viaduct on the London and North-Western railway, a magnificent structure which spans a great portion of the town, including the river Mersey by 76 semicircular arches, 22 of which are of 63 ft. span, and the centre one 110 ft. above the bed of the river. The cotton manufacture is the staple of the town and, in addition to numerous large factories, employing upwards of 2800 horse-power between spinning and weaving there are several print, bleach and dye works. The weaving and throwing of silk, at one time the most important branch of industry here, has greatly declined, only a few hands being now employed in it, as well as in the manufacture of silk goods, thread, brushes, &c. Several hands are still employed in hutting. There are also several engine and machine shops, iron and brass foundries, breweries, and brick-works. The weekly market, chiefly for cheese, vegetables, &c. is important and there are four annual fairs Stockport being centrally situated at the junction of several Roman roads is supposed to have been an important Roman station and to have had a fort on the summit of what is now called the Castle Yard from the castle which was subsequently erected upon it, but has altogether disappeared. During the last civil war Stockport was garrisoned by the parliamentarians, and became the scene of some severe struggles between them and the royalists. In virtue of privileges first conferred by the Reform Act, it is governed by a mayor 18 aldermen, and 42 councillors and sends two members to the House of Commons. Pop. (hor.) 53,835.

The parish of Stockport includes the chapelry of Daley Sunday Dukinfield, Hyde, Marple, Horbury, Bromley or Chadwick and the townships of Bramhall, Bredbury, Brinnington, Etchells or Stockport-Etchells, Offerton Torkington, and Werneth. Area, 21,575 ac. Pop. 91,425. (Local Correspondent, *Bagshaw's History of County Palatine of Chester*, 1850.)

STOCKSTADT, a vil. Bavaria, Lower Franconia, near a bank Meiss, here crossed by a bridge with a church. P 1294.

STOCKTON five par. Eng.—1 Norfolk 1061 ac. Pop. 149—2 Warwick, 1800 ac. Pop. 451—3, Wilt 2000 ac. Pop. 860—4, Worcester 635 ac. Pop. 181—5, (see *de Ruz*) York (of Midland) 3270 ac. Pop. 475.

STOCKTON, a in New S. Wales, co. Gloucester, on the shores of Port Hunter, opposite Newcastle.

STOCKTON, a, in U. States, California, on the Stockton slough or canal, which contains the bank waters formed by the junction of the San Joaquin with the Sacramento, 59 m. from Valjejo. It occupies a peninsula between the three branches into which the slough divides and, as a town, ranks next to San Francisco and Sacramento. It owes its prosperity to its central position in the valleys of the Sacramento and San Joaquin making it the depot for the supply of all the S. m. and its to its harbour, which is accessible at all seasons by vessels drawing 9 ft. Steamers ply regularly to it. It was settled in 1848. Pop. (1853), 4000.

STOCKTON upon Tress, a considerable market tn., municipal bor., and par. Eng., in the co. of Durham, on a height above a bank Toss, which is navigable 8 m. above the town, and falls into the German Ocean 12 m. below, and at the junction of the Stockton and Darlington, Stockton, Hartlepool and Clarence, and the Leeds Northern railways. It is entered from the S. by a handsome bridge across the

river; is well built, chiefly of brick, and laid out with considerable regularity, consisting of a spacious main street, nearly 1 m. long from S. to N., and several other streets parallel or at right angles to it, and two handsome churches with an elegant spire, a chapel of ease with a tower 80 ft. high, Wesleyan and Primitive Methodist, Scotch Presbyterian, Independent, Quaker Baptist, R. Catholic, and Unitarian chapels, national, British, infant, industrial, and other schools a quadrangular townhall with a clock-tower and spire, a mechanics institute, custom house, assembly-rooms, dispensary some almshouses, and a handsome Doric stone-column, 83 ft. high, in the centre of the market-place. The manufactures are chiefly linen and sailcloth and there are also building-yards, ropewalks, iron and brass foundries, breweries, oars and other mills. The harbour has been improved, so as to admit vessels of 800 tons, and having been made a homing-port for certain goods, has become the centre of a considerable trade, both coastwise, chiefly with London, Hull, Leth &c., and foreign with the Baltic, Holland, Hamburg and the British colonies. The principal foreign exports are lead and coal, and the imports, timber for ship-building and ordinary purposes tallow &c. In 1851, the tonnage belonging to the port was 27 730 tons; the vessels entered were 1011 (59,525 tons) and cleared 8486 (958,354 tons) Pop. bor. 10,172. Area of par., 6180 ac. Pop. 10,459.

STONEHAYVE N a seaport in and ber of harbor, Scotland co. Kincardine, 15 m S by W Aberdeen about 1 m from the railway thence to Dundee, lat. 56° 58' N lon. 2° 15' 45' W (N.) at the head of a bay at the influx of the Carron, here crossed by a bridge. It is divided into the old town, on the bank of the river, consisting chiefly of one spacious but irregular street, and the new town, on the bank, containing several well formed streets diverging from a square in the centre, in which is the handsome market-house. The houses here are well-built, and have a handsome appearance.

Near it are two parish churches and there are also Free and U. Presbyterian churches, an ancient Episcopal and a Methodist chapel a country courthouse and jail a literary and scientific institute, and a library. Weaving cotton and linen fabrics for Aberdeen houses is carried on, and there are a distillery and brewery and some mills for spinning cotton yarn. The trade of the port consists principally in the importation of coal and iron, bone-ash, salt, staves and timber, potash, and groceries and in the exportation of grain, potatoes, whisky, cured fish, timber, and live-stock. E. and S.E. winds cause a great swell in the harbour which is a natural basin, and dries at low-water so do the rocks on which the pier is erected for a full cable length out beyond the pier. Two fixed lights are placed on the latter, 30 ft. above high-water. Pop. (hor.) 3540.

STONEHENGE. *See* WITTS.
STONEHOUSE, a town, England—1, A vil and par., co. Gloucester, on the Stroudwater canal and the Bristol and Birmingham railway, which has here a station, 3 m W Stroud. It has an ancient parish church, Independent and W. chapel, an endowed school and extensive manufacture of broad-cloth. Area of par., 1625 ac. Pop. 2598.
 —2, (Kee), A tn. and par., co. Devon, in the bar of Devonport, and forming a suburb of Plymouth. It has several well-formed and well-built streets, a handsome modern parish and a district church, Wesleyan, Baptist, Independent, and E. Catholic chapel, a royal naval hospital, occupying with its spacious lawn, an area of 24 ac., royal marine barracks, an immense and magnificent victualling establishment, approached through a grand gateway and beautiful colonnade, manufactures of vermilion, soap, and tallow, commodious quays for merchant vessels, and a battery and several forts, commanding the entrance of the Hamoaze. Pop. (tn.) 2086. Area of par., 885 ac. Pop. 11 946.

 STRAKONITZ (Latin, Stracona) a m. Bohemia, circle
 Tusk, 63 m. S.W. Prague, on the Wawra, here crossed by
 a bridge. It contains a new and the remains of an old castle,
 a church, and a townhouse and has manufactures of linen
 and woollen cloth, and particularly of hosiery, in which an
 extensive trade is carried on. Pop. 3900

STRALE, an vil. Prussia. See DACHOW
 STRALEN, or STRALBURG a vil. Rhodeni Prussia gov.
 and 37 m. N.W. Dinslendorf, on an elevated plain between
 the River and the Memel. It contains a R. Catholic church
 and has manufactures of cotton goods, hosiery and hats; and
 dye-works. Pop. 1578

STRALBUND agov. Prussia, prov. Pomerania, bounded
 N.W., N., and N.E. by the Baltic E., S. and S.W. gov.
 Steiss and W. grand duchy of Mecklenburg area, 1276
 sq. m. It consists partly of the group of islands of
 which Rügen is by far the largest, and partly of the main-
 land of Stralund proper. The latter is almost throughout a
 flat not much elevated above the level of the sea with a coast
 much broken and indented. The rivers are few and small.
 The only ones deserving of notice are the Mecknitz, forming
 part of the W. boundary, and the Ise, with its tributary
 Triebel. The soil is often sandy but in general possesses
 considerable fertility and produces all kinds of grain. Pas-
 ture-lands are extensive, and particularly adapted for the
 rearing of sheep, of which large flocks are kept. The fishing
 on the coast is very productive. There are no minerals de-
 serving of notice. The principal manufactures are woollen
 and linen cloth, leather tobacco, chimney soap, and candles.
 Ship-building also is carried on to a considerable extent. The
 government is divided into four circles, Rügen, Graefswalde,
 (containing Stralund the capital) Graefswalde, and Grimmen.
 All the inhabitants, with a very few exceptions are Protestants.
 Pop. (1849), 187,068

STRALSUND, a seaport in Prussia cap. gov. Pomer-
 ania, on the strait which separates the island of Rügen from
 the mainland, and so completely surrounded by water as to
 be approached only by bridges, 130 m. N. by W. Berlin, lat.
 54° 18' N., lon. 13° 5' 30" E. The houses have an old
 and interesting appearance and both streets and squares,
 though irregular and devoid of elegance are clean and well
 paved. The principal buildings are the Nicola church, a brick
 structure, begun in 1511, and surrounded by a lofty tower,
 four other churches the government-house the townhouse a
 curved edifice built in 1516 the gymnasium, with a library
 and school of course the mint several porches, workhouse,
 orphan hospital, and infirmary. The manufactures consist of
 woollen and linen cloth, sugar, syrup, starch, soap, candles,
 tobacco leather, mirrors, and playing-cards and there are nume-
 rous distilleries, oil-works and building-docks, in which a great
 number of vessels are fitted out. The port, though not large
 and somewhat unimproved by shallows, is good and carries
 on a considerable trade. In 1862, 389 vessels (tonn 23,798)
 entered and 577 (tonn. 80,648) departed. Stralund is the
 seat of a superior court of law, and of several public offices.
 It was founded in 1209 by Prince Jaroslaw I. of Rügen, and
 supplied with business. It afterwards became a free imperial
 and Hanse town and rose to great commercial importance.
 It has repeatedly suffered severely from war. In 1678 Freder-
 ick William, the great Elector of Brandenburg took it after
 a bombardment, by which 1800 houses were destroyed. It
 never completely recovered from this blow Pop. (1816)

STRAMBINO a m. Italy, Piedmont, div. Turin, prov.
 and 5 m. S. Ivrea, near r bank Dora. It has a court of jus-
 tice, two churches a college or gymnasium, a confraternity
 four oratories, and an hospital Pop. 8907

STRANDMÜHLE, a vil. Denmark Høland ball. Copenhagen
 hagen, on the Mølleensee, with an extensive paper-mill, pro-
 ducing about 100,000 reams annually

STRANGFORD a small seaport in Ireland co. Down,
 124

near the bend and on the W side of the channel which forms the entrance to Lough Strangford, 7 m. N E. Downpatrick. It contains a chapel of ease, a small Wesleyan meeting-house, and a R. Catholic chapel. Pop. 630.

STRANGFORD (Loon), an arm of the sea, Ireland, in the E. of Co. Down entered by a channel 6 m. long, and less than 1 m. wide. It then opens out into a large expanse, stretched N N W for about 15 m., with a mean breadth of 5 m. or 6 m. It contains a number of small islands. The rapidity of the tides, and some sunken rocks, make the entrance dangerous to those not well acquainted with it; but within there is ample depth, with good anchorage, and complete shelter.

STRANGVAER, a tn. Sweden. See **SKERVENA.**

STRANING two nearly contiguous vils Lower Austria, on the Marchfeldberg, about 6 m. from Moosau with a church, tile-works, and a trade in wine. Pop. 1440.

STRANORLAR, a market tn. and par. Ireland co. Down. The town, 22 m. S. W. Londonderry is irregularly built and has a church, a R. Catholic chapel, two Presbyterian meeting-houses, and a union-workhouse but little trade. Pop. 512. Area of par., 15,509 ac. Pop. 5374.

STRANRAER, a royal par. and mun. bor. and seaport tn. Scotland on Wigtown at the head of Loch Ryan, 36 m. W. Wigtown lat. (church) 54° 54' 30" N. lon. 5° 2' W. (n.) It is in general very regular: houses mostly plain, neat, and very substantial. It has a parish church a chapel two Free, and three L. Presbyterian churches, a Reformed Presbyterian an Old Light meeting-house and a R. Catholic church several schools, and a number of benevolent societies. Some leather is manufactured, but only to a small extent. Pop. 3677.

STRANTON a small seaport and par. England on the Derham on the Stockton and Hartlepool railway about 3 m. S. W. Hartlepool. It has a church with a tower, which serves for a landmark a district church a Wesleyan chapel an endowed school, several iron-foundries, building yards, and a harbour and docks. Stranton has gained much in importance by the formation of Hartlepool harbour. Area of par. 9328 ac. Pop. 4769.

STRANY a tn. Austria. Monks, circle and about 20 m. from Hradisch with a church and glass-works. P. p. 1812.

STRASBURG [French *Strasbourg* and *Argentoratum*], a tn. France, cap. dep. Bas-Rhin, on the Ill, about 1 m. from the Rhine 250 m. E. by S Paris, with which and with Basel it is connected by railway. It is of an irregular but somewhat triangular shape, having its greatest length W to E. is surrounded by walls and bastions, defended on its E. side by a citadel constructed by Vauban, and otherwise so strongly fortified as to rank as a fortress of the first class. It is entered by seven gates, and is generally well built. The houses are rather lofty but the streets are spacious regular and clean and many of the public squares are large and handsome. Of these the most remarkable are the Place d'Armes and Place-de-la-Cathédrale. The Ill, which traverses the town, and is subdivided into a great number of minor branches, is crossed by numerous bridges, which are all of wood. The principal edifice is the cathedral, one of the noblest Gothic structures in Europe, and surmounted by a spire 466 ft. high, the loftiest in the world. The W front has a triple portal richly decorated with sculptures, statues, and bas-reliefs, while above it is a circular window which is 46 ft. in diameter and rises to the height of 230 ft. The length of the nave is 357 ft., and height of the ceiling 79 ft. The other edifice deserving of notice are the Temple Neuf built in 1254, originally the church of the Dominicans, and adorned with a fine series of paintings, representing the Dance of Death the Palais-de-Roi a handsome building, close to the cathedral, and originally the bishop's palace, the church of St. Thomas now appropriated to a Protestant congregation, and containing a fine statue of Marshal Saxe the Jewish synagogue a handsome structure erected in 1834, the prefecture *palais-de-justice* mint, public library picture-gallery, theatre, and several manufactures consist of woollen, linen, and cotton goods, silks, jewellery metal buttons, clocks and watches, stained paper, playing-cards, porcelain-stoves, carriages, straw-hats, musical instruments, oilcloths, coffee, *petits-de-foie-gras* (goose liver paté) oil madder starch soap potash, and chemical products. There are also extensive breweries, tanneries, sugar-refineries, dye-works, bleach fields, and cotton-mills

The trade, greatly favoured by water and railway communication, is very important, and includes, in addition to the above articles of manufacture, wine, corn, tobacco, saffron, hemp, &c. Strasbourg is the see of a bishop and possesses courts of first resort and commerce, a chamber of commerce and exchange, a mint, a university academy, a college, a Protestant family of theology, a diocesan seminary, and secondary educational school a school of artillery, faculties of law, medicine, science, and letters, and a society of agriculture, sciences, and art. It is supposed to have been founded by the Romans, who erected it as a barrier against the incursions of

STREET IN STRASBURG WITH TOWER OF CATHEDRAL.
From *Le Meyer del. Strasbourg.*

the Germans, who, however, ultimately made themselves masters of it, and retained possession till the reign of Clovis, who again drove them back beyond the Rhine. In the 6th century it changed its ancient name of *Argentoratum* for that of *Strasbourg* and in the beginning of the 10th century became subject to the emperor of Germany. It afterwards acquired great privileges, became a free town, and was governed as a republic. In 1681, by the treaty of the inhabitants and partly of Louis XIV. it became permanently united to France but though more than a century and a half has since elapsed, it still retains in its houses, and in the dress and language of its inhabitants the external aspect of a German town. Pop. (1852), 64,876.

STRASBURG, two places, Prussia.—1 A tn. gov. Brandenburg gov. Potsdam 36 m. W. Statin. It is walled; has three gates, two churches, manufactures of woollen and linen cloth, bootery and leather and a wool-market. Pop. 4356.—2 (or *Reichen*), A tn. gov. E. Prussia gov. and 99 m. S. E. Marienwerder, on the Drawena. It has a court of law and several public offices, two churches, two manufactures, and two hospitals manufactures of woollen cloth and leather a brewery distillery and several general trade. Pop. 3690.

STRASCHITZ (Nac) a tn. Bohemia, circle Rakonitz, in a plain 21 m. W. N. W. Prague; with a church, a chapel and a castle. Pop. 1793.

STRAFORD, a village in England, particularly, is (1) *Spens Avoch*, situated in co. and 8 m. S.W. Warrick, beautifully situated on a height sloping gently to the Avoch which is here crossed by two bridges, one of them an ancient and handsome stone structure of 14 pointed arches. It consists of an old and a new town the former composed for the most part of middle-class houses, but distinguished by the possession of the house in which Shakespeare is said to have been born and the latter composed generally of spacious and well formed streets, though from the improvements which have been made, the historical character of the place is not easily observed, and many of the old houses are demolished. (2) *Stratford-on-Avon*, the principal buildings and objects deserving of notice are an ancient, large, and handsome parish church in the form of a cross with a square embattled tower terminating in a lofty

SHAKESPEARE'S TOMB, STRATFORD-UPON-AVON
Drawn and Engraved by J. L. WILKINS.

diagonal split and a marble slab near the entrance to the stair under which the ashes of Shakespeare repose, two chapels of ease, one of them a handsome structure with a tower and a beautiful and richly sculptured porch. Wesleyan and Primitive Methodist, Independent, Baptist, and R. Catholic chapels, a free grammar national, and other schools, a plain and substantial townhall, of the Tuscan order, resting on pilasters, an infirmary a theatre a Shakespearean and a public library. The inhabitants are chiefly engaged in agriculture; and there is an important weekly corn-market, and five large cattle marts. Pop. 3873. — (*Shewp*) A market tn., co. and 7 m. N. E. Buckingham, on the Ouse, here crossed by a bridge. It has a parish church with a school several charitable endowments, and a fine structure of lace. Pop. 1757. — (*Shewp*) A market tn. in par. co. and 13 m. E. of Buckingham, in a narrow district on the Grand Junction canal and near the

London and Birmingham railway, with a chapel of ease and Baptist and Wesleyan chapels. Area of par., 1280 ac. Pop., 650.—4. (Loughborough), a vil. on Easby, par. West Ham, on the Eastern Counties railway, which has here a station, and on the Lea, which is navigable and crossed by a bridge over meeting with the village of Bow, 4 m. E.N.E. London. It has a modern church, Independent, Wesleyan, and R. Catholic chapels, some remains of a celebrated Cistercian abbey, chemical works, a porter brewery and extensive establishments for the printing and dressing of calico and silk.

STROKES TOWN, a market ta. Ireland, co. Roscommon 12 m. W. by N. Longford. It has a handsome church and a R. Catholic chapel, a courthouse and bridewell, three schools, and a limited trade in corn. Pop. 1258.

STROMA, or **STROMAY**, a small isl. Scotland, one of the numerous group which studs the Sound of Harris. It is about 1 m. long, of very irregular shape, and not inhabited.

STROMBOLI (see *Stroppo*), the most N. of the Lipari Isles, 25 m. off N. coast Sicily; about 9 m. in circuit. It consists entirely of a single volcanic mountain, which has its summit point and crater on the N. W. side, 2500 ft. above sea-level, and from the top of which smoke and flames are continually ascending, and sending rays of light over such an immense space, that it has received the name of the Lighthouse of the Mediterranean. It often makes loud explosions and sends forth stones and ash, but no proper eruption has taken place for nearly 3000 years. A few inhabitants consequently venture to live upon it, and receive some remuneration for the fertility of the soil, from which an exquisite wine is produced. The other products are sulphur and pumice-stone.

STROMNESS, a seaport in, burgh of barony and par. Scotland, co. Orkney, isl. Mainland or Pomona. The town, situated at the head of a beautiful bay, lat. 58° 57' 45" N lon. 8° 17' 30" W (p.), consists chiefly of one narrow and irregular street, extending along the harbour for about 2 m. The houses, many of which have their gables to the street, are for the most part substantially built of stone. There are three churches—an Episcopal, a P. Presbyterian, and a Free church; numerous schools, a public library and a museum, but no manufactures, excepting a small rope-work. There is a patent slip, and ship-building yard. The harbour to which this town owes its existence, is one of the most commodious in the N. of Scotland, and forms a safe retreat to all sorts of vessels. It is about 1 m. long, and somewhat less than 1/2 m. broad. Pop. of burgh, 2035, (par.), 2770.

STROMÖE, the chief of the Faröe Islands lat. 62° N lon. 7° W. It lies nearly in the centre of the group, length, about 27 m.; breadth, 7 m. area, 104 sq. m. It is extremely rugged and mountainous, its whole coast bristling with abrupt precipices, which make it difficult for a vessel to effect a landing. The mountains, which rise towards the interior, terminate in lofty peaks, and consist generally of greenstone and diorites. The highest peak is Riddling field, 2430 ft. The soil is in general very shallow, there is no wood, and barley is the only grain which comes to maturity both harrows and potatoes thrive well. Fishing, wool-spinning, and the pursuit of wild fowl for their eggs or young, are almost the only employments. Among the minerals some traces of coal are found, and splendid crystals and shells are of frequent occurrence. Stromöe is divided into two parishes and on its E. coast stands Thorshavn the capital and chief port of the whole Faröe group. Pop. 2000.

STRÖMSTAD a seaport in Sweden, lkn and 92 m. N. N. W. Göteborg, on a tongue of land which projects into a deep bay of the Skagerrack. A small stream divides the town into two parts, and forms a tolerable harbour. Many visitors reside here in summer months. Pop. 1502.

STRONA, a vil and com. Italy, Piedmont, div. Turin prov. and 6 m. S. E. Biella with a church. Pop. 1200.

STRONGOLI, a tn. Naples, prov. Calabria-Ugento, 13 m. N. W. Ugento, on a steep rock about 3 m. from the Ionian Sea. It is the site of a bishop, and contains a cathedral, four convents, a seminary, an hospital, and two almshouses. It is supposed to occupy the site of the ancient Petilia. P. 2000.

STRONA, or **STRONAR**, one of the most E. Orkney Islands, lat. (S. E. point) 58° 4' 54" N lon. 2° 52' W (p.), about 7 m. long and 5 1/2 m. broad. Its coasts are marked with deep indentations, and numerous headlands and promontories. The surface is of moderate elevation, with exception of a central ridge. Oats, here, potatoes, pease, and turnips are grown. The white fish, lobster and herring fishery are prosecuted here with some vigour. Pop. 1175.

STROOD, a vil and par. England, co. Kent, on the Medway here crossed by a bridge, nearly opposite to Rochester and at the terminus of the Gravesend and Rochester railway. It consists chiefly of one street in the line of road from Rochester to London, is poorly built, though considerable improvements in its appearance have recently been made and has a modern parish church, an Independent chapel, two endowed schools, and the remains of a building which belonged to the Templars. The inhabitants are chiefly employed in the fisheries in the Medway. Area of par. 1632 ac. Pop. 3087.—Immediately N. E. of Strood, and properly forming along with it one of the suburbs of Rochester, is **STROOD-NEW**, consisting of a village and landward parishes. The church occupies a commanding height, overlooking the Medway, and there is also a Wesleyan chapel. Upon a castle, erected by Queen Elizabeth to defend the passage of the Medway, and consisting of an oblong central building with a tower at each end, is in this par. Area of par. 8765 ac. Pop. 2208.

STROPPIANA, a tn. Italy, Piedmont, div. and 18 m. S. S. Novara with a court of justice, a church, a com. manual school, and a charitable endowment. Pop. 2211.

STROPPA, a vil and com. Italy, Piedmont, div. and 21 m. N. W. Corti, with an ancient church. Pop. 1537.

STROUD, or **STROUDWATER**, a market tn. and par. in England, co. and 9 m. E. by E. Gloucester, in a beautiful district, on a stream of much name, near its confluence with the Froze, and on the Great Western railway. Under a

recent improvement act, the town, formerly indifferently built, has assumed a much better appearance. Several streets have been widened, many handsome houses erected, and both lighting by gas, good pavement, and an abundant supply of excellent water have been introduced. Among the public buildings and objects of interest, are a parochial and a district church, the former a large edifice, with a tower terminating in a lofty conical spire. Baptist, Independent, Wesleyan, and Primitive Methodist chapels, national, British, and other schools, a dispensary, and an hospital. Strood has long been the centre of the woollen manufactures of Gloucestershire, and has numerous factories employed in them, both within the town and in its vicinity, more especially along the banks of the Stroud, the water of which is said to be admirably adapted for dyeing scarlet. All the surrounding valleys exhibit ranges of houses or villages occupied by persons in the woollen manufactures. In carrying on this important branch of industry, great facilities are afforded both by the railway and the Thames and Severn canal, which passes on the S. The weekly market is well attended, and there are two annual fairs, chiefly for cattle. The par. bor. of Strood embraces an extensive manufacturing district, and sends two members to Parliament. Pop. of par., 8798, of bor., 86,553.

STROXTON par. Eng. Lincoln 970 ac. Pop. 112.

STRUBBY par. Eng. Lincoln; 2075 ac. Pop. 287.

STRUMSHAW par. Eng. Norfolk, 1837 ac. P. 441.

STRUPPA, a vil and com. Sarlinian States, div. and 5 m. E. Genoa, 1 bank Bioglio, near its mouth in the Gulf of Genoa. It has a large and handsome church. Pop. 2889.

STRY, a walled tn. Austrian Galizia, 1 bank Stry 44 to S. Lemberg. It is tolerably well built and has two churches, a castle, courthouse and high school. Pop. 2682.—The river rises in the N. side of the Carpathian Mountains, flows very circuitously first N. W., then N. then E. S. E., then S. E. just to bank Dniester. In the lower part of its course it forms extensive marshes.

STRYKOW a tn. Russian Poland, 61 m. S. W. Warsaw, with manufactures of linen and hats. Pop. (1841), 3635.

STRYŃÓP and **STRYŃÓP-KALP** two small lks. Denmark, belonging to the Funen group 2 m. S. Tasinge. Strýale the larger is about 4 m. in circuit fertile, and well peopled. The inhabitants make excellent sailors. Pop. 600.

STRYPEN, a vil and com. Belgium, prov. E. Flanders, 18 m. S. Ghent. It has manufactures of cloth and linen, a trade in linen and fine flour-mills. Pop. 1474.

STRZELNO a tn. Prussia, prov. Posen, gov. Bromberg 11 m. S. S. W. Inowroclaw. It has a church, synagogue, and a nursery and a trade in horses and cattle. Pop. 2843.

STRZELAK, a vil Austria, Moravia, circle Hradisch, 12 m. from Kremsier with a church and a castle. P. 1087.

STRZYKOW, a vil. Austria, Galizia, circle and near Jaslo, on the Wyalyk. It has a church, and manufactures of earthenware. Pop. 1068.

STRYANT, an isl. Bahama's Sea, lat. 63° 33' N. lon. 169° 12' W. about 20 m. in circuit, in general low with some rocks lying off its W. side. It has a very bleak appearance.

STUBBEKELOBBING, a tn. in Denmark, isl. Falster, near the N. entrance of the Groenland. It has a quay 400 ft. long, a winter-haven admitting vessels drawing 10 ft. and a trade in corn. In very ancient times the haven and roads of this town were the usual rendezvous of the Danish fleet. P. 1000.

STUBENBACH, a vil Bohemia, circle Prácheň with a church, a school important glass-works, and saw and other mills. Pop. 1184.

STUBNYA (Uz) a vil Hungary, co. Thurcos, about 16 m. from Buden, with a R. Catholic church. Most of the inhabitants are engaged in mining. Pop. 1630.

STUBTON par. Eng. Lincoln; 880 ac. Pop. 184.

STUDENEČ, or **STUDANICA**, a vil Bohemia, circle Blatná, on the road to Stará Boleslav, with a church, a school and a mill. Pop. 1008.

STUDEŇE, a vil Austria, Dalmatia, circle Spalato, near the Turkish frontier, about 90 m. from Anisnes, with a church and a courthouse. Pop. 1502.

STUDHAM par. Eng. Bedford and Herts; 8100 ac. Pop. 699.

STUDLAND, par. Eng. Dorset; 7814 ac. Pop. 445.

STUDLEY, a vil. and par. England, co. Warwick, on the Afton, 4 m. N by W Alcester. It has an ancient church, with a beautiful Norman arch; a Wesleyan chapel, an endowed school; and extensive manufactures of needles and fish-hooks. Area of par. 4502 ac. Pop. 3153.

STUHLWESENHURM, a t. Hungary cap. co. of its name, 1 bank Gera, near the W border, 64 miles from Erfurt, 28 m. S.W. Weida. It is a place of considerable extent, but is badly situated in the immediate neighborhood of unhealthy swamps, has irregular and ill-paved streets, and though an ancient place, which makes some figure in the early history of Hungary, possesses few objects of interest. The buildings most deserving of notice are the cathedral, which is handsome and richly decorated, the county-buildings, the episcopal palace, several churches, a gymnasium and normal school. The manufactures consist chiefly of woollen and linen cloth, and there is a considerable trade in fruit and wine. Pop. 33,600.—The county area, 1809 sq. m. is much broken in the N by lofty hills, but has occasionally tracts of level and even marshy land, among others the extensive morass of Barrot. The most important river is the Danube, which forms the E. boundary. The soil is fertile, and raises in abundance all kinds of corn, particularly wheat, of excellent quality much good wine, fruit, maize, and tobacco. The pastures also are rich and rear great numbers of fat cattle, sheep and horses. In the N the forests are extensive, yield excellent timber and abound with game. The chief minerals are marble and good building-stones. This county is divided into the three districts of Sarmathia, Lankver and Batak. Pop. 187,078.

STULIM atn Prussia, prov. E. Prussia, gov. and 11 m. N.N.E. Marienwerder surrounded by two lakes. It has a court of law and several public offices, two churches a synagogue, an old castle and a trade in cattle. Pop. 1219.

STULIKEL, two pars. Eng. Huntingdon.—1 (Great) 2990 ac. Pop. 482.—2, (Little) 1500 ac. Pop. 409.

STURA two rivers, kind of Italy.—1 A river which descends from the N. side of the Maritime Alps flows N.E. past Loui and joins L. bank Tanaro, after a course of nearly 80 m.—2 A river which is formed by the union of two streams from the Cothian Alps flows S.E. and joins L. bank Po, about 8 m. below Turin, after a course of nearly 45 m.

STURGE, an old Anatolian town, the most E. of the five which compose the Balley group. lat. 36° 44' S. lon. 183° 11' W. It is very elevated, highest peak about 5000 ft.

STURGLON—1 A lake, British N. America, 37 m. long, by 5 m. broad connected with Pine Island Lake by the river haskatchewan lat. 54° N. lon. 102° W. It receives Star-goon river, a raj at stream 30 m. long.—2 A bay U. States, E. side of Green Bay a large inlet on W. coast, Lake Michigan.

STURMERE, par. Eng. Essex. 945 ac. Pop. 351.

STURMINGER (Mansfeldt), par. Eng. Dorset. 8601 ac. Pop. 872.

STURMINSTER-Kewton-Carrick, a market tn. and par. England, co. Dorset, on the Stour, where it is in confluence with the Stour here crossed by a bridge of six arches. It has a good market-place, a handsome church, a Wesleyan chapel, manufactures of hats, and some trade. Area of par. 4229 ac. Pop. 1916.

STURRY par. Eng. Kent. 3069 ac. Pop. 997.

STURTON par. Eng. Norfolk, 2000 ac. Pop. 62.

STURTON two pars. Eng.—1, Woot, 1610 ac. Pop. 627.—2 (Great) Lough, 1469 ac. Pop. 123.

STURTON par. Eng. Suffolk, 776 ac. Pop. 241.

STUTCHBURY, or Sturmont par. Eng. Northampton 16,007 ac. Pop. 23.

STUTTGART, a t. Germany, cap. of the kingdom of Wurtemberg, 97 m. S.E. Frankfurt-on-the-Main, beautifully situated in the small valley of the Neckar, and so closely surrounded by vineyard-slopes, as to suffer occasionally from a want of free circulation of the air. Notwithstanding the rest-

deness of the court, it has very little of the appearance of a capital. The houses are generally plain, and almost ruinous, and the whole place has been not inaccurately described 'as a large village with a fine street and a palace.' It consists of three parts, an lower, an upper, and an outer town, and is entered by eight gates. The objects most deserving of notice are the new palace, begun in 1765, but not completed till 1804, a large residence-office, consisting of a body and two wings, of an exterior by no means prepossessing, but internally richly decorated and gorgeously furnished; the old palace, resembling a feudal fortress, and now occupied by official personages connected with the court or government; hard by it is a monument to Schiller with a statue in iron modelled by Thorvaldsen; the Stiftskirche, an ancient Gothic structure, with a good organ and some interesting monuments, the Hospitalkirche, also Gothic, of an unusually exterior, compensated somewhat by internal decorations, and the possession of a fine statue of our Saviour, by Danneberg. St. Leonard's, and four other churches, most of them modern, and of little architectural merit, the library of 100,000 vols., including it is said, the largest collection of Bibles in the world; the theatre, a modern show edifice; the Ständehaus, where the states hold their sittings; the townhouse, a building of the 15th century the new register-office, the new barracks,

THE PALACE-PALACE, STUTTGART.—From Leipzig, according von Steinbock.

the officers pavilion, an old building, now occupied by the polytechnic school and the Marshall or studious, containing about 200 horses, many of them Arabian, and the finest in Germany. The principal educational establishments are the gymnasium, the polytechnic school the school of art, the veterinary school, and various other schools. The benevolent endowments include various hospitals, asylums, almshouses, and other charities. Among industrial branches an important place is due to the book trade, connected with which are paper-mills, type-foundries, printing-presses, and lithographic establishments. The other leading manufactures are linen, silk, woollen, and cotton goods, gloves, leather, metal, and tin wares, jewellery, and various articles in gold and silver castings, mauling bells, surgical, mathematical scientific, and musical instruments; gold embroidery vinegar, and beer, for which there are numerous breweries. In the immediate vicinity are alleys, parks, and gardens, affording ample means of recreation and at a short distance are various places of holiday resort, including Rothenstein, the beautiful summer-residence of the king, Cannstadt, celebrated for its mineral springs; the Mönchsbühl, the saltworks, &c. Stuttgart is of ancient date and owes its name to a castle which existed before 1090. In 1119 it obtained corporate rights from Rudolf Margrave of Baden, and in 1220 became the residence of the counts of Wurtemberg. It was much extended and improved about 1640, and has since, with only a short interval, been the capital. Pop. 80,000; (1861) 59,103.

STUTTON, par. Eng. Suffolk. 2725 ac. Pop. 455.

STUTZAITZA, or Chakotova, a t. Turkey in Europe, Macedonia, 40 m. S.W. Ghebeli, at the confluence of the

Brandau and Eggerden. It has several Greek churches, a mosque, public baths, a mint for coining copper, and other manufactures of the same metal. Pop. about 4000.

STYR, a river, which issues from a lake near Ofenka, in Austrian Galicia, flows very circuitously N. E. into the Russian gov. Volynia, traverses that gov. enters gov. Minsk, whence it proceeds into the marshes of Pnank, and joins r. bank Pripiet, after a course of about 200 m.

STYRIA (German, *Steiermark*; French, *Styrie*; Dutch, *Stiermark*; Italian, *Stiria*), a duchy, Austria, bounded by the archduchy of Austria, E Hungary, S.E. Croatia, S.W. Dalmia, and W. Dalmia and Salzburg; greatest length, N. to S. 134 m. greatest breadth, E. to W. 112 m. area, 5589 sq. m. It belongs decidedly to the class of alpine lands, being traversed by three distinct mountain-chains, branching partly from the North and partly from the Caravan Alps, and attaining in their culminating points of the Grimming on the N.W. and the Eisenhut on the S.W. frontiers, the respective heights of 7400 ft. and 7648 ft. The nucleus of these mountains is granite, which on the highest summits, takes complete possession of the surface, but on the higher slopes and secondary summits is extensively overlain by beds of limestone, remarkable alike for the richness of its mineral treasure, particularly iron, and the number and dimensions of the caverns which occur in it. Between the mountain-ranges are numerous valleys of greater or less extent, but the only part of the surface which flattens down, so as to have somewhat the appearance of a plain is in the S.E. where the Mur and the Drave are gradually approaching each other preparatory to their final junction in Hungary. The whole of Styria belongs to the basin of the Danube, which drains it by means of four rivers, each of which is fed within it by a number of minor streams. These rivers are the Enns in the N. the Mur, which has by far the longest course within the duchy, traversing it centrally first in an E. and then in a S. direction, the Drave, which traverses the S. in an E. direction, and the Save, which nowhere belongs wholly to Styria, but only forms part of the boundary between it and Dalmia. Besides these rivers and their affluents, there are a great number of lakes unbroken among the mountains, not indifferently of such a magnitude as to deserve a separate notice, but generally rich in natural beauty. Not much of the surface of Styria can be regarded as absolutely sterile. The loftiest summits are generally clothed with wood, some of them, with exception of a few in the N.W., on the borders of Austria, where glaciers appear having a perpetual covering of ice or snow. Still the extent of arable land is necessarily very limited, and though the soil in the lower grounds is generally fertile the corn raised in ordinary years barely meets the consumption. In many districts the vine thrives well, and though much of the wine made is only of secondary quality some of it, as the Lattenberg Rudeksherg Sautschick, &c. has acquired a high name. All the ordinary kinds of fruit abound, and as auxiliary crops hemp, flax and the poppy are extensively cultivated. The breeds of domestic animals are generally of an inferior description, and the management of stock is very imperfectly understood. The great sources of wealth in the country are the forests and minerals. The former cover nearly a half of the whole surface and not only furnish immense quantities of the finest timber, in the hewing and felling of which the parts of the forest, great numbers of the inhabitants are constantly employed, but contain inexhaustible supplies of fuel for smelting-furnaces. The minerals include gold silver lead, copper, cobalt, and zinc in limited quantities, and iron of the finest quality, and in the greatest abundance. The other minerals of value are sulphur, alum, and rock-salt. The raw materials thus obtained have led to the establishment of numerous manufactures, among which that of articles in iron has long taken the lead. The textiles, tools, and other working-instruments of Styria, are famous over Europe. Styria is divided into five circles (Kreise) — Grin (the capital, Marburg, Cilli, Brück, and Judenburg 1 pop. (1849), 1,000,000).

STIAKIN a seaport to Nubia, on the Red Sea; lat. 15° 17' N. lon. 27° 20' E. (n.) with anchorage for large vessels. It lies on a small island of its own name, and is built of madrepore. It has some trade in ostrich-feathers, gold, ivory, salt, and millet; and is a station for pilgrims on their way to Mecca.

SUAPURE, or **SVATUPURA**, a river, Venezuela, rises in the Sierra Parima, near lat. S. 8°, flows N.W., and joins r. bank Orinoco, after a course of about 100 m.

SUATA, or **SUAPA**, a tn. New Granada, prov. Socorro, about 80 m. S.S.W. Pamplona, on a height above r. bank Galiciana, or Bogamoboco. It consists of about 1000 houses.

SUBBIANO, a vil. and com. Tuscany, I. bank Arno, 84 m. E.R.E. Florence, with a church, a school, and a trade in wine and clausure. Pop. 3070.

SUBLEATO or **SUBLEATO**, a hill-fort, N. Hindostan, 4205 ft. above sea-level on an affluents of the Ruddy, 160 m. N. Delhi, the head-quarters of a British battalion.

SUBIACO (anc. *Sublaqueum*) a tn. Papal States, 24 m. E. Rome, on a height near r. bank Tevere, and more remarkable for the beauty of the scenery around it than for any object of interest within its walls. Its streets are dark and narrow and its houses, though interesting from their antiquity, have a dull gloomy look. Crowning the hill on which the town stands is a fine old castle which was for ages the summer-residence of the popes, immediately below the town the river is broken by some fine falls, while the valley is clothed with magnificent forests. The whole landscape is so beautiful that to painters of all countries it has long been a favourite resort. The principal building within the town is a very handsome church, and about 1 m. from it, on a hill above the river, may still be traced the remains of Nero's villa, near which is the celebrated monastery of Santa Scolastica, an edifice of great interest and architectural merit, but most deserving of notice as the first place in Italy in which a printing-press was established. Pop. 5595.

SUBLETER, par. 1st. Creek, 749 ar. 1 up. 185.

SUBLINREKA a river, Hindostan, rises in prov. Bihar, flows westerly S.E. and falls into the Bay of Bengal, after a course of about 250 m., below Jellicoe.

SUBZAWI, a decayed, and now considerable tn. of W. Afghanistan, 70 m. S. Herat lat. 33° 20' N. lon. 65° 10' E. in a fertile plain. It is protected by a mud fort about 250 yards square.

SUBZAWI a tn. Russia, gov. and 70 m. W. S.W. Tver, cap. dist., with some general trade. 1 pop. (1849) 2463.

SUBZULKOTE a tn. Hindostan, princ. Behawalpur, 60 m. N.E. Rawal, lat. 25° 13' N. lon. 69° 42' E. It is surrounded by a mud wall 30 ft. in height and has a pretty good bazaar but little trade except in grain. 1 pop. 2000.

SUCCADANA, or **SOEKADANA** a small native state, xl. Borneo, S. W. coast, on the Carimata passage, and including the islands of Carimata, Lajak and Soerotes, &c. about 80 m. S.W. from the coast. It is very fertile and yields also a considerable quantity of diamonds and of sulphur. — The CARIMAT also named Sucadana, lat. 1° 16' S. lon. 110° E. (n.) lies on a large bay at the mouth of the river of its name which is navigable for canoes several days journey inland. It is the residence of the sultan and of a Dutch envoy and has a good haven. The Javanese and Malays carry on an active trade in opium, diamonds, gold, tin, pepper, camphor, lion's mane dragon's blood, and rattan. It was at one time the most famous town in Borneo, but has never recovered its destruction by the Dutch in 1788.

SUCHONA, a river Russia, issues from Iakobskinsk in S.W. of gov. Volynia, flows E.N.E. past 2 towns, and at Uting-Volks after a course of nearly 800 m. unites with the Jug in forming the N. Dvina. It is navigable almost throughout, and of great commercial importance, giving in connection with the Dvina a continuous communication from Volynia to Archangel. Its principal affluents are the Volynia, Tolochna, Usting, and Verkhnia-Brya.

SUCHTELN, a tn. Rhensh Prussia, gov. and 19 m. W. N. W. Düsseldorf, I. bank Niers with two churches, and manufactures of woollen linen, cotton, velvet, and silk goods a cotton-mill, tanneries, and dye-works. 1 pop. 1750.

SUCKLEY, par. Bag. Worcester. 5184 ac. Pop. 1168.

SUCURU a river, Brazil, rises in the Serra-de-Lingueta prov. Mato-Grosso, flows first S., then S.E., and joins r. bank Parana 8 m. below the junction of the Teiet.

SUCZAWA, or **SUTCHAWA**, an affluent of the Rethi it rises in the N.E. slopes of the Carpathians, Austria, prov. Bukovina, flows E. then S.E., forms part of the boundary between Galicia and Moldavia, and joins r. bank Rethi, after a course of about 100 m.

SUCKAWA, a tn. Galilei, circle Bakuwina, on a river of same name, near the frontiers of Moldavia, 30 m. S.E. K. Casimowitz. It is walled, and irregularly built; and has a R. Catholic and several Greek churches, a synagogue, and high school. The principal manufacture is molasses and cordons leather, and there is a considerable inland trade carried on between Transylvania and Moldavia. Pop. 4812.

SUDAI, or **SWAI**, a river, Ramesse, rises in S. of gov. Olo-neth, enters gov. Kergerod, and flowing S.E., joins r. bank Shikana, 9 m. below Tcherespareta; total course, 140 m.

SUDBOURGH, par. Eng. Northampton 1781 ac. Pop. 857

SUDBOURNE, par. Eng. Bedford, 5439 ac. Pop. 691

SUDERVOKE, par. Eng. Lincoln, 1000 ac. Pop. 90

SUDBURY, a market tn. and name for England, co. Suffolk, 17 m. W. Ipswich, 1 bank flour. It is neat, clean, and tolerably well built and has three churches all spacious and handsome structures, of considerable antiquity, two places of worship for Independents, one for Baptists, and one for Friends; a free grammar-school and several charities a townhall and a neat theatre, manufacture of silk, serge, and hunting for sheep, flax, and a considerable trade in coal and agricultural produce by the Stour. Pop. 6343

SUDBURY, par. Eng. Derby 3603 ac. Pop. 570

SUDELEY MARON, par. Eng. Gloucester 2823 ac. P. 77

SUDETES (German *Sudeten*) a mountain-chain, Europe, which, taken in its most general sense, includes all the mountain-ranges which extend along the S. frontiers of Prussia and Saxony from the source of the Oder to that of the Elster but is more correctly confined to the chain which stretches E. to W. between Prussian Sillesia and Moravia, and terminates at the source of the Neisse. Its culminating point is the Spanglerstein Schieferberg height, 4913 ft. The mountains are chiefly composed of granite, which covers a large extent of surface, but often lies concealed under gneiss and primitive schists. The principal streams which rise in it are the Neisse on the N., and the March or Morava on the S. It contains masses of copper, lead, and iron and coal is found on some of its N. slopes.

SUDUST a river, Ramesse, rises in W. of gov. Orol, enters gov. Carraigov flows S. past Pogor and after a course of about 100 m., joins r. bank Dema.

SUDSHA, a tn. Ramesse. See **SUDSHA**

SUDUK a small river Holochistan rises in lat. 26° N lon. 65° 12' E. and after a S. course of about 80 m. falls into the sea in lat. 26° 36' N, lon. 65° 28' E. Traders ascend 10 m., or 12 m. in boats to cut wood.

SUR, an isl. Torres Strait, one of the Sisters, N. E. Cape York, lat. 10° 18' S. lon. 143° 52' E. about a third of a mile long, of coral-mud formation, low and thickly wooded. At the W. end of the island is a native village.

SUECA, a tn. Spain, prov. and 23 m. S. Valencia, 1 bank Jacar about 4 m. from the Mediterranean. The houses are well constructed, streets broad some of them paved, and there are five squares, which serve as market-places. Besides the courthouse the town has a prison, an hospital, two public schools for each sex, besides several private educational establishments and a parish church, also brick and tile kilns, four flour and five rice mills, all in a thriving condition. After the subjugation of the Muzulmans, this town fell to the Templars. Subsequently its population was greatly reduced by the expulsion of the Moors, and it suffered much in the wars of succession; but in later times it has been very prosperous. Pop. 6871

SUEDIAN a port, Asiatic Turkey, path Aleppo, 18 m. S.W. Antioch, on the site of the ancient Seleucia. It is a remarkably healthy place, and appears to present considerable advantages for the formation of harbours &c. for the accommodation of shipping. It is well sheltered, there are no sandstone rocks, and the anchorage is safe.

SUEBOS, a vil. Spain, prov. Leon, dist. Astorga, on a bright, with church, a primary school, and some trade in corn and cattle. Pop. 1064

SUEZ, a tn. and seaport, Egypt, near the N. extremity of the gulf of its own name, an arm of the Red Sea, 77 m. E. Cairo lat. 29° 56' 56" N lon. 32° 54' 15" E. (n.) It is a wretched ill built town, situated in a desert. The houses are of sun-dried brick, and the streets unpaved. It contains a bazaar in which are some tolerably well-filled shops, a vast

her of mosques, a Greek church, several khans, and a custom house. In the roadstead there is good anchorage for vessels of from 800 tons to 1000 tons, but the port will not receive boats of more than 60 tons. Being on the highroad between Egypt and the East, from has always enjoyed an extensive transit trade, and since the establishment of the overland route to India, it has become the residence of many merchants and agents.—The town is about 200 m. long S. E. to N. W., by 50 m. to 40 m. broad. The spot where the Israelites are supposed to have crossed the Red Sea on the Exodus from Egypt, is about 2 m. from the head of the gulf.

SUEZ (Isthmus cr.), a tract of low-lying land between the Red Sea and the Mediterranean, connecting Africa with Asia. Its extent, N. to S., is about 74 m. It is composed of shell-limestone rocks, mixed with strata of siliceous limestone, and partly covered with sand or salt-marshes. The surface is not uniformly level, but interrupted by some depressions, in which these salt-marshes or swamps occur, and generally has an inclination towards the Mediterranean. Drinkable water occurs in one or two places only. Traces of the canal by which Necho and Ptolemy Philadelphus united the E. branch of the Nile and the Red Sea are still visible.

SUEFID Kox ('White Mountain') a lofty range of mountains, bounding the valley of the Kabool river on the S., as the Hindoo-Koosh does on the N. It extends nearly E. and W. along the parallel of lat. 33° 50' N., commencing E. near Attock, lon. 73° 19' E., and terminating W. in lon. 65° 56' E. It is generally of primary formation, consisting of granite, quartz, gneiss, mica-schist, and primary limestone. The highest part, which is between the meridians of 69° 40' and 70° 30' E., attains an elevation of 14,100 ft. above sea-level, and is covered with perpetual snow.

SUFFIELD, par. Eng. Norfolk, 1458 ac. Pop. 237

SUFFOLK a maritime co. England, bounded, N. by co. Norfolk E. the North Sea, S. co. Essex, W. Cambridge, area, 907 860 ac., of which 820,000 ac. are supposed to be arable meadow, and pasture. The surface is generally flat, there being no upland throughout the whole county worthy of notice. The cliffs at some points on this part of the coast, composed of alternations of clay, sand, and gravel, are below deeply undermined by the sea. At other points the reverse of this has taken place, accessions of land having been formed by marine deposits. The general outline of the coast, which is about 50 m. long is pretty regular. The bays are shallow and the headlands have little prominence. The prevailing soils are strong clayey loams, with a substratum of clay marl and sandy loam and sand, the latter occupying the E. coast. The soil in the S.W. parts is poor but generally the county is equal in fertility to any in England. It is for the greater part of Suffolk is under tillage, which is carefully and skilfully conducted. The crops are principally wheat, barley, oats, beans, pease, buckwheat, turnips, cabbages, carrots, potatoes, &c. The pasture-lands are remarkable for their richness; but much of it has been ploughed up and the number and extent of dairy farms consequently reduced, although large quantities of butter are still made. The breeds of horses, cattle and hogs, are celebrated. Manufactures inconsiderable the principal are the combing and spinning of wool, and the manufacture of mixed silk and worsted stuffs. Suffolk is traversed by the Eastern Counties railway, and has two coast towns Ipswich and Bury-St.-Edmunds, and the boroughs of Sudbury and Eye. It returns nine members to Parliament, four of which are for the county. Pop. 237 215.

SUGATAGHII AKSA a vil. Hungary Thither Thelco, co. Marmara, about 12 m. from Selgiz with two churches, salt-works, and a trade in corn. Pop. 1187

SUGHED, or **SURUMU**, a tn. Asiatic Turkey, Anatolia, 1 bank Sakaria, 73 m. E. by S. Brusa. It consists for the most part of houses of wood and clay; but has a considerable trade in various which have long been celebrated.

SUGHERA, a small seaport, S. coast. Anzhu, 56 m. N. E. Aden, lat. 12° 21' 50" N lon. 45° 46' E. There is here a castle built of stone, in which the soldiers reside for several months of the year. Much millet is cultivated in the vicinity. Good water, bullocks, sheep, poultry, onions, and pumpkins may be easily procured.

SUELI, a tn. Prussia, prov. Saxony gov. and 83 m. W. W. Erfurt, on the Lamber, with two churches, a burgher-school orphan hospital, poorhouse, workhouse, and several

public offices. It has long been the centre of important manufactures in iron and steel, including furnaces; and in woollen and flaxen tissues, particularly fastens. There are also saw, oil, and other mills. Pop. 7080.

SUIH, a vil and par, Switzerland, on Aargau, near the junction of the Rhine with the Sarne, 2 m. S E Aarau. It has a church, a court, gymnasium, and saw mill. Many of the inhabitants suffer from gout and gravel. Pop. 1423.

SUI KOW, a tn. China, prov Fokien, 1 bank Min, N W Fow-chow. A very large number of boats are moored along the banks of the river here; and the principal trade consists in furnishing them with supplies. Pop. about 6000.

SUIFES, a tn. France, dep. Maine, 15 m. N N E Chalon. It is well built and has important manufactures of coarse woollen stuffs, worked mills, tanneries, dye-works, and a trade in cattle, corn, hemp and wool. Pop. 2461.

SUIR, or **SUNN**, a river, Ireland, rises in the Silver-Bloom Mountains, in the N extremity of co. Tipperary flows first circuitously S, through that county passing the towns of Holy-Cross, Golden-Bridges, and Caher, then, after a sudden turn N, flows E, forming the boundary between co. Tipperary and Waterford, then circuitously S E, forming the boundary between Waterford and Kilkenny and passing the towns of Clonmel and Carrick, and after a course of about 80 m. unites with the Barrow in forming the fine estuary of Waterford harbour. Its affluents are numerous but unimportant. It is navigable by vessels of 600 tons to Waterford, and by large barges to Clonmel.

SUIBAH, a seaport tn. Morocco. See **MOGADOR**.
SUIPICIO, or **SUIVU**, a vil and soc. Italy, Lombardy 7 m. S by W Ponte San Pietro, a bank Adda. It has a church and two chapels. Pop. 1007.

SUISUN—1 A tn. U. States, California, on the Sacramento, about midway between San Francisco and Sacramento. It occupies an elevated and healthy site and has been laid out on an extensive scale, with large squares, reserved for a university and other public edifices, and lots for churches of every denomination, but scarcely promises to become an important commercial position, though it may attract many inhabitants by the beauty of its climate and scenery.—2 One of the indentations of San Francisco Bay, E. of the Bay of San Pablo, about 15 m. long by 7 m. broad.

SUIAH KOS, a tn. Punjab. See **SUDAN**.
SUIAH, or **SUIAH**, a river, Spain, Balearic, prov. Balear. It rises near the boundary of prov. Gerona, flows N E, and latently N W, near the Guadalema, Guadalema, Guadalema, Guadalema, Estera, Guadalema, Guadalema, Balneario and the Molat, and discharges into the Guadalema, about 5 m. E. Don Benito. It is a stream of considerable volume, but in summer it is reduced sometimes to a series of pools. Total course, about 100 m.

SUK MURUTUKUN, a tn. Asiatik Turkey, 66 m. W N W Busorah, 1 bank Euphrates. It is the seat of considerable inland commerce, and has a large export trade in horses, generally considered the best that are bred in Turkish Arabia.

SUKUR, a tn. Sindh, a bank Indus, opposite Sukkur, 165 m. N Hyderabad, lat. 27° 44' N lon. 68° 52' E. It has still a few towers, mosques, and minarets standing, one of the latter a heavy and ill-proportioned column, 100 ft. high, in a state of tolerable preservation. The appearance of Sukkur itself and the scenery around it, is singularly picturesque and beautiful. In 1852 a commercial fair was appointed to be held here annually, commencing on January 1st, and to continue 46 days. Pop. 4000.

SUKUBD, a vil Hungary, Hither Danube, on Peth on the Danube, with a Catholic church, and some trade in wood and cattle. Pop. 2687.

SUKUM KALKE, a tn. Ahikma. See **BOUKOUN-KALKE**.
SUKUTI, a small tn. Punjab, nearly midway between the Beas and Sutlej, lat. 31° 37' N lon. 76° 55' E, in a broad and fertile valley, well watered and highly cultivated.

SULA, a river, Russia, rises in the N W corner of gov Kharkov enters gov Poltava, traverses it S S W, and joins 1 bank Dnieper total course, 220 m. Its water is very wholesome.

SULEDAL, a vil and par Norway, lat. and 48 m. N E Strangen, on river, as it issues from the W extremity of a lake of same name, to fall, a little below, into the Bukkeford Fjord 2600.—The lake is very narrow, but 15 m. long.

Vol. II

SULGFN, a vil and par Switzerland, cant. Thurgau, 12 m. E S E Frauenfeld, with a handsome church, which is used in common by Protestants and Catholics. Pop. 1104.

SULGRAVE, par Eng Northampton, 4100 ac. P 576.

SULHAM, par Eng Berks, 690 ac. Pop. 189.

SULHAMPSTEAD (Assens and Haxmunde) two pars. Eng Berks, 1901 ac. Pop. former 352, latter, 803.

SULIA, or **SULIA**, a river S. America, rises in the N of New Granada, prov. Esmeraldas, flows N E into Venezuela, turns gradually N E, and dividing into three branches falls into S W shore, Lake Maracaybo, total course, 180 m. Its chief affluents are the Grita, Sardinata, and Calatambo.

SULIMAN MOUNTAINS, a range in E. Afghanistan separating Daman from prov. Beshawar, extending from lat. 33° to 35° 40' N lon. 70° E. The highest summit Takht-i-Suliman or Suliman's Seat, attains an elev. of 11,000 ft. or 12,000 ft. but without snow during the height of summer. Little more is known of the geological composition of this range than that it consists of recent formations, principally sandstone and secondary limestone abounding in ammonites and other marine fossils, the strata being much shattered and contorted, and often overlaid by shingle. No stream rising in this range is known to reach the sea in any direction, or by any channel, except the Kurum. These mountains are generally considered the peculiar seat of the aboriginal Afghans; their vegetation is extremely vigorous and varied, being covered nearly to their summits with dense and lofty forests, while the valleys are overgrown with a great diversity of indigenous trees, shrubs, and flowers.

SULINA—1 One of the principal branches by which the Danube discharges its waters into the Black Sea, within the Russian gov. of Bessarabia. It quits the Dnieper or most N branch on the frontier of the Turkish serask Saratov, and the Russian gov. Bessarabia, about 5 m. above Tulchinsk, a little below, forming the Gurgurek or Edirli branch on the S, and before reaching the sea, has an N. branch of about 50 m. It is the most frequented branch, and is used for transporting immense quantities of corn, chiefly for the British market, but from the neglect into which it has fallen under Russian sway the bar at the mouth has been allowed to accumulate to such an extent as to render the river very difficult of access even to vessels of moderate tonnage. Early in 1854, the Russians further impeded the navigation by sinking several vessels full of stones at the mouth of an stream, about 1 m. from the mouth of the river, with a Russian custom-house. It is composed of a double row of encrusted wooden houses straggling along the river-side, with a dreary marsh behind them. Most of the houses are built upon piles, in the midst of pools of putrid water which ooze from the neighbouring marsh. In summer the place is reeking with fevers, and in winter it is almost uninhabitable from a cold. Pilots, fishermen, lightermen and tavern-keepers, with a few Russian soldiers, and a Greek priest or two, form the population.

SULKEA, a tn. Hindostan, prov. Bengal, on bank Hooghly opposite to Calcutta. It is a large and populous place, with large government magazines for war-housing the salt imported from the N. Circars and other provinces.

SULLINGTON, par Eng Sussex 2840 ac. Pop. 243.

SULLY, or **SULLY**, a tn. France, dep. Loiret, 1 bank Loire 12 m. N W Orléans. It contains a fine chateau which belonged to the lords of Tremouille, and was almost entirely rebuilt by the most distinguished member of that family, Sully, the celebrated marquis of Henri IV. P. 1005.

SULLY, or **SULLY**, Glamorgan, 1817 ac. P. 187.

SULMBERSCHITZ, or **SULMBERSCHITZ**, a tn. Prussia, prov. and 65 m. S S E Posen, on the Bartsch, with a Catholic church. Pop. 3100.

SULMONA [sua. Sulmo] a tn. Naples, prov. Abruzzo-Ulteriore II. in a fertile plain, 34 m. S S W Chieti. It is walled and fortified so as to rank as a fortress of the fourth class, has a superb cathedral 15 other churches, seven monasteries, four nunneries, an ordinary and a founding hospital, and a work-house a townhall, a remarkable specimen of the Cinquecento style, dye-works, manufactures of paper and different kinds of sheet-work, and is famous for its confectionery. Ovid the poet was born here. Pop. 7968.

SULPHUR ISLAND—1 A small N Pacific Ocean, the central of three islands which form the Volcano group; lat. 24° 49' N, lon. 141° 20' E (a). It is about 5 m. long N. N. E.

128

to S.E. and about 13 m. in street; of moderate height, and has, on the whole, a very barren appearance, though some green spots are seen. In the S. it terminates in a high hill almost isolated from the rest of the island. The soil on its surface has a strong smell of sulphur. On the middle of the island, from which dangerous breakers stretch about 3 m. E. and W., the sea breaks with great violence. — 3. An isl. Japan in Van Dusen Strait, off the coast of Kinaia. Lat. 8° 42' N. lon. 130° 17' E. It has a volcano upon it. — 4. An isl. N. Pacific, between the Japan and the Loo-choo isls.; lat. 27° 50' N.; lon. 126° 20' E. (J.)

SULSISQUE, a vil. and com. Belgium, prov. E. Flanders, 18 m. S.E.W. Ghent with manufactures of linen, an oil and five flour mills. Pop. 1820.

SULTANIA or **SULTANIAN**, a town, Parma, prov. Irak Ajoni, 160 m. W.N.W. Tobbano, on the Zengano, which here traverses the wide plain of Sultania. Extensive vines here cover a space of several square miles. The most important are those of an imposing mosque of great splendor.

SULTANPOOR, or **KELU**, a town, Punjab, cap. princ. Kulu, on S. slope of the Himalaya, near the confluence of the Ravi and Beas; 104 m. S.E.E. Lahore, lat. 32° 7' N.; lon. 77° 7' E. It consists of an upper and lower town, the latter, which is next the river, containing the residence of the rajah, and the former consisting of the houses of traders, shopkeepers and artificers. The principal imports are chinaware, coarse cottons, and woollens, and the returns are made in opium and musk, the traffic being conducted by wandering manducats, of whom the traders were born on their route to various places of pilgrimage in the mountains.

SULZ, a town, Württemberg, circle Schwarzwald, in a deep and narrow valley, on bank Neckar 88 m. S.W. Stuttgart with a Latin school manufactures of woollen and linen cloth, a brewery, worsted and other mills, and important brassworks from which much salt is made. Pop. 2349.

SULZ, a market in Lower Austria, about 8 m. from Waidersdorf with a church. Pop. 1207.

SULZBACH, numerous small places, Bavaria, particularly — 1. A town, Upper Palatinate, on a small stream of same name at its confluence with the Yala, here crossed by a bridge. It is walled, entered by four gates and has a castle, six churches, a chapel, synagogue, and Latin school, a Hebrew printing-press, and a trade in hops. Near it are iron mines. Pop. 2912. — 2. A vil. Lower Franconia, dist. Obernburg with a church, and several mills. Pop. 1120.

SULZBACH, several small places Württemberg: — 1. (under-Murr), a vil. circle Neckar in a wild and romantic valley with a church. Near it is the castle of Lauterbach. Pop. 1475. — 2. A vil. circle Jaxt, bell Gaildorf on the Kocher with a church. Pop. 1249.

SULZBURG: — 1. A town, Baden, circle Upper Rhine, 12 m. S.W. Freiburg with a church, and a bathing establishment near mill, and manufactures of beet-root sugar. Pop. 1144. — 2. A market in Bavaria, Upper Palatinate, on a hill above the Sala, an affluent of the Altmühl, 25 m. S.E. Nürnberg with two churches, a castle, and a bathing establishment. Pop. 1112.

SULZL, a town, in the Mecklenburg-Schwern circle Wendisch l. bank Recknitz, 21 m. E. Rostock. It is walled, has two gates, a church, and a bathing establishment, with fine walks and salt-works. Pop. 3580.

SULZLEID, a town, Bavaria, Lower Franconia, dist. Kitzingen, on bank Main, 10 m. E.S.E. Würzburg; with a church. Pop. 1028.

SUMALANG or **KOMERANG**, a large vil. Mal. Java, prov. Praeger 87 m. S.E. Batavia, beautifully situated, and exceedingly neat.

SUMANAP or **BOEMANAP**, the most E. division of Isl. Madura, resigned over by its own natives, but subject to the Dutch. Being deficient in water and not very fertile, the chief means of subsistence is the fisheries. Still agriculture and also trade, is more actively prosecuted than in the other portions of the island, as a consequence of which, the public prosperity is greater. Pop. 127,792. — **SUMARAT**, the capital of the S.E. coast, at the mouth of the Marungu, in a large bay in which is good anchorage for large vessels. It is a thriving place with several good stone-houses, a governor's house, a sultan's palace, a church, and a school. Chinese, Javanese, and Arab suburbs and near is a Dutch fort, built in 1758.

SUMARETN, or **ROSEKINE**, a market town, Lower Austria, 19 m. from Fischau, It consists for the most part of thatched houses but has a considerable trade in corn, fruit, and wine. Pop. 1400.

SUMATRA, a great island in the Indian Sea, immediately under the equator and the first (from the W.) of that chain of islands which, extending with a S. curve from the Malay peninsula to Papea and the Philippine Islands, lie close towards the N. the region known as the Indian Archipelago. Its extreme limits are lat. 5° 45' N. and 5° 55' S.; lon. 90° 40' E., and 106° 5' E. But as the island extends in its greatest dimensions nearly S.E. and N.W., its extreme points, though differing only 10° 40' in latitude, are separated by a distance equal to nearly 15, or about 1000 m. The greatest breadth of the island is in its middle, nearly opposite to Singapore, and measures about 240 m. The average width may be taken at 140 m. so that the area of the island will be in round numbers, 140,000 sq. m. It ranks, therefore, in magnitude as the second of the Asiatic islands, Borneo being the first. The N. portion of Sumatra is separated from the Malay peninsula on the E. by the Strait of Malacca, and its S.E. extremity is separated from Java by the Strait of Sunda.

Aspect and Mountains — Sumatra appears to one who sails along its W. coast to be an elevated ridge, the mountains rising abruptly at a distance of 2 m. from the shore, and in many places overhanging the waves with steep cliffs. These mountains nearly all reach and disappear in the clouds at a height of about 3000 ft. In some places they appear above the clouds and a few elevated conical peaks rise to a second stratum of fleecy clouds, in which they terminate. This mountain barrier exhibits little variety of form, and the dense forest that clothes it increases its uniformity. The S. side of the island has a totally different character and spreads out into interminable plains, nearly as level as the sea. The mountains, viewed from the W. sea-shore, appear at first view to form a continuous ridge; but dense mists rising in the valleys indicate at times the breaks in the chain, and enable the eye to distinguish also three or four separate ridges all parallel to the coast. The chief of these is named Bukit-Barisan. On the S.W. side of the island the mountains rise abruptly from the shore, and for 300 m. or 400 m. the average width of the plains between the mountain-forests and the sea does not exceed 2 m. On the N. half of the W. coast, the level maritime tract has a breadth of 6 m. or 8 m. In a few places, chiefly at the opening of transverse valleys, the mountains retire so as to allow a greater extension of the alluvial plain, which in a few places has a width of 12 m. to 20 m. The mountains extend for hundreds of miles as uniform ridges, at first (beginning from the S.) 2000 ft. or 3000 ft. in height, then from 3° S. to the equator, attaining a general height of 5000 ft. Further N. they retire from the shore, and sink apparently into mere hills. Some elevated and conspicuous peaks indeed rise at wide intervals above the mountainous ridges, yet in the whole length of 1000 m. there are hardly 20 summits exceeding 8000 ft. The chief of these are as follows: —

Tempo.	Lat.	Feet.
Tempo.	2 54 S.	20,440
Tempo.	1 5 S.	15,740
Tempo.	1 5 S.	6,580
Tempo.	0 34 S.	8,700
Tempo.	0 25 S.	10,160
Tempo.	0 11 S.	9,420
Tempo.	0 48 N.	11,160
Tempo.	0 17 N.	10,840

The first four of these are volcanoes, the others being in all, except Tempo, at some distance below the summit. The other known volcanoes in the island have generally an elevation of 6000 ft. or 7000 ft., and do not exceed 15 in number. Sumatra is therefore, in respect to subterranean fire, far more quiescent than Java, which though much smaller, has above 50 active volcanoes. The same may be said of the island, rising abruptly at no great distance from the shore, are grand and conspicuous objects at sea, and hence the estimates heretofore made of their height have been greatly exaggerated. The predominant rock is trachyte. With this are found granite, sienite, porphyry, red sandstone and limestone, in many varieties. Basalt occurs along the coast, and at some points colored basaltic columns form convenient land marks. Gold is collected in all the streams that wash the granitic hills,

chiefly at the sources of the rivers Jambi and Indragiri. The amount of gold annually exported has been estimated at 80,000 lb. The steel of Mesanghabin is deemed excellent. Copper and tin are exported to China chiefly. To these valuable minerals may be added petroleum, sulphur and nappal, a steatite rock resembling soap, and used as a material for carving.

Valleys.—The mountains of Sumatra extending S E to N W in several parallel ridges, necessarily involve longitudinal valleys extending in the same direction. The lateral valleys, descending to the coast on the W, are so short and steep that they hold out no temptation to the native husbandman. The longitudinal valleys, on the other hand, often 10 m. wide, and in one instance at least 100 m. long have a moderate fall, allowing irrigation and the cultivation of rice and consequently they are the chief seats of the indigenous population, and of the characteristic civilization of the island. The valley alluded to extends from the cone of Merapi, lat. 0° 54' S. to that of Lake Raja, lat. 1° 25' N., and is by some regarded as the cradle of the Malayan race. But these valleys of the interior remain as yet but imperfectly known to Europeans.

Lakes and Rivers.—The rivers on the W coast of Sumatra are very numerous, but are, with few exceptions, little more than mountain torrents. On the E side are several large rivers, winding slightly through level plains, and forming extensive deltas at their mouths, but in the upper part of their course they are unknown to Europeans. The chief of these rivers are the Baras, or river of 1 stream, which falls into the Strait of Banca, and is navigable for a distance of 800 m.; the Jambi, the sources of which are near Telang and Indragiri; and the Indragiri, which springs from the feet of Merapi and Singalang. Of the lakes included in the highland valleys, the best known are the lakes Singkarn and Dano (the latter name signifies lake) the former lying S E the latter N W of Merapi and Singalang. Singkarn about 13 m. long and 4 m. wide, lies at an absolute elevation of 1035 ft. Dano, at a height of 1500 ft. is much smaller. Lake Bih Dabo, at the sources of the river Singkil (lat. 2° 30' N.) is said to have an elevation of 4000 ft.

Climate.—Lying directly under the equator, Sumatra enjoys great equability of temperature, but as it stretches across the direction of the monsoons, its mountain-ranges arrest all the vapours, and consequently rain falls almost in common, at least in the S. half of the island. The N. half owing perhaps to the vicinity of the Malayan peninsula is less characterized by humidity. The Battaks and tribes farther S. sow fresh land with rice at all seasons of the year, but for previously cultivated grounds there is in every district a sowing season, adapted to the local climate, and chosen so that the ripening of the rice may take place in the driest months of the year. It is said that the thermometer rarely rises above 93°, and it seldom falls below 78°. Among the Battaks and on the highlands of Faidang and Palembang the longevity of the natives seems to attest the salubrity of the climate; but in the settlements on the coast surrounded by marshes alluvial flats, and mangrove-thickets, the Dutch find the climate deadly.

Plants.—The swampy deposit on the coasts is covered by mangrove (*Rhizophora*), the roots of which give consistency to the growing sea-marsh, and promote its transition to the state of dry land. In places exposed to the waves, the casuarina precedes the mangrove. Above, and protected by these plants of gloomy aspect, flourish carnarua, croton, calophyllum, lubans, and many other species, the superb flowers of which form a rich garden close to the sea-side. A little farther in we come to the palms, here the traveller is shocked by the creeping species, rotting plectocoma, &c. which entwining their branches along the ground, and often armed with thorns, form impenetrable thickets. The caryota, areca, and nibon palms, the latter with sharp spikes, grow erect. On the steeper shores, the myrtle (here a large tree) and the fig in several varieties, spread in families the rotting and gommil-palm flourishing beneath the shade of the larger trees. Above the figs and myrtles, or from 500 ft. to 6000 ft., oaks of several species form the greater part of the forest. But though a great tree, and valuable for its timber, the oak is here decidedly inferior to the dryobalanus, which produces the precious camphor. This tree prevails N. of Ayerbahe,

0° 20' N. of the equator. S. of that point its place is taken by the gum-yielding *Acacia*, which is truly the pride of the Indian forest, attaining in height and circumference an incredible magnitude. The bare enumeration of only the more remarkable species in these forests would exceed our limits; but we cannot help observing that the colossal trees of hundreds of fathoms, are themselves covered by creeping plants still more luxuriant and various, and that the largest flower known, the *Rafflesia*, which measures 7 feet in diameter, and has a calyx capable of holding six quarts, is a parasitic organism of trees of rough bark in these forests. When Sumatra was first visited by Europeans, pepper was its only cultivated produce. This culture was afterwards superseded by that of cotton. But at the present day the tree-cotton exported is of little value and pepper is again the chief production. Besides this, Sumatra exports camphor, which differs from the Japanese; bismuth, cassia or common cinnamon rotting (patana) ebony teak, sandal wood, and aloes. To these articles of export may be added gambier, edible birds nests, wax, rice and every thing the Battaks, and other indigenous tribes of the highlands, cultivate for their own consumption besides rice, maize (which is economically productive), batatas and talas (*Colocasia esculenta*), another edible tuber. *Capsicum* ginger, betel, tobacco, and indigo are reared in their gardens. Their fruit-trees are relatively few particularly on the S.W. side of the island, yet they have the banana, papaw, mango, durian and a citron of agreeable flavour.

Animals.—It might be naturally supposed from the proximity of Sumatra to the Malayan peninsula and to Java, that it would have a fauna in common with those countries. But experience refutes this expectation, and shows that Sumatra in regard to its zoology resembles Borneo more closely than the countries with which it is almost in contact. The elephant and the tapir, frequent in Sumatra, are unknown in Java. The former island has the two-horned the latter a single-horned rhinoceros. In the forests of Sumatra are two species of deer (*Cervus* rusa and *C. apudensis*), larger than the European red-deer and the latter of which is peculiar to the island. The orang-outang (*Pithecia sylvina*) inhabits Sumatra, as in Borneo, the low alluvial tracts and thickly-wooded deltas, and is wanting in Java, where alluvial plains have little extension. Of the genera *Hylobates* and *Simphobates*, Sumatra has several species peculiar to itself. The *Cynomys* *Rafflesia*, a singular insectivorous animal resembling the mole of America, is met with only in Borneo and Sumatra. Besides the royal tiger, the natives describe a large carnivorous animal inhabiting the wild forests and which is said to have a mane; they also speak of a wild dog of great size, of a deep red color and with a tufted tail. The only antelope known in the Indian Archipelago is the bawing-stag, or wild buck of Sumatra. In this island the domesticated zebu or humped cow, retains its original characteristics in the greatest purity and the breeds of kine are collectively smaller than in Java. The two neighbouring islands differ much even in their birds and when they have a species in common, the Sumatran individuals are almost always distinguishable by the superior brilliancy of their plumage. In the classes of reptiles, fishes and even of insects, many species are found in Sumatra which are unknown in Java. On the other hand, one species of crocodile (*C. boopis*), is common to these islands while the great rivers of Borneo nourish several distinct species. Of the domesticated animals in Sumatra, the most important by far are the pigs by the number of these, is generally estimated the wealth of each community. Next to these, hank cows and horses which are, however very few in relation to the extent of the island. The bullock is more frequent in the low country but is only valued as food, and never yoked for labour as in Java. The horse of the highlands, chiefly Tobak in the Battak country, is small but vigorous, and capable of enduring much fatigue, it resembles closely the horse of Borneo. The goat is not very common the sheep and ass are unknown. The dog, though a great favourite with the Battaks and other hill-tribes is often killed for food. The common fowl is as plentiful here as on the coast of the Indian Archipelago, and cock-fighting is the darling amusement of the people.

Dialects.—The political divisions of the island are but imperfectly known. The sultanate named on the coast here often holds power. The confederations of villages, which are characteristic of the interior form in general very unob-

trouble state, and there is reason to suspect that the Dutch established on, and affecting the sovereignty of the island, purposely overlook and assign as much as possible to oblivion every claim to independence. The authority of the Dutch now extends nominally at least, over the greater part of the island. Their territory is divided, for purposes of administration, as follows:—

Dutch Possessions.—1 The government of the W coast, the head of which, with the title of civil and military governor of Sumatra resides at Padang lat. 0° 56' S. This government includes the following four provinces, namely:—

a. The country of the Betahs or Batakhs, which extends on the W coast from Tapanuli to Banghal (lat. 1° 30' to 2° 30' N.) and spreading out into a broad table-land in the interior, reaches the eastern coast at Blais. The islands Nias, Poutyan, Monakari, the Bata group, and some others, are annexed to this division the immediate control of which is left to a commissioner, residing in Tapanuli.

b. Ayrangbang extends along the W coast, from the Bay of Tapanuli S. to the river Masang and embraces the populous districts round Opilar with those of Pasmam Angkots, &c. It is under the care of a resident, stationed in Ayrangbang.

c. The hill-districts, Agam, Allabau, Fruman, the Kotas &c. in the interior of Padang are watched by a resident, stationed in the fort of Van-der-Capellen.

d. Bangkhalug (Bemeculen) S. of the preceding embraces the districts of Indrapoera, Moco-Moco, Soloma, &c. The resident occupies Fort Marlborough close to Bemeculen.

2 The country of the Lukupongs comprising the S districts of the island on the Strait of Sunda and extending N to the Strait of Banca, is under the supervision of a resident, civil and military whose seat is at Tarabang. This wild country of marsh and forest is thinly peopled, and to a great extent uninhabited.

3 Palembang, with a resident in the town of that name, includes the ancient kingdom of Palembang, together with that of Jambi adjoining the former on the N., and the chiefs of which submitted to the Dutch in 1855. This province, or residence, as the Dutch call it, owes its importance to the great navigable rivers flowing through it, and terminates at Cape Tunkal Labe, lat. 0° 52' S. which is consequently the N limit of the continuous dominion of the Dutch on the E coast. But they claim also some portions of the coast about 350 m. further N. W., in the Batak country in all these possessions they leave the entire administration to the native chiefs, in conformity with ancient customs, but exercise a controlling influence in council. The territorial revenues are unequal to the expenses.

Native States.—Of the independent states of Sumatra, the most important, perhaps, is Achén the capital of which, of the same name, is situate at the N W angle of the island. The kingdom of Blak on the E coast, lat. 1° N in the vicinity of Singapore, still retains its independence. In the interior of the island at the F foot of the mountains, and between the provinces of Padang and Palembang, are several small states, not yet reached by the pretensions of the Dutch. A portion of the Batak country Korracl and Luann, the Belgang, Pasman, and Kulon tribes all maintain their independence.

N of the Batakhs there is little known of the interior. **Inhabitants.**—Sumatra is possessed, at the present day, by a very mixed population. Even those tribes of the central highlands, who are frequently pointed out as types of a pure race, exhibit such diversity of physical character as can be explained only by supposing some mixture of breeds at a remote period.

The Malays round the coast are not all of the indigenous stock, but are collected from every quarter of the archipelago. Hindoes appear to have settled at an early age on the N coasts of the island, and hence the people of Achén are taller and more vigorous than Malays in general, though they retain the fierce looks and repulsive features of this race. The Arabs in the island, though few in number have always formed an important class. Chinese are numerous, particularly on the E coast. In Palembang, the sultans, desiring the establishment of colonies, would not allow them to live on shore. They built their houses, therefore, on rafts, moored in the river, close to the banks, and these floating houses were found to have so many advantages, that the Chinese now prefer them, though at liberty to live on land. N W of Palembang, the Orang-Kubu (Kubu people) live in a savage state,

and show any intercourse with the Malayan tribes around them. They are taller and stronger than the other native tribes, go nearly naked, and have no weapons but the spear. The Orang-Kubu must not be confounded with the people of Menangkabau, a kingdom which formerly flourished on the highlands of Padang, and which seems disposed to consider as the source and nursery of the Malayan race. It certainly is remarkable that, while everywhere else in the Indian Archipelago the Malays occupy the coasts, the aboriginal inhabitants being driven into the interior, a nation of apparently pure Malays should be here found cultivating the hills, unacquainted with the sea, and with institutions bearing marks of great antiquity. It appears also that on the adjacent mainland the Malays in general are called Menangkabau, whereas the name Malayu, meaning wanderers, evidently dates from an emigration and not from the origin of the nation.

The Batakhs.—N of the ancient Menangkabau, where the Highland attains its greatest breadth and greatest elevation, are the Batakhs or Batakhs, a very peculiar and interesting race, whose origin however and relation to their Malayan neighbours, are, in the absence of history and tradition wholly inexplicable. The Batakhs, like the Malays, fall short of the European stature rarely exceeding 5 ft. 4 in. in height, but they differ from the Malays in having handsome features and muscular limbs. The disagreeable features of the Malay are always modified often nearly effaced in the Batakhs. He has an ampler forehead, better formed eyes, finer lips, his cheek bones are less prominent, and his face more oval. Altogether he differs from the Malay by approaching decidedly what is called the Caucasian type. His complexion is sometimes fair and his hair brown or Auburn. Yet there is much diversity as to physical exterior among the Batakhs, who seem to hold an intermediate position, not fixed precisely between the Caucasian and Mongolian types. It is said, however, that the former of these decidedly predominates in the female half of the nation, the women having almost always oval faces and regular features.

Manners.—The Batakhs may be considered as fairly representing in most respects the indigenous population of the island. Their ordinary dress is simple, and consists merely of a banyan or head-dress, worn as a turban, and a serow or loose trowsers, reaching down to the knee. The upper part of the body the neck, and arms, are usually uncovered in both sexes, but in cold weather or for ornament the wear a jacket, or sarong about two yards long, over the shoulders. A handsome *jilbab* with a fringe of beads is the distinction of a rajah. Their cloth is home-made cotton very coarse but strong and good-looking dyed blue or red with indigo or the *Morinda citrifolia*. None but the poorest mountaineers clothe themselves with the bark of trees. Young girls wear rings of wire round the neck, wrist, and ankle. The rajahs alone wear armlets of ivory or of a large shell (*Tridacna gigas*). They never tattoo themselves, nor do they like the Malays, stain their teeth black. The lower part of the Batakhs' houses conforms to the prevalent architectural system of the Indian Archipelago. The editor is raised on four posts or pillars from 4 ft. to 8 ft. above the ground. The dwellings of the poorer class are made wholly of bamboo, they are large baskets, in short, dashed with the broad-leaved grass called *alang*, but the better kind of houses are framed of good timber, and over the wattled sides are laid plates of bark 10 ft. long and 3 ft. wide, peeled from large trees, and then pressed flat with heavy weights as they dry. The structure thus framed is a quadrangle, about 12 ft. wide and 24 ft. long. The fashion of the roof now placed upon it is peculiar to the Batakhs. The frames which are joined to form it resemble a life-boat in outline, curving upwards at the extremities, so that the roof formed on is hollow in the middle, while its extremities, pointing up, project considerably beyond the house. Where the wall of the house is 6 ft. high, the peak of the roof is often 12 ft. higher. In good houses a partial ceiling forms a second story, which is used as a store-room, and under the projecting peak of the roof, the public being both open, is a balcony, sufficiently elevated, yet commanding a view of the village, and reserved by Batakhs hospitality for the use of casual visitors and strangers. The house is entered by a ladder, through a door little more than 8 ft. high, in the narrow end, and has no windows. The houses of rajahs are often 40 ft. long, and wall put together, with frames of strong

timber, and floors and sides of smooth planking. They are ruled 10 ft. or 13 ft. above the ground, so that cows and horses may be stabled underneath and are entered, not at the end, but through a trap-door in the floor. In every village there is a well built house reared on six elaborately carved posts, and which seems to serve at once as a temple and a townhall. In the forest-districts it is not unusual to see houses built in the trees sometimes several in one great tree, the main stem of the tree being cut away and the horizontal arms remaining.

Industry.—The poor Malays of Palembang build excellent and very beautiful boats; the Battaks construct very solid houses for their chiefs. The agriculture of these people is very slovenly; nature has been bountiful to them, and they require but little. A rude spade and hoe are their only implements. Yams on the highlands of the Battaks are to be seen on all embankments, and are raised in design and execution anything of the same kind existing in Java. The labours of the fields fall chiefly on the women; and in Toliak, indeed, it is customary for the women to stay at home nursing the children, while the men toil in the rice-fields. Unmarried girls, however, are exempt from field-work, except at the time of the rice-harvest, when none are spared, young or old who are capable of assisting. In this oppressing the weaker sex with an undue share of labour, the Battak men are guided solely by the wisdom of their ancestors or, as it may be called, perhaps with equal justice, traditional barbarity. When their feelings are appealed to their treatment of their partners is always generous and kindly. Polygamy is not forbidden by any law, and yet it is unusual, the price of or purchase we might say, the settlement on a wife, being so high that few can afford to have more than one. The rajahs alone have sometimes six or eight wives.

Government.—Among the Battaks, and indeed all the indigenous tribes of Sumatra, the characteristic political tendency is one that could have originated only in the recesses of the mountains, every village affects independence. But to obviate the incessant petty wars to which this state of things might be expected to give rise, the villages often confederate, the local chiefs, or *raja*, forming a council for the regulation of affairs. Thus at Padang we hear of the sixteen *kotaks* (villages), the ten *kotaks*, &c. But confederation never changes the temper of the people, and the Sumatran is always refractory against any authority save that of his village chief.

Religion.—There is no trace of any system of religious opinions among the native tribes of Sumatra. They have no temples, no priests, and perhaps no idea of Divine beneficence. Their *Begra* seems to be an evil spirit, and demons are supposed to haunt the high mountains. On the coast, Buddhism appears to have been introduced at an early age, but it has been since completely superseded by Mahomedanism which among the Malays, however, is everywhere of a very relaxed character. The Arabian doctrine of Islam, though seductive and ordinarily successful among half-civilized men, found, in the terror of this island an insurmountable obstacle to the popular economy for the Sumatran prides himself on his droves of swine. His pigs wallow beneath his house, the open bamboo floor of which allows him to enjoy in some degree the pleasure of their company. He sometimes shares with them his hut, always their dirty habits. His flocks on him his ancestors always did so. How therefore could he desert his pigs, to follow a porcupine prophet?

Language and Learning.—The Battaks have had the art of writing from a date beyond the reach of their traditions. Their characters are peculiar and also their mode of writing, for they begin at the bottom of the page, at the left-hand side, and place letter above letter in a vertical column till they reach the top, when they return to the bottom, at the right, to begin a second line. Their ancient books are written in a brilliant ink, on paper made of the bark of trees. At the present day, ink has fallen into disuse or been forgotten, and the modern Battak writing is furnished with an iron style, on slips of flattened bamboo. Their books, of which in truth there is little known, are said to have no value. Their laws or *Hadat* are not written, but are essentially oral records of custom, and to write them would tend to subvert a custom essentially connected with them, namely that of wrangling about their meaning. The *Hadat*, however, form an ample

and equitable code, and altogether the Battaks manifest, in nobility of mind, generosity of disposition, steadfastness and love of truth, a great superiority over the Malayan nations who surround them, and with all their rudeness, they are patterns of incorrupt probity in comparison with the Javanese, the most civilized of those nations.

Cannibalism.—The most intelligent traveller who has depicted in these bright colours the character of the Battaks, also confirms the rumour often doubted, that they are cannibals and according to his statements, their cannibalism is perpetuated under circumstances particularly shocking. The laws of the Battaks allow the penalty of death to be commuted in most cases for pecuniary fines. But there are exceptions: thus, in case of adultery, if the injured party be a rajah or chief and the offender a common man, the latter must be eaten. Enemies also, taken with arms in their hands, outside of a village, become the food of the villagers. If an enemy be taken within the village, his life depends on the generosity of the captor. When a man is to be eaten, the whole population of or connected with the village assembles to take part in the feast of justice. The wretch is tied to a stake, and numerous fires are kindled around. The village chief then stepping forward recites the case and makes a speech—for the Battaks make speeches on all occasions—and that done, he stabs the man when the bystanders immediately rush forward the complainant or injured party being allowed precedences, eat their victim in pieces, throw the flesh into the fire for a few minutes and then devour it. But frequently the sufferer is not previously despatched but the prosecutor rushing at him cuts off his cheek, or the flesh from the inner part of the arm. The rest follow his example with alacrity while the miserable victim lives long enough to see half the flesh stripped from his body and devoured before his eyes. This atrocity is rendered still more dreadful by the fact, that the Battaks, who are not aware of the disgust with which Europeans regard such proceedings, ingeniously confine their liking for human flesh. It appears that their criminal laws are constantly strained for the sake of making sacrifices, that cannibalism claims no great antiquity among them but was first introduced in the 17th century. That some thoughtful eyes have proposed the abolition of the custom but their wisdom and moral feeling have not as yet been able to prevail against brute appetite, and in 1840 two St. Catholic missionaries were killed and eaten by the Battaks. Backed by the authority of the Dutch, the chiefs will probably soon achieve this important reform.

Population.—The population of Sumatra has been often estimated at 7,000,000, but it is not likely that it exceeds 4,500,000 thus distributed—

Acheen down to Mak.	800,000
Battaks	1,000,000
Malays of Padang and Palembang	1,000,000
Rajangs and Pannians	500,000
Langkangs	100,000
	4,500,000

History.—Sumatra was first visited by the Portuguese in 1506, but it was not till 1600 when the Dutch established a factory at Pulo-Chinggo, on the W. coast, that Europeans obtained a firm footing on the island. In 1666 the Dutch Company took possession of Padang, and soon after enlarged its territories, by treaty with the Sultan of Acheen. Since that time they have gone on continuously consolidating and increasing their dominion much more by negotiation and the management of parties than by force of arms. In 1824 Ben coolen was ceded to Holland by Great Britain, in exchange for Malacca. In 1835, however, the Dutch found it necessary to make a vigorous armed effort to suppress their native allies, the Battaks in particular from the Padris, a fanatical horde who threatened to overrun the island. The originators of this religious war were Malay *Hijis*, who had probably imbibed during their pilgrimage to Mecca the entire doctrine of the Wahabis, and returned to their own country filled with schemes of conversion and conquest. But these pious fire-brands shared the usual fate of fanatics; their persecution was out of place and season, their doctrines struck at the vital of society. They condemned opium, forbade the abetting of avarice, they burnt the ancient and venerated books of the Battaks and worse than all, in a most relentless manner they killed their pigs. Both Malays and Battaks resisted

them monsters to the utmost. The Dutch, therefore, easily turned the scale, and the Fudris, though fierce and reckless, were at length completely routed and dispersed. The country of the Batinas, previously closed against strangers, was, after this victory, opened to the Dutch.

Along the shores of Sumatra are numerous islands, or groups of islands, generally represented as connected with the bar, in fact, no such connection exists between the great and the adjacent small islands, which are naturally and historically quite distinct. These islands are, along the W coast (at a general distance of 70 m.), the groups of Nias, Bata, Kiboro, Pura, and Pugeh. On the E., in the Strait of Malacca, are Perang, Pajura, and other islands opposite the mouths of the rivers Sik and Kampar. Farther S is the group of Kioaw or Lankas, near Singapore, and after these Banks and Billiton.—(Marsden, *Hist. of Sumatra*, Batinas, *Memoirs of S. Miller*, *Rapporten tot de Koninklijke Akademie*, Leyden 1846. Fr. Jansz, *De Buitenlandse afzendingen*, Berlin, 1847. *Verhandlungen der Naturforschenden Vereins*, Leyden, 1839-49; *Tijdschrift voor Nederlandsche Indische*, Crawfurd's *Indian Archipelago*.)

SUMBAWA, or **SUMBAWA**, an isl. Indian Archipelago, bounded N by the Java Sea S. the Indian Ocean W the Strait of Allau, separating it from the island of Lombok and E. the Strait of Sappi separating it from the islands of Comodo and Flores. lat. [S.W. point] 9° 2' S. lon. 118° 42' E. (S. E.) is about 160 m. long E. to W. by 81 m. across breadth and of irregular form, being deeply indented by arms of the sea. Along the coasts are a number of small islands. It is divided into six native states ruled over by rajahs, Tomboro and Sumbawa on the N coast, whose inhabitants are the bravest in the island. Bima on the E. where the Dutch have a resident. Lompo, Sengar and Pupa hat all of them acknowledge subjection to the Dutch. The soil is exceedingly volcanic in some places fertile, and watered by several rivers. Pepper-wood and rice are the chief products beyond the usual tropical fruits. Taxes and swine are plentiful but cattle, goats, and fowls are not abundant. There are two breeds of horses that of Tomboro and that of Bima the latter, the finest in the Indian Archipelago, is extensive bred and exported. Fish are plentiful and edible birds nests are procured on the coasts. Gold is obtained in Sumbawa and Lompo sulphur and saltpetre in Bima and pearls on the coast of Papelet. Sumbawa is mountainous, and its heights have such a remarkable appearance, that once seen they are never forgotten, a fact which renders them an excellent landmark for ships passing to and from China. West the N coast is the great volcano of Tomboro or Tombora, 8940 ft. high, of which a dreadful eruption took place in April 1815, the noise of which was heard in Celebes the Moluccas, and Sumatra or over an area with a radius of above 840 m. from the volcano so close at hand did the explosion appear to be in Java, that many thought there was an eruption of one of the largest volcanoes in that island. The ashes thrown up darkened the air, and on the neighbouring island of Lombok many people were buried under them and many died from the famine caused by the destruction of the vegetation. They fell on the E. coast of Java, about 240 m. off, to a depth of several inches and they reached over to Sumatra, 340 m. off. In the island of Sumbawa itself the devastation was fearful in the district of Tomboro alone 12,000 people were destroyed; the sea also rose and swept away men and houses, and fifteen years afterwards the vegetation had not recovered from the effects of this dire disaster. Another eruption occurred in November and December 1836, but much less destructive in its effects.

SUMBELPOOR, a m. and fort, Hindostan cap dist. of same name, 1 bank Mahanuddy 167 m. W N W Cuttack lat. 21° 8' N. lon. 85° 57' E. The town extends N and E. about 2 m., and contains numerous temples. Pop. 20,000. The fort stretches about 1/2 m. along the banks of the river but is incapable of making any protracted defence against artillery.

SUMBUL, Sumbul, or **SUMBARUN**, a vil. Cashmere, 1 bank Jialum here crossed by a large bridge lat. 34° 11' N. lon. 74° 30' E. It is surrounded by a lofty grove of trees, by which it becomes distinguishable at a great distance.

SUMGH, **SUMUNGU** or **SUMUET**, a co. Hungary, bounded N by the Balaton or Plattensee and E. Vaypina, E. Tolna and Iserege, S. Schavanya, and W. Croats and au.

Simled. Area, 1838 sq. ac. m. It is traversed by a low chain of hills, which gives rise to several small streams, either flowing N.E. towards the Balaton or S. to the Drava, which bounds the county on the S. and S.W. Along the lake, about one-half of which belongs to the county the surface is low, and everywhere covered with marshes. In other directions it is generally fertile; and in addition to good crops of corn, produces excellent wine, and has rich pastures, on which numerous herds of fine cattle are reared. Tobacco and fruit also are extremely raised and there are several extensive forests, abounding in game, and containing excellent timber. Manufactures have made little progress. A majority of the inhabitants are Magyars. Kapovar is the capital. Pop. 320,400.

SUMEGH RINCE, or **SUMUNGO** a m. Hungary co. Szabolcs, on a height, 10 m. N W Topolca with a suburb, Franciscan monastery, a castle, and a trade in wine, wood, and wax. P. 2692.

SUMERE [anc. *Sutunus*] a m. France dep. Gard, 6 m. E. Vigan with manufactures of cotton hosiery, and cotton-mills. Pop. 1877.

SUMIDOURO [Ahyas] a river Brazil rises near Diamantina, prov. Mato-Grosso flows N., and joins bank Arns, about 110 m. below the confluence of the Preto. It plunges at one part of its course into a deep pool, pursues its course under ground, and afterwards reappears.

SUMJANEZ a vil. Hungary Higher Themas co. and 25 m. N W Gicse with church, and an excellent spring, an iron-mill, and a trade in deals. Pop. 1845.

SUMMER ISLES, a group of isls. Scotland, off W coast of an isolated part of co. Cromarty at the N.W. entrance of Loch Broom. They are well situated for fishing-stations, but are remarkably bleak and barren. The largest of them, called Tanna-More, is about 2 m. broad, 1 m. long and 400 ft. high. It has a small pier.

SUMISWALD a vil. and par. Switzerland (an. and 15 m. E. N. E. Bern with a handsome church, an old castle now converted into a parish-house and manufactures of ironware, hats, earthenware, and wind-mills. Pop. 5497.

SUMY, a m. Russia. See **SUMY**.

SUNA a vil. and com. Italy Piedmont. riv. Novara prov. and about 1 m. N W Pallanza, E. shore, Lake Maggiore with an ancient church and a dilapidated castle. Pop. 1213.

SUNBURY, par. Eng. Middlesex. 2400 m. P. Pop. 2078.

SUNDA ISLANDS, a group of his Indian Archipelago composed of the Great Sunda Islands, namely Sumatra, Borneo, Celebes, Java, Banks and Billiton and of the Lesser Sunda Islands namely Bali, Lombok, Sumbawa, Flores, Timor, or Sumba, Sabro, Solor, Lombok, Ombai, and the Tmor group.

SUNDA STRAIT the channel which separates Sumatra from Java. It is about 100 m. long by 15 m. broad at its narrowest part, and interspersed with several islands. It leads from the Indian to the Pacific Ocean, and is much frequented by ships to and from China, Manila, and Batavia.

SUNDAL, a river Norway bail Sunddal, issues from a lake at the foot of Sueschiken flows E. then N. then W., and falls into the Tringvid Fort, total course, about 70 m.

SUNDAY or **RAOON**, an isl. (N.W. point) 22° 12' S. lon. 178° 18' W. (N. E.) It is of a triangular form, and not more than 12 m. in circuit high, rugged, very steep, and covered with wood, and without anchorage. It is said to be inhabited by a few white men.

SUNDEEP an isl. Hindostan Bay of Bengal, at the mouth of the Megna E. of (Chittagong) length, about 16 m. average breadth, 6 m. entirely of alluvial formation. About the beginning of the 17th century it was taken possession of by Portuguese adventurers, who had been expelled from Aracan and who made it a famous seat of privateering. Selecting Sebastian Gonsales as their chief, they converted it into an independent principality, and are said to have had a force of 1000 Portuguese, and 3000 native infantry, 300 cavalry and 80 armed vessels of different sizes. The tyranny of Sebastian having disgusted his own countrymen and led to the desertion of the greater part of the natives, Sundeeep fell into the hands of the Mughls, who erected a stockaded fortification upon it, and had fortified the lower districts of Bengal, carrying off in the inhabitants into slavery. They were finally subdued in 1686, by Shasta-Khan, the Mogul governor of Bengal.

SUNDEBUNDS, a dreary, woody region, Hindostan, forming the delta of the Ganges (old and)

SUNDERLAND, a market tn., seaport, town, and port for England, on, and 12 m. N. E. Durham at the mouth of the Wear, here crossed by an iron bridge with a single arch 236 ft wide and nearly 100 ft above low-water and on a branch of the York, Newcastle, and Berwick railway. Bishop-Wearmouth, immediately adjoining Sunderland, and Monk-Wearmouth, on the opposite or S. bank, are considered as one town with its forming part of its parliamentary borough. Sunderland proper consists of a spacious and well-paved main street, lined with generally handsome houses, and a number of minor streets of more indifferent appearance, being for the most part narrow crowded lanes. Bishop-Wearmouth which has rapidly increased within recent years consists chiefly of substantial modern houses, occupied by the wealthier classes. Monk-Wearmouth consists of an upper and a lower town: the former chiefly a long and spacious street with several recently fenced streets crossing it at right angles, and connecting it with the lower town, which extends along the shore, and till lately when some streets of handsome houses were built, had an appearance by no means prepossessing. The principal buildings and other objects of interest are the parish churches of Sunderland, Bishop-Wearmouth, and Monk-Wearmouth, the first, a brick edifice with a square tower; the second, a handsome freestone structure, with an embattled tower and the last, originally attached to a monastery, and surrounded by a Norman tower, resting on four massive circular arches several district churches, and Episcopal, Presbyterian Independent, Quaker Primitive and Wesleyan Methodist, Unitarian, and R. Catholic chapels a handsome exchange, a Lyceum hall an Athenaeum with museum and library national, French and other schools, a custom-house, an excise-office, a theatre, assembly-rooms, public baths, a general and an eye infirmary dispensary and various almshouses and charitable institutions. The principal manufactures are glass in all its various forms, chain-cables and anchors, blocks, cordage, sailcloth, rope and brass castings, earthenware bricks and tiles, hats, leather, chemical products, &c. There are also various paper, saw, and flour mills, breweries and about 30 building yards, some of which are very extensive. In 1850 the number of vessels built at Sunderland was 108 (51,874 tons) and in 1853, 163 (68,788 tons). The harbour formed at its entrance by two admirably-constructed piers admits vessels drawing from 15 ft to 30 ft. is very spacious, and is provided with four dry and four floating docks. The trade, which is very extensive, consists chiefly of exports of coal, lime, granulations obtained from quarries in the vicinity glass and various other articles of manufacture and of imports of timber, iron flax tallow from the Baltic, butter, cheese, and flax from Holland, and wine spirits, sugar grain and various other articles, from different quarters. In 1851 the number of vessels belonging to the port was 1025 (116,885 tons) the number of vessels entered was 2747 (1,206,804 tons), and cleared, 12,594 (1,520,083 tons). The delivery of Sunderland is important. The borough is governed by a mayor, 12 aldermen and 42 councillors and sends two members to Parliament. P. pop. 87,394. Area of port 178 sq Pop. 19,058.

SUNDERLAND (Norman) a small seaport and township England on Northumberland, on the German Ocean 8 m E. by S. Bedford with a parish church, a Presbyterian chapel limekilns and a haven, from which corn, fish, and lime are exported. Pop. 1308.

SUNDRIDGE, a vil and par England, co Kent, on the Darent, 6 m. W. by N. Sevenoaks with a church and many features of paper. Sundridge gives the title of Baron to the Duke of Argyll. Area of par, 4041 ac. Pop. 1642.

SUNDSVÄLL, a seaport in Sweden 120 m and 27 m S W Helsingborg, on the Gulf of Bothnia. It contains a handsome church with a tower, and has a mineral-spring a building yard, some shipping, a fishery, and a considerable trade in timber, bar pitch, &c. Both the Ingale-Elf and Ljunga fall into the bay here, and form good havens. Pop. about 2000.

SUNG-LO, or SUNG-LO-SAN a mountain, China, prov Chekiang, lat. 29° 56' N. and 118 15 E. It rises about 8000 ft. above the plains, and though very barren, is famous as the spot where the green-tea shrub was first discovered, and grew to its first maturity. The rocks in this district are composed of slate similar to that of the Silurian formation in England, and are overlaid by a red calcareous sandstone.

SUNGADEEP, an Is^d Indian Ocean. See AUSTRIA. **SUNGIE-DOON** a state, Malay Peninsula, lat. 8° to 8° 30' N. and lon. 102° to 108° E. towards the source of the right bank of the Sago, and celebrated for its tin-mines. Tin is the chief article of export and is lowered for rock opium, salt, tobacco cloths, oil and shells for making lime.

SUNGNAM, a town W Tibet, dist. Kanawar, on the Buekalan, a tributary of the Sutlej 8000 ft above sea-level, 20 m N. E. Simla. It occupies a slope at the extremity of a beautiful valley is one of the principal seats of the Buddhist religion in the Sutlej valley and has numerous temples and monasteries, and a large population, engaged in agriculture, manufactures, and trade.

SUNK ISLAND an Is^d E. coast, England, co York, near the mouth of the Humber, from which river it has been gradually recovered. It was originally 2 m from the shore, but the channel is now so narrow as to be crossed by a bridge. Area, 6000 ac. of which 4000 are arable and 2000 meadow and pasture all in a high state of cultivation.

SUN⁴, a town of about 100 houses, r bank Indus, lat. 26° N. lon. 68 16° E. near it is a vast fortress, built by the ancestors of Secunder, but now unoccupied.

SUNNINGHILL, a vil and par England, co Berks, 8 m W by N Chertsey with a church a Wesleyan chapel and a national school. Area of par 9178 ac. 1 pop. 1850.

SUPERIOR (LAKES), the most extensive exposure of fresh water in the world and the most westerly and most elevated of the N. American chain of lakes lat. 41° 20' to 49° N. lon. 83° to 93° W. It washes the shores of the state of Minnesota on the W those of Wisconsin and the N peninsula of Michigan on the E, and those of British America in all other directions. greatest length measured on a curve through its centre from E to W, 450 m greatest breadth 180 m. circuit, about 1750 m. estimated area, 82,000 sq m. height above sea-level 595 ft. depth, varying from 80 to 200 fathoms. It is of very irregular shape, widening out towards its centre, and gradually narrowing, partly towards the E. but much more towards its W extremity, so as to form an irregular crescent, with its convexity on the N. and its concavity on the S. The N shore is generally bold and elevated, presenting almost continuous ranges of hills, which vary in height from 800 ft. to 1,500 ft. the S shore is low and nearly always occupied by limestone ridges, the most remarkable of which, situated toward the E. extremity present a perpendicular wall 800 ft. high, broken by numerous caverns and projections and forming, under the name of the Loureux Rocks, one of the greatest natural curiosities of the U. States. The central portion of the lake is clear of islands, but there are numerous towards both the S. and the N. sides. In the former direction they are small and long insufficient to give shelter behind them, only increasing the difficulties of the navigation, without contributing to form a single good harbour in the latter direction, several of them more especially the Isle Royale, are of considerable dimensions, and along with the indentations of the coast, afford good shelter for vessels. The water of the lake is remarkable for its transparency, and derives its supplies from a basin which is estimated at 100,000 sq m. and is drained by more than 200 streams. About 90 of these are of considerable size, but they are almost all impetuous torrents, interrupted by rocks and rapids. The outlet at the E. E., by the St. Mary, the falls of which, descending 224 ft. over a series of rapids about 2 m long completely interrupt the navigation and render a portage necessary. This serious inconvenience is (1854) in course of removal, by the construction of a navigable canal. Within the lake itself the only obstruction to its navigation are the violent gales to which it is subject. It is well supplied with fish, principally trout, white-fish, and sturgeon. The two former are of excellent quality, and have led to the establishment of a great number of fishing-stations. The other principal aspect by the lake is copper, of which valuable veins have been discovered, both on its shores and its islands, and yielded in 1851 about 2500 tons of copper. The boundary line between British America and the U. States in passing through Lake Superior, proceeds from the outlet nearly through its centre, till it approaches Isle Royal, when it bends N so as to give that island entirely to the U. States, and is then carried S by W. to its termination at the mouth of the Pigeon, in 45° N.

SUPIROA, a tn. Bohemia. See GRUBENBERG.
SUPINO, a tn. Naples. See SERRINO.
SUPOTI a river, Russia, rises in S.W. of gov. Omskoug enters Poltava, and flowing almost due S., joins I bank Dniester; total course 110 m.

SUR, a seaport, Arabia. See OMAN.

SURA, a navigable river Russia, rises in S.W. of gov. Simbirsk flows W. forming part of the boundary between govs. Saratov and Penza, then generally N.E., traversing gov. Simbirsk and part of Kassa, and in gov. Rybinsk Novgorod joins r bank Volga after a course of above 400 m. Its principal affluents are the Suroch, Usser, Alatsy, and Piana. It abounds with fish, particularly sturgeons, which are considered superior to those of the Volga.

SURABAYA, Java. See SOERABAYA.

SURANY NAGY, a market tn. Hungary, co. and 16 m. S.E. E. Neutra, with a church, a synagogue the remains of an old castle, and several mills. Pop. 1890.

SURAT, a large and populous tn. Hindoostan, provd and 160 m. N Bombay cap. of prov. Gujarat, I bank Taptas, 30 m. above its junction with the sea, in the Gulf of Cambay, lat. 21° 11' N. lon. 72° 7' E. It has narrow and winding streets, is about 6 m. in circumference, and is surrounded by a wall in good repair with semicircular bastions. There is here an extraordinary institution called the Banyan hospital for sick or maimed animals of all kinds. Outside the walls are some European houses of good size. There is also a fort, occupied by Sepoys and European artillery an English church and school numerous Hindoo schools, and a cemetery. Its trade has much declined in later times, and at present consists almost wholly of cotton wool, which is exported in large bales to Bombay. Pop. 180,000.

SURE or SUREN, a river forming the grand duchy of Luxembourg. Sows S.E.E. forming the boundary between Luxembourg and Rhineland Prussia, and joins I bank Moselle, about 4 m. above Treves total course, 50 m. Its upper part is used for floating and the lower is navigable for about 40 m.

SURENDAL, a vil. and par. Norway prov. and 60 m. S.W. Trondheim, r bank Sora, a little above its mouth in the deep inland Sverdrup fiord. Pop. 3700.

SURENÈS [anc. *Surena*], a tn. France, dep. Seine, 7 m. S.E. Paris, I bank Seine, here crossed by a suspension bridge, and on the railway from Paris to Versailles. It has manufactures of heavy bricks and tiles, a printfield, and dye-works. Pop. 2070.

SURENÈS [Lach. *Surgens*], a tn. France, dep. Charante-Inférieure, near the source of the Gare 20 m. S.E. La Rochelle, with an old castle a parish church, and a trade in wine, brandy and cattle. Pop. 1861.

SURGUT a tn. Asiatic Russia, gov. and 269 m. N.E. Tobolsk, r bank Ob. It is surrounded by palisades has two stone churches, and some trade, particularly in furs and fish. Pop. 1600.

SURIGAO a seaport tn. Philippines, N. extremely all mountainous separated from the island of Luzon by the Surigao Passage, and at the mouth of a river of same name. It has a harbor, which is very difficult of entrance and has building-yards, at which large and good vessels are constructed and a considerable trade, chiefly in gold-dust, wax, onion, rice, and a little pepper and wood. Pop. 7096.

SURINAM See GUYANA (DUTCH).

SURINAM, a river Dutch Guiana, rises in a mountain-range on the S. frontiers, flows N. past Paramaribo, and about 16 m. below falls into the Atlantic by a broad estuary after a course of above 300 m. Its chief affluents are the Commeweyne, Surinam, Turpentine, and Para.

SURREY, a co. England, bounded N. by the Thames, separating it from Middlesex E. Kent, S. Sussex W. Hampshire and N.W. Berkshire, and a small corner of Buckinghamshire. Its E. and W. sides nearly form straight lines, at right angles to each other; the other sides are much more irregular greatest length E. to W., 37 m. greatest breadth, 24 m. area, 756 sq. m. or 485,120 ac. The surface is in general not elevated but undulating and diversified, presenting much pleasing scenery. Near the centre a range of hills stretches completely across the county. This range, called the North Downs, slopes down gently on its N. but is rugged, precipitous, and often of romantic appearance on its S. side. The highest point in the direct line of the range is Botley

Hill, above Tinsay, 880 ft.; but the highest point in the county, and indeed in this part of England, occurs about 3 m. S. of Basing, in Lamb Hill which is 908 ft. Above the S. border a tract called the Weald of Surrey unites with the Wealds of Kent and Sussex, in forming a flat and very extensive plain, occasionally broken by low hills. The N.W. is the least inviting part of the county, consisting for the most part of heath and moorland waste. This portion of the county belongs entirely to the geological formation known by the name of the London clay immediately S. and E. of it, a tract of nearly equal extent is occupied by the plastic clay which is succeeded on the E. by the chalk-formation, of which the Downs above described are composed. The S. part of the county belongs to the westerly formation. The whole of the drainage is received by the Thames, except a small portion in the S.W. conveyed to the English Channel by the Arun, and another small portion in the S.E. received by the Med way. After the Thames, the only streams of importance are its tributaries, the Mole—which, entering Surrey on the S.E., winds through a beautiful valley for about 43 m. in a N.W. direction, but is nowhere navigable—and the Wey, which flows from N.W. to N.E. and not only becomes navigable at Godalming, but forms the principal part of the East of England, and the Surrey and Sussex canals. The only other canal is the Grand Surrey which, cut from the Thames at Esher-burth to Duford and thence to Canterbury, is very short, but of considerable importance, containing in particular an extensive beam, in connection with the navigation of the Thames. The other principal means of communication are the South-Eastern, the Brighton and South Coast, and the London and South-Western railways, with various connecting branches. The soils include all the principal varieties of plastic and alluvial clays, rich vegetable loam, calcareous earths and almost barren heath. On the first of these, the principal crops are wheat and barley. Much of the alluvium, particularly in the vicinity of the metropolis, is occupied by orchards and kitchen-gardens, and whole farms are devoted in the same locality to the raising of medicinal and aromatic plants, as chamomile, wormwood, anise-seed, peppermint, and lavender. The loamy soils grow excellent barley oats, and peas, there, too, root-crops, more especially carrots and parsnips, are extensively grown. The calcareous soils are chiefly remarkable for their excellent hops, among which those of Farnham deserve special notice and for their valuable crops of clover. The husbandry, though relieved from much of the antiquated routine which was permitted to grow to maintain its ground, is said to be still susceptible of great improvement. The quantity of grazing-land is not extensive the domestic animals are usually of the ordinary improved breeds. The manufactures are not of much importance, consisting chiefly of woollen goods and hosiery at Godalming gunpowder at Malden distill and stone ware at Mortlake calicoes with large bleaching and printing works, in the parishes of Mitcham and Croydon, and paper mills, which employ the four calcareous are numerous mills, partly on the Mole and partly on the Wandle and numerous articles made in Southwark principally in connection with the trade of the port of London. Of this trade the part of the county immediately bordering the Thames has a considerable share. The vicinity of the metropolis, and the many beautiful sites which it affords, have caused many parts of Surrey to be studded over with mansions and villas. After Southwark, and the other S. suburbs of London, the most important towns are Croydon, Guildford, Kingston, Epsom, Baginb, Farnham, and Godalming. It returns two members for the E., and two for the W. division to Parliament. Pop. 655,082.

SURSEE, a tn. Switzerland, area. and 13 m. N.W. Lausanne, on N. side, Lake of Geneva, and traversed by the Furca. It is inclosed by old walls with turreted gates and has a handsome church, and the townships, though much dilapidated, afford a good specimen of the German Burgundian style. Pop. 1046.

SURUHI, a vil. and par. Brazil, prov. Rio-de-Janeiro about 8 m. W. Mago with a large parish church and a chapel, a harbor in the river of same name, 3 m. from the Bay of Rio-de-Janeiro, at which there is a considerable number of houses, rice, sugar and wood.

SURY LE COMTAL, a tn. France, dep. Loire 8 m. S.E. Moulins. It is an ancient place; with a castle, still in good

preservation and long the residence of the counts of Foras; and a trade in wine and grain. Pop. 1694.

SUSA—[Latin *Agripina*] A town, Piedmont, div. and 87 m. W Turin with which it is connected by a railway, opened May 28, 1864 cap. prov. of same name, in a valley r bank Dora-Baptista. It consists of an old and a new town both irregularly built, though the latter has one large and handsome street, and some well-planted squares, is the see of a bishop, and the seat of a court of justice, and several public offices and has an ancient cathedral with some good sculptures and paintings, a townhouse, two handsome modern hospitals, and Capuchin convent, a Dominican seminary, and a college, and other schools. Pop. 1870.—The *romana*, area, 538 sq. m., borders W on France, and on all sides, except the E, it is inclosed by branches of the Cottian Alps, which here present among other lofty summits, Mount Genovra in the S.W., and Monte Cenis and Rochemelon in the N, and is traversed in all directions by alpine valleys, of which the largest are those of Oulx and Susa. The chief river is the Dora-Baptista. Large numbers of cattle are reared, and considerable attention is paid to the dairy. Some wine, fruit, and silk are produced and the minerals include iron and marble. The manufactures consist chiefly of coarse linen and hempen cloth, and leather. Pop. (1862), 62,078.—2. A seaport. Africa. See SOVA.

SUSE, or **Sova**, a prov. in S.W. of Morocco. It is mountainous, being intersected by the Atlas range but has fertile valleys, yielding rice, dates, olives, figs, and citrons and in which camels, horses, asses, mules, goats, sheep, and cattle are reared.

SUSQUEHANNA a river, U. States, formed by two branches, an E. or h. and a W. which unite at Northumberland, in Pennsylvania. The E. branch, which is considered the main stream, issues from Lake Ontario, in New York, and flows very circuitously S.W. to the N. frontiers of Pennsylvania where after receiving the Tioga on the right, it makes two long stretches the one S.E. and the other S.W. Its whole course is about 250 m. The W. branch rises in the W. slope of the Alleghenies, and flows very circuitously S.E. for about 300 m. The united stream flows nearly due S. to the junction of its most important tributary, the Juniata, which joins it on the right, then S.E. passing Harrisburg and Columbia, enters Maryland and after a course of about 150 m. falls into the N. extremity of Chesapeake Bay, at Havre-de-Grace. Though the whole length of the Susquehanna, including that of its longer branch, is 400 m. it is so frequently interrupted by rapids, as to afford much on some navigation as its natural channel, but the obstructions have been greatly overcome by cutting canals.

SUSSEX a S. maritime co. England, bounded N. by Surrey, N.E. Kent, S.E. and S. the English Channel, and W. and N.W. Hants. greatest length S to W, 73 m. average breadth, about 25 m. area, 1468 sq. m., or 938,240 ac. The coast-line is not much broken and is generally flat with the exception of some moderate cliffs at Solsey Hill in the S.W. and Hastings in the S.E., and a range of lofty cliffs, which, commencing near Brighton, are continued E. to Beachy Head, whose bold promontory, composed of chalky pebbles, rises to the height of 664 ft. This promontory terminates the range of hills called the South Downs, which extending W. in an irregular line as far as Shoreham, form the most remarkable natural feature in the county and though on an average not more than 500 ft. in height, attain in their culminating point, Ditchelling Beacon, 828 ft. On the N. side the Downs are precipitous, but on the S. and W. slope down to the lowland on the coast. They are for the most part covered with short close turf, admirably adapted for sheep-pasture. Immediately N. of the crataean formation of the Downs is a belt composed chiefly of chalk, marl, sand, sandstone and sandy limestone, succeeded by another belt of rather large boulders, composed principally of flinty-earth, blue marl, and shaly limestone. All the rest of the county belongs to the Weald originally so called because covered with one dense forest, and still possessing so much of its original character as to be one of the best-wooded districts in England. In the E. Romney Marsh principally in Kent, is continued into Sussex, and forms a low flat, stretching along by Pevensey to the vicinity of Beachy Head. Proceeding from the E., the principal streams,

which have all their mouths in the English Channel are the Rother, forming part of the boundary between Sussex and Kent, the Ouse, which forms the boundary of Northampton, the Adur which forms that of Shropshire, and the Arun, which, besides uniting with the sea so as to give a navigable communication with the Thames, communicates by the Arundel and Portsmouth canal with Chichester harbour. In the N.E. a small part of the drainage is collected by the Medway, which rises within the county but shortly after quits it. The principal means of communication in addition to those already mentioned, are the London Brighton, and South-Coast railway. The lowland along the coast is remarkable for its fertility, yielding heavy crops of grain and still more valuable crops of hay particularly on the marsh lands, which, after being cut, are pastured and feed off large numbers of heavy cattle. The Downs are chiefly pastoral, and where arable, consist of a thin stony soil, on which barley is the most profitable crop. The Weald, forming the larger part of the whole surface consists generally of sandy or benighted slays of a very indifferent description. The E. part of the county borders on the hop districts of Kent, and successfully pursues the same mode of cultivation. Among the mineral products may be mentioned marble which is worked to some extent in the neighbourhood of Petworth and admits of being cut and polished. Ironstone also is abundant, and in early times when wood only was used for smelting, furnished one of the principal sources of the British iron manufacture, though it is now abandoned. The manufactures are insignificant, consisting chiefly of a few woollens at Chichester, bricks and tiles made in various districts both for home consumption and export, chiefly to the West Indies and paper, for which there are mills at Lyding and several other places. (The towns of principal note are Lewes, Chichester, Hastings, Rye, Newhaven, New Shoreham and Brighton. It returns two members for the E. and two for the W. district to Parliament. Pop. 353,544.

SUSTEIT a, in Holland, prov. Friesland, 18 m. N.F. Maestricht with a townhall a large elegant church, a school and four flour-mills. Pop. (aggr.) 1100.

SUSUI one of the smaller and most E. Japanese Islands off S.E. and of Yaku-Yaku; about 10 m. N. of it S. ton 178 68' W. On the N.W. side the sea is beautiful and secure from all winds, whence a valley runs back, thickly covered with bananas coconuts and sugar-cane the last growing in great perfection.

SUTELA a, in Sicily, prov. and 21 m. W.N.W. Cal. Canicella, with little trade, and so seldom visited as to be very imperfectly known. Pop. 4000.

SUTHELLAND a maritime co. in the N. of Scotland, bounded N. by the Pentland Firth W. the Firth of Forth, E. the German Ocean, and N.E. to Caithness. It is in the shape of an irregular square, about 60 m. each way E. to W. and N. to S. and along with the greater part of Ross and the whole of Caithness, forms an extensive peninsula, the isthmus of which may be conceived as stretching across the island between the heads of the Beaulieu Firth and Loch Carron area, 1764 sq. m., or 1,122,860 ac. In addition to the mainland, it includes a number of small adjacent islands on its N. and W. sides. On these sides the coast is remarkable for the loftiness and boldness of its precipices, and its deep indentations by numerous lochs or arms of the sea; in these respects the E. coast presents a striking contrast, being generally flat and continuous, with sandy shores, except in the N.E. where the headland of Ord commences to the county and Caithness, runs out majestically into the German Ocean. The interior consists of a succession of lofty and rugged mountains, rising in Ben More Assynt to 2230 ft. and separated from each other sometimes by moorland plateaus, and sometimes by wild romantic valleys, either embosomed extensive lakes, or traversed by mountain-streams. The watershed of the county is formed by a range stretching almost centrally across it from E. to W. and then N. to S. at its greatest distance from the W. coast. This watershed sends the drainage in three directions, N., W. and E., but the streams, though valuable for their salmon-fishings, are not otherwise deserving of notice. The lakes, which sometimes stretch in chains, are both large and numerous. Among others are Loch Shin in the E., stretching E. to N.W. for about 18 m., Loch Nevers near the centre of the county, Loch Hope in the N., and Loch Assynt at a short distance from the W. coast. All

them takes form long and comparatively narrow exposures, which, when their extremities are not seen, give them the appearance of majestic rivers. The rock most largely developed in the country is granite, which occupies at least four-fifths of the whole number. Other rocks, which occur chiefly in patches, are granite, mica-slate, and old red sandstone. The last occurs both in the N.W. towards Cape Wrath, and in the S.E., along the Dornoch Firth. In the last portion it is succeeded by one of the most remarkable geological formations of Scotland, the Breck coal-field; unfortunately however more interesting to the geologist than valuable for the fuel which it yields. In connection with this coal-field are strata of lime and coals, found in no other part of Scotland except a small patch to the W. of the town of Campbellton, in Kintyre and in a few patches of the Western Isles. The greater part of the country is fitted only for grazing, but even on the stock farms large quantities of excellent turnips are grown, and eaten by sheep, and in some of the lower valleys, and more especially on the K. coast, not only oats and barley are successfully cultivated, but wheat has been raised of such quality as to command the best price in the London market. Potatoes succeed well on the arable land of most districts, and form the principal food of the inhabitants. Natural woods of birch, alder and even oak are not uncommon, and large plantations of fir, larch and other trees have recently been formed. Crops of all kinds, including deer, is abundant, and on most estates now forms an important item in the rental. It sends a member to Parliament. P. 25793

SUTLEJ *SUTLEJ* or *SUTLEJ* [anc. *Himalaya*] one of the five rivers of the Punjab, of which it forms the E. boundary. It has its source in Tibet, between the N.E. slopes of the Himalayas and the Kailash Mountains; about lat. 31° 5' N., lon. 81° 6' E. a little to the E. of Lake Rawas-Khud, which it enters, from the N.W. extremity of which it subsequently issues at an elevation of 19,000 ft. to 20,000 ft. above sea-level. On leaving the lake it flows N.W. to Mako, about 150 m., where it suddenly turns S.W., passes through the Himalaya range, and continuing its S.W. direction, flows along the E. limit of the Punjab to Mitankota lat. 29° N., lon. 70° 20' E., where it falls into the Indus. Its entire length is about 900 m. At Hurakka, lat. 31° 10' N. lon. 76° E., it is joined by the Beas, and near Cochi, lat. 29° 20' N. lon. 71° 15' E., by the Cheshal, the united stream, as already mentioned joining the Indus at Mitankota. The scenery along the upper course of the Sutlej is often at once fearful and sublime. The river itself is there a raging torrent, falling in several places 100 ft. or 150 ft. per mile.

SUTLEJ [anc. *Sutoum*] a tn. Punjab State, dec. and 14 m. S.E. of Viterbo, on a long isolated rock of tuff, and surrounded with ravines. It is the see of a bishop, and contains a cathedral and several other churches and convents. An ancient amphitheatre excavated in the tuff and almost in perfect preservation, 250 ft. long and 70 ft. broad. Pontius Pilate is said to have been born here. Pop. 2000

SUTTON, a vil and township England co. York (W. Riding) 5 m. W. N. W. Kettleby, well built of stone, with a Baptist chapel and a large walled factory. Pop. 1292

SUTTON or *Horn*, a vil and par. England co. Kent, on the Downs, 3 m. S.E. of Dover. It has an ancient church, Baptist and Wesleyan chapels, an almshouse, and manufactures of paper. Pop. 1290

SUTTON-COLMISTON, a market tn. and par. England co. and 26 m. N.W. Warwick on an acclivity with tolerably straight and well-kept streets an ancient church, a R. Catholic chapel five public schools, one of which is a grammar-school several churches, a book-shop, and permanent library. There are no manufactures in the town, but in the parish there is a celebrated manufactory of iron-wire, a mill for burning gun-barrels and grinding bayonets, also several manufactures of spades and edge-tools. Area of par. 18,030 ac. 1 cp. 4574

SUTTON-IN-ASHFELD a vil and par. England, co. Nottingham, on a height, 3 m. W. S.W. Mansfield, with a parish church, Baptist, Independent Primitive and Wesleyan Methodist chapels, a national school, manufactures of cotton hosiery, lace and cutleryware, and a mineral spring, said to be efficacious in rheumatic affections. Area of par. 6040 ac. P. 7629

SUTTON (Lons) a tn and par. England, co. Lincoln The town, 42 m. E. by S. Holbeach, near l. bank Humber, over

which is a new iron horizontal bridge, is rapidly becoming a very considerable place. It is generally well built; has a church, and places of worship for Independents, Wesleyans, Baptists, and Primitive Methodists, and numerous schools, both public and private. Area of par. 56,146 ac. Pop. 6691

SUTTON VILLAGES, or *Town-Borough*, a vil, and par. England, co. Kent, commanding a fine view of the sea, 3 m. S.E. of Maidstone. It has a plain substantial parish church with a square tower an Independent chapel, a free grammar-school, several almshouses, and the picturesque ruins of an old castle, overgrown with ivy. Area of par. 2182 ac. Pop. 1090

SUUR, a vil Hungary Thirzer Dunab, co. Vaspasser, about 12 m. from Palota with a Protestant and a R. Catholic church two mills, and a trade in cattle and timber. P. 1684

SUWALKI a tn. Russian Poland, cap. woiwod Angustowa, 129 m. N.E. Warsaw. It is well built; has a large market-place, two churches, and handsome buildings in which the courts and public offices are held. Suwalki has made rapid progress since it became the capital of the woiwod Pop. (1843) 7821

SUWANEE, a river U. States, formed by the union of several streams in Georgia; flows S.E. into Florida turns almost due E., and falls into a bay of the Gulf of Mexico opposite to several islands, after a course of about 180 m. Over the bar at its mouth the water is only 5 ft., but within, and for 25 m. above, it is 15 ft.

SUWARRROW a group of four uninhabited isls. S. Pacific, between the Navigator and Society Islands, extending from lat. 16° 6' to 18° 15' S. lon. 153° 23' to 163° 21' W., discovered by a Russian ship of the same name, 27th September 1814.

SUWAT a territory on the N.E. frontier of Afghanistan, extending from the upper part of the Indus, W. to the Landys or Panjshir. It is watered by a river of same name, which runs in the Hindoo Kooch, and joins the Landys. Lying secluded, it has been little explored, but though occupying an elevated slope of the Hindoo Kooch it is understood to have a good climate and a fertile soil. The inhabitants are a semi-civilised race, and, though imperfectly acquainted with the tactics, are faithful defenders of Mahometanism

SUZDAL, a tn. Russia. See **SOUZDAL**

SUZE (La), a tn. France, dep. Sarthe, 11 m. N.W. Le Mans, l. bank Sarthe, here crossed by a handsome bridge. It has the ruins of an ancient castle, manufactures of bone-ware, wax candles, and earthenware, and tanneries and tile-works. Pop. 1465

SUZZARA a tn. and com. Italy prov. and 12 m. S. by S. Mantua, cap. dist. of same name near the Eara, an arm of the Po. It contains a parish church, and as the seat of provincial courts and offices. P. (com.), 6864 (dist.) 9884

SVANIKE, a small seaport in Denmark, E. coast, in Bornholm. It is surrounded by shoals, and has a winter-haven of the fifth class, admitting vessels drawing 7½ ft. but rather insecure. Many of the well known Bornholm clocks are made here. Pop. 900

SVAFU, a river, Russia, rises on the S. frontiers of gov. Orel, enters gov. Kursk flows S.W. and joins l. bank Sena, at a small course, 80 m.

SVARTSJÖLANDEN, the largest of the islands of Lake Mälär in Sweden, about 10 m. W. Stockholm. It contains a royal summer-residence in a very dilapidated state.

SVENDBORG a seaport, Russia. See **SWENABORG**

SVENDBORG, a tn. and seaport, Denmark, in Fünen, cap. bail, on a strait, 25 m. S.E. of Odense. It has two churches, excellent building-yards, and a good winter-haven of the third class, admitting vessels drawing 14 ft. The chief employments are tanning and ship-building. Pop. 8900

SVILJICK, a tn. Russia, gov. and 21 m. W. S.W. Ekaterin, cap. strich, on a lofty height above the Volga, near its confluence with the Volga. It is an old place; has two stone and five other churches, a monastery, and a nursery, manufactures of potash, several tanneries and a trade in corn and flour. In the vicinity there is a small lake, strongly impregnated with sulphur. Pop. (1843), 1510

SVIELOTSCH a tn. Russia, gov. and 47 m. S. Grodno, on river of same name, the inhabitants mostly Jews. Pop. 1900.—The river rises in the gov. of little N.W. the town of Minsk, flows S.E. and after a course of about 100 m., joins r. bank Nerisina, at the town of Svietlotsch.

SWABIA [German *Schwaben*], an ancient German duchy which, after bearing the name of *Alamannia*, from its original inhabitants the *Alamanni*, changed it to *Swabia* or *Schwabenland*, in consequence of the invasion of the *Suevi*. On the division of the kingdom of the *Franks* in 843, Swabia, along with *Bavaria*, became as it were the nucleus of Germany and its rulers continued for many centuries to hold a pre-eminent place in its history. In 1076 was formed, chiefly by the union of its towns, the celebrated *Swabian League*. In 1512 when the Emperor *Maximilian I.* divided Germany into 10 circles, one of them was called the circle of Swabia. It formed the S.W., and perhaps the fairest and most fertile portion of Germany and was bounded N. by the circle of *Francia* and the *Rhine*, E. that of *Bavaria*, and S. and W. by the *Rhine*, which separated it in the former direction from *Switzerland*, and in the latter from *France*. Its area was 10,980 sq. m. and its pop. about 2,300,000. By the *Union constitution* of 1555 which was maintained with a few changes till the dissolution of the German Empire its sovereignty was shared by the *Duke of Württemberg*, the *Bishop of Augsburg*, the *Margrave of Baden*, and the *Bishop of Constance*, with a supremacy in *Austria*. It is now divided between *Württemberg*, *Baden*, *Bavaria*, *Hohenzollern* and *Liechtenstein*. Since 1871 the former *Bavarian circle* of *Oberdonau* or *Upper Danube*, has borne the name of *Swabia-with-Neuburg* [*Schwaben-mit-Neuburg*]. It consists of the principality of *Neuburg*, parts of *Upper Bavaria* [*Oberbayern*] and the former *Swabian* episcopal and imperial cities and has an area of 3538 sq. m., and pop. 551,164. *Augsburg* is its capital.

SWABIAN ALPS, mountains, *Württemberg*. See *ALP. SWAFFHAM*, an anc. market tn. and par. *England*, co. *North.* on the summit of an eminence, about 27 m. W. by N. *North.* It is well built, has a spacious market-place, lined with good shops and in its centre an elegant market-cross erected by the *Earl of Oxford*, in 1789. A handsome church, places of worship for *Baptists*, *Wesleyan* and *Trinitarian* Methodists, a national and free school, and ball and assembly rooms. *Population* 1750. Pop. 3558.

SWALE —1. A river *England* formed by the junction of two streams which descend from the mountains on the E. frontiers of *Westmoreland*, flows E. to *Richmond* then S.E., and near *Boroughbridge* unites with the *Yore* or *Ure*, in forming the *Yaraburgh Ouse*; total course 70 m. —2. The name given to the two branches into which the *Madway* divides, about 10 m. below *Rocheater*. The one, called the E. *Swale*, separates the *Isle of Sheppey* from the mainland on the W. and S., the other forming a broad estuary on the N.W. side of the island, joins the estuary of the *Thames* at *Shoeburyness*.

SWALWELL, a vill and township, *England* co. *Durham*, on the *Darwent*, here crossed by a handsome bridge, near its junction with the *Tyne*. It has *Presbyterian* Primitive and *Wesleyan Methodist* chapels, and very extensive iron works, at which large anchors, chain-cables, steam-engine cylinders, cranes, &c. are made. Pop. 1429.

SWAN, a river, *Punjab*, which rises in a range of the *Himalayas*; lat. 85° N., lon. 73° E. flows S.W., and after a course of about 180 m. joins L. *bank* *India*, about 10 m. below *Kylik*.

SWAN RIVER, a river, *N. Australia* co. *Perth*. It falls into a large bay called *McKellie Water*, about lat. 32° S. total course, above 180 m. It is subject to sudden and tremendous floods, which inundate the corn land in its vicinity, and sweep away all opposing obstacles. The first settlement in *N. Australia* was founded here, in August, 1829, under the auspices of the colonial office. The towns of *Freemantle*, *Perth*, and *Guildford*, are built on its banks. It was discovered in 1694, by *Vianen*.

SWANSEA [*Welsh*, *abertawe*], a port town and seaport in *Wales*, co. *Glamorgan*, L. *bank* *Tawe*, at its mouth to the Bay of *Swansea*, and on the *South Wales railway* 60 m. W. by N. *Bristol*. It occupies an acclivity, formed by an angular piece of ground between two lofty hills; and consists chiefly of a main street, stretching N. to S. for nearly 1 m. parallel to the river, and of a number of minor streets, partly diverging from it, and partly proceeding W. and S.W. nearly in the line of the bay. The houses, for the most part modern, are commodious and well built, and the outskirts of the town are studded with villas and other lodging-houses for the accom-

modation of numerous visitors attracted by the beauties of the site, and its advantages for sea-bathing. One of the most important modern improvements is a spacious market-place, erected at a cost of about 230,000. The ecclesiastical edifices include three churches, and various Dissenting chapels, of which two are *Wesleyan Methodist*, one of them considered the finest belonging to that body in *Wales* a *R. Catholic*, a *Unitarian*, *Calvinistic Methodist*, *Wah Baptist*, *Independent*, and *Friends*. The Jews also have a synagogue. The principal educational and literary establishments are a normal college supported by voluntary subscription, a free grammar and British national, and infant schools, a royal philosophical institution, a Cambrian society for the cultivation of geology, mineralogy, and natural history; a *Welsh literary society* a society for the acquisition of useful knowledge, a horticultural society and a mechanics institute. Other buildings and objects deserving of notice are the townhall, a neat and substantial edifice, with a Doric portico; a spacious and handsome guildhall and courthouse, a custom-house, a lunatic asylum for females *Glamorgan*, *Carmarthen* *Cardigan*, and *Pembroke* an infirmary and dispensary, a theatre, assembly-rooms, hot and cold baths, a house of correction, a town prison and work house on the site of part of the ancient castle, and a massive square tower now the only existing remnant of the castle wall.

The vicinity of extensive masses of coal of a quality peculiarly adapted for smelting purposes, and the easy access to the town both by sea and inland navigation, have made it the principal seat of the copper trade almost all the copper-ore obtained in *Great Britain* and *Ireland*, and more recently in *Australia* besides considerable quantities from *Cuba* and other foreign mines, being melted at the furnaces, of which there are here 17 within the district, and eight close to the town. These, while they have mainly contributed to the prosperity and rapid increase of the population, are not without their disadvantages, destroying vegetation within the range of their enormous and other deleterious vapours, and undoubtedly exercising an unfavourable influence on the general salubrity of the place, though, so far as has been ascertained by statistical data, the injury is less than might be supposed. Next to copper smelting-furnaces, the most important industrial establishments are iron-works, including foundries, plate-works, tinplate-works, breweries, roperies, two extensive potteries, and yards for the building and repairing of ships. Owing to the height to which the tide rises in the *Bristol Channel*, vessels of large burden easily get close to the town, but at ebb the harbour is left almost dry. In 1865 the vessels registered at the port were 165 carrying 21,369 tons; the vessels entered were valued at 4515 (£82,245 tons) and cleared 6580 (£75,083 tons). A very large proportion both of the vessels and tonnage is employed in the coasting trade. The chief imports are copper-ore, grain, and provisions from *Ireland*, timber from *America* and the *Baltic*, hemp tallow and flour the chief exports copper iron coal, alum, lime, and earthenware. The borough, called into existence by the *Reform and Municipal acts* is governed by a mayor, five other aldermen, and 18 councillors, and, under writs *North*, *Longtree*, *Abertawe* &c. is sending a member to *Parliament*. Pop. 31,461.

SWANWICK —1, (or *Swanage*) A maritime and seaport town and par. *England*, co. *Dorset*, on a bay of the same name, N.E. of *Albion Head*, 24 m. S.E. *Dorchester*, with a large church a library and manufacture of straw plait and shirt-buskins. *Freestone*, called *Purbeck stone*, is obtained in the vicinity and large quantities are exported annually. The bay is very beautiful, and is sufficiently deep to admit vessels of 800 tons. The place is much resorted to for sea-bathing. The climate is mild and salubrious. Area of par. 5189 ac. Pop. 1139. —2, A hamlet *England* co. *Derby* near *Alfreton*, with *Baptist* and *Wesleyan* chapels, and an endowed school. Inhabitants chiefly employed in the collieries of the vicinity. Pop. 1819.

SWATKA or *SWATKA* a market tn. in *Bohemia*, strale and 80 m. from *Chrudin*, on the *Schwarzwasser*, near the frontiers of *Moravia*. It has an ancient parish church. P. 1086.

SWEABORG or *SVENSBORG*, a fortress, *Finland*, 3 m. S.E. *Helsingfors*, 185 m. W. by N. *St. Petersburg*. It occupies seven lofty islands in the Gulf of *Fine Land*. All of them are strongly fortified, and communicating with each other by bridges of boats, namely, *Vange* and

Grustafsvard to the S.; West-Warten and Langens to the N.W.; Liden and the Small Oster-Svarter to the N. and last, the Great Oster-Svarter to the N.E. The lake of Varpe contains the principal fort, consisting of a strong castle, and of extensive magazines and barracks out out of the rock, and bomb-proof; some points have three tiers of guns. The total number of cannon is 8000, requiring 8000 men to work them. The summits are capable of accommodating 12,000 men. The harbor of Skenberg has accommodation for 70 sail of the line. The island of Great Oster-Svarter is provided with docks capable of holding 12 sail of the line, and with great magazines. Skenberg has some trade, though the whole importance of the place is of a military nature. It was originally built by the Swedes to guard their frontiers against the Danes. In 1865 it was successfully bombarded by the British and French fleets.

SWEDEN (Swedish *Sverige*, or *Svenska*; Danish *Sverig*; German, *Schweden*; Dutch, *Scoeden*; Latin, *Suecia*; French, *Suède*; Italian *Svezia*, or *Svevia*); a kingdom in the N. of Europe, and forming with Norway with which it is now united under one monarchy the whole of the peninsula known in ancient times by the name of Scandinavia, situated between lat. 55° 20' and 69° N., and lon. 11° 40' and 24° E. and bounded, N and W by Norway; S.W. the Skagerrack, Kattegat, and Sound S. the Baltic E. the Helgö and the Gulf of Bothnia and E. the Torné and its affluent Meana, separating it from Finland, greatest length, N.W. to S.E.W. about 875 m. greatest breadth, about 250 m. area, 128,076 sq. m. In addition to the mainland it has a great number of islands the most of them of very small dimensions, and lying close to the coast. The largest and also the most distant is Gotland, in the Baltic. For administrative purposes it is divided into län or counties, the statistics of which are given in the following table—

Name or Location	Area, per sq. m.	Population, 1861	Chief Towns	Pop. 1861
Central				
Östergötland	3,121.6	250,790	Lake Jönköping	6,506
Småland	2,221.8	131,688	Jönköping	8,372

Total	128,076	4,400,000		

Coasts.—The coast-line, above 1400 m. in length, is very irregular but is more correctly described as serrated, than as deeply indented. Its bays and creeks, though very numerous, having neither the width nor tortuous lengths by which the coasts of Norway are characterized. The W. coast is very rocky, particularly along the line of Gottaberg, but seldom runs so high as 50 ft. Its numerous creeks and the loss of its islands furnish a number of good roads. The S. coast runs from Cape Falsör to E. and then N. to Solvången, is low and sandy, and very much indented with embayments. At Solvången a range of precipitous cliffs begins to appear, and though partly interrupted by low benches, presents a number of projecting masses, rising steeply to the height of 50 ft. In this straits is the bay and harbour of Carlskrona, finely sheltered by the islands which lie across its mouth. The shore, separated from the island of Öland by Kalmar Sound, is generally low and in its S. part presents almost a

continuous line, neither broken by indentations nor lined by islands but towards its N. entrance the configuration changes, and rocky cliffs and islands are seen along the whole coast as far N. as the mouth of the Dal, a little S. of the town of Gäddede. The cliffs, however, continue to be of moderate elevation, and nowhere exceed 100 ft. The most remarkable features in this part of the coast are the long and narrow bay of Braviken, and the vast number of islands and islets, some forming the archipelago of Stockholm, and stretching along the coast N. to entrance of the Gulf of Bothnia beyond the Åland group, which belongs (1854) to Russia. The S. part of the Gulf of Bothnia presents a succession of moderately elevated shores alternately rocky and alluvial, or sandy, the whole of its upper part, from the Strait of Quarn N.W. to Torné, is of the latter description, consisting of sandy alluvial deposits, which are brought down by the rivers in such quantities that they seem destined at no distant period to convert a large portion of the gulf into dry land. It would appear, however, that alluvium is not the only agent employed in carrying on this process of shallowing. It has been proved beyond a doubt that the relative positions of sea and land have long been undergoing a gradual change by the elevation of the latter. This elevation is not confined to the Swedish shores along the Gulf of Bothnia or the Baltic generally, but is equally apparent on the W. coast which lies open to the German Ocean, though the whole amount of elevation appears to be greater in the N. than towards the S.

Mountains and Plains.—The highest of Sweden is by no means generally mountainous, and its surface has far less of a highland than of a lowland character. The most elevated portion of it commences in the W. near the parallel of 62° and is continued N. along the frontiers of Norway, not so much in a continuous chain, as in isolated mountain masses rising from an elevated table-land, which, where loftiest, is at least 4000 ft., and forms the base of several summits which rise more than 8000 ft. above sea-level and swing to their high latitudes, are covered with perpetual snow. The two loftiest mountains both of them partly within the Swedish frontier are Sollefåsen, in lat. 67° 53' 43" N., and Gylfjället, lat. 65° 53' 52" N. These mountains and their table-land slope E. towards the Gulf of Bothnia, sending down numerous torrents which in their course often expand and form chains of lakes and dreary swamps. The same slope is continued E. of 62° N. but besides there is a S. slope which attains its lowest level near lat. 59° N. on the shores of the magnificent lakes which there stretch almost continuously across the country E. to W. To the S. of 59° N. the country is generally flat, though in many parts partly diversified. Its loftiest height, Mount Tåberg to the S. of Lake Wetter is about 1193 ft. and a considerable part of what is called the table-land of Håmland is 800 ft. above sea-level, but the far larger portion is under 800 ft. Both its level and latitude point it out as a region which should naturally be well adapted for agriculture, and it has several fertile and well-cultivated tracts but the soil, generally consisting of disintegrated primitive rocks, in which max is a principal ingredient, is by no means productive. A good deal of it is covered by barren sand or stunted heath, though interspersed with forests, green meadows, and cornfields. The finest tracts are the space enclosed between Lake Wetter and the Bay of Braviken on the S. and Lake Hälsar and Mälaren on the N., the plain of Linköping, the line of Carlskrona, and generally what is called the Plain of Bismar occupying the whole of the S. peninsula between the Sound on the W. and the Baltic on the E. and E.

Rivers and Lakes.—These are very numerous, and the latter in particular are on a gigantic scale, giving to the scenery of the country several of its grandest features. They all belong to the basins of the Baltic Sea and the German Ocean. The former receives the far larger share. To it belong the Torné, which rising in the Norwegian mountains, pursues its course S.E. for nearly 350 m., separated by numerous large offshoots and falls into the N. extremity of the Gulf of Bothnia; the Luleä, Piteä, Skellefteä, and Umeä, which flow precipitously S.E. into the same gulf; the Ängermanä, which flows 290 m. and in the lower part of its course becomes so wide and deep that vessels of 800 tons can ascend nearly 70 m. from the sea; and the E. and W. Dal, which uniting their streams, resolve the discharge of numerous lakes, and pursue a more circuitous course than usual in

Swedish rivers. The principal rivers belonging to the basin of the German Ocean are the Klar and the Göta, the former of which issues from Lake Vänern on the edge of the Dovrefield Mountains, furnishes Lake Vener with its chief supply of water, while the latter which may be considered only as its continuation, discharges it into the ocean. The lakes are so numerous and so large that their united area has been estimated at nearly 23,000 sq. m. or about one-tenth of the whole area of the country. They not only add to the beauty of the scenery, but yield large supplies of fish, and, both by their natural depth, and the canals which have been cut to connect them, are of vast navigable importance, and furnish a long line of internal communication. In this way a direct channel has been opened from Göteborg on the W to Söderköping on the E coast, and communicating with the important towns of Wenersborg, Carlstad, Mariestad, Jönköping, and Linköping. In the same manner the capital has been enabled to extend its connections with the interior. In general, however, the rugged nature of the country has made navigation difficult. Most of the rivers have rocky beds and dangerous shallows, and in many places a complete barrier is formed over which a whole river is precipitated in cascade. The most remarkable of these is Trollhättan, immediately below the outlet of Lake Vener. This lake, which, after that of Ladoga, is the largest in Europe, is 55 m. long, by 30 m. broad, and covers an expanse of 3000 sq. m. Lake Wetter, the next in size, is about 30 m. long, by 10 m. broad, and has an area of about 900 sq. m. It is more alpine in its situation than any of the other lakes, and in one place has a depth of 420 ft. Lake Mälaren, better known than the other large lakes, from having the capital on its shores, is also remarkable for the number of islands, which so crowd its surface, that though it has a length of 60 m. and a breadth of 25 m. it is scarcely possible to find a single square mile of open water. Other lakes whose magnitude enables them to notice are the Hjälm, which has both a natural and an artificial communication with Lake Mälaren; the Silja, formed by an expansion of the E. end of the Stora-Alsnan; the Indal, near the Horn-Åran, which discharges itself into the Skelleftef; and the Stora-Lake-Watten, which originates the Lulea.

Geology and Minerals.—The geology of Sweden though interesting from the character of its rocks, and the mineral treasures which not a few of them contain, does not present much variety in its formations. Almost the whole of the country throughout its length and breadth is composed of granite, partially penetrated by gneiss. Patches of porphyry and greenstone, of Silurian rocks of dolomite, and of enormous rocks appear in various localities. The minerals include gold, which was once worked on the table-land of Småland, till it ceased to pay the expenses, silver, found in limited quantities in several places, particularly Sala in the Westera, and the vicinity of Falun; copper found chiefly in the Falun, and smelted to a considerable extent at Stora-Koppersberg; rich mines of cobalt, particularly in the Örebro, a little lead, and inexhaustible supplies of iron. The last, indeed, not only occurs in beds of immense thickness, enclosed in strata of gneiss, but forms the principal mass of whole mountains. In Swedish Lapland some seams are from 8 to 4 fathoms other from 14 to 15 fathoms in thickness, while others attain the immense thickness of 84 and 88 fathoms. These Lapland ores, however have proved of little economical value. The want of fuel rendered the smelting of them very expensive, and what is worse, the iron obtained is generally of a brittle and inferior quality. Mount Turberg on the S. of Lake Vättern on the table-land of Småland, forms another of the enormous mountain-masses of iron, but the ore, though otherwise of good quality, contains only 25 per cent. of metal and cannot be smelted to advantage with an admixture of other ores. The most celebrated mines are those of Dannemora in the Upsala, where the iron worked is perhaps the best in the world, and being admirably adapted for steel, is in great demand for that purpose in England, where it commands a very high price. The quantity produced, however, is only about 2000 tons annually. Much larger quantities, also of excellent quality, are produced in the Falun, Gede, Westera, Carlstad, and Örebro. The most valuable quarries are those of porphyry, which takes on a fine polish, and is made into a great number of articles of a very ornamental description.

Climate.—The N. part of Sweden being also the most ele-

rated, has naturally a rigorous climate, though several causes concur to modify and mitigate its rigour. At Kramlestad, lat. 68° 30' at the height of 1440 ft above sea-level, the thermometer in January averages 0° 12 or nearly 32° below the freezing-point but in the hottest months, July, averages 58° 10'; and on the whole year 27° 04, or about 5° below freezing. This annual mean, though low is far above that of places on the same latitude, situated much farther E., as in Siberia. Its lower latitudes, the advantage is still more favourable to Sweden, particularly in winter. Thus at Stockholm, the mean temperature of the six winter-months is 29° 41; whereas in St. Petersburg it is only 21° 2. Compared with places farther W. Sweden loses its advantage. Thus at Wexlöv lat. 56° 58', the mean annual temperature is 44° 56 and at Edinburgh, in lat. 55° 58', is 46° 97 in other words, Edinburgh, though not 1 lower is nearly 2½ warmer. In summer the advantage is remarkably in favour of Sweden, the thermometer in July averaging 65° 46 whereas in Edinburgh it averages only 59°, and even at London not more than 57° 59. The result of these observations is, that the climate of Sweden, though modified by the proximity of the sea, so as to be milder in all respects than the interior of the N. parts of the Russian and Asiatic continents, is much more extreme than that of our own island, and experiences greater degrees both of cold and heat. Hence at Stockholm, the thermometer, which never reaches zero at Edinburgh has been known to descend 28° below it in January and to rise in July to the almost tropical heat of 90° 8. The climate, however, is generally favourable to health and no country furnishes more numerous instances of longevity.

Vegetation, Agriculture, &c.—In the very N. extremity of Sweden, at least in those parts where the surface is not very elevated fine trees of pine, fir, and birch are found. These, however, occupy only occasional patches, and the true forest land must be considered as having its limit near 64. Below this lat. and chiefly in the central and S. parts of the kingdom, the forests occupy at least one-fourth of the whole surface, and sometimes stretch continuously for 30 m. in length by 30 m. in breadth. Many of these, however, consist of trunks of stunted growth, available chiefly for domestic fuel or the supply of the smelting-furnaces, and seldom of much use as timber. Forests in which oak and beech are the prevailing trees, occur only in the S. The far greater part of the available surface not covered with forests, remains either in natural pasture, with which it is only scantily clothed or has been converted into artificial meadows, from which good crops of hay are obtained. The quantity of arable land is very limited, and does not in all exceed 4000 sq. m. Much even of this is of indifferent quality, and till recently was so poorly farmed, that Sweden was annually obliged to import a considerable part of its whole consumption of grain. But in consequence of the great improvements which have taken place, and the removal of anomalies in the modes of tenure, which left large tracts uncultivated, though not unfitted for the plough either by climate or configuration the deficiency has been supplied, and in ordinary years importation can be dispensed with. The prevailing cereals are rye, barley, and oats. The first is nearly a half more in quantity than the other two, which are nearly equal; the quantity of wheat is nearly two times less than that of rye. Another crop which is scarcely less important than those of grain is potatoes. It is grown in almost all parts of the country, and forms one of the main articles of food among the lower classes. The most important auxiliary crops are hemp and flax, particularly the latter which is of excellent quality; on a few favoured spots tobacco, hops, and madder are grown. Cherries, apples, and pears are tolerably abundant in the S. districts. The principal domestic animals are cattle, sheep, and reindeer. The last, necessarily confined to the N. are kept in large herds by the Laplanders, and supply them at once with food and clothing. The cattle are generally of a small breed, without horns, and are not possessed of valuable properties either for the butcher or the dairy. The sheep are also inferior and yield only coarse wool, though some attempts have been made in the S. to cross with the merino. Among the larger wild animals the wolf and bear abound in the forests, and often commit great ravages. The elk and deer are also found, but in more limited numbers. Of smaller animals the most destructive is the lemming, which at intervals of years descends

In January numbers into the low country, and by it waste. Among birds the most remarkable are eagles, caprimulgus, and woodcocks. The rivers and lakes are well stocked with salmon and trout, but the fisheries on the sea-coast have long ceased to be productive. Herrings, which used to rank the coast of the Baltic in large boats, have almost entirely disappeared though large numbers of a fish resembling herrings, and called *större*, are taken along the E. coast.

Manufactures and Trade.—Manufactures have not made great progress. The more important articles are woollen cloths, and other woollen stuffs, which are made in large factories, chiefly at Norrköping and Stockholm and employ a great number of domestic looms in different quarters; cotton, linen, and silk goods, worsted and cotton twist, tobacco, many fastened in many places, and on a large scale at Norrköping; refined sugar, more especially at Göteborg; paper chiefly in Åm Christenstads and Fålen, carried on to a large extent in all the more important towns, but more especially at Stockholm, glass, made on an extensive scale in Åm. Manufactured canvas and millcloth, earthenware, cordage, and various articles in iron. There are also extensive dye-works, soap and oil works, potteries, breweries, distilleries, and building-yards, in almost all the parts of the Baltic. The trade is chiefly in articles of raw produce, among which the most important are iron and timber. Next to these are tar, copper, ash, alum, hemp, oil, bark, tobacco and snuff, paper, &c. The chief imports are colonial produce, salt, wines, silk, wool, cotton stuffs and cotton twist, hemp, hides, skins, butter, bacon, oil, liquor, wares, dyes, &c. The trade is carried on chiefly with the U. States, which take large quantities of iron. Great Britain which takes both iron and timber. Denmark, Hamburg and Lübeck, Brazil, Russia, Prussia, France, and Portugal. The following table presents a summary of the maritime commerce from 1843-51 and in 1863—

Comparative statement of the TONNAGE of the VESSELS that ARRIVED in and DEPARTED from SWEDEN, in the YEARS 1843 to 1851 and in 1863, and of the VALUE of the IMPORTS and EXPORTS in the same years.

Years	Arrived	Departed	Exports	Imports
	Tons.	Tons.	£	£
1843	53,376	379,728	1,909,502	1,433,159
1844	492,084	418,774	1,596,767	1,549,090
1845	502,089	427,114	1,691,323	1,774,032
1846	575,974	546,538	2,074,234	1,716,667
1847	540,992	522,394	2,278,007	2,226,667
1848	426,581	443,921	2,260,080	1,943,326
1849	546,518	508,681	2,155,500	2,126,750
1850	554,087	44,422	2,042,868	1,868,917
1851	626,074	601,574	2,346,008	2,387,738
1863	879,548	1,222,904	6,140,528	5,565,746

For carrying on this foreign trade there are many facilities afforded by a great number of good harbours, but the means of internal communication are deficient, though, from the comparative narrowness of the country the distance from the sea is not very great. The canals connecting the different central lakes, and giving a continuous communication from the Kattegat to the Baltic, are the most important works that have yet been constructed for improving and extending the internal communications, and much might yet be done by deepening and removing obstructions from the beds of rivers. In winter when in most other countries the difficulties of travelling are greatly increased, the Swedes enjoy unusual facilities from the coating of snow which covers the ground, and furnishes an easy means of transport by sledges.

Weights and Measures.—Accounts are kept in *rentschilling*—is 12 *skilling* subdivided into 48 *skilling* of 12 *rentschilling*, or *ore*. The greater part of the currency, however is in paper, which is circulating in sums varying from 8 *skilling* to 500 *rentschilling*. The standard of weight is the *rentschilling* or *mark* of which 100 lbs. = 28-76 *mark*, or 10 *mark* = 1 *mark*, of which 10 *mark* = 1 *mark*, 37 *mark*, and 170 *mark* a *mark*. The principal *ore* or dry measure is the *mark* or barrel = 4-157 *mark*. Imp. For larger measures the *mark* or bushel = 62-23 *mark*. gal. is used; 2 *mark* = 1 *mark*, and 2 *mark* = 1 *mark*. The Swedish foot is = 11-664 in. imp. the Swedish *ore* or *are* = 1 sq. 35 p. the *mark* = 6-64, and the sq. m. = 44 sq. m. imp.

Government, &c.—Sweden and Norway are now united under one sovereign, but each has its own constitution. That of Sweden has at its head an hereditary constitutional sovereign,

who possesses the sole executive but shares the legislative power with a diet or parliament composed of hereditary nobility, clergy, burghers, and peasants or landholders not noble. These four orders form four chambers, which meet and vote separately. That of the nobility consists of the head of every noble family in the kingdom, and as there amount to about 2500 the number of members might be nearly the same, though the attendance seldom exceeds 500, and often not 400. The clerical chamber consists of the Archbishop of Upsala, who always presides, 12 bishops, and about 80 deputies from the various dioceses. The burghers are represented by 87 deputies, of whom Stockholm returns 10 and the peasants by 144 deputies, sent from the different rural districts. To effect constitutional changes the whole four orders must consent; but in ordinary questions the assent of three is sufficient. The king has in all cases an absolute veto, and in the exercise of it or any of his other powers, is responsible only through his ministers. The diet is assembled every fifth year, and sits for three or four months, though occasionally much longer. The government is conducted by a council of state, composed of the two ministers of justice and foreign affairs, and eight councillors, of whom five are the heads of different departments, and three only deliberative. Each line is presided over by a governor, who has under him *provisors* or deputies over several *lands* or districts, and *burgers*, one over each *land*. Justice is administered by three supreme courts, which sit respectively at Stockholm, Jönköping, and Christenstad. To each of these courts a number of secondary tribunals are subordinate, and beneath them again are *land-courts*, or courts of primary resort, to the number of about 764. The Lutheran religion is professed by the great body of the people, and is the only religion acknowledged by the state and though a general toleration is professed dissenters from the state creed are banished the country. The sovereign and all the chief functionaries were by Lutherans. The number of clergy is about 8000. The higher orders are nominated directly by the king, but all ordinary and parochial clergy are elected by the people. The annual revenue is about 3999,000 of which about two-fifths arise from land-tax and other permanent sources, and three-fifths are raised annually by votes of the diet, and are sent chiefly of customs and excise. The army consists of about 48,000 troops and militia, raised by enlistment, and 90,000 reserve, raised by conscription. They are well disciplined, and under arms present a remarkably fine appearance. The navy consists of 10 ships of the line, 8 frigates, 8 brigs, 12 steamers and about 250 smaller craft. The naval force is large compared with the population, and is well manned by about 8000 men.

People.—Almost all the inhabitants of Sweden, with the exception of the Laplanders and Finns, found only in the N., are of Teutonic origin, and preserve the original features of the race in great purity, particularly in the central and S. provinces, where they are characterized by a tall, robust stature, light hair blue eyes, and light complexion. They are active and enterprising, and manifest a marked predilection for scientific pursuits. In point of intelligence and education, they are scarcely surpassed by any country in Europe. This is partly owing to the enlightened spirit of the government, in endeavoring to provide schools in every important locality; but derives great additional aid from the parents, who, in many parts of the country where regular schools, owing to the scantiness of the population, cannot be maintained, are careful to give a substantial education to their children at their own firesides. Hence it is esteemed on good authority, that out of every 1000 Swedes it would be difficult to find one who cannot read. The state of morality, however, is not such as might have been anticipated under such circumstances, and the number of persons tried and condemned for offences is unusually great. Extensive crimes are few, but a great number of minor delinquencies figure in the calendars, and are evidently accounted for by the far too prevalent use of ardent spirits. Owing, probably, to the same cause, domestic virtues, particularly among the unmarried, is not held to high esteem, and the number of illegitimate births at Stockholm is only less than that of Paris.

History.—The earliest traditions of Sweden, like those of most other countries, present only a confused mass of fables. Christianity appears to have been first introduced about the

beginning of the 9th century, under a king known by the name of Hori II; but the great mass of the people continued attached to Paganism, and in a popular revolt, in the beginning of the 11th century, put Erik, one of their sovereigns, to death for demolishing their temples. This, however, was only an inspiring effort for Erik's son, Olaf, succeeded in giving a formal establishment to Christianity. The Swedes and Goths were long ruled by separate sovereigns, but in 1050, they became united under Sigmund, Sigmund had four successors of his line, all distinguished by pious virtues and Christian zeal. Inge II, the last of them, having left no issue, a competition for the crown took place, and a civil war ensued, the Goths favouring one party and the Swedes another. At last, a very extraordinary compromise was made, by declaring that in future the sovereigns should be appointed alternately from the two competing families. This arrangement, entered into about 1150, was preserved in full 1550 when the direct lines of both families had become extinct. For a long time after the kingdom was torn by internal dissensions, till Margaret, Queen of Denmark and Norway, who has been called the Semiramis of the North, interfered, and having defeated Albert, King of Sweden, and made him prisoner formed the famous union of Kalmar in 1397 and united the three crowns in her own person. She died in 1418, and was succeeded by her grand nephew Erik of Pomerania, whose tyranny irritated the Swedes, already tired of the Danish yoke. They accordingly attempted to throw it off, and were at first successful, but though Denmark retained the nominal supremacy the government was virtually lodged in a Swedish Riksdag or assembly of administrators, whose office became hereditary in the family of Sten Sture in 1471. Turbulent times still continued the Swedes endeavouring to rid themselves of the yoke, and the Danes to retake it more firmly. At last, in 1520 fortune seemed to declare in favour of the latter when Christian II of Denmark overthrew and slew Sten Sture II, and put to death at Stockholm by a wholesale massacre, 94 prelates, senators, and nobles, who were disposed to dispute his authority. This atrocity worked its own punishment. The Swedes, headed by Gustavus Eriksson Vasa, son of one of the victims, flew to arms, and the Danes, after a strong but ineffectual resistance, were finally expelled. With the new dynasty which thus commenced with numerous consent in the person of Gustavus Vasa, the proper independence of Sweden may be said to have commenced, and its history becomes much more interesting. In 1522, the Reformation was introduced by Olaus Petri, a disciple of Luther, and advanced with such rapidity that in 1523, at the diet of Westerås, the king and people solemnly vowed adherence to the Confession of Augsburg as their standard of faith. The reign of Gustavus was long and prosperous and peaceful, enjoying the double blessings of a better government, and a purer religion, made more progress in civilization than for centuries before. At his death, in 1560 this prosperity was suddenly interrupted by the succession of his son Erik XIV, who involved his country in rash and unsuccessful wars with Russia, Poland and Denmark, and committed so many atrocities, that remorse at last drove him to madness. The states formally deposed him, and gave the crown to his brother John III in 1569. John reigned prosperously till he provoked the hostility of his subjects, by attempting to introduce a modified form of Popery. The attempt signally failed, and Lutheranism regained its ascendancy, without punishing matters so far as to deprive John of his throne. His son Sigismund, who succeeded him in 1592 had, five years before, been elected King of Poland, and thus united the two crowns. He might have reigned peacefully but untainted by the lesson which his father had received, he renewed the attempt in favour of Popery, and failed still more signally. After provoking a religious war and calling in the Poles to crush the liberties of the Swedes he was formally deposed by the diet of Norwiche, and his uncle the Duke of Södermanland, who had long stood at the head of the Protestant interest, was called to the throne in 1604, under the name of Charles IX. A war of succession between the Swedes and Poles now commenced and was carried on with great ferocity and varied success for many years. Charles was, however, so far successful, that on his death, in 1611 his son Gustavus Adolphus took peaceable possession of the throne. The reign of this most distinguished sovereign, and his heroic achievements in Germany

in defence of Protestantism, when threatened with destruction by the tyranny and bigotry of the houses of Austria, belong more to European than to Swedish history. The first years of his reign were devoted to internal improvements, and the consolidation of the valuable conquests which had been made on the continent. By the treaty of Stolbovo, in 1617, he obtained from Russia a cession of all her possessions on the Baltic, and by that of Altmark, in 1629 Livonia and Polish Prussia became Swedish provinces. In 1630 he was appointed captain-general of the Protestant league, and commanded the series of brilliant victories, which at once saved Protestantism and gave a death blow to the ambitious aims of Rome. His victory at Lützen, in 1632 cost him his life, and he was succeeded by his daughter Christina, when only six years of age. The evils usually attendant on a minority were avoided by the ability with which the celebrated Chancellor Oxenstierna administered the government, and new laurels were reaped by the Swedish armies under the leadership of captains whom the great Gustavus had trained. At the peace of Westphalia, in 1648, Sweden was formally confirmed in her continental possessions, which gave her a voice in the Germanic diet, and raised her to the rank of a first-rate European power. Christina assumed the reins of government, but soon avowed that she had neither inclination nor the kind of ability requisite to manage them properly, and finally completed her series of eccentricities by abdicating the throne, retiring to Rome and dying a Roman Catholic. Her abdication was made in 1654, in favour of her cousin, Count Palatine of Deux Ponts, who assumed the throne under the name of Charles Gustavus. He displayed great military talents, and made important conquests in his dominions. He was succeeded in 1660, by a son in minority, under the title of Charles XI, who reigned with distinguished ability for the long period of 37 years. During this reign a struggle commenced between the crown and the aristocracy. The burghers and peasants took part with the former, and at last, in 1697, the diet formally surrendered its powers, and declared the king absolute. He was wise and politic enough not to abuse the powers thus extravagantly conferred, and at his death, in 1697, left the kingdom in a very flourishing condition to his son Charles XII. This celebrated prince, then a mere youth, found himself suddenly assailed by an unexpected coalition on the part of Poland, Denmark, and Russia; but he soon rid himself of his opponents by signally defeating each of them in succession. It had been well for himself and his country could he have rested satisfied with the honour of dictating an advantageous peace, but unparalled success, working on a mind in which ambition and the love of glory were ruling passions, ruined all. He lost his conquests as rapidly as he had gained them; and at his death, in 1718, left his kingdom greatly curtailed in its dimensions, and exhausted by ruinous wars. Internal dissensions were now added to foreign disasters and two violent factions, known by the name of the Hats and Caps—the former favouring a French, and the latter a Russian alliance—kept the nation in a state of ferment for more than half a century. Charles XII had been succeeded by his niece Ulrica-Elofsona who shortly after abdicated in favour of her husband Frederick of Hesse-Cassel, during whose reign Sweden was obliged to submit to two most disadvantageous treaties with Russia—that of Nystad, in 1721, and that of Åbo, in 1743, the effect of which was to degrade her from the commanding position she had previously occupied, and sink her again to the rank of a second-rate power. In 1751, Adolphus Frederick of Holstein-Gottorp succeeded, and was followed, in 1771, by his son Gustavus III, who by the support of the army and body of the people, succeeded in re-establishing the government nearly as it existed in 1690 and in getting down the factions of the Hats and Caps the use of which party-names was extensively prohibited. The chief events in the reign of Gustavus III are the adhesion of the armed neutrality of the Northern Powers against Great Britain, an alliance with the Porte, which led to a war with Russia and Denmark, and, on the outbreak of the French revolution, an alliance with Austria and Russia, with a view to a combined invasion of France. Gustavus III was to have headed the invasion in person, but perished by the hand of an assassin in 1792. The reigns of his son and successor Gustavus IV., was a continued series of disasters, every change of policy only leading to some new

ions of territory, all Sweden was stripped of her constitutional liberties, and the island later, and the remainder of Finland. These losses were partly attributed to the king's irresponsibility, and he was not only deposed, but his son, who should have been Gustavus V., was not called, and his uncle, the Duke of Södermanland, ascended the throne under the title of Charles XIII. As he was old, and without issue, the Prince of Holstein-Augustenburg had been declared his successor, but the sudden death of that prince in 1810, rendered a new election necessary, and Bernadotte, son of Napoleon's marshals who had risen from the ranks, was chosen viceroy by the states. On his arrival he assumed the reins of government. It was thought by many that he would prove a mere tool in the hands of Bonaparte, but he soon gave proof of independence, and of a determination to pursue the true interests of his adopted country, regardless of all other considerations. On the retreats of Bonaparte during his Russian expedition, he entered into alliance with Russia and Great Britain, and during the war of liberation in 1813 not only led the Swedish troops in person, but is said to have contributed greatly by his counsels to the success of the campaign. At the peace, Sweden received compensation for her losses, and services, by the annexation of Norway. Charles XIII died in 1818, and Bernadotte assumed the title of Charles XIV. He showed himself throughout an able, enlightened, and patriotic prince, and at his death, in 1844, left the kingdom, in a far more prosperous state than he found it, to his son who reigned under the title of Oscar I and died in 1859. The united kingdoms enjoying the blessings of peace and good government, continue to make rapid advances in prosperity.

SWENIGOROD a town, Russia, gov and 30 m. W Moscow, cap. circle, on the Moskwa, with a Kremlin or fortress, in a very disordered state, three churches, a circle school, manufactures of silk, and some trade. Pop. (1850) 1260.

SWELVEHIM a vil and com. Belgium, prov W Flanders, 27 m. S. by E. Bruges with a church several schools, breweries, distilleries, dyeing and bleaching works and manufactures of linens, hats, ropes, candles, starch, tobacco, and oil. Pop. 5242.

SWELVEHELE a vil and com. Belgium, prov W Flanders, 10 m. S. Bruges. Most of the inhabitants are Hanseatic.

SWIAGA a town in Russia, river in S.W. of gov from bank flows N.W. watering the W. ends of the town of that name flows N. into gov Kazan, and joins bank N. also, near Swiekl total course about 200 m.

SWIENTA-MIERKA a town in Prussia. See HILDEBRUNN. **SWIETLA GORODSKA** a town in Bohemia, circle and 17 m. S. Olomouc, on the Sava, here crossed by a long wooden bridge. It has a castle, church, townhouse, hospital, and school, and manufactures of glass, paper and pencils. Garrets are found and polished here. Pop. 1472.

SWILLY (Lough), an arm of the Atlantic, which formed by Donegal Head on the E. and Point Point on the W. in the N. of Ireland, co. Donegal, penetrates that county in a S. but somewhat easterly direction for about 25 m. It is a fine expanse, of great depth, and on its E. shore, opposite to the town of Donegal, has a roadstead where the largest men-of-war might anchor in safety. It is not much frequented.

SWIMBRIDGE, a vil. and par. England, co. Devon, 4 m. E.E.E. Barnstaple, in a hollow surrounded by verdant hills, with a handsome church, and several quarries of limestone and building-stone. Area of par. 7280 a. Pop. 1788.

SWINON, a market town and par. England, co. Wilt. The town, 41 m. N. Salisbury, a station on the Great Western railway has five parallel streets, generally of good width, regular and well kept; a handsome Gothic parish church, with a beautiful tower and spire. Independent, two Wesleyan, Primitive Methodist and Baptist chapels a handsome townhall and market-house, national, infant, and British schools a library and literary institution, with a reading-room.—The Great Western railway workshops are here, and when in full operation employ 1500 hands. In connection with them a new town called New Swindon, has recently sprung up. It has been formed into a separate ecclesiastical district, and has a handsome church, schools, &c. A new building, to furnish a market-hall, and accommodate the mechanics institute, library, theatre, &c., is (1864) in course of erection. The

weekly area market of Swindon is important. Area, 8186 a. Pop. 4678.

SWINEFLEET a vil. and chapelry, England, co. York (W. Riding), on the Ouse, 3 m. E.E. G. G. It consists of a long range of well-built houses, stretching along the banks of the river. Besides the chapel, there are places of worship for the Primitive and Wesleyan Methodists. Pop. 1152.

SWINEFORD a small market town, Ireland, co. Mayo 28 m. N.W. by S. Ballina with an Episcopalian church, a R. Catholic chapel, workhouse, court-house, and national school. Pop. 991.

SWINEMUNDE, a seaport in Prussia, prov Pomerania, gov and 80 m. N. N. W. Stettin, of which it is the port, on an island on the shores of the Baltic, separated from the mainland by the Wittener-Haff, the Swine and other channels, by which the Oder discharges itself into the sea. It has spacious well-built streets, a court of law, and several public offices a harbour, in which vessels drawing 18 ft. or 19 ft. can unload at the quay, and good building-docks. In 1852 there entered the port 1664 vessels. It is much frequented for sea bathing and has a bath-house and assembly room about 1 m. from the town. Pop. 4055.

SWINEHEAD a market town and par. England co. Lincoln 7 m. S. S. W. Boston. It was formerly washed by the sea, and had a harbour which has been silted up. It has a handsome church with a lofty spire, a free school, and the remains of a Danish encampment. Area of par. 6100 a. P. 3044.

SWINFORD a town, co. Kildare-Swinford a par. England co. Stafford on the Dudley and Stourbridge, and the Staffordshire and Worcestershire canals, in a district abounding with iron and coal, 8 m. W. S. W. Dudley. It has a handsome modern church an ancient church now converted into a chapel of ease, four other churches, Baptist, Independent, and Primitive and Wesleyan Methodist chapels, extensive manufactures of iron, brass and steel goods, tin and glass ware brick and tile works, potteries for stone and earthen ware, and numerous collieries. Area, 7315 a. Pop. 27,501.

SWINNERTON a vil and par. England co. Stafford on the Sow in a finely diversified district, through which both the Trent and Mersey canals and the Liverpool and Birmingham railway pass, 3 m. N. W. W. Stone. It has an ancient parish church, with a vestry which has a parochial school, and containing a colossal figure of our Saviour, which was dug up in the vicinity and is supposed to have been thus secured at the Reformation. Area of par. 6520 a. P. 946.

SWINTON a vil. and chapelry, England, co. York (W. Riding) on the Don and the Midland railway 5 m. N. N. E. Rotherham. It has a handsome chapel, Wesleyan and Independent chapels, a national school, iron works, and manufactures of clothes and earthen ware. Pop. 1817.

SWINTON and BIRKBECK a par. Scot. Berwick 4 m. by 3 m. Pop. 994.

SWIL, a river Russia, issues from the S.W. extremity of Lake Onega, gov. Olonets, flows W. S. W. and falls into the S.E. side of Lake Ladoga. It flows under the two largest Russian lakes, and has its importance very much increased by means of a canal, which avoids the difficult navigation of the latter lake, and proceeds along its S. shore to St. Petersburg. The whole course of the Swil is about 140 m.

SWITZERLAND (German, *Schweiz*; Italian, *Svizzera*; French, *Suisse*; Latin, *Helvetia*), a federal republic of Central Europe, situated between lat. 45° 50' and 47° 50' N., and lon. 6° and 10° 25' E. and bounded, N. by Baden, from which it is separated for the most part by the Rhine, N.E. by Wurtemberg and Bavaria, from which it is separated by the Lake of Constance; E. by the principality of Liechtenstein and the Tyrol, from the former of which it is separated by the Rhine, and from the latter partly by the Rhine, but chiefly by ranges of the Graian Alps; S. by Austrian Italy, Piedmont, and Savoy, from the two first of which it is separated also by the Alps, and from the latter partly by the Alps and the Lake of Geneva; and W. by N. W. by France, from which it is separated in part by the Jura mountains and the river Doubs. It thus appears that mountainous and rivers inclose the country on almost every side, and define its boundaries by grand natural features. The chief localities where these features are wanting are on the N., where the greater part of cant. Schaffhausen lying N. of the Rhine is contiguous to Baden, in the S., where the S. part of cant. Ticino

veloped. Granular limestone is widely diffused throughout the Alps, and is more particularly abundant on the Great St. Etienne, St. Bernard, and the S. side of St. Gothard. It usually rests on mica-schists, and often alternates with clay-slate and primitive gneiss. Mountain limestone composes the great masses of the Dent du Midi, the Dufour, the Wetterhorn, the Doldau. It is also seen in large masses on the E. shore of the Lake of Geneva, on the Molasses, Stockhorn, Pilat, and Saanen. The proper carboniferous rocks are very sparingly developed, but regular coal-bearing strata are found in the St. Gallen, the Rorschach, and on the S. shore of Lake Thun. In the Jura limestone equivalent to the oolite, often resting on micaceous, is so largely developed, that the name of Jura limestone is now often applied to the whole oolite formation. Above the Jura limestone is the molasse, a soft green sandstone, belonging to the lower series of the tertiary formation, and covering an extensive area in the lower parts of Switzerland. None of the rocks are rich in minerals. As in almost all mountainous countries, particles of gold are found in the sands of many of the rivers, and more especially in those of the Rhone, in the Rhodan, in the Rhone, the Kanton, and the Letten, but in none of them in such quantities as to repay the search. Lead and copper, both of which are found in some of the Grisons, and which were worked though they are now abandoned. Iron is more widely diffused, and is worked to advantage in several quarters, particularly among the strata connected with the Jura limestone. Rock-salt is worked to some extent in the Val de Saline-springs occur in many places but have not been turned to much account. The only other minerals deserving of notice are alabaster and marble, widely diffused neither near Lake Thun, particularly in the Grisons, and especially in the Val de Travers in the Valais. Mineral springs occur in many quarters at the most celebrated, we may mention those of Leuk in the Valais, Baden and Schinznau in Aargau, Pfäfers in St. Gall, and St. Moritz in the Grisons.

Climate.—The great diversities here observed, are evidently caused not by differences of latitude, but of elevation. Hence while winter is reigning in all its rigour on the lofty summits or slopes of the mountains, it is only necessary to descend into the lower valleys to find that spring is far advanced. In seeking this descent we may direct our course not only E., where in the lower valleys of the Rhone a truly Italian climate is enjoyed, but even W. and N. in the plains of Basel, the winter has long departed, though it still lingers among the heights of St. Gothard. According to observations which have long been made with great care at the hospice of St. Gothard, Bern, Zürich, and Geneva, the respective mean temperatures are, in winter 12° 45', 29° 37' 50", 34°, 38° 35' and in summer 48° 71' 58", 78°, 84°, and 65°-10°. For the purpose of comparison, we may mention that the winter-temperature of London, is 35°-22° and the summer-temperature, 51° 74° and that the mean annual temperature of the hospice of St. Gothard, is nearly two degrees lower than that of the N. Cape. The same causes which thus diversify the climate, tend also to make it extremely variable even in the same localities, and hence days of almost insupportable heat, are not infrequently preceded by cold mornings, and succeeded by equally cold evenings. These sudden changes are very trying to weak constitutions, and sometimes make epidemic diseases generally prevalent, but, with the exception of a few swampy spots from which malarious miasma is diffused the air is clear and bracing, and eminently favourable to health.

Vegetation, Agriculture, &c.—Few countries in Europe, even of larger extent, can boast of a more varied vegetation than Switzerland. It has been divided into seven regions. The characteristic product of the first is the vine, which grows up to 1700 ft. and in some districts of Zürich, and the Lake of Thun, to 1900 ft. above the sea-level. The next is cereal in the valley, or lower mountain-region. It rises to the height of 2600 ft. and is characterized by the luxuriance of its vegetation. Though not well adapted for wheat, it raises good crops of rye, and has excellent meadows, from which two cuttings of hay are annually obtained. The third, or upper mountain-region, has its limit at 4100 ft. Its principal product is forest-wood, consisting of all varieties of hard-wood but more especially beech. The tallest trees in it, though not vigorously, up to 8500 ft. and good crops are obtained of barley and oats. The pastures too are excellent. Above

this, and up to the height of 5500 ft., is occupied by the fourth or subalpine region, distinguished by its pine-forests. Here winter lasts from eight to nine months; the regular crops are grown, but some kinds of kitchen-vegetables are raised and a few potatoes, generally of small size. Many of the heights are covered with a rich grassy sward. The next two regions are sometimes included under the common name of alpine, though it evidently admits of two distinct divisions; the one, lower alpine, terminating at 6500 ft., and the other, upper alpine, ascending to the limit of perpetual snow. The former is the proper region of alpine pastures the latter as it ascends becomes more and more stunted in its vegetation, and the vegetation of the meadows is lost, spring and autumn being altogether excluded, and a winter of rigorous severity following close upon a short summer of only five or six weeks. In the lower parts of these regions some trees are occasionally seen but many of the valleys are filled with enormous glaciers, and in many spots and ravines which the sun cannot reach, the snow never entirely melts. The seventh and last region is that of perpetual snow. Even here vegetation is not utterly extinct, and several varieties of lichens are found clinging to the rocks. Many parts, even of the lower regions of Switzerland are of a very sterile nature, but on every side the effect of pasturing industry are apparent and no spot that can be traced to good account is left uncultivated. Still so unfavourable is the soil and climate that on dividing the whole area of the country into three parts, it will be found that only one of these raises grain sufficient for its own consumption, the second raises not more than eight and the third barely six months supply. The deficiency is supplemented partly by importation and partly by the general cultivation of potatoes in the more mountainous districts dairy produce forms the chief article of subsistence. The best cultivated countries are Basel, Aargau, Thurgau, Valais, and Geneva. The principal grain-crops are, in the latter districts, spelt, wheat, rye, summer and winter barley and Turkish corn; in the higher districts summer-barley and oats. Hemp and flax are extensively grown on all lands suitable for them, and nearly supply the whole of the home consumption, oil and peppy seed are also generally cultivated, and in some of the higher districts sawney forms a favourite crop. Tobacco is chiefly confined to the latter parts of Fribourg, Tessin, and Valais. In the same districts occasional patches of asilum are seen. Fruit is produced in abundance in all the N. countries, where apple, peach, plum, and cherry trees are seen in almost every quarter, growing either singly or in orchards they are met with less frequently in the E. and W. and become somewhat rare in the S. In many of the warmer spots with a S. exposure and N. shelter apricots, peaches, almonds, and figs thrive well in the open air. More delicate fruits, as oranges, citrons, lemons, and pomegranates, are almost confined to the S. side of the Alps, in the Canton. There too the olive thrives, and a good deal of silk is obtained by the cultivation of the mulberry. With the exception of Uri and Glarus, there is not a season in which the vine is not grown to a greater or less extent. Many of the vines in these parts are trained on trees, but the quality, in general, is inferior, and fails to create a foreign demand. Timber of all kinds is abundant in most of the cantons, but great waste has been committed, and several of the most accessible forests have been so much thinned, that the prospect of an ultimate scarcity in several quarters has begun to excite serious apprehension. Among domestic animals the first place belongs to the horned cattle, which are both remarkable for their sturdiness and the superiority of their breeds. Swiss cows can scarcely be surpassed, either in beauty or in the amount of their dairy produce, and the demand for them in other countries has given rise to a very lucrative branch of trade. The summer-stock is estimated at 900,000, and the winter-stock at 600,000 head. Horses attract less attention, and are generally of rather diminutive size, though strong and hardy. Where used merely as pack-animals to transport burdens across the mountains, they are generally well adapted for the purpose. The mules used in the same way are also tolerable; the ass, also occasionally used is very inferior. Sheep are very much confined to the lower districts, and have not yet attracted much attention, except in some Valais and Geneva, where the merino, regularly imported from Spain, is kept large pure, chiefly for the purpose of supplying a foreign demand, but has been extremely com-
